2. REMOVE HEADLIGHT ASSEMBLY

a. Remove the headlight assembly (Click here).

3. REMOVE FRONT AIRBAG SENSOR

a. Remove the n t and front airbag sensor from the body.

b. Disconnect the connector.

for Preparation Click here

HINT:

- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**

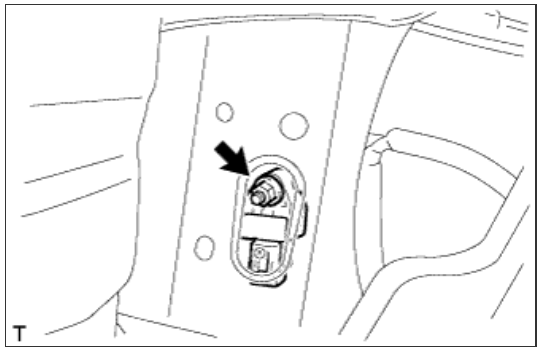
1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).



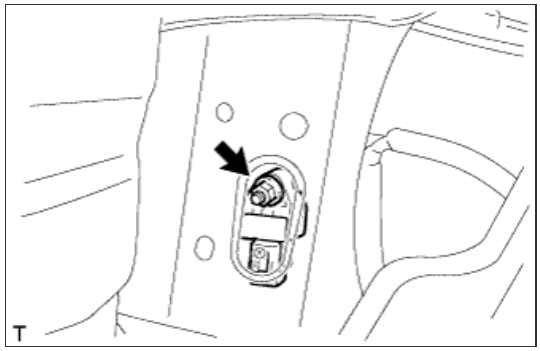
2. REMOVE HEADLIGHT ASSEMBLY

a. Remove the headlight assembly (Click here).

3. REMOVE FRONT AIRBAG SENSOR

a. Remove the n t and front airbag sensor from the body.

b. Disconnect the connector.



for Preparation Click here

HINT:

- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**

1. INSTALL FRONT AIRBAG SENSOR

a. Check that the engine switch is off.

b. Check that the cable is disconnected from the battery negative (terminal.

CAUTION:

ait at least seconds after disconnecting the cable from the negative (battery terminal to disable the SRS system.

c. Connect the connector.

d. nstall the front airbag sensor with the n t.

Torque:
9.0 N*m{ 92 kgf*cm , 80 in.*lbf }

NOTICE:

- **If the front airbag sensor has been dropped, or there are any cracks, dents or other defects in the case, bracket or connector, replace it with a new one.**
- **When installing the front airbag sensor, be careful that the SRS wiring does not interfere with other parts and that it is not pinched between other parts.**

e. Check that there is no looseness in the installation parts of the front airbag sensor.

2. INSTALL HEADLIGHT ASSEMBLY

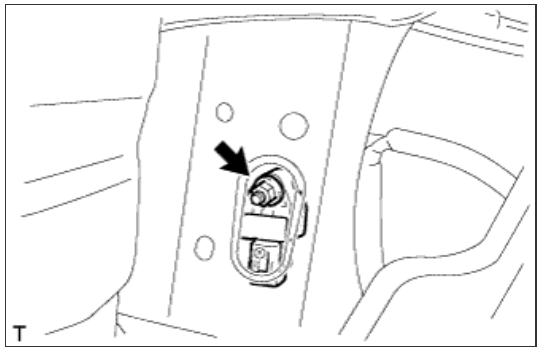
a. nstall the headlight assembly (Click here).

3. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL

NOTICE:

hen disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

4. CHECK SRS WARNING LIGHT



a. Check the SRS warning light (Click here).

for Preparation Click here

HINT:

- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**

1. INSTALL FRONT AIRBAG SENSOR

a. Check that the engine switch is off.

b. Check that the cable is disconnected from the battery negative (terminal.

CAUTION:

ait at least seconds after disconnecting the cable from the negative (battery terminal to disable the SRS system.

c. Connect the connector.

d. nstall the front airbag sensor with the n t.

Torque:
9.0 N*m{ 92 kgf*cm , 80 in.*lbf }

NOTICE:

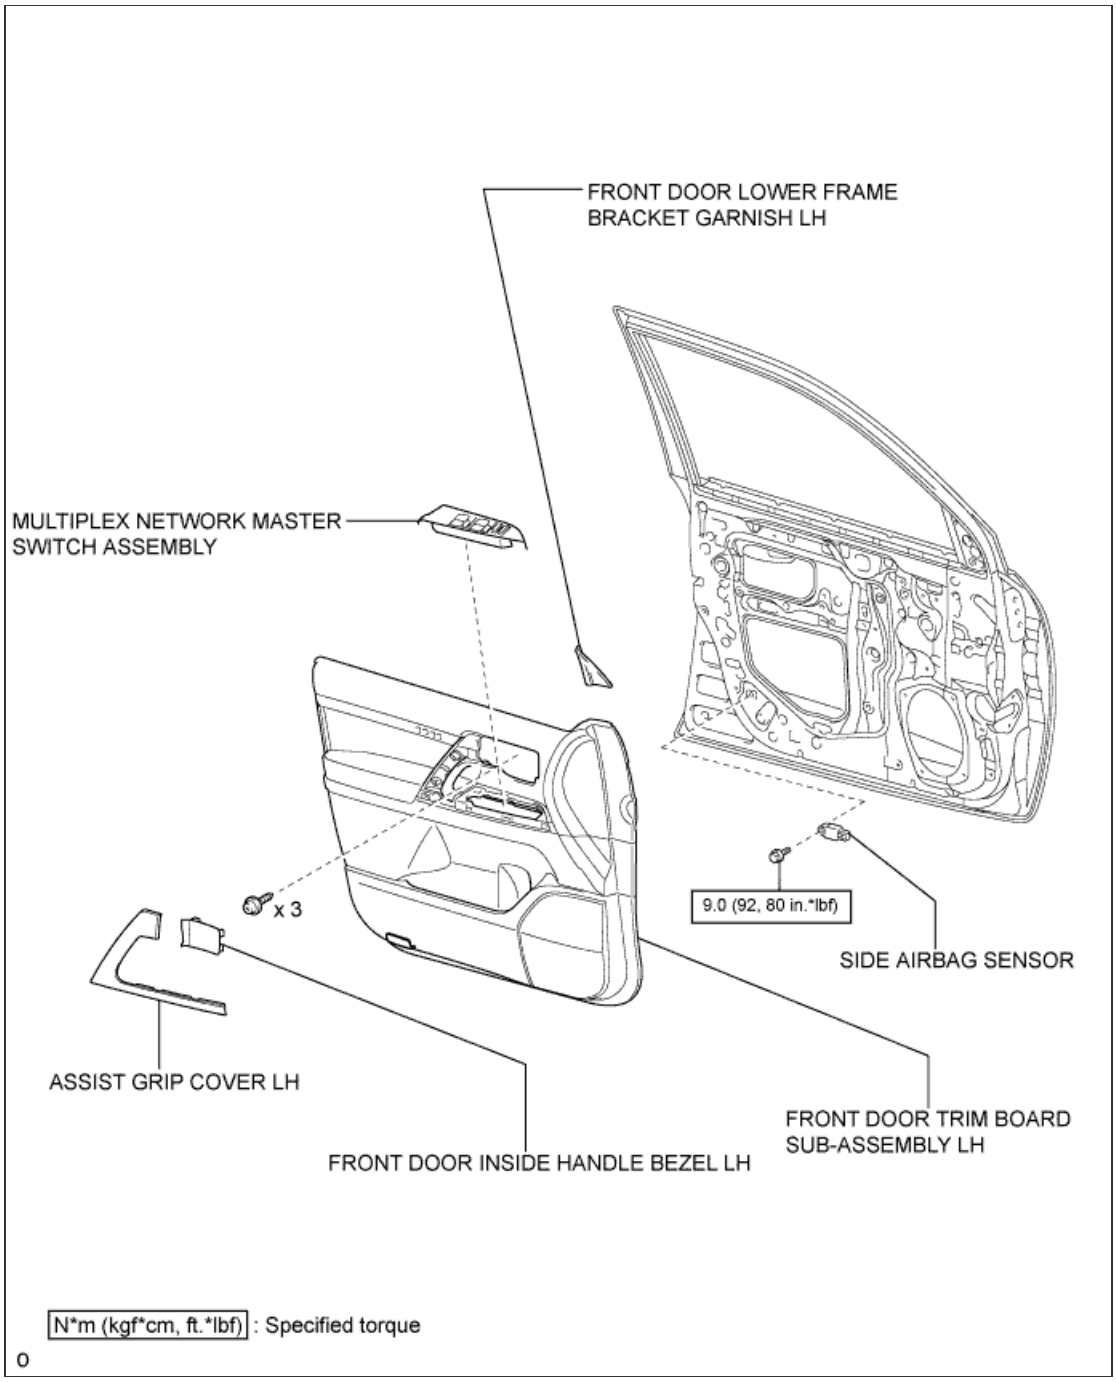
- **If the front airbag sensor has been dropped, or there are any cracks, dents or other defects in the case, bracket or connector, replace it with a new one.**
- **When installing the front airbag sensor, be careful that the SRS wiring does not interfere with other parts and that it is not pinched between other parts.**

e. Check that there is no looseness in the installation parts of the front airbag sensor.

2. INSTALL HEADLIGHT ASSEMBLY

a. nstall the headlight assembly (Click here).

3. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL



NOTICE:

hen disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

4. CHECK SRS WARNING LIGHT

a. Check the SRS warning light (Click here).

for Preparation Click here

for Preparation Click here

1. CHECK SIDE AIRBAG SENSOR (VEHICLE NOT INVOLVED IN COLLISION)

a. Perform a diagnostic system check (Click here).

2. CHECK SIDE AIRBAG SENSOR (VEHICLE INVOLVED IN COLLISION AND AIRBAG HAS NOT DEPLOYED)

a. Perform a diagnostic system check (Click here).

b. When the front door of the vehicle or its area is damaged, check if there is any damage to the side airbag sensor. If there are any defects as mentioned below, replace the side airbag sensor with a new one:

- Cracks, dents or chips on the sensor housing.
- Cracks or other damage to the connector.
- Peeling off of the label or damage to the serial number.

CAUTION:

For removal and installation procedures of the side airbag sensor, be sure to follow the correct procedure.

3. CHECK SIDE AIRBAG SENSOR (VEHICLE INVOLVED IN COLLISION AND AIRBAG IS DEPLOYED)

a. Replace the side airbag sensor.

CAUTION:

- **For removal and installation procedures of the side airbag sensor, be sure to follow the correct procedure.**
- **If the airbags have deployed, replace the side airbag sensor on the side in which the collision occurred. Replace both if necessary.**

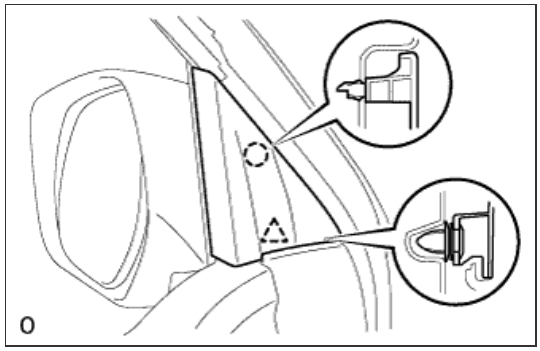
for Preparation Click here

HINT:

- **Use the same procedures for the RH and LH.**
- **The procedures listed below are the LH side.**

1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

CAUTION:



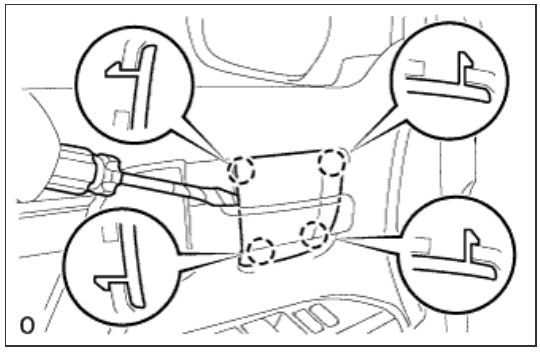
Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

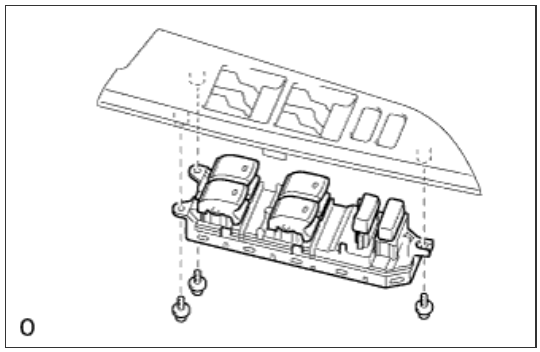
2. REMOVE FRONT DOOR LOWER FRAME BRACKET GARNISH LH

a. Detach the clip and claw, remove the front lower door frame bracket garnish.



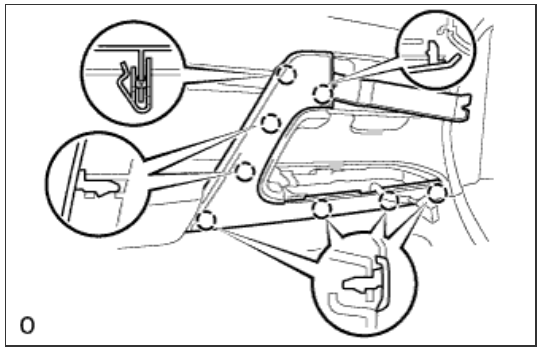
3. REMOVE FRONT DOOR INSIDE HANDLE BEZEL LH

a. Using a screwdriver, detach the 4 claws and remove the inside handle bezel.



HINT:

Tape the screwdriver tip before use.

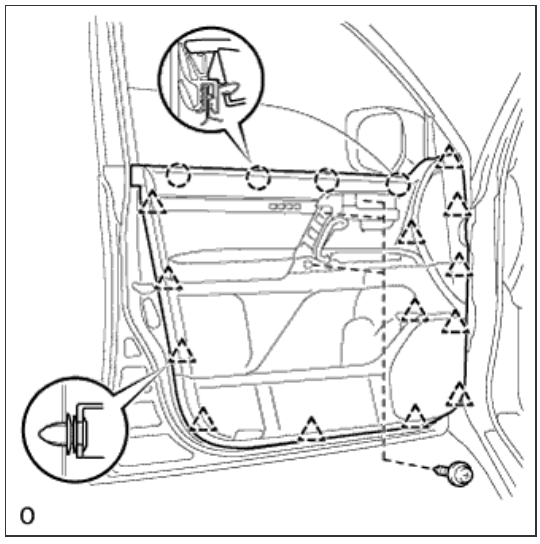


4. REMOVE MULTIPLEX NETWORK MASTER SWITCH ASSEMBLY

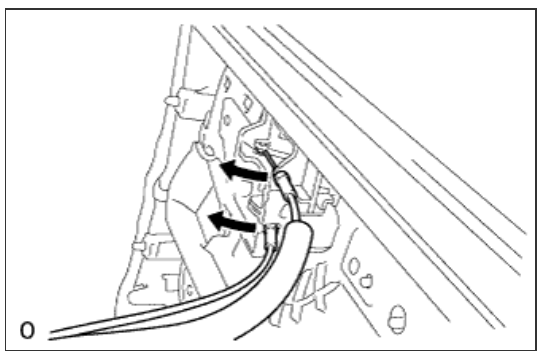
a. Remove the 3 screws and multiplex network master switch.

5. REMOVE ASSIST GRIP COVER LH

a. Using a moulding remover, detach the 8 claws and remove the door assist grip cover.



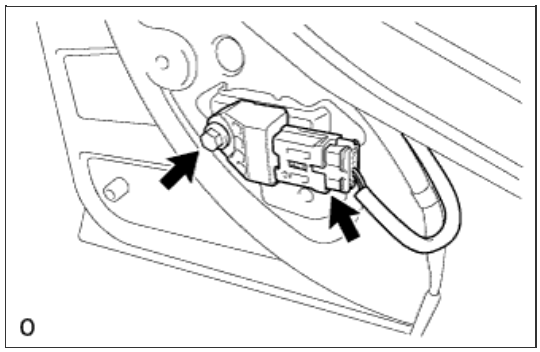
6. REMOVE FRONT DOOR TRIM BOARD SUB-ASSEMBLY LH



a. Remove the 3 screws.

b. Remove the 13 clips, 4 claws and trim board.

c. Disconnect the connector.



d. Disconnect the 2 cables from the inside handle.

. REMOVE SIDE AIRBAG SENSOR

a. Disconnect the connector.

b. Remove the bolt and side airbag sensor.

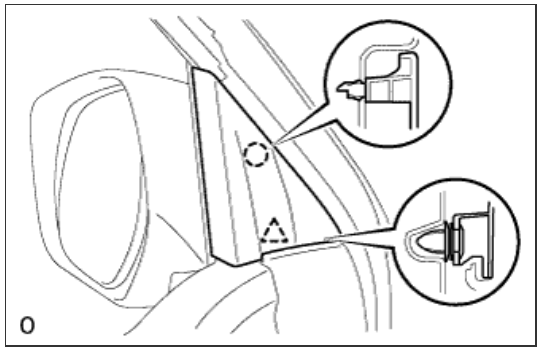
for Preparation Click here

HINT:

- **Use the same procedures for the RH and LH.**
- **The procedures listed below are the LH side.**

1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

CAUTION:



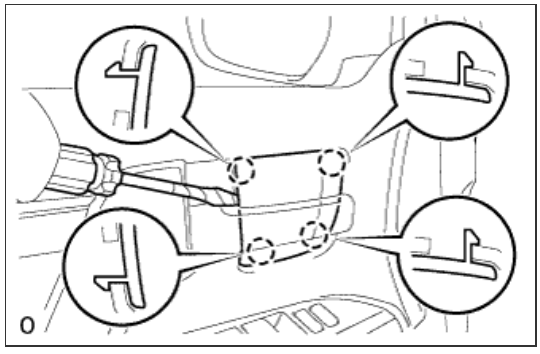
Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

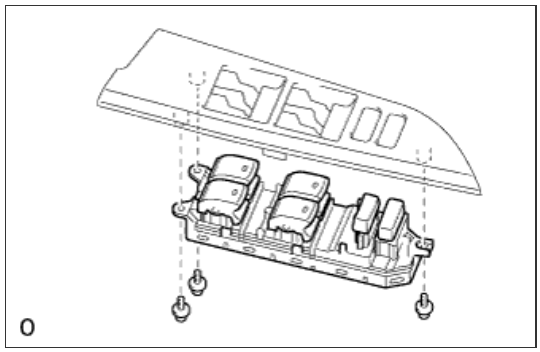
2. REMOVE FRONT DOOR LOWER FRAME BRACKET GARNISH LH

a. Detach the clip and claw, remove the front lower door frame bracket garnish.



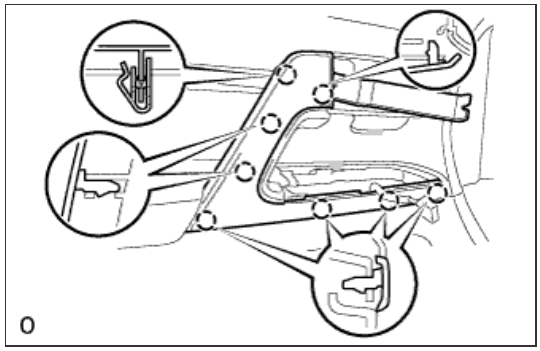
3. REMOVE FRONT DOOR INSIDE HANDLE BEZEL LH

a. Using a screwdriver, detach the 4 claws and remove the inside handle bezel.



HINT:

Tape the screwdriver tip before use.

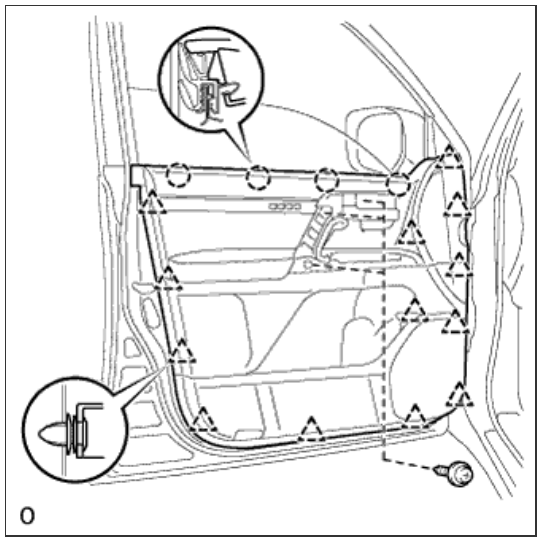


4. REMOVE MULTIPLEX NETWORK MASTER SWITCH ASSEMBLY

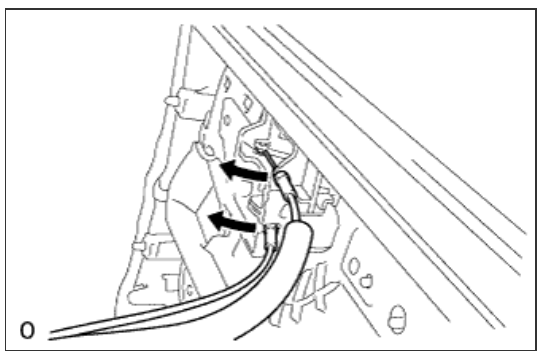
a. Remove the 3 screws and master switch.

5. REMOVE ASSIST GRIP COVER LH

a. Using a moulding remover, detach the 8 claws and remove the door assist grip cover.



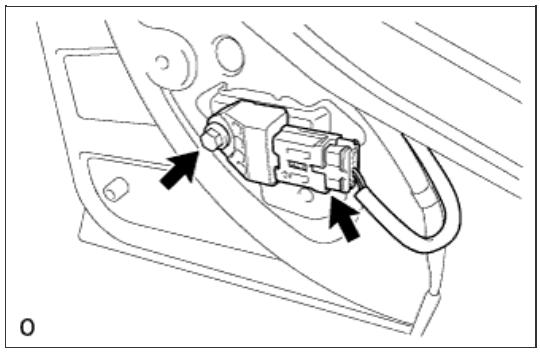
6. REMOVE FRONT DOOR TRIM BOARD SUB-ASSEMBLY LH



a. Remove the 3 screws.

b. Remove the 13 clips, 4 claws and trim board.

c. Disconnect the connector.



d. Disconnect the 2 cables from the inside handle.

. REMOVE SIDE AIRBAG SENSOR

a. Disconnect the connector.

b. Remove the bolt and side airbag sensor.

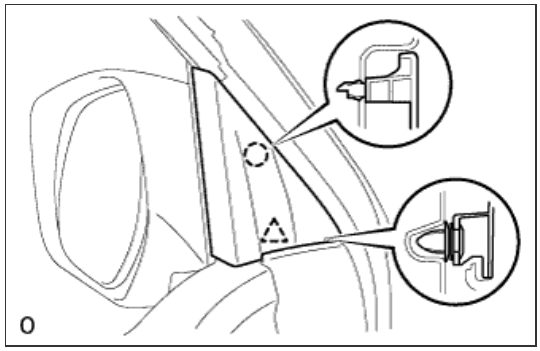
for Preparation Click here

HINT:

- **Use the same procedures for the RH and LH.**
- **The procedures listed below are the LH side.**

1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

CAUTION:



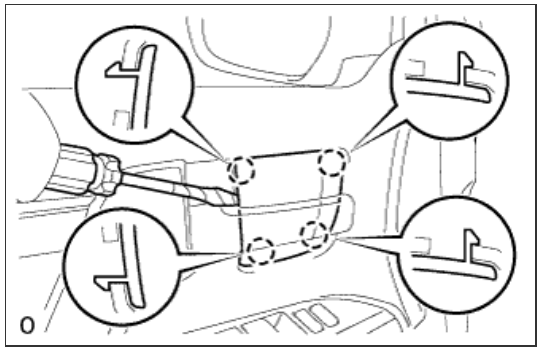
Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

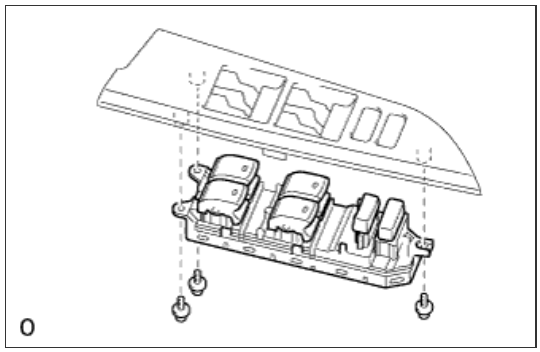
2. REMOVE FRONT DOOR LOWER FRAME BRACKET GARNISH LH

a. Detach the clip and claw, remove the front lower door frame bracket garnish.



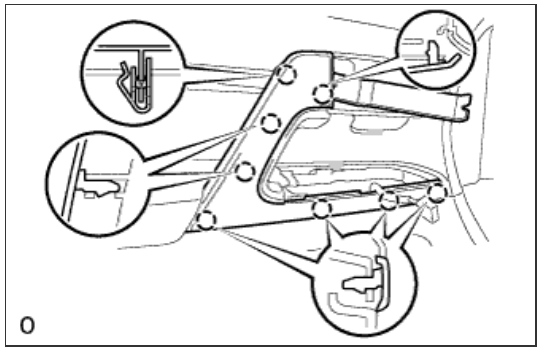
3. REMOVE FRONT DOOR INSIDE HANDLE BEZEL LH

a. Using a screwdriver, detach the 4 claws and remove the inside handle bezel.



HINT:

Tape the screwdriver tip before use.

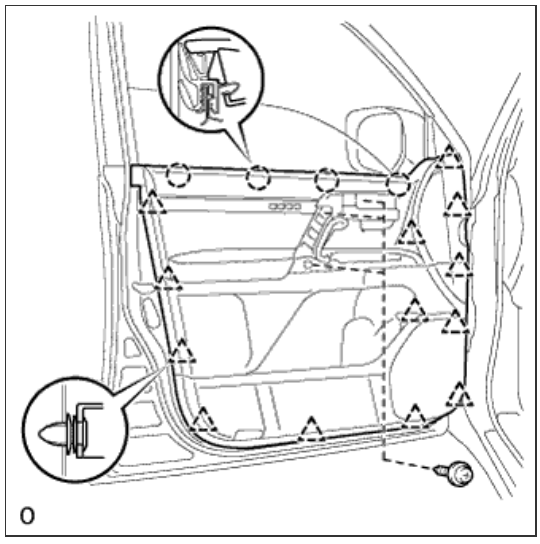


4. REMOVE MULTIPLEX NETWORK MASTER SWITCH ASSEMBLY

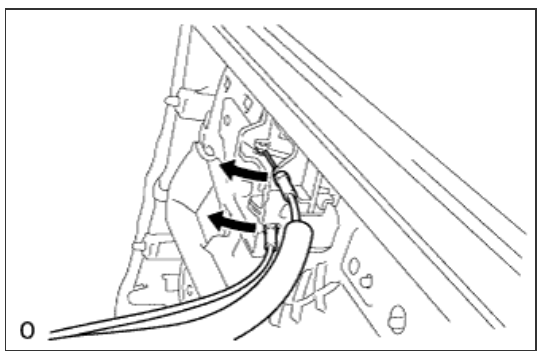
a. Remove the 3 screws and master switch.

5. REMOVE ASSIST GRIP COVER LH

a. Using a moulding remover, detach the 8 claws and remove the door assist grip cover.



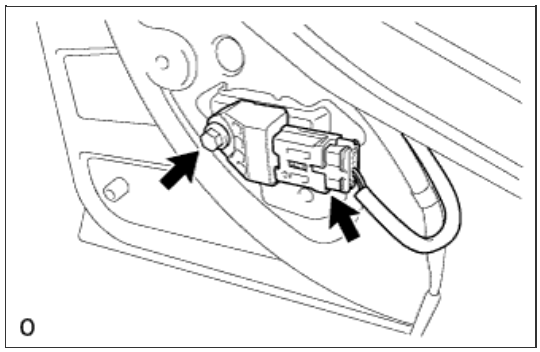
6. REMOVE FRONT DOOR TRIM BOARD SUB-ASSEMBLY LH



a. Remove the 3 screws.

b. Remove the 13 clips, 4 claws and trim board.

c. Disconnect the connector.



d. Disconnect the 2 cables from the inside handle.

. REMOVE SIDE AIRBAG SENSOR

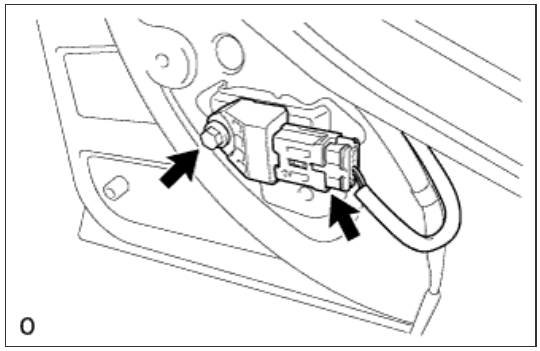
a. Disconnect the connector.

b. Remove the bolt and side airbag sensor.

for Preparation Click here

HINT:

- **Use the same procedures for the RH and LH.**
- **The procedures listed below are the LH side.**



1. INSTALL SIDE AIRBAG SENSOR

a. Check that the engine switch is off.

b. Check that the cable is disconnected from the battery negative (-) terminal.

CAUTION:

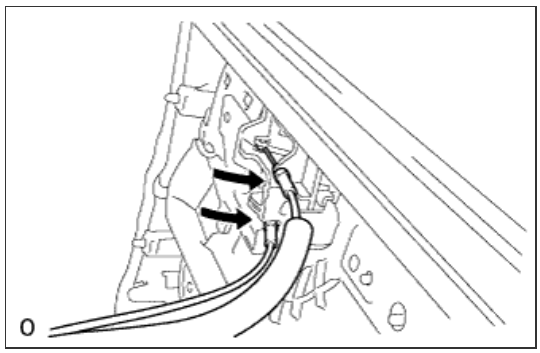
Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

c. Install the side airbag sensor with the bolt.

Torque:
9.0 N*m{ 92 kgf*cm , 80 in.*lbf }

NOTICE:

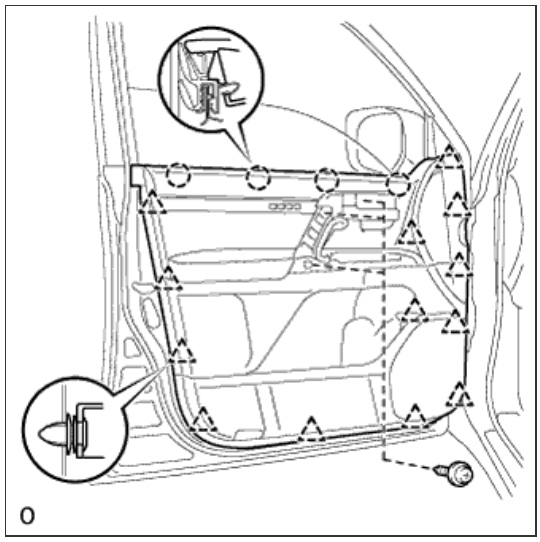
- **If the side airbag sensor has been dropped, or there are any cracks, dents or other defects in the case, bracket or connector, replace it with a new one.**
- **When installing the side airbag sensor, be careful that the SRS wiring does not interfere with other parts and that it is not pinched between other parts.**



d. Check that there is no looseness in the installation parts of the side airbag sensor.

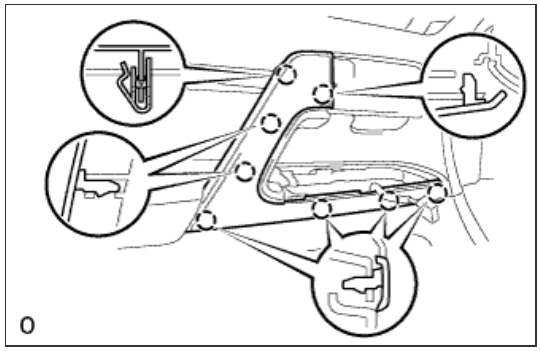
e. Connect the connector.

2. INSTALL FRONT DOOR TRIM BOARD SUB-ASSEMBLY LH



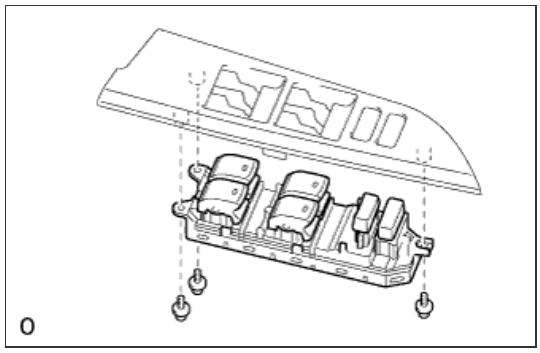
a. Connect the connector.

b. Connect the front door lock remote control cable and front door inside locking cable to the front door inside handle sub-assembly.



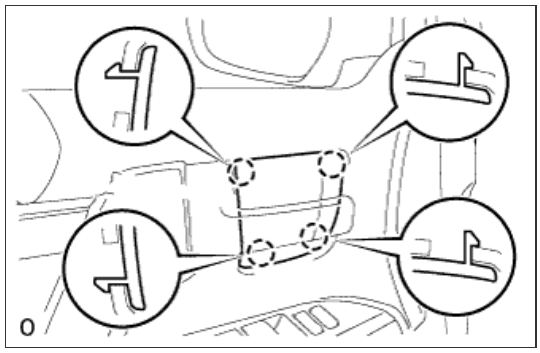
c. Attach the 4 claws and 13 clips to install the front door trim board sub-assembly.

d. Install the 3 screws.



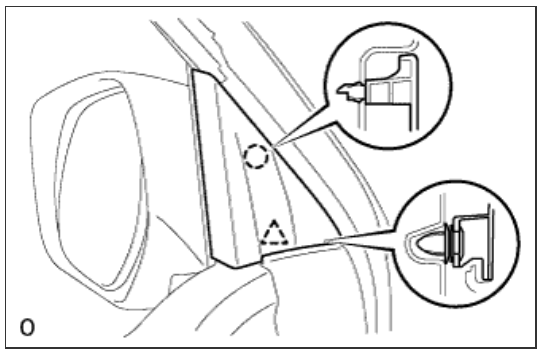
3. INSTALL ASSIST GRIP COVER LH

a. Attach the 8 claws to install the door assist grip cover to the door trim panel.



4. INSTALL MULTIPLEX NETWORK MASTER SWITCH ASSEMBLY

a. Install the multiplex network master switch assembly with the 3 screws.



5. INSTALL FRONT DOOR INSIDE HANDLE BEZEL LH

a. Attach the 4 claws to install the bezel.

6. INSTALL FRONT DOOR LOWER FRAME BRACKET GARNISH LH

a. Attach the clip and claw, and install the front door lower frame bracket garnish.

7. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

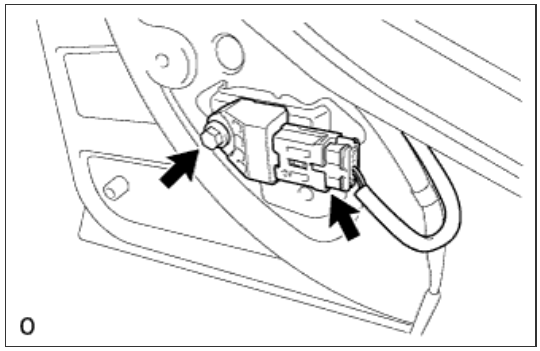
8. CHECK SRS WARNING LIGHT

a. Check the SRS warning light (Click here).

for Preparation Click here

HINT:

- **Use the same procedures for the RH and LH.**
- **The procedures listed below are the LH side.**



1. INSTALL SIDE AIRBAG SENSOR

a. Check that the engine switch is off.

b. Check that the cable is disconnected from the battery negative (-) terminal.

CAUTION:

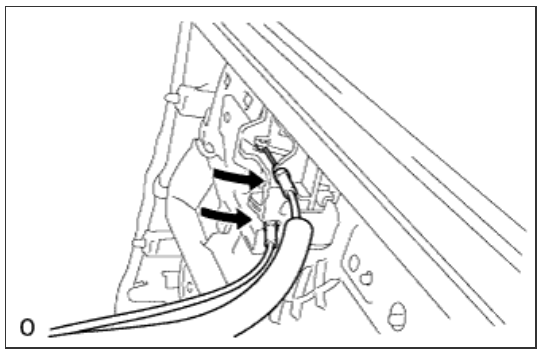
Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

c. Install the side airbag sensor with the bolt.

Torque:
9.0 N*m{ 92 kgf*cm , 80 in.*lbf }

NOTICE:

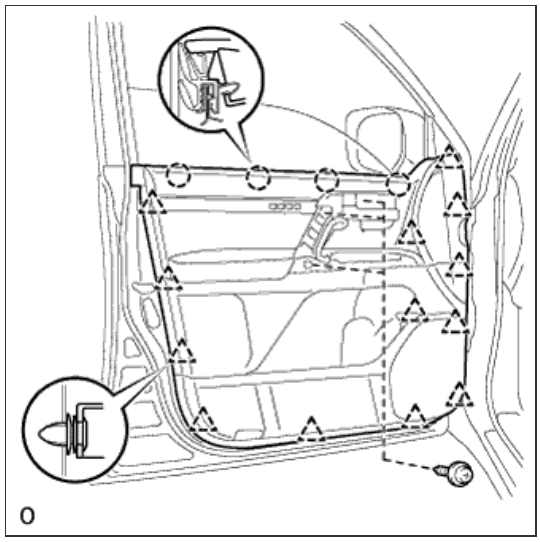
- **If the side airbag sensor has been dropped, or there are any cracks, dents or other defects in the case, bracket or connector, replace it with a new one.**
- **When installing the side airbag sensor, be careful that the SRS wiring does not interfere with other parts and that it is not pinched between other parts.**



d. Check that there is no looseness in the installation parts of the side airbag sensor.

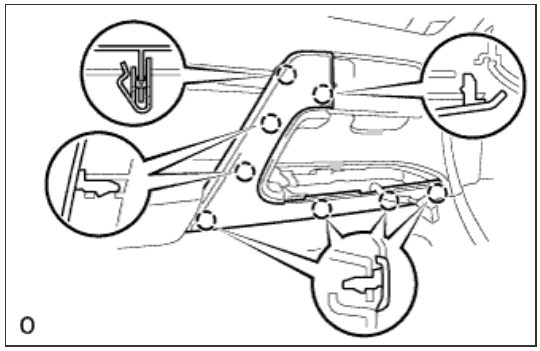
e. Connect the connector.

2. INSTALL FRONT DOOR TRIM BOARD SUB-ASSEMBLY LH



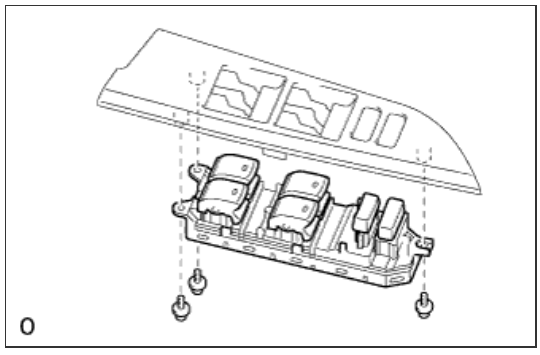
a. Connect the connector.

b. Connect the front door lock remote control cable and front door inside locking cable to the front door inside handle sub-assembly.



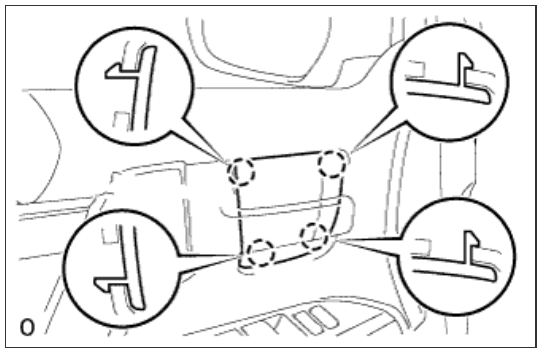
c. Attach the 4 claws and 13 clips to install the front door trim board sub-assembly.

d. Install the 3 screws.



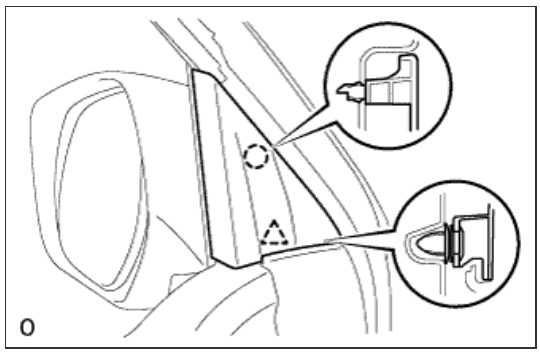
3. INSTALL ASSIST GRIP COVER LH

a. Attach the 8 claws to install the door assist grip cover to the door trim panel.



4. INSTALL MULTIPLEX NETWORK MASTER SWITCH ASSEMBLY

a. Install the master switch with the 3 screws.



5. INSTALL FRONT DOOR INSIDE HANDLE BEZEL LH

a. Attach the 4 claws to install the bezel.

6. INSTALL FRONT DOOR LOWER FRAME BRACKET GARNISH LH

a. Attach the clip and claw, and install the front door lower frame bracket garnish.

7. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

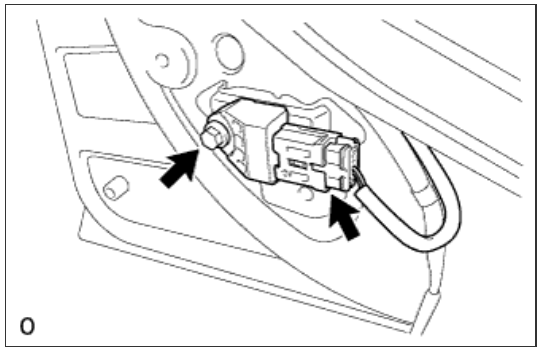
8. CHECK SRS WARNING LIGHT

a. Check the SRS warning light (Click here).

for Preparation Click here

HINT:

- **Use the same procedures for the RH and LH.**
- **The procedures listed below are the LH side.**



1. INSTALL SIDE AIRBAG SENSOR

a. Check that the engine switch is off.

b. Check that the cable is disconnected from the battery negative (-) terminal.

CAUTION:

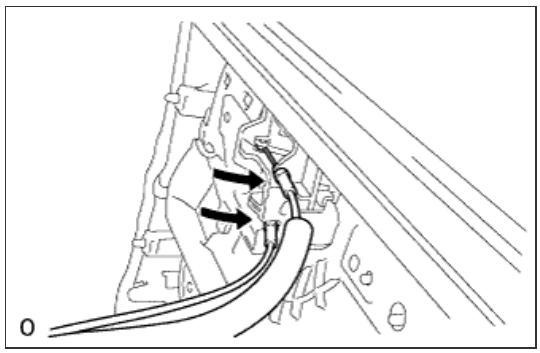
Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

c. Install the side airbag sensor with the bolt.

Torque:
9.0 N*m{ 92 kgf*cm , 80 in.*lbf }

NOTICE:

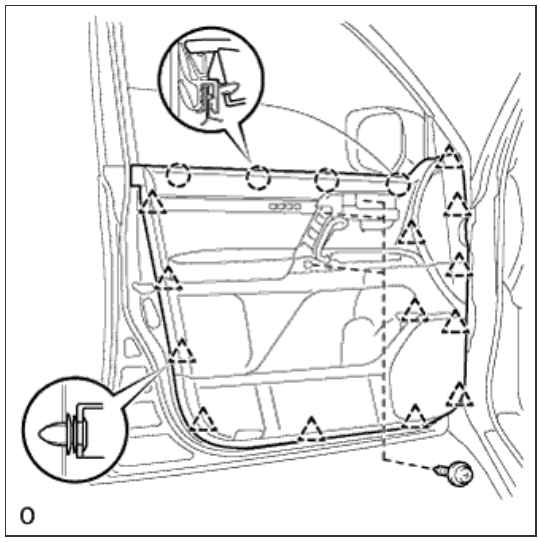
- **If the side airbag sensor has been dropped, or there are any cracks, dents or other defects in the case, bracket or connector, replace it with a new one.**
- **When installing the side airbag sensor, be careful that the SRS wiring does not interfere with other parts and that it is not pinched between other parts.**



d. Check that there is no looseness in the installation parts of the side airbag sensor.

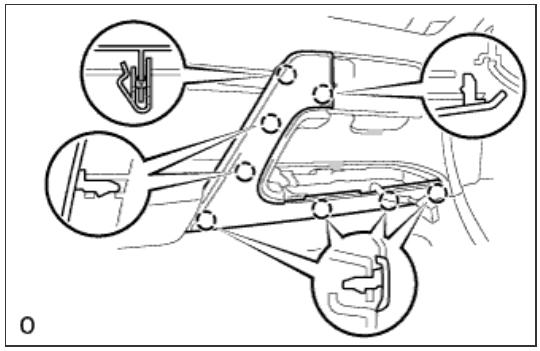
e. Connect the connector.

2. INSTALL FRONT DOOR TRIM BOARD SUB-ASSEMBLY LH



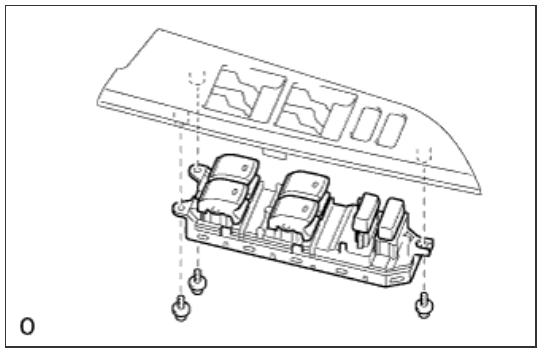
a. Connect the connector.

b. Connect the front door lock remote control cable and front door inside locking cable to the front door inside handle sub-assembly.



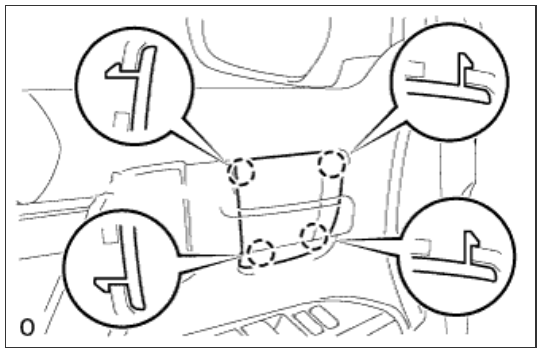
c. Attach the 4 claws and 13 clips to install the front door trim board sub-assembly.

d. Install the 3 screws.



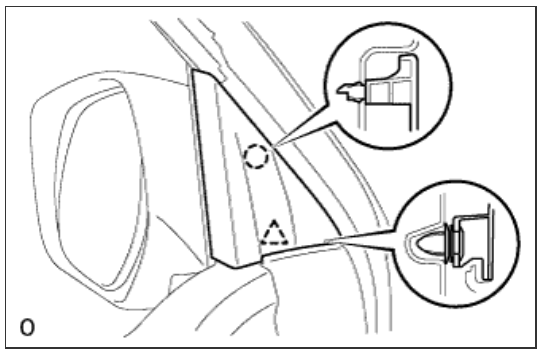
3. INSTALL ASSIST GRIP COVER LH

a. Attach the 8 claws to install the door assist grip cover to the door trim panel.



4. INSTALL MULTIPLEX NETWORK MASTER SWITCH ASSEMBLY

a. Install the master switch with the 3 screws.



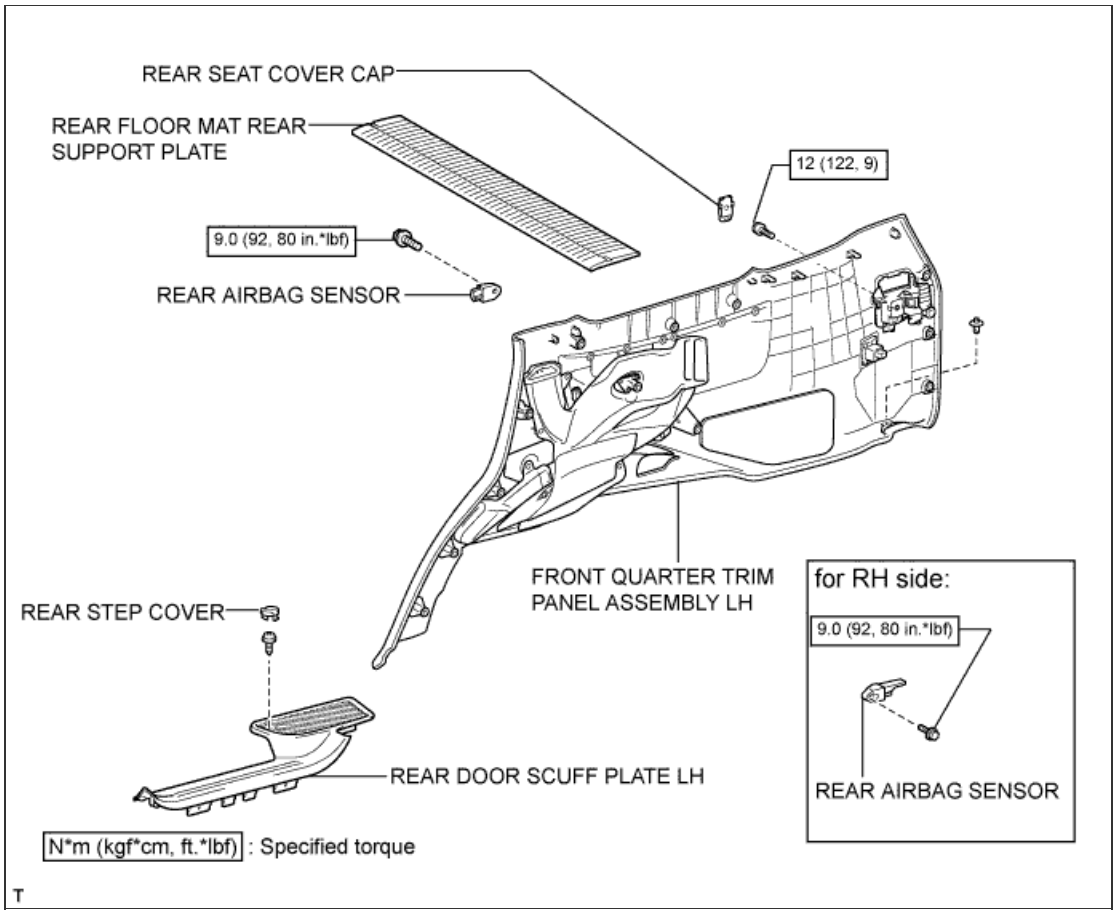
5. INSTALL FRONT DOOR INSIDE HANDLE BEZEL LH

a. Attach the 4 claws to install the bezel.

6. INSTALL FRONT DOOR LOWER FRAME BRACKET GARNISH LH

a. Attach the clip and claw, and install the front door lower frame bracket garnish.

7. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL



NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

8. CHECK SRS WARNING LIGHT

a. Check the SRS warning light (Click here).

for Preparation Click here

for Preparation Click here

1. CHECK REAR AIRBAG SENSOR (VEHICLE NOT INVOLVED IN COLLISION)

a. Perform a diagnostic system check (Click here).

2. CHECK REAR AIRBAG SENSOR (VEHICLE INVOLVED IN COLLISION AND AIRBAG HAS NOT DEPLOYED)

a. Perform a diagnostic system check (Click here).

b. When the quarter panel of the vehicle or its area is damaged, check if there is any damage to the rear airbag sensor. If there are any defects as mentioned below, replace the rear airbag sensor with a new one

- Cracks, dents or chips on the sensor housing.
- Cracks or other damage to the connector.
- Peeling off of the label or damage to the serial number.

CAUTION:

For removal and installation procedures of the rear airbag sensor, be sure to follow the correct procedure.

3. CHECK REAR AIRBAG SENSOR (VEHICLE INVOLVED IN COLLISION AND AIRBAG IS DEPLOYED)

a. When airbags have deployed as the result of a collision, be certain to replace all rear airbag sensors in the damaged area (anywhere in need of repair). Furthermore, it is also necessary to replace any rear airbag sensor in undamaged areas that have registered a ma or collision, or which exhibit any of the following abnormalities

- Cracks, dents or chips on the sensor housing.
- Cracks or other damage to the connector.
- Peeling off of the label or damage to the serial number.

CAUTION:

For removal and installation procedures of the rear airbag sensor, be sure to follow the correct procedure.

for Preparation Click here

HINT:

- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**

1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

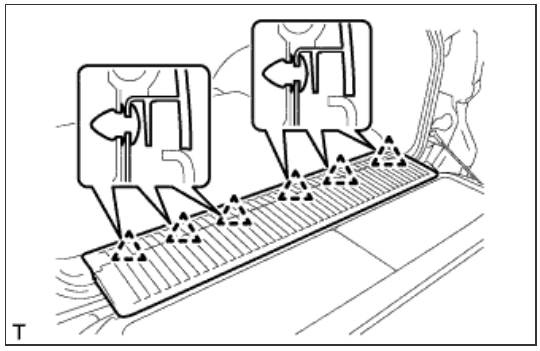
CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

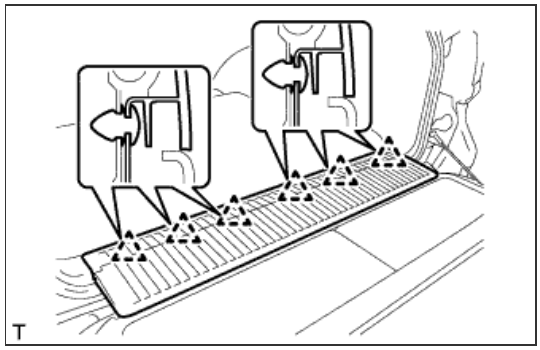
2. REMOVE REAR NO. 2 SEAT ASSEMBLY LH



a. Remove the rear No. 2 seat assembly LH (Click here).

3. REMOVE REAR NO. 2 SEAT ASSEMBLY LH (for Split Bench Seat Type)

a. Remove the rear No. 2 seat assembly LH (Click here).

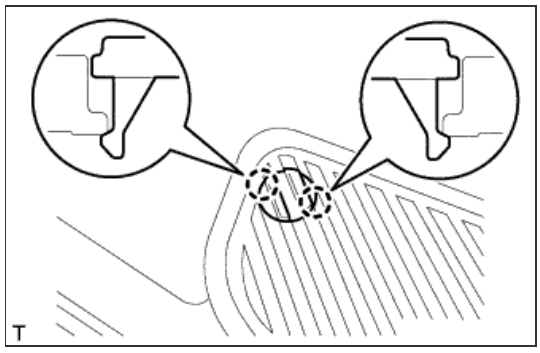


4. REMOVE REAR FLOOR MAT REAR SUPPORT PLATE (w/ Sliding Roof)

a. Detach the 6 clips and remove the support plate.

5. REMOVE REAR FLOOR MAT REAR SUPPORT PLATE (w/o Sliding Roof)

a. Detach the 6 clips and remove the support plate.

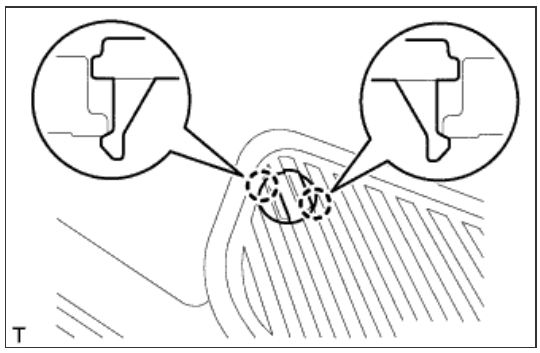


6. REMOVE REAR STEP COVER (w/ Sliding Roof)

HINT:

Use the same procedure to remove the step cover on the other side.

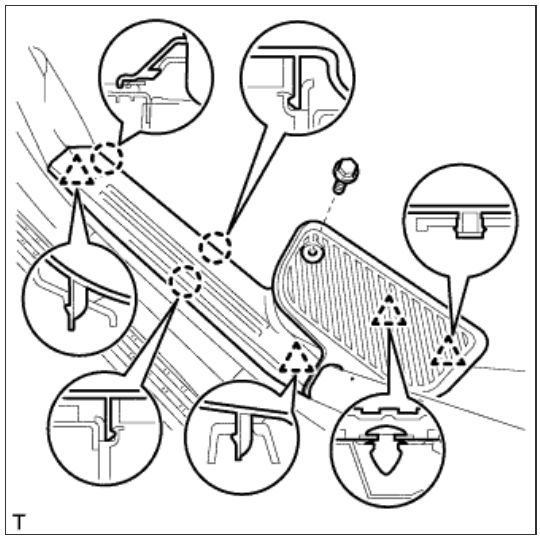
a. Detach the 2 claws and remove the step cover.



7. REMOVE REAR STEP COVER (w/o Sliding Roof)

HINT:

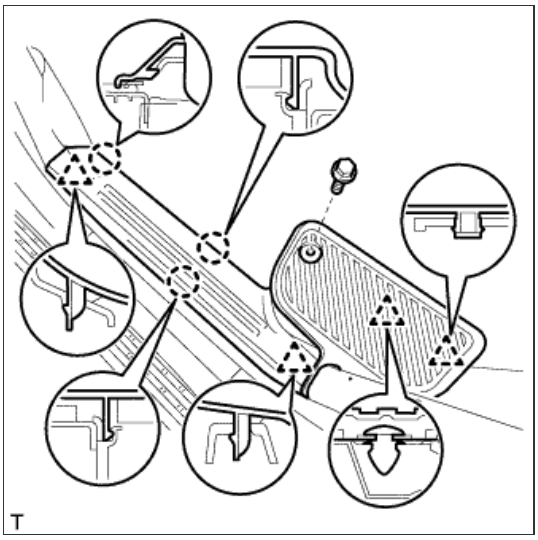
Use the same procedure to remove the step cover on the other side.



a. Detach the 2 claws and remove the step cover.

8. REMOVE REAR DOOR SCUFF PLATE LH (w/ Sliding Roof)

a. Remove the screw.



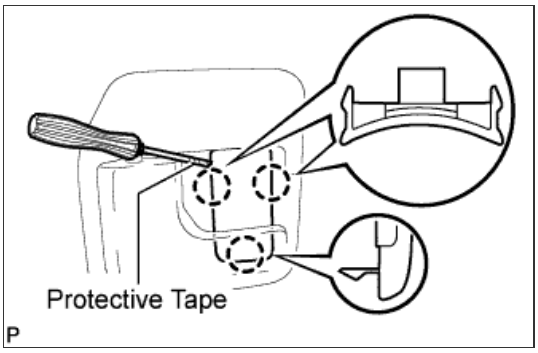
b. Detach the 3 claws and 4 clips, and remove the scuff plate.

9. REMOVE REAR DOOR SCUFF PLATE LH (w/o Sliding Roof)

a. Remove the screw.

b. Detach the 3 claws and 4 clips, and remove the scuff plate.

10. REMOVE REAR SEAT COVER CAP (w/ Sliding Roof)



HINT:

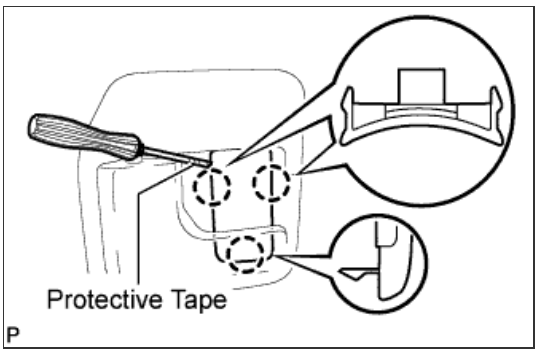
Use the same procedure to remove the rear seat cover cap on the other side.

a. Using a screwdriver, detach the 3 claws and remove the rear seat cover cap.

HINT:

Tape the screwdriver tip before use.

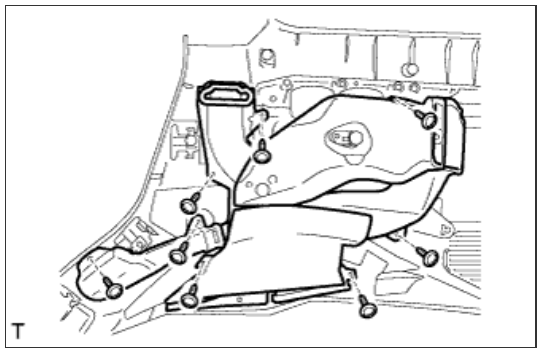
11. REMOVE REAR SEAT COVER CAP (w/o Sliding Roof)



HINT:

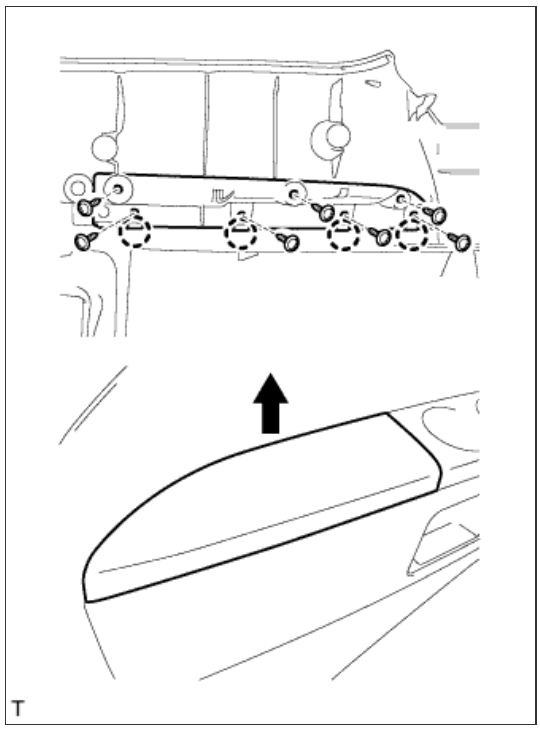
Use the same procedure to remove the rear seat cover cap on the other side.

a. Using a screwdriver, detach the 3 claws and remove the rear seat cover cap.



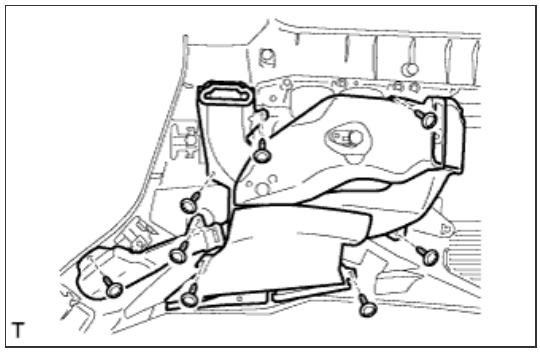
HINT:

Tape the screwdriver tip before use.



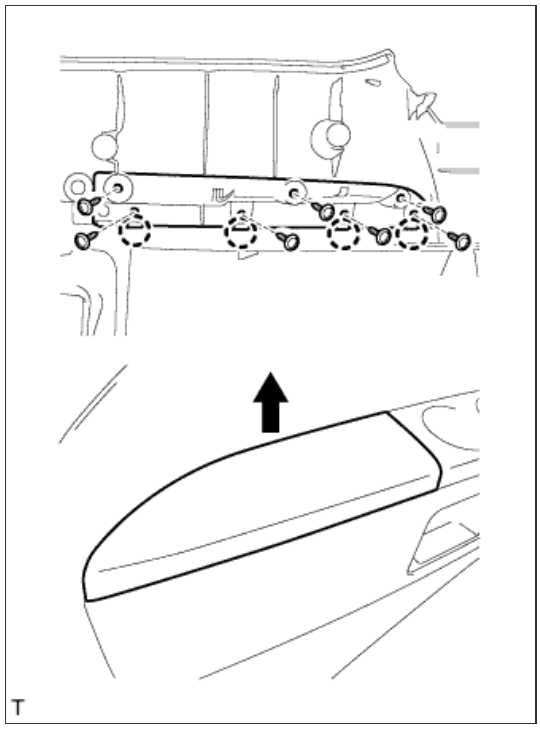
12. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY LH (w/ Sliding Roof)

a. w/ Rear Heater:
Remove the 8 screws and duct.



b. Remove the 7 screws.

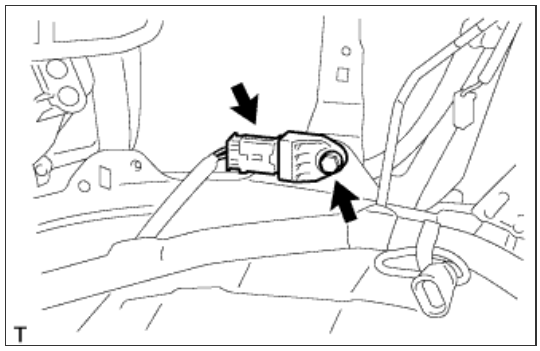
c. Detach the 4 claws and remove the uarter trim cover.



13. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY LH (w/o Sliding Roof)

a. w/ Rear Heater:
Remove the 8 screws and duct.

b. Remove the 7 screws.



c. Detach the 4 claws and remove the quarter trim cover.

14. REMOVE REAR AIRBAG SENSOR

a. Remove the bolt and rear airbag sensor.

b. Disconnect the connector.

for Preparation Click here

HINT:

- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**

1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

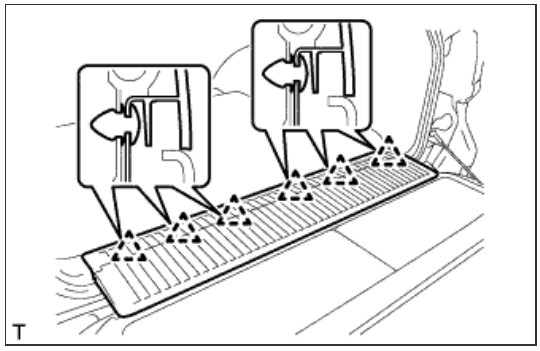
CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

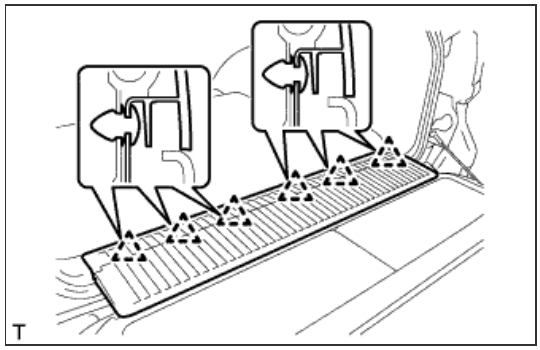
2. REMOVE REAR NO. 2 SEAT ASSEMBLY LH



a. Remove the rear No. 2 seat assembly LH (Click here).

3. REMOVE REAR NO. 2 SEAT ASSEMBLY LH (for Split Bench Seat Type)

a. Remove the rear No. 2 seat assembly LH (Click here).

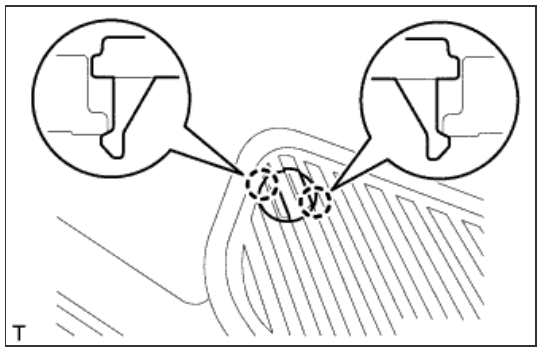


4. REMOVE REAR FLOOR MAT REAR SUPPORT PLATE (w/ Sliding Roof)

a. Detach the 6 clips and remove the support plate.

5. REMOVE REAR FLOOR MAT REAR SUPPORT PLATE (w/o Sliding Roof)

a. Detach the 6 clips and remove the support plate.

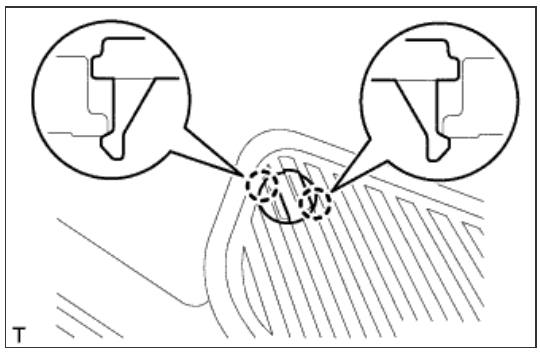


6. REMOVE REAR STEP COVER (w/ Sliding Roof)

HINT:

Use the same procedure to remove the step cover on the other side.

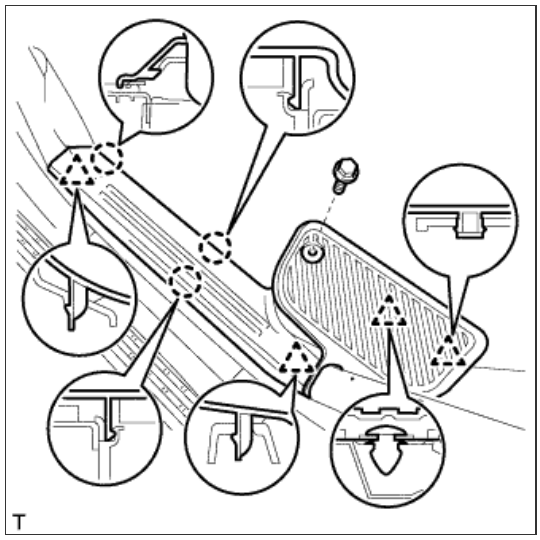
a. Detach the 2 claws and remove the step cover.



7. REMOVE REAR STEP COVER (w/o Sliding Roof)

HINT:

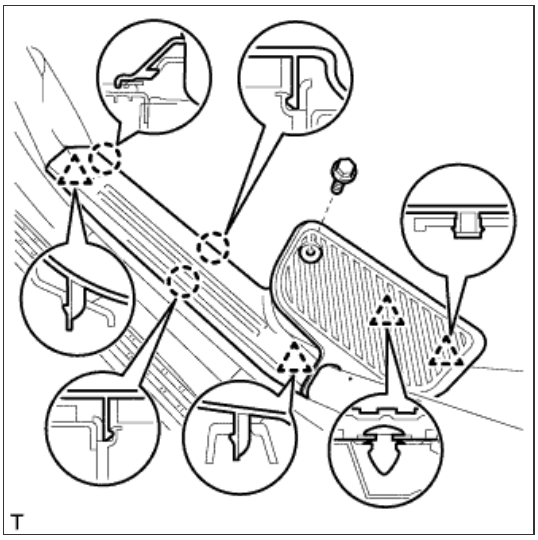
Use the same procedure to remove the step cover on the other side.



a. Detach the 2 claws and remove the step cover.

8. REMOVE REAR DOOR SCUFF PLATE LH (w/ Sliding Roof)

a. Remove the screw.



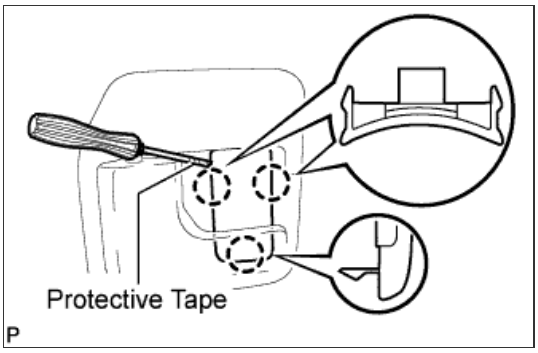
b. Detach the 3 claws and 4 clips, and remove the scuff plate.

9. REMOVE REAR DOOR SCUFF PLATE LH (w/o Sliding Roof)

a. Remove the screw.

b. Detach the 3 claws and 4 clips, and remove the scuff plate.

10. REMOVE REAR SEAT COVER CAP (w/ Sliding Roof)



HINT:

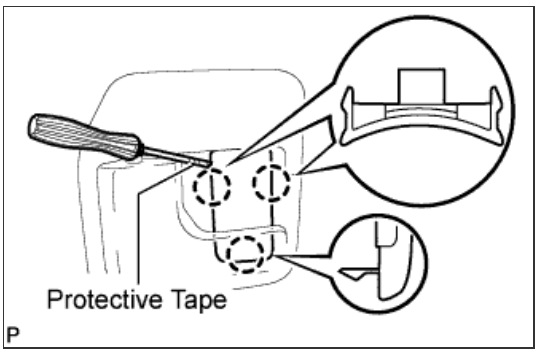
Use the same procedure to remove the rear seat cover cap on the other side.

a. Using a screwdriver, detach the 3 claws and remove the rear seat cover cap.

HINT:

Tape the screwdriver tip before use.

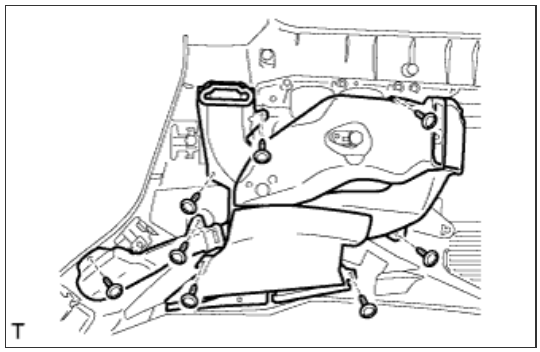
11. REMOVE REAR SEAT COVER CAP (w/o Sliding Roof)



HINT:

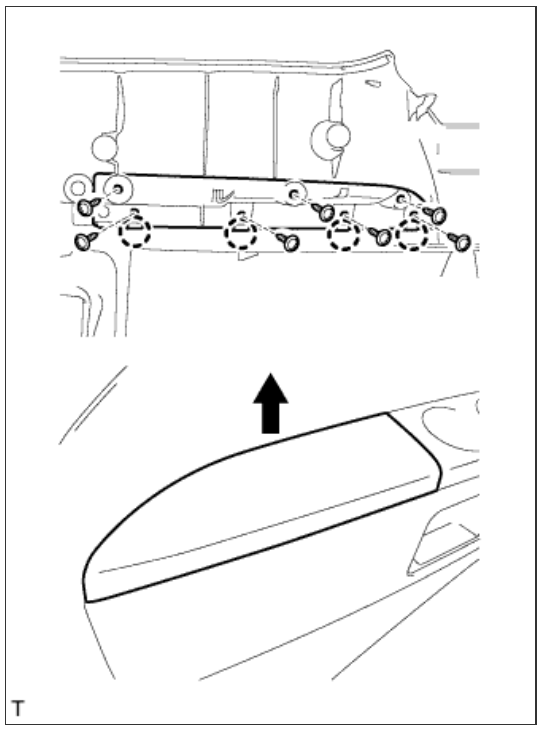
Use the same procedure to remove the rear seat cover cap on the other side.

a. Using a screwdriver, detach the 3 claws and remove the rear seat cover cap.



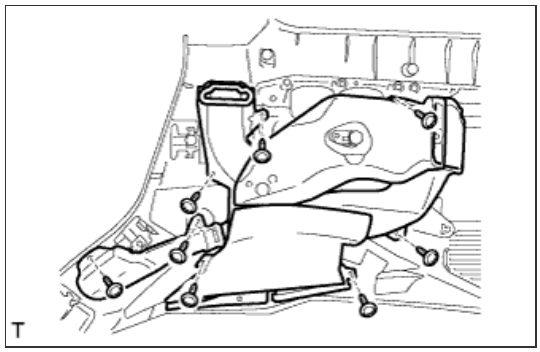
HINT:

Tape the screwdriver tip before use.



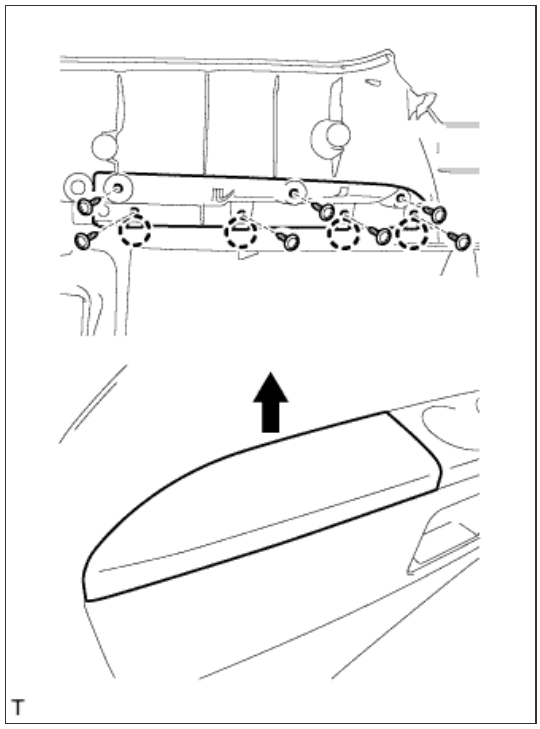
12. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY LH (w/ Sliding Roof)

a. w/ Rear Heater:
Remove the 8 screws and duct.



b. Remove the 7 screws.

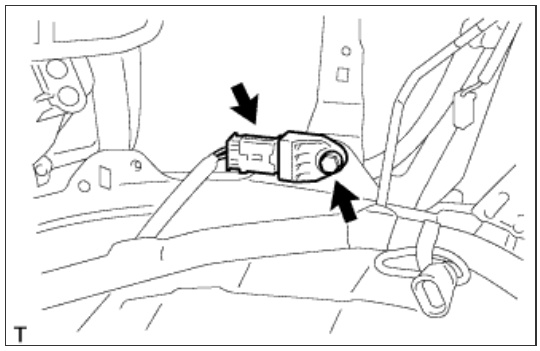
c. Detach the 4 claws and remove the uarter trim cover.



13. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY LH (w/o Sliding Roof)

a. w/ Rear Heater:
Remove the 8 screws and duct.

b. Remove the 7 screws.



c. Detach the 4 claws and remove the quarter trim cover.

14. REMOVE REAR AIRBAG SENSOR

a. Remove the bolt and rear airbag sensor.

b. Disconnect the connector.

for Preparation Click here

HINT:

- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**

1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

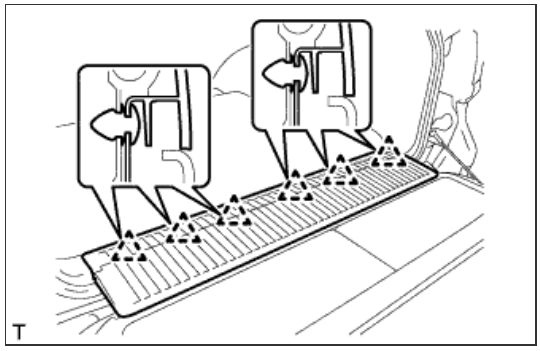
CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

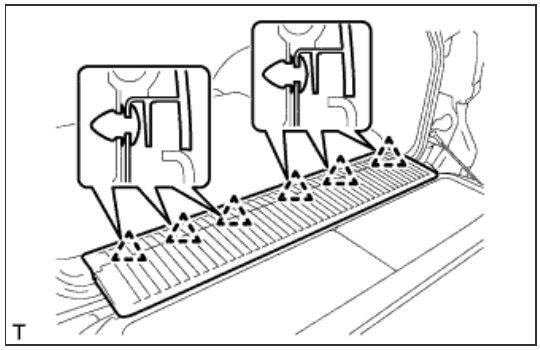
2. REMOVE REAR NO. 2 SEAT ASSEMBLY LH



a. Remove the rear No. 2 seat assembly LH (Click here).

3. REMOVE REAR NO. 2 SEAT ASSEMBLY LH (for Split Bench Seat Type)

a. Remove the rear No. 2 seat assembly LH (Click here).

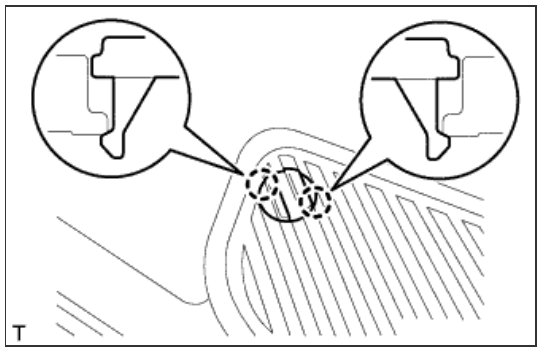


4. REMOVE REAR FLOOR MAT REAR SUPPORT PLATE (w/ Sliding Roof)

a. Detach the 6 clips and remove the support plate.

5. REMOVE REAR FLOOR MAT REAR SUPPORT PLATE (w/o Sliding Roof)

a. Detach the 6 clips and remove the support plate.

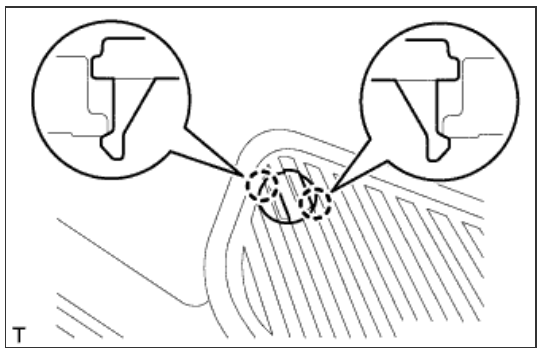


6. REMOVE REAR STEP COVER (w/ Sliding Roof)

HINT:

Use the same procedure to remove the step cover on the other side.

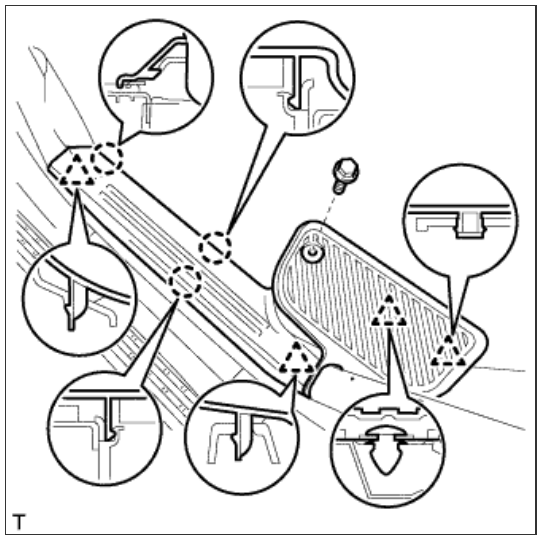
a. Detach the 2 claws and remove the step cover.



7. REMOVE REAR STEP COVER (w/o Sliding Roof)

HINT:

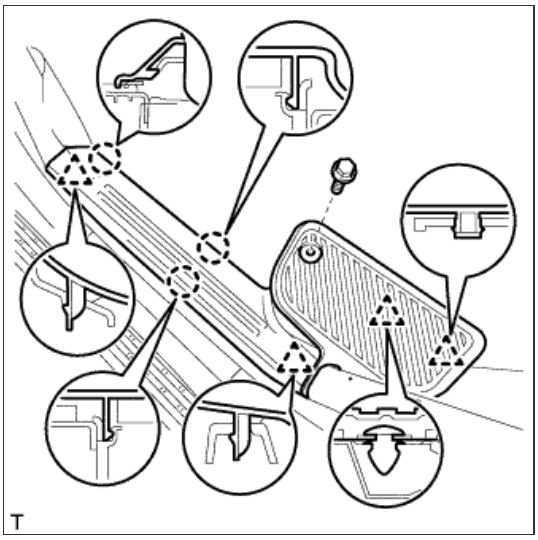
Use the same procedure to remove the step cover on the other side.



a. Detach the 2 claws and remove the step cover.

8. REMOVE REAR DOOR SCUFF PLATE LH (w/ Sliding Roof)

a. Remove the screw.



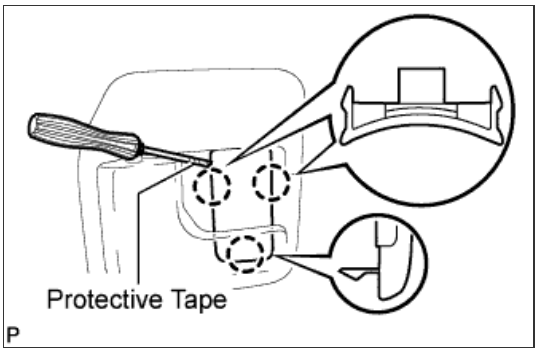
b. Detach the 3 claws and 4 clips, and remove the scuff plate.

9. REMOVE REAR DOOR SCUFF PLATE LH (w/o Sliding Roof)

a. Remove the screw.

b. Detach the 3 claws and 4 clips, and remove the scuff plate.

10. REMOVE REAR SEAT COVER CAP (w/ Sliding Roof)



HINT:

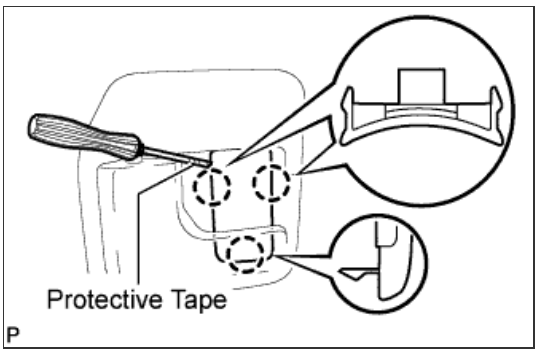
Use the same procedure to remove the rear seat cover cap on the other side.

a. Using a screwdriver, detach the 3 claws and remove the rear seat cover cap.

HINT:

Tape the screwdriver tip before use.

11. REMOVE REAR SEAT COVER CAP (w/o Sliding Roof)

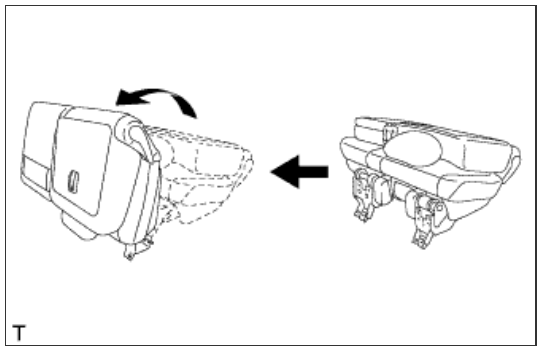


HINT:

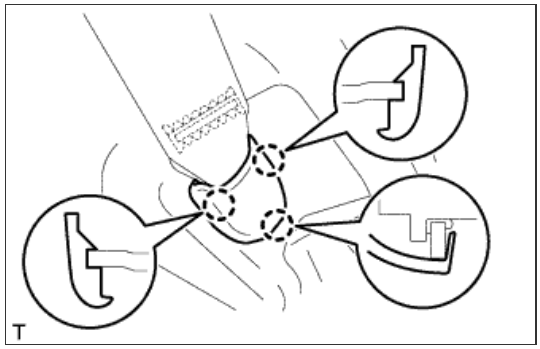
Use the same procedure to remove the rear seat cover cap on the other side.

a. Using a screwdriver, detach the 3 claws and remove the rear seat cover cap.

HINT:

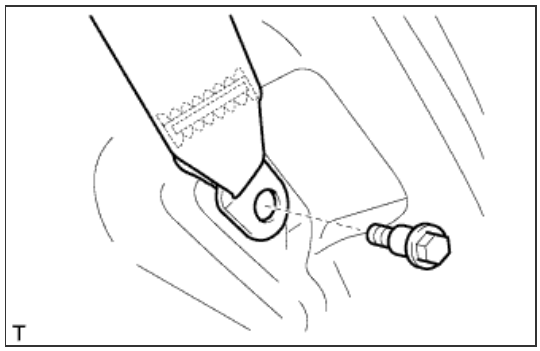


Tape the screwdriver tip before use.

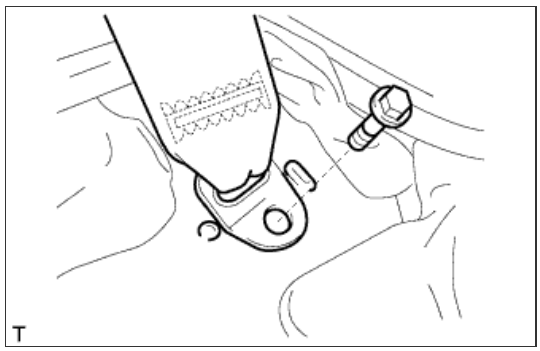


12. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY LH (w/ Sliding Roof)

HINT:



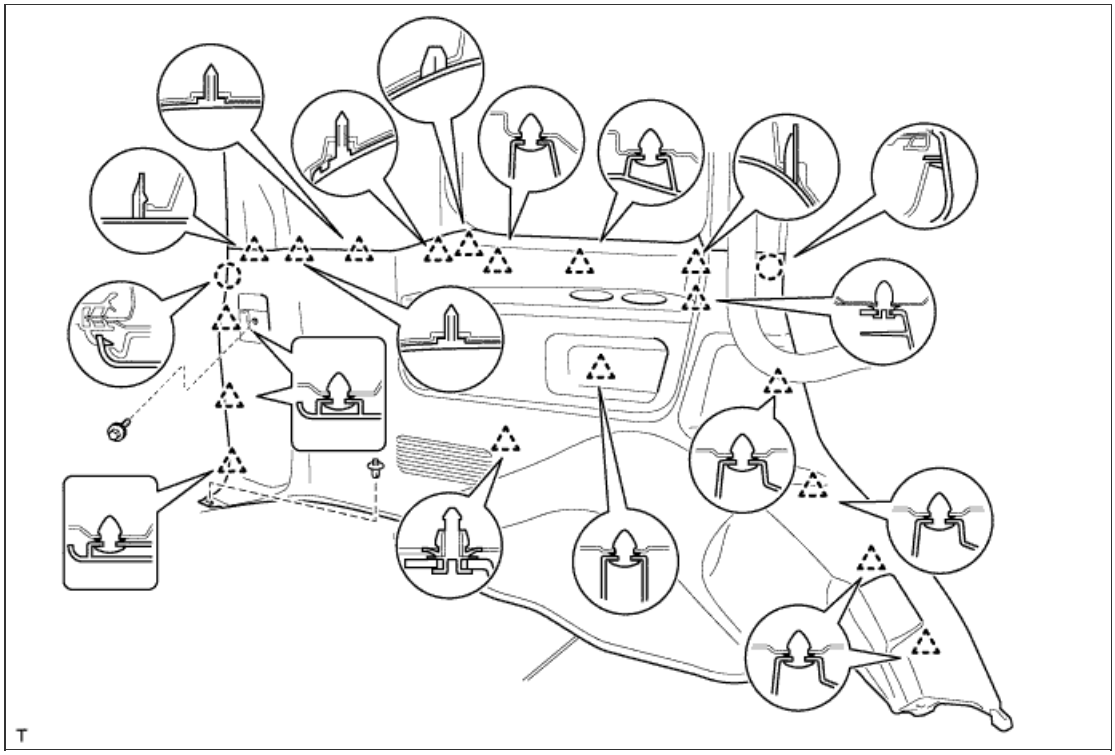
When removing the front quarter trim panel, operate the reclining adjuster release handle and move the No. 1 rear seat to the position shown in the illustration.



a. Detach the 3 claws and remove the cover.

b. Remove the bolt and rear No. 1 seat belt anchor.

c. w/ Rear No. 2 Seat, except Face to Face Seat Type
Remove the bolt and rear No. 2 seat belt anchor.

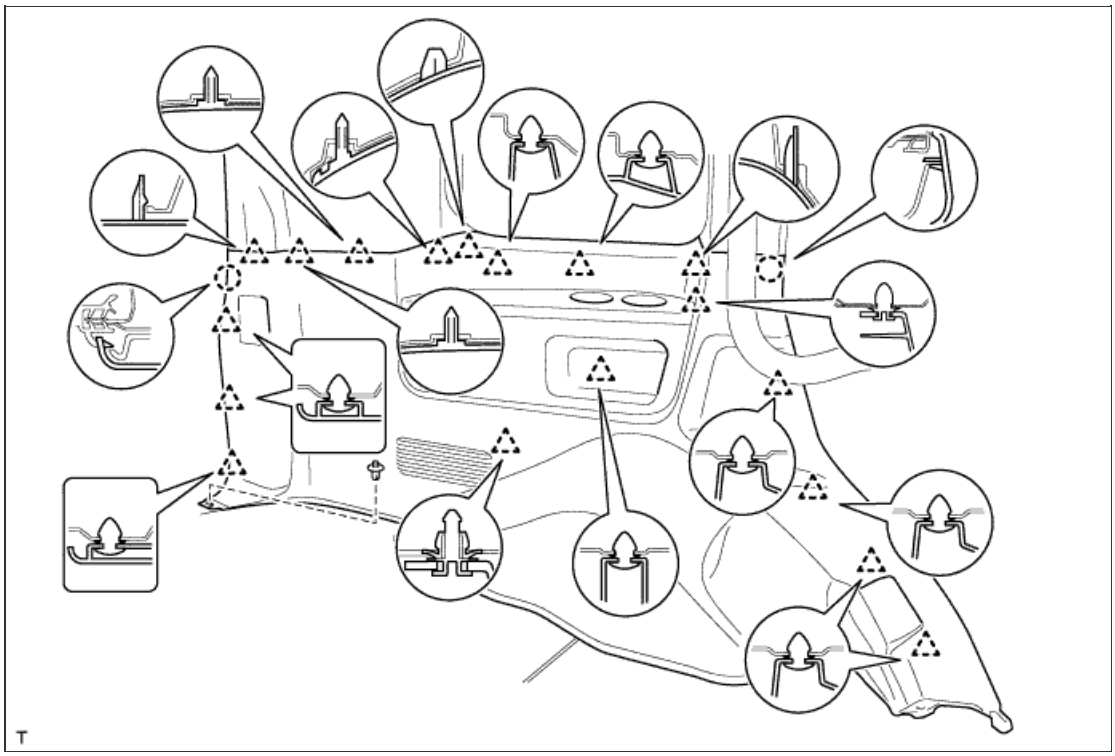


d. w/ Rear No. 2 Seat, except Face to Face Seat Type

i. Remove the clip and bolt.

ii. Detach the 18 clips and 2 claws.

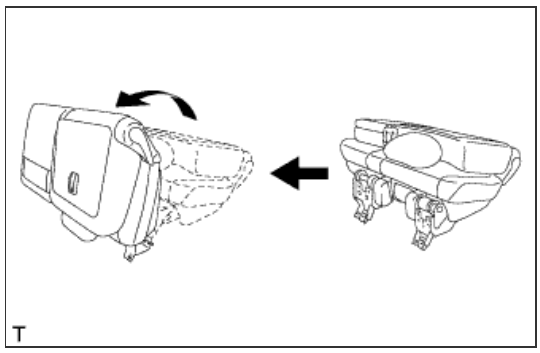
iii. w/o Rear Air Conditioning System
Disconnect the rear seat lock control lever cable and then remove the quarter trim panel.



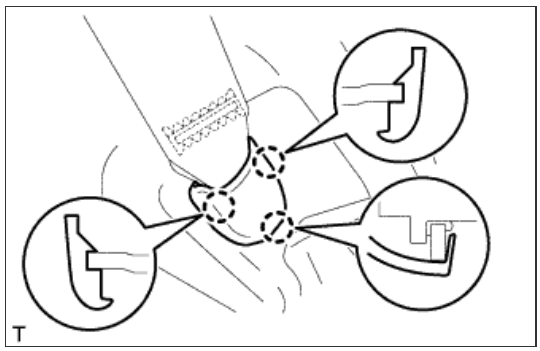
i .w/ Rear Air Conditioning System
Disconnect the thermistor connector and rear seat lock control lever cable, and then remove the quarter trim panel.

e. w/o Rear No. 2 Seat or w/ Rear No. 2 Seat, for Face to Face Seat Type

i. Remove the clip.

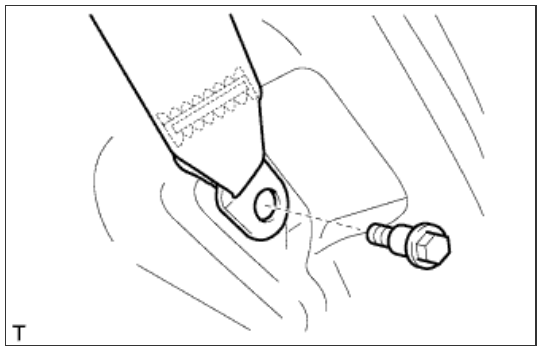


ii. Detach the 18 clips and 2 claws, and remove the quarter trim panel.

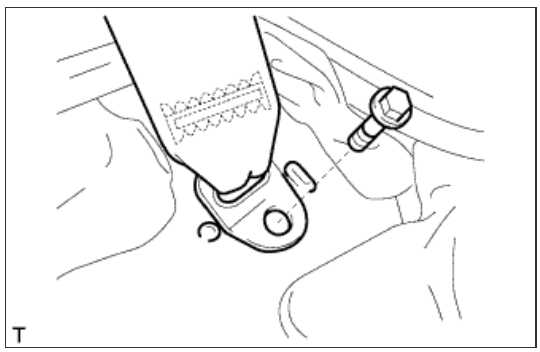


13. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY LH (w/o Sliding Roof)

HINT:



When removing the front quarter trim panel, operate the reclining adjuster release handle and move the No. 1 rear seat to the position shown in the illustration.

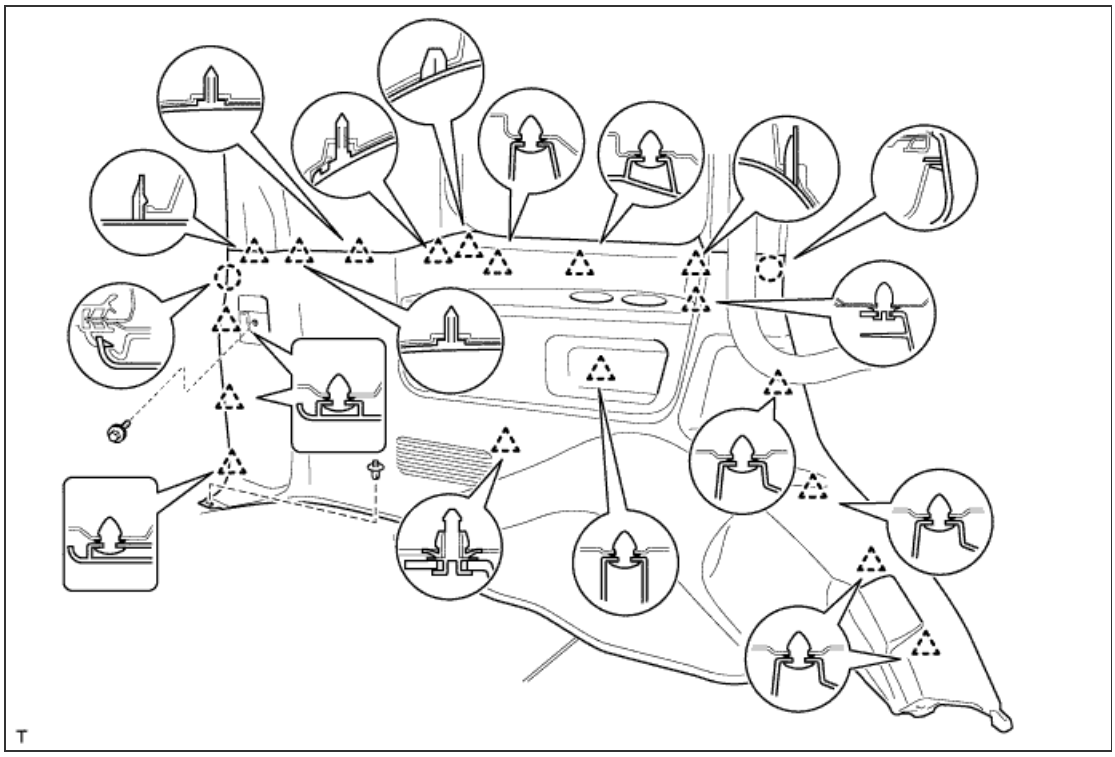


a. Detach the 3 claws and remove the cover.

b. Remove the bolt and rear No. 1 seat belt anchor.

c. w/ Rear No. 2 Seat, except Face to Face Seat Type
Remove the bolt and rear No. 2 seat belt anchor.

d. w/ Rear No. 2 Seat, except Face to Face Seat Type

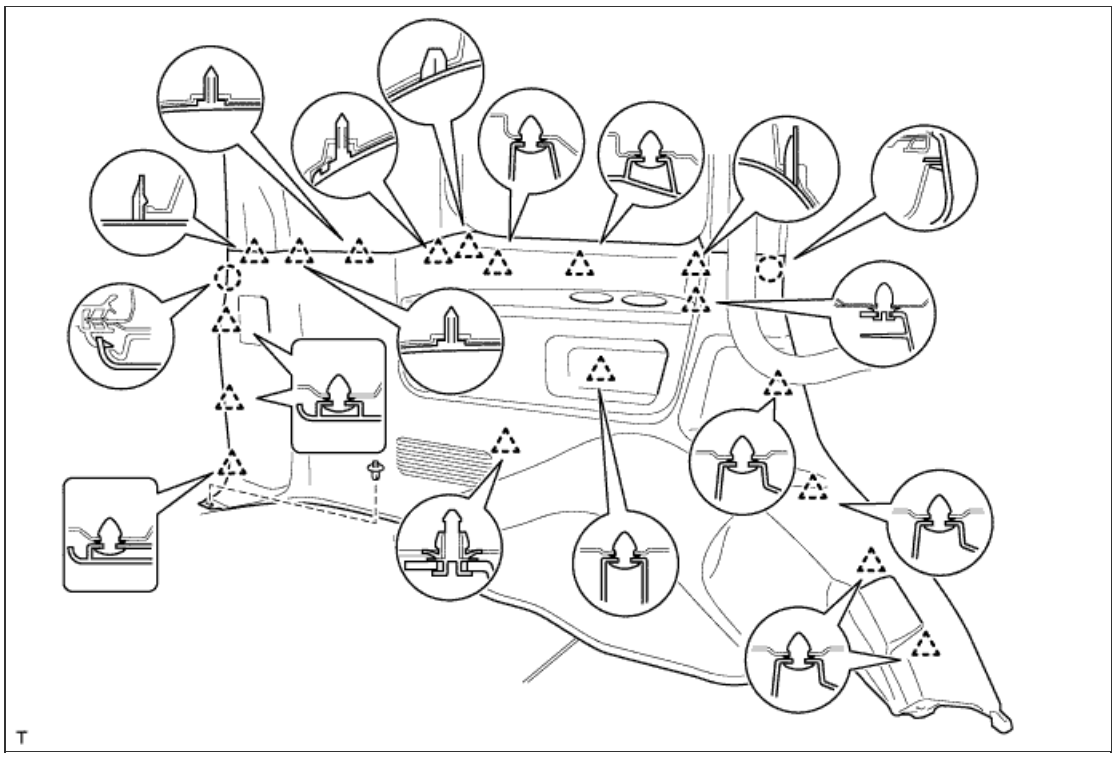


i. Remove the clip and bolt.

ii. Detach the 18 clips and 2 claws.

iii. w/o Rear Air Conditioning System
Disconnect the rear seat lock control lever cable and then remove the quarter trim panel.

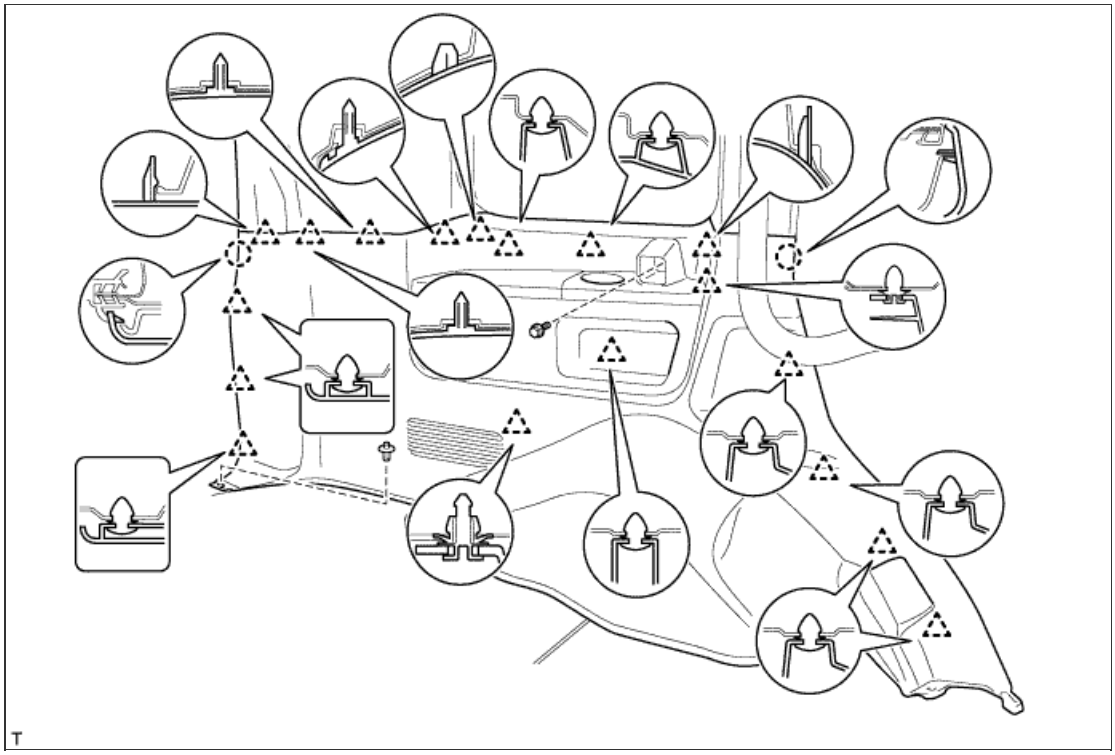
i .w/ Rear Air Conditioning System



Disconnect the thermistor connector and rear seat lock control lever cable, and then remove the quarter trim panel.

e. w/o Rear No. 2 Seat or w/ Rear No. 2 Seat, for Face to Face Seat Type

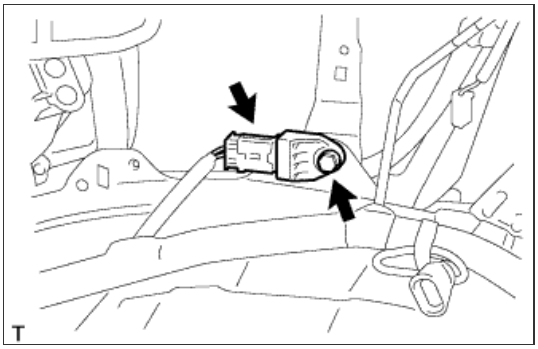
i. Remove the clip.



ii. Detach the 18 clips and 2 claws, and remove the quarter trim panel.

f. w/ Tonneau Cover

i. Remove the screw and clip.

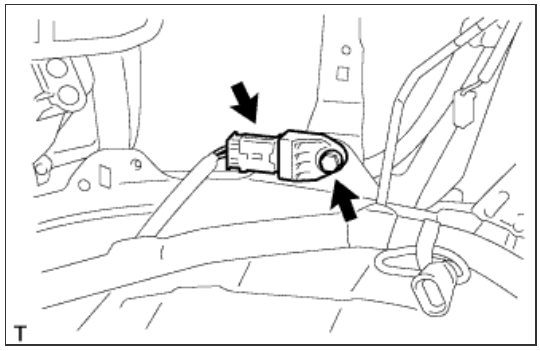


ii. Detach the 18 clips and 2 claws, and remove the quarter trim panel.

14. REMOVE REAR AIRBAG SENSOR

a. Remove the bolt and rear airbag sensor.

b. Disconnect the connector.



for Preparation Click here

HINT:

- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**

1. INSTALL REAR AIRBAG SENSOR

a. Check that the engine switch is turned off.

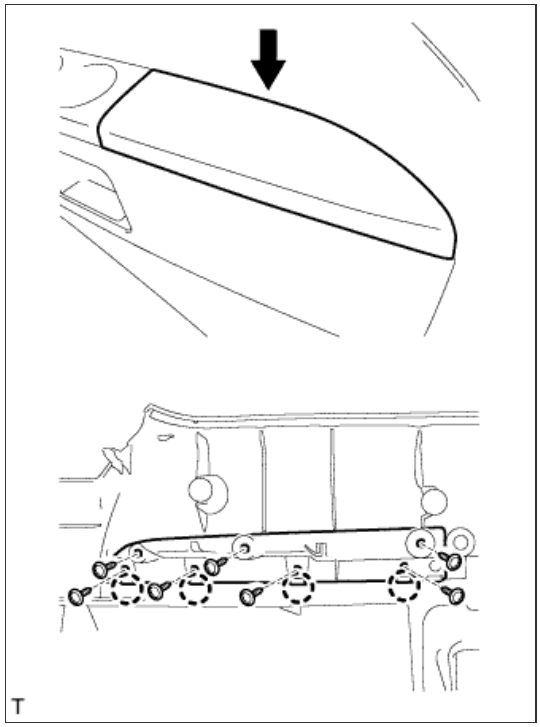
b. Check that the cable is disconnected from the battery negative (-) terminal.

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

c. Install the rear airbag sensor with the bolt.

Torque:
9.0 N*m{ 92 kgf*cm , 80 in.*lbf }

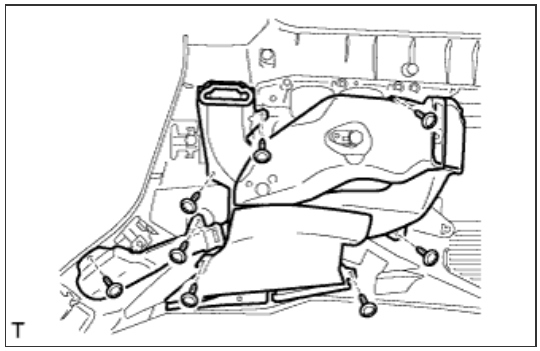


NOTICE:

- **If the rear airbag sensor has been dropped, or there are any cracks, dents or other defects in the case, bracket or connector, replace it with a new one.**
- **When installing the rear airbag sensor, be careful that the SRS wiring does not interfere with other parts and that it is not pinched between other parts.**

d. Check that there is no looseness in the installation parts of the rear airbag sensor.

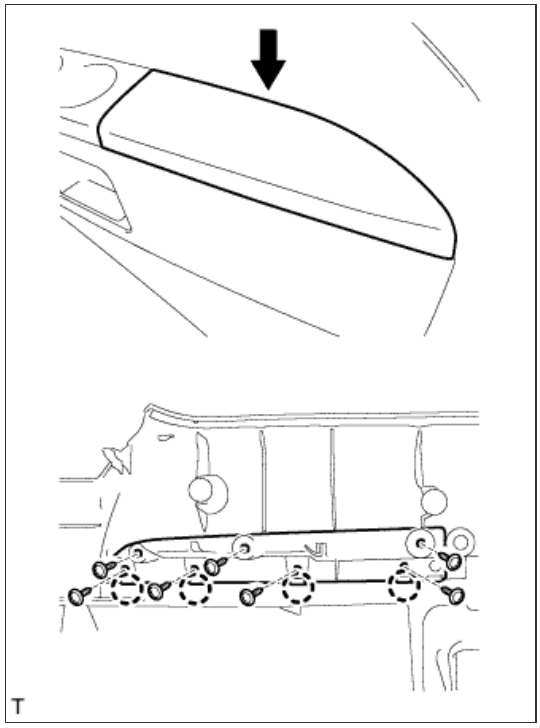
e. Connect the connector.



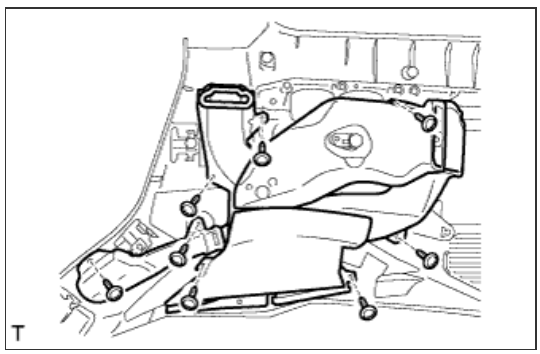
2. INSTALL FRONT QUARTER TRIM PANEL ASSEMBLY LH (w/ Sliding Roof)

a. Attach the 4 claws to install the quarter trim cover.

b. Install the 7 screws.



c. w/ Rear Heater:
Install the duct with the 8 screws.

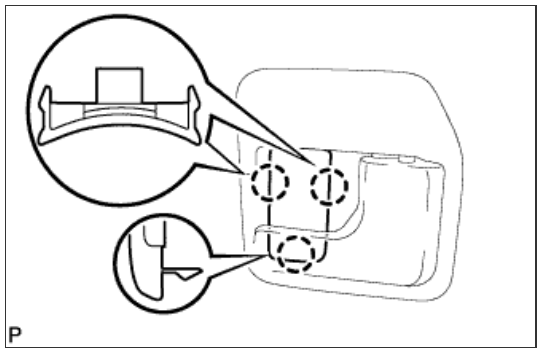


3. INSTALL FRONT QUARTER TRIM PANEL ASSEMBLY LH (w/o Sliding Roof)

a. Attach the 4 claws to install the quarter trim cover.

b. Install the 7 screws.

c. w/ Rear Heater:
Install the duct with the 8 screws.

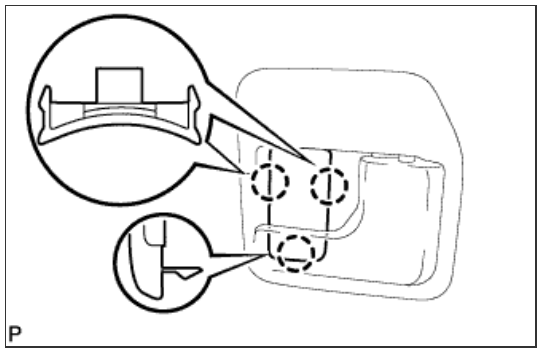


4. INSTALL REAR SEAT COVER CAP (w/ Sliding Roof)

HINT:

Use the same procedure to install the rear seat cover cap on the other side.

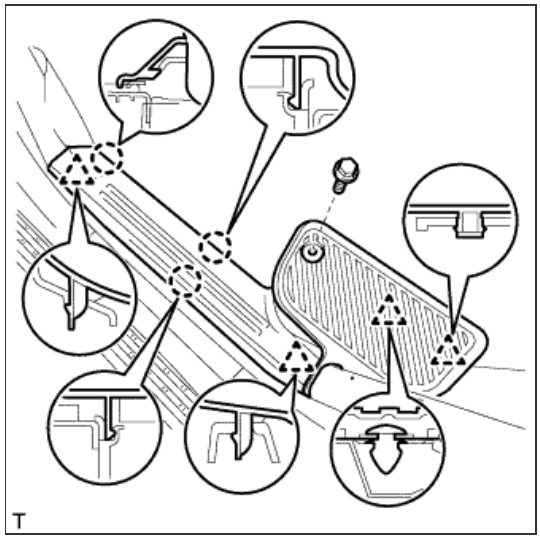
a. Attach the 3 claws to install the rear seat cover cap.



5. INSTALL REAR SEAT COVER CAP (w/o Sliding Roof)

HINT:

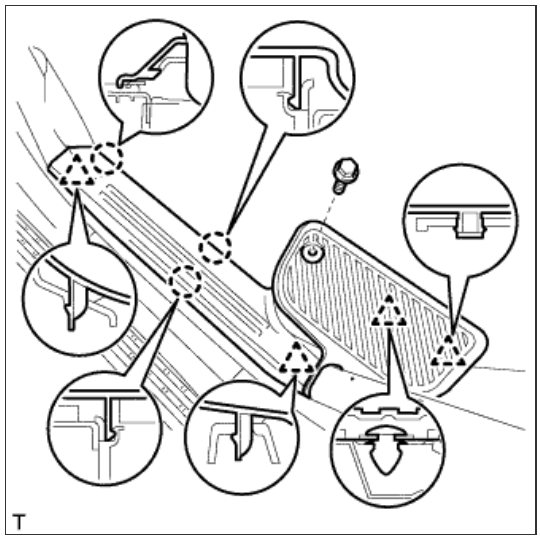
Use the same procedure to install the rear seat cover cap on the other side.



a. Attach the 3 claws to install the rear seat cover cap.

6. INSTALL REAR DOOR SCUFF PLATE LH (w/ Sliding Roof)

a. Attach the 3 claws and 4 clips to install the scuff plate.

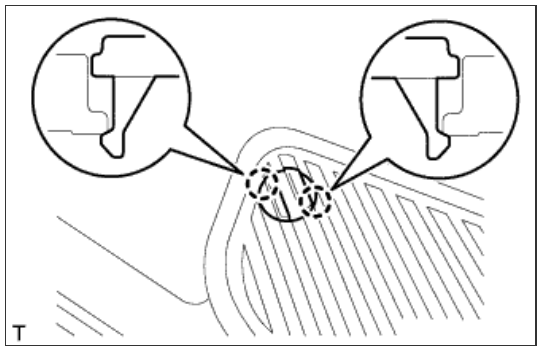


b. Install the screw.

7. INSTALL REAR DOOR SCUFF PLATE LH (w/o Sliding Roof)

a. Attach the 3 claws and 4 clips to install the scuff plate.

b. Install the screw.

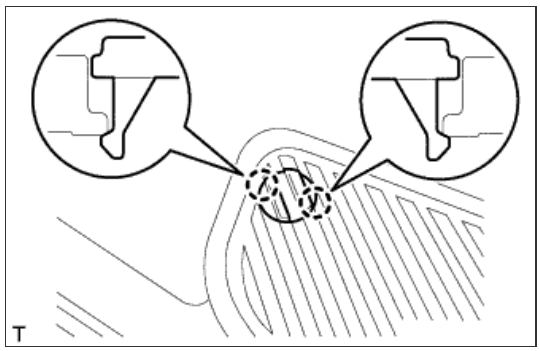


8. INSTALL REAR STEP COVER (w/ Sliding Roof)

HINT:

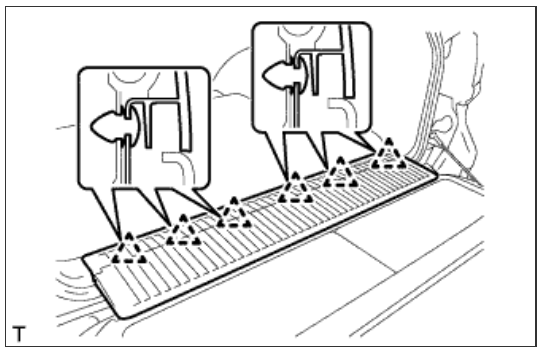
Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.



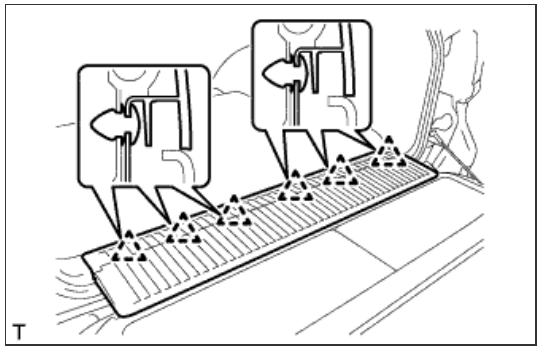
9. INSTALL REAR STEP COVER (w/o Sliding Roof)

HINT:



Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.



10. INSTALL REAR FLOOR MAT REAR SUPPORT PLATE (w/ Sliding Roof)

a. Attach the 6 clips to install the support plate.

11. INSTALL REAR FLOOR MAT REAR SUPPORT PLATE

a. Attach the 6 clips to install the support plate.

12. INSTALL REAR NO. 2 SEAT ASSEMBLY LH (for Split Bench Seat Type)

a. Install the rear No. 2 seat assembly LH (Click here).

13. INSTALL REAR NO. 2 SEAT ASSEMBLY LH

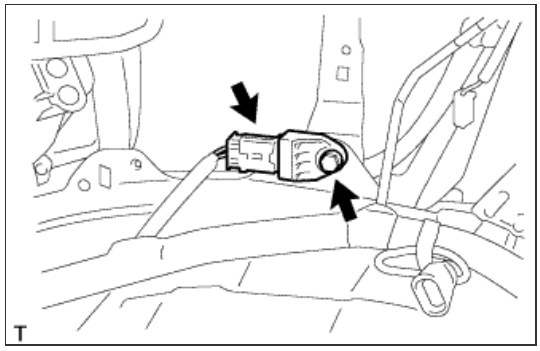
a. Install the rear No. 2 seat assembly LH (Click here).

14. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

15. CHECK SRS WARNING LIGHT



a. Check the SRS warning light (Click here).

for Preparation Click here

HINT:

- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**

1. INSTALL REAR AIRBAG SENSOR

a. Check that the engine switch is turned off.

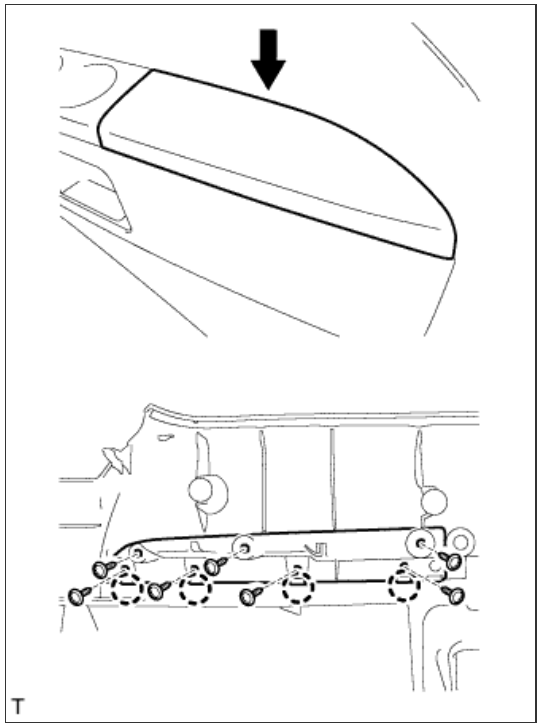
b. Check that the cable is disconnected from the battery negative (-) terminal.

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

c. Install the rear airbag sensor with the bolt.

Torque:
9.0 N*m{ 92 kgf*cm , 80 in.*lbf }

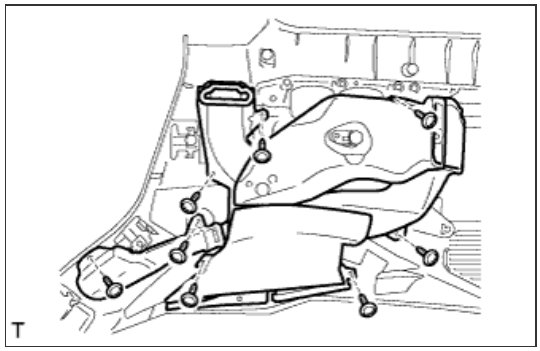


NOTICE:

- **If the rear airbag sensor has been dropped, or there are any cracks, dents or other defects in the case, bracket or connector, replace it with a new one.**
- **When installing the rear airbag sensor, be careful that the SRS wiring does not interfere with other parts and that it is not pinched between other parts.**

d. Check that there is no looseness in the installation parts of the rear airbag sensor.

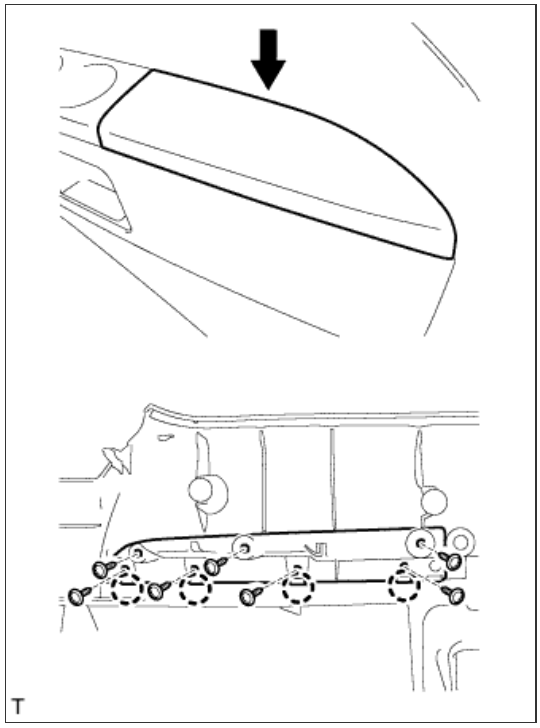
e. Connect the connector.



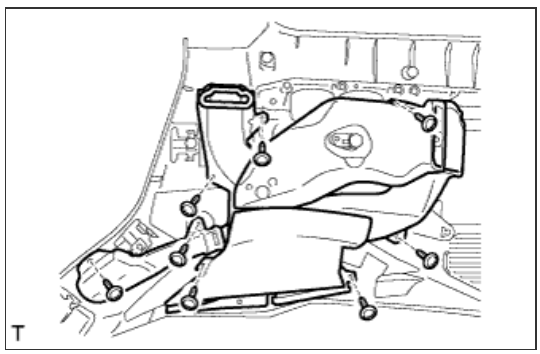
2. INSTALL FRONT QUARTER TRIM PANEL ASSEMBLY LH (w/ Sliding Roof)

a. Attach the 4 claws to install the quarter trim cover.

b. Install the 7 screws.



c. w/ Rear Heater:
Install the duct with the 8 screws.

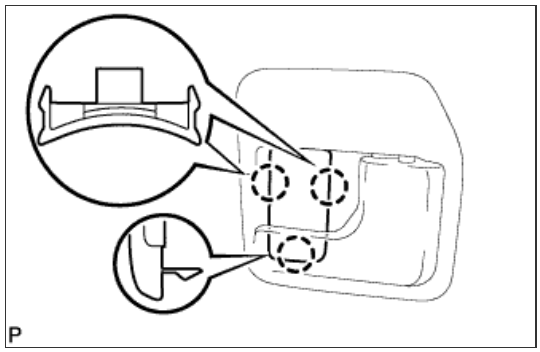


3. INSTALL FRONT QUARTER TRIM PANEL ASSEMBLY LH (w/o Sliding Roof)

a. Attach the 4 claws to install the quarter trim cover.

b. Install the 7 screws.

c. w/ Rear Heater:
Install the duct with the 8 screws.

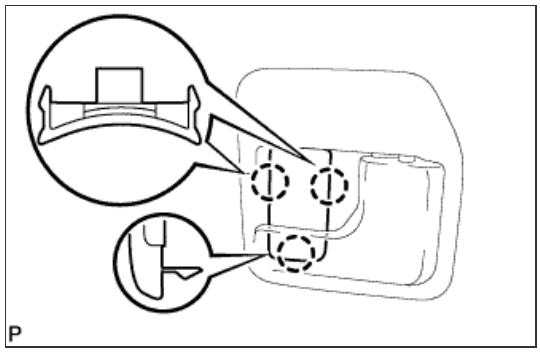


4. INSTALL REAR SEAT COVER CAP (w/ Sliding Roof)

HINT:

Use the same procedure to install the rear seat cover cap on the other side.

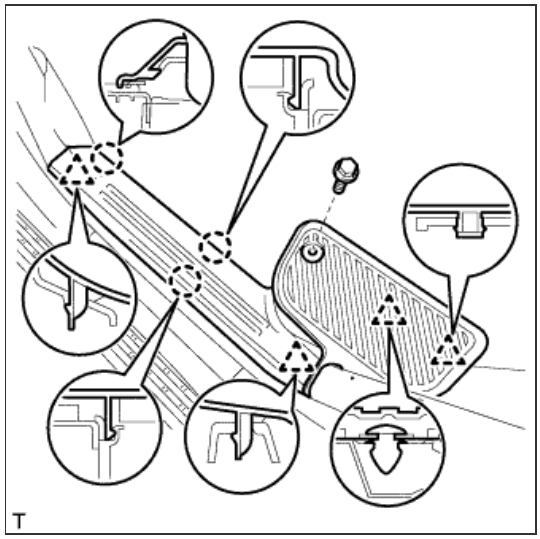
a. Attach the 3 claws to install the rear seat cover cap.



5. INSTALL REAR SEAT COVER CAP (w/o Sliding Roof)

HINT:

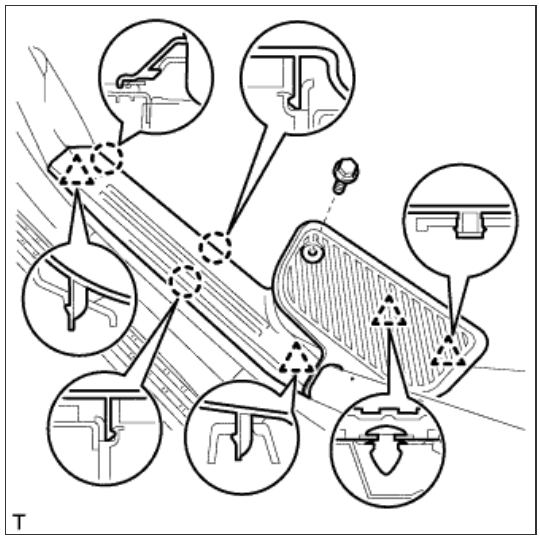
Use the same procedure to install the rear seat cover cap on the other side.



a. Attach the 3 claws to install the rear seat cover cap.

6. INSTALL REAR DOOR SCUFF PLATE LH (w/ Sliding Roof)

a. Attach the 3 claws and 4 clips to install the scuff plate.

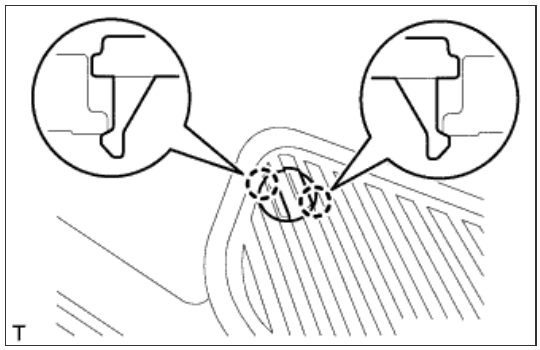


b. Install the screw.

7. INSTALL REAR DOOR SCUFF PLATE LH (w/o Sliding Roof)

a. Attach the 3 claws and 4 clips to install the scuff plate.

b. Install the screw.

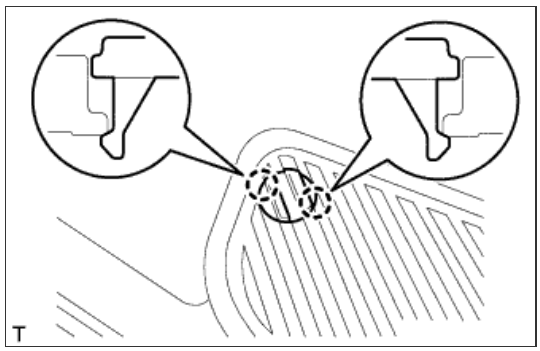


8. INSTALL REAR STEP COVER (w/ Sliding Roof)

HINT:

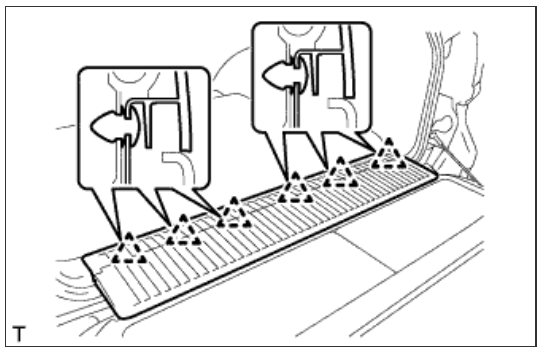
Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.



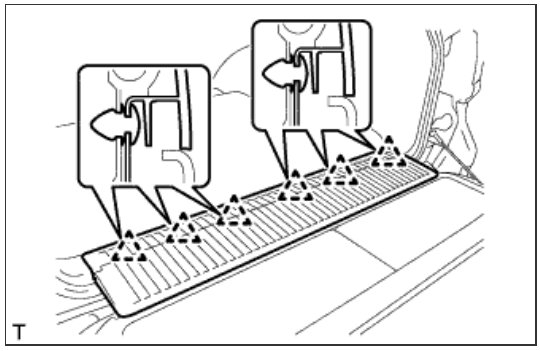
9. INSTALL REAR STEP COVER (w/o Sliding Roof)

HINT:



Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.



10. INSTALL REAR FLOOR MAT REAR SUPPORT PLATE (w/ Sliding Roof)

a. Attach the 6 clips to install the support plate.

11. INSTALL REAR FLOOR MAT REAR SUPPORT PLATE

a. Attach the 6 clips to install the support plate.

12. INSTALL REAR NO. 2 SEAT ASSEMBLY LH (for Split Bench Seat Type)

a. Install the rear No. 2 seat assembly LH (Click here).

13. INSTALL REAR NO. 2 SEAT ASSEMBLY LH

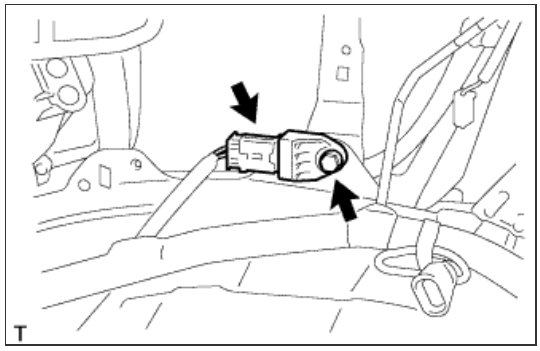
a. Install the rear No. 2 seat assembly LH (Click here).

14. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

15. CHECK SRS WARNING LIGHT



a. Check the SRS warning light (Click here).

for Preparation Click here

HINT:

- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**

1. INSTALL REAR AIRBAG SENSOR

a. Check that the engine switch is turned off.

b. Check that the cable is disconnected from the battery negative (-) terminal.

CAUTION:

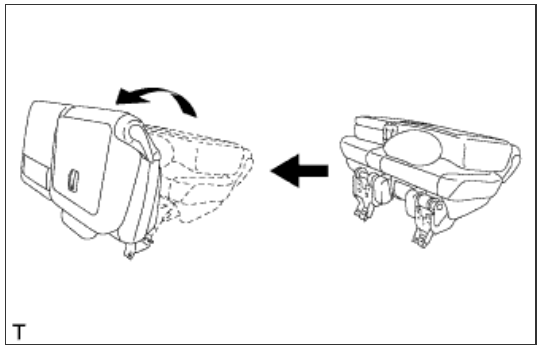
Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

c. Install the rear airbag sensor with the bolt.

Torque:
9.0 N*m{ 92 kgf*cm , 80 in.*lbf }

NOTICE:

- **If the rear airbag sensor has been dropped, or there are any cracks, dents or other defects in the case, bracket or connector, replace it with a new one.**
- **When installing the rear airbag sensor, be careful that the SRS wiring does not interfere with other parts and that it is not pinched between other parts.**



d. Check that there is no looseness in the installation parts of the rear airbag sensor.

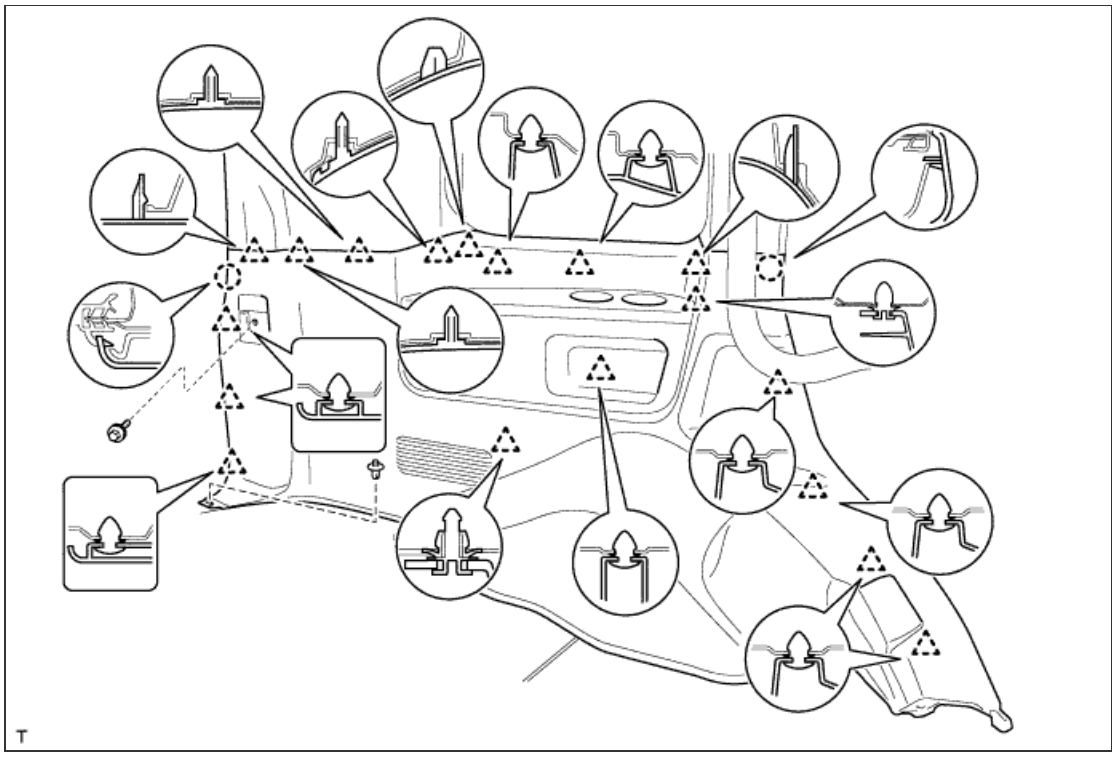
e. Connect the connector.

2. INSTALL FRONT QUARTER TRIM PANEL ASSEMBLY LH (w/ Sliding Roof)

HINT:

When installing the front quarter trim panel, operate the reclining adjuster release handle and move the No. 1 rear seat to the position shown in the illustration.

a. w/ Rear No. 2 Seat, except Face to Face Seat ype:

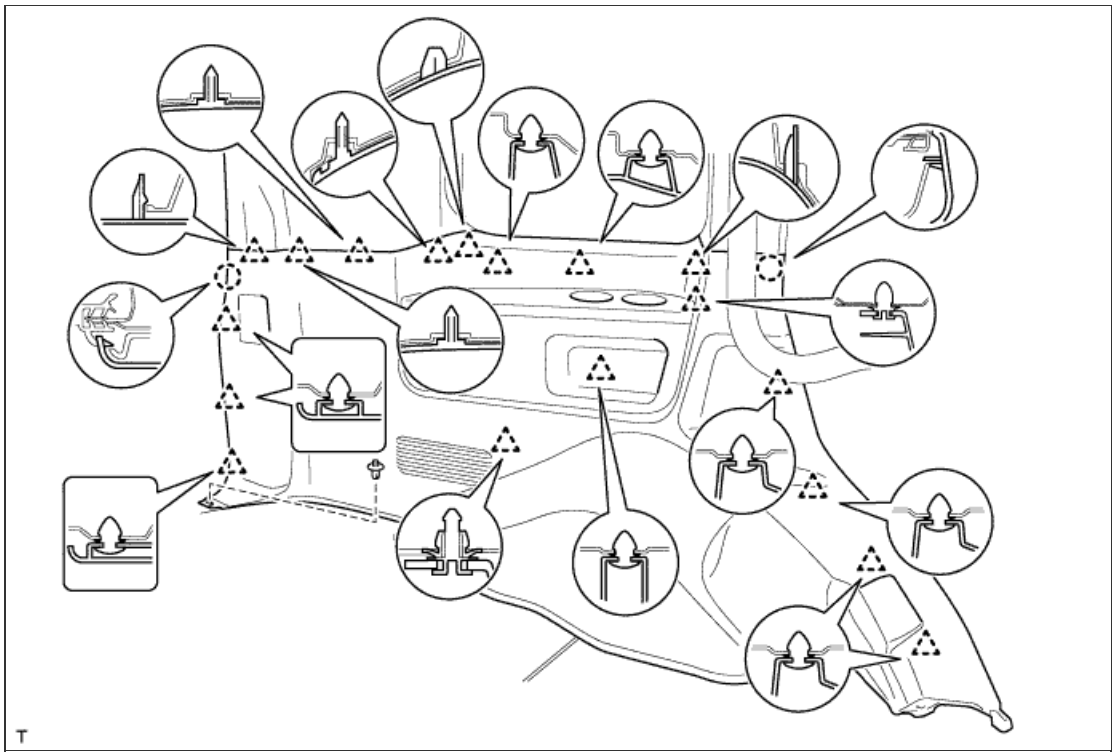


i. w/o Rear Air Conditioning System:
Connect the rear seat lock control lever cable.

ii. w/ Rear Air Conditioning System:
Connect the thermistor connector and rear seat lock control lever cable.

iii. Attach the 18 clips and 2 claws to install the quarter trim panel.

i . Install the clip and bolt.

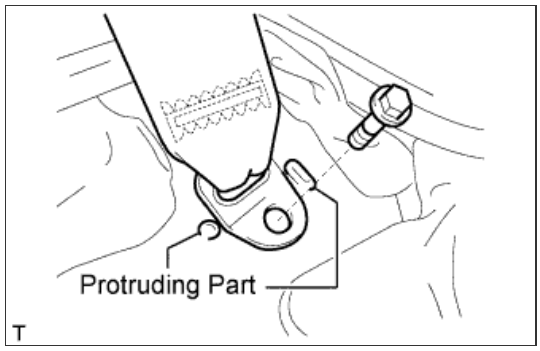


Torque:
12 N*m{ 122 kgf*cm , 9 ft.*lbf }

b. w/o Rear No. 2 Seat or w/ Rear No. 2 Seat, for Face to Face Seat ype:

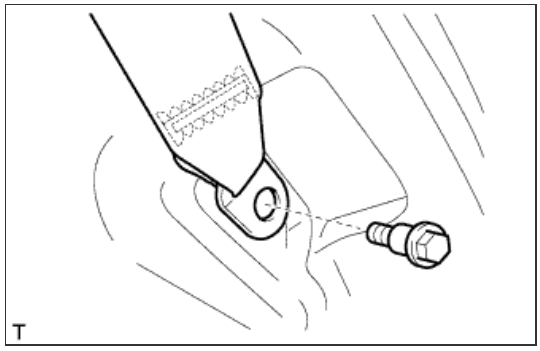
i. Attach the 18 clips and 2 claws to install the quarter trim panel.

ii. Install the clip.



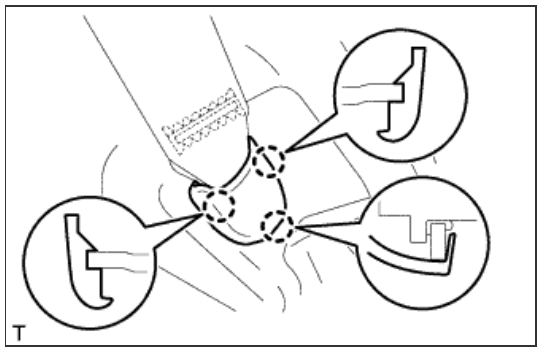
c. w/ Rear No. 2 Seat, except Face to Face Seat ype:
Install the rear No. 2 seat belt anchor with the bolt.

Torque:
42 N*m{ 428 kgf*cm , 1 ft.*lbf }



NOTICE:

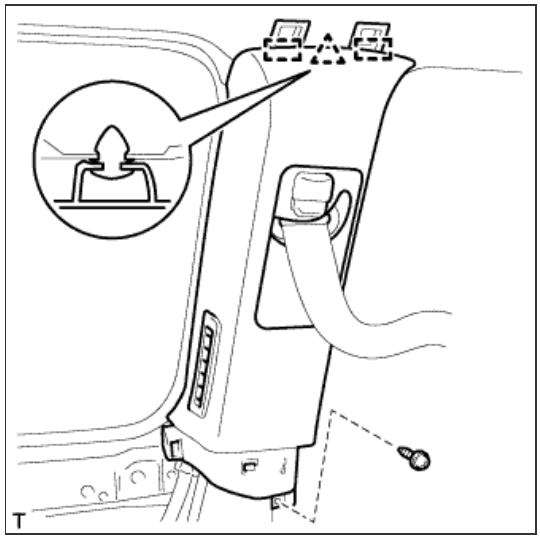
Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.



d. Install the rear No. 1 seat belt anchor with the bolt.

Torque:
42 N*m{ 428 kgf*cm , 1 ft.*lbf }

e. Attach the 3 claws to install the cover.

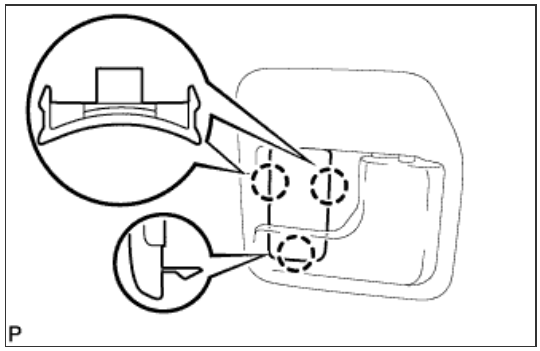


. INSTALL FRONT QUARTER TRIM PANEL ASSEMBLY LH (w/o Sliding Roof)

a. as the seat belt anchor through the quarter trim garnish.

b. Attach the clip and 2 guides to install the quarter trim garnish.

c. Install the screw.

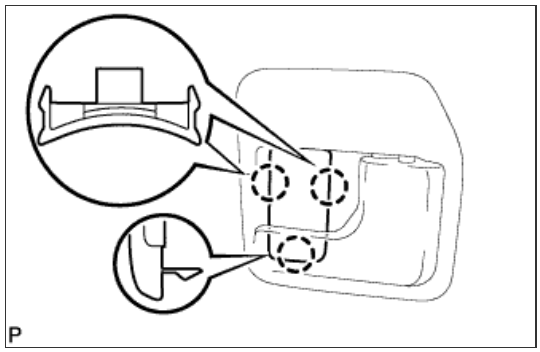


4. INSTALL REAR SEAT COVER CAP (w/ Sliding Roof)

HINT:

se the same procedure to install the rear seat cover cap on the other side.

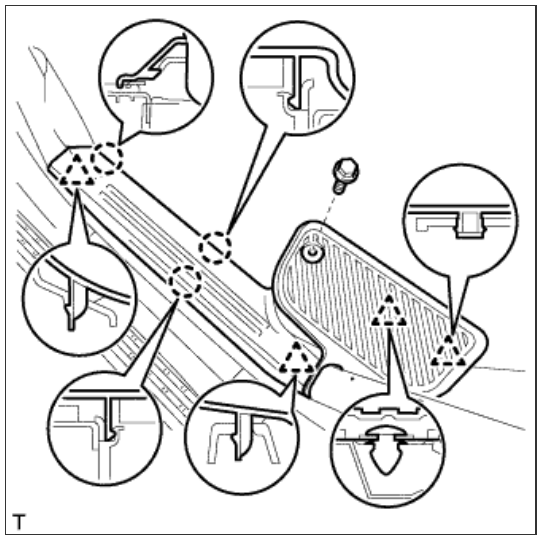
a. Attach the 3 claws to install the rear seat cover cap.



. INSTALL REAR SEAT COVER CAP (w/o Sliding Roof)

HINT:

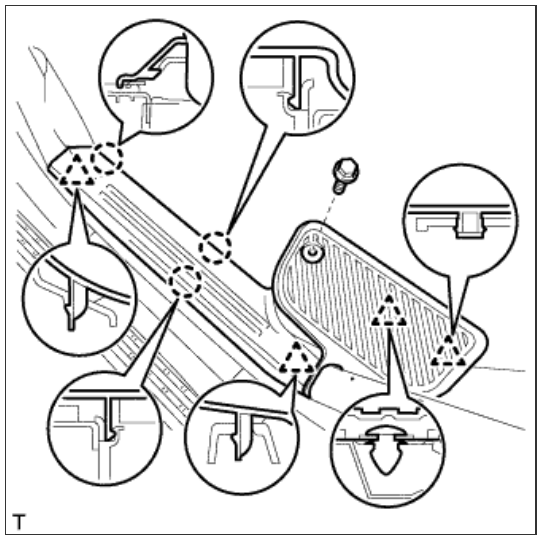
se the same procedure to install the rear seat cover cap on the other side.



a. Attach the 3 claws to install the rear seat cover cap.

. INSTALL REAR OOR SCUFF PLATE LH (w/ Sliding Roof)

a. Attach the 3 claws and 4 clips to install the scuff plate.

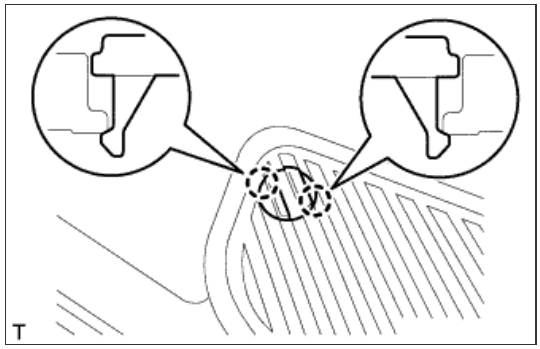


b. Install the screw.

7. INSTALL REAR DOOR SCUFF PLATE LH (w/o Sliding Roof)

a. Attach the 3 claws and 4 clips to install the scuff plate.

b. Install the screw.

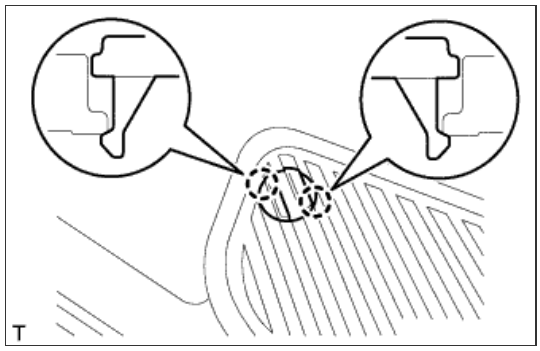


8. INSTALL REAR STEP COVER (w/ Sliding Roof)

HINT:

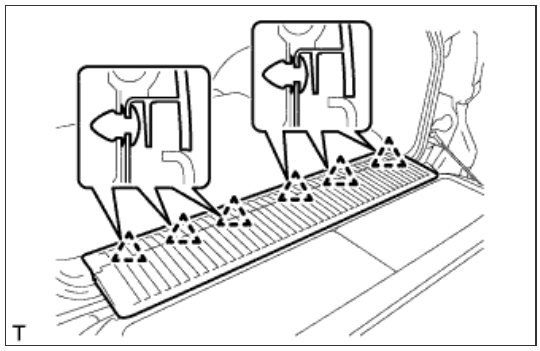
Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.



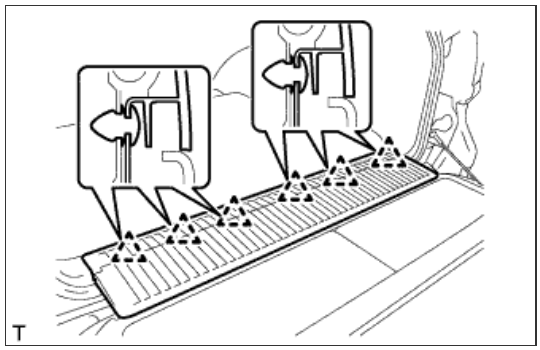
9. INSTALL REAR STEP COVER (w/o Sliding Roof)

HINT:



Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.



10. INSTALL REAR FLOOR MAT REAR SUPPORT PLATE (w/ Sliding Roof)

a. Attach the 6 clips to install the support plate.

11. INSTALL REAR FLOOR MAT REAR SUPPORT PLATE (w/o Sliding Roof)

a. Attach the 6 clips to install the support plate.

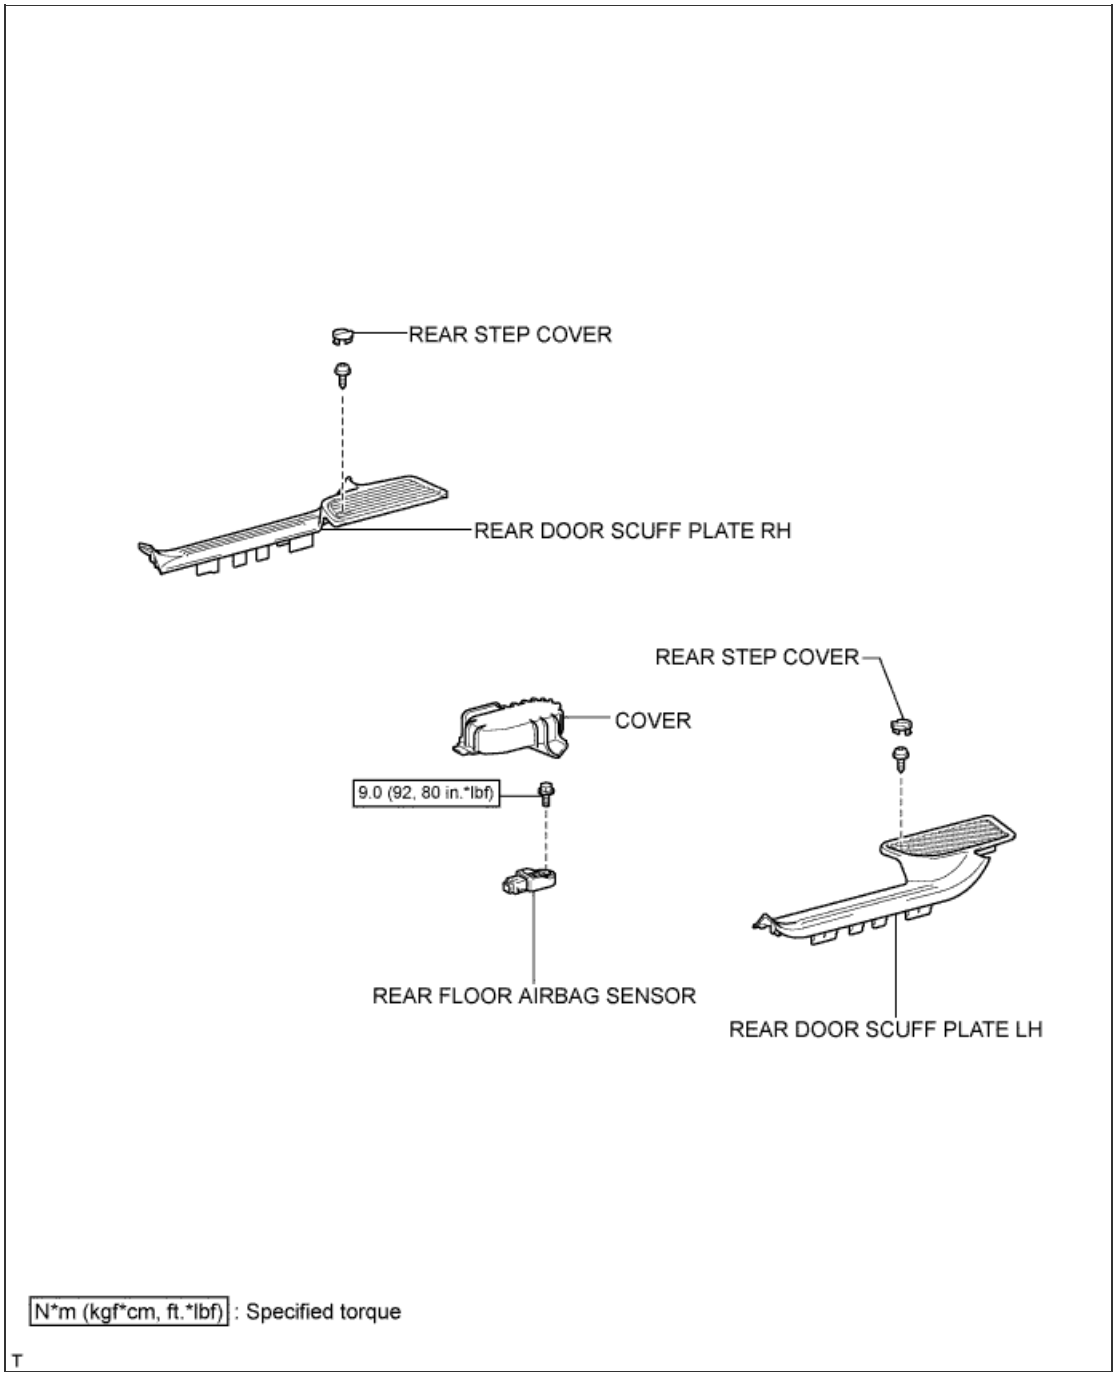
12. INSTALL REAR NO. 2 SEAT ASSEMBLY LH (for Split Bench Seat Type)

a. Install the rear No. 2 seat assembly LH (Click here).

1 . INSTALL REAR NO. 2 SEAT ASSEMBLY LH

a. Install the rear No. 2 seat assembly LH (Click here).

14. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL



NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

1 . CHEC SRSWARNING LIGHT

a. Check the SRS warning light (Click here).

for Preparation Click here

for Preparation Click here

1. CHECK REAR FLOOR AIRBAG SENSOR (VEHICLE NOT INVOLVE IN COLLISION)

a. Perform a diagnostic system check (Click here).

2. CHECK REAR FLOOR AIRBAG SENSOR (VEHICLE INVOLVE IN COLLISION AN AIRBAG HAS NOT EPLOYE

a. Perform a diagnostic system check (Click here).

b. When airbags have deployed as the result of a collision, be certain to replace the rear floor airbag sensor when it is in the damaged area (anywhere in need of repair). rthermore, it is also necessary to replace the rear floor airbag sensor in an undamaged area that has registered a major collision, or which exhibits any of the following abnormalities:

- Cracks, dents or chips on the sensor housing.
- Cracks or other damage to the connector.
- Peeling off of the label or damage to the serial number.

CAUTION:

or removal and installation procedures of the rear floor airbag sensor, be sure to follow the correct procedure.

3. CHECK REAR FLOOR AIRBAG SENSOR (VEHICLE INVOLVE IN COLLISION AN AIRBAG IS EPLOYE

a. When airbags have deployed as the result of a collision, be certain to replace the rear floor airbag sensor in the damaged area (anywhere in need of repair). rthermore, it is also necessary to replace the rear floor airbag sensor in a undamaged area that has registered a major collision, or which exhibits any of the following abnormalities:

- Cracks, dents or chips on the sensor housing.
- Cracks or other damage to the connector.
- Peeling off of the label or damage to the serial number.

CAUTION:

or removal and installation procedures of the rear floor airbag sensor, be sure to follow the correct procedure.

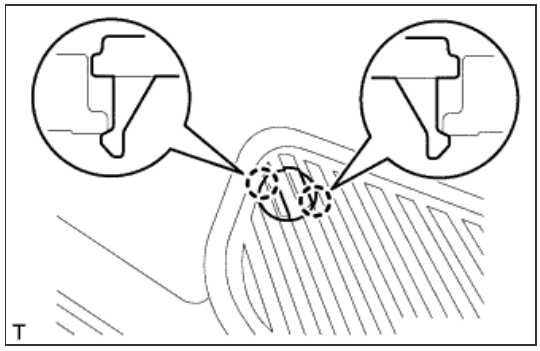
for Preparation Click here

1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

NOTICE:



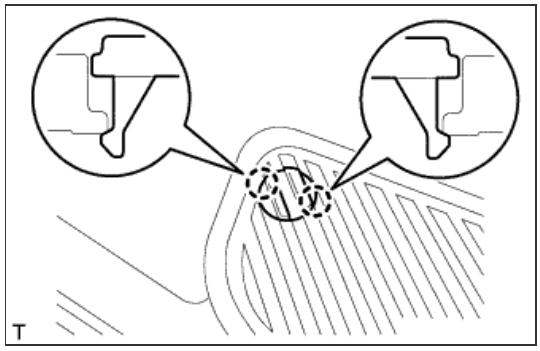
When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

2. REMOVE REAR STEP COVER (w/ Sliding Roof)

HINT:

Use the same procedure to remove the step cover on the other side.

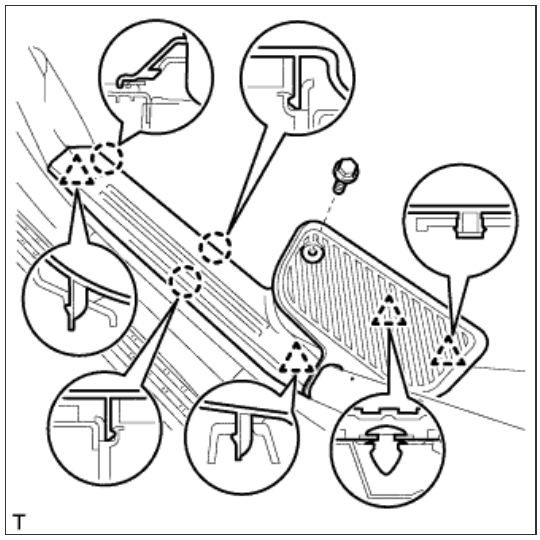
a. Detach the 2 cla s and remove the step cover.



3. REMOVE REAR STEP COVER (w/o Sliding Roof)

HINT:

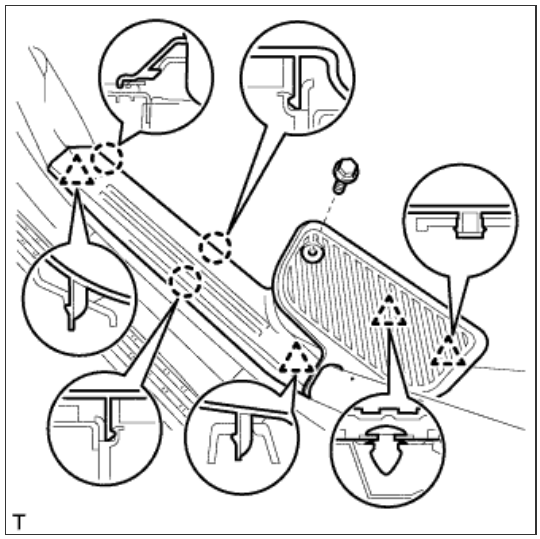
Use the same procedure to remove the step cover on the other side.



a. Detach the 2 cla s and remove the step cover.

4. REMOVE REAR DOOR SCUFF PLATE LH (w/ Sliding Roof)

a. Remove the scre



b. etach the 3 cla s and 4 clips, and remove the scuff plate.

5. REMOVE REAR DOOR SCUFF PLATE LH (w/o Sliding Roof)

a. Remove the scre

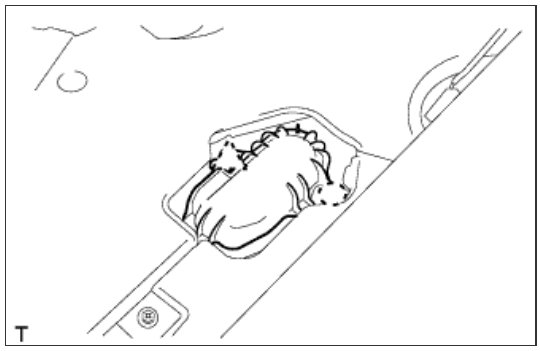
b. etach the 3 cla s and 4 clips, and remove the scuff plate.

6. REMOVE REAR DOOR SCUFF PLATE RH (w/ Sliding Roof)

HINT:

Use the same procedures described for the LH side.

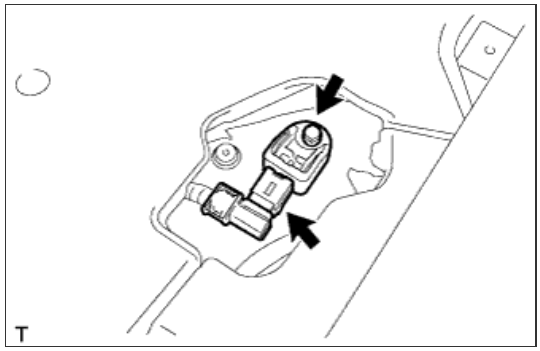
7. REMOVE REAR DOOR SCUFF PLATE RH (w/o Sliding Roof)



HINT:

Use the same procedures described for the LH side.

8. REMOVE REAR FLOOR AIRBAG SENSOR



a. Fold back the floor carpet.

b. Detach the clip and cla and remove the cover.

c. Remove the bolt and sensor.

d. Disconnect the connector.

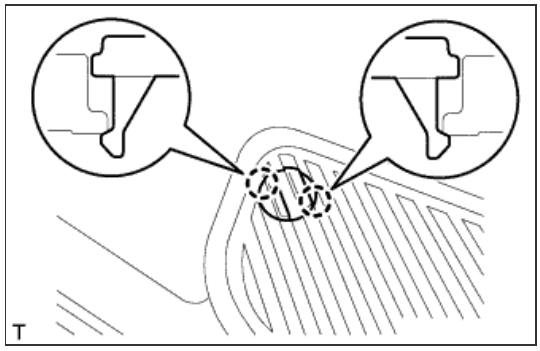
for Preparation Click here

1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

NOTICE:



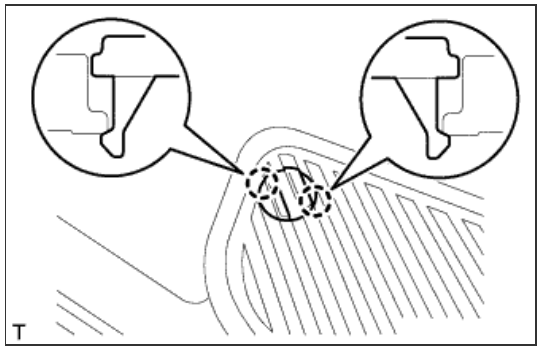
When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

2. REMOVE REAR STEP COVER (w/ Sliding Roof)

HINT:

Use the same procedure to remove the step cover on the other side.

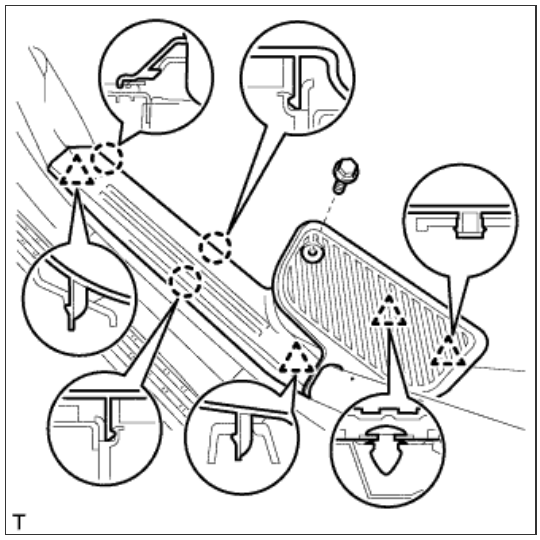
a. Detach the 2 cla s and remove the step cover.



3. REMOVE REAR STEP COVER (w/o Sliding Roof)

HINT:

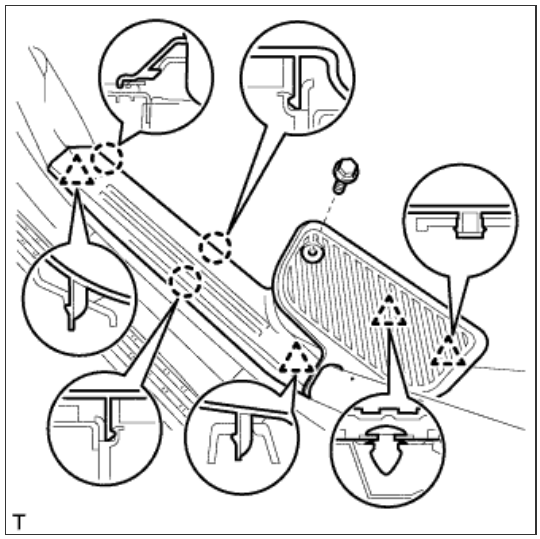
Use the same procedure to remove the step cover on the other side.



a. Detach the 2 cla s and remove the step cover.

4. REMOVE REAR DOOR SCUFF PLATE LH (w/ Sliding Roof)

a. Remove the scre



b. etach the 3 cla s and 4 clips, and remove the scuff plate.

5. REMOVE REAR DOOR SCUFF PLATE LH (w/o Sliding Roof)

a. Remove the scre

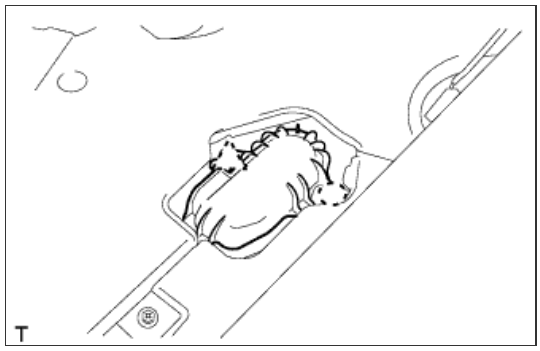
b. etach the 3 cla s and 4 clips, and remove the scuff plate.

6. REMOVE REAR DOOR SCUFF PLATE RH (w/ Sliding Roof)

HINT:

Use the same procedures described for the LH side.

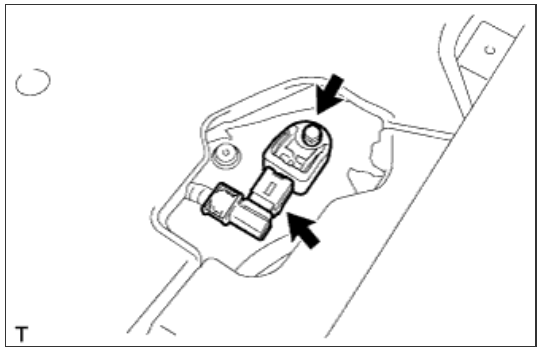
7. REMOVE REAR DOOR SCUFF PLATE RH (w/o Sliding Roof)



HINT:

Use the same procedures described for the LH side.

8. REMOVE REAR FLOOR AIRBAG SENSOR



a. Fold back the floor carpet.

b. Detach the clip and cla and remove the cover.

c. Remove the bolt and sensor.

d. Disconnect the connector.

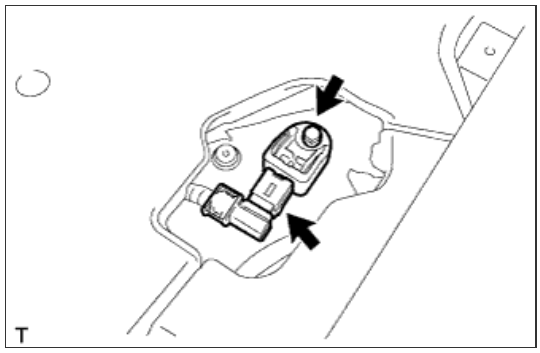
for Preparation Click here

1. INSTALL REAR FLOOR AIRBAG SENSOR

a. Check that the engine switch is off.

b. Check that the cable is disconnected from the battery negative (-) terminal.

CAUTION:



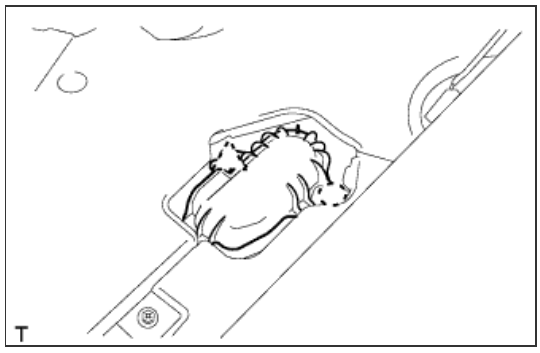
Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

c. Install the rear floor airbag sensor with the bolt.

Torque:
9.0 N*m{ 92 kgf*cm , 80 in.*lbf }

NOTICE:

- **If the rear floor airbag sensor has been dropped, or there are any cracks, dents or other defects in the case, bracket or connector, replace it with a new one.**
- **When installing the rear floor airbag sensor, be careful that the SRS wiring does not interfere with other parts and that it is not pinched between other parts.**



d. Check that there is no looseness in the installation parts of the rear floor airbag sensor.

e. Connect the connector.

f. Attach the clip, claw and cover.

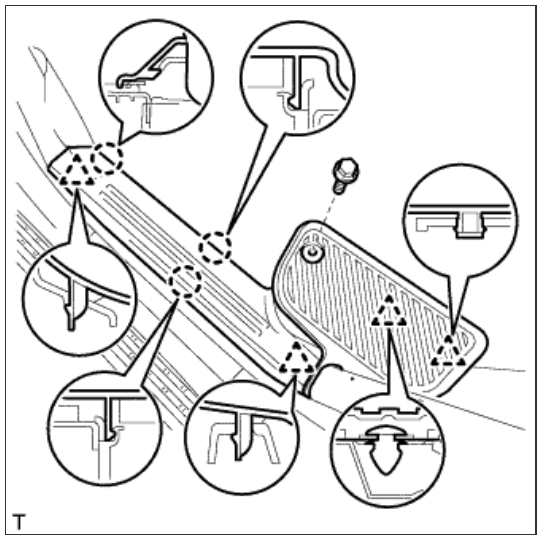
g. Return the floor carpet to its original position.

2. INSTALL REAR DOOR SCUFF PLATE RH (w/ Sliding Roof)

HINT:

Use the same procedures described for the LH side.

3. INSTALL REAR DOOR SCUFF PLATE RH (w/o Sliding Roof)

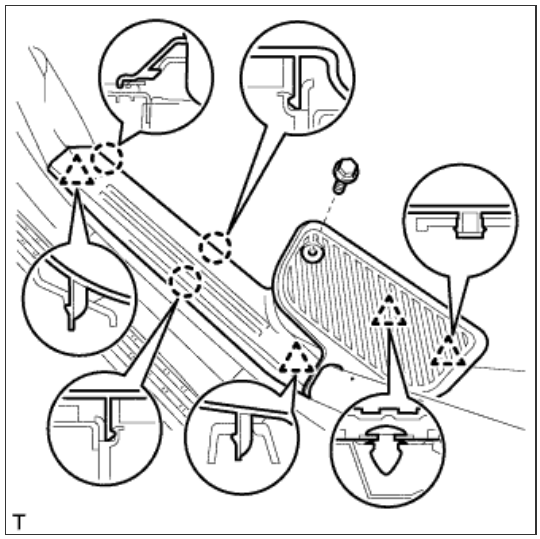


HINT:

Use the same procedures described for the LH side.

4. INSTALL REAR DOOR SCUFF PLATE LH (w/ Sliding Roof)

a. Attach the 3 claws and 4 clips to install the scuff plate.

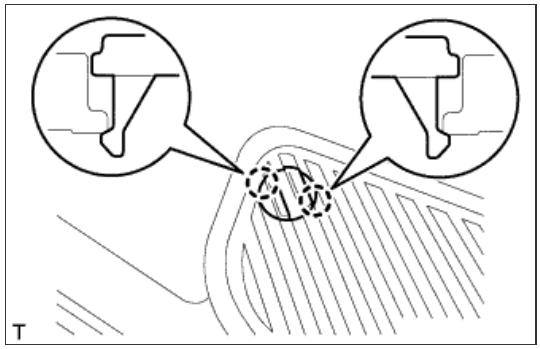


b. Install the screw.

5. INSTALL REAR DOOR SCUFF PLATE LH (w/o Sliding Roof)

a. Attach the 3 claws and 4 clips to install the scuff plate.

b. Install the screw.

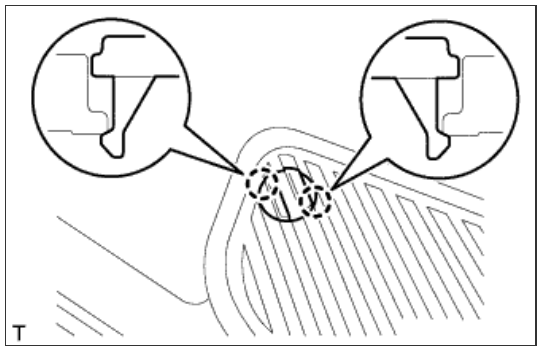


6. INSTALL REAR STEP COVER (w/ Sliding Roof)

HINT:

Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.



7. INSTALL REAR STEP COVER (w/o Sliding Roof)

HINT:

Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.

8. CONNECT CABLE TO NEGATIVE BATTERY TER INAL

NOTICE:

hen disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here)

9. CHEC SRS WARNING LIGHT

a. Check the SRS warning light (Click here)

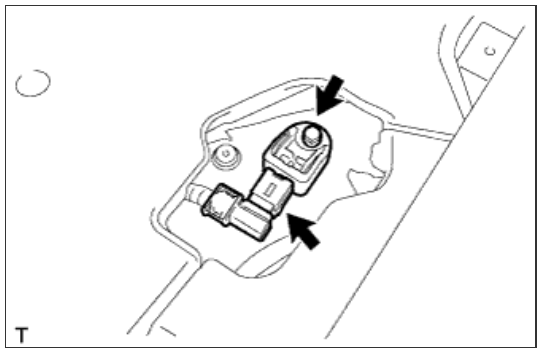
for Preparation Click here

1. INSTALL REAR FLOOR AIRBAG SENSOR

a. Check that the engine switch is off.

b. Check that the cable is disconnected from the battery negative (-) terminal.

CAUTION:



Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

c. Install the rear floor airbag sensor with the bolt.

Torque:
9.0 N*m{ 92 kgf*cm , 80 in.*lbf }

NOTICE:

- **If the rear floor airbag sensor has been dropped, or there are any cracks, dents or other defects in the case, bracket or connector, replace it with a new one.**

for Preparation Click here

1. CHECK SEAT POSITION SENSOR (VEHICLE NOT INVOLVED IN COLLISION)

a. Perform a diagnostic system check (Click here).

2. CHECK SEAT POSITION SENSOR (VEHICLE INVOLVED IN COLLISION)

a. Perform a diagnostic system check (Click here).

b. Even if the airbag was not deployed, check if there is any damage to the seat position sensor. If there are any defects as mentioned below, replace the seat position sensor with a new one:

- Cracks, dents or chips on the sensor housing.
- Cracks or other damage to the connector.

CAUTION:

For removal and installation procedures of the seat position sensor, be sure to follow the correct procedure.

for Preparation Click here

1. CHECK SEAT POSITION SENSOR (VEHICLE NOT INVOLVED IN COLLISION)

a. Perform a diagnostic system check (Click here).

2. CHECK SEAT POSITION SENSOR (VEHICLE INVOLVED IN COLLISION)

a. Perform a diagnostic system check (Click here).

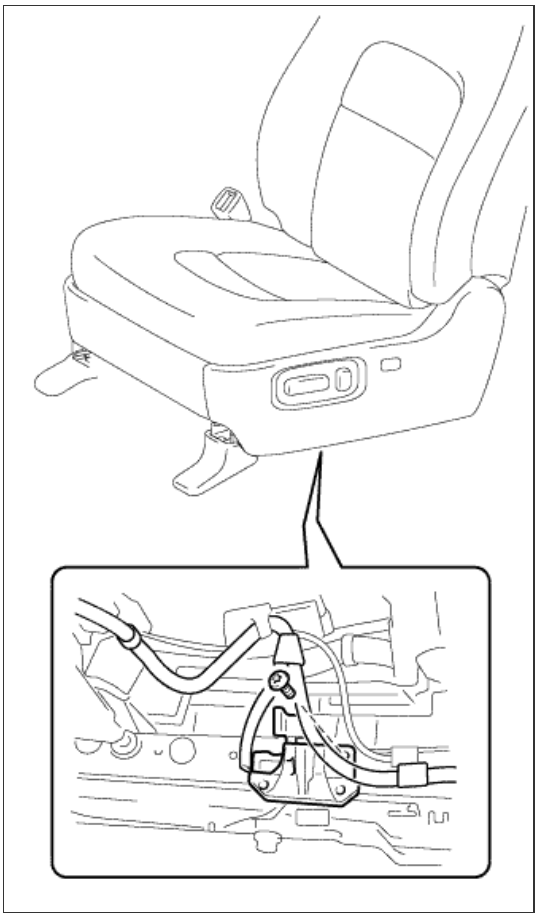
b. Even if the airbag was not deployed, check if there is any damage to the seat position sensor. If there are any defects as mentioned below, replace the seat position sensor with a new one:

- Cracks, dents or chips on the sensor housing.
- Cracks or other damage to the connector.

CAUTION:

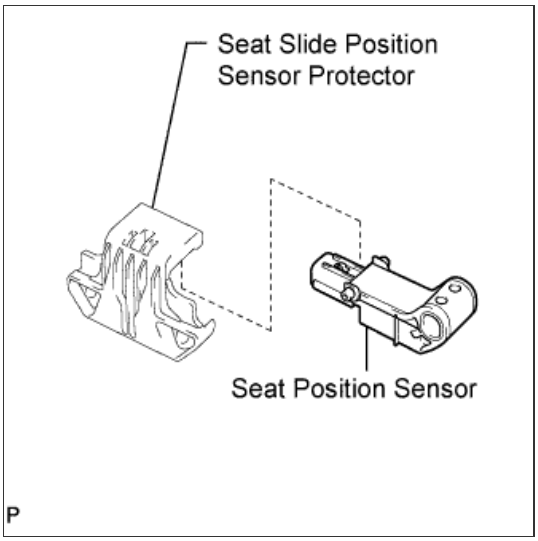
For removal and installation procedures of the seat position sensor, be sure to follow the correct procedure.

for Preparation Click here



1. REMOVE FRONT SEAT ASSEMBLY LH

a. Remove the front seat (Click here).



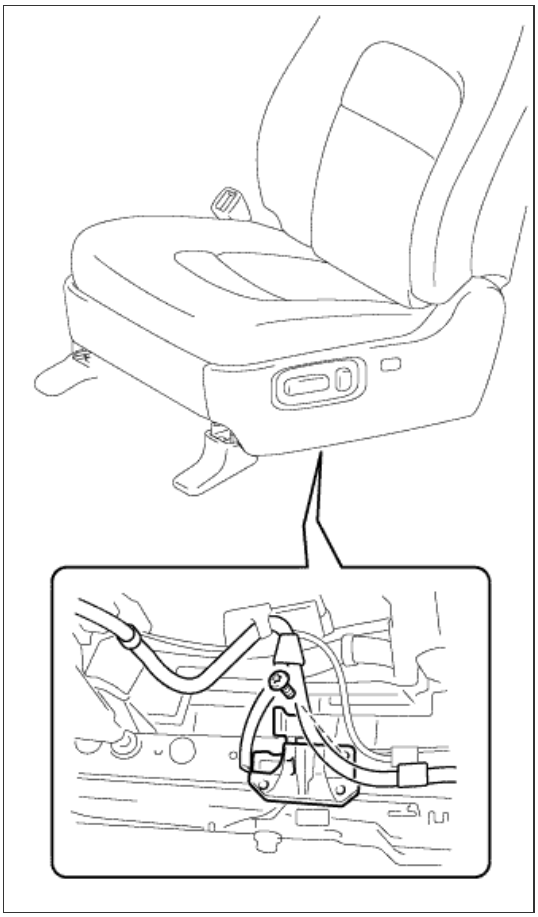
2. REMOVE SEAT POSITION SENSOR

a. Using a T30 "TOR socket wrench, remove the screw and seat position sensor with sensor protector.

b. Disconnect the connector.

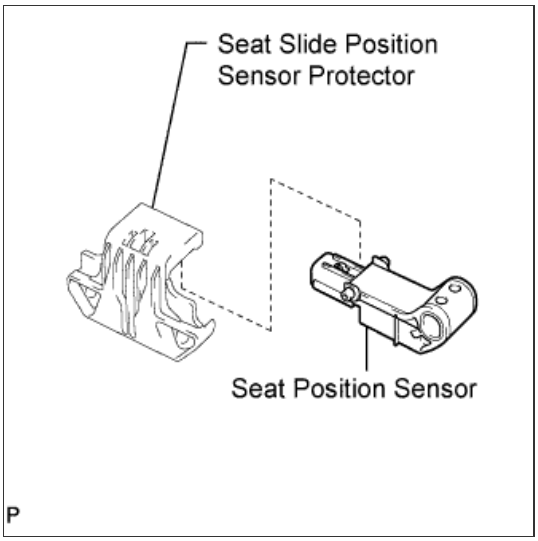
c. Remove the seat slide position sensor protector from the seat position sensor.

for Preparation Click here



1. REMOVE FRONT SEAT ASSEMBLY LH

a. Remove the front seat (Click here).



2. REMOVE SEAT POSITION SENSOR

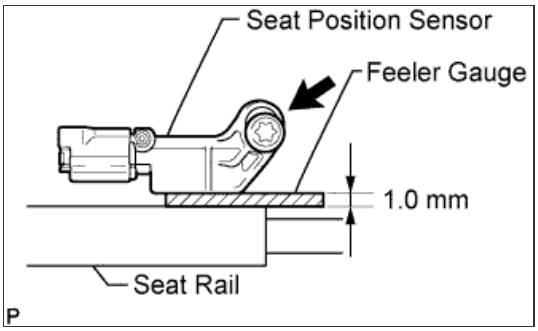
a. Using a T30 "TOR socket wrench, remove the screw and seat position sensor with sensor protector.

b. Disconnect the connector.

c. Remove the seat slide position sensor protector from the seat position sensor.

for Preparation Click here

1. INSTALL SEAT POSITION SENSOR



a. Check that the engine switch is off.

b. Check that the cable is disconnected from the battery negative (-) terminal.

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

c. Using a 1.0 mm (0.0393 in.) feeler gauge, install the seat position sensor.

NOTICE:

- **If the seat position sensor has been dropped, or there are any cracks, dents or other defects in the case or connector, replace the seat position sensor with a new one.**
- **When installing the seat position sensor, be careful that the SRS wiring does not interfere with other parts and that it is not pinched between other parts.**

HINT:

Be sure that the clearance between the seat position sensor and the seat rail is within 0.6 to 1.4 mm (0.0236 to 0.0551 in.).

d. Using a T30 R socket wrench, install the seat position sensor with the screw.

Torque:
8.0 N*m{ 82 kgf*cm , 71 in.*lbf }

e. Make sure that the clearance between the seat position sensor and the seat rail is within 0.6 to 1.4 mm (0.0236 to 0.0551 in.).

f. Check that there is no looseness in the installation parts of the seat position sensor.

g. Connect the connector.

h. Install the seat slide position sensor protector to the seat position sensor.

2. INSTALL FRONT SEAT ASSEMBLY LH

a. Install the front seat (Click here).

3. CHECK SRS WARNING LIGHT

a. Check the SRS warning light (Click here).

for Preparation Click here

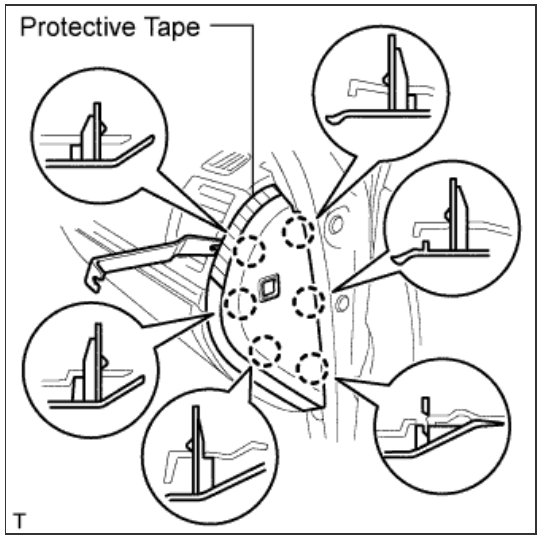
1. ISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

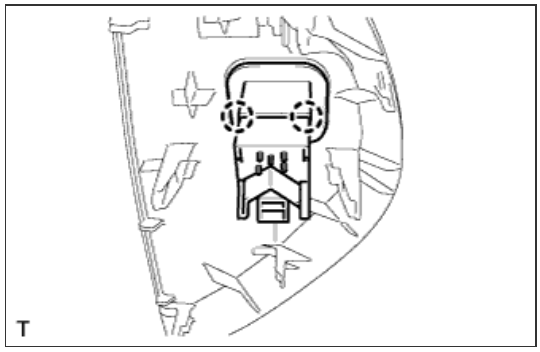
NOTICE:



When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

2. REMOVE INSTRUMENT SI E PANEL RH

a. Place protective tape as shown in the illustration.



b. Using a moulding remover, detach the 6 claws.

c. Remove the side panel and disconnect the connector.

3. REMOVE AIRBAG CUT-OFF SWITCH

a. Detach the 2 claws and remove the airbag cut-off switch.

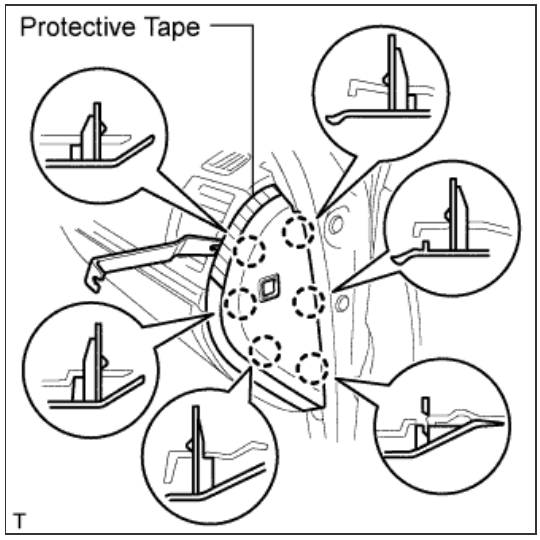
for Preparation Click here

1. ISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

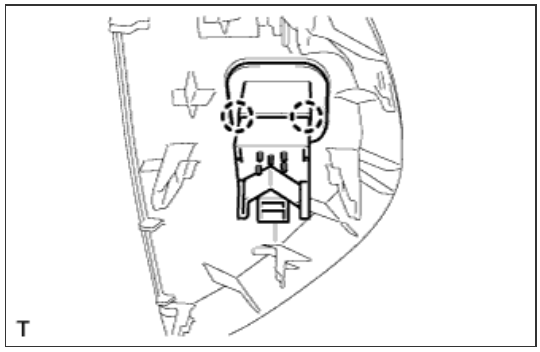
NOTICE:



When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

2. REMOVE INSTRUMENT SI E PANEL RH

a. Place protective tape as shown in the illustration.

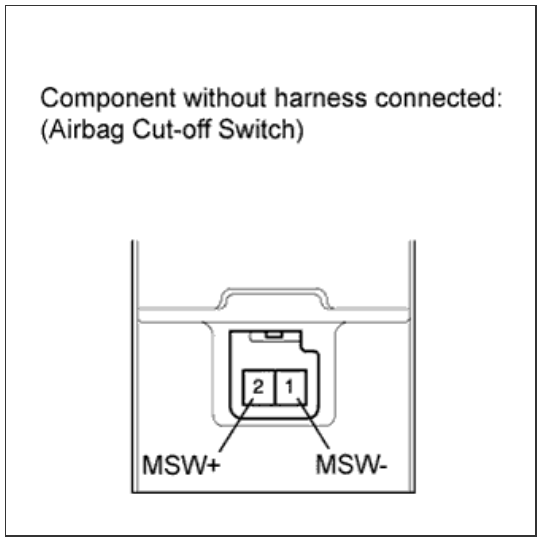


b. Using a moulding remover, detach the 6 claws.

c. Remove the side panel and disconnect the connector.

3. REMOVE AIRBAG CUT-OFF SWITCH

a. Detach the 2 claws and remove the airbag cut-off switch.

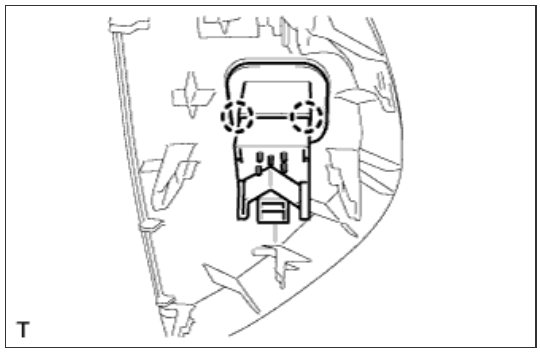


for Preparation Click here

1. INSPECT AIRBAG CUT-OFF SWITCH

a. Measure the resistance according to the value(s) in the table below.

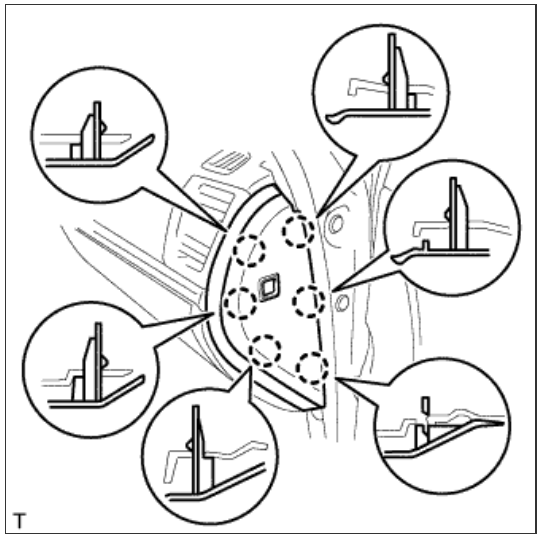
Standard Resistance:



Tester Connection	Switch Condition	Specified Condition
1 (MSW-) - (MSW)	Off	400 Ω
1 (MSW-) - (MSW)	On	100 Ω

for Preparation Click here

1. INSTALL AIRBAG CUT-OFF SWITCH



a. Attach the 2 claws to install the switch.

2. INSTALL INSTRUMENT SI PANEL RH

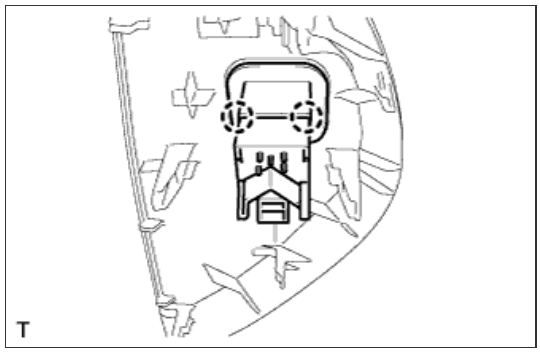
a. Connect the connector.

b. Attach the 6 claws to install the side panel.

. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL

NOTICE:

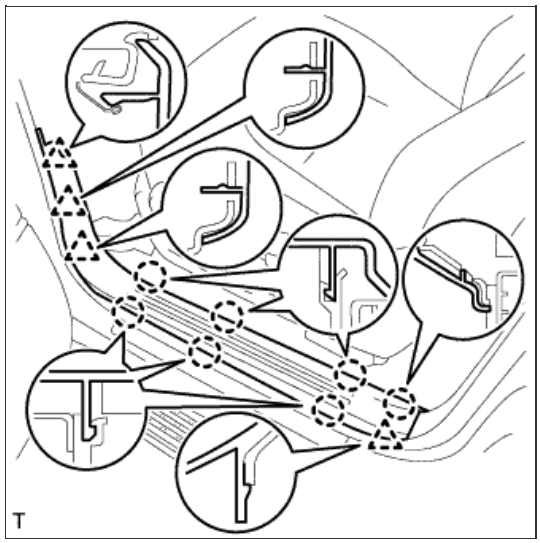
When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).



4. CHECK SRS WARNING LIGHT

a. Check the SRS warning light (Click here).

for Preparation Click here



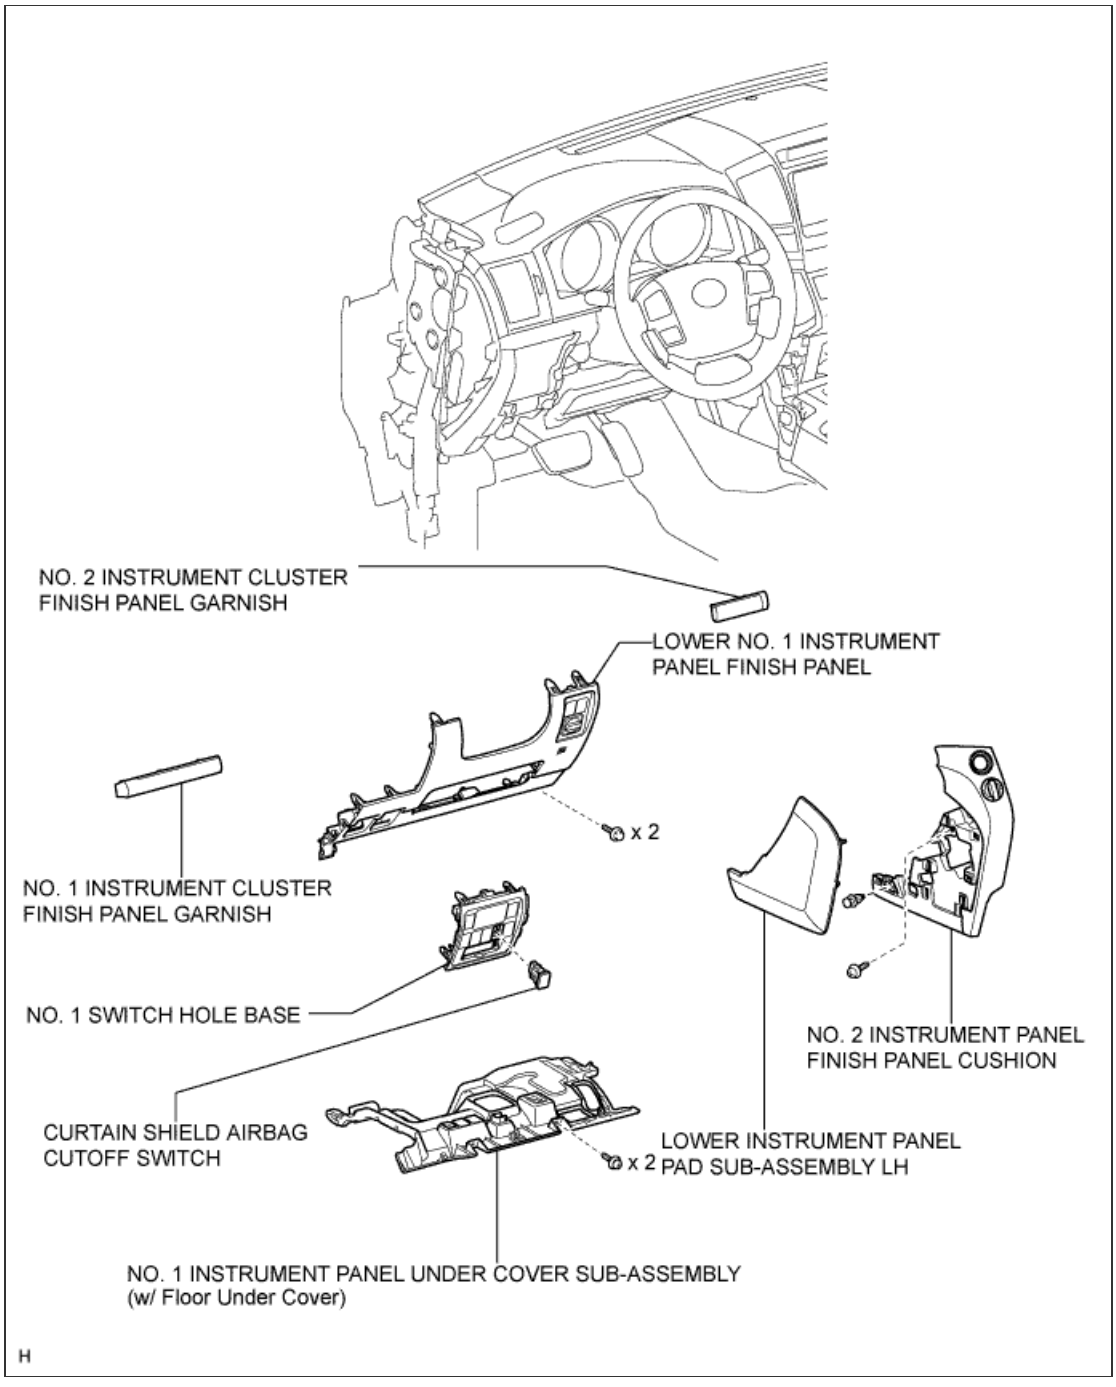
1. INSTALL AIRBAG CUT-OFF SWITCH

a. Attach the 2 claws to install the switch.

2. INSTALL INSTRUMENT SI PANEL RH

a. Attach the 7 claws and 4 clips to install the scuff plate.

3. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL



NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

4. CHECK SRS WARNING LIGHT

a. Check the SRS warning light (Click here).

CURTAIN SHIELD AIRBAG CUTOFF SWITCH > REMOVAL

for Preparation Click here

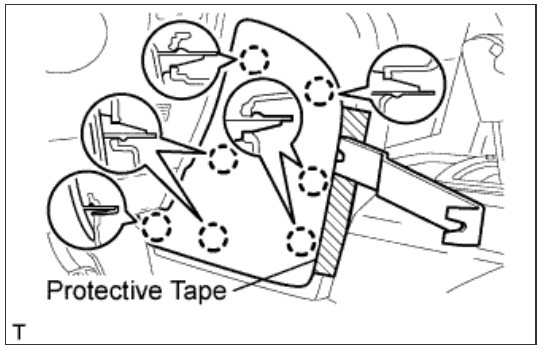
HINT:

- **Use the same procedures for the RH and LH.**
- **The procedures listed below are the LH side.**

1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.



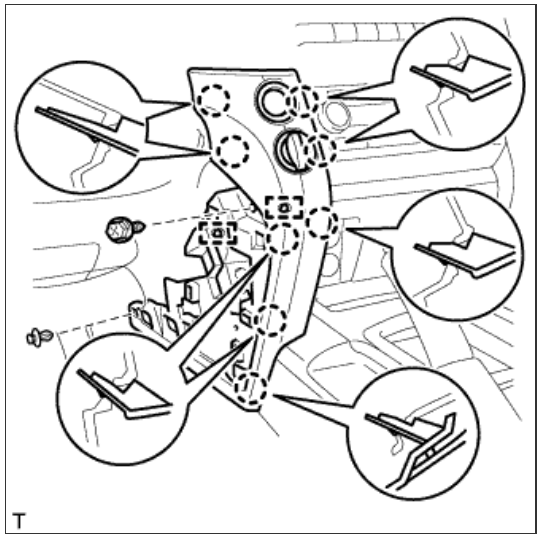
NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

2. REMOVE NO. 2 INSTRUMENT PANEL FINISH PANEL CUSHION

a. Place protective tape as shown in the illustration.

b. Using a moulding remover, detach the 7 claws and remove the panel cushion.

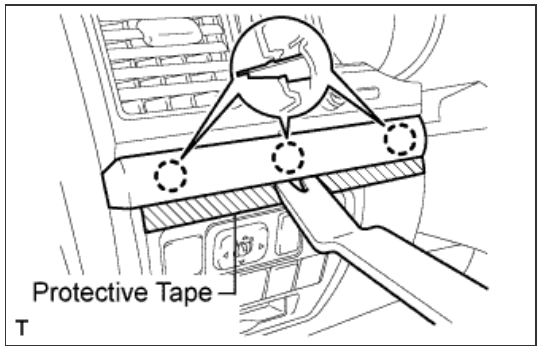


3. REMOVE LOWER INSTRUMENT PANEL PAD SUB-ASSEMBLY LH

a. Remove the clip.

b. Remove the screw.

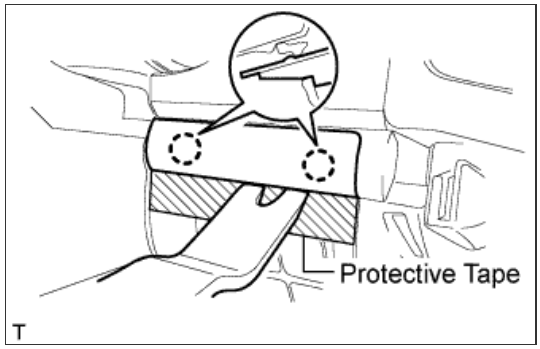
c. Detach the 8 claws.



d. Remove the panel pad and disconnect the connectors and 2 clamps.

4. REMOVE NO. 1 INSTRUMENT CLUSTER FINISH PANEL GARNISH

a. Place protective tape as shown in the illustration.

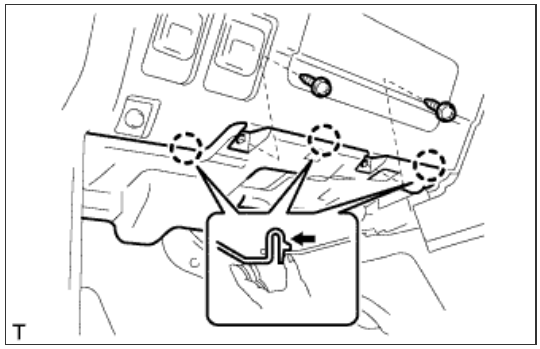


b. Using a moulding remover, detach the 3 claws and remove the panel garnish.

5. REMOVE NO. 2 INSTRUMENT CLUSTER FINISH PANEL GARNISH

a. Place protective tape as shown in the illustration.

b. Using a moulding remover, detach the 2 claws and remove the panel garnish.

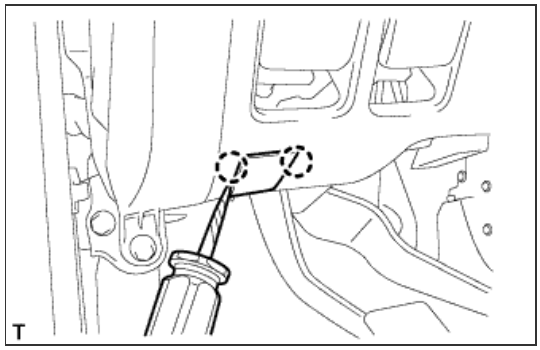


6. REMOVE NO. 1 INSTRUMENT PANEL UNDER COVER SUB-ASSEMBLY (w/ Floor Under Cover)

a. Remove the 2 screws.

b. Detach the 3 claws.

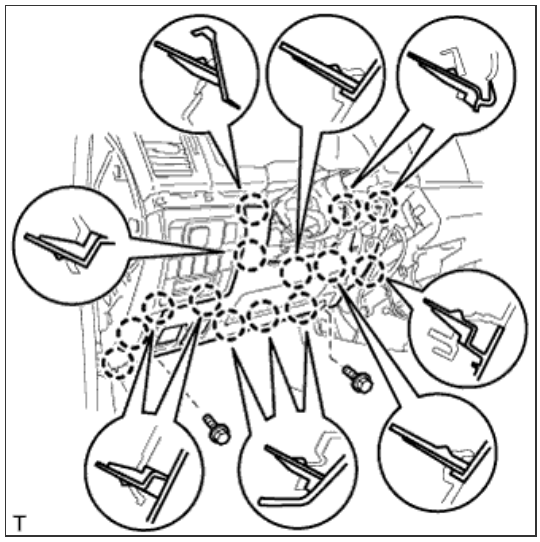
c. Remove the under cover and disconnect the connectors.



7. REMOVE LOWER NO. 1 INSTRUMENT PANEL FINISH PANEL

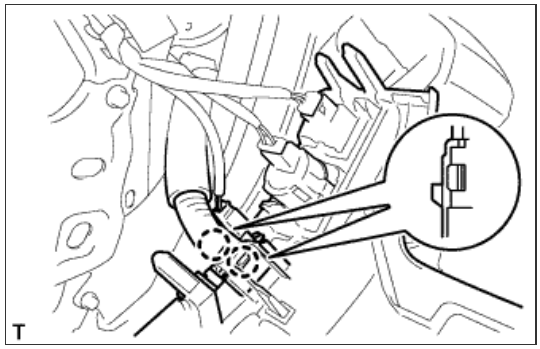
a. Using a screwdriver, detach the 2 claws.

HINT:



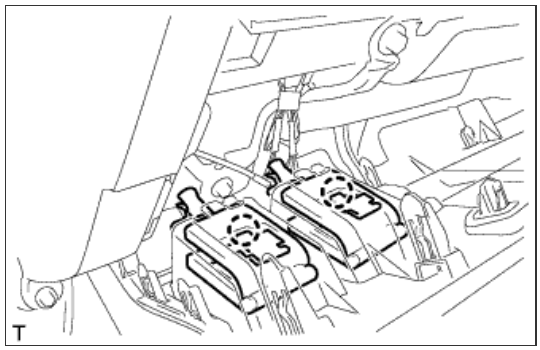
Tape the screwdriver tip before use.

b. Open the hole cover.



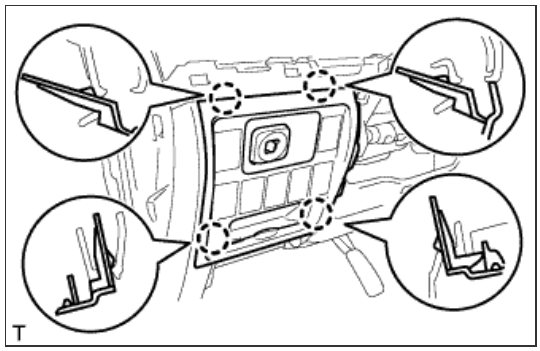
c. Remove the 2 bolts.

d. Detach the 1 claws.



e. Detach the 2 claws and remove the sensor.

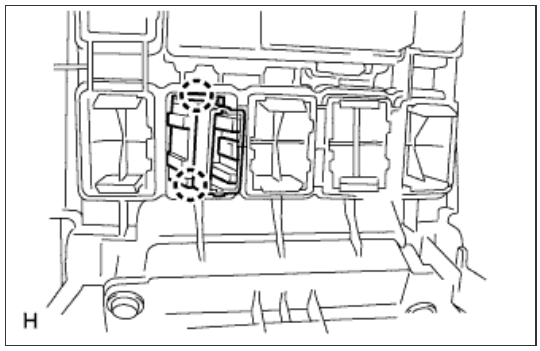
f. Detach the 2 claws and disconnect the 2 control cables.



g. Remove the finish panel and then disconnect the connectors.

8. REMOVE NO. 1 SWITCH HOLE BASE

a. Detach the claws.



b. Remove the switch hole base and then disconnect the connectors.

9. REMOVE CURTAIN SHIELD AIRBAG CUTOFF SWITCH

a. Detach the 2 claws and remove the switch.

a. Detach the 2 claws and remove the switch.

CURTAIN SHIELD AIRBAG CUTOFF SWITCH > REMOVAL

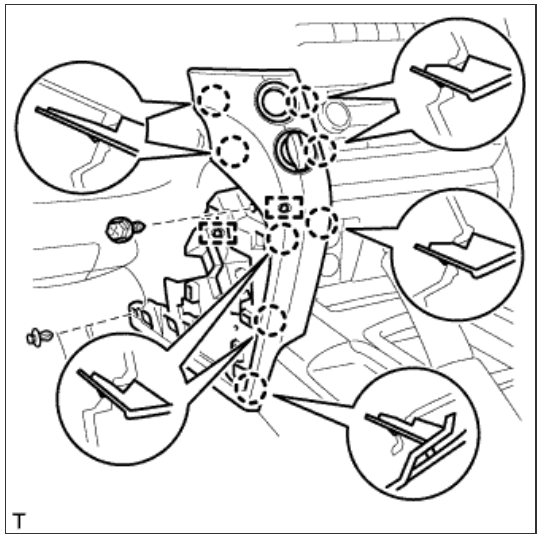
a. Place protective tape as shown in the illustration.

b. Using a moulding remover, detach the 7 claws and remove the panel cushion.

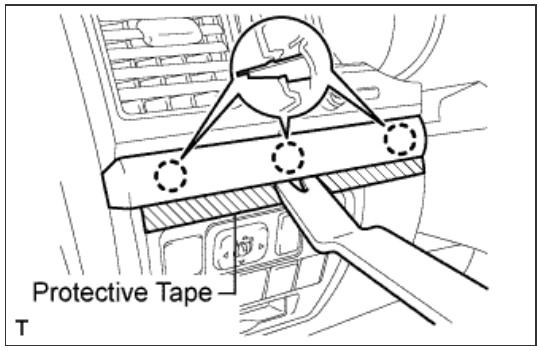


3. REMOVE LOWER INSTRUMENT PANEL PAD SUB-ASSEMBLY LH

a. Remove the clip.

b. Remove the screw.

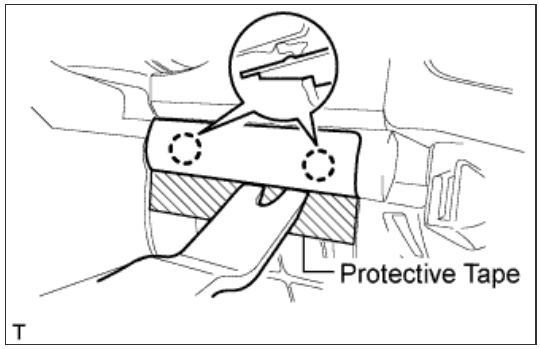
c. Detach the 8 claws.



d. Remove the panel pad and disconnect the connectors and 2 clamps.

4. REMOVE NO. 1 INSTRUMENT CLUSTER FINISH PANEL GARNISH

a. Place protective tape as shown in the illustration.

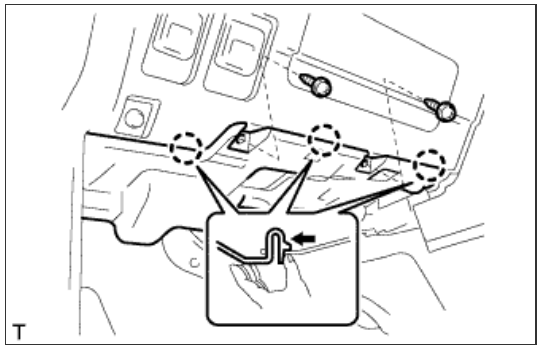


b. Using a moulding remover, detach the 3 claws and remove the panel garnish.

5. REMOVE NO. 2 INSTRUMENT CLUSTER FINISH PANEL GARNISH

a. Place protective tape as shown in the illustration.

b. Using a moulding remover, detach the 2 claws and remove the panel garnish.

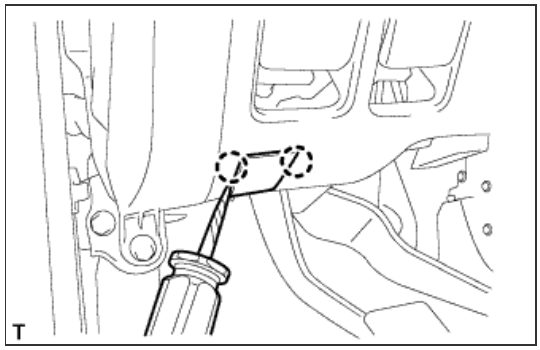


6. REMOVE NO. 1 INSTRUMENT PANEL UNDER COVER SUB-ASSEMBLY (w/ Floor Under Cover)

a. Remove the 2 screws.

b. Detach the 3 claws.

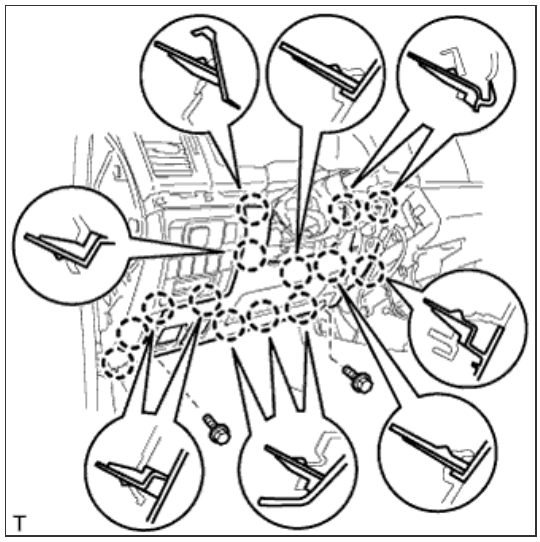
c. Remove the under cover and disconnect the connectors.



7. REMOVE LOWER NO. 1 INSTRUMENT PANEL FINISH PANEL

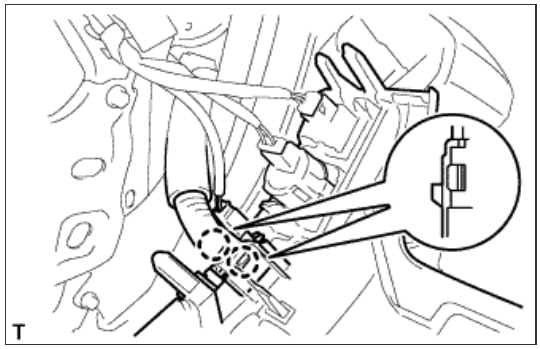
a. Using a screwdriver, detach the 2 claws.

HINT:



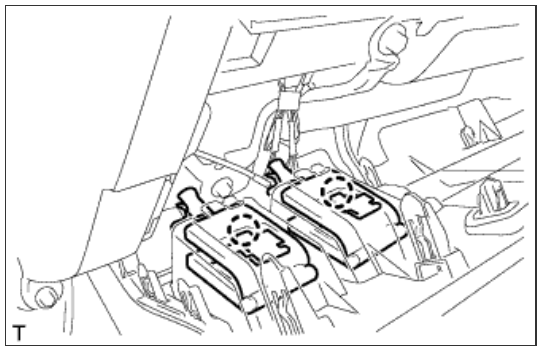
Tape the screwdriver tip before use.

b. Open the hole cover.



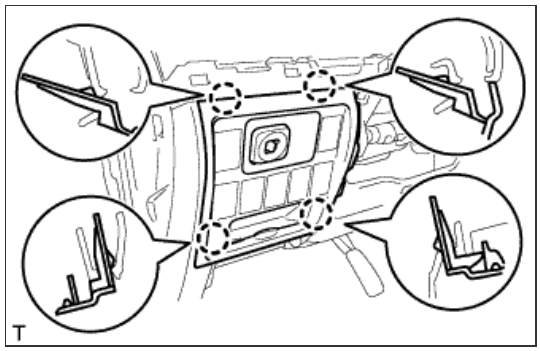
c. Remove the 2 bolts.

d. Detach the 1 claws.



e. Detach the 2 claws and remove the sensor.

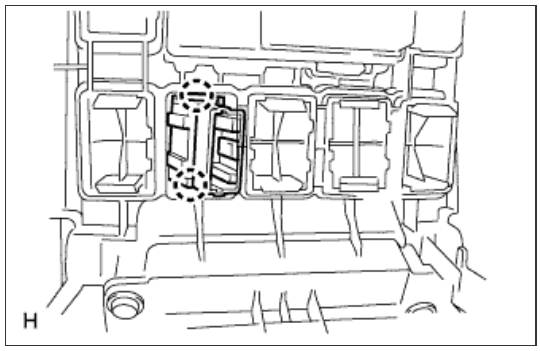
f. Detach the 2 claws and disconnect the 2 control cables.



g. Remove the finish panel and then disconnect the connectors.

8. REMOVE NO. 1 SWITCH HOLE BASE

a. Detach the claws.



b. Remove the switch hole base and then disconnect the connectors.

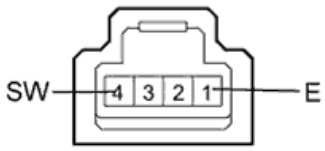
9. REMOVE CURTAIN SHIELD AIRBAG CUTOFF SWITCH

a. Detach the 2 claws and remove the switch.

a. Detach the 2 claws and remove the switch.

for Preparation Click here

1. INSPECT CURTAIN SHIELD AIRBAG CUTOFF SWITCH



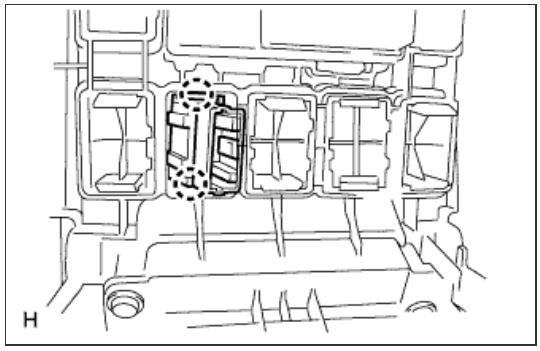
a. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

Tester Connection	Switch Condition	Specified Condition
4 (SW) - 1 (E)	Switch is not pressed	Below 1 Ω
	Switch is pressed	10 kΩ or higher

If the result is not as specified, replace the switch.

Component without harness connected:
(Curtain Shield Airbag Cutoff Switch)

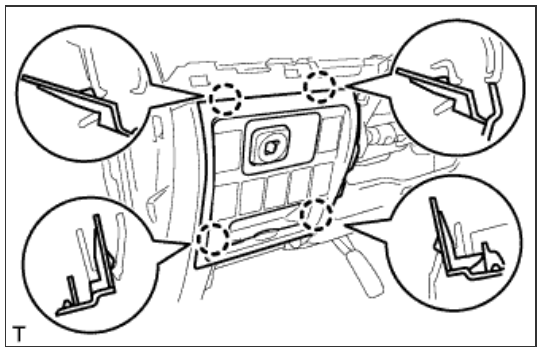


for Preparation Click here

HINT:

- **Use the same procedures for the RH and LH.**
- **The procedures listed below are the LH side.**

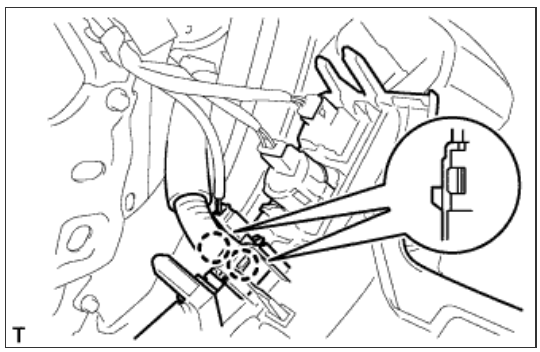
1. INSTALL CURTAIN SHIELD AIRBAG CUTOFF SWITCH



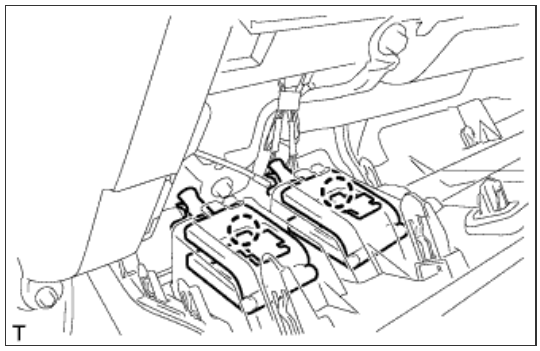
a. Attach the 2 claws to install the switch.

2. INSTALL NO. 1 SWITCH HOLE BASE

a. Connect the connectors.



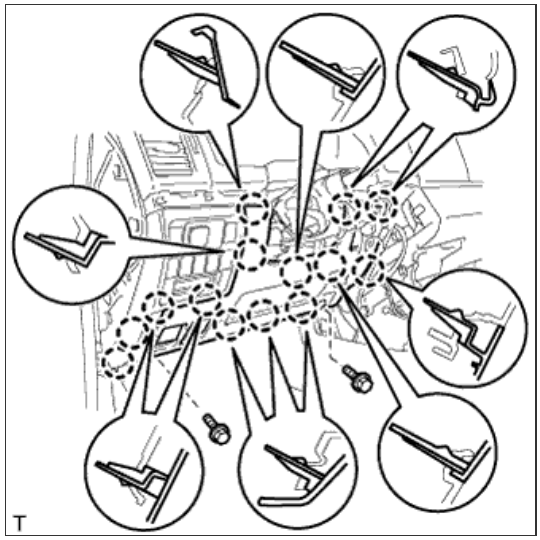
b. Attach the 4 claws to install the switch hole base.



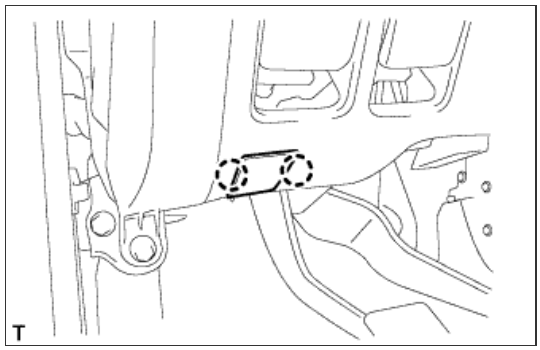
3. INSTALL LOWER NO. 1 INSTRUMENT PANEL FINISH PANEL

a. Connect the connectors.

b. Attach the 2 claws to install the sensor.



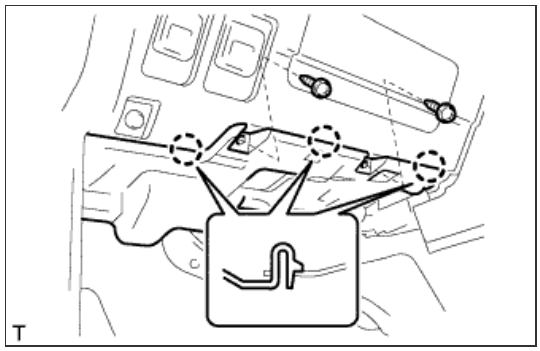
c. Attach the 2 claws to connect the 2 control cables.



d. Attach the 14 claws to install the finish panel.

e. Install the 2 bolts.

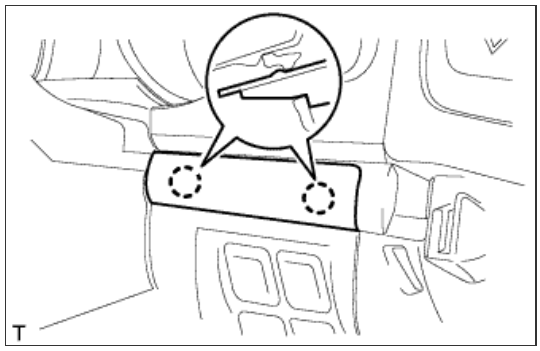
f. Attach the 2 claws to close the hole cover.



4. INSTALL NO. 1 INSTRUMENT PANEL UNDER COVER SUB-ASSEMBLY (w/ Floor Under Cover)

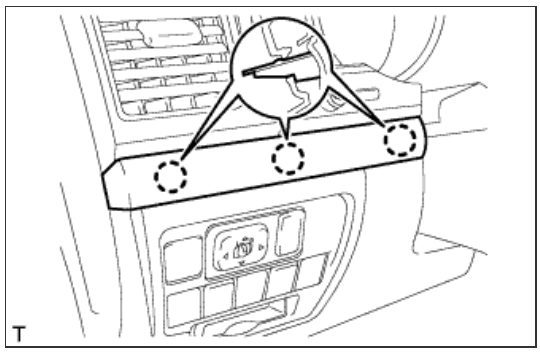
a. Connect the connectors.

b. Attach the 3 claws to install the under cover.



c. Install the 2 screws.

5. INSTALL NO. 2 INSTRUMENT CLUSTER FINISH PANEL GARNISH

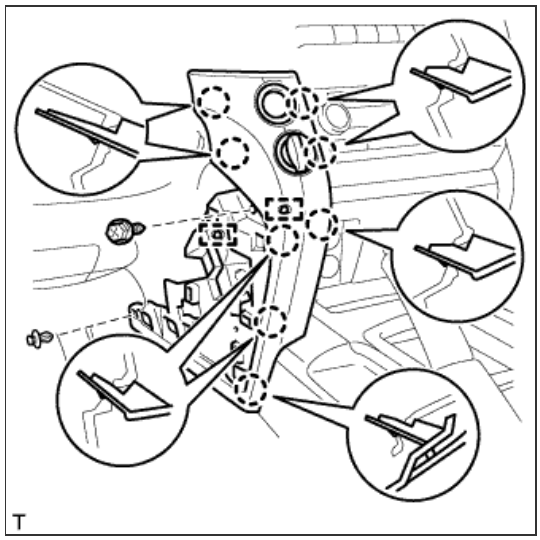


a. Attach the 2 claws to install the panel garnish.

a. Attach the 2 claws to install the panel garnish.

6. INSTALL NO. 1 INSTRUMENT CLUSTER FINISH PANEL GARNISH

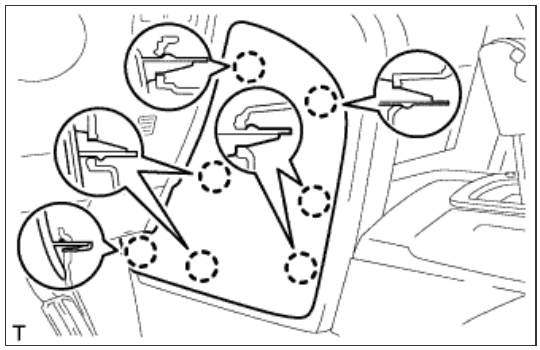
a. Attach the 3 claws to install the panel garnish.



7. INSTALL LOWER INSTRUMENT PANEL PAD SUB-ASSEMBLY LH

a. Connect the connectors and 2 clamps.

b. Attach the 8 claws to install the panel pad.



c. Install the screw.

d. Install the clip.

8. INSTALL NO. 2 INSTRUMENT PANEL FINISH PANEL CUSHION

a. Attach the 7 claws to install the panel cushion.

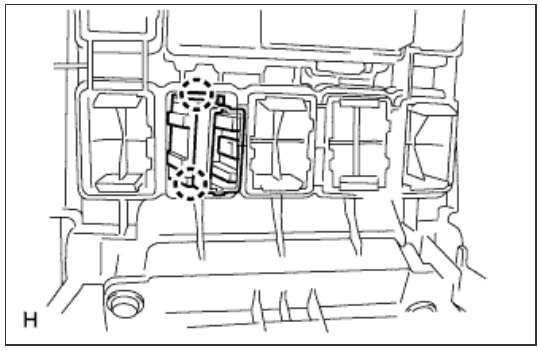
9. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

10. CHEC SRS WARNING LIGHT

a. Check the SRS warning light (Click here).

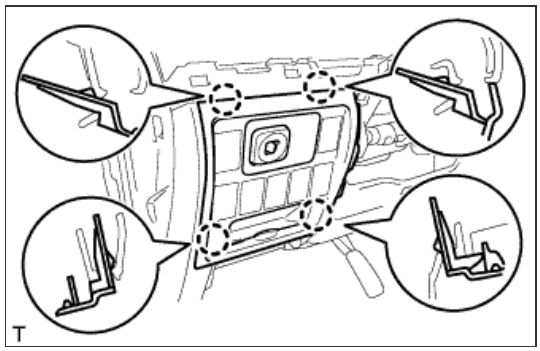


for Preparation Click here

HINT:

- **Use the same procedures for the RH and LH.**
- **The procedures listed below are the LH side.**

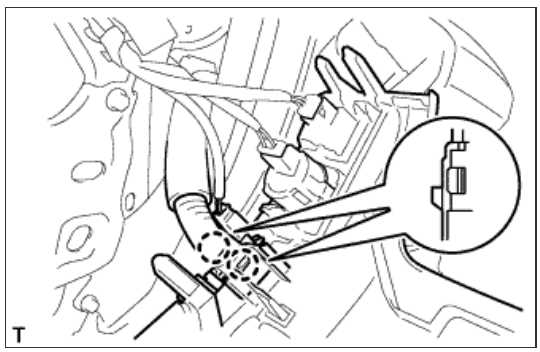
1. INSTALL CURTAIN SHIELD AIRBAG CUTOFF SWITCH



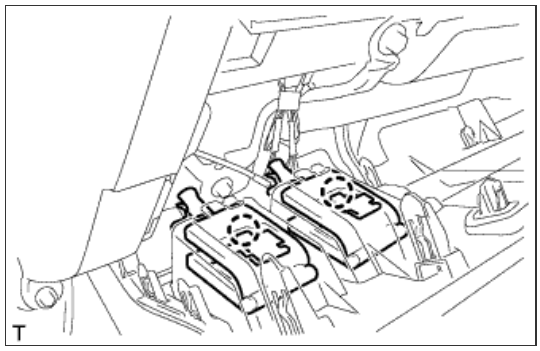
a. Attach the 2 claws to install the switch.

2. INSTALL NO. 1 SWITCH HOLE BASE

a. Connect the connectors.



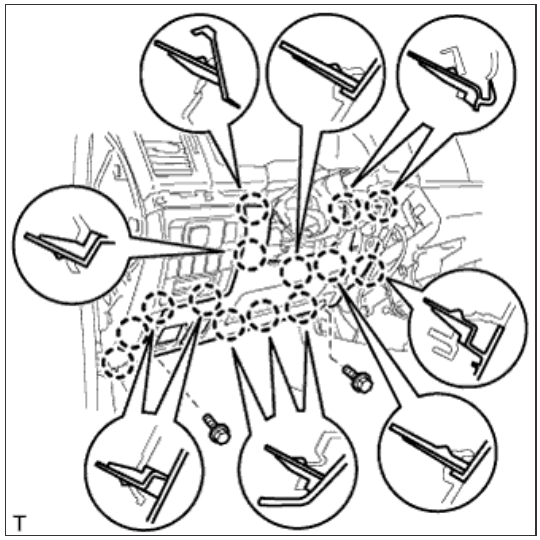
b. Attach the 4 claws to install the switch hole base.



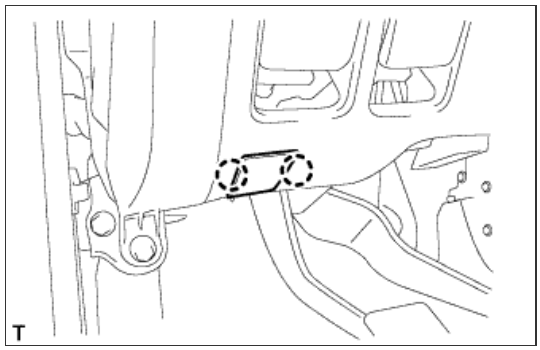
3. INSTALL LOWER NO. 1 INSTRUMENT PANEL FINISH PANEL

a. Connect the connectors.

b. Attach the 2 claws to install the sensor.



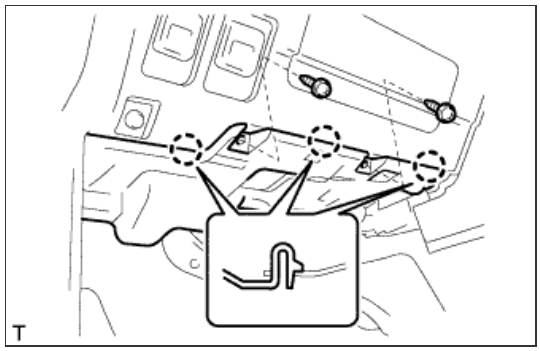
c. Attach the 2 claws to connect the 2 control cables.



d. Attach the 14 claws to install the finish panel.

e. Install the 2 bolts.

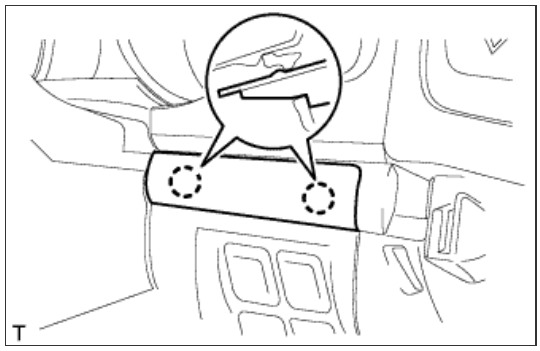
f. Attach the 2 claws to close the hole cover.



4. INSTALL NO. 1 INSTRUMENT PANEL UNDER COVER SUB-ASSEMBLY (w/ Floor Under Cover)

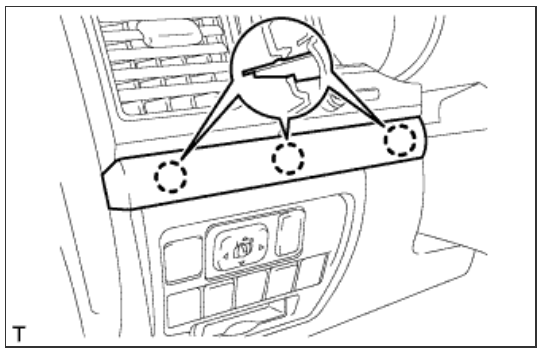
a. Connect the connectors.

b. Attach the 3 claws to install the under cover.



c. Install the 2 screws.

5. INSTALL NO. 2 INSTRUMENT CLUSTER FINISH PANEL GARNISH

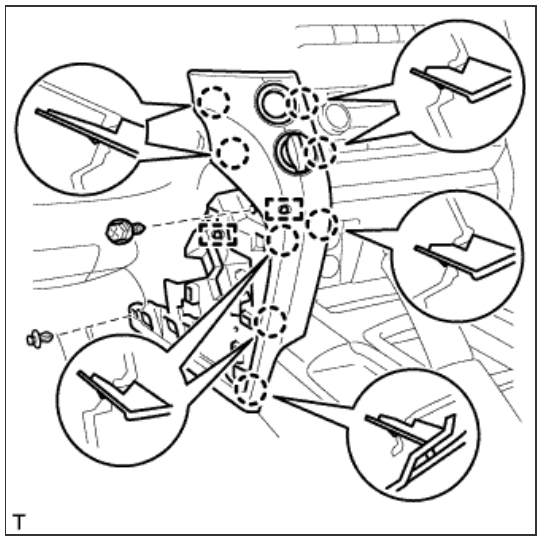


a. Attach the 2 claws to install the panel garnish.

a. Attach the 2 claws to install the panel garnish.

6. INSTALL NO. 1 INSTRUMENT CLUSTER FINISH PANEL GARNISH

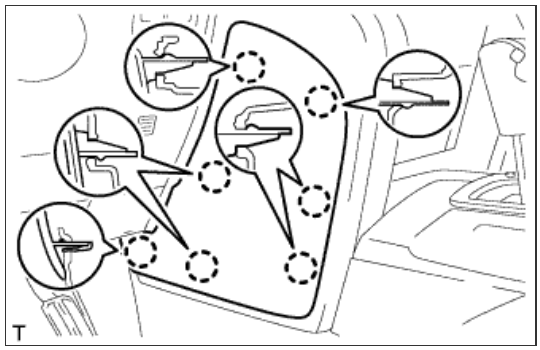
a. Attach the 3 claws to install the panel garnish.



7. INSTALL LOWER INSTRUMENT PANEL PAD SUB-ASSEMBLY LH

a. Connect the connectors and 2 clamps.

b. Attach the 8 claws to install the panel pad.



c. Install the screw.

d. Install the clip.

8. INSTALL NO. 2 INSTRUMENT PANEL FINISH PANEL CUSHION

a. Attach the 7 claws to install the panel cushion.

9. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

10. CHEC SRS WARNING LIGHT

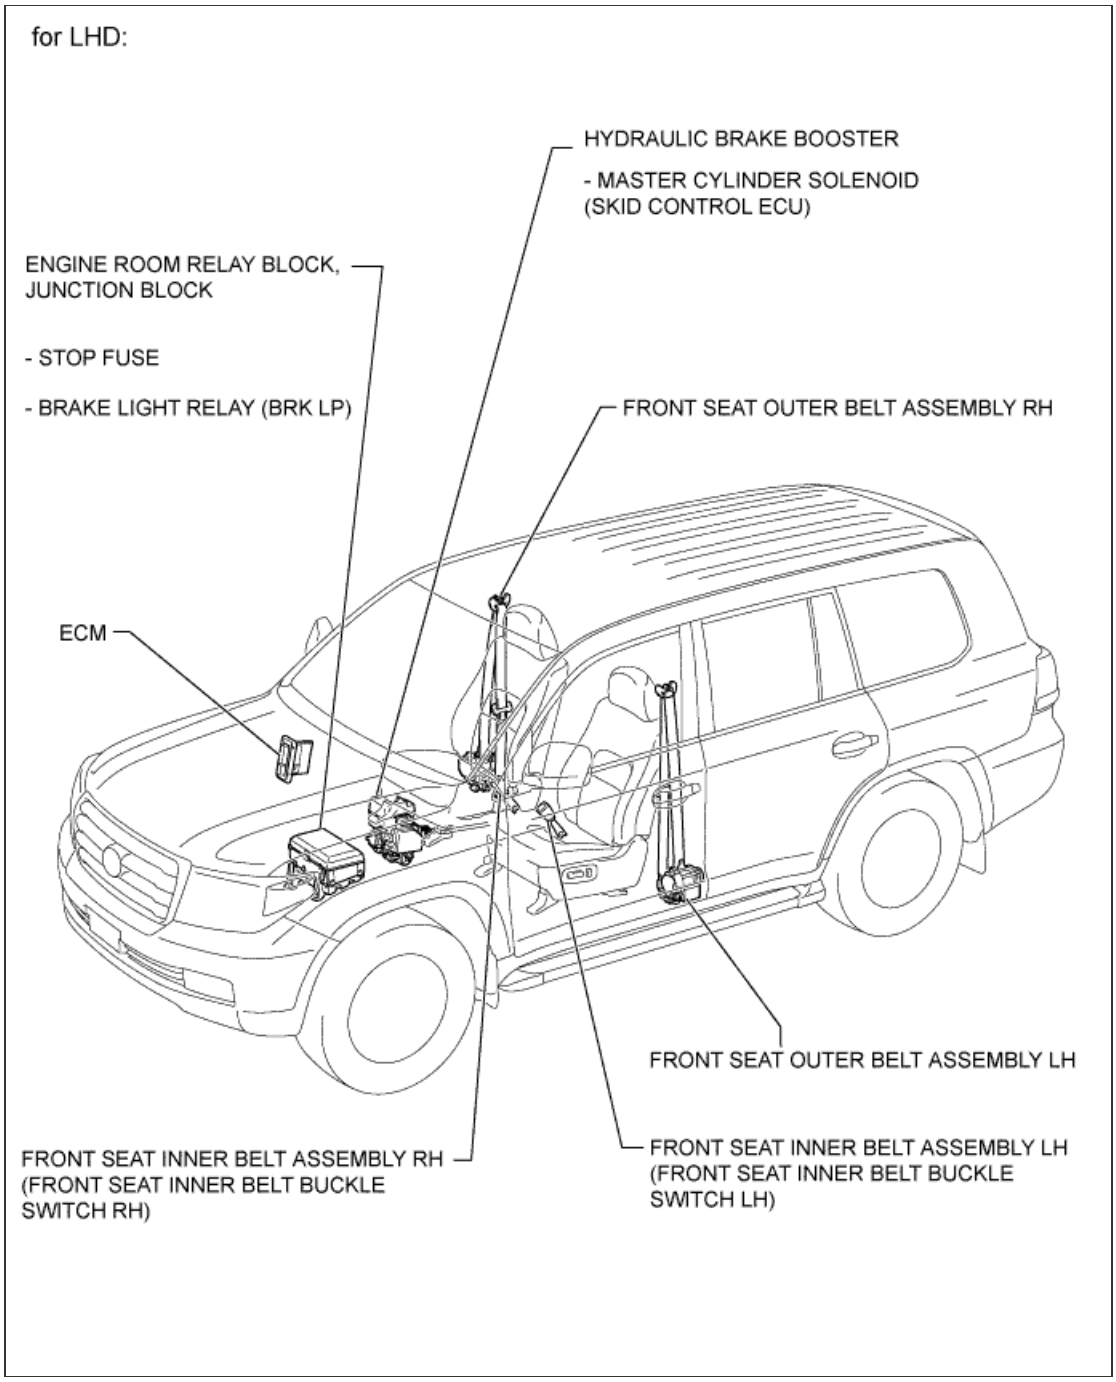
a. Check the SRS warning light (Click here).

for Preparation Click here

1.TROUBLESHOOTING PRECAUTIONS

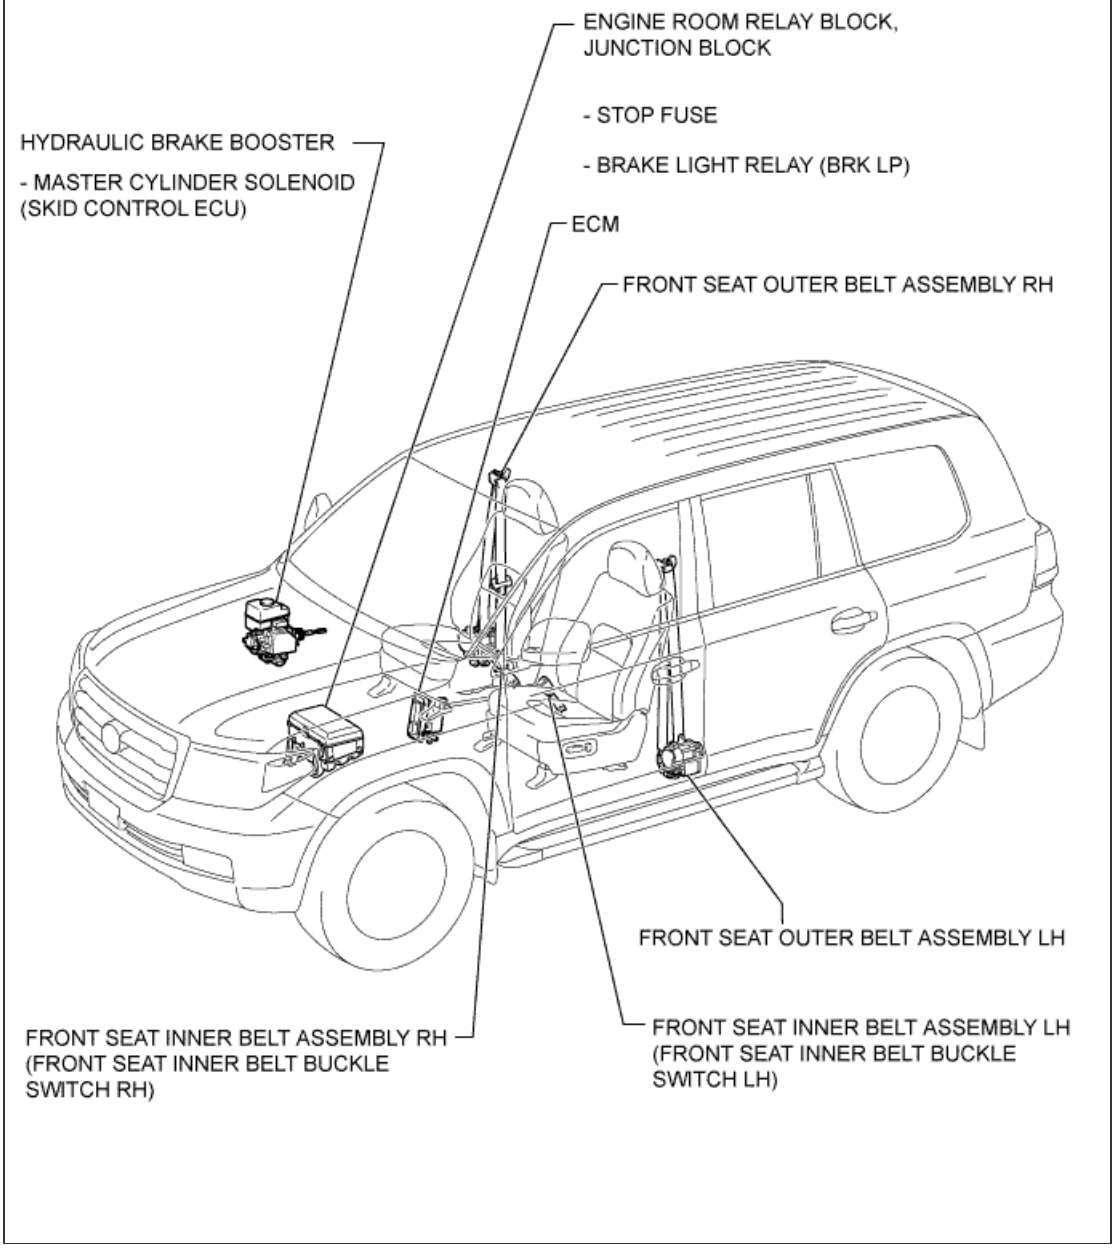
a. If a terminal contact point malfunction or part installation problem occurs, removal and reinstallation of the suspected part may return the system to normal. However, be aware that the normal condition may only be temporary.

b. Before disconnecting connectors or removing/installing parts, determine the malfunctioning area by checking and writing down the condition of the vehicle at the time of the malfunction (DTC outputs, etc.).



c. Be sure to check for DTCs related to other systems. The pre-crash safety system may be influenced by malfunctions in other systems.

2.HANDLING PRECAUTIONS



a. When removing and installing the ECUs, sensors, switches or other pre-crash safety system related parts, perform the following:

- Make sure the engine switch is off unless otherwise specified in the inspection procedures.
- After the removal/installation, check for DTCs and confirm that a normal system code is output.

PRE-CRASH SAFETY SYSTEM

a. The pre-crash safety system optimizes and activates occupant protection equipment in an attempt to reduce injury in a collision.

OUTLINE OF PRE-CRASH SAFETY SYSTEM

Operating Condition	Control	Transmitting ECU	Receiving ECU	Part Operated
Operates when sudden braking occurs	Pre-crash safety seat belts	Master cylinder solenoid (skid control ECU)	Seat belt control ECU	Front seat outer belts

a. When operating as a result of sudden braking:

The master cylinder solenoid (skid control ECU) uses brake pressure information and other data to determine if the driver has suddenly applied the brakes. If so, the master cylinder solenoid (skid control ECU) sends a signal to the seat belt control ECU through CAN communication and the pre-crash safety seat belt activates.

OUTLINE OF PRE-CRASH SAFETY SEAT BELT CONTROL

a. Pre-crash safety seat belt operation conditions:

- The driver firmly depresses the brake pedal suddenly
- The driver oversteers or the vehicle is spinning

b. Pre-crash safety seat belt non-operation conditions:
If any of the following conditions are met, the pre-crash safety seat belt does not operate.

- The seat belts are not fastened
- The engine switch is off or on (ACC)
- The vehicle speed is approximately 30 km/h (18.6 mph) or less
- When the pre-crash safety seat belts are repeatedly operated and the seat belt control ECU overheats, seat belt operation is prohibited to protect the ECU

HINT:

The PCS warning indicator light in the combination meter will blink at this time.

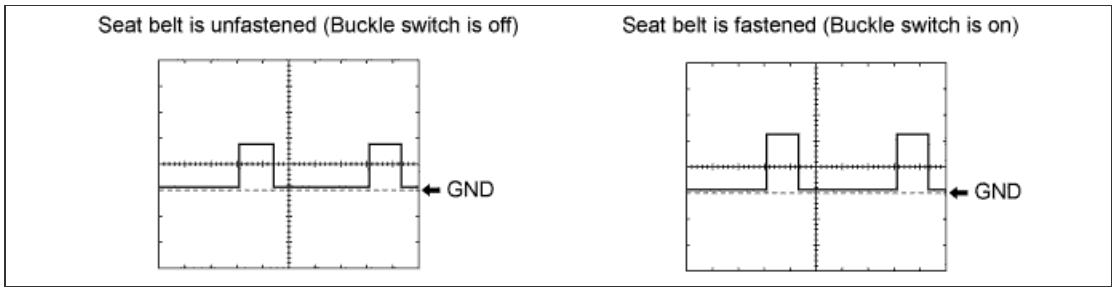
CHECK SEAT BELT CONTROL ECU

a. Measure the voltage and resistance according to the value(s) in the table below.

HINT:



Check from the rear of the connector while it is connected to the seat belt control ECU.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
E41-2 (MOR) - E41- (PGND)	L - W-	assenger side seat belt motor power source line	Engine switch on ( )	4 to .
E41- (MOL) - E41- (PGND)	GR - W-	Driver side seat belt motor power source line	Engine switch on ( )	4 to .
E42- (1) - ody ground	G - ody ground	Seat belt control ECU power source line	Engine switch on ( )	11 to 14
E41-7 ( ) - ody ground	R - W-	Seat belt control ECU power source line	Always	11 to 14
E41-1 (MOR-) - ody ground	- ody ground	Passenger side seat belt motor ground line	Engine switch on ( )	4 to .
E41-4 (MOL-) - ody ground	W - ody ground	Driver side seat belt motor ground line	Engine switch on ( )	4 to .
E41- (P) - ody ground	G - ody ground	Passenger side buckle switch ground line	Always	elow 1 Ω
E41- (P) - E41- (PGND)	G - W-	assenger side buckle switch signal line	Engine switch on ( ) ront passenger side seat belt unfastened (uckle switch off)	Waveform 1
			Engine switch on ( ) ront passenger side seat belt fastened (uckle switchs on)	
E41- (PGND) - ody ground	W- - ody ground	Seat belt control ECU ground line	Always	elow 1 Ω

f the result is not as specified the seat belt control ECU may have a malfunction.

b. nspect using an oscilloscope.

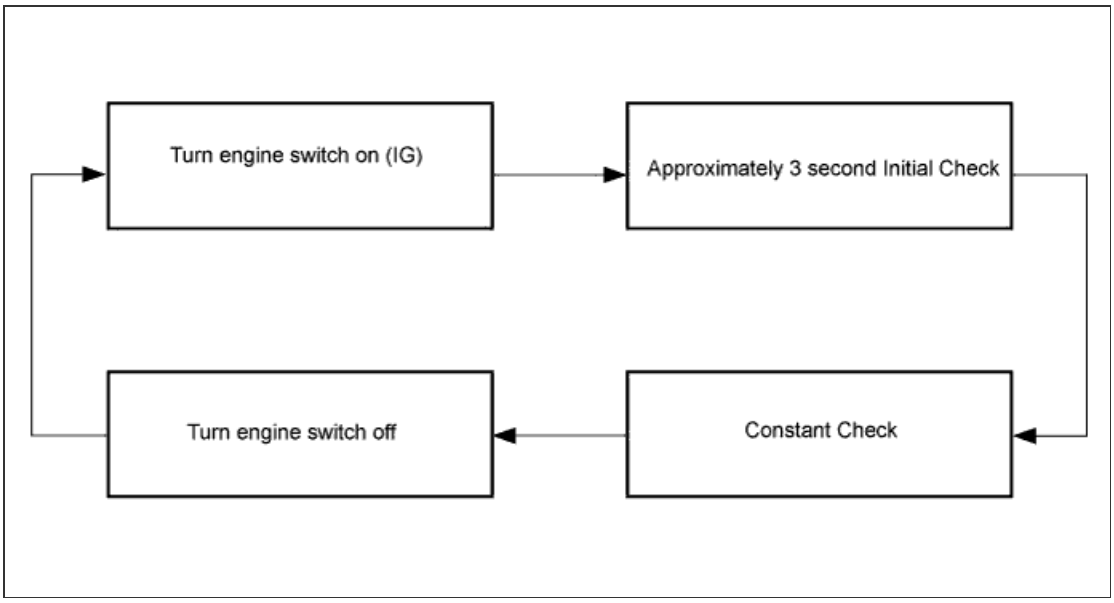
i. Waveform 1 (Reference)

Terminal No. (Symbol)	E41- (P) - E41- (PGND)
Tool Setting	D . 2 ms. D .
Switch Condition	Engine switch on ( ) ront passenger side seat belt unfastened (uckle switch off)
	Engine switch on ( ) ront passenger side seat belt fastened (uckle switch on)

for Preparation Click here

INITIAL CHECK

a. The initial check occurs when the engine switch is off for more than 2 seconds, and then turned on (IG). The initial check consists of the pre-crash safety system diagnostic check which lasts approximately 3 seconds.



b. If a malfunction is detected during the initial check, the multi-information display displays "Check PCS System" or "PCS Not available now".

Warning Message	Detail	DTC	PCS Warning Indicator
Check PCS System	This message appears when the seat belt control ECU detects a system malfunction	DTC is output	ON
PCS Not available now	This message appears when the seat belt control ECU is in the fail-safe mode	DTC is not output	Blinking

CONSTANT CHECK

a. After completing the initial check, the pre-crash safety system will become operational. Then, the diagnosis circuit will perform a constant check to check that there is not a system malfunction.

b. If a malfunction is detected during the constant check, the multi-information display displays "Check PCS System" or "PCS Not available now".

for Preparation Click here

CHECK DTC

a. Connect the intelligent tester to the DLC3.

b. Turn the engine switch on (IG).

c. Turn the intelligent tester on.

d. Enter the following menus: Body / Pre-Crash / Trouble Codes.

e. Read the DTCs.

CLEAR DTC

a. Connect the intelligent tester to the DLC3.

b. Turn the engine switch on (IG).

c. Turn the intelligent tester on.

d. Enter the following menus: Body / Pre-Crash / Trouble Codes.

e. Clear the DTCs.

for Preparation Click here

HINT:

The pre-crash safety system fail-safe function and details are indicated in the table below.

Cause	arning essage	Fail-safe Operation	Conditions to Return to ormal Condition
alfunction exists in part of pre-crash safety system	Check CS System or CS ot available now	epending on the malfunctioning part, the pre-crash seat belt or the brake assist system may stop operating.	Repair the malfunctioning part
Radiator grille is dirty	CS ot available now	epending on the amount of dirt on the radiator grille, the pre-crash seat belt or the brake assist system may stop operating.	Clean the radiator grille

The pre-crash seat belts operate only with sudden braking.

for Preparation Click here

READ DATA LIST

HINT:

Using the intelligent tester to read the Data List allows the values or states of switches, sensors, actuators and other items to be read without removing any parts. This non-intrusive inspection can be very useful because intermittent conditions or signals may be discovered before parts or wiring is disturbed. Reading the Data List information early in troubleshooting is one way to save diagnostic time.

NOTICE:

In the table below, the values listed under "Normal Condition" are reference values. Do not depend solely on these reference values when deciding whether a part is faulty or not.

a. Connect the intelligent tester to the DLC3.

b. Turn the engine switch on (IG).

c. Turn the intelligent tester on.

d. Enter the following menus: Body / Pre-Crash / Data List.

e. According to the display on the intelligent tester, read the Data List.

Pre-Crash

Tester Display	Measurement Item/Range	Normal Condition	Diagnostic Note
Driver Buckle SW	Driver side buckle switch status / UNSET, SET or NG	UNSET: Driver side seat belt unfastened SET: Driver side seat belt fastened NG: Indeterminate data	-
Passenger Buckle SW	Front passenger side buckle switch status / UNSET, SET or NG	UNSET: Passenger side seat belt unfastened SET: Passenger side seat belt fastened NG: Indeterminate data	-
Driver Belt Control	Seat belt control status of driver side seat / STOP, ON or ERROR	STOP: Control stopped ON: Controlled ERROR: Indeterminate data	Driver side seat belt is fastened
Passenger Belt Control	Seat belt control status of passenger side seat / STOP, ON or ERROR	STOP: Control stopped ON: Controlled ERROR: Indeterminate data	Passenger side seat belt is fastened
Number of Trouble Codes	Number of present trouble codes / Min.: 0, Ma .: 255	Number of DTCs present	-

PERFORM ACTIVE TEST

HINT:

Using the intelligent tester to perform Active Tests allows relays, VSVs, actuators and other items to be operated without removing any parts. This non-intrusive functional inspection can be very useful because intermittent operation may be discovered before parts or wiring is disturbed. Performing Active Tests early in troubleshooting is one way to save diagnostic time. Data List information can be displayed while performing Active Tests.

a. Connect the intelligent tester to the DLC3.

b. Turn the engine switch on (IG).

c. Turn the intelligent tester on.

d. Enter the following menus: All ECUs / (desired menu) / Active Test.

e. According to the display on the intelligent tester, perform the Active Test.

Pre-Crash

Tester Display	Test Part	Control Range	Diagnostic Note
Driver Seat Belt Motor	Driver side seat belt motor	OFF or ON	Driver side seat belt is fastened

Passenger Seat Belt Motor	Passenger side seat belt motor	OFF or ON	Passenger side seat belt is fastened
Driver and Passenger Seat Belt Motor	Driver and passenger side seat belt motors	OFF or ON	Driver and passenger side seat belts are fastened

ABS/VSC/TRAC

Tester Display	Test Part	Control Range	Diagnostic Note
Buzzer	Skid control buzzer sounds	OFF or ON	-

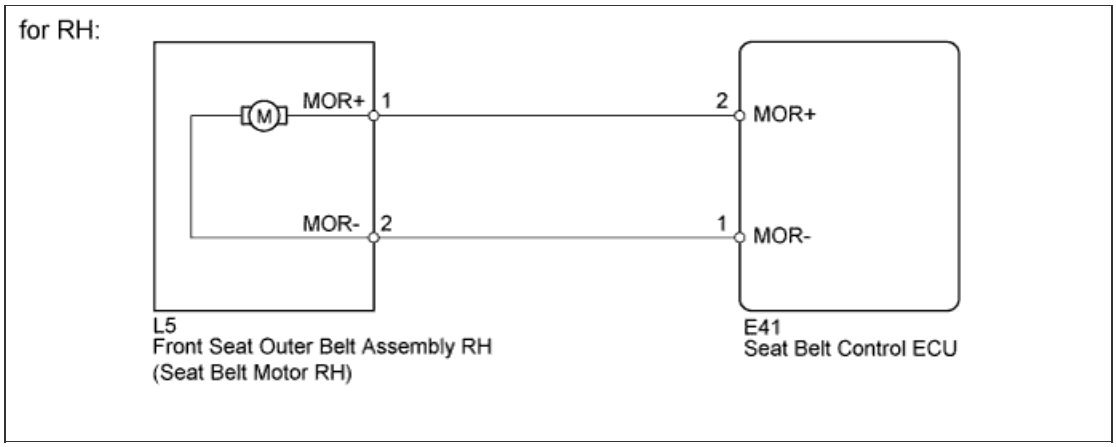
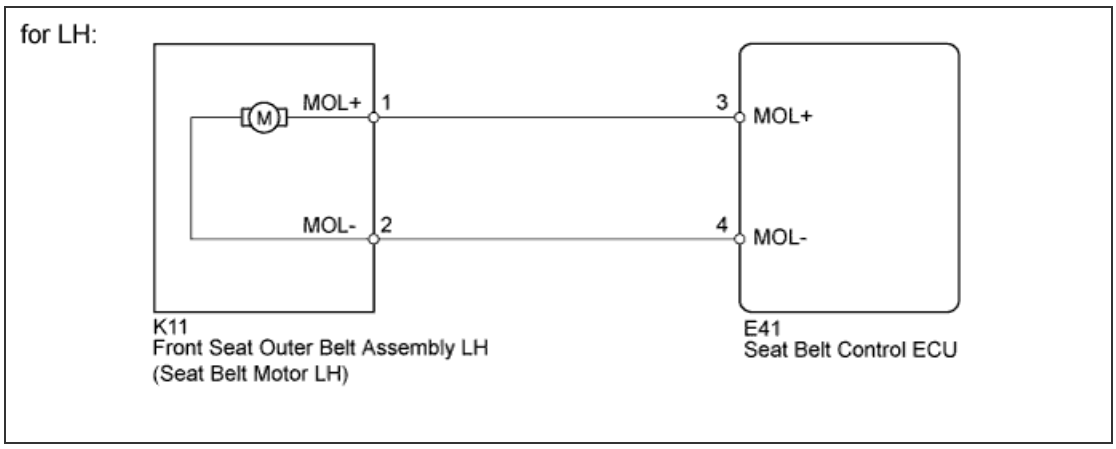
DTC B2000 Short to B+ in Seat Belt Motor RH Circuit

DTC B2005 Short to B+ in Seat Belt Motor LH Circuit



for Preparation Click here



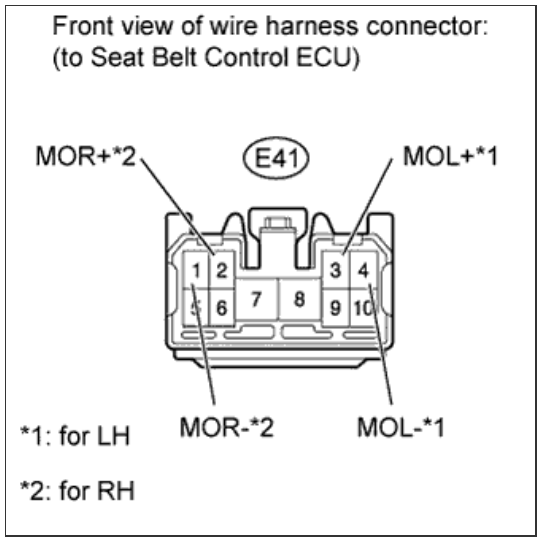
DESCRIPTION

The seat belt control ECU receives information from the master cylinder solenoid (skid control ECU) via the CAN communication line and tightens the seat belt by operating the motor in the front seat outer belt assembly RH or LH.

DTC Code	DTC Detection Condition	Trouble Area
B2000	• Short to B+ in the seat belt motor RH circuit continues for 1 second or more. • Short in the seat belt motor RH circuit.	• Front seat outer belt assembly RH • Harness or connector • Seat belt control ECU
B2005	• Short to B+ in the seat belt motor LH circuit continues for 1 second or more. • Short in the seat belt motor LH circuit.	• Front seat outer belt assembly LH • Harness or connector • Seat belt control ECU

WIRING DIAGRAM

INSPECTION PROCEDURE



CAUTION:

The pretensioner is built into the front seat outer belt assembly. Be sure to follow the correct inspection procedure, as failure to follow the correct procedure (such as inspection of incorrect connectors) may deploy the pretensioner.

1.CHECK SEAT BELT CONTROL ECU

a. Disconnect the E41 seat belt control ECU connector.

b. Measure the voltage according to the value(s) in the table below.

Standard Voltage:

for LH

Tester Connection	Switch Condition	Specified Condition
E41-3 (MOL+) - Body ground	Engine switch on (IG)	Below 1 V
E41-4 (MOL-) - Body ground		

for RH

Tester Connection	Switch Condition	Specified Condition
E41-1 (MOR-) - Body ground	Engine switch on (IG)	Below 1 V
E41-2 (MOR+) - Body ground		

Result

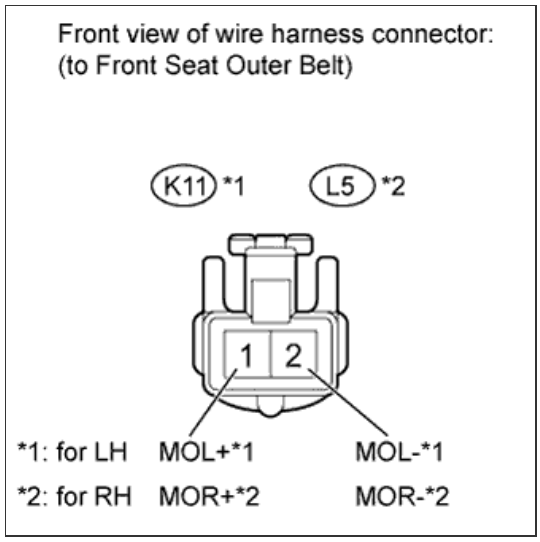
Result	Proceed to
OK (for LHD)	A
OK (for RHD)	B
NG	C

B	REPLACE SEAT BELT CONTROL ECU (Click here)
C	Go to step 2

A

REPLACE SEAT BELT CONTROL ECU (Click here)

2.CHECK HARNESS AND CONNECTOR (FRONT SEAT OUTER BELT - SEAT BELT CONTROL ECU)



a. Disconnect the E41 seat belt control ECU connector.

b. Disconnect the K11*1 or L5*2 front seat outer belt connector.

HINT:

- ***1: for LH**
- ***2: for RH**

c. Measure the voltage according to the value(s) in the table below.

Standard Voltage :

for LH

Tester Connection	Switch Condition	Specified Condition
K11-1 (MOL+) - Body ground	Engine switch on (IG)	Below 1 V

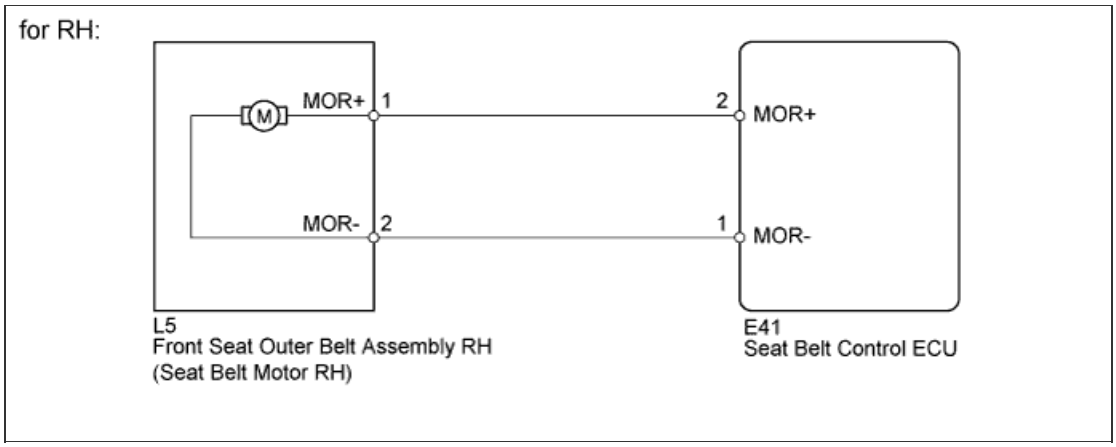
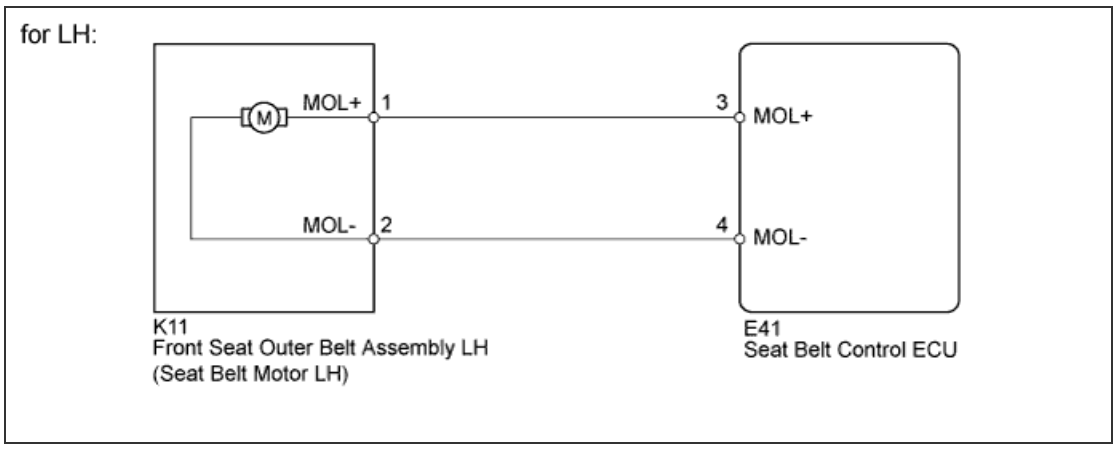
DTC B2000 Short to B+ in Seat Belt Motor RH Circuit

DTC B2005 Short to B+ in Seat Belt Motor LH Circuit



for Preparation Click here



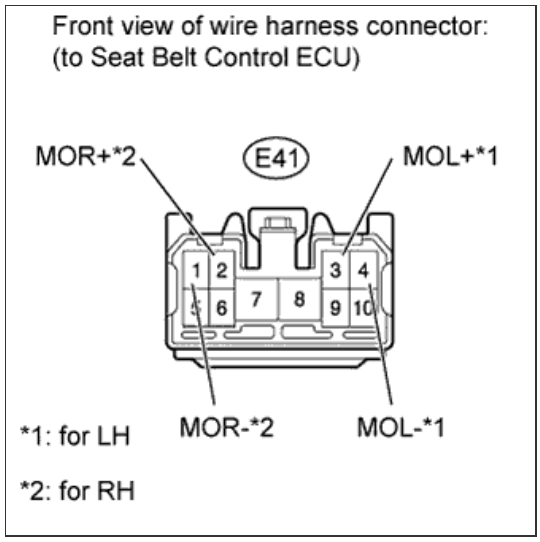
DESCRIPTION

The seat belt control ECU receives information from the master cylinder solenoid (skid control ECU) via the CAN communication line and tightens the seat belt by operating the motor in the front seat outer belt assembly RH or LH.

DTC Code	DTC Detection Condition	Trouble Area
B2000	• Short to B+ in the seat belt motor RH circuit continues for 1 second or more. • Short in the seat belt motor RH circuit.	• Front seat outer belt assembly RH • Harness or connector • Seat belt control ECU
B2005	• Short to B+ in the seat belt motor LH circuit continues for 1 second or more. • Short in the seat belt motor LH circuit.	• Front seat outer belt assembly LH • Harness or connector • Seat belt control ECU

WIRING DIAGRAM

INSPECTION PROCEDURE



CAUTION:

The pretensioner is built into the front seat outer belt assembly. Be sure to follow the correct inspection procedure, as failure to follow the correct procedure (such as inspection of incorrect connectors) may deploy the pretensioner.

1.CHECK SEAT BELT CONTROL ECU

a. Disconnect the E41 seat belt control ECU connector.

b. Measure the voltage according to the value(s) in the table below.

Standard Voltage:

for LH

Tester Connection	Switch Condition	Specified Condition
E41-3 (MOL+) - Body ground	Engine switch on (IG)	Below 1 V
E41-4 (MOL-) - Body ground		

for RH

Tester Connection	Switch Condition	Specified Condition
E41-1 (MOR-) - Body ground	Engine switch on (IG)	Below 1 V
E41-2 (MOR+) - Body ground		

Result

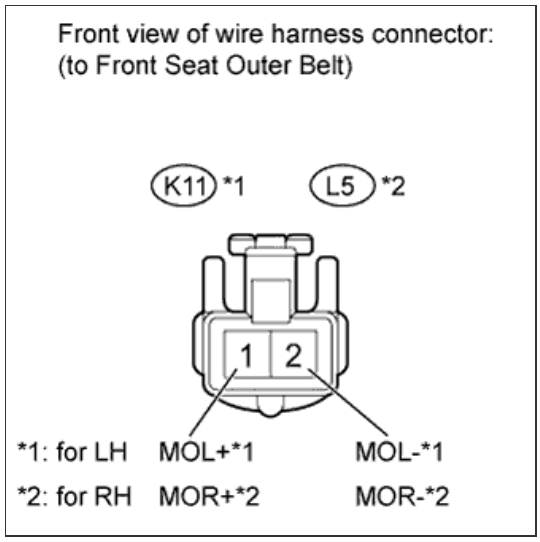
Result	Proceed to
OK (for LHD)	A
OK (for RHD)	B
NG	C

B	REPLACE SEAT BELT CONTROL ECU (Click here)
C	Go to step 2

A

REPLACE SEAT BELT CONTROL ECU (Click here)

2.CHECK HARNESS AND CONNECTOR (FRONT SEAT OUTER BELT - SEAT BELT CONTROL ECU)



a. Disconnect the E41 seat belt control ECU connector.

b. Disconnect the K11*1 or L5*2 front seat outer belt connector.

HINT:

- ***1: for LH**
- ***2: for RH**

c. Measure the voltage according to the value(s) in the table below.

Standard Voltage :

for LH

Tester Connection	Switch Condition	Specified Condition
K11-1 (MOL+) - Body ground	Engine switch on (IG)	Below 1 V
K11-2 (MOL-) - Body ground		

for RH

Tester Connection	Switch Condition	Specified Condition
L5-1 (MOR+) - Body ground	Engine switch on (IG)	Below 1 V

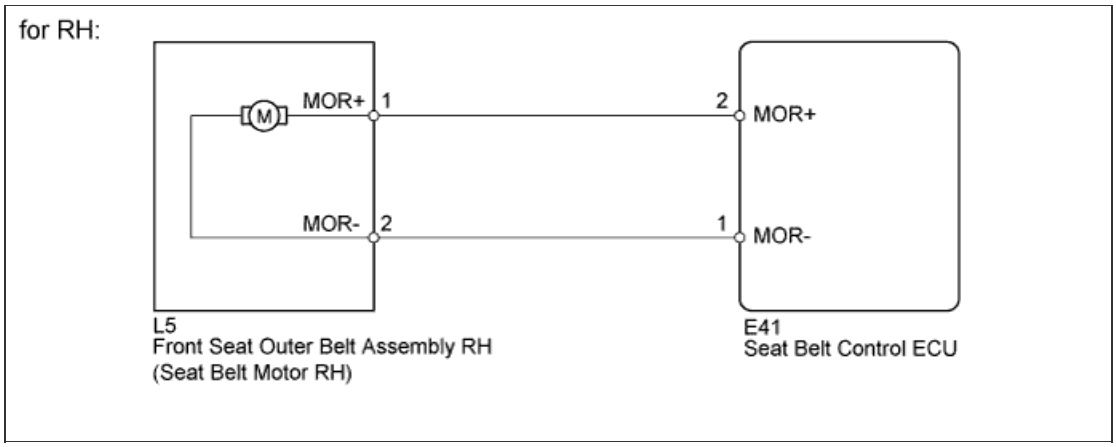
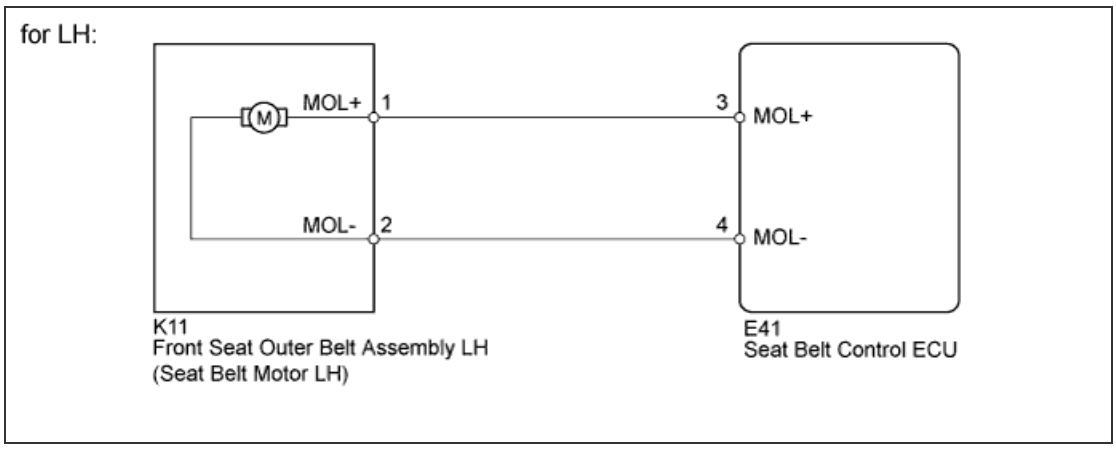
DTC B2001 Short to GND in Seat Belt Motor RH Circuit

DTC B2006 Short to GND in Seat Belt Motor LH Circuit



for Preparation Click here



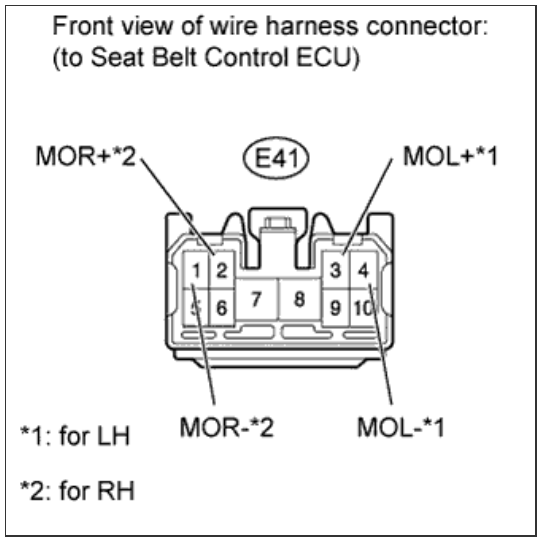
DESCRIPTION

The seat belt control ECU receives information from the master cylinder solenoid (skid control ECU) via the CAN communication line and tightens the seat belt by operating the motor in the front seat outer belt assembly RH or LH.

DTC Code	DTC Detection Condition	Trouble Area
B2001	• Short to ground in seat belt motor RH circuit continues for 1 second or more. • Short in seat belt motor RH circuit.	• Front seat outer belt assembly RH • Harness or connector • Seat belt control ECU
B2006	• Short to ground in seat belt motor LH circuit continues for 1 second or more. • Short in seat belt motor LH circuit.	• Front seat outer belt assembly LH • Harness or connector • Seat belt control ECU

WIRING DIAGRAM

INSPECTION PROCEDURE



CAUTION:

The pretensioner is built into the front seat outer belt assembly. Be sure to follo the correct inspection procedure, as failure to follo the correct procedure (such as inspection of incorrect connectors) may deploy the pretensioner.

1.CHECK SEAT BELT CONTROL ECU

a. Disconnect the E41 seat belt control ECU connector.

b. Measure the resistance according to the value(s) in the table belo .

Standard Resistance:

for LH

Tester Connection	Condition	Specified Condition
E41-3 (MOL+) - Body ground	Al ays	1 MΩ or higher
E41-4 (MOL-) - Body ground		

for RH

Tester Connection	Condition	Specified Condition
E41-1 (MOR-) - Body ground	Al ays	1 MΩ or higher
E41-2 (MOR+) - Body ground		

Result

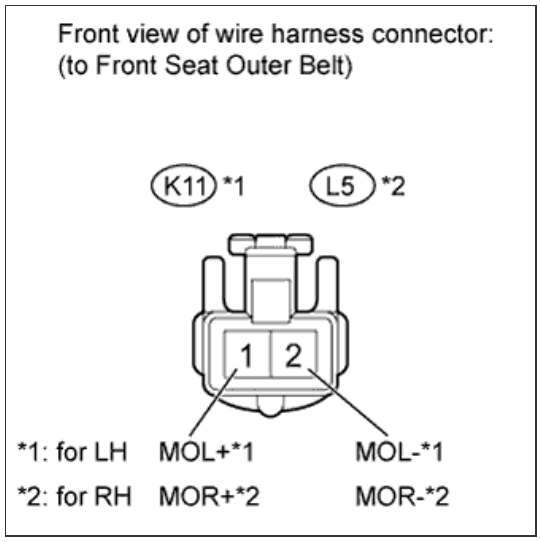
Result	Proceed to
OK (for LHD)	A
OK (for RHD)	B
NG	C

B	REPLACE SEAT BELT CONTROL ECU (Click here)
C	Go to step 2

A

REPLACE SEAT BELT CONTROL ECU (Click here)

2.CHECK HARNESS AND CONNECTOR (FRONT SEAT OUTER BELT - SEAT BELT CONTROL ECU)



a. Disconnect the E41 seat belt control ECU connector.

b. Disconnect the K11 1 or L5 2 front seat outer belt connector.

HINT:

- ***1: for LH**
- ***2: for RH**

c. Measure the resistance according to the value(s) in the table belo .

Standard Resistance:

for LH

Tester Connection	Condition	Specified Condition
K11-1 (MOL+) - Body ground	Al ays	1 MΩ or higher
K11-2 (MOL-) - Body ground		

for RH

Tester Connection	Condition	Specified Condition

DTC B2036 Power Supply Relay Malfunction Open

for Preparation Click here

DESCRIPTION

If the seat belt control ECU judges that there is a malfunction in its internal circuit as a result of self-diagnosis, or if the power source voltage (+B) is not input to the seat belt control ECU, this DTC will be stored.

DTC Code	DTC Detection Condition	Trouble Area
B2036	• Malfunction in seat belt control ECU • Power source voltage (+B) is not input to the seat belt control ECU.	• Harness or connector • Fuse • Seat belt control ECU

WIRING DIAGRAM

INSPECTION PROCEDURE

CAUTION:

The pretensioner is built into the front seat outer belt assembly. Be sure to follow the correct inspection procedure, as failure to follow the correct procedure (such as inspection of incorrect connectors) may deploy the pretensioner.

NOTICE:

Inspect the fuses for circuits related to this system before performing the following inspection procedure.

1.INSPECT SEAT BELT CONTROL ECU (+B TERMINAL VOLTAGE)

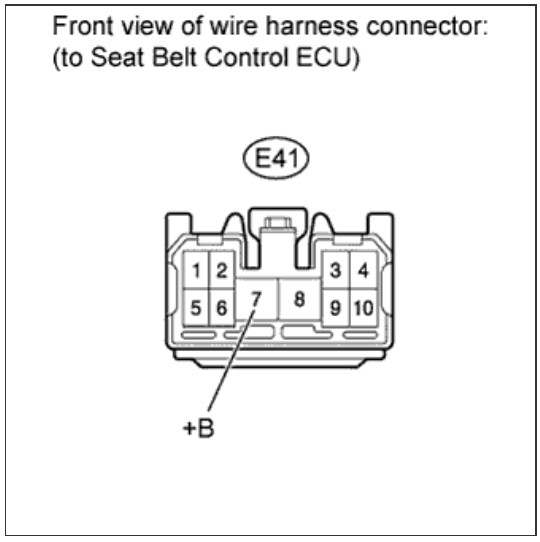
a. Disconnect the negative (-) battery terminal.

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

b. Disconnect the E41 connector of the seat belt control ECU.

c. Connect the negative (-) battery terminal.



d. Measure the voltage according to the value(s) in the table below.

Standard Voltage:

Tester Connection	Condition	Specified Condition
E41-7 (+B) - Body ground	Always	11 to 14 V

Result

Result	Proceed to
OK	

(for LHD)	A

- ***1: for LH**
- ***2: for RH**

c. Using a service wire, connect K11-1 1 and K11-2 1 or L5-1 2 and L5-2 2 of the connector on the front seat outer belt assembly.

NOTICE:

Do not forcibly insert the service wire into the terminals of the connector.

d. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

for LH

Tester Connection	Condition	Specified Condition
E41-3 (MOL+) - E41-4 (MOL-)	Always	Below 1 Ω

for RH

Tester Connection	Condition	Specified Condition
E41-1 (MOR-) - E41-2 (MOR+)	Always	Below 1 Ω

DTC B2036 Power Supply Relay Malfunction Open

for Preparation Click here

DESCRIPTION

If the seat belt control ECU judges that there is a malfunction in its internal circuit as a result of self-diagnosis, or if the power source voltage (+B) is not input to the seat belt control ECU, this DTC will be stored.

DTC Code	DTC Detection Condition	Trouble Area
B2036	• Malfunction in seat belt control ECU • Power source voltage (+B) is not input to the seat belt control ECU.	• Harness or connector • Fuse • Seat belt control ECU

WIRING DIAGRAM

INSPECTION PROCEDURE

CAUTION:

The pretensioner is built into the front seat outer belt assembly. Be sure to follow the correct inspection procedure, as failure to follow the correct procedure (such as inspection of incorrect connectors) may deploy the pretensioner.

NOTICE:

Inspect the fuses for circuits related to this system before performing the following inspection procedure.

1.INSPECT SEAT BELT CONTROL ECU (+B TERMINAL VOLTAGE)

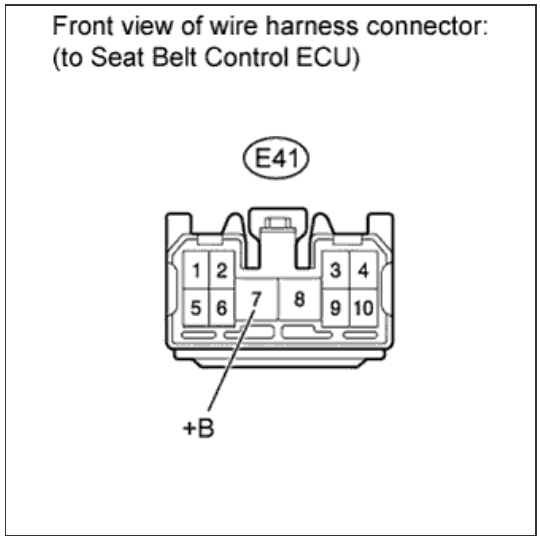
a. Disconnect the negative (-) battery terminal.

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

b. Disconnect the E41 connector of the seat belt control ECU.

c. Connect the negative (-) battery terminal.



d. Measure the voltage according to the value(s) in the table below.

Standard Voltage:

Tester Connection	Condition	Specified Condition
E41-7 (+B) - Body ground	Always	11 to 14 V

Result

Result	Proceed to
OK	

(for LHD)	A
OK (for LHD)	B
NG	C

e. Disconnect the negative (-) battery terminal.

f. Reconnect the E41 seat belt control ECU connector.

g. Connect the negative (-) battery terminal.

B → REPLACE SEAT BELT CONTROL ECU (Click here)

C → REPAIR OR REPLACE HARNESS OR CONNECTOR

DTC B2071 Stop Light Control Relay Malfunction

for Preparation Click here

DESCRIPTION

This DTC is stored when a malfunction in the stop light operation relay circuit of the vehicle stability control system is detected. This circuit consists of the master cylinder solenoid (skid control ECU) and seat belt control ECU. Signals are sent from the master cylinder solenoid (skid control ECU) via the CAN communication line.

DTC Code	DTC Detection Condition	Trouble Area
B2071	Malfunction in the brake system is detected.	• CAN communication system • Vehicle stability control system • Seat belt control ECU

WIRING DIAGRAM

INSPECTION PROCEDURE

1.CHECK DTC (CAN COMMUNICATION SYSTEM)

a. Use the intelligent tester to check if the CAN communication system is functioning normally (Click here for LHD, Click here for RHD).

DTC B2074 Driver Side Seat Belt Buckle Switch Circuit Malfunction

for Preparation Click here

DESCRIPTION

This DTC is stored when there is a malfunction in the front seat inner belt buckle switch circuit for the driver side. The seat belt control ECU receives buckle switch condition information from the center airbag sensor via the CAN communication line and controls the pre-crash safety system.
When DTC B2074 is stored, DTC B1655 is also output.

DTC Code	DTC Detection Condition	Trouble Area
B2074	Malfunction in the front seat inner belt (buckle switch) circuit.	• Front seat inner belt LH assembly • Center airbag sensor • Seat belt control ECU • CAN communication system

DTC B2075 Passenger Side Seat Belt Buckle Switch Circuit Malfunction

for Preparation Click here

DESCRIPTION

This DTC is stored when there is a malfunction in the front seat inner belt buckle switch circuit for the passenger side.

DTC Code	DTC Detection Condition	Trouble Area
B2075	Malfunction in the front seat inner belt (buckle switch) circuit.	• Harness or connector • Front seat inner belt (for passenger side) • Seat belt control ECU

WIRING DIAGRAM

INSPECTION PROCEDURE

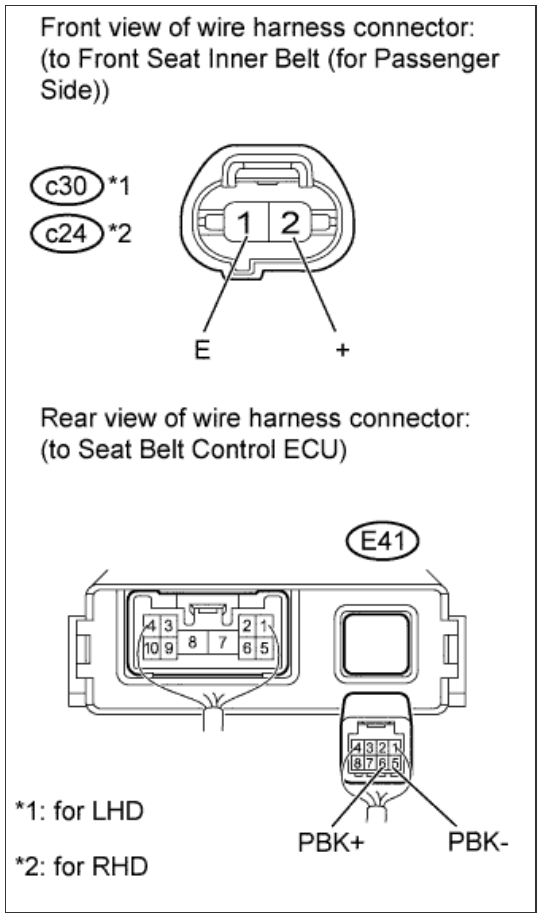
1.CHECK HARNESS AND CONNECTOR (FRONT SEAT INNER BELT - SEAT BELT CONTROL ECU)



a. Disconnect the c30*1 or c24*2 front seat inner belt connector.

HINT

- **1 for LHD**
- ***2 for RHD**

b. Disconnect the E41 seat belt control ECU connector.

c. Measure the resistance according to the value(s) in the table below.

Standard Resistance

for LHD

Tester Connection	Condition	Specified Condition
c30-2 (+) - E41-5 (PBK+)	Always	Below 1 Ω
c30-1 (E) - E41-6 (PBK-)		
c30-2 (+) or E41-5 (PBK+) - Body ground		1 MΩ higher
c30-1 (E) or E41-6 (PBK-) - Body ground		

for RHD

Tester Connection	Condition	Specified Condition
c24-2 (+) - E41-5 (PBK+)	Always	Below 1 Ω
c24-1 (E) - E41-6 (PBK-)		
c24-2 (+) or E41-5 (PBK+) - Body ground		1 MΩ higher
c24-1 (E) or E41-6 (PBK-) - Body ground		

NG → REPAIR OR REPLACE HARNESS OR CONNECTOR

OK

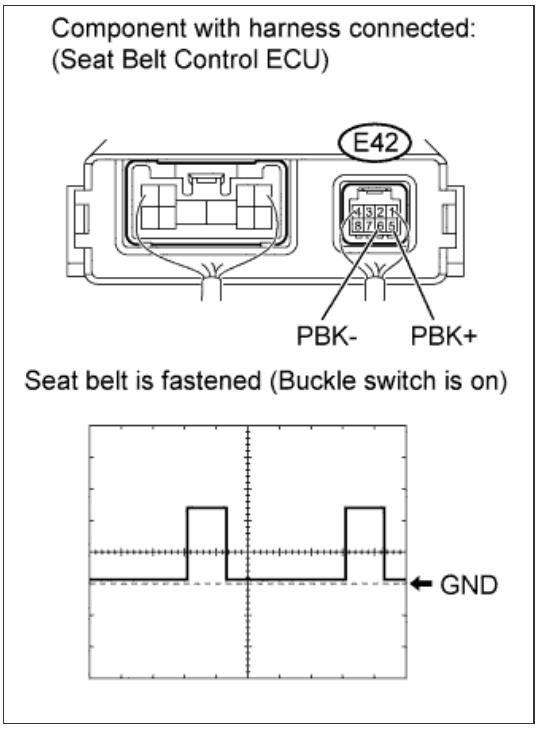
2.CHECK SEAT BELT CONTROL ECU

a. Reconnect the E41 seat belt control ECU connector.

b. Disconnect the c30*1 or c24*2 front seat inner belt connector.

HINT

- *1 for LHD
- *2 for RHD



c. Use an oscilloscope to check the waveform of the seat belt control ECU between the connector terminals.

Measure ent Condition

Tester Connection	E41-5 (PBK+) - E41-6 (PBK-)
Tool Setting	5 V/DIV., 20 ms./DIV.
Switch Condition	Engine switch (IG) Front passenger side seat belt unfastened (Buckle switch off)
	Engine switch (IG) Front passenger side seat belt fastened (Buckle switch on)

OK

.5 to 5.5 V

DTC B2075 Passenger Side Seat Belt Buckle Switch Circuit Malfunction

for Preparation Click here

DESCRIPTION

This DTC is stored when there is a malfunction in the front seat inner belt buckle switch circuit for the passenger side.

DTC Code	DTC Detection Condition	Trouble Area
B2075	Malfunction in the front seat inner belt (buckle switch) circuit.	• Harness or connector • Front seat inner belt (for passenger side) • Seat belt control ECU

WIRING DIAGRAM

INSPECTION PROCEDURE

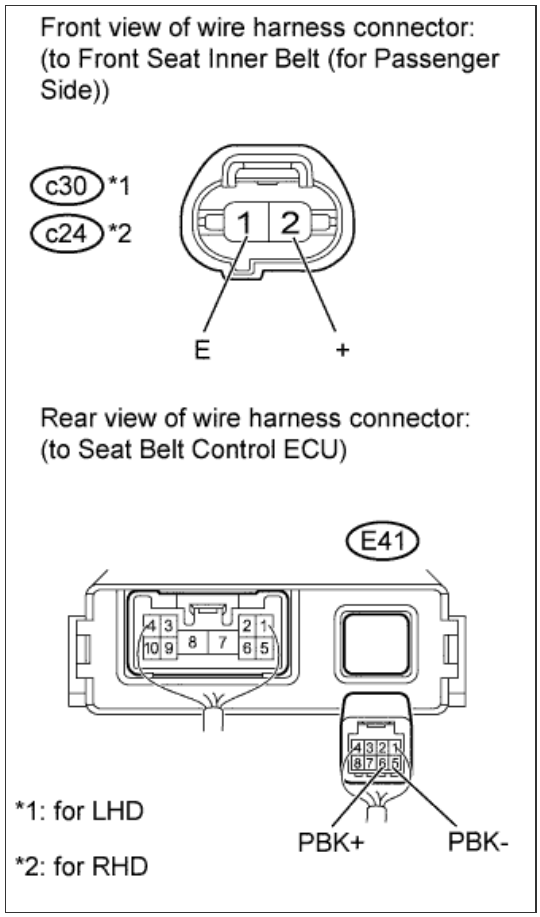
1.CHECK HARNESS AND CONNECTOR (FRONT SEAT INNER BELT - SEAT BELT CONTROL ECU)



a. Disconnect the c30*1 or c24*2 front seat inner belt connector.

HINT

- **1 for LHD**
- ***2 for RHD**

b. Disconnect the E41 seat belt control ECU connector.

c. Measure the resistance according to the value(s) in the table below.

Standard Resistance

for LHD

Tester Connection	Condition	Specified Condition
c30-2 (+) - E41-5 (PBK+)	Always	Below 1 Ω
c30-1 (E) - E41-6 (PBK-)		
c30-2 (+) or E41-5 (PBK+) - Body ground		1 MΩ higher
c30-1 (E) or E41-6 (PBK-) - Body ground		

for RHD

Tester Connection	Condition	Specified Condition
c24-2 (+) - E41-5 (PBK+)	Always	Below 1 Ω
c24-1 (E) - E41-6 (PBK-)		
c24-2 (+) or E41-5 (PBK+) - Body ground		1 MΩ higher
c24-1 (E) or E41-6 (PBK-) - Body ground		

NG → REPAIR OR REPLACE HARNESS OR CONNECTOR

OK

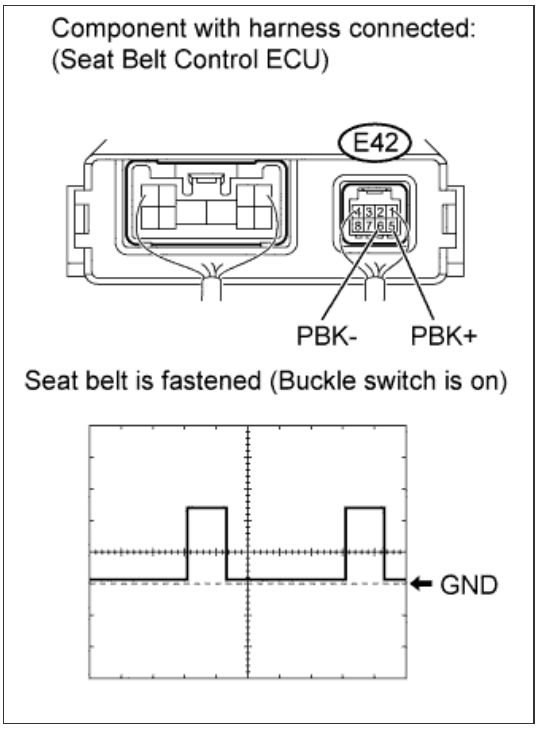
2.CHECK SEAT BELT CONTROL ECU

a. Reconnect the E41 seat belt control ECU connector.

b. Disconnect the c30*1 or c24*2 front seat inner belt connector.

HINT

- *1 for LHD
- *2 for RHD



c. Use an oscilloscope to check the waveform of the seat belt control ECU between the connector terminals.

Measure ent Condition

Tester Connection	E41-5 (PBK+) - E41-6 (PBK-)
Tool Setting	5 V/DIV., 20 ms./DIV.
Switch Condition	Engine switch (IG) Front passenger side seat belt unfastened (Buckle switch off)
	Engine switch (IG) Front passenger side seat belt fastened (Buckle switch on)

OK

.5 to 5.5 V

Result

Result	Proceed to
OK (for LHD)	A
OK (for RHD)	B
NG (for LHD)	C
NG (for RHD)	D

DESCRIPTION

This circuit supplies power to the seat belt control ECU when the engine switch is on (IG).

WIRING DIAGRAM

INSPECTION PROCEDURE

HINT:

Start the engine before inspection. Check the IG1 NO. 1 relay or battery if the starting system does not start.

1.INSPECT FUSE (ECU-IG No. 1, PSB)

a. Remove the ECU-IG No. 1 and PSB fuses from the main body ECU.

b. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

Tester Connection	Condition	Specified Condition
ECU-IG No. 1 fuse	Always	Below 1 Ω
PSB fuse		

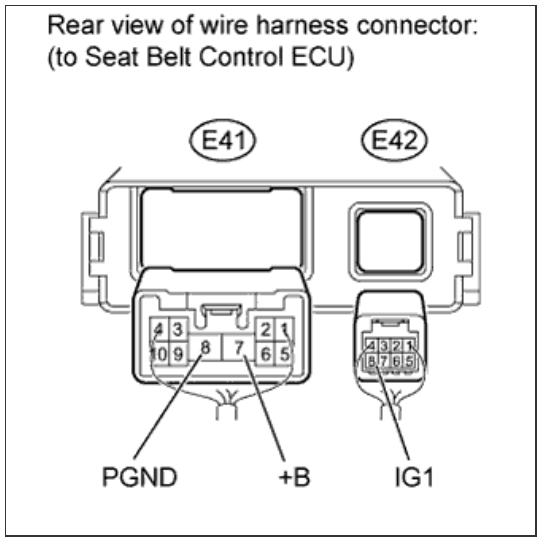
NG → REPLACE FUSE

OK

2.CHECK HARNESS AND CONNECTOR (SEAT BELT CONTROL ECU - BATTERY AND BODY GROUND)

a. Disconnect the E41 and E42 seat belt control ECU connectors.

b. Measure the voltage according to the value(s) in the table below.



Standard Voltage:

Tester Connection	Switch Condition	Specified Condition
E42-8 (IG1) - Body ground	Engine switch on (IG)	11 to 14 V
	Engine switch off	Below 1 V
E41-7 (+B) - Body ground	Always	11 to 14 V

c. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

Tester Connection	Condition	Specified Condition
E41-8 (PGND) - Body ground	Always	Below 1 Ω

Result

Result	Proceed to
OK (for LHD)	A

for Preparation Click here

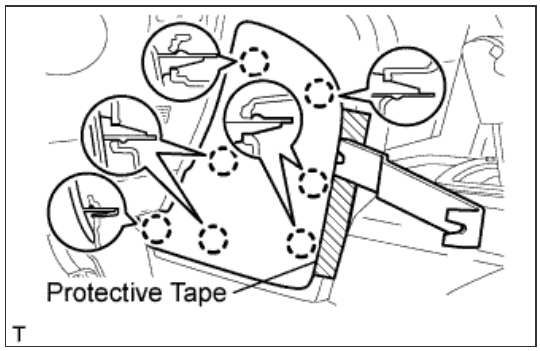
1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL (w/ Driver Side Knee Airbag)

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.



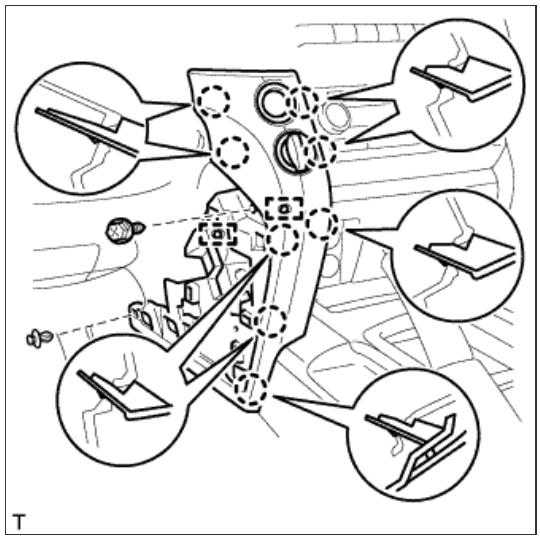
NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

2. REMOVE NO. 2 INSTRUMENT PANEL FINISH PANEL CUSHION

a. Place protective tape as shown in the illustration.

b. Using a moulding remover, detach the 7 claws and remove the panel cushion.

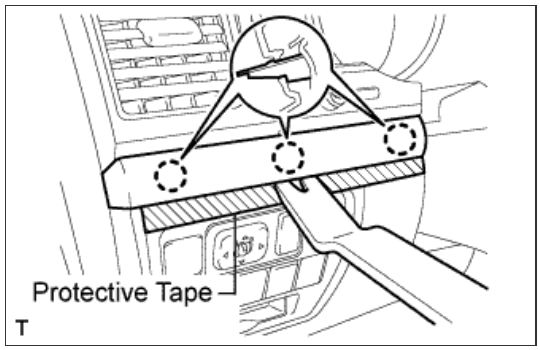


3. REMOVE LOWER INSTRUMENT PANEL PAD SUB-ASSEMBLY LH

a. Remove the clip.

b. Remove the screw.

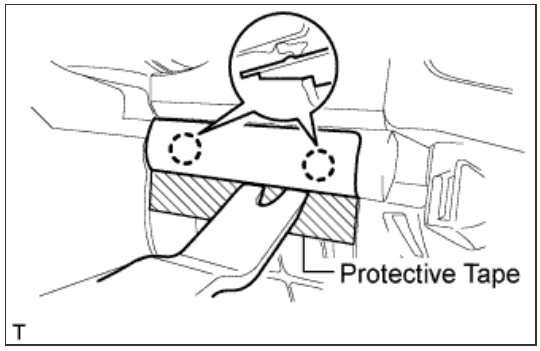
c. Detach the 8 claws.



d. Remove the panel pad and disconnect the connectors and 2 clamps.

4. REMOVE NO. 1 INSTRUMENT CLUSTER FINISH PANEL GARNISH

a. Place protective tape as shown in the illustration.

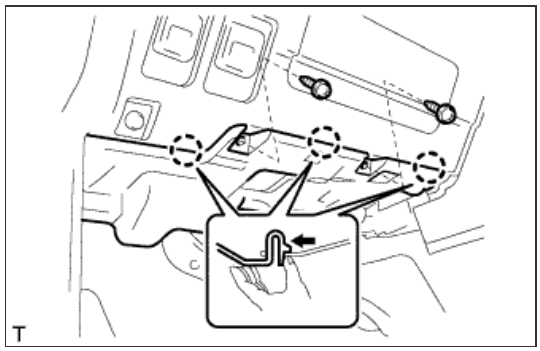


b. Using a moulding remover, detach the 3 claws and remove the panel garnish.

5. REMOVE NO. 2 INSTRUMENT CLUSTER FINISH PANEL GARNISH

a. Place protective tape as shown in the illustration.

b. Using a moulding remover, detach the 2 claws and remove the panel garnish.

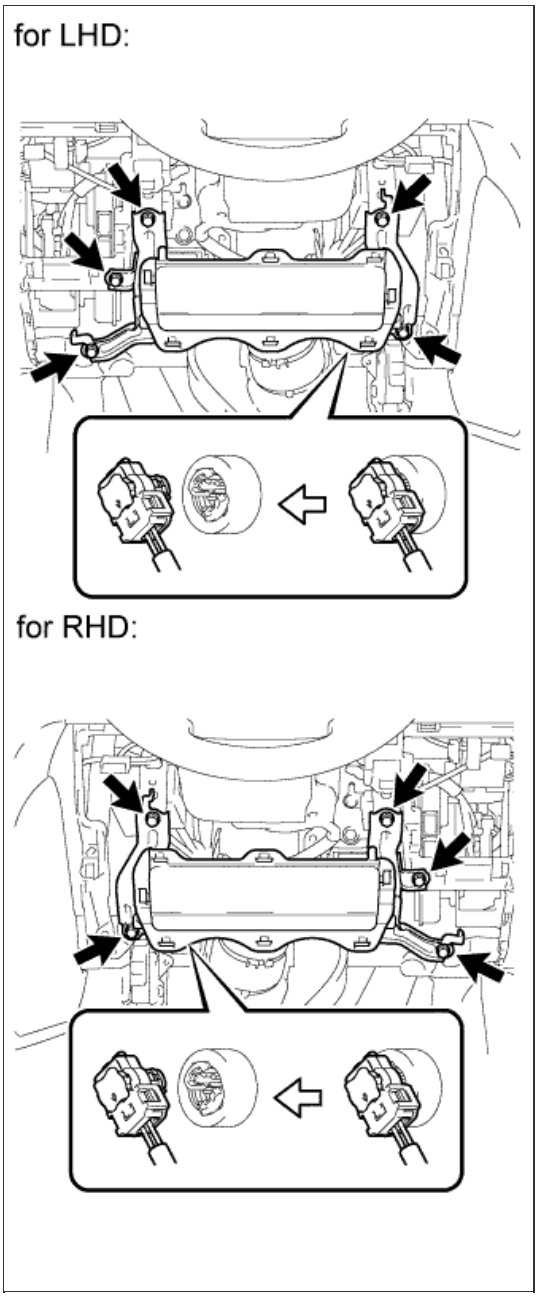


6. REMOVE NO. 1 INSTRUMENT PANEL UNDER COVER SUB-ASSEMBLY (w/ Floor Under Cover)

a. Remove the 2 screws.

b. Detach the 3 claws.

c. Remove the under cover and disconnect the connectors.

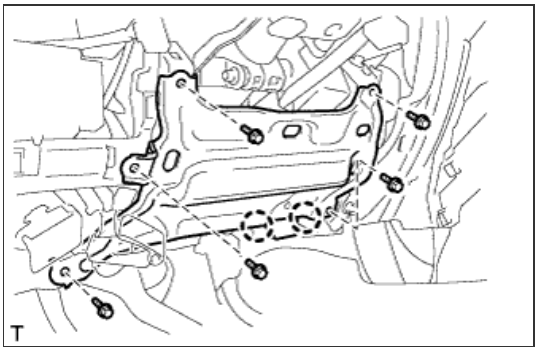


7. REMOVE DRIVER SIDE KNEE AIRBAG ASSEMBLY (w/ Driver Side Knee Airbag)

a. Remove the 5 bolts and driver side knee airbag.

b. Disconnect the connector.

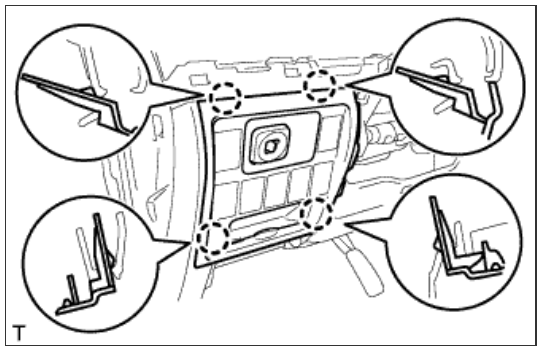
NOTICE:



When handling the airbag connector, take care not to damage the airbag wire harness.

8. REMOVE LOWER INSTRUMENT PANEL SUB-ASSEMBLY (w/o Driver Side Knee Airbag)

a. Detach the 2 claws and disconnect the DLC3.

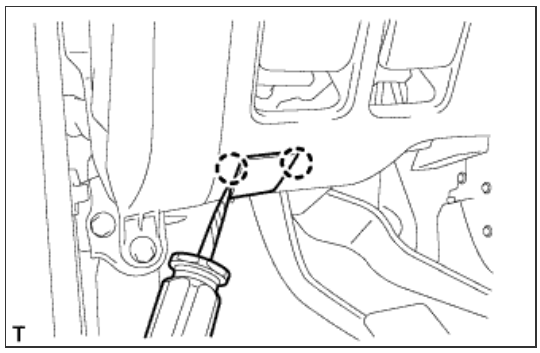


b. Remove the 5 bolts and instrument panel.

9. REMOVE NO. 1 SWITCH HOLE BASE

a. Detach the 4 claws.

b. Remove the switch hole base and then disconnect the connectors.



10. REMOVE LOWER NO. 1 INSTRUMENT PANEL FINISH PANEL

a. Using a screwdriver, detach the 2 claws.

HINT:

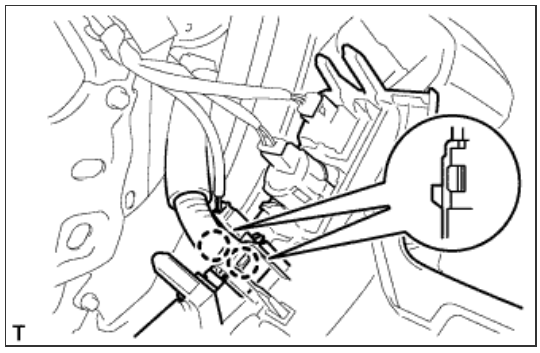
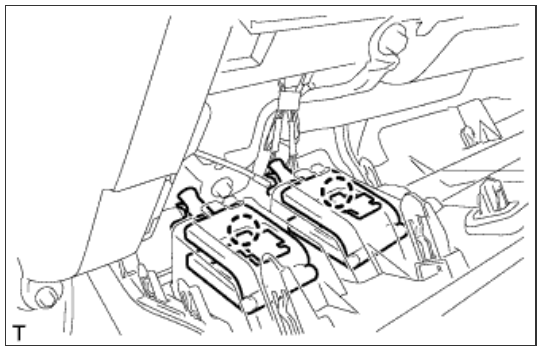
Tape the screwdriver tip before use.

b. Open the hole cover.



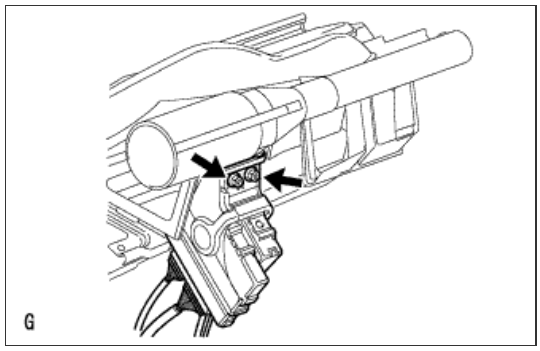
c. Remove the 2 bolts.

d. Detach the 14 claws.

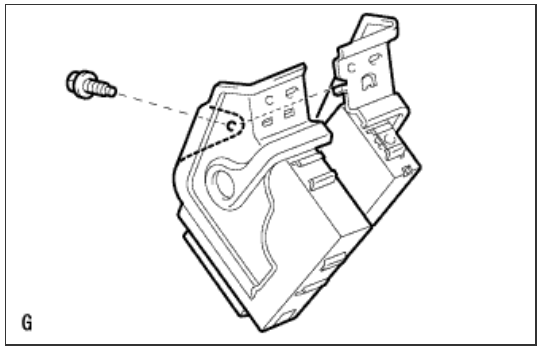


e. Detach the 2 claws and remove the sensor.

f. Detach the 2 claws and disconnect the 2 control cables.



g. Remove the finish panel and then disconnect the connectors.



11. REMOVE SEAT BELT CONTROL ECU

a. Disconnect the 2 connectors.

b. Remove the 2 nuts and remove the seat belt control CU together with the certification CU.

c. Remove the bolt and seat belt control CU from the certification CU.

for Preparation Click here

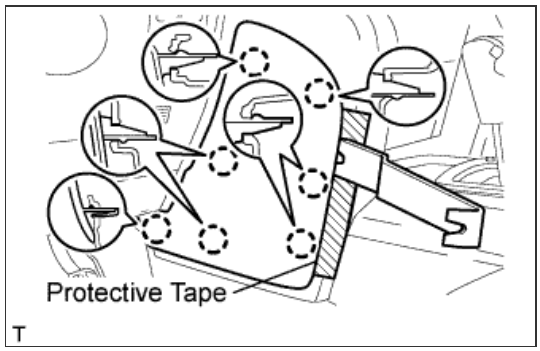
1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL (w/ Driver Side Knee Airbag)

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.



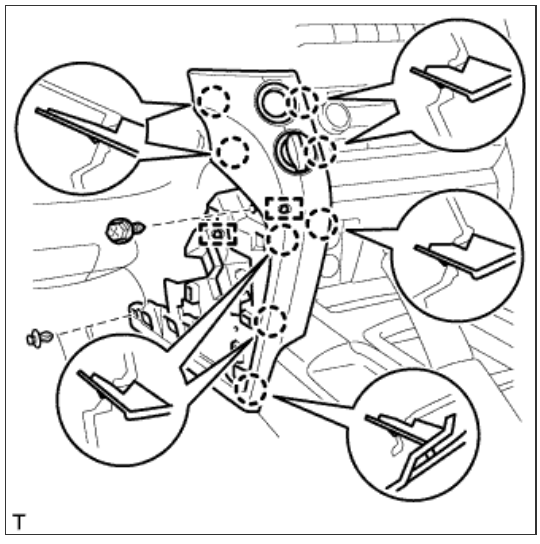
NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

2. REMOVE NO. 2 INSTRUMENT PANEL FINISH PANEL CUSHION

a. Place protective tape as shown in the illustration.

b. Using a moulding remover, detach the 7 claws and remove the panel cushion.

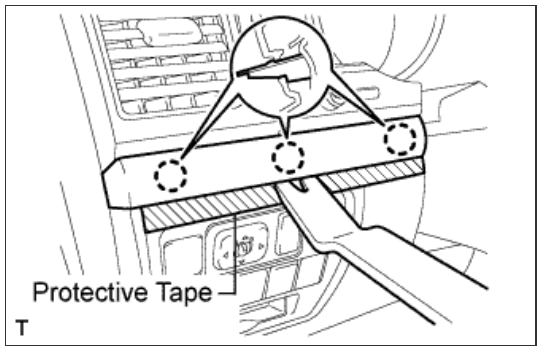


3. REMOVE LOWER INSTRUMENT PANEL PAD SUB-ASSEMBLY LH

a. Remove the clip.

b. Remove the screw.

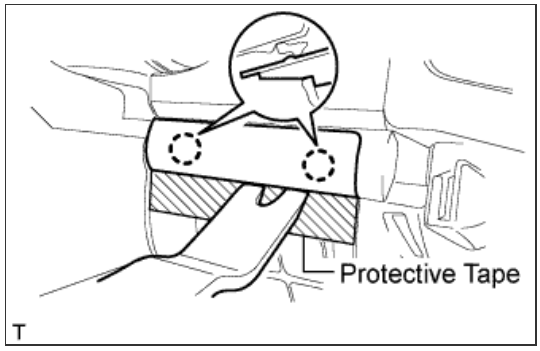
c. Detach the 8 claws.



d. Remove the panel pad and disconnect the connectors and 2 clamps.

4. REMOVE NO. 1 INSTRUMENT CLUSTER FINISH PANEL GARNISH

a. Place protective tape as shown in the illustration.

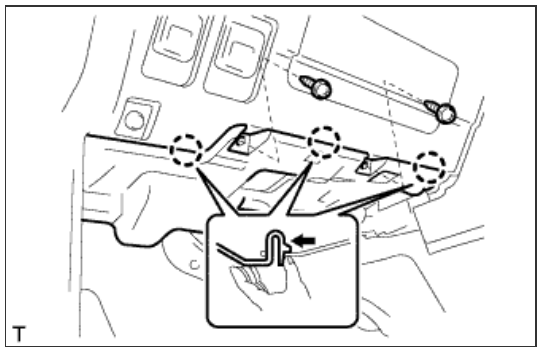


b. Using a moulding remover, detach the 3 claws and remove the panel garnish.

5. REMOVE NO. 2 INSTRUMENT CLUSTER FINISH PANEL GARNISH

a. Place protective tape as shown in the illustration.

b. Using a moulding remover, detach the 2 claws and remove the panel garnish.

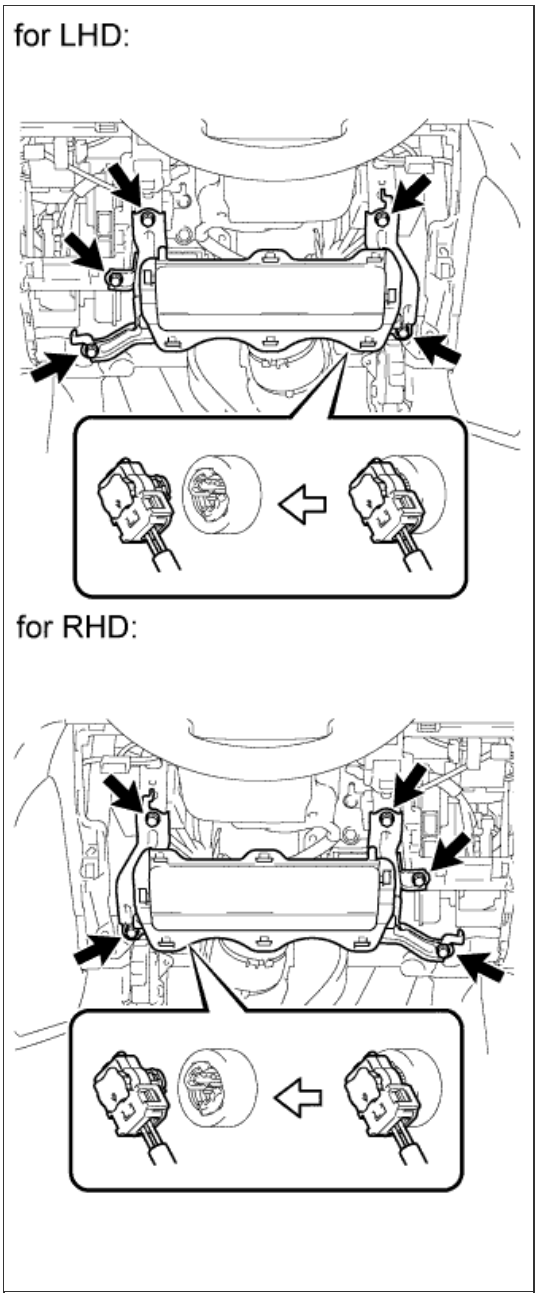


6. REMOVE NO. 1 INSTRUMENT PANEL UNDER COVER SUB-ASSEMBLY (w/ Floor Under Cover)

a. Remove the 2 screws.

b. Detach the 3 claws.

c. Remove the under cover and disconnect the connectors.

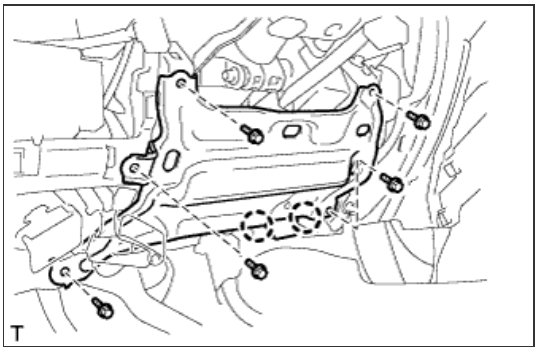


7. REMOVE DRIVER SIDE KNEE AIRBAG ASSEMBLY (w/ Driver Side Knee Airbag)

a. Remove the 5 bolts and driver side knee airbag.

b. Disconnect the connector.

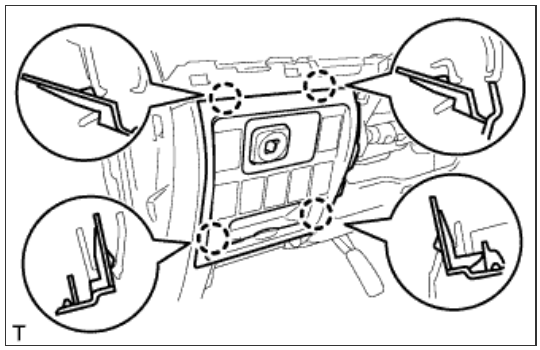
NOTICE:



When handling the airbag connector, take care not to damage the airbag wire harness.

8. REMOVE LOWER INSTRUMENT PANEL SUB-ASSEMBLY (w/o Driver Side Knee Airbag)

a. Detach the 2 claws and disconnect the DLC3.

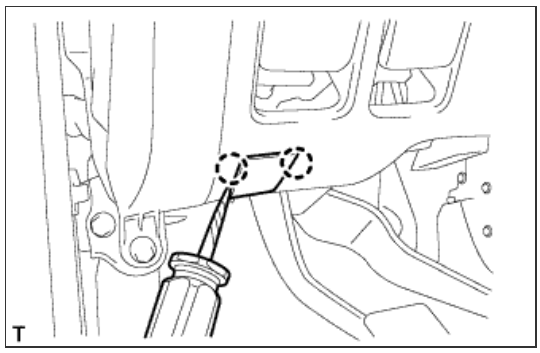


b. Remove the 5 bolts and instrument panel.

9. REMOVE NO. 1 SWITCH HOLE BASE

a. Detach the 4 claws.

b. Remove the switch hole base and then disconnect the connectors.



10. REMOVE LOWER NO. 1 INSTRUMENT PANEL FINISH PANEL

a. Using a screwdriver, detach the 2 claws.

HINT:

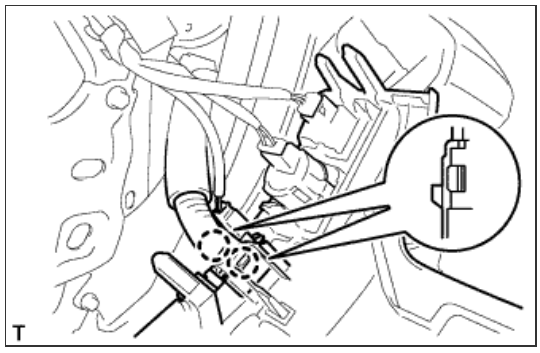
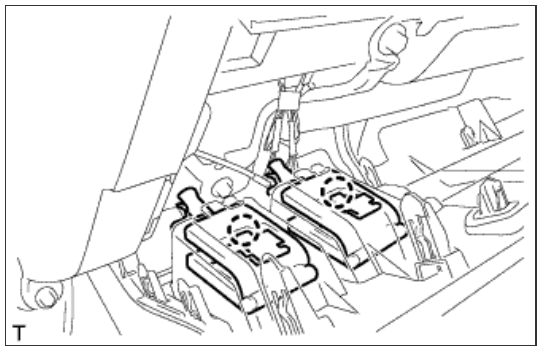
Tape the screwdriver tip before use.

b. Open the hole cover.



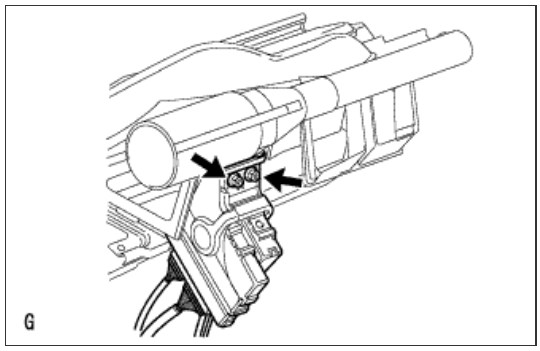
c. Remove the 2 bolts.

d. Detach the 14 claws.

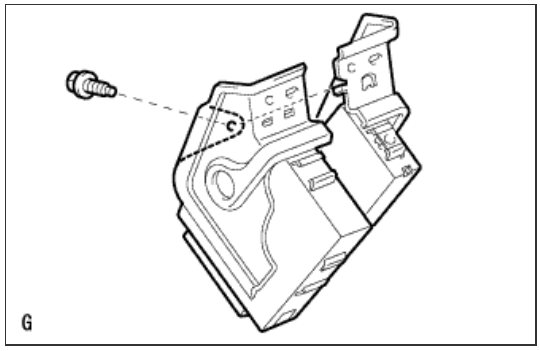


e. Detach the 2 claws and remove the sensor.

f. Detach the 2 claws and disconnect the 2 control cables.



g. Remove the finish panel and then disconnect the connectors.



11. REMOVE SEAT BELT CONTROL ECU

a. Disconnect the 2 connectors.

b. Remove the 2 nuts and remove the seat belt control CU together with the certification CU.

c. Remove the bolt and seat belt control CU from the certification CU.

for Preparation Click here

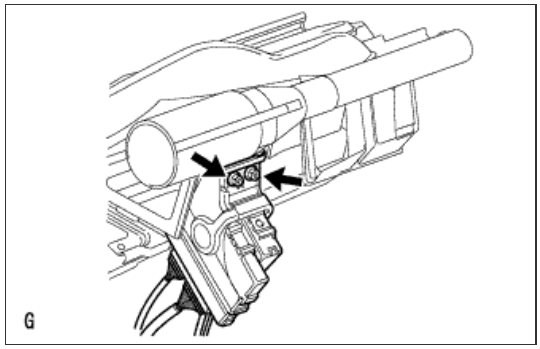
1. INSTALL SEAT BELT CONTROL ECU

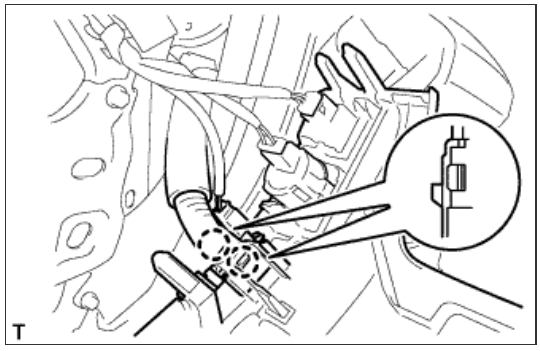
a. Install the seat belt control ECU to the certification ECU with the bolt.



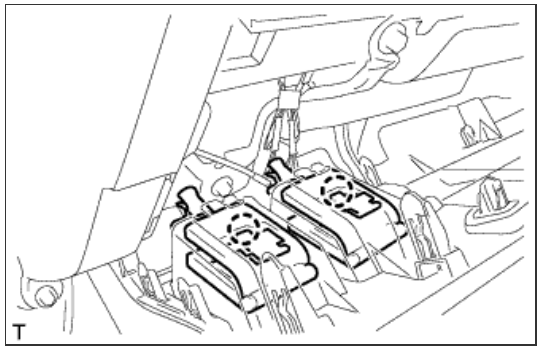
Torque:
5.5 N*m{ 56 kgf*cm , 49 in.*lbf }

b. Install the seat belt control ECU together with the certification ECU with the 2 nuts.

Torque:
5.5 N*m{ 56 kgf*cm , 49 in.*lbf }



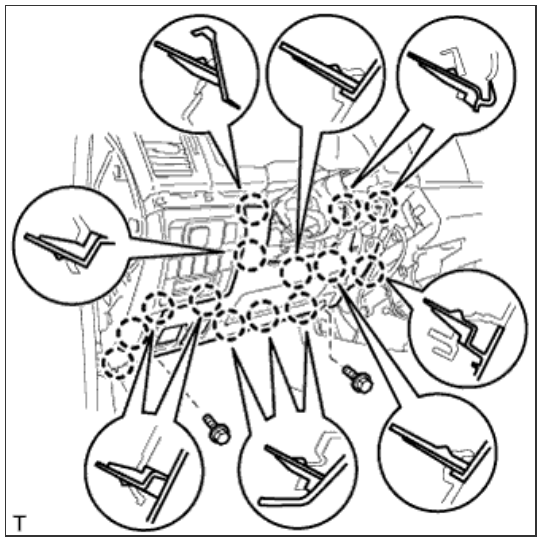
c. Connect the 2 connectors.



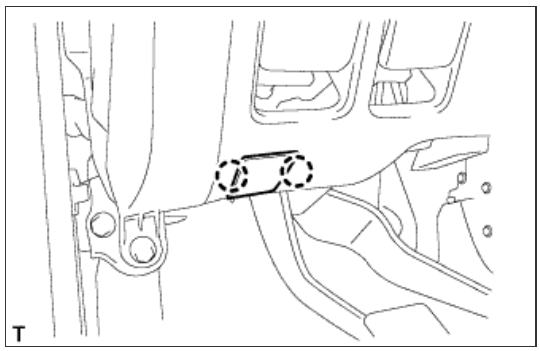
2. INSTALL LOWER NO. 1 INSTRUMENT PANEL FINISH PANEL

a. Connect the connectors.

b. Attach the 2 claws to install the sensor.



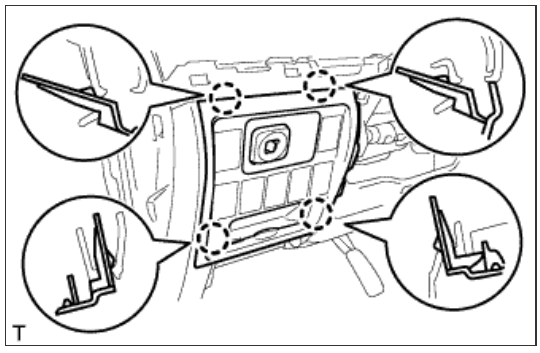
c. Attach the 2 claws to connect the 2 control cables.



d. Attach the 14 claws to install the finish panel.

d. Attach the 11 claws to install the finish panel.

e. Install the 2 bolts.



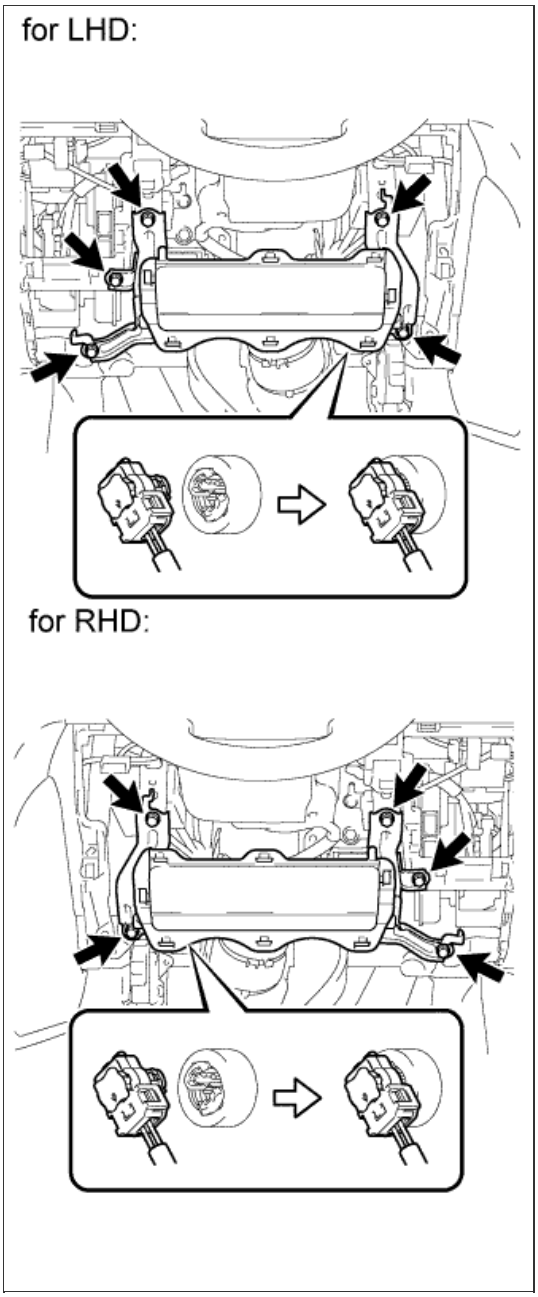
f. Attach the 2 claws to close the hole cover.

3. INSTALL NO. 1 SWITCH HOLE BASE

a. Connect the connectors.

b. Attach the 4 claws to install the switch hole base.

4. INSTALL DRIVER SIDE KNEE AIRBAG ASSEMBLY (w/ Driver Side Knee Airbag)

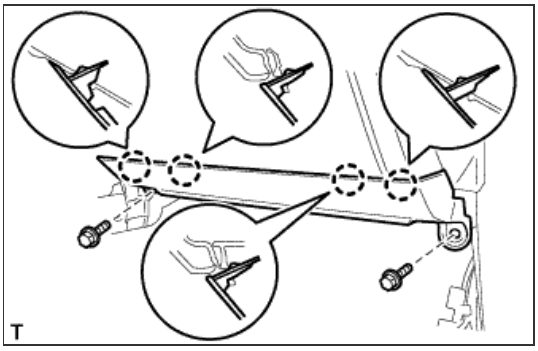


a. Connect the connector.

NOTICE:

When handling the airbag connector, take care not to damage the airbag wire harness.

b. Install the driver side knee airbag with the 5 bolts.

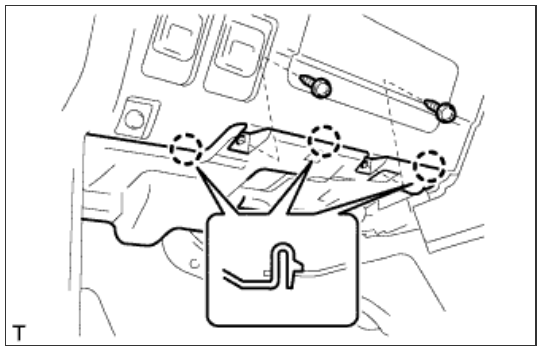


Torque:
10 N*m{ 102 kgf*cm , 7 ft.*lbf }

5. INSTALL LOWER INSTRUMENT PANEL SUB-ASSEMBLY (w/o Driver Side Knee Airbag)

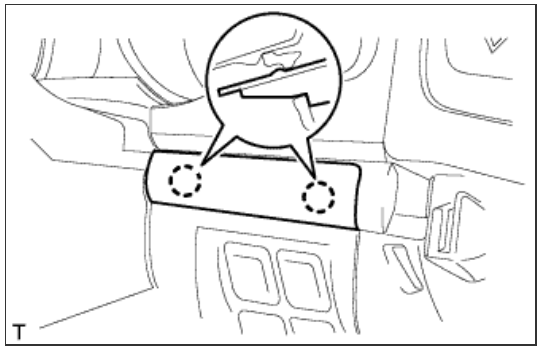
a. Attach the 4 claws to install the instrument panel.

b. Install the 2 bolts.



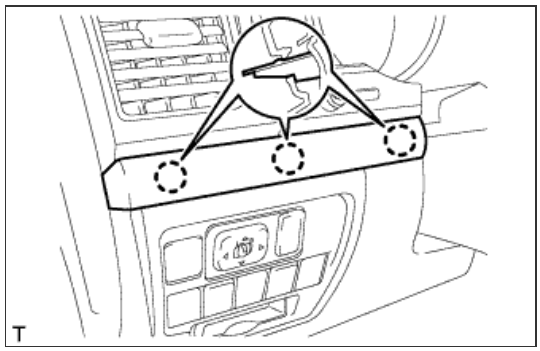
6. INSTALL NO. 1 INSTRUMENT PANEL UNDER COVER SUB-ASSEMBLY (w/ Floor Under Cover)

a. Connect the connectors.



b. Attach the 3 claws to install the under cover.

c. Install the 2 screws.

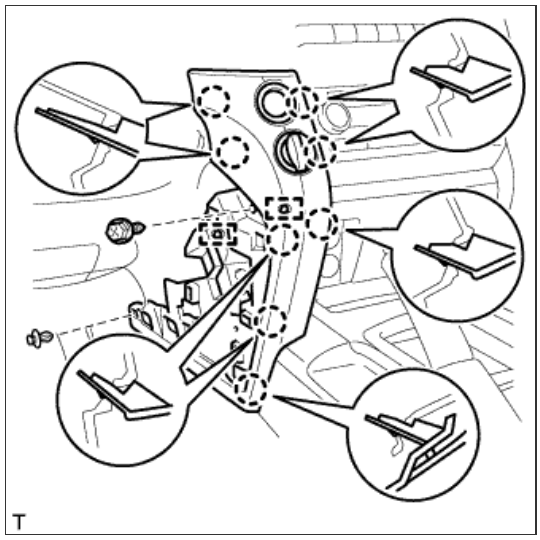


7. INSTALL NO. 2 INSTRUMENT CLUSTER FINISH PANEL GARNISH

a. Attach the 2 claws to install the panel garnish.

8. INSTALL NO. 1 INSTRUMENT CLUSTER FINISH PANEL GARNISH

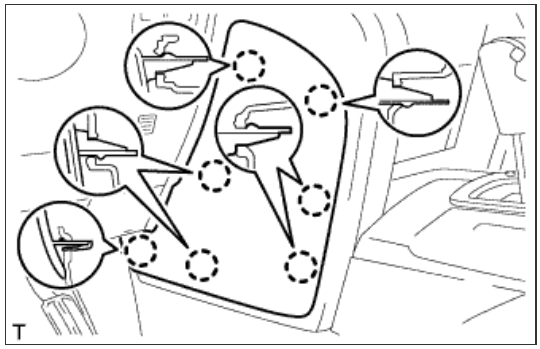
a. Attach the 3 claws to install the panel garnish.



9. INSTALL LOWER INSTRUMENT PANEL PAD SUB-ASSEMBLY LH

a. Connect the connectors and 2 clamps.

b. Attach the 8 claws to install the panel pad.



c. Install the screw.

d. Install the clip.

10. INSTALL NO. 2 INSTRUMENT PANEL FINISH PANEL CUSHION

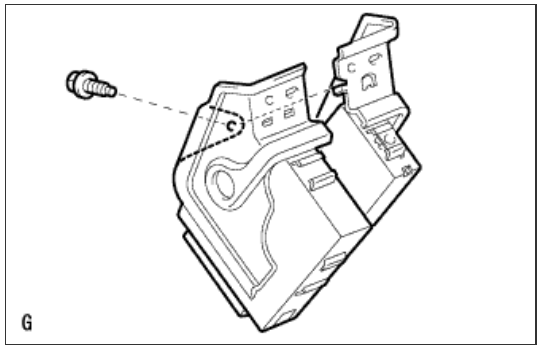
a. Attach the 7 claws to install the panel cushion.

11. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL (w/ Driver Side Knee Airbag)

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

12. CHECK SRS WARNING LIGHT (w/ Driver Side Knee Airbag)



a. Check the SRS warning light (Click here).

for Preparation Click here

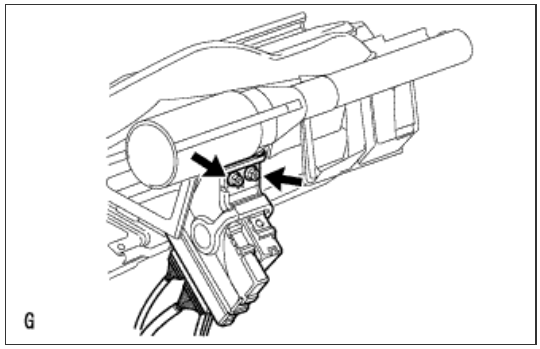
1. INSTALL SEAT BELT CONTROL ECU

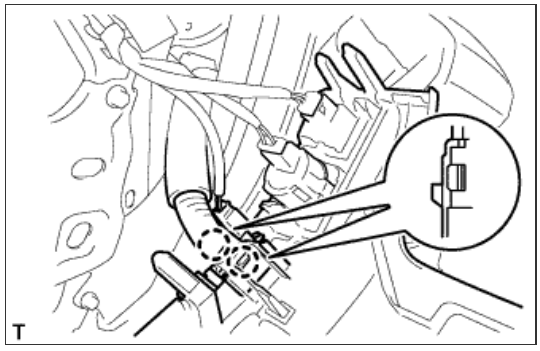
a. Install the seat belt control ECU to the certification ECU with the bolt.



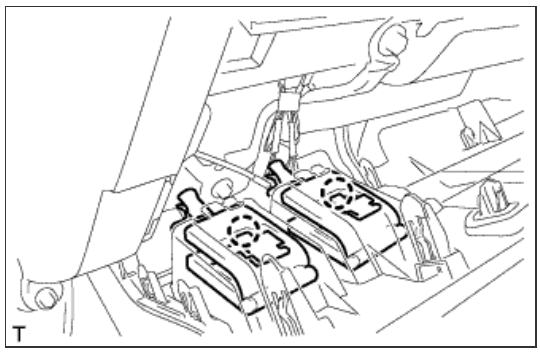
Torque:
5.5 N*m{ 56 kgf*cm , 49 in.*lbf }

b. Install the seat belt control ECU together with the certification ECU with the 2 nuts.

Torque:
5.5 N*m{ 56 kgf*cm , 49 in.*lbf }



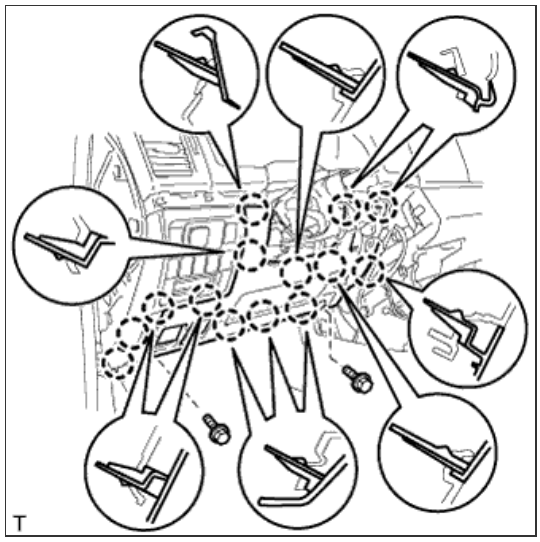
c. Connect the 2 connectors.



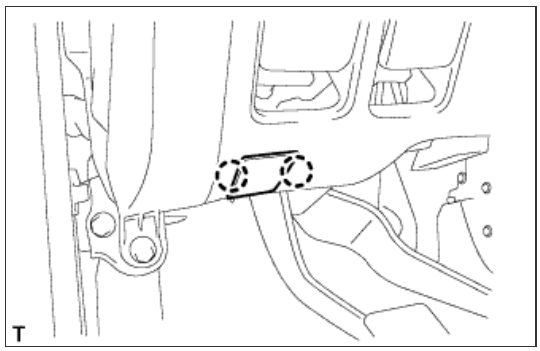
2. INSTALL LOWER NO. 1 INSTRUMENT PANEL FINISH PANEL

a. Connect the connectors.

b. Attach the 2 claws to install the sensor.



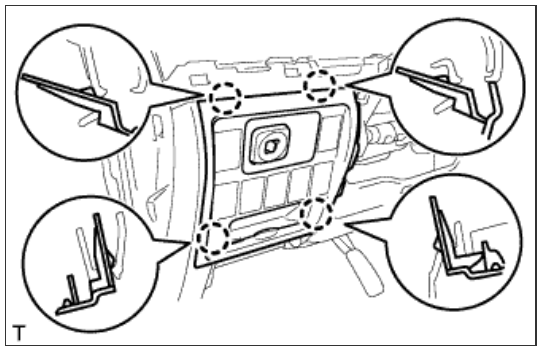
c. Attach the 2 claws to connect the 2 control cables.



d. Attach the 14 claws to install the finish panel.

d. Attach the 11 claws to install the finish panel.

e. Install the 2 bolts.



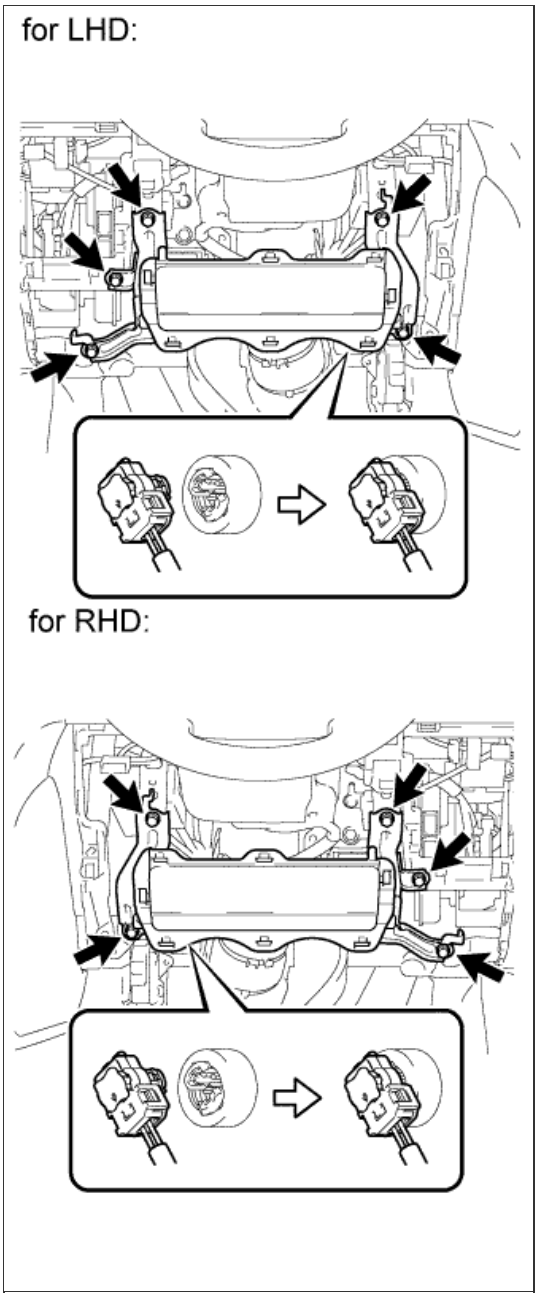
f. Attach the 2 claws to close the hole cover.

3. INSTALL NO. 1 SWITCH HOLE BASE

a. Connect the connectors.

b. Attach the 4 claws to install the switch hole base.

4. INSTALL DRIVER SIDE KNEE AIRBAG ASSEMBLY (w/ Driver Side Knee Airbag)

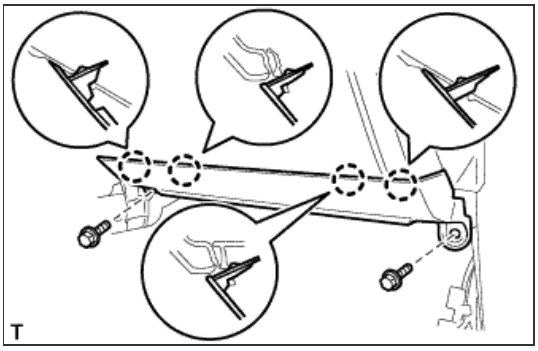


a. Connect the connector.

NOTICE:

When handling the airbag connector, take care not to damage the airbag wire harness.

b. Install the driver side knee airbag with the 5 bolts.

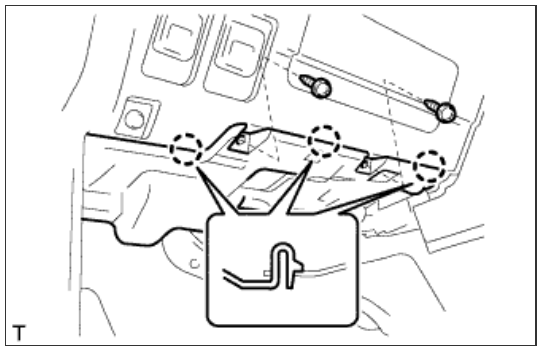


Torque:
10 N*m{ 102 kgf*cm , 7 ft.*lbf }

5. INSTALL LOWER INSTRUMENT PANEL SUB-ASSEMBLY (w/o Driver Side Knee Airbag)

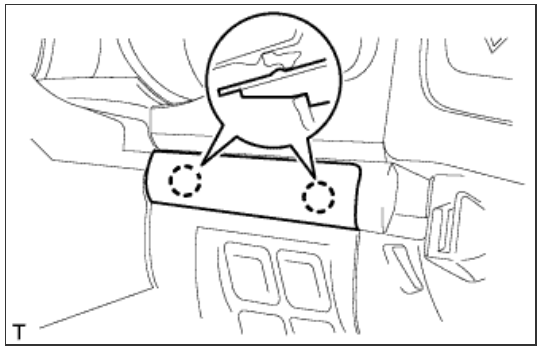
a. Attach the 4 claws to install the instrument panel.

b. Install the 2 bolts.



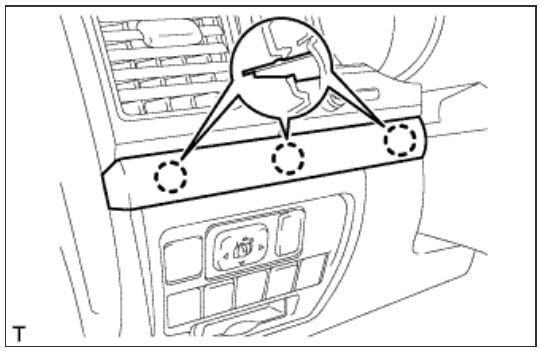
6. INSTALL NO. 1 INSTRUMENT PANEL UNDER COVER SUB-ASSEMBLY (w/ Floor Under Cover)

a. Connect the connectors.



b. Attach the 3 claws to install the under cover.

c. Install the 2 screws.

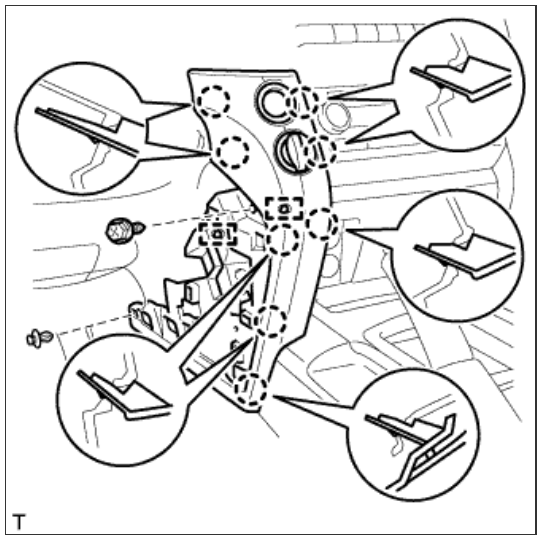


7. INSTALL NO. 2 INSTRUMENT CLUSTER FINISH PANEL GARNISH

a. Attach the 2 claws to install the panel garnish.

8. INSTALL NO. 1 INSTRUMENT CLUSTER FINISH PANEL GARNISH

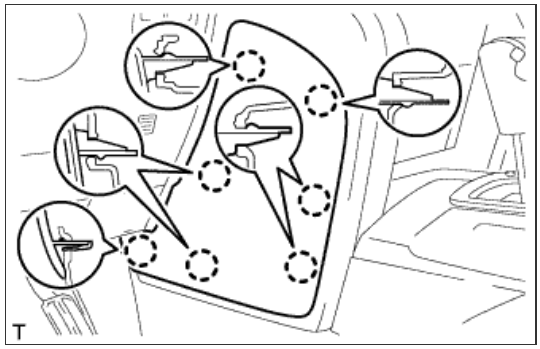
a. Attach the 3 claws to install the panel garnish.



9. INSTALL LOWER INSTRUMENT PANEL PAD SUB-ASSEMBLY LH

a. Connect the connectors and 2 clamps.

b. Attach the 8 claws to install the panel pad.



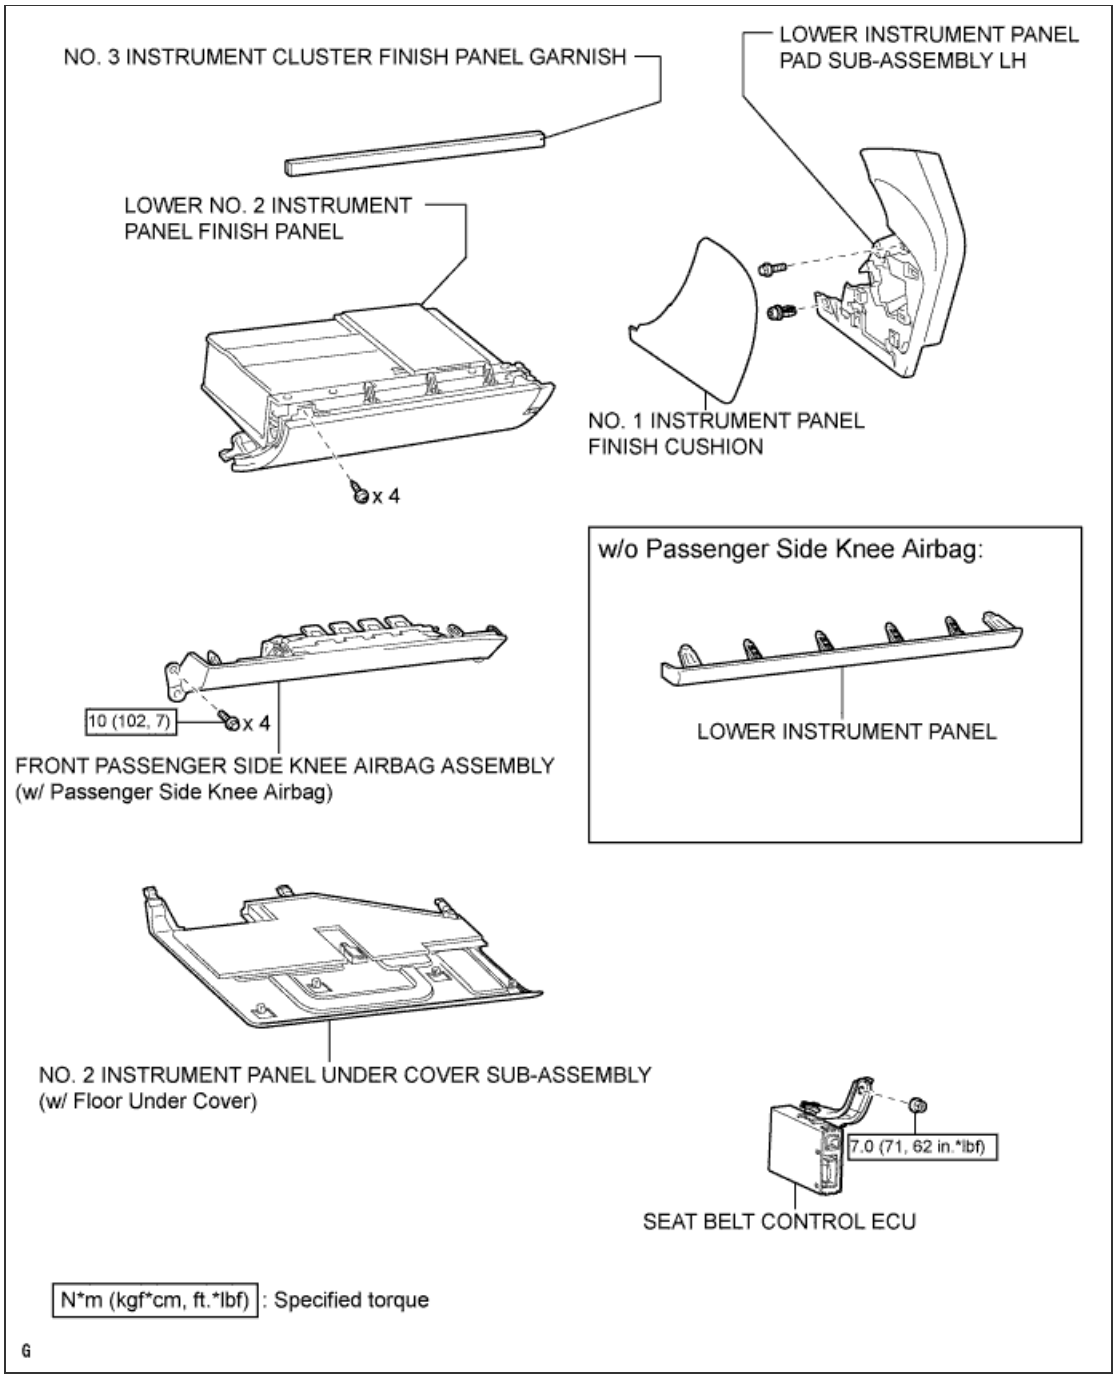
c. Install the screw.

d. Install the clip.

10. INSTALL NO. 2 INSTRUMENT PANEL FINISH PANEL CUSHION

a. Attach the 7 claws to install the panel cushion.

11. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL (w/ Driver Side Knee Airbag)



NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

12. CHECK SRS WARNING LIGHT (w/ Driver Side Knee Airbag)

a. Check the SRS warning light (Click here).

FRONT POWER SEAT CONTROL SYSTEM DESCRIPTION

- The driver seat is equipped with slide, reclining, lifter, front vertical, and lumbar support adjustment functions.
- The passenger seat is equipped with slide, reclining, lifter, and front vertical adjustment functions.
- The memory call function uses the key ID code of the key to memorize and reproduce the appropriate driving position for each individual who possesses a master key or sub key.

FUNCTION OF MAIN COMPONENT

The following functions are available.

Component	Function
Seat slide motor	Receives signal from front power seat switch, and slides seat forward and rearward.
Seat reclining motor	Receives signal from front power seat switch, and tilts and reclines seat.
Seat front vertical motor	Receives signal from front power seat switch, and raises and lowers front of seat cushion.
Seat lifter motor	Receives signal from front power seat switch, and raises and lowers seat cushion.
Lumbar support adjuster motor	Activated based on signal from lumbar support switch. Adjusts lumbar support.
Seat position sensor	Is built into each seat adjuster and sends position data to front power seat switch so that it can detect seat positions at all times.
Seat control switch	Based on switches operated, seat adjuster signals are input into position control ECU and seat is adjusted accordingly.
Seat memory switch	When seat memory SET switch and seat memory switch are pressed simultaneously, signal is input to outer mirror control ECU and seat position is recorded. Then, when seat memory switch is pressed, signal is input to outer mirror control ECU and seat position changes according to memory.

SYSTEM OPERATION

The front power seat functions which can be adjusted with power seat motors and/or memorized are shown in the chart below.
For the driver side memory function, the seat memory switch operation is first transferred from the outer mirror control ECU to the position control ECU and switch via the CAN communication line. Then, either the seat position is stored in memory or a previously stored seat position is recalled.

Seat Adjustment Function	Driver Seat	Passenger Seat
Fore-and-Aft Slide	Power and memory	Power
Reclining	Power and memory	Power
Front Vertical Height	Power and memory	Power
Lifter	Power and memory	Power
Lumbar support	Power	-

CHECK POWER SEAT FUNCTION

a. Check the basic functions.

i. Operate the power seat switches and check to make sure each seat function works:

- Sliding
- Front vertical
- Lifter
- Reclining
- Lumbar support (Driver seat only)

CHECK POWER SEAT MOTOR ASSEMBLY (SLIDING, FRONT VERTICAL, LIFTER, AND RECLINING FUNCTIONS)

a. Check the PTC operation inside the power seat motor.

HINT:

The resistance of the PTC thermistor increases when the power seat switch is held down even after the seat has been moved to the farthest possible position in one direction. If the resistance increases beyond a specified level, the current is shut off to prevent a short circuit.

NOTICE:

- **The inspection sho l e performed with the seat installed in the vehicle.**
- **Perform the 4 steps below to check the f ll range of motion for each power seat f nction.**

i. Choose a power seat function. Operate the power seat switch and move the seat to the farthest possible position in one direction. Keep the seat in that position for approximately 60 seconds.

ii. Operate the power seat switch again and continue to try to move the seat in the same direction as in the previous step. Measure the time until the current is shut off (motor operation sound will stop).

Standard:
4 to 90 seconds

iii. After the current is shut off, release the power seat switch and wait for approximately 60 seconds.

iv. Operate the same power seat switch and move the seat in the opposite direction. Check that the motor operates.

CHECK LUMBAR SUPPORT AD USTER ASSEMBLY

a. Check the PTC operation inside the power seat motor.

NOTICE:

The inspection should be performed with the seat installed in the vehicle.

i. Operate the lumbar support switch and move the lumbar support to either the foremost or rearmost position. Keep the seat in that

position for approximately 60 seconds.

ii. Operate the lumbar support switch again and continue to try to move the lumbar support in the same direction as in the previous step. Measure the time until the current is shut off (motor operation sound will stop).

Standard:
4 to 90 seconds

iii. After the current is shut off, release the lumbar support switch and wait for approximately 60 seconds.

iv. Operate the lumbar support switch and move the seat in the opposite direction. Check that the motor operates.

CHECK MEMORY AND SEAT RESTORING OPERATION

HINT:

The seat position will not be stored if the seat memory SET switch and 2 or more of the seat memory switches (for example, seat memory switch 1 and seat memory switch 2) are pressed simultaneously.

a. Turn the engine switch on (IG) and move the shift lever to P.

b. Move the seat to the foremost and uppermost position using the seat switch.

c. Check that the buzzer sounds for 0.5 seconds and the seat position is memorized when seat memory switch 1 is pressed while the seat memory SET switch is being pressed.

d. Move the seat from the foremost and uppermost position using the seat switch.

e. Check that the buzzer sounds for 0.5 seconds and the seat position is memorized when seat memory switch 2 is pressed while the seat memory SET switch is being pressed.

f. Move the seat to the rearmost and lowermost position using the seat switch.

g. Check that the buzzer sounds for 0.5 seconds and the seat position is memorized when seat memory switch 3 is pressed while the seat memory SET switch is being pressed.

h. Check that the buzzer sounds for 0.1 seconds and the seat automatically moves to the foremost and uppermost position (memorized position) when seat memory switch 1 of the seat memory switch is pressed.

i. Check that the buzzer sounds for 0.1 seconds and the seat automatically moves out of the foremost and uppermost position (memorized position) when seat memory switch 2 of the seat memory switch is pressed.

j. Check that the buzzer sounds for 0.1 seconds and the seat automatically moves to the rearmost and lowermost position (memorized position) when seat memory switch 3 of the seat memory switch is pressed.

k. After the engine switch is turned off and the driver side door is opened, check that the buzzer sounds for 0.1 seconds and the seat automatically moves to the memorized position when seat memory switch 1, seat memory switch 2 or seat memory switch 3 is pressed within 30 seconds.

l. Check that the following procedures clear the memorized seat positions of seat memory switch 1, seat memory switch 2 or seat memory switch 3: slide the seat fully forward or rearward; hold seat memory switch 1, seat memory switch 2 or seat memory switch 3; disconnect the cable from the negative (-) battery terminal; release seat memory switch 1, seat memory switch 2, or seat memory switch 3; and wait for 3 minutes.

CHECK MEMORY CALL FUNCTION

a. Automatic memory call function (automatic wireless memory call function)

i. With a transmitter key recognition code registered:
Perform a wireless door unlock operation and check that opening the driver side door causes: 1) the buzzer to sound for 0.1 seconds, and 2) the front seat, the steering wheel (tilt and telescopic), and outer mirror (RH and LH) to move automatically to the stored positions.

HINT:

- **The registered transmitter key recognition code is recalled a tomatically.**
- **If the front seats are not operated, the b er will not so nd.**

b. Memory registration (transmitter key recognition code registration)

i. With the engine switch off and the driver side door closed, press and hold seat memory switch 1, seat memory switch 2 or seat memory switch 3. The front power seat switch (position control ECU) will enter transmitter key recognition code registration mode to allow a key to be linked to a seat memory position.

ii. When the transmitter lock or unlock switch is pressed, check that the buzzer of the front power seat switch (position control ECU) sounds once (0.5 seconds).

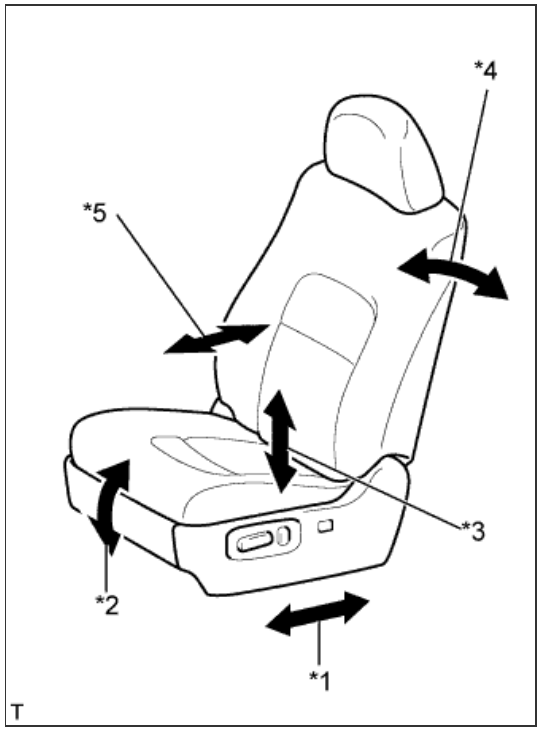
c. Memory deletion (transmitter key recognition code memory deletion)

i. With the engine switch off and the driver side door closed, press and hold SET switch. The front power seat switch (position control ECU) will enter transmitter key recognition code deletion mode.

ii. When the transmitter lock or unlock switch is pressed, check that the buzzer of the front power seat switch (position control ECU) sounds twice (0.1 seconds each time).

MEMORY CALL EMERGENCY STOP FUNCTION

a. While a memory call function is operating, check that performing one of the following will stop the memory call operation: 1) press the seat memory SET switch, seat memory switch 1, seat memory switch 2 or seat memory switch 3, or 2) press the front power seat switch (position control ECU).



for Preparation Click here

CHECK POWER SEAT FUNCTION

a. Check the basic functions.

i. Operate the power seat switches and check to make sure each seat function works:

- Sliding (*1)
- Front vertical (*2)
- Lifter (*3)
- Reclining (*4)
- Lumbar support (Driver seat only) (*5)

CHECK POWER SEAT MOTOR ASSEMBLY (SLIDING, FRONT VERTICAL, LIFTER, AND RECLINING FUNCTIONS)

a. Check the PTC operation inside the power seat motor.

HINT:

The resistance of the PTC thermistor increases when the power seat switch is held down even after the seat has been moved to the farthest possible position in one direction. If the resistance increases beyond a specified level, the current is shut off to prevent a short circuit.

NOTICE:

- **The inspection sho l e performed with the seat installed in the vehicle.**
- **Perform the 4 steps below to check the f ll range of motion for each power seat f nction.**

i. Choose a power seat function. Operate the power seat switch and move the seat to the farthest possible position in one direction. Keep the seat in that position for approximately 60 seconds.

ii. Operate the power seat switch again and continue to try to move the seat in the same direction as in the previous step. Measure the time until the current is shut off (motor operation sound will stop).

Standard:
4 to 90 seconds

iii. After the current is shut off, release the power seat switch and wait for approximately 60 seconds.

iv. Operate the same power seat switch and move the seat in the opposite direction. Check that the motor operates.

CHECK LUMBAR SUPPORT AD USTER ASSEMBLY

a. Check the PTC operation inside the power seat motor.

NOTICE:

The inspection should be performed with the seat installed in the vehicle.

i. Operate the lumbar support switch and move the lumbar support to either the foremost or rearmost position. Keep the seat in that

position for approximately 60 seconds.

ii. Operate the lumbar support switch again and continue to try to move the lumbar support in the same direction as in the previous step. Measure the time until the current is shut off (motor operation sound will stop).

Standard:
4 to 90 seconds

iii. After the current is shut off, release the lumbar support switch and wait for approximately 60 seconds.

iv. Operate the lumbar support switch and move the seat in the opposite direction. Check that the motor operates.

CHECK MEMORY AND SEAT RESTORING OPERATION

HINT:

The seat position will not be stored if the seat memory SET switch and 2 or more of the seat memory switches (for example, seat memory switch 1 and seat memory switch 2) are pressed simultaneously.

a. Turn the engine switch on (IG).

b. Move the seat to the foremost and uppermost position using the seat switch.

c. Check that the buzzer sounds for 0.5 seconds and the seat position is memorized when seat memory switch 1 is pressed within 3 seconds after the SET switch being pressed.

d. Move the seat from the foremost and uppermost position using the seat switch.

e. Check that the buzzer sounds for 0.5 seconds and the seat position is memorized when seat memory switch 2 is pressed within 3 seconds after the SET switch being pressed.

f. Move the seat to the rearmost and lowermost position using the seat switch.

g. Check that the buzzer sounds for 0.5 seconds and the seat position is memorized when seat memory switch 3 is pressed within 3 seconds after the SET switch being pressed.

h. Check that the buzzer sounds for 0.1 seconds and the seat automatically moves to the foremost and uppermost position (memorized position) when seat memory switch 1 of the seat memory switch is pressed.

i. Check that the buzzer sounds for 0.1 seconds and the seat automatically moves out of the foremost and uppermost position (memorized position) when seat memory switch 2 of the seat memory switch is pressed.

j. Check that the buzzer sounds for 0.1 seconds and the seat automatically moves to the rearmost and lowermost position (memorized position) when seat memory switch 3 of the seat memory switch is pressed.

k. Turn the engine switch off and open the driver door. Check that the buzzer sounds for 0.1 seconds and the seat automatically moves to the memorized position by pressing seat memory switch 1, seat memory switch 2 or seat memory switch 3 within 180 seconds after the engine switch is turned off.

l. Turn the engine switch off and close the driver door. Check that the buzzer sounds for 0.1 seconds and the seat automatically moves to the memorized position by pressing seat memory switch 1, seat memory switch 2 or seat memory switch 3 within 60 seconds after the engine switch is turned off.

m. Operate the front vertical function of the power seat switch to tilt the seat down 3 times; Within 10 seconds after operating the front vertical function of the power seat switch, operate the lifter function of the power seat switch to tilt up and the reclining function of the power seat switch to recline the seat simultaneously, and hold both switches for 10 seconds.

CHECK MEMORY CALL FUNCTION

a. Automatic memory call function (automatic wireless memory call function)

i. With a transmitter key recognition code registered:
Perform a wireless door unlock operation and check that opening the driver side door causes: 1) the buzzer to sound for 0.1 seconds, and 2) the front seat, the steering wheel (tilt and telescopic), and outer mirror (RH and LH) to move automatically to the stored positions.

HINT:

- **The registered transmitter key recognition code is recalled a tomatically.**
- **If the front seats are not operated, the b er will not so nd.**

b. Memory registration (transmitter key recognition code registration)

i. With the driver door closed, turn the engine switch from ON to OFF, then press and hold seat memory switch 1, seat memory switch 2 or seat memory switch 3. The front power seat switch (position control ECU) will enter transmitter key recognition code registration mode to allow a key to be linked to a seat memory position.

ii. hen the transmitter lock or unlock switch is pressed, check that the buzzer of the front power seat switch (position control ECU) sounds once (0.5 seconds).

c. Memory deletion (transmitter key recognition code memory deletion)

i. With the driver door closed, turn the engine switch from ON to OFF, then press and hold SET switch. The front power seat switch (position control ECU) will enter transmitter key recognition code deletion mode.

ii. When the transmitter lock or unlock switch is pressed, check that the buzzer of the front power seat switch (position control ECU) sounds twice (0.1 seconds each time).

MEMORY CALL EMERGENCY STOP FUNCTION

a. While a memory call function is operating, check that performing one of the following will stop the memory call operation: 1) press the seat memory SET switch, seat memory switch 1, seat memory switch 2 or seat memory switch 3, or 2) press the front power seat switch (position control ECU).

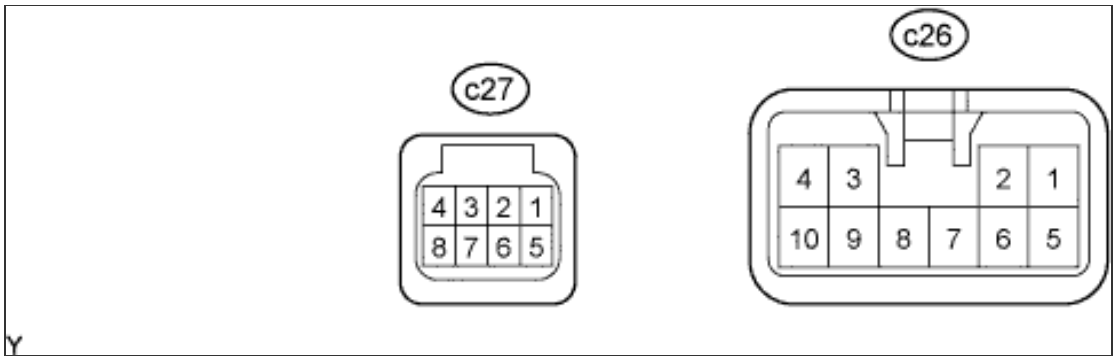
CHECK POSITION CONTROL ECU AN SWITCH (for LH)

a. Disconnect the c14 and c15 switch connectors.

b. Measure the voltage and resistance according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
c14-1 (GND) - Body ground	W-B - Body ground	Ground	Always	Below 1 Ω
c14-5 (+B) - c14-1 (GND)	L - W-B	Power source	Always	11 to 14 V
c15-4 (IG) - c14-1 (GND)	G - W-B	Engine switch signal	Engine switch off	Below 1 V
			Engine switch on (IG)	11 to 14 V
c15-8 (SYSB) - c14-1 (GND)	R - W-B	System power source	Always	11 to 14 V

If the result is not as specified, there may be a malfunction on the wire harness side.



c. Reconnect the c14 and c15 switch connectors.

d. Measure the voltage according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
c14-2 (SLD+) - c14-1 (GND)	B - W-B	Sliding motor signal (forward)	Slide switch off	Below 1 V
			Slide switch front on	11 to 14 V
c14-3 (SLD-) - c14-1 (GND)	P - W-B	Sliding motor signal (rearward)	Slide switch off	Below 1 V
			Slide switch rear on	11 to 14 V
c14-6 (FRV+) - c14-1 (GND)	R - W-B	Front vertical motor signal (upward)	Front vertical switch off	Below 1 V
			Front vertical switch up on	11 to 14 V
c14-4 (FRV-) - c14-1 (GND)	LG - W-B	Front vertical motor signal (downward)	Front vertical switch off	Below 1 V
			Front vertical switch down on	11 to 14 V
c14-7 (LFT+) - c14-1 (GND)	G - W-B	Lifter motor signal (upward)	Lifter switch off	Below 1 V
			Lifter switch up on	11 to 14 V
c14-9 (LFT-) - c14-1 (GND)	W - W-B	Lifter motor signal (downward)	Lifter switch off	Below 1 V
			Lifter switch down on	11 to 14 V
c14-8 (RCL+) - c14-1 (GND)	GR - W-B	Reclining motor signal (forward)	Reclining switch off	Below 1 V
			Reclining switch front on	11 to 14 V
c14-10 (RCL-) - c14-1 (GND)	Y - W-B	Reclining motor signal (rearward)	Reclining switch off	Below 1 V
			Reclining switch rear on	11 to 14 V

If the result is not as specified, the position control ECU and switch may have a malfunction.

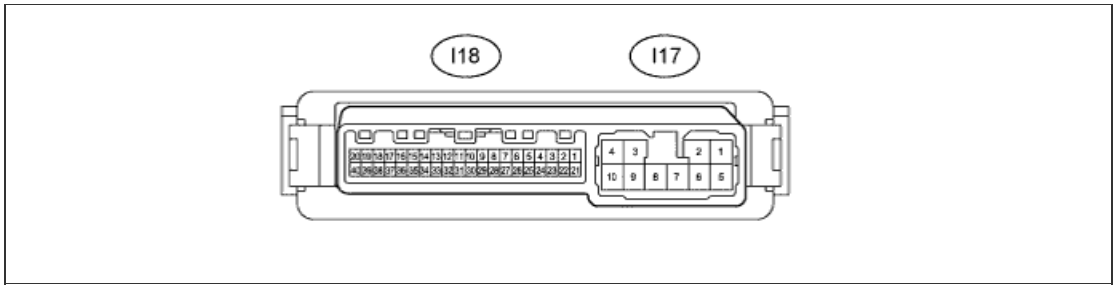
CHECK POSITION CONTROL ECU AN SWITCH (for RH)

a. Disconnect the c2 and c27 switch connectors.

b. Measure the voltage and resistance according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
c2 -1 (GND) - Body ground	W-B - Body ground	Ground	Always	Below 1 Ω
c26-5 (+B) - c26-1 (GND)	L - W-B	Power source	Always	11 to 14 V
c27-4 (IG) - c26-1 (GND)	G - W-B	Engine switch signal	Engine switch off	Below 1 V
			Engine switch on (IG)	11 to 14 V
c27-8 (SYSB) - c26-1 (GND)	R - W-B	System power source	Always	11 to 14 V

If the result is not as specified, there may be a malfunction on the wire harness side.



c. Reconnect the c26 and c27 switch connectors.

d. Measure the voltage according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
c26-2 (SLD+) - c26-1 (GND)	B - W-B	Sliding motor signal (forward)	Slide switch off	Below 1 V
			Slide switch front on	11 to 14 V
c26-3 (SLD-) - c26-1 (GND)	P - W-B	Sliding motor signal (rearward)	Slide switch off	Below 1 V
			Slide switch rear on	11 to 14 V
c26-6 (FRV+) - c26-1 (GND)	R - W-B	Front vertical motor signal (upward)	Front vertical switch off	Below 1 V
			Front vertical switch up on	11 to 14 V
c26-4 (FRV-) - c26-1 (GND)	LG - W-B	Front vertical motor signal (downward)	Front vertical switch off	Below 1 V
			Front vertical switch down on	11 to 14 V
c26-7 (LFT+) - c26-1 (GND)	G - W-B	Lifter motor signal (upward)	Lifter switch off	Below 1 V
			Lifter switch up on	11 to 14 V
c26-9 (LFT-) - c26-1 (GND)	W - W-B	Lifter motor signal (downward)	Lifter switch off	Below 1 V
			Lifter switch down on	11 to 14 V
c26-8 (RCL+) - c26-1 (GND)	GR - W-B	Reclining motor signal (forward)	Reclining switch off	Below 1 V
			Reclining switch front on	11 to 14 V
c26-10 (RCL-) - c26-1 (GND)	Y - W-B	Reclining motor signal (rearward)	Reclining switch off	Below 1 V
			Reclining switch rear on	11 to 14 V

If the result is not as specified, the position control ECU and switch may have a malfunction.

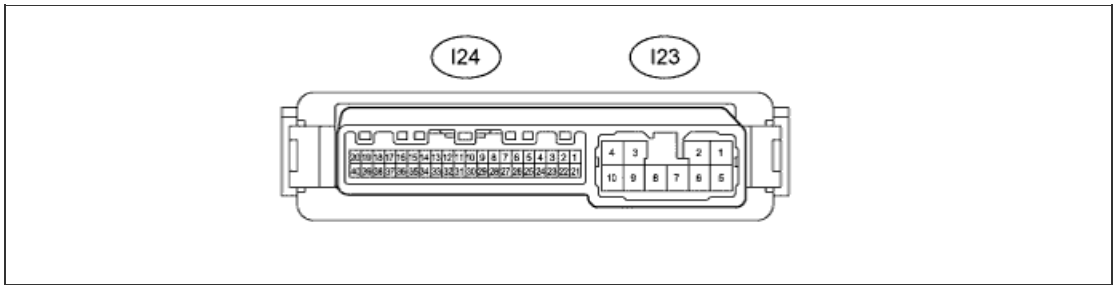
CHECK OUTER MIRROR CONTROL ECU (for LH)

a. Disconnect the I17 and I18 ECU connectors.

b. Measure the voltage and resistance according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
I18-10 (MSWE) - I17-9 (GND)	BR - W-B	Ground for seat memory switch	Always	Below 1 Ω
I17-9 (GND) - Body ground	W-B - Body ground	Ground	Always	Below 1 Ω
I17-3 (B) - I17-9 (GND)	R - W-B	Battery (ECU power source)	Always	11 to 14 V
I17-4 (ACC) - I17-9 (GND)	GR - W-B	Engine switch (ACC) power source supply	Engine switch off	Below 1 V
			Engine switch on (ACC)	11 to 14 V

If the result is not as specified, there may be a malfunction on the wire harness side.



c. Reconnect the I17 and I18 ECU connectors.

d. Measure the voltage according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
I18-6 (M3) - I18-10 (MSWE)	B - BR	Seat memory switch 3 signal for seat memory switch	Seat memory switch 3 on	11 to 14 V
			Seat memory switch 3 off	Below 1 V
I18-7 (M2) - I18-10 (MSWE)	W - BR	Seat memory switch 2 signal for seat memory switch	Seat memory switch 2 on	11 to 14 V
			Seat memory switch 2 off	Below 1 V
I18-8 (M1) - I18-10 (MSWE)	G - BR	Seat memory switch 1 signal for seat memory switch	Seat memory switch 1 on	11 to 14 V
			Seat memory switch 1 off	Below 1 V
I18-9 (MM) - I18-10 (MSWE)	B - BR	Seat memory SET switch signal for seat memory switch	Seat memory SET switch on	11 to 14 V
			Seat memory SET switch off	Below 1 V

If the result is not as specified, the outer mirror control ECU may have a malfunction.

CHECK OUTER MIRROR CONTROL ECU (for RH)

a. Disconnect the I23 and I24 ECU connectors.

b. Measure the voltage and resistance according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
I24-10 (MSWE) - I23-9 (GND)	BR - W-B	Ground for seat memory switch	Always	Below 1 Ω
I23-9 (GND) - Body ground	W-B - Body ground	Ground	Always	Below 1 Ω
I23-3 (B) - I23-9 (GND)	R - W-B	Battery (ECU power source)	Always	11 to 14 V
I23-4 (ACC) - I23-9 (GND)	GR - W-B	Engine switch (ACC) power source supply	Engine switch off	Below 1 V
			Engine switch on (ACC)	11 to 14 V

If the result is not as specified, there may be a malfunction on the wire harness side.

c. Reconnect the I23 and I24 ECU connectors.

d. Measure the voltage according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
I24-6 (M3) - I24-10 (MSWE)	B - BR	Seat memory switch 3 signal for seat memory switch	Seat memory switch 3 on	11 to 14 V
			Seat memory switch 3 off	Below 1 V
I24-7 (M2) - I24-10 (MSWE)	W - BR	Seat memory switch 2 signal for seat memory switch	Seat memory switch 2 on	11 to 14 V
			Seat memory switch 2 off	Below 1 V
I24-8 (M1) - I24-10 (MSWE)	G - BR	Seat memory switch 1 signal for seat memory switch	Seat memory switch 1 on	11 to 14 V
			Seat memory switch 1 off	Below 1 V
I24-9 (MM) - I24-10 (MSWE)	B - BR	Seat memory SET switch signal for seat memory switch	Seat memory SET switch on	11 to 14 V
			Seat memory SET switch off	Below 1 V

If the result is not as specified, the outer mirror control ECU may have a malfunction.

for Preparation Cli re

DATA LIST

HINT:

Using the intelligent tester to read the Data List allows the values or states of switches, sensors, actuators and other items to be read without removing any parts. This non-intrusive inspection can be very useful because intermittent conditions or signals may be discovered before parts or wiring is disturbed. Reading the Data List information early in troubleshooting is one way to save diagnostic time.

NOTICE:

In the table below, the values listed under "Normal Condition" are reference values. Do not depend solely on these reference values when deciding whether a part is faulty or not.

a. Turn the engine switch off.

b. Connect the intelligent tester to the DLC3.

Turn the engine switch on (IG).

Turn the intelligent tester on.

e Enter the following menus: Body / (desired system) / Data List.

According to the display on the intelligent tester, read the Data List.

Mirror

Tester Display	Measurement Item/Range	Normal Condition	Diagnostic Note
Driver Side SET Mem SW	Driver side seat memory SET switch / ON or OFF	ON: Driver side seat memory SET switch on OFF: Driver side seat memory SET switch off	-
Driver Side Memory SW 1	Driver side seat memory switch 1 / ON or OFF	ON: Driver side seat memory switch 1 on OFF: Driver side seat memory switch 1 off	-
Driver Side Memory SW 2	Driver side seat memory switch 2 / ON or OFF	ON: Driver side seat memory switch 2 on OFF: Driver side seat memory switch 2 off	-
Driver Side Memory SW 3	Driver side seat memory switch 3 / ON or OFF	ON: Driver side seat memory switch 3 on OFF: Driver side seat memory switch 3 off	-

Driver Seat

Tester Display	Measurement Item/Range	Normal Condition	Diagnostic Note
Reclining Rear	Reclining switch signal (Rearward) / ON or OFF	ON: Reclining switch (Rearward) on OFF: Reclining switch (Rearward) off	-
Reclining Front	Reclining switch signal (Forward) / ON or OFF	ON: Reclining switch (Forward) on OFF: Reclining switch (Forward) off	-
Front ertical Down	Front vertical switch signal (Downward) / ON or OFF	ON: Front vertical switch (Downward) on OFF: Front vertical switch (Downward) off	-

ACTI E TEST

HINT:

Using the intelligent tester to perform Active Tests allows relays, S s, actuators and other items to be operated without removing any parts. This non-intrusive functional inspection can be very useful because intermittent operation may be discovered before parts or wiring is disturbed. Performing Active Tests early in troubleshooting is one way to save diagnostic time. Data List information can be displayed while performing Active Tests.

a. Turn the engine switch off.

b. Connect the intelligent tester to the DLC3.

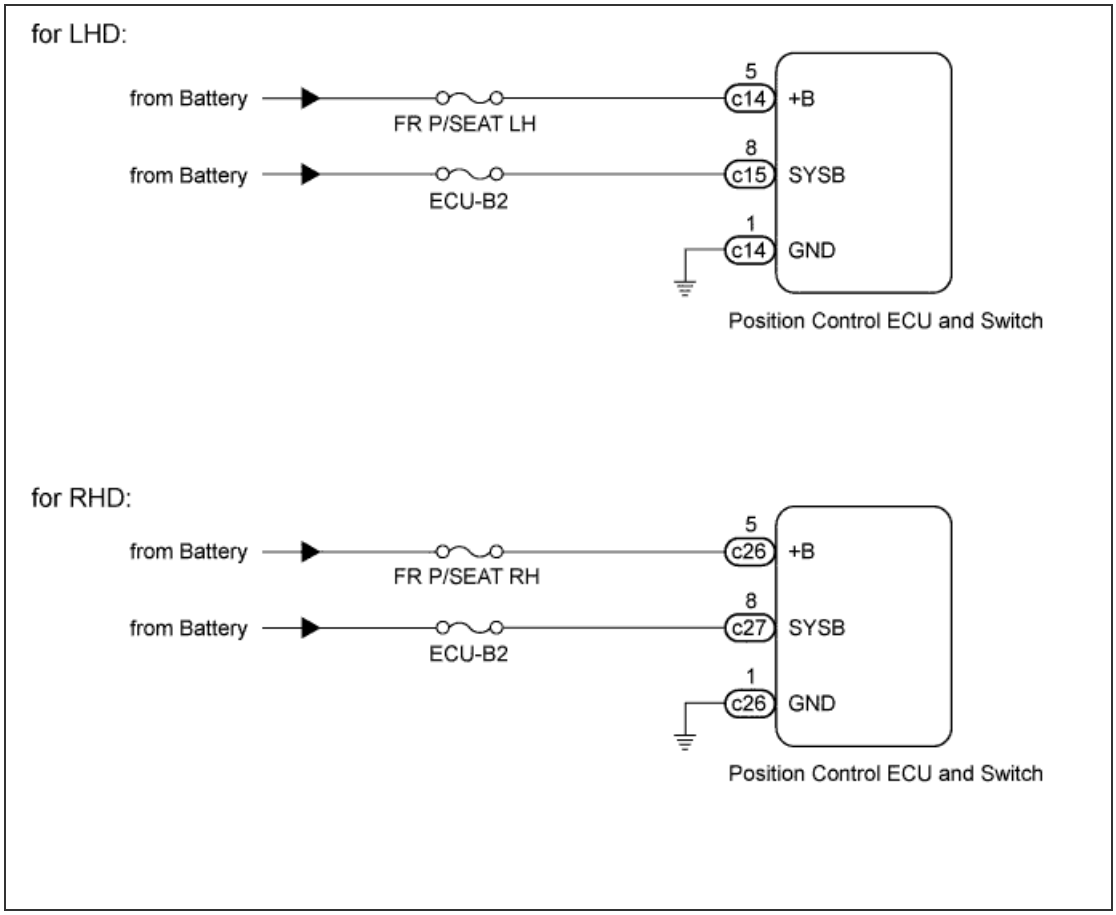
Turn the engine switch on (IG).

Turn the intelligent tester on.

e Enter the following menus: Body / (desired system) / Active Test.

According to the display on the intelligent tester, perform the Active Test.

Driver Seat



Tester Display	Test Part	Control Range	Diagnostic Note
Seat Reclining	Seat reclining operation	Front / OFF / Rear	-
Front ertical Operation	Seat front vertical operation	Up / OFF / Down	-
Lifter Operation	Seat lifter operation	Up / OFF / Down	-
Seat Slide Operation	Seat sliding operation	Front / OFF / Rear	-
Buzzer	Buzzer operation	ON / OFF	-

for Preparation Click here

ESCRIPTION

When a signal is input into the position control ECU, the ECU manages the signals received from the front power seat switch LH, and operates each motor. When 2 or more signals are input, the motors only operate when the signals are from the slide switch and reclining switch.

WIRING AGRAM

INSPECTION PROCE RE

1.INSPECT FUSE (FR P/SEAT LH, FR P/SEAT RH, ECU-B2)

a. Remove the FR P/SEAT LH*1, FR P/SEAT RH*2 and ECU-B2 fuses from the main ody ECU.

HINT:

*1: for LHD

*2: for RHD

b. Measure the resistance according to the value(s) in the ta le elow.

Standard Resistance:

for LH

Tester Connection	Condition	Specified Condition
FR P/SEAT LH fuse	Always	Below 1 Ω
ECU-B2 fuse	Always	Below 1 Ω

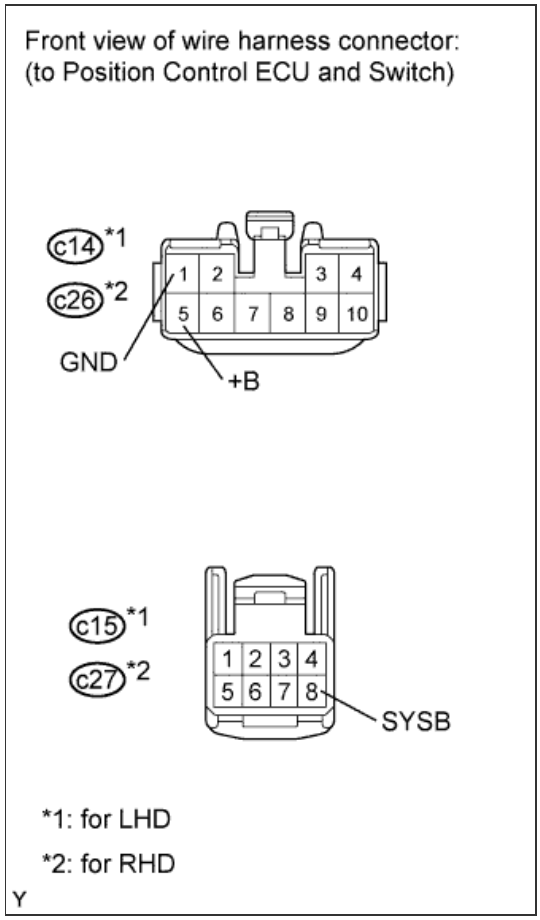
for RH

Tester Connection	Condition	Specified Condition
FR P/SEAT RH fuse	Always	Below 1 Ω
ECU-B2 fuse	Always	Below 1 Ω

NG → REPLACE FUSE

OK

2.CHECK HARNESS AN CONNECTOR (POSITION CONTROL ECU AN SWITCH - BATTERY AN BO YGROUN)



a. Disconnect the c14*1, c15*1 or c26*2, c27*2 switch connectors.

HINT:

*1: for LHD

*2: for RHD

b. Measure the voltage according to the value(s) in the ta le elow.

Standard Voltage:

for LH

Tester Connection	Condition	Specified Condition
c14-5 (+B) - Body ground	Always	11 to 14 V
c15- (S SB) - Body ground	Always	11 to 14 V

for RH

Tester Connection	Condition	Specified Condition
c26-5 (+B) - Body ground	Always	11 to 14 V
c27- (S SB) - Body ground	Always	11 to 14 V

c. Measure the resistance according to the value(s) in the ta le elow.

Standard Resistance:

for LH

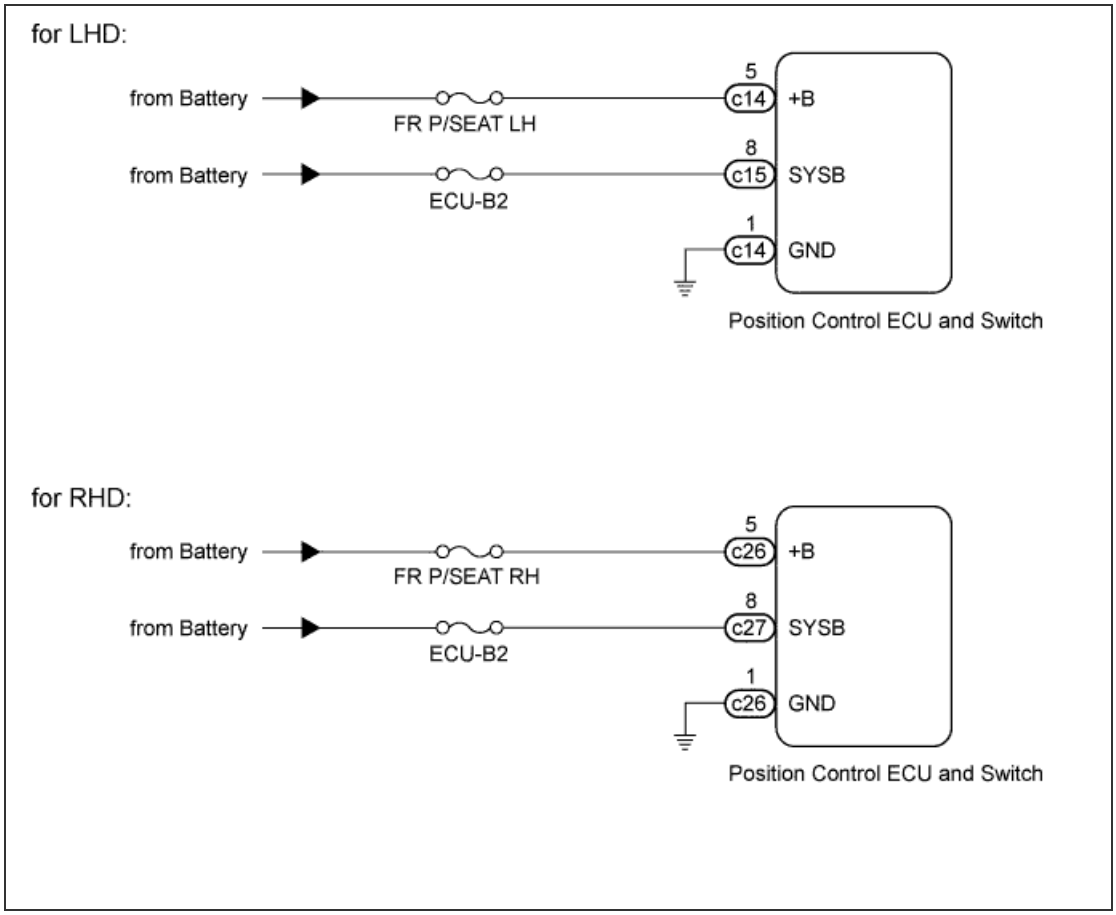
Tester Connection	Condition	Specified Condition
c14-1 (GND) - Body ground	Always	Below 1 Ω

for RH

Tester Connection	Condition	Specified Condition
c26-1 (GND) - Body ground	Always	Below 1 Ω

NG → REPAIR OR REPLACE HARNESS OR CONNECTOR

OK



REPLACE POSITION CONTROL ECU AN SWITCH (Click here)

for Preparation Click here

REPLACE POSITION CONTROL ECU AN SWITCH (Click here)

for Preparation Click here

DESCRIPTION

When the front power seat switch is operated, a command signal is sent to the position control ECU. The position control ECU then controls the appropriate seat motor as needed. The position control ECU is designed so that a malfunction of the seat memory system will not interfere with manual seat control.

WIRING DIAGRAM

INSPECTION PROCEDURE

1.CHECK FRONT POWER SEAT OPERATION

a. Check that each function of the power seat operates normally by using the front power seat switches.

Result

Result	Proceed to

All front power seat switch operations are malfunctioning except lumbar support switch operation	A
Only lumbar support switch operation is malfunctioning	B

B → Go to step 6

A

2.READ VALUE USING INTELLIGENT TESTER (FRONT POWER SEAT SWITCH)

a. Using the intelligent tester, read the Data List.

Driver Seat

Item	Measurement Item/Display (Range)	Normal Condition	Diagnostic Note
Reclining Rear	Reclining switch signal (Rearward) / ON or OFF	ON: Reclining switch (Rearward) on OFF: Reclining switch (Rearward) off	-
Reclining Front	Reclining switch signal (Forward) / ON or OFF	ON: Reclining switch (Forward) on OFF: Reclining switch (Forward) off	-
Front Vertical Down	Front vertical switch signal (Downward) / ON or OFF	ON: Front vertical switch (Downward) on OFF: Front vertical switch (Downward) off	-
Front Vertical Up	Front vertical switch signal (Upward) / ON or OFF	ON: Front vertical switch (Upward) on OFF: Front vertical switch (Upward) off	-

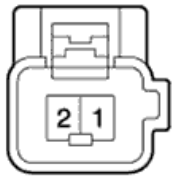
The power seat motors operate normally.

NG → Go to step 4

OK

REPLACE POSITION CONTROL ECU AND SWITCH (Click here)

4.INSPECT FRONT SEAT ASSEMBLY (FRONT POWER SEAT MOTOR)



a. Remove the front seat assembly LH (for LHD) (Click here).

b. Remove the front seat assembly RH (for RHD) (Click here).

c. Check operation of the slide motor.

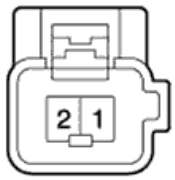
i. Check if the seat moves smoothly when the battery is connected to the slide motor connector terminals.

Component without harness connected:
(Slide Motor)

OK:

for LHD

Measurement Condition	Specified Condition
Battery positive (+) → 1 Battery negative (-) → 2	Forward
Battery positive (+) → 2 Battery negative (-) → 1	Rearward



for RHD

Measurement Condition	Specified Condition
Battery positive (+) → 2 Battery negative (-) → 1	Forward
Battery positive (+) → 1 Battery negative (-) → 2	Rearward

d. Check operation of the front vertical motor.

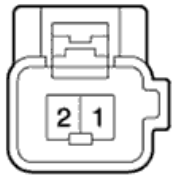
i. Check if the seat moves smoothly when the battery is connected to the front vertical motor connector terminals.

Component without harness connected:
(Front Vertical Motor)

OK:

for LHD

Measurement Condition	Specified Condition
Battery positive (+) → 1 Battery negative (-) → 2	Upward
Battery positive (+) → 2 Battery negative (-) → 1	Downward



for RHD

Measurement Condition	Specified Condition
Battery positive (+) → 2 Battery negative (-) → 1	Upward
Battery positive (+) → 1 Battery negative (-) → 2	Downward

e. Check operation of the lifter motor.

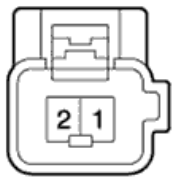
i. Check if the seat moves smoothly when the battery is connected to the lifter motor connector terminals.

Component without harness connected:
(Lifter Motor)

OK:

for LHD

Measurement Condition	Specified Condition
Battery positive (+) → 2 Battery negative (-) → 1	Upward
Battery positive (+) → 1 Battery negative (-) → 2	Downward



for RHD

Measurement Condition	Specified Condition
Battery positive (+) → 1 Battery negative (-) → 2	Upward
Battery positive (+) → 2 Battery negative (-) → 1	Downward

f. Check operation of the reclining motor.

i. Check if the seat moves smoothly when the battery is connected to the reclining motor connector terminals.

Component without harness connected:
(Reclining Motor)

OK:

Measurement Condition	Specified Condition
Battery positive (+) → 2 Battery negative (-) → 1	Forward
Battery positive (+) → 1 Battery negative (-) → 2	Rearward

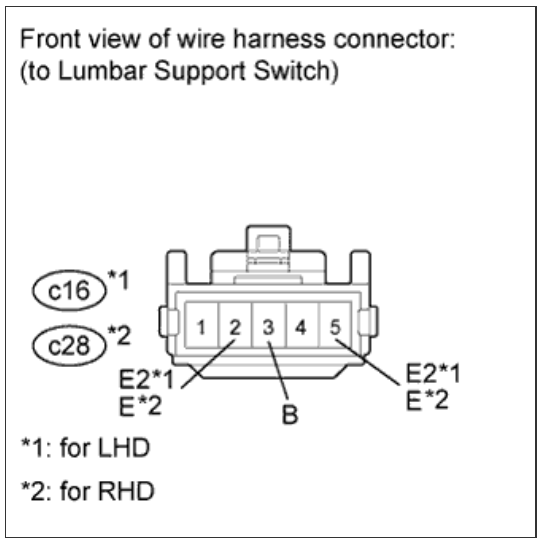
NG → REPLACE LUMBAR SUPPORT ADJUSTER ASSEMBLY (Click here)

OK

8.CHECK HARNESS AND CONNECTOR (LUMBAR SUPPORT SWITCH - BATTERY AND BODY GROUND)



a. Disconnect the c16*1 or c28*2 switch connector.

HINT:

*1: for LHD

*2: for RHD

b. Measure the voltage according to the value(s) in the table below.

Standard Voltage:

for LHD

Tester Connection	Condition	Specified Condition
c16-3 (B) - Body ground	Always	11 to 14 V

for RHD

Tester Connection	Condition	Specified Condition
c2 - (B) - Body ground	Always	11 to 14 V

c. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

for LHD

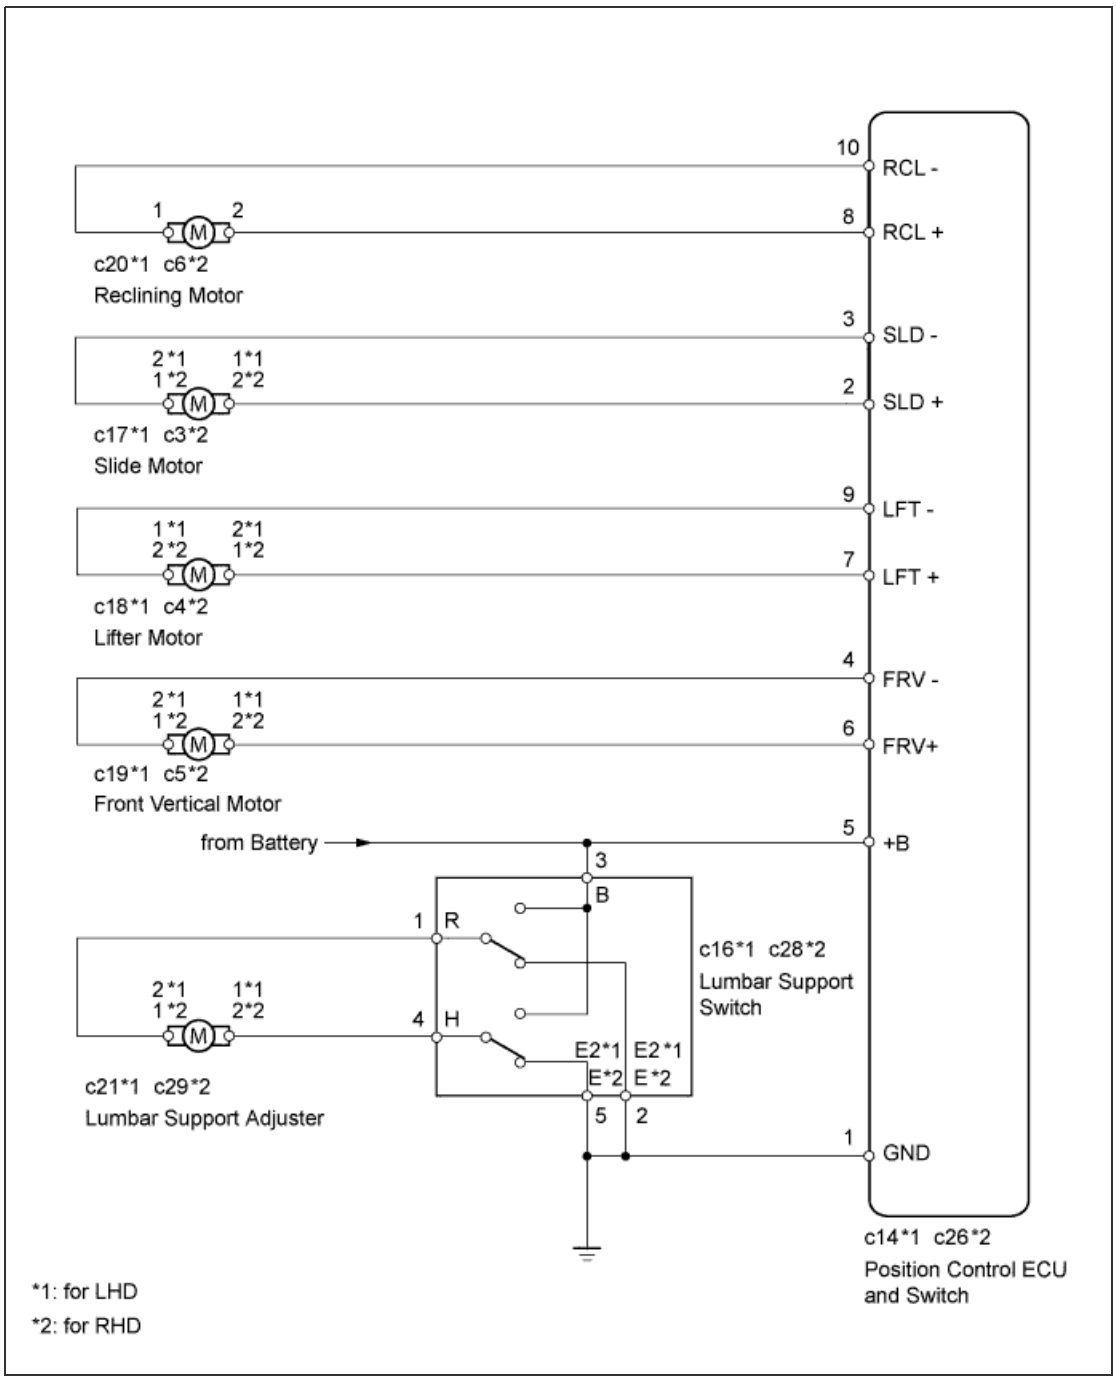
Tester Connection	Condition	Specified Condition
c16-5 (E2) - Body ground	Always	Below 1 Ω
c16-2 (E2) - Body ground		

for RHD

Tester Connection	Condition	Specified Condition
c28-5 (E) - Body ground	Always	Below 1 Ω
c28-2 (E) - Body ground		

NG → REPAIR OR REPLACE HARNESS OR CONNECTOR

OK



REPAIR OR REPLACE HARNESS OR CONNECTOR (LUMBAR SUPPORT SWITCH - LUMBAR SUPPORT ADJUSTER ASSEMBLY)

for Preparation Click here

DESCRIPTION

When the seat memory SET switch and a seat memory switch (seat memory switch 1, seat memory switch 2 or seat memory switch 3) are pressed simultaneously, the outer mirror control ECU commands the position control ECU and switch through CAN communication to record each position value.

WIRING DIAGRAM

INSPECTION PROCEDURE

NOTICE:

First perform the communication function inspections in How to Proceed with Troubleshooting to confirm that there are no CAN communication malfunctions before troubleshooting this symptom.

1.CHECK FRONT POWER SEAT CONTROL FUNCTION

a. Check that each function of the power seat operates normally by using the front power seat switches.

OK:
Each function of power seat operates normally by using seat switches.

NG → GO TO PROBLEM SYMPTOMS TABLE (Click here)

OK

2.CHECK SEAT MEMORY SWITCH FUNCTION

a. Perform a memory operation properly. Check that the buzzer sounds to indicate the completion of the memory operation.

NOTICE:

- **The seat position will not be recorded if the seat memory SET switch and 2 or more of the seat memory switches (for example, seat memory switch 1 and seat memory switch 2) are pressed simultaneously.**
- **If a memorizing operation has failed, release all switches. The seat memory function does not operate unless the switches are released.**

OK:
Seat memory switch function operates normally.

NG → Go to step 3

OK

END

3.CHECK COMBINATION METER FUNCTION

a. When the engine switch is on (IG) and the shift lever is in P, check that the combination meter shows that the shift lever is in P.

OK:
Meter shows that shift lever is in P.

NG → GO TO METER / GAUGE SYSTEM (Click here)

OK

4.READ VALUE USING INTELLIGENT TESTER (SEAT MEMORY SWITCH)

a. Check the Data List for proper functioning of the seat memory switch.

Driver Seat

Tester Display	Measurement Item/Range	Normal Condition	Diagnostic Note
SET Switch	Seat memory SET switch signal / ON or OFF	ON: Seat memory SET switch on OFF: Seat memory SET switch off	-
M1 Switch	Seat memory switch 1 signal / ON or OFF	ON: Seat memory switch 1 on OFF: Seat memory switch 1 off	-
M2 Switch	Seat memory switch 2 signal / ON or OFF	ON: Seat memory switch 2 on OFF: Seat memory switch 2 off	-
M3 Switch	Seat memory switch 3 signal / ON or OFF	ON: Seat memory switch 3 on OFF: Seat memory switch 3 off	-

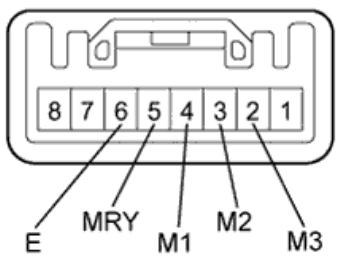
OK:
On intelligent tester screen, each item changes between ON and OFF according to above chart.

NG → Go to step 5

OK

REPLACE POSITION CONTROL ECU AND SWITCH (Click here)

5.INSPECT SEAT MEMORY SWITCH



a. Remove the seat memory switch (Click here).

b. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

Tester Connection	Switch Condition	Specified Condition
4 (M1) - 6 (E)	Seat memory switch 1 pressed	Below 1 Ω
3 (M2) - 6 (E)	Seat memory switch 2 pressed	Below 1 Ω
2 (M3) - 6 (E)	Seat memory switch 3 pressed	Below 1 Ω
5 (MRY) - 6 (E)	Seat memory SET switch pressed	Below 1 Ω

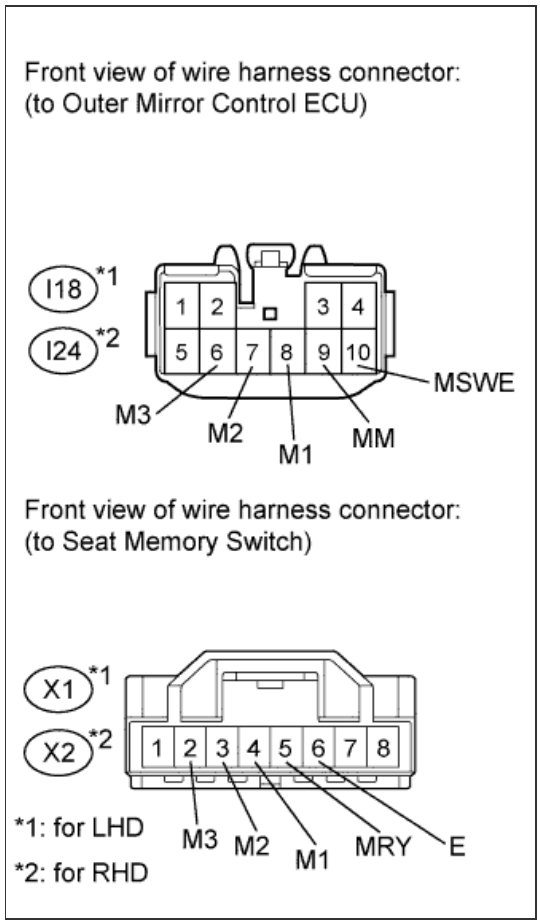
Component without harness connected:
(Seat Memory Switch)

NG → REPLACE SEAT MEMORY SWITCH (Click here)

OK

6.CHECK HARNESS AND CONNECTOR (OUTER MIRROR CONTROL ECU - SEAT MEMORY SWITCH)

a. Disconnect the I18*1 or I24*2 ECU connector.



b. Disconnect the X1*1 or X2*2 switch connector.

HINT:

*1: for LHD

*2: for RHD

c. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

for LHD

Tester Connection	Condition	Specified Condition
I18-8 (M1) - X1-4 (M1)	Always	Below 1 Ω
I18-7 (M2) - X1-3 (M2)	Always	Below 1 Ω
I18-6 (M3) - X1-2 (M3)	Always	Below 1 Ω
I18-9 (MM) - X1-5 (MRY)	Always	Below 1 Ω
I18-10 (MSWE) - X1-6 (E)	Always	Below 1 Ω
I18-8 (M1) - Body ground	Always	10 kΩ or higher
I18-7 (M2) - Body ground	Always	10 kΩ or higher
I18-6 (M3) - Body ground	Always	10 kΩ or higher
I18-9 (MM) - Body ground	Always	10 kΩ or higher
I18-10 (MSWE) - Body ground	Always	10 kΩ or higher

for RHD

Tester Connection	Condition	Specified Condition
I24-8 (M1) - X2-4 (M1)	Always	Below 1 Ω
I24-7 (M2) - X2-3 (M2)	Always	Below 1 Ω
I24-6 (M3) - X2-2 (M3)	Always	Below 1 Ω
I24-9 (MM) - X2-5 (MRY)	Always	Below 1 Ω
I24-10 (MSWE) - X2-6 (E)	Always	Below 1 Ω
I24-8 (M1) - Body ground	Always	10 kΩ or higher
I24-7 (M2) - Body ground	Always	10 kΩ or higher
I24-6 (M3) - Body ground	Always	10 kΩ or higher
I24-9 (MM) - Body ground	Always	10 kΩ or higher
I24-10 (MSWE) - Body ground	Always	10 kΩ or higher

NG → REPAIR OR REPLACE HARNESS OR CONNECTOR

OK

7.CHECK OUTER MIRROR CONTROL ECU (OPERATION)

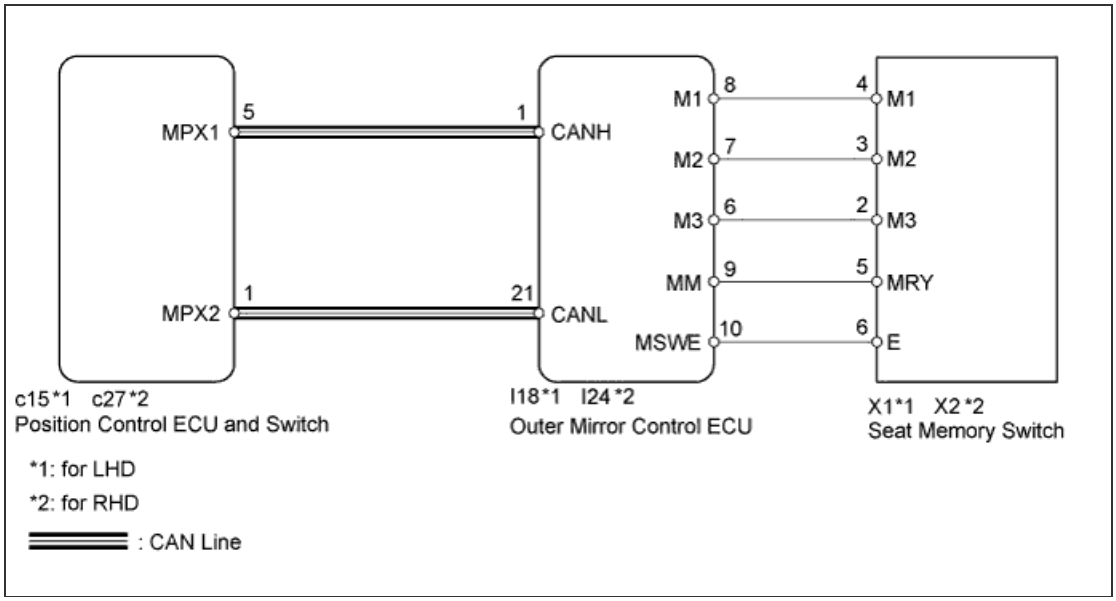
a. After replacing the outer mirror control ECU, check that the front power seat control functions operate normally using the front seat switches and seat memory switch.

OK:

Front power seat control functions operate normally.

NG → REPLACE POSITION CONTROL ECU AND SWITCH (Click here)

OK



END (REPLACE OUTER MIRROR CONTROL ECU) (Click here)

for Preparation Click here

DESCRIPTION

When the seat memory SET switch and a seat memory switch (seat memory switch 1, seat memory switch 2 or seat memory switch 3) are pressed simultaneously, the outer mirror control ECU commands the position control ECU and switch through CAN communication to record each position value.

WIRING DIAGRAM

INSPECTION PROCEDURE

NOTICE:

NG → REPAIR OR REPLACE HARNESS OR CONNECTOR

OK

7.CHECK OUTER MIRROR CONTROL ECU (OPERATION)

a. After replacing the outer mirror control ECU, check that the front power seat control functions operate normally using the front seat switches and seat memory switch.

OK:

Front power seat control functions operate normally.

NG → REPLACE POSITION CONTROL ECU AND SWITCH (Click here)

OK

END (REPLACE OUTER MIRROR CONTROL ECU) (Click here)

for Preparation Click here

DESCRIPTION

With the engine switch off and the driver door closed, press the transmitter lock or unlock switch while holding a seat memory switch (seat memory switch 1, seat memory switch 2 or seat memory switch 3). Doing so will register the transmitter recognition code into the seat memory switch that was pressed. After the registration is complete, the answer-back buzzer sounds.

INSPECTION PROCEDURE

1.CHECK WIRELESS DOOR LOCK CONTROL FUNCTIONS

a. Using the standard operation procedure, check that the wireless door lock/unlock operates normally.

OK:
Wireless door lock/unlock operates normally.

HINT:

The standard operating procedure is as follows:

Hold the transmitter approximately 1 m (3.28 ft.) from the driver door outside handle. Press and hold the transmitter lock or unlock switch for 1 second.

NG → GO TO WIRELESS DOOR LOCK CONTROL SYSTEM (Click here)

OK

2.CHECK POWER DOOR LOCK CONTROL FUNCTION

a. Using the standard operation procedure, check that the power door lock/unlock operates normally.

OK:
Power door lock/unlock operates normally.

NG → GO TO POWER DOOR LOCK CONTROL SYSTEM (Click here)

OK

3.CHECK SEAT MEMORY SWITCH FUNCTION (SEAT POSITION MEMORY FUNCTION)

a. Perform a memory operation properly. Check that the buzzer sounds to indicate the completion of the memory operation.

NOTICE:

- **The seat position will not be recorded if the seat memory SET switch and 2 or more of the seat memory switches (for example, seat memory switch 1 and seat memory switch 2) are pressed simultaneously.**
- **If a memorizing operation has failed, release all switches. The seat memory function does not operate unless the switches are released.**

OK:
Seat memory switch function operates normally.

NG → GO TO PRO LEM SYMPTOMS TA LE (Click here)

OK

4.CHECK MEMORY CALL FUNCTION (REGISTER RECOGNITION CODE)

a. While pressing the seat memory switch 1, seat memory switch 2 or seat memory switch 3, press the transmitter lock or unlock switch. Then check that the buzzer sounds normally.

OK:
uzzer sounds normally.

NG → REPLACE POSITION CONTROL ECU AND SWITCH (Click here)

OK

END

for Preparation Click here

DESCRIPTION

With the engine switch off and the driver door closed, press the transmitter lock or unlock switch while holding a seat memory switch (seat memory switch 1, seat memory switch 2 or seat memory switch 3). Doing so will register the transmitter recognition code into the seat memory switch that was pressed. After the registration is complete, the answer-back buzzer sounds.

INSPECTION PROCEDURE

1.CHECK WIRELESS DOOR LOCK CONTROL FUNCTIONS

a. Using the standard operation procedure, check that the wireless door lock/unlock operates normally.

OK:
Wireless door lock/unlock operates normally.

HINT:

The standard operating procedure is as follows:

Hold the transmitter approximately 1 m (3.28 ft.) from the driver door outside handle. Press and hold the transmitter lock or unlock switch for 1 second.

NG → GO TO WIRELESS DOOR LOCK CONTROL SYSTEM (Click here)

OK

2.CHECK POWER DOOR LOCK CONTROL FUNCTION

a. Using the standard operation procedure, check that the power door lock/unlock operates normally.

OK:
Power door lock/unlock operates normally.

NG → GO TO POWER DOOR LOCK CONTROL SYSTEM (Click here)

OK

3.CHECK SEAT MEMORY SWITCH FUNCTION (SEAT POSITION MEMORY FUNCTION)

a. Perform a memory operation properly. Check that the buzzer sounds to indicate the completion of the memory operation.

NOTICE:

- **The seat position will not be recorded if the seat memory SET switch and 2 or more of the seat memory switches (for example, seat memory switch 1 and seat memory switch 2) are pressed simultaneously.**
- **If a memorizing operation has failed, release all switches. The seat memory function does not operate unless the switches are released.**

OK:
Seat memory switch function operates normally.

NG → GO TO PRO LEM SYMPTOMS TA LE (Click here)

OK

4.CHECK MEMORY CALL FUNCTION (REGISTER RECOGNITION CODE)

a. While pressing the seat memory switch 1, seat memory switch 2 or seat memory switch 3, press the transmitter lock or unlock switch. Then check that the buzzer sounds normally.

OK:
uzzer sounds normally.

NG → REPLACE POSITION CONTROL ECU AND SWITCH (Click here)

OK

END

for Preparation Click here

DESCRIPTION

When a door is unlocked, the certification ECU (smart key ECU) sends a door unlock signal and key signal to the position control ECU and switch. When the position control ECU and switch receives the door unlock signal, it stores the key When the driver door is opened, the memory call and memory command information of the stored key is sent to each driving position related control ECU. Each control ECU receives the memory commands and performs the memory call operation according to predetermined control timing values.

INSPECTION PROCEDURE

1.CHECK ENTRY UNLOCK FUNCTION AND WIRELESS UNLOCK FUNCTION

a. Check that the driver side door unlocks when holding the driver side door outside handle, or when pressing the transmitter unlock switch.

OK:
Driver side door unlocks normally.

NG → GO TO ENTRY AND START SYSTEM OR WIRELESS DOOR LOCK CONTROL SYSTEM

OK

2.CHECK POWER SEAT CONTROL FUNCTION

a. Manually operate the driver seat power seat switches, and check if the seat operates normally.

OK:
Seat operates normally through manual operation.

NG → GO TO PROBLEM SYMPTOMS TABLE (Click here)

OK

3.CHECK SEAT MEMORY SWITCH FUNCTION (SEAT POSITION MEMORY FUNCTION)

a. Perform a memory operation properly. Check that the buzzer sounds to indicate the completion of the memory operation.

NOTICE:

- **The seat position will not be recorded if the seat memory SET switch and 2 or more of the seat memory switches (for example, seat memory switch 1 and seat memory switch 2) are pressed simultaneously.**
- **If a memorizing operation has failed, release all switches. The seat memory function does not operate unless the switches are released.**

OK:
Seat memory switch function operates normally.

NG → GO TO PROBLEM SYMPTOMS TABLE (Click here)

OK

4.CHECK SEAT MEMORY SWITCH FUNCTION (SEAT RESTORING OPERATION)

a. Press the seat memory switch 1, seat memory switch 2 or seat memory switch 3 and check that the seat moves to a recorded position.

OK:
Seat moves to recorded position.

NG → GO TO PROBLEM SYMPTOMS TABLE (Click here)

OK

5.CHECK MEMORY CALL FUNCTION (REGISTER RECOGNITION CODE)

a. While pressing the seat memory switch 1, seat memory switch 2 or seat memory switch 3, press the transmitter lock or unlock switch. Then check that the buzzer sounds normally.

OK:
Buzzer sounds normally.

NG → GO TO PROBLEM SYMPTOMS TABLE (Click here)

OK

6.CHECK MEMORY CALL FUNCTION (SEAT MEMORY CALL)

a. With a recognition code stored in memory, open the driver door by performing an entry unlock operation or by pressing the transmitter unlock switch. Check that the driver side power seat moves to the memorized position.

OK:
Driver side power seat moves to the memorized position.

NG → REPLACE POSITION CONTROL ECU AND SWITCH (Click here)

OK

END

for Preparation Click here

DESCRIPTION

When a door is unlocked, the certification ECU (smart key ECU) sends a door unlock signal and key signal to the position control ECU and switch. When the position control ECU and switch receives the door unlock signal, it stores the key When the driver door is opened, the memory call and memory command information of the stored key is sent to each driving position related control ECU. Each control ECU receives the memory commands and performs the memory call operation according to predetermined control timing values.

INSPECTION PROCEDURE

1.CHECK ENTRY UNLOCK FUNCTION AND WIRELESS UNLOCK FUNCTION

a. Check that the driver side door unlocks when holding the driver side door outside handle, or when pressing the transmitter unlock switch.

OK:
Driver side door unlocks normally.

NG → GO TO ENTRY AND START SYSTEM OR WIRELESS DOOR LOCK CONTROL SYSTEM

OK

2.CHECK POWER SEAT CONTROL FUNCTION

a. Manually operate the driver seat power seat switches, and check if the seat operates normally.

OK:
Seat operates normally through manual operation.

NG → GO TO PROBLEM SYMPTOMS TABLE (Click here)

OK

3.CHECK SEAT MEMORY SWITCH FUNCTION (SEAT POSITION MEMORY FUNCTION)

a. Perform a memory operation properly. Check that the buzzer sounds to indicate the completion of the memory operation.

NOTICE:

- **The seat position will not be recorded if the seat memory SET switch and 2 or more of the seat memory switches (for example, seat memory switch 1 and seat memory switch 2) are pressed simultaneously.**

CHECK POWER SEAT FUNCTION

a. Check the basic functions.

i. Operate the power seat switches and check to make sure each seat function works:

- Sliding
- Front vertical
- Lifter
- Reclining
- Lumbar support (driver seat only)

CHECK POWER SEAT MOTOR ASSEMBLY (SLIDING, FRONT VERTICAL, LIFTER, AND RECLINING FUNCTIONS)

a. Check the PTC operation inside the power seat motor.

HINT:

The resistance of the PTC thermistor increases when the power seat switch is held down even after the seat has been moved to the farthest possible position in one direction. If the resistance increases beyond a specified level, the current is shut off to prevent a short circuit.

NOTICE:

- **The inspection should be performed with the seat installed in the vehicle.**
- **Perform the 4 steps below to check the full range of motion for each power seat function.**

i. Choose a power seat function. Operate the power seat switch and move the seat to the farthest possible position in one direction. Keep the seat in that position for approximately 60 seconds.

ii. Operate the power seat switch again and continue to try to move the seat in the same direction as in the previous step. Measure the time until the current is shut off (motor operation sound will stop).

Standard:
4 to 90 seconds

iii. After the current is shut off, release the power seat switch and wait for approximately 60 seconds.

iv. Operate the same power seat switch and move the seat in the opposite direction. Check that the motor operates.

CHECK LUMBAR SUPPORT ADJUSTER ASSEMBLY

a. Check the PTC operation inside the power seat motor.

NOTICE:

The inspection should be performed with the seat installed in the vehicle.

i. Operate the lumbar support switch and move the lumbar support to either the foremost or rearmost position. Keep the seat in that

position for approximately 60 seconds.

ii. Operate the lumbar support switch again and continue to try to move the lumbar support in the same direction as in the previous step. Measure the time until the current is shut off (motor operation sound will stop).

Standard:
4 to 90 seconds

iii. After the current is shut off, release the lumbar support switch and wait for approximately 60 seconds.

iv. Operate the lumbar support switch and move the seat in the opposite direction. Check that the motor operates.

GENERAL

a. By operating the seat heater switch which is located in the console box, the temperature can be controlled within the range of 30 to 40°C (86 to 104°F).

b. Whether the seat heater is on or off can be determined by checking if the seat heater switch indicator light is on or off.

c. The seat heaters of both seats are controlled by the seat heater controls, which are located under the respective seat.

1. INSPECT SEAT HEATER CONTROL SUB-ASSEMBLY (for Front Side)

a. Disconnect the c13 and c1 heater control connectors.

b. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

for LH Side

Tester Connection	Specified Condition
c13-6 (E) - Body ground	Below 1 Ω

for RH Side

Tester Connection	Specified Condition
c1-6 (E) - Body ground	Below 1 Ω

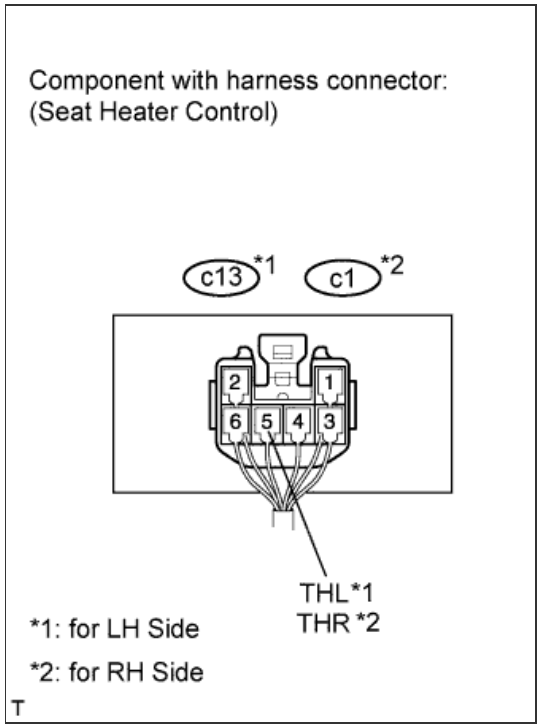
If the result is not as specified, there may be a malfunction on the wire harness side.

c. Measure the voltage according to the value(s) in the table below.

Standard Voltage:

for LH Side

Tester Connection	Switch Condition	Specified Condition
c13-1 (SWL) - c13-6 (E)	Engine switch on (IG), seat heater switch off	Below 1 V
	Engine switch on (IG), seat heater switch on	11 to 14 V
c13-4 (B) - c13-6 (E)	Engine switch off	Below 1 V
	Engine switch on (IG)	11 to 14 V



for RH Side

Tester Connection	Switch Condition	Specified Condition
c1-1 (SWR) - c1-6 (E)	Engine switch on (IG), seat heater switch off	Below 1 V
	Engine switch on (IG), seat heater switch on	11 to 14 V
c1-4 (B1) - c1-6 (E)	Engine switch off	Below 1 V
	Engine switch on (IG)	11 to 14 V

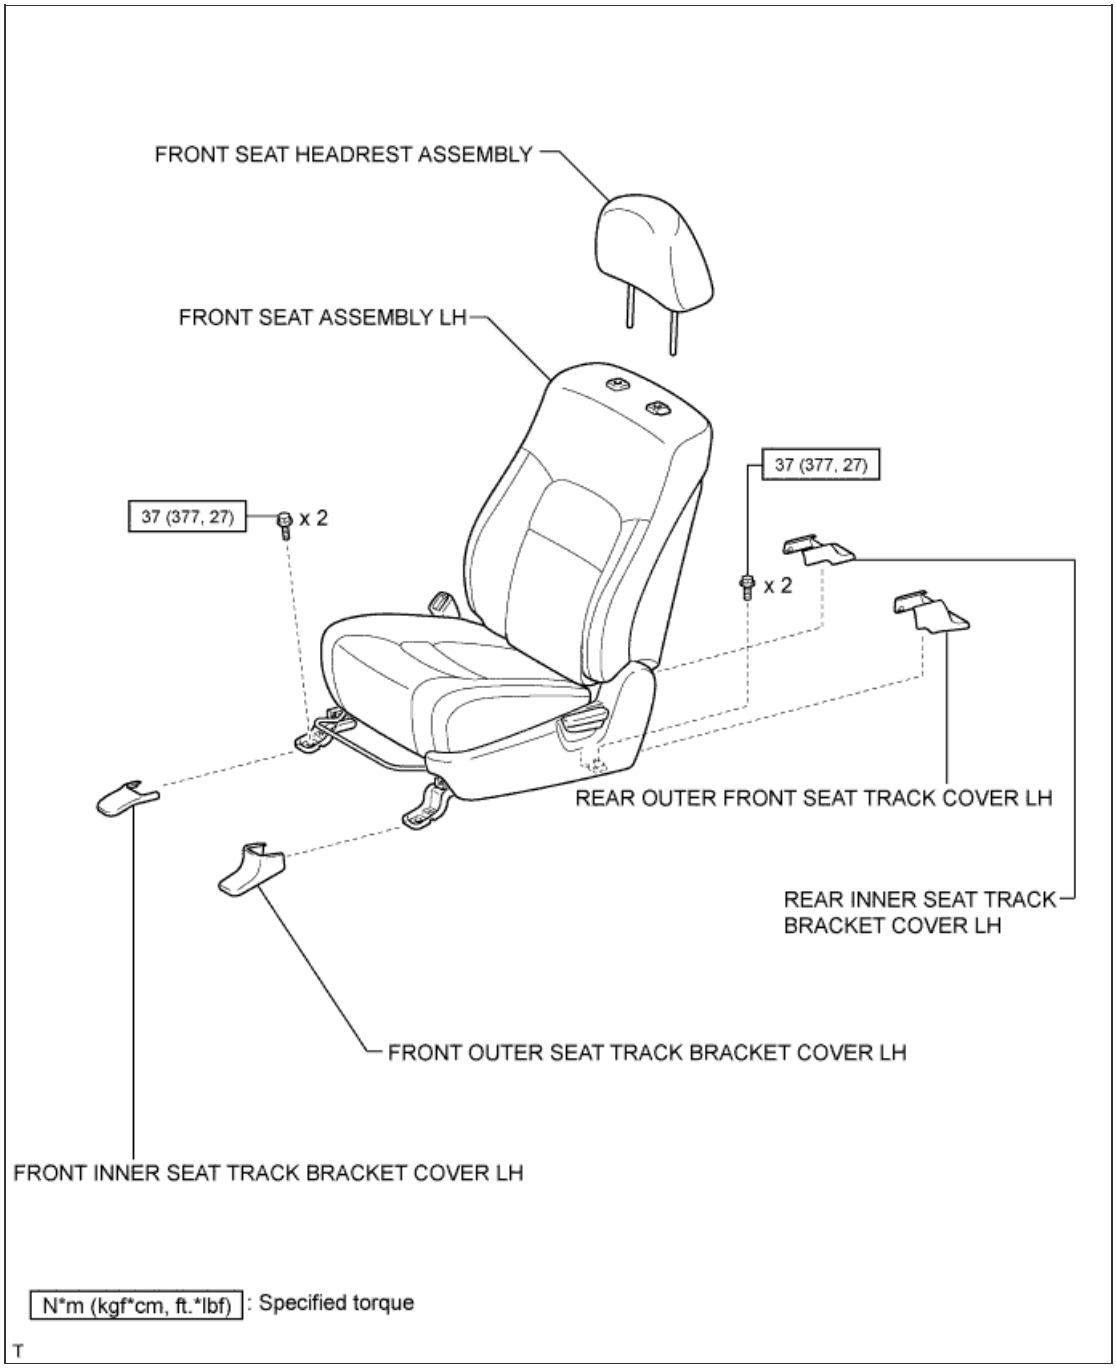
If the result is not as specified, there may be a malfunction on the wire harness side.

d. Connect the c13 and c1 heater control connectors.

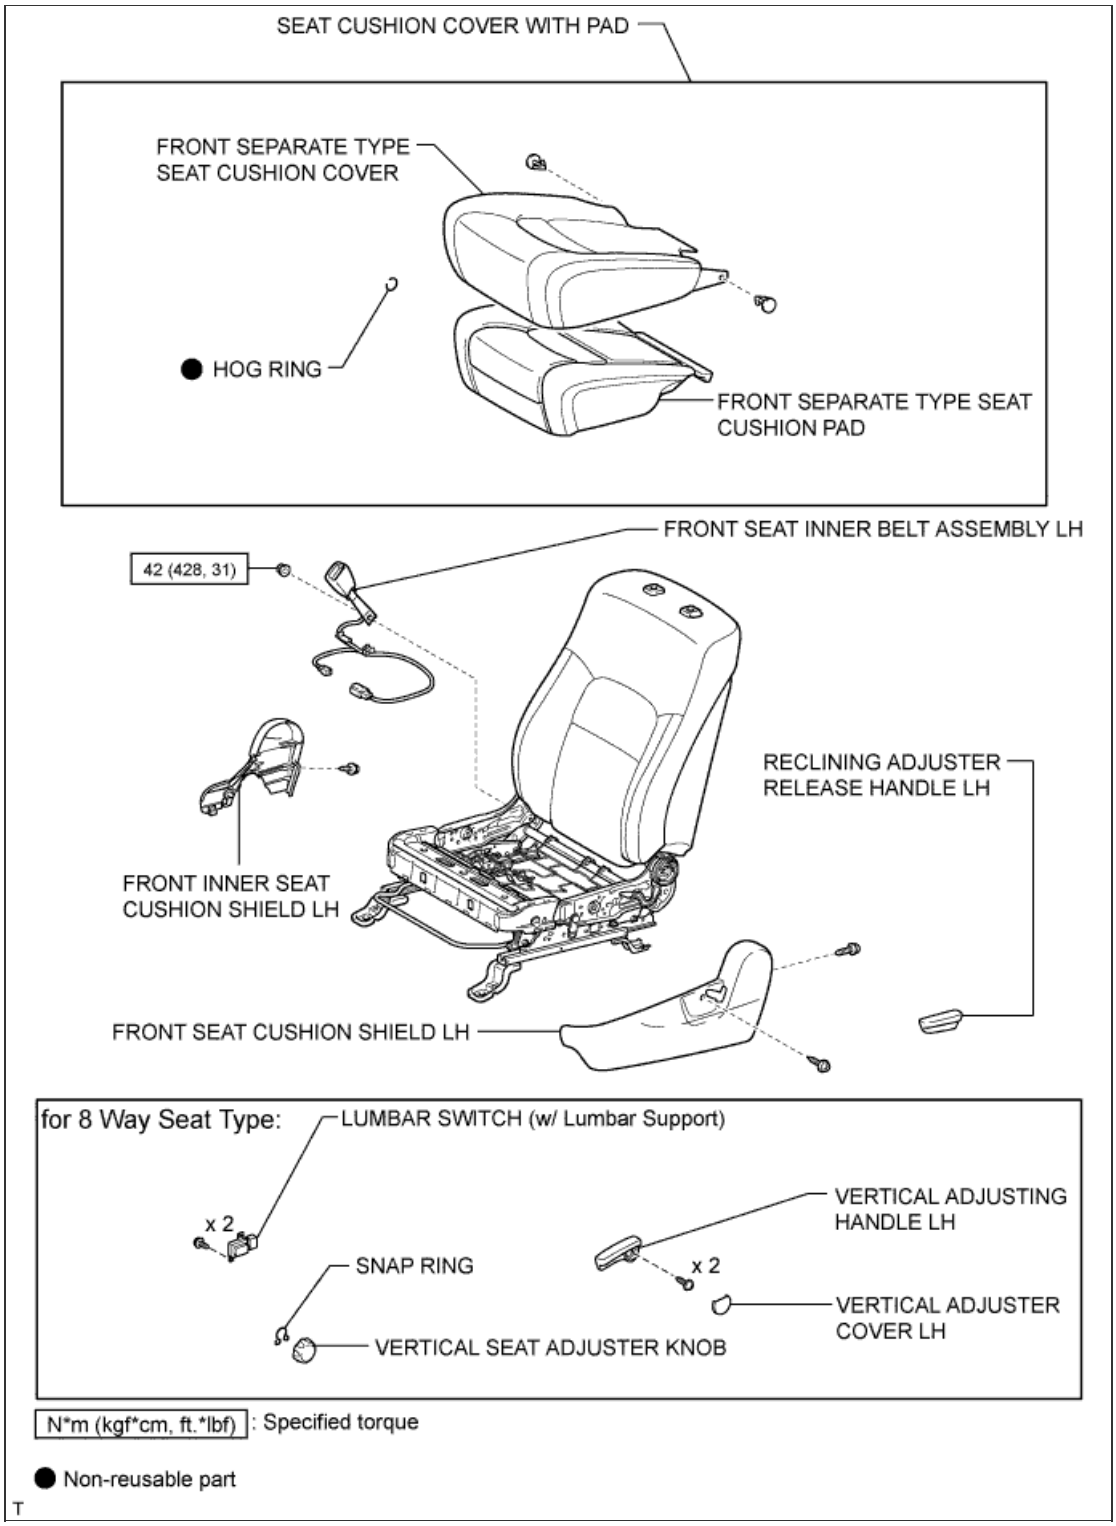
e. Measure the voltage according to the value(s) in the table below.

Standard Voltage:

for LH Side

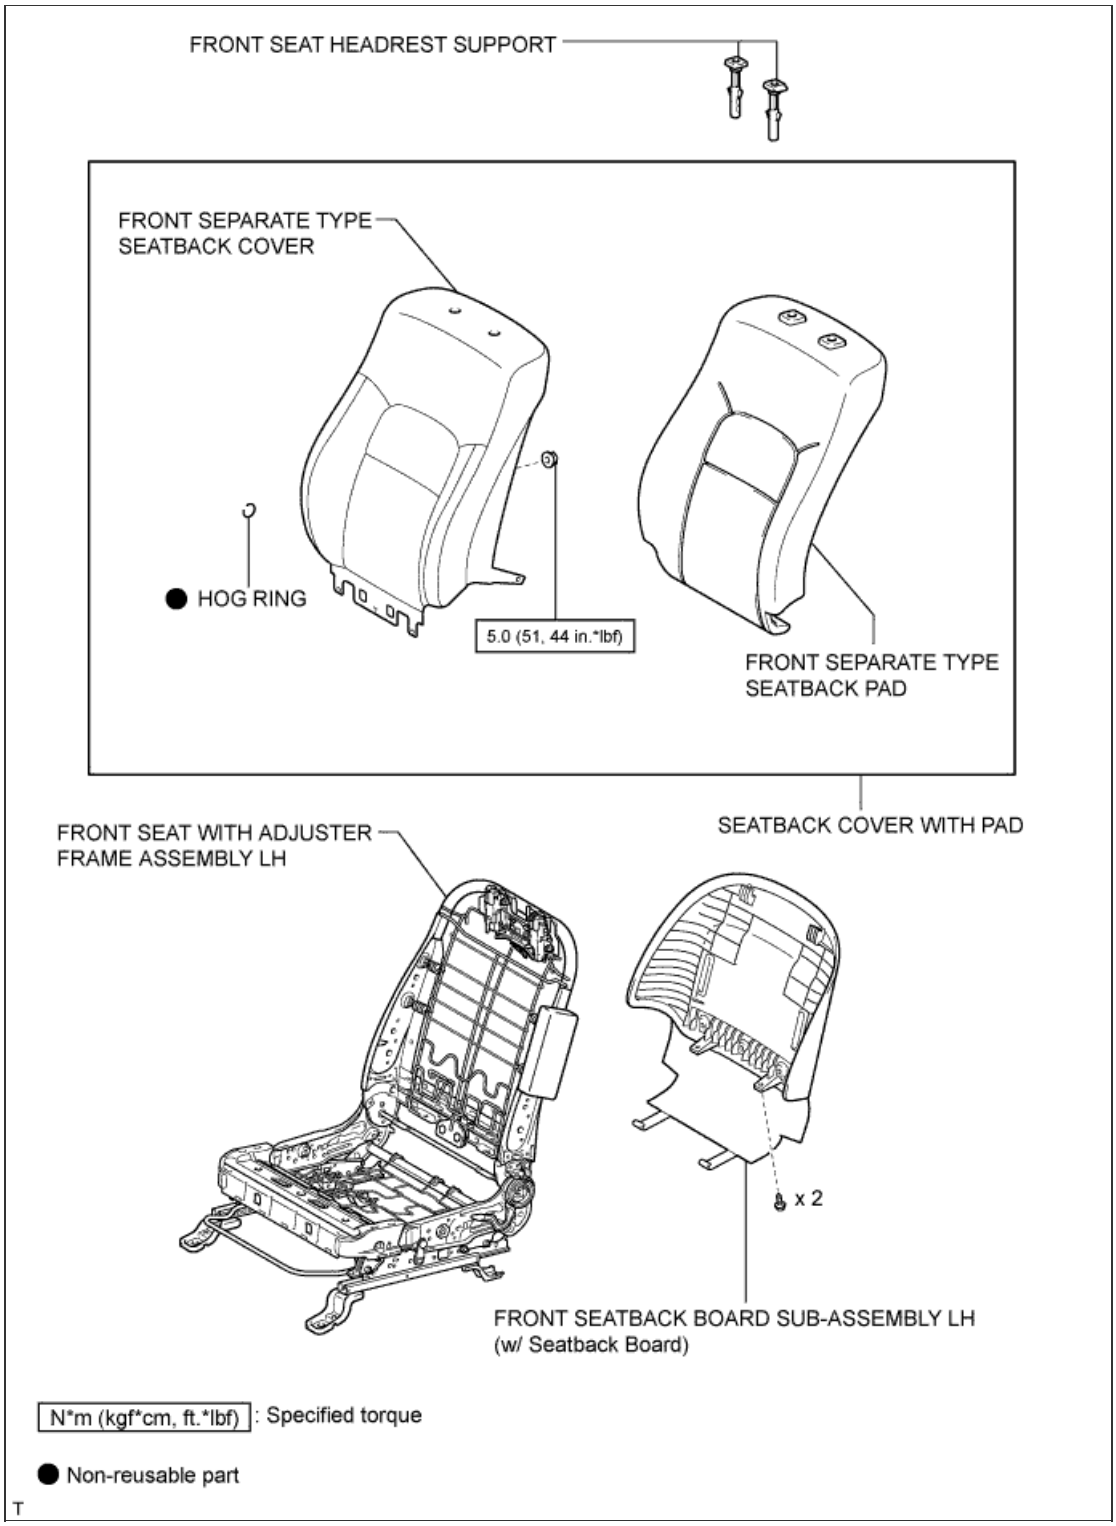


Tester Connection	Switch Condition	Specified Condition
c13-5 (THL) - Body ground	Engine switch on (IG), seat heater switch on, volume Min→ Max	Gradual increase from below 1 V to 11 to 14 V



for RH Side

Tester Connection	Switch Condition	Specified Condition
c1-5 (THR) - Body ground	Engine switch on (IG), seat heater switch on, volume Min → Max	Gradual increase from below 1 V to 11 to 14 V



If the result is not as specified, the seat heater control may have a malfunction.

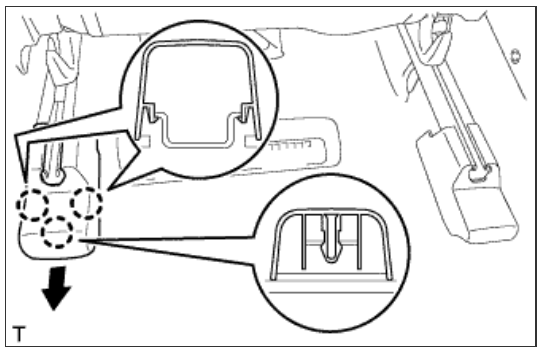
HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. REMOVE FRONT SEAT HEADREST ASSEMBLY



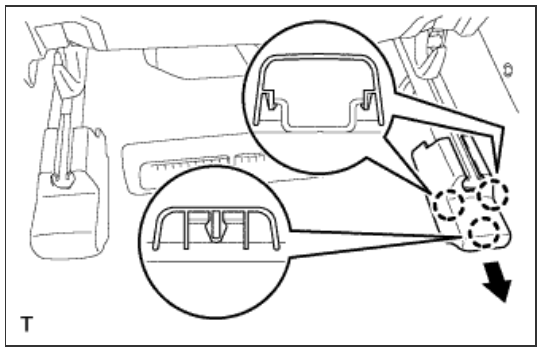
2. REMOVE REAR OUTER FRONT SEAT TRACK COVER LH

a. Operate the seat track adjusting handle to move the seat to the foremost position.

b. Using a screwdriver, detach the 3 claws and remove the cover.

HINT:

Tape the screwdriver tip before use.

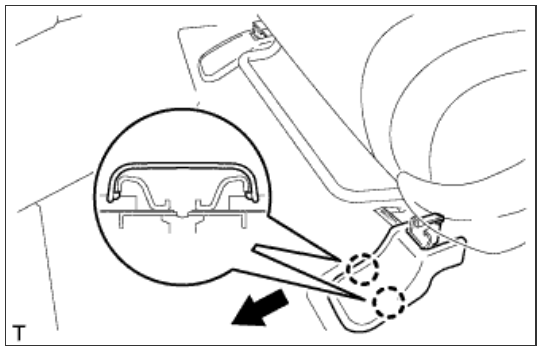


3. REMOVE REAR INNER SEAT TRACK BRACKET COVER LH

a. Using a screwdriver, detach the 3 claws and remove the cover.

HINT:

Tape the screwdriver tip before use.



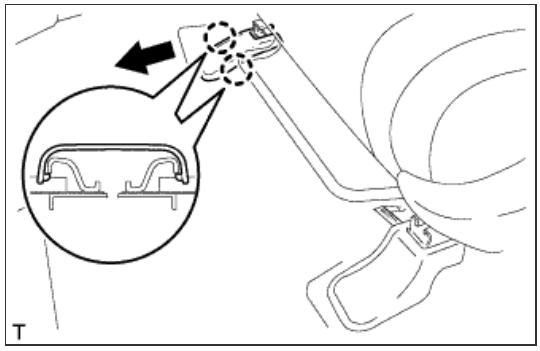
4. REMOVE FRONT OUTER SEAT TRACK BRACKET COVER LH

a. Operate the seat track adjusting handle to move the seat to the rearmost position.

b. Using a screwdriver, detach the 2 claws and remove the cover.

HINT:

Tape the screwdriver tip before use.



5. REMOVE FRONT INNER SEAT TRACK BRACKET COVER LH

a. Using a screwdriver, detach the 2 claws and remove the cover.

HINT:

Tape the screwdriver tip before use.

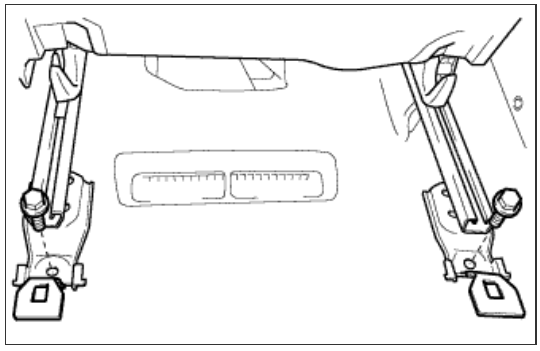
6. REMOVE FRONT SEAT ASSEMBLY LH

a. Disable the Autoaway/Return function by changing the customize parameter (Click here).

NOTICE:

Record the current customize parameter setting (whether the Autoaway/Return function is enabled or disabled) in order to restore the current setting after finishing the operation.

HINT:



Performing the above operation causes the Autoaway/Return function to be disabled when the engine switch is turned off.

b. Turn the engine switch on (IG). Operate the tilt and telescopic switch to fully retract and tilt up the steering column assembly.

c. Turn the engine switch off.

d. Remove the 2 bolts.

e. Operate the seat track adjusting handle to move the seat to the foremost position.

f. Remove the 2 bolts.

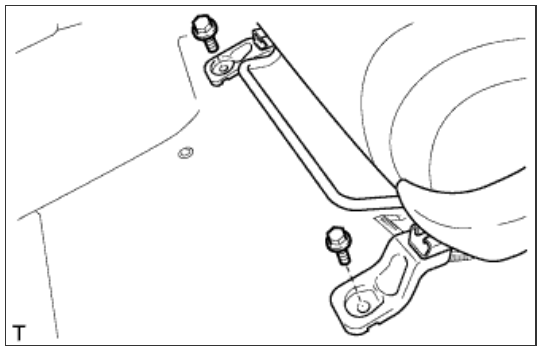
g. Operate the seat track adjusting handle to move the seat to the center position, and operate the reclining adjusting handle and move the seatback to the upright position.

h. Disconnect the cable from the negative (-) battery terminal.

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

NOTICE:



When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

i. Disconnect the connectors under the seat.

j. Remove the front seat assembly.

NOTICE:

Be careful not to damage the vehicle body.

CAUTION:

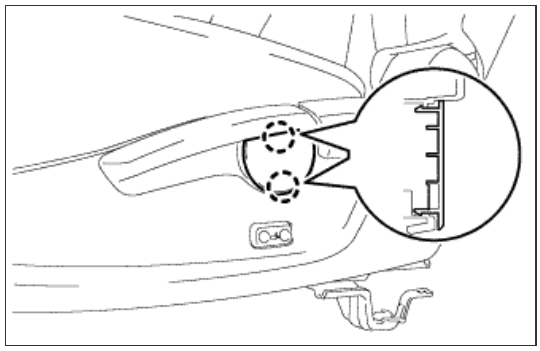
Wear protective gloves. Sharp areas on the parts may injure your hands.

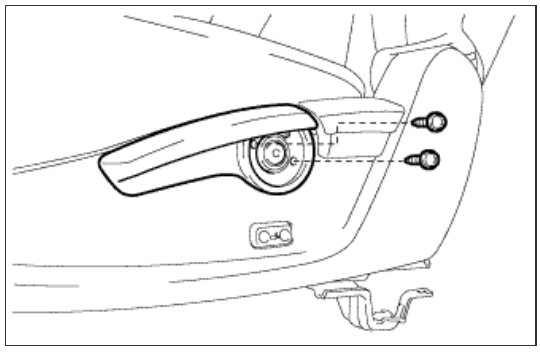
HINT:



- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

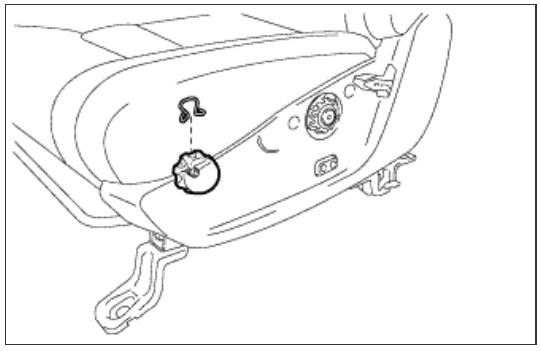
1. REMOVE VERTICAL ADJUSTER COVER LH (for 8 Way Seat Type)

a. Using a screwdriver, detach the 2 claws and remove the vertical adjuster cover.



HINT:

Tape the screwdriver tip before use.

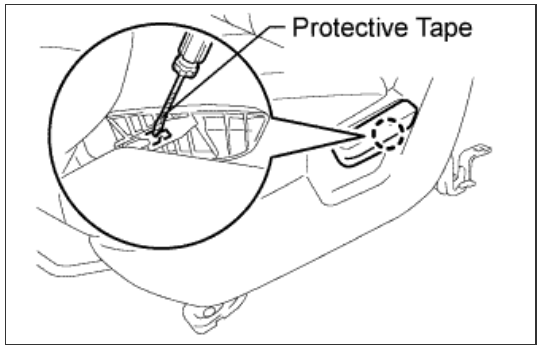


2. REMOVE VERTICAL ADJUSTING HANDLE LH (for 8 Way Seat Type)

a. Remove the 2 screws and vertical adjusting handle.

3. REMOVE VERTICAL SEAT ADJUSTER KNOB (for 8 Way Seat Type)

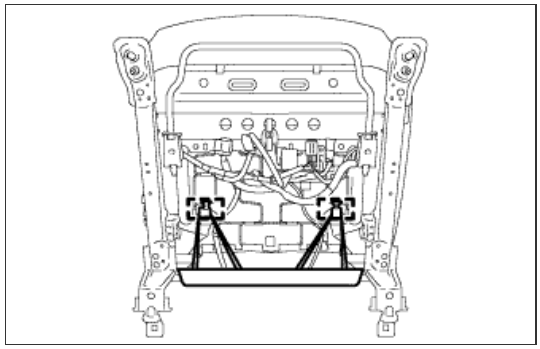
a. Remove the snap ring and vertical seat adjuster knob.



4. REMOVE RECLINING ADJUSTER RELEASE HANDLE LH

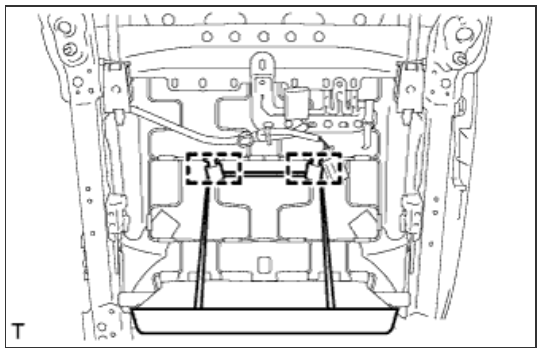
a. Lift the reclining adjuster release handle.

b. Using a screwdriver, detach the claw and remove the reclining adjuster release handle.



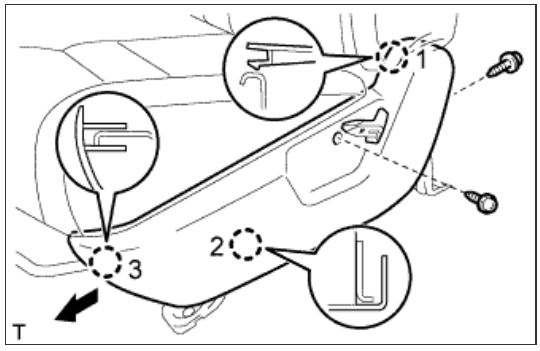
HINT:

Tape the screwdriver tip before use.



5. REMOVE FRONT SEAT CUSHION SHIELD LH

a. w/ Seatback Board:
Remove the 2 rubber bands from the hooks.

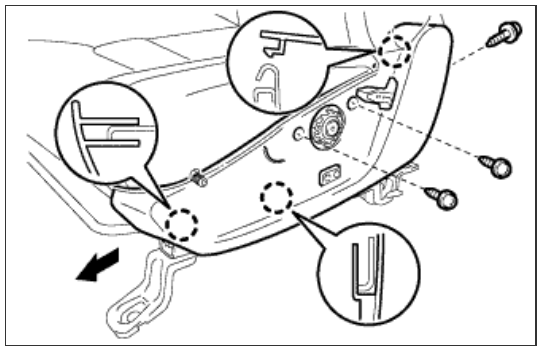


b. w/o Seatback Board:
Remove the 2 rubber bands from the hooks.

c. for 4 Way Seat Type:

i. Remove the 2 screws.

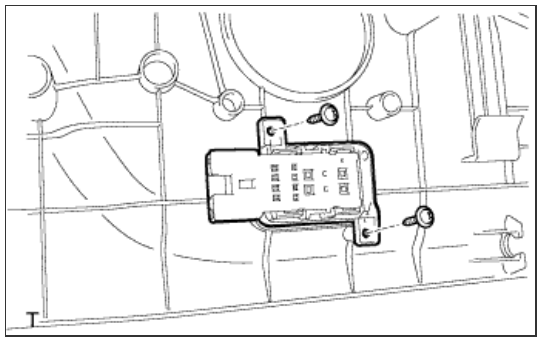
ii. Detach the 3 claws in the order shown in the illustration, and then remove the cushion shield.



d. for 8 Way Seat Type:

i. Remove the 3 screws.

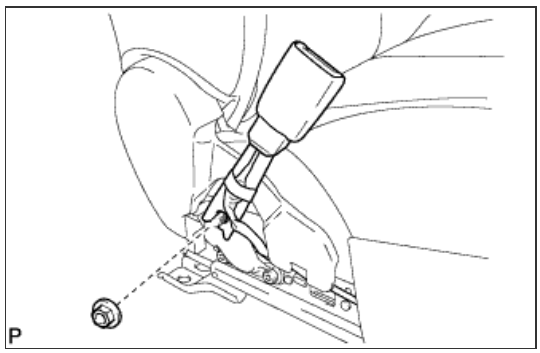
ii. Detach the 3 claws in the order shown in the illustration, and then remove the cushion shield.



e. w/ Lumbar Support:

Disconnect the lumbar switch connector.

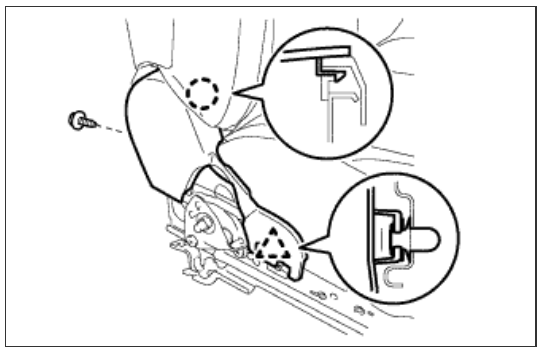
6. REMOVE LUMBAR SWITCH (w/ Lumbar support)



a. Remove the 2 screws and switch.

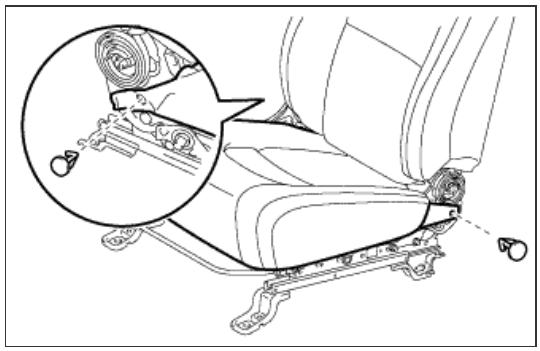
7. REMOVE FRONT SEAT INNER BELT ASSEMBLY LH

a. Disconnect the connectors and detach the clamps.



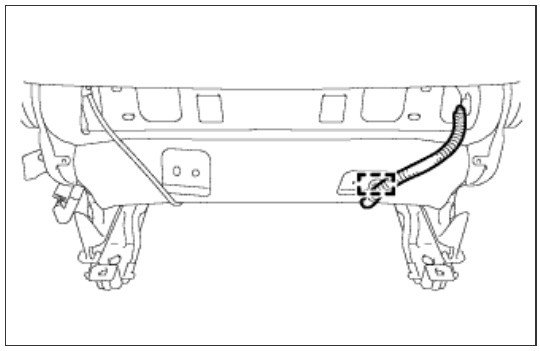
b. Remove the nut and front seat inner belt assembly.

8. REMOVE FRONT INNER SEAT CUSHION SHIELD LH



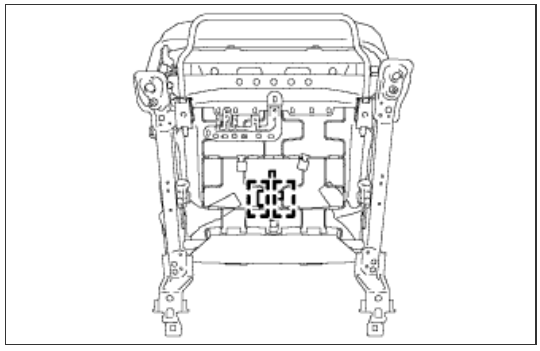
a. Remove the screw.

b. Detach the claw and clip, and then remove the cushion shield.



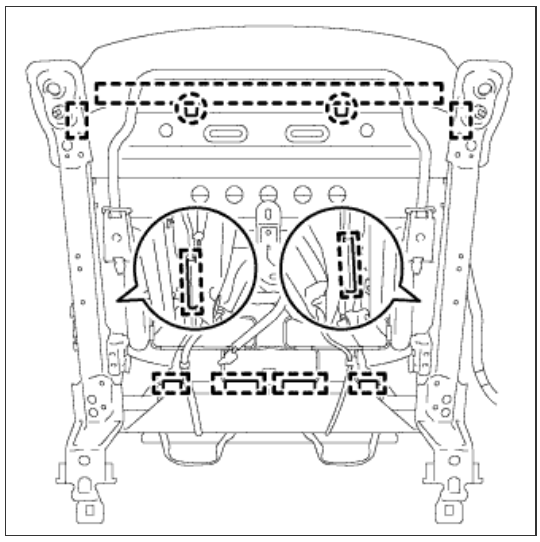
9. REMOVE SEAT CUSHION COVER WITH PAD

a. Using a clip remover, remove the 2 clips.



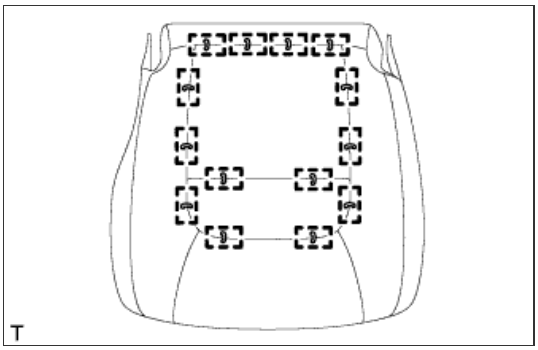
b. Detach the wire harness clamp.

c. for Front Passenger Side:



i. Disconnect the seat belt warning sensor connector.

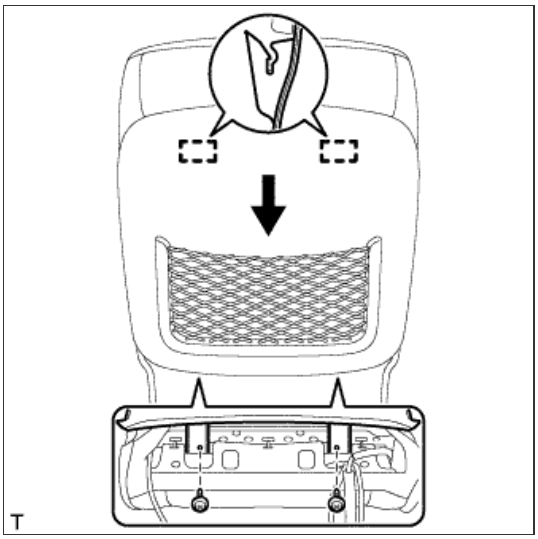
ii. Detach the 2 clamps and remove the seat belt warning sensor connector.



d. Bend the 2 seat frame claws upward.

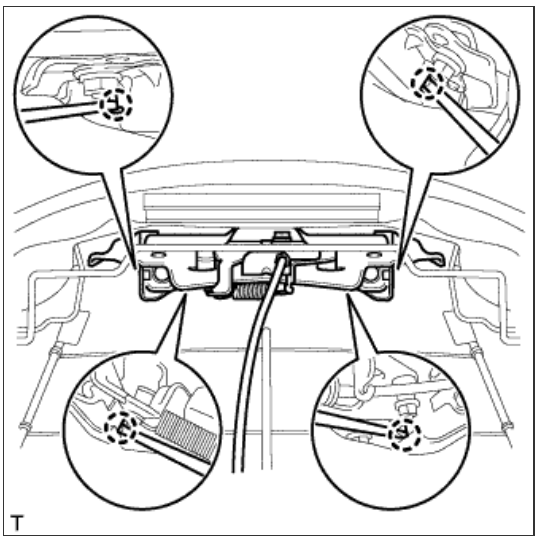
e. Detach the hooks and remove the seat cushion cover with pad.

10. REMOVE FRONT SEPARATE TYPE SEAT CUSHION COVER



a. Remove the hog rings and front seat cushion cover.

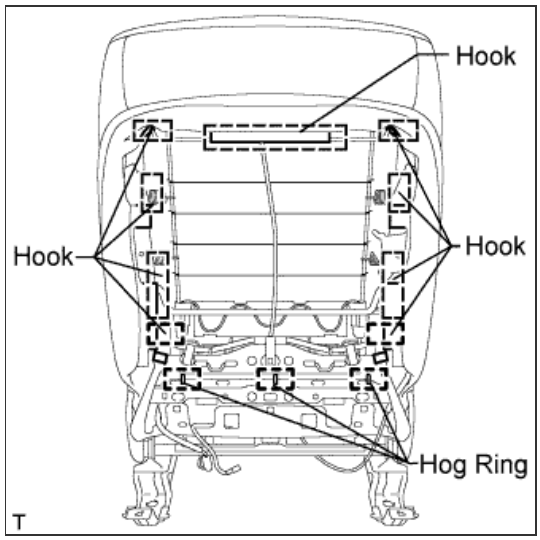
11. REMOVE FRONT SEATBACK BOARD SUB-ASSEMBLY LH (w/ Seatback Board)



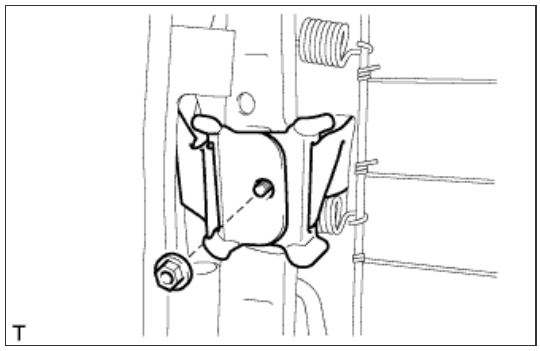
a. Remove the 2 screws.

b. Move the seatback board in the direction of the arrow to detach the 2 hooks and remove the seatback board.

12. REMOVE FRONT SEAT HEADREST SUPPORT (w/ Active Headrest)



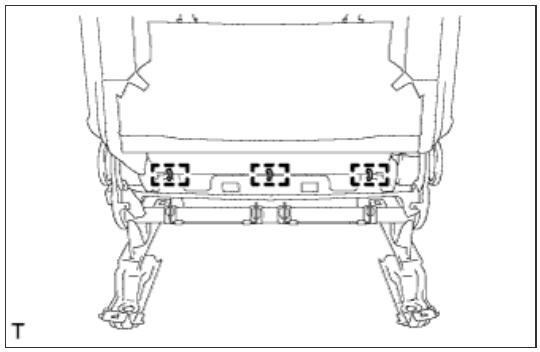
a. Detach the 4 claws and remove the 2 headrest supports.



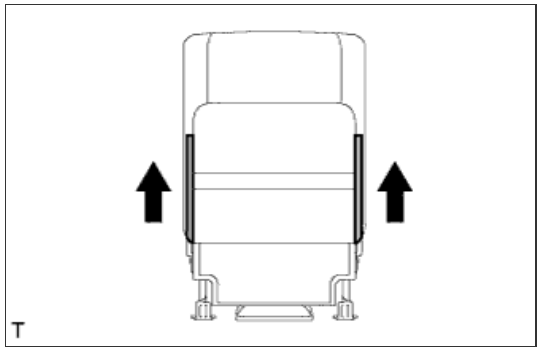
13. REMOVE SEATBACK COVER WITH PAD

a. w/ Seatback Board:

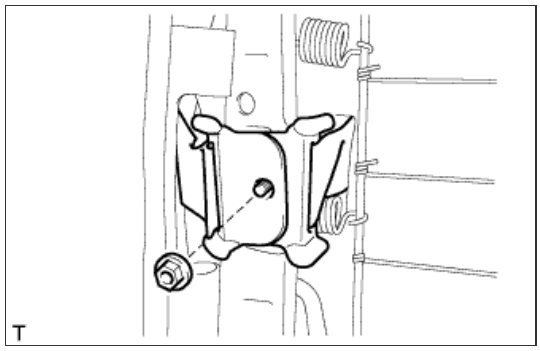
i. Remove the 3 hog rings and detach the 9 hooks.



ii. w/ Front Seat Side Airbag:
Remove the nut and seatback cover bracket from the seat frame.

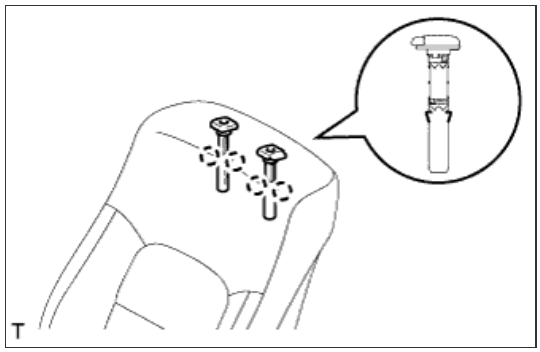


b. w/o Seatback Board:

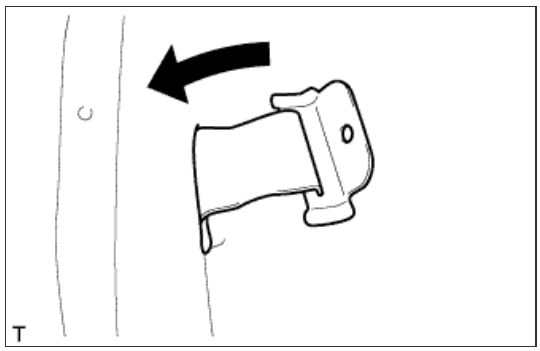


i. Remove the 3 hog rings.

ii. Open the 2 fasteners, and then open the seatback cover.

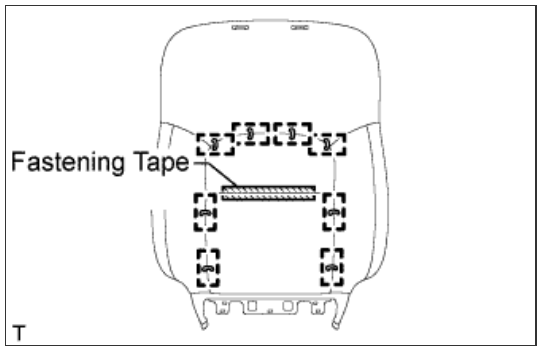


iii. w/ Front Seat Side Airbag:
Remove the nut and seatback cover bracket from the seat frame.



iv. Detach the 4 claws and remove the 2 headrest supports.

c. Remove the seatback cover with pad from the seatback frame.

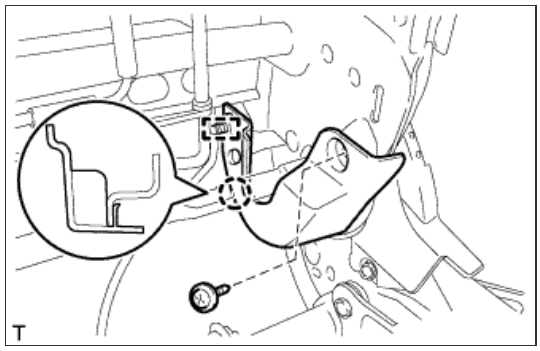


14. REMOVE FRONT SEPARATE TYPE SEATBACK COVER

a. w/ Front Seat Side Airbag:
Disconnect the seatback cover bracket from the seatback pad.

b. Remove the hog rings.

c. Detach the fastening tape and remove the seatback cover.



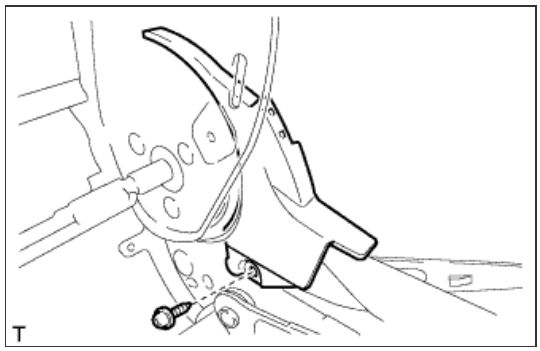
15. REMOVE INSIDE RECLINING ADJUSTER COVER LH

a. Detach the wire harness clamp.

b. Remove the screw.

c. Detach the claw and remove the reclining adjuster cover.

16. REMOVE INSIDE RECLINING ADJUSTER COVER RH



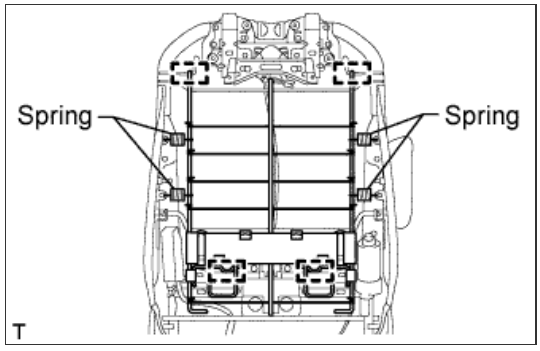
a. Detach the wire harness clamp.

b. Remove the screw.

c. Detach the claw and remove the reclining adjuster cover.

17. REMOVE OUTSIDE RECLINING ADJUSTER COVER LH

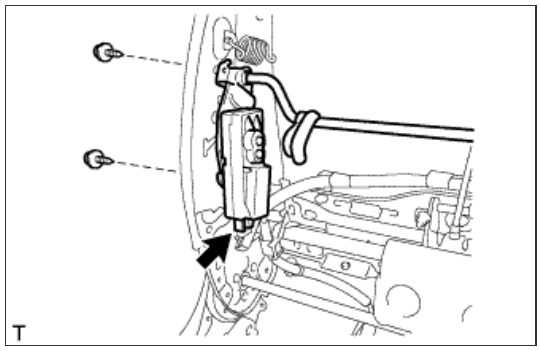
a. Remove the screw and reclining adjuster cover.



18. REMOVE OUTSIDE RECLINING ADJUSTER COVER RH

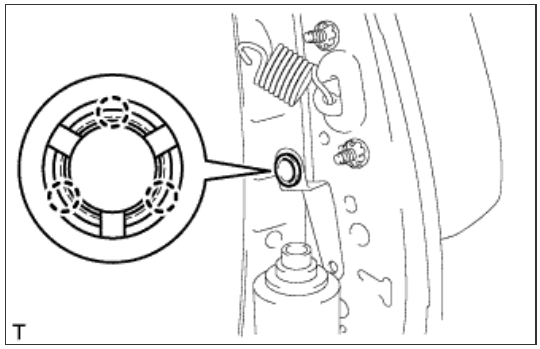
a. Remove the screw and reclining adjuster cover.

19. REMOVE LUMBAR SUPPORT ADJUSTER ASSEMBLY LH (w/Lumbar Support)



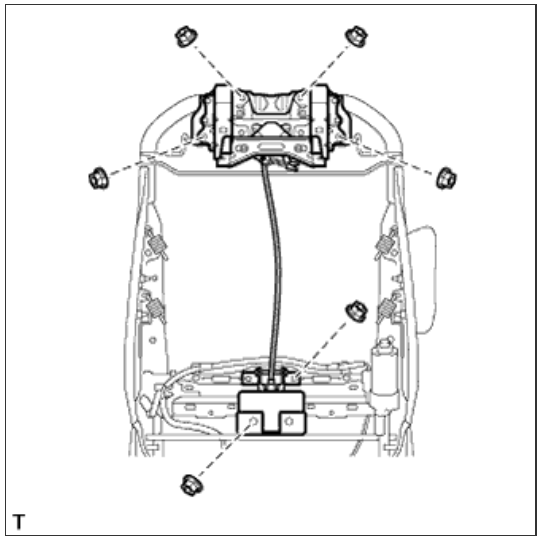
a. Remove the 4 springs.

b. Detach the 4 hooks and remove the seatback spring.

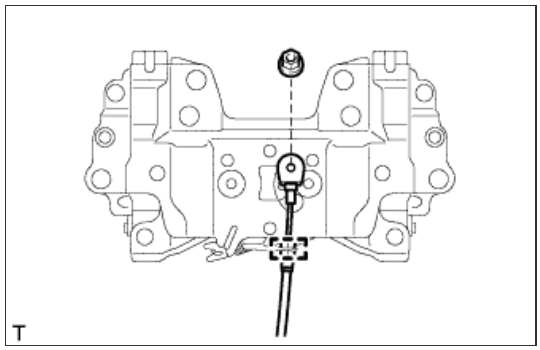


c. Disconnect the lumbar support adjuster connector.

d. Remove the 2 screws and lumbar support adjuster.

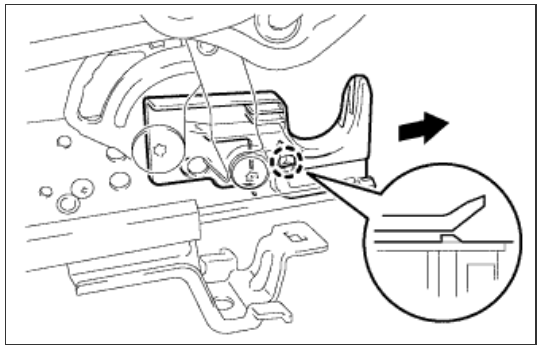


e. Detach the 3 claws and remove the bush from the seat frame.



20. REMOVE LOWER ACTIVE HEADREST UNIT (w/ Active Headrest)

a. Remove the 6 nuts, and then remove the lower active headrest unit together with the upper active headrest unit.

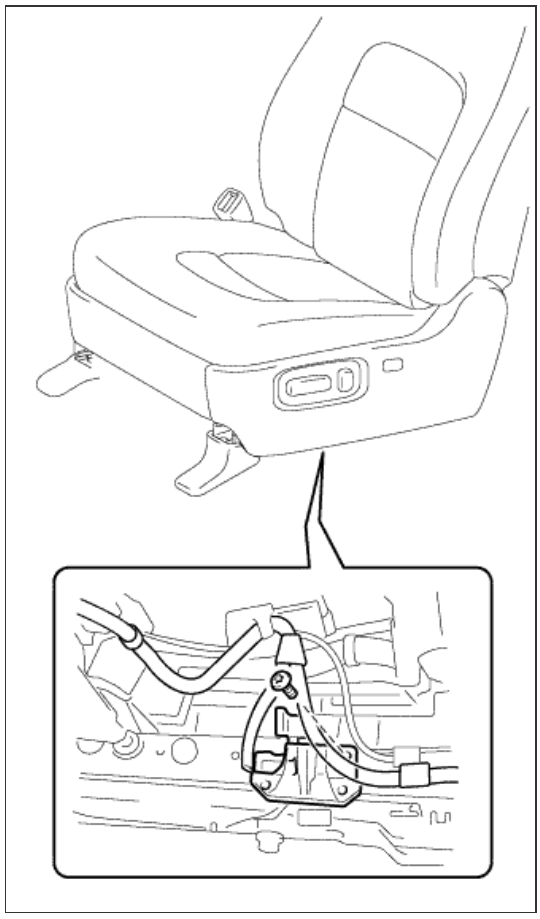


21. REMOVE UPPER ACTIVE HEADREST UNIT (w/ Active Headrest)

a. Remove the nut and cable clamp to remove the upper active headrest unit from the lower active headrest unit.

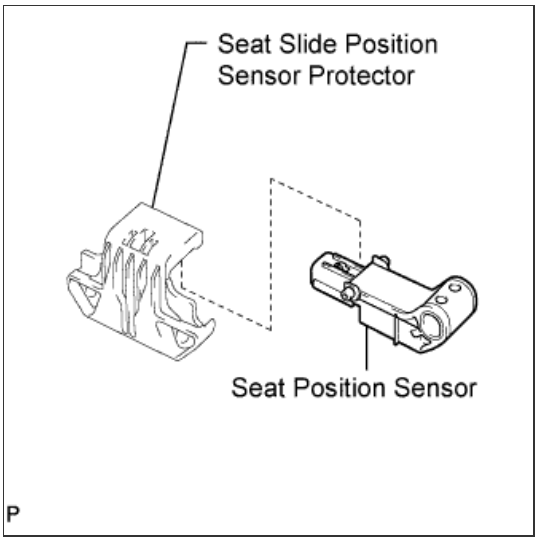
22. REMOVE FRONT LOWER SEAT CUSHION SHIELD LH

a. Detach the claw and remove the lower seat cushion shield.



23. REMOVE FRONT LOWER SEAT CUSHION SHIELD RH

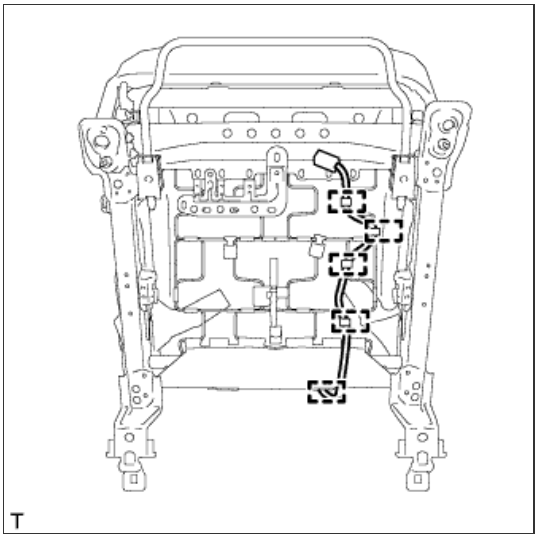
a. Detach the claw and remove the lower seat cushion shield.



24. REMOVE SEAT POSITION SENSOR

a. Using a T30 TOR socket wrench, remove the screw and seat position sensor with sensor protector.

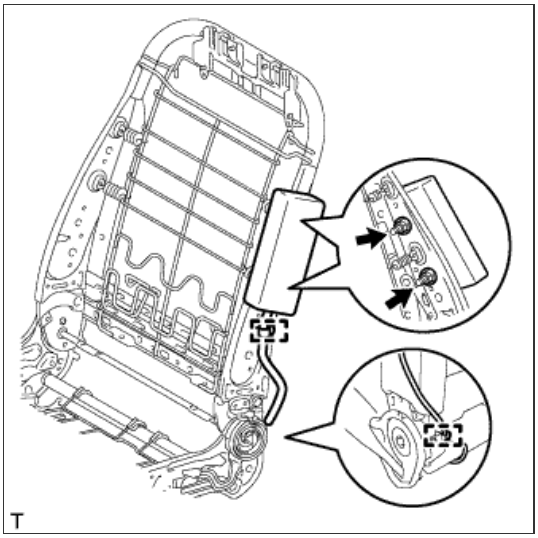
b. Disconnect the connector.



c. Remove the seat slide position sensor protector from the seat position sensor.

25. REMOVE FRONT SEAT SIDE AIRBAG ASSEMBLY LH

a. Detach the 5 clamps and disconnect the wire harness.

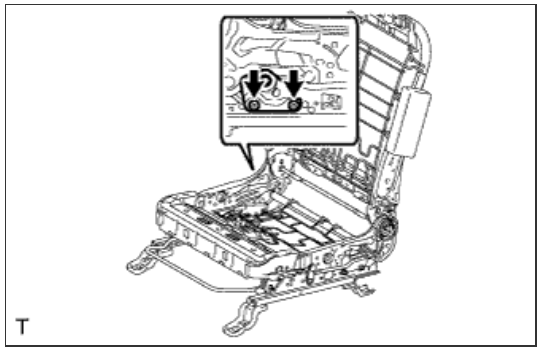


b. Detach the 2 clamps and disconnect the wire harness.

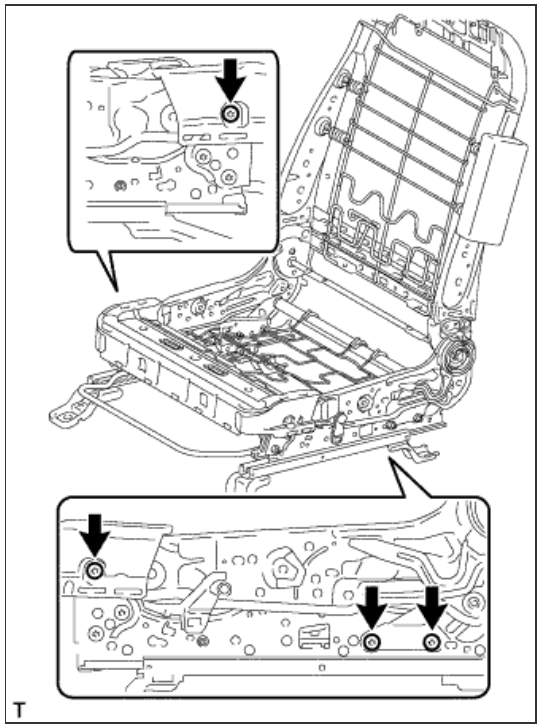
c. Remove the 2 nuts and front seat side airbag assembly L .

CAUTION:

Make sure that the seat frame assembly is not deformed. If it is, replace it with a new one.

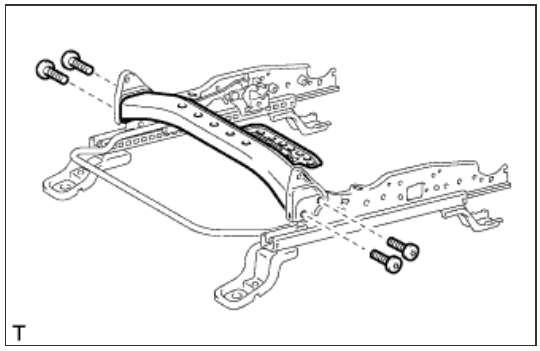


26. REMOVE FRONT SEAT WIRE LH



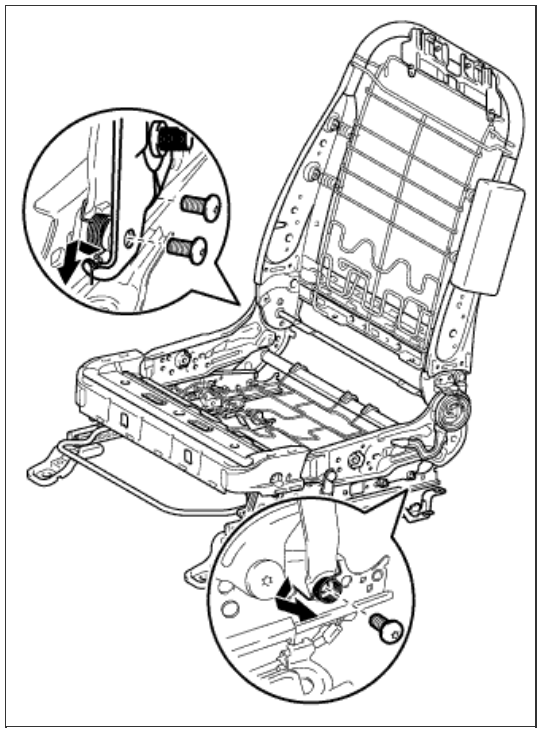
27. REMOVE FRONT INNER SEAT TRACK ASSEMBLY LH

a. for 4 Way Seat Type:

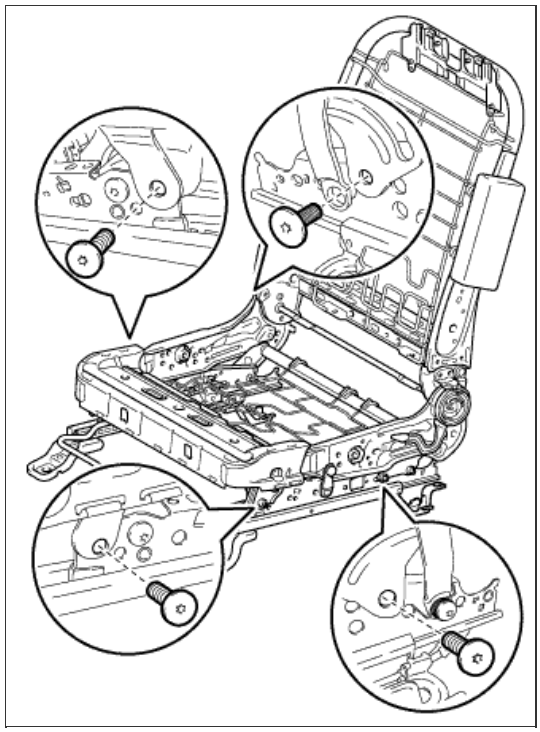


i. Using a T40 TOR socket, remove the 2 bolts and inner seat track bracket.

ii. Using a T40 TOR socket, remove the 4 bolts and seat frame with adjuster.

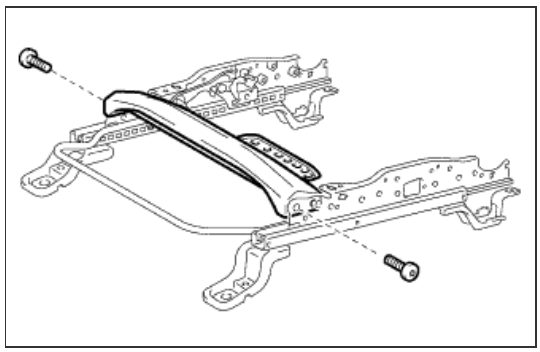


iii. Using a T40 TOR socket, remove the 4 bolts and reinforcement.

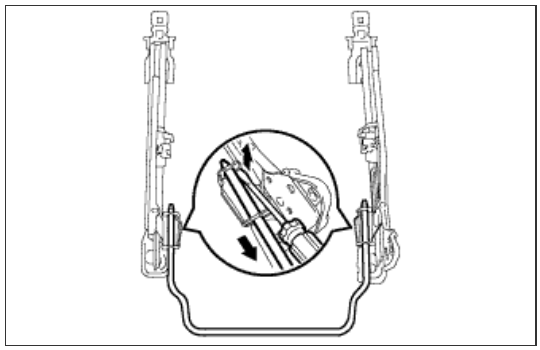


b. for 8 Way Seat Type:

i. Remove the 2 springs.



ii. Using a T40 TOR socket, remove the 3 bolts and inner seat track bracket.



iii. Using a T40 TOR socket, remove the 4 bolts and seat frame with adjuster.

iv. Using a T40 TOR socket, remove the 2 bolts and reinforcement.

c. Using a screwdriver, detach the 2 springs and remove the seat track adjusting handle as shown in the illustration.

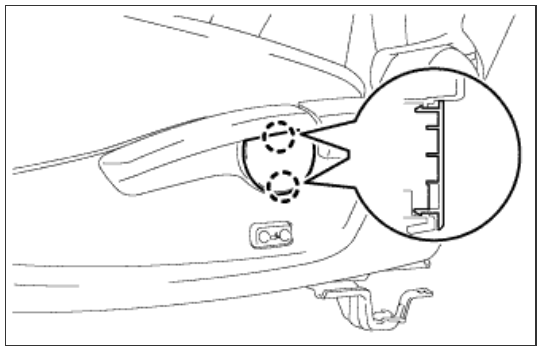
28. REMOVE FRONT OUTER SEAT TRACK ASSEMBLY LH

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

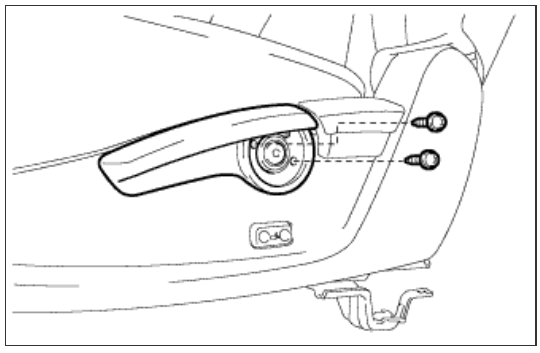
HINT:



- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

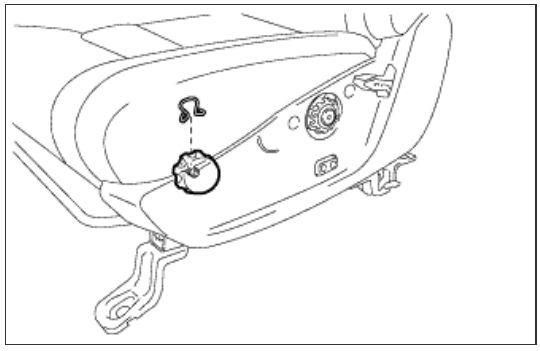
1. REMOVE VERTICAL ADJUSTER COVER LH (for 8 Way Seat Type)

a. Using a screwdriver, detach the 2 claws and remove the vertical adjuster cover.



HINT:

Tape the screwdriver tip before use.

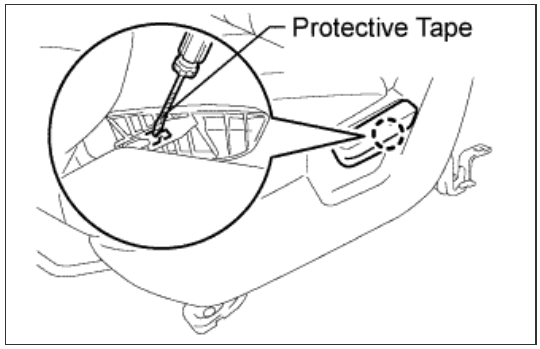


2. REMOVE VERTICAL ADJUSTING HANDLE LH (for 8 Way Seat Type)

a. Remove the 2 screws and vertical adjusting handle.

3. REMOVE VERTICAL SEAT ADJUSTER KNOB (for 8 Way Seat Type)

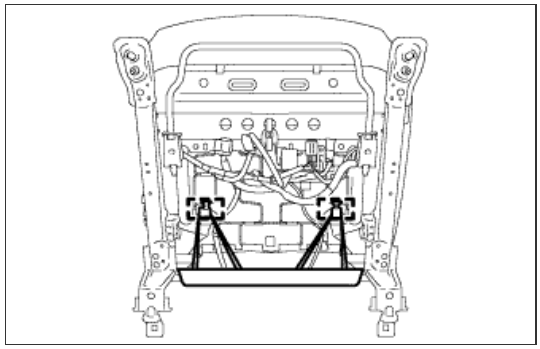
a. Remove the snap ring and vertical seat adjuster knob.



4. REMOVE RECLINING ADJUSTER RELEASE HANDLE LH

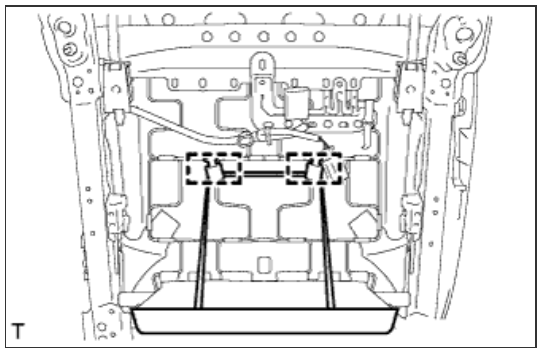
a. Lift the reclining adjuster release handle.

b. Using a screwdriver, detach the claw and remove the reclining adjuster release handle.



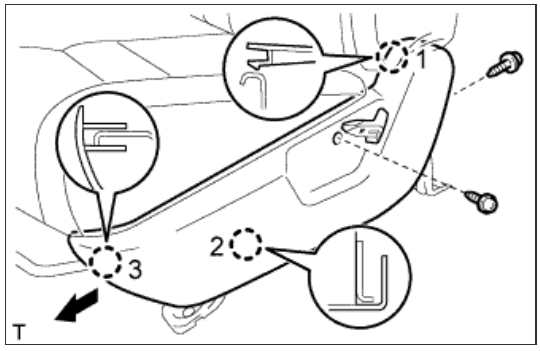
HINT:

Tape the screwdriver tip before use.



5. REMOVE FRONT SEAT CUSHION SHIELD LH

a. w/ Seatback Board:
Remove the 2 rubber bands from the hooks.

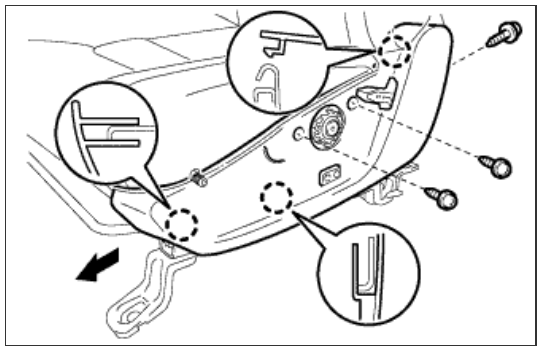


b. w/o Seatback Board:
Remove the 2 rubber bands from the hooks.

c. for 4 Way Seat Type:

i. Remove the 2 screws.

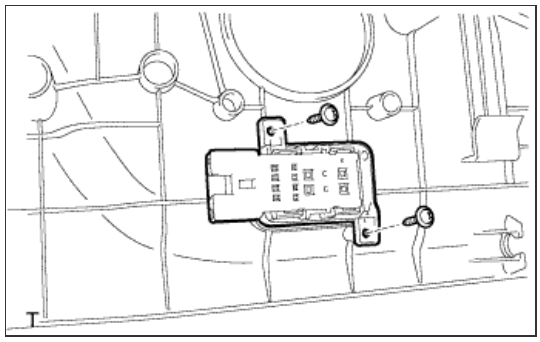
ii. Detach the 3 claws in the order shown in the illustration, and then remove the cushion shield.



d. for 8 Way Seat Type:

i. Remove the 3 screws.

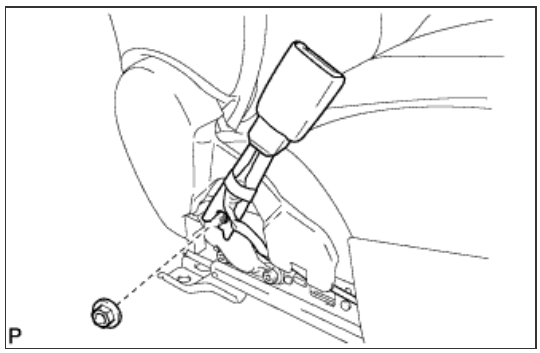
ii. Detach the 3 claws in the order shown in the illustration, and then remove the cushion shield.



e. w/ Lumbar Support:

Disconnect the lumbar switch connector.

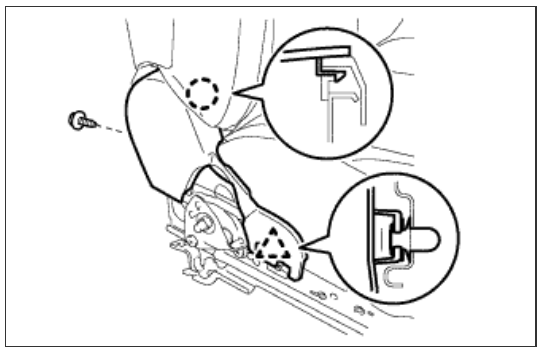
6. REMOVE LUMBAR SWITCH (w/ Lumbar support)



a. Remove the 2 screws and switch.

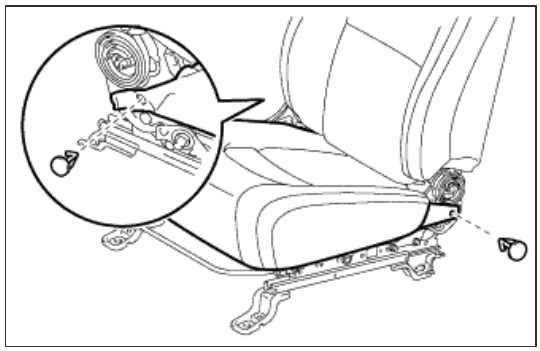
7. REMOVE FRONT SEAT INNER BELT ASSEMBLY LH

a. Disconnect the connectors and detach the clamps.



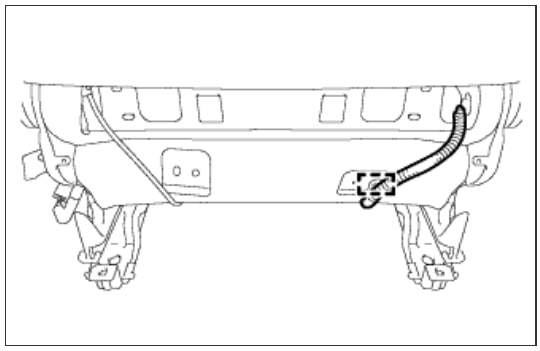
b. Remove the nut and front seat inner belt assembly.

8. REMOVE FRONT INNER SEAT CUSHION SHIELD LH



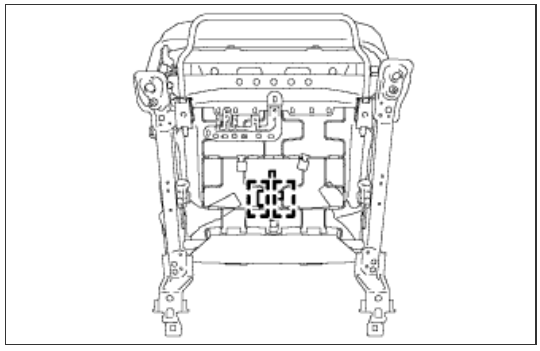
a. Remove the screw.

b. Detach the claw and clip, and then remove the cushion shield.



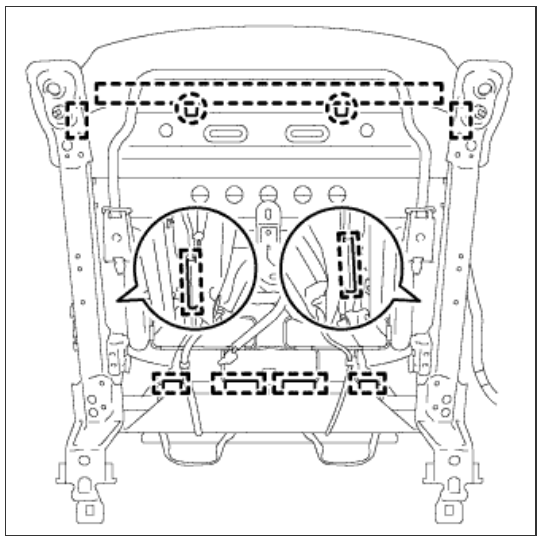
9. REMOVE SEAT CUSHION COVER WITH PAD

a. Using a clip remover, remove the 2 clips.



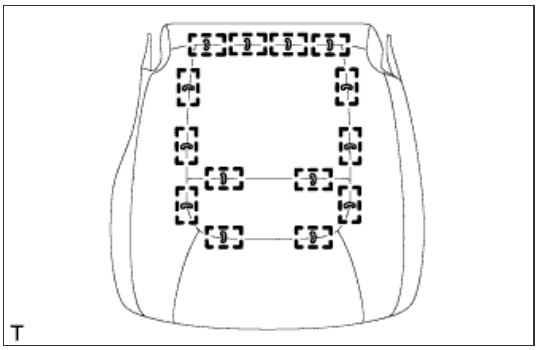
b. Detach the wire harness clamp.

c. for Front Passenger Side:



i. Disconnect the seat belt warning sensor connector.

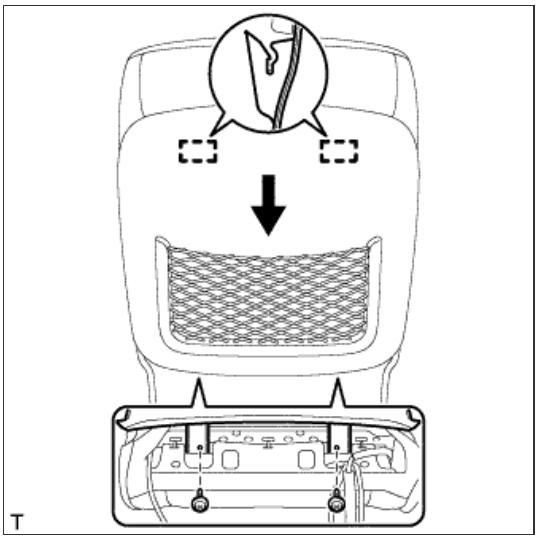
ii. Detach the 2 clamps and remove the seat belt warning sensor connector.



d. Bend the 2 seat frame claws upward.

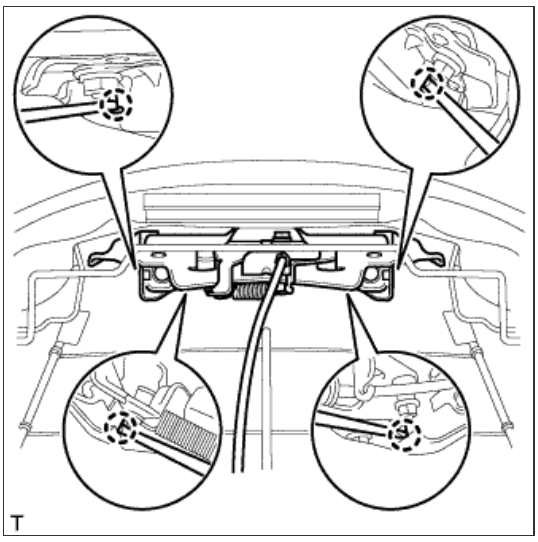
e. Detach the hooks and remove the seat cushion cover with pad.

10. REMOVE FRONT SEPARATE TYPE SEAT CUSHION COVER



a. Remove the hog rings and front seat cushion cover.

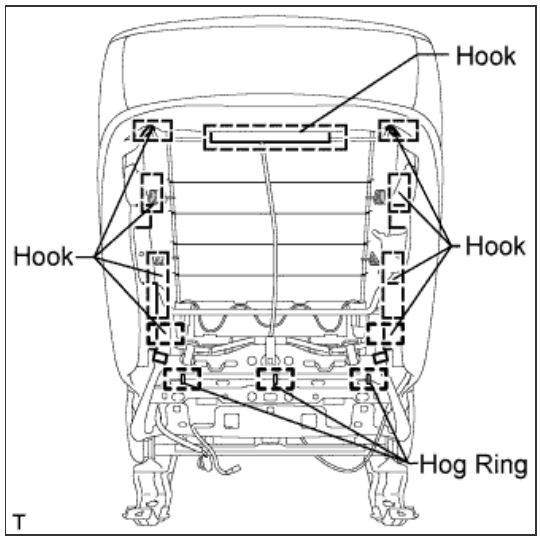
11. REMOVE FRONT SEATBACK BOARD SUB-ASSEMBLY LH (w/ Seatback Board)



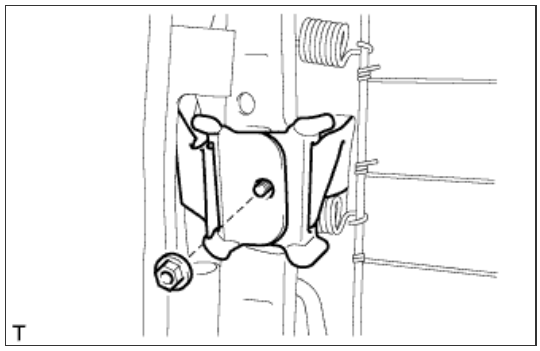
a. Remove the 2 screws.

b. Move the seatback board in the direction of the arrow to detach the 2 hooks and remove the seatback board.

12. REMOVE FRONT SEAT HEADREST SUPPORT (w/ Active Headrest)



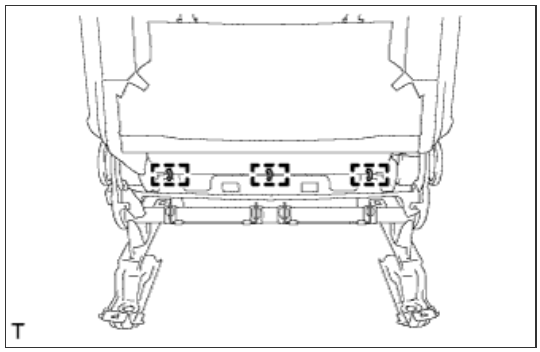
a. Detach the 4 claws and remove the 2 headrest supports.



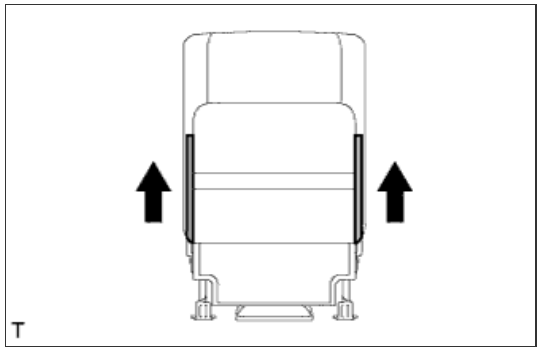
13. REMOVE SEATBACK COVER WITH PAD

a. w/ Seatback Board:

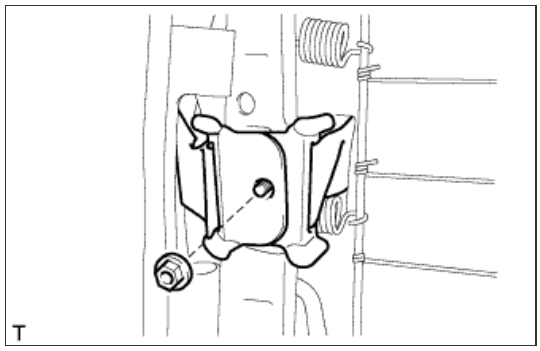
i. Remove the 3 hog rings and detach the 9 hooks.



ii. w/ Front Seat Side Airbag:
Remove the nut and seatback cover bracket from the seat frame.

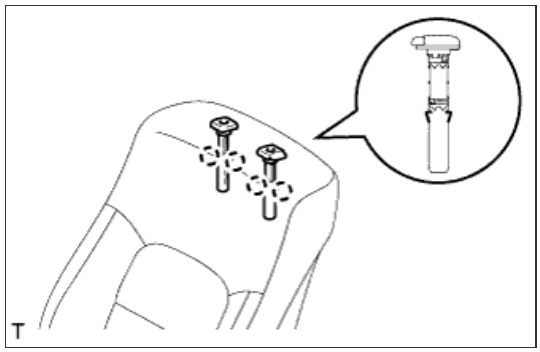


b. w/o Seatback Board:

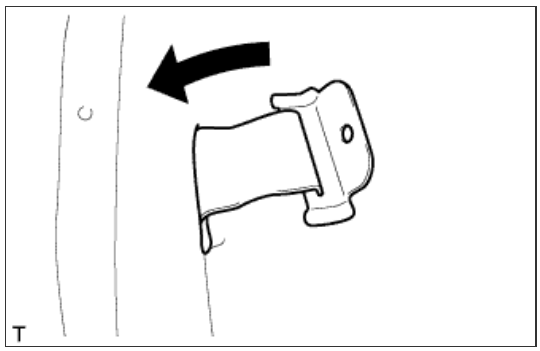


i. Remove the 3 hog rings.

ii. Open the 2 fasteners, and then open the seatback cover.

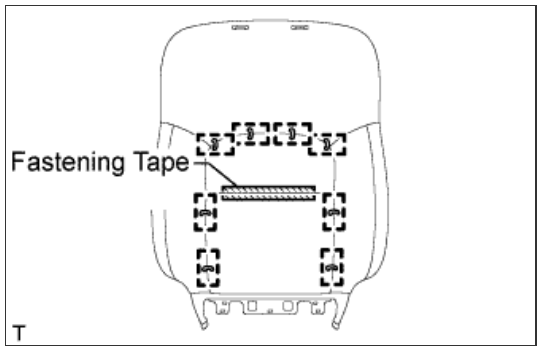


iii. w/ Front Seat Side Airbag:
Remove the nut and seatback cover bracket from the seat frame.



iv. Detach the 4 claws and remove the 2 headrest supports.

c. Remove the seatback cover with pad from the seatback frame.

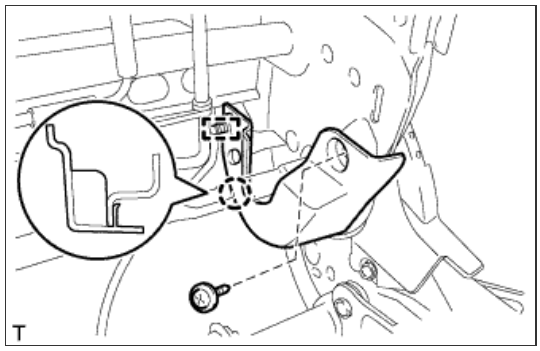


14. REMOVE FRONT SEPARATE TYPE SEATBACK COVER

a. w/ Front Seat Side Airbag:
Disconnect the seatback cover bracket from the seatback pad.

b. Remove the hog rings.

c. Detach the fastening tape and remove the seatback cover.



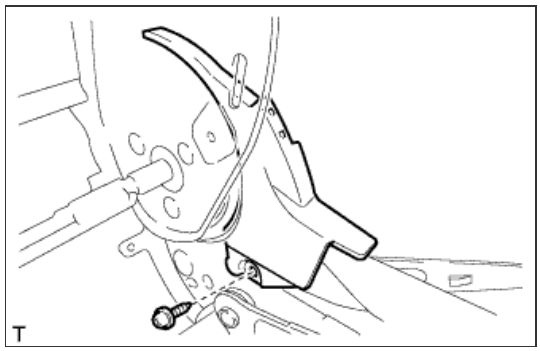
15. REMOVE INSIDE RECLINING ADJUSTER COVER LH

a. Detach the wire harness clamp.

b. Remove the screw.

c. Detach the claw and remove the reclining adjuster cover.

16. REMOVE INSIDE RECLINING ADJUSTER COVER RH



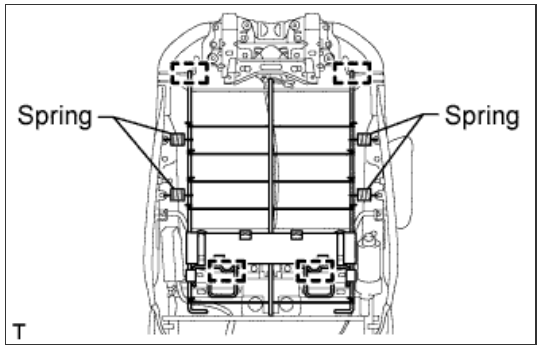
a. Detach the wire harness clamp.

b. Remove the screw.

c. Detach the claw and remove the reclining adjuster cover.

17. REMOVE OUTSIDE RECLINING ADJUSTER COVER LH

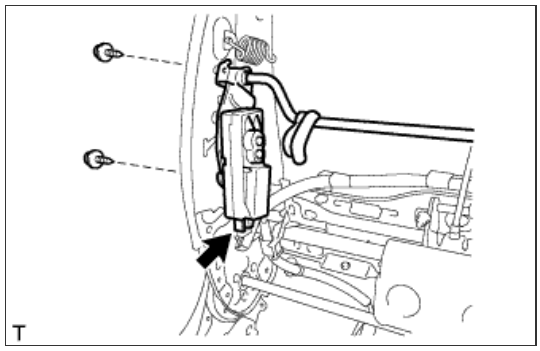
a. Remove the screw and reclining adjuster cover.



18. REMOVE OUTSIDE RECLINING ADJUSTER COVER RH

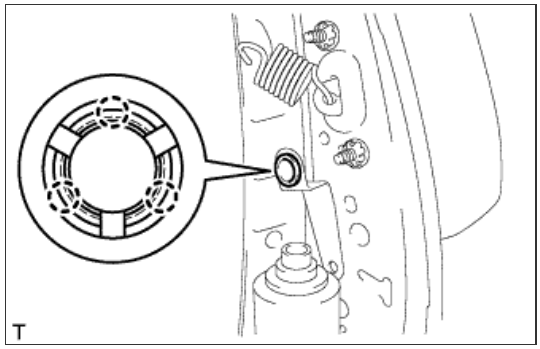
a. Remove the screw and reclining adjuster cover.

19. REMOVE LUMBAR SUPPORT ADJUSTER ASSEMBLY LH (w/Lumbar Support)



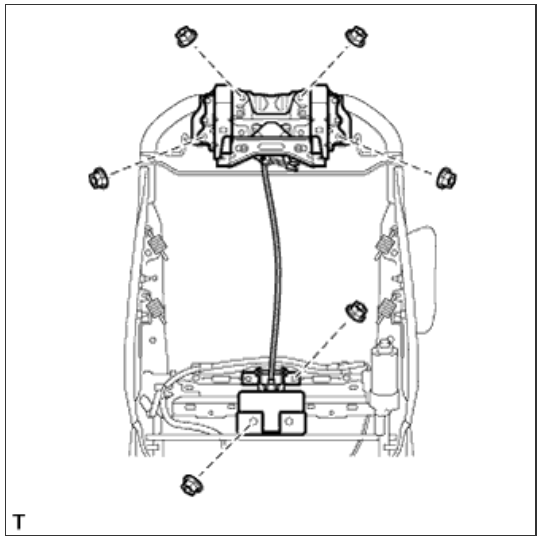
a. Remove the 4 springs.

b. Detach the 4 hooks and remove the seatback spring.

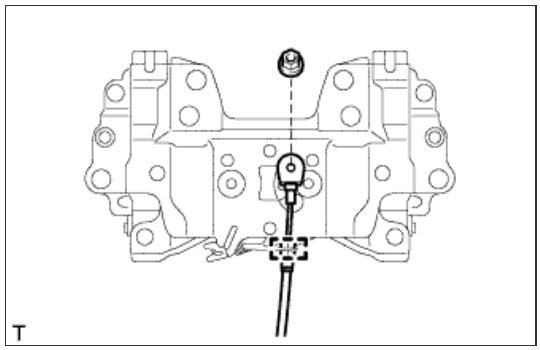


c. Disconnect the lumbar support adjuster connector.

d. Remove the 2 screws and lumbar support adjuster.

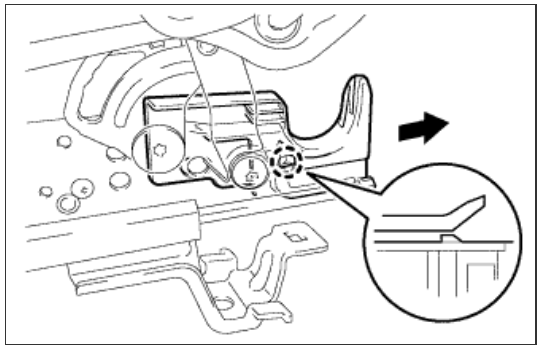


e. Detach the 3 claws and remove the bush from the seat frame.



20. REMOVE LOWER ACTIVE HEADREST UNIT (w/ Active Headrest)

a. Remove the 6 nuts, and then remove the lower active headrest unit together with the upper active headrest unit.

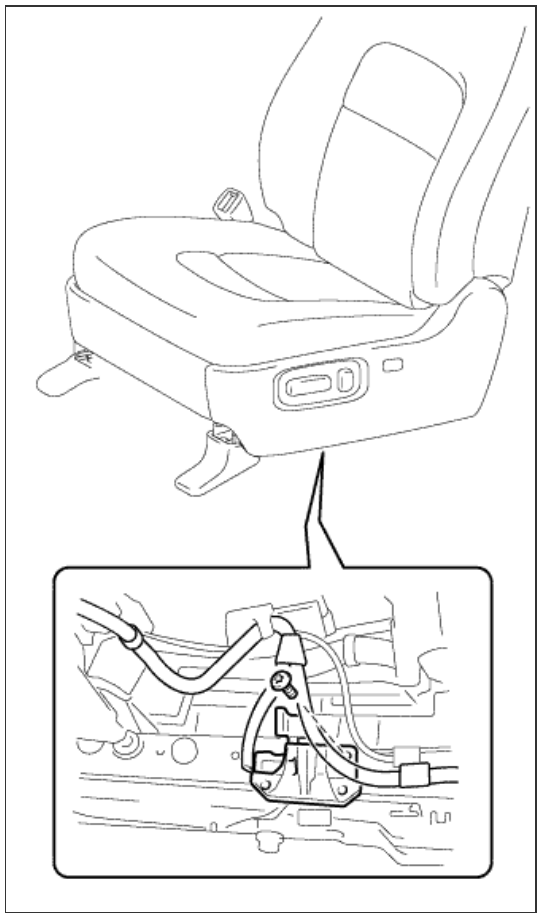


21. REMOVE UPPER ACTIVE HEADREST UNIT (w/ Active Headrest)

a. Remove the nut and cable clamp to remove the upper active headrest unit from the lower active headrest unit.

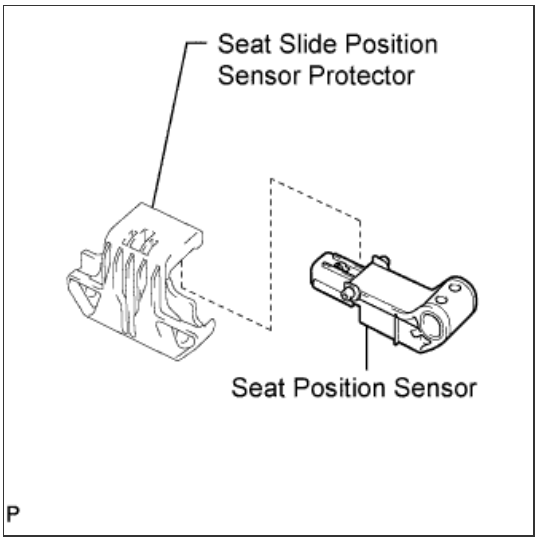
22. REMOVE FRONT LOWER SEAT CUSHION SHIELD LH

a. Detach the claw and remove the lower seat cushion shield.



23. REMOVE FRONT LOWER SEAT CUSHION SHIELD RH

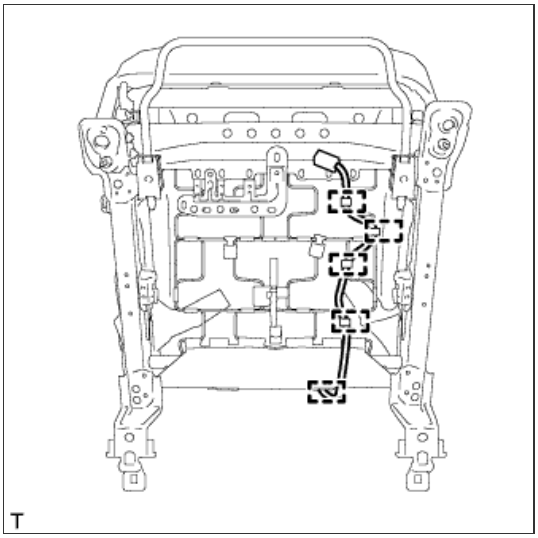
a. Detach the claw and remove the lower seat cushion shield.



24. REMOVE SEAT POSITION SENSOR

a. Using a T30 TOR socket wrench, remove the screw and seat position sensor with sensor protector.

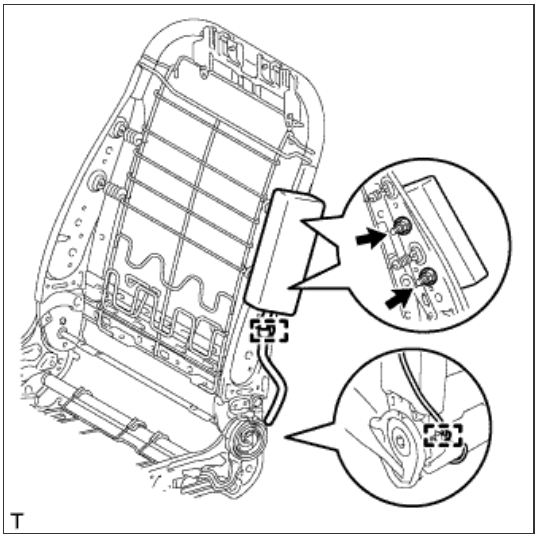
b. Disconnect the connector.



c. Remove the seat slide position sensor protector from the seat position sensor.

25. REMOVE FRONT SEAT SIDE AIRBAG ASSEMBLY LH

a. Detach the 5 clamps and disconnect the wire harness.

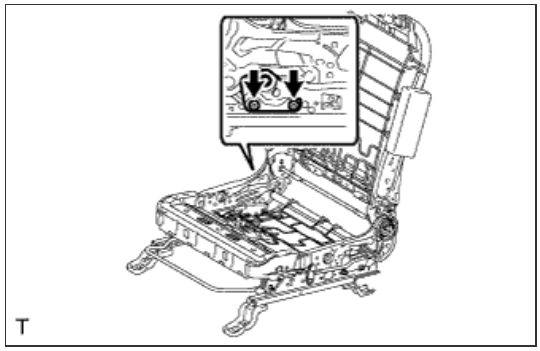


b. Detach the 2 clamps and disconnect the wire harness.

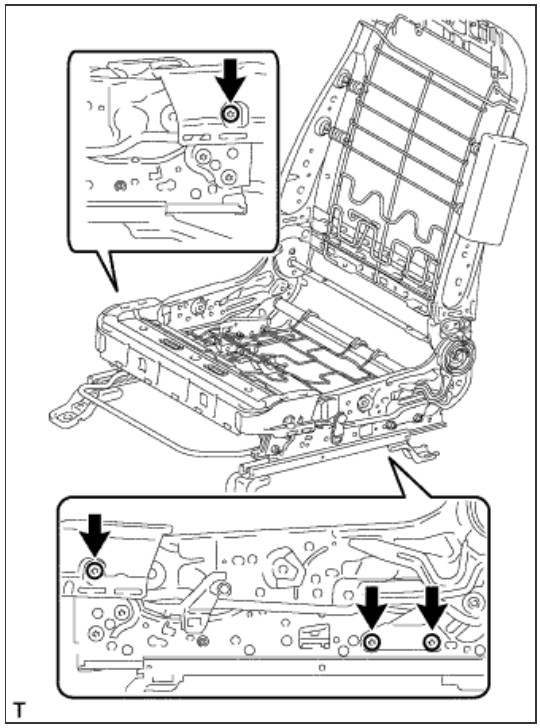
c. Remove the 2 nuts and front seat side airbag assembly L .

CAUTION:

Make sure that the seat frame assembly is not deformed. If it is, replace it with a new one.

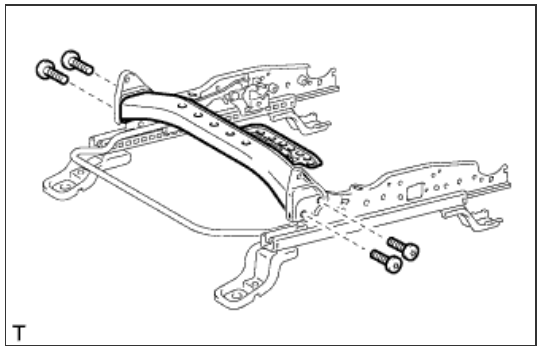


26. REMOVE FRONT SEAT WIRE LH



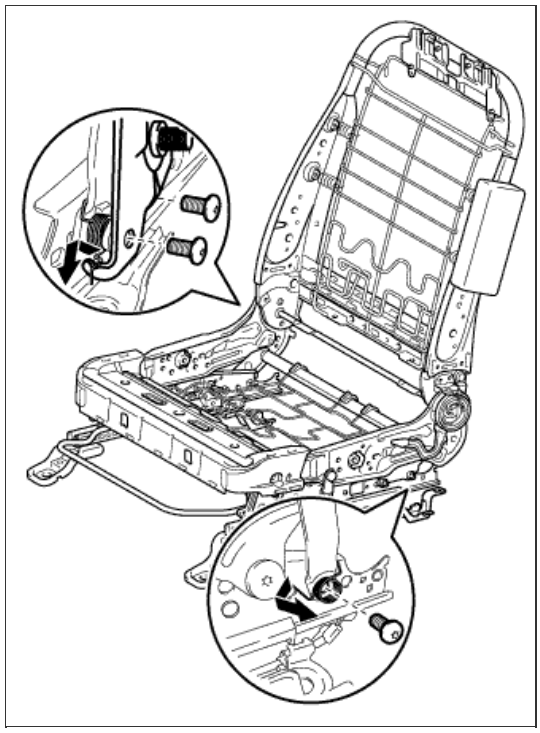
27. REMOVE FRONT INNER SEAT TRACK ASSEMBLY LH

a. for 4 Way Seat Type:

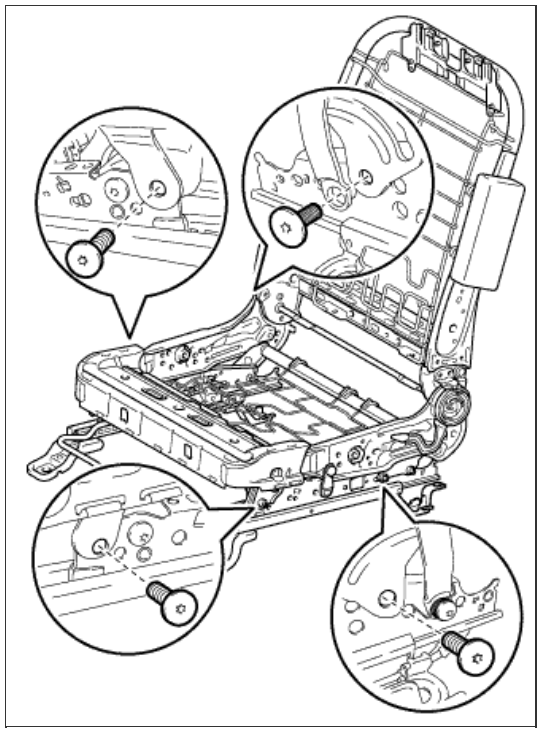


i. Using a T40 TOR socket, remove the 2 bolts and inner seat track bracket.

ii. Using a T40 TOR socket, remove the 4 bolts and seat frame with adjuster.

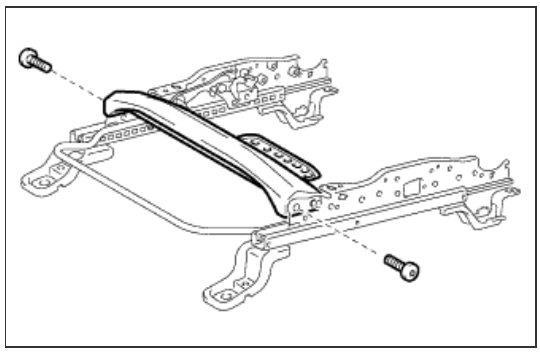


iii. Using a T40 TOR socket, remove the 4 bolts and reinforcement.

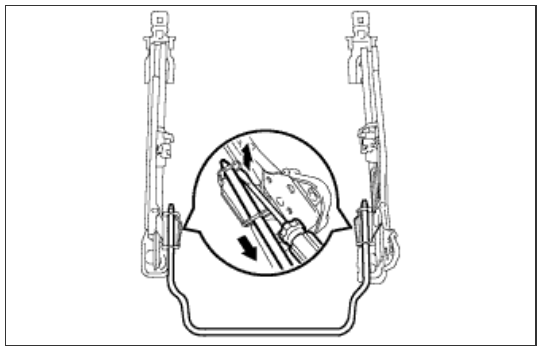


b. for 8 Way Seat Type:

i. Remove the 2 springs.



ii. Using a T40 TOR socket, remove the 3 bolts and inner seat track bracket.



iii. Using a T40 TOR socket, remove the 4 bolts and seat frame with adjuster.

iv. Using a T40 TOR socket, remove the 2 bolts and reinforcement.

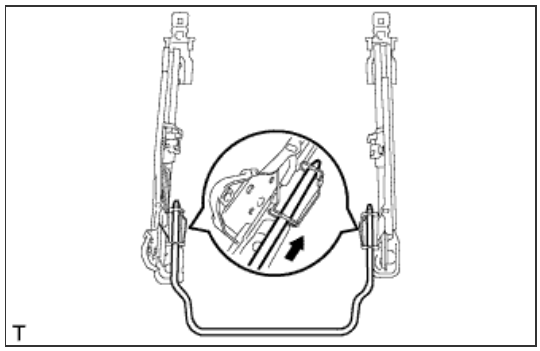
c. Using a screwdriver, detach the 2 springs and remove the seat track adjusting handle as shown in the illustration.

28. REMOVE FRONT OUTER SEAT TRACK ASSEMBLY LH

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

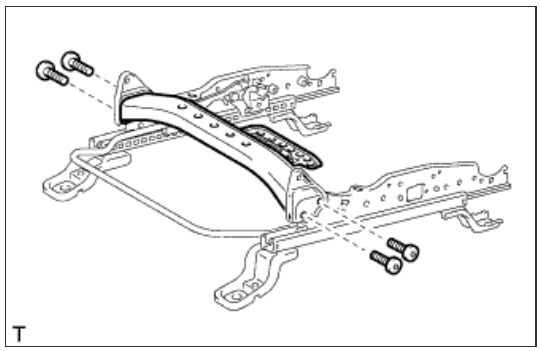


HINT:

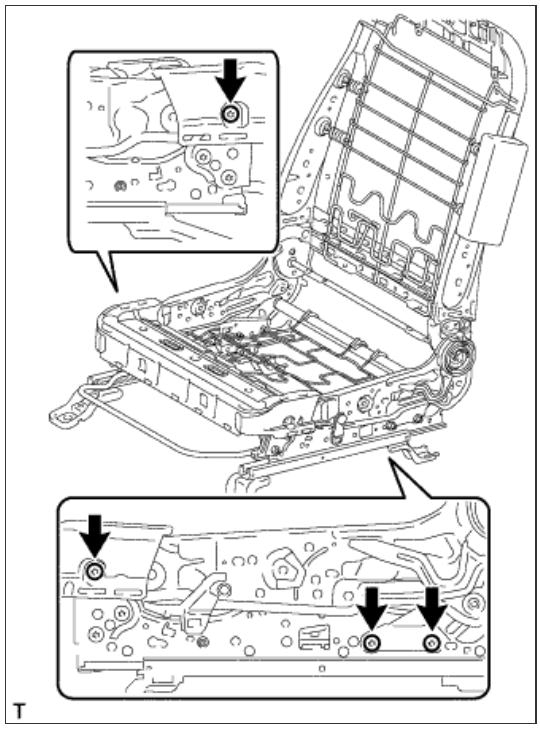
- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL FRONT OUTER SEAT TRACK ASSEMBLY LH

2. INSTALL FRONT INNER SEAT TRACK ASSEMBLY LH



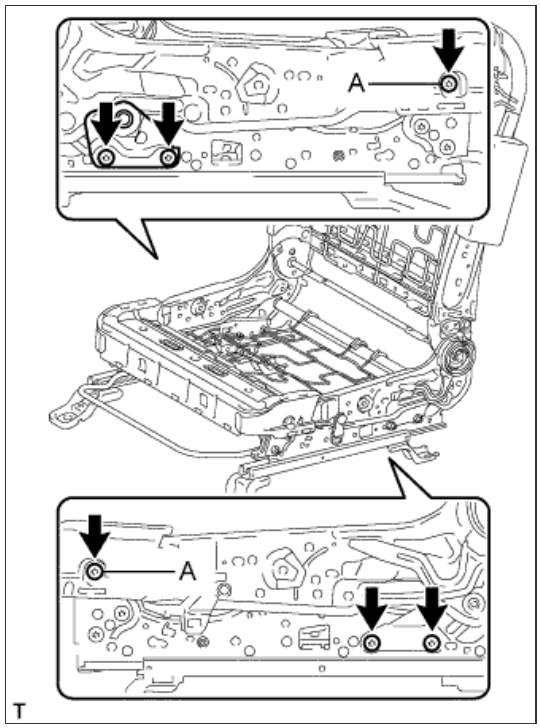
a. Attach the 2 springs to install the seat track adjusting handle as shown in the illustration.



b. for 4 Way Seat Type:

i. Using a T40 "TORX" socket, install the reinforcement with the 4 bolts.

Torque:
25 N*m{ 255 kgf*cm , 18 ft.*lbf }



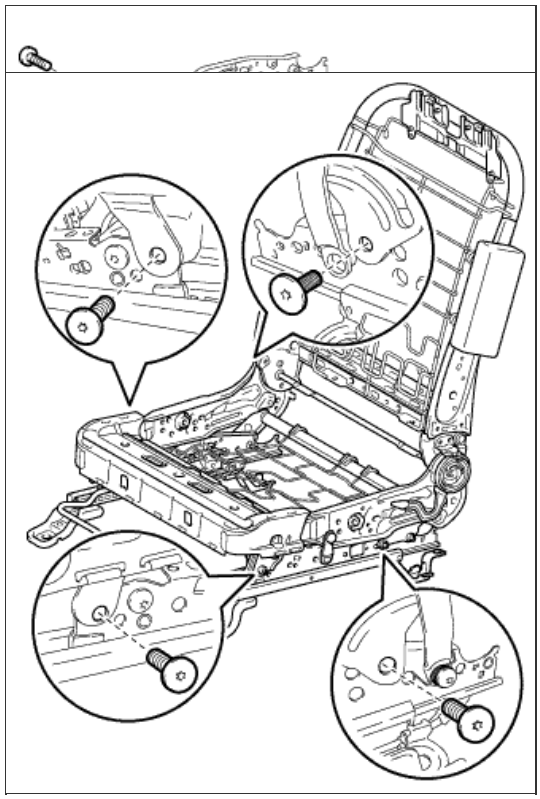
ii. Temporarily install the seat frame with adjuster with 4 bolts.

iii. Temporarily install the inner seat track bracket with 2 bolts.

iv. Using a T40 "TORX" socket, tighten the 6 bolts.

Torque:
25 N*m{ 255 kgf*cm , 18 ft.*lbf }
Bolt A:
13 N*m{ 133 kgf*cm , 10 ft.*lbf }

c. for 8 Way Seat Type:

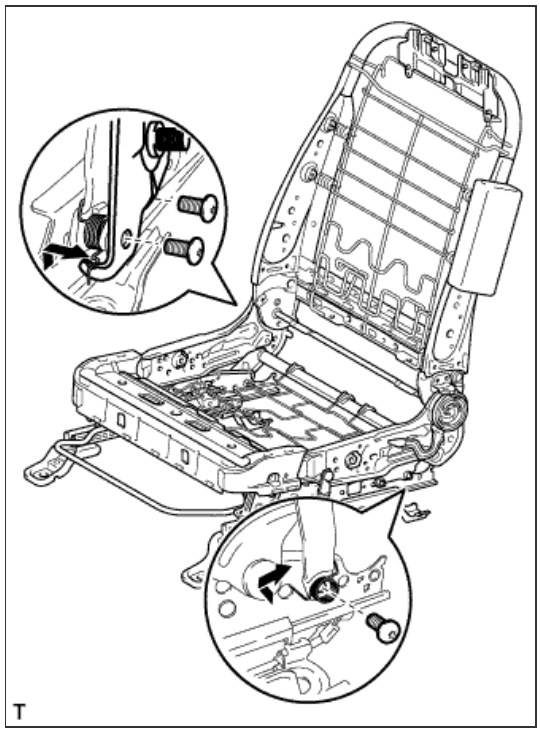


i. Using a T40 "TORX" socket, install the reinforcement with the 2 bolts.

Torque:
25 N*m{ 255 kgf*cm , 18 ft.*lbf }

ii. Temporarily install the seat frame with adjuster with the 4 bolts.

iii. Using a T40 "TORX" socket, tighten the 4 bolts.



Torque:
25 N*m{ 255 kgf*cm , 18 ft.*lbf }

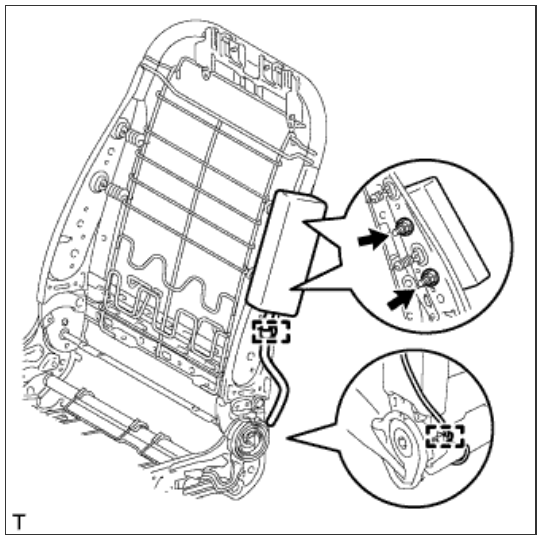
iv. Using a T40 "TORX" socket, install the inner seat track bracket with the 3 bolts.

Torque:
25 N*m{ 255 kgf*cm , 18 ft.*lbf }

v. Install the 2 springs.

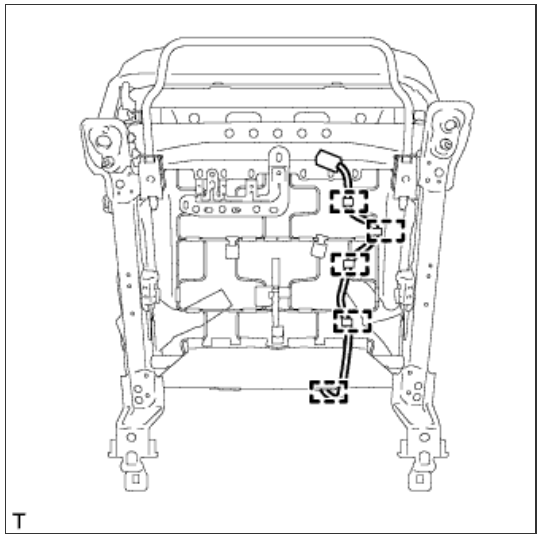
3. INSTALL FRONT SEAT WIRE LH

4. INSTALL FRONT SEAT SIDE AIRBAG ASSEMBLY LH



CAUTION:

Make sure that the seat frame assembly is not deformed. If it is, replace it with a new one.



a. Install the front seat side airbag assembly with 2 nuts.

Torque:
5.5 N*m{ 56 kgf*cm , 49 in.*lbf }

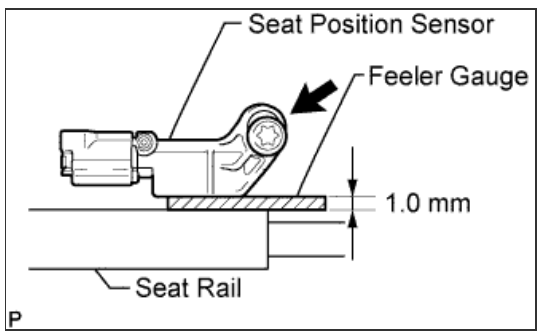
b. Attach the 2 clamps to connect the wire harness.

c. Attach the 5 clamps to connect the wire harness.

5. INSTALL SEAT POSITION SENSOR

a. heck that the engine switch is off.

b. heck that the cable is disconnected from the battery negative (- terminal.



CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (- battery terminal to disable the SRS system.

c. Using a 1.0 mm (0.0393 in. feeler gauge, install the seat position sensor.

NOTICE:

- **If the seat position sensor has been dropped, or there are an cracks, dents or other defects in the case or connector, replace the seat position sensor with a new one.**
- **When installing the seat position sensor, be careful that the SRS wiring does not interfere with other parts and that it is not pinched between other parts.**

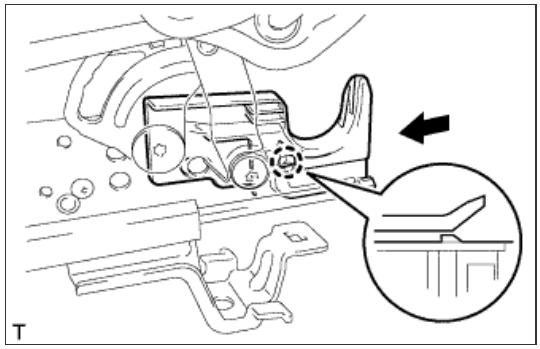
HINT:

Be sure that the clearance between the seat position sensor and the seat rail is within 0.6 to 1.4 mm (0.02 6 to 0.0551 in. .

d. Using a T30 "TORX" socket wrench, install the seat position sensor with the screw.

Torque:
8.0 N*m{ 82 kgf*cm , 71 in.*lbf }

e. Make sure that the clearance between the seat position sensor and the seat rail is within 0.6 to 1.4 mm (0.02 6 to 0.0551 in. .



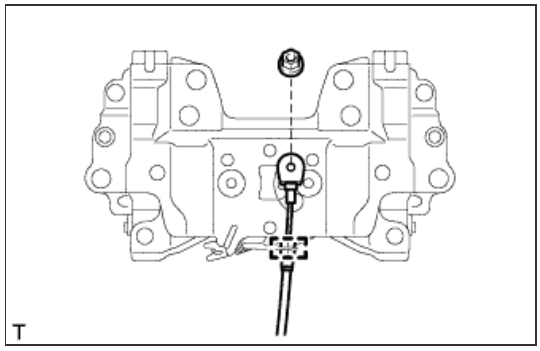
f. heck that there is no looseness in the installation parts of the seat position sensor.

g. onnect the connector.

h. Install the seat slide position sensor protector to the seat position sensor.

6. INSTALL FRONT LOWER SEAT CUSHION SHIELD RH

a. Attach the claw to install the lower seat cushion shield.

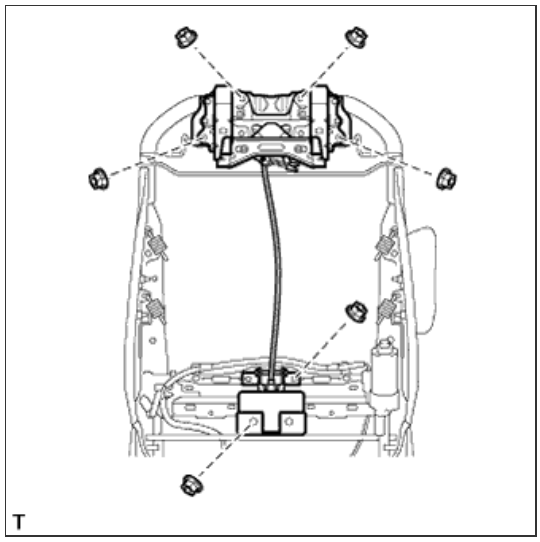


7. INSTALL FRONT LOWER SEAT CUSHION SHIELD LH

a. Attach the claw to install the lower seat cushion shield.

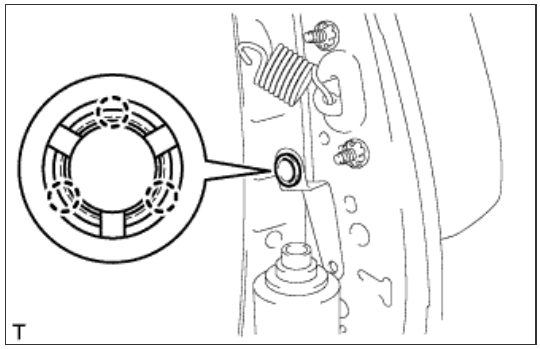
8. INSTALL UPPER ACTIVE HEADREST UNIT (w/ Active Headrest)

a. Install the upper active headrest unit to the lower active headrest unit with the cable clamp and nut.



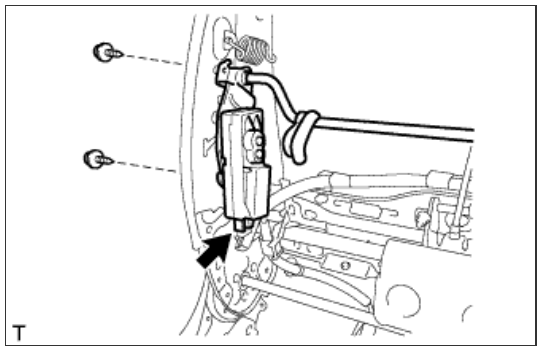
Torque:
5.0 N*m{ 51 kgf*cm , 44 in.*lbf }

9. INSTALL LOWER ACTIVE HEADREST UNIT (w/ Active Headrest)



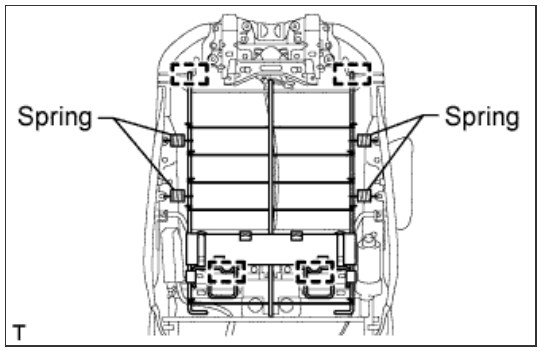
a. Install the lower active headrest unit together with the upper active headrest unit with the 6 nuts.

Torque:
Upper active headrest unit:
14 N*m{ 143 kgf*cm , 10 ft.*lbf }
Lower active headrest unit:
5.0 N*m{ 51 kgf*cm , 44 in.*lbf }



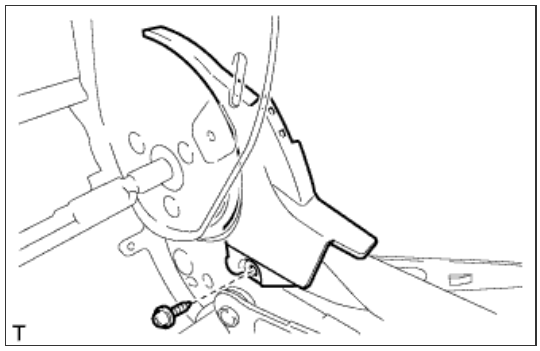
10. INSTALL LUMBAR SUPPORT ADJUSTER ASSEMBLY LH (w/Lumbar Support)

a. Attach the 3 claws to install the bush.



b. Install the lumbar support adjuster with the 2 screws.

c. onnect the lumbar support adjuster connector.



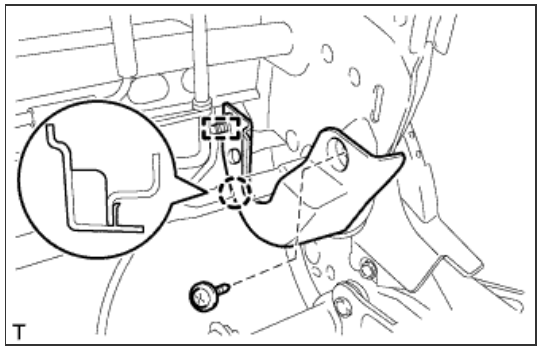
d. Attach the 4 hooks to install the seatback spring.

e. Install the 4 springs.

11. INSTALL OUTSIDE RECLINING ADJUSTER COVER RH

a. Install the outside reclining adjuster cover with the screw.

12. INSTALL OUTSIDE RECLINING ADJUSTER COVER LH



a. Install the outside reclining adjuster cover with the screw.

13. INSTALL INSIDE RECLINING ADJUSTER COVER RH

a. Attach the claw to install the inside reclining adjuster cover.

b. Install the screw.

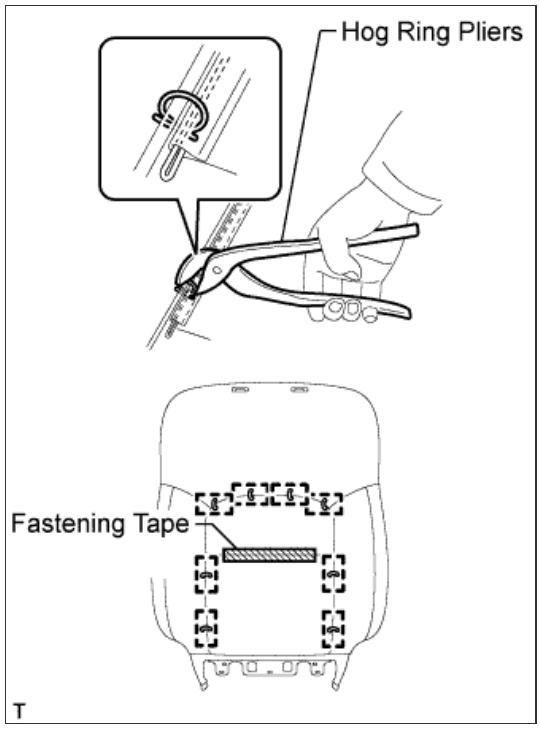
c. Attach the wire harness clamp.

14. INSTALL INSIDE RECLINING ADJUSTER COVER LH

a. Attach the claw to install the inside reclining adjuster cover.

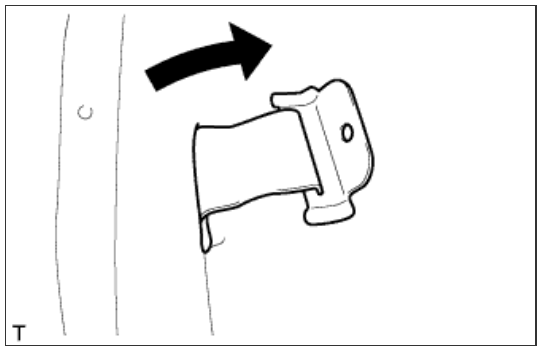
b. Install the screw.

c. Attach the wire harness clamp.



15. INSTALL FRONT SEPARATE TYPE SEATBACK COVER

a. Attach the fastening tape to install the seatback cover.



b. Using hog ring pliers, install new hog rings.

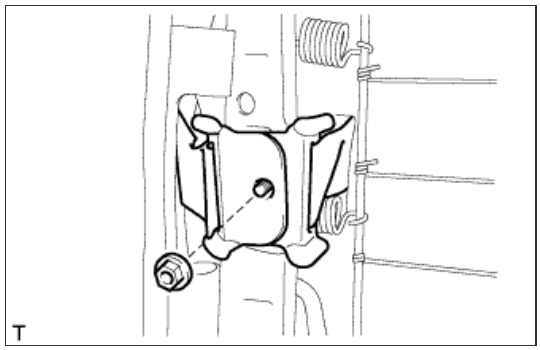
NOTICE:

- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**

c. w/ Front Seat Side Airbag:
onnect the seatback cover bracket to the seatback pad.

16. INSTALL SEATBACK COVER WITH PAD

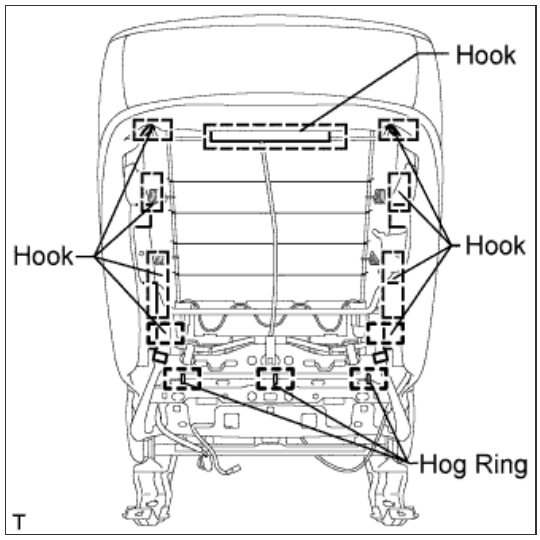
a. Install the seatback cover with pad to the seatback frame.



b. w/ Seatback Board:

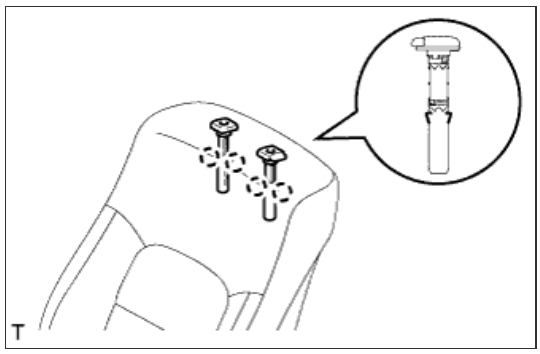
i. w/ Front Seat Side Airbag:
Install the seatback cover bracket to the seat frame with the nut.

Torque:
5.0 N*m{ 51 kgf*cm , 44 in.*lbf }



CAUTION:

After the seatback trim cover is assembled, make sure the side airbag strap is not twisted.

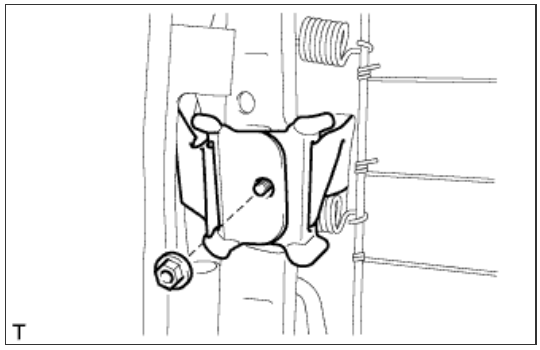


ii. Attach the hooks.

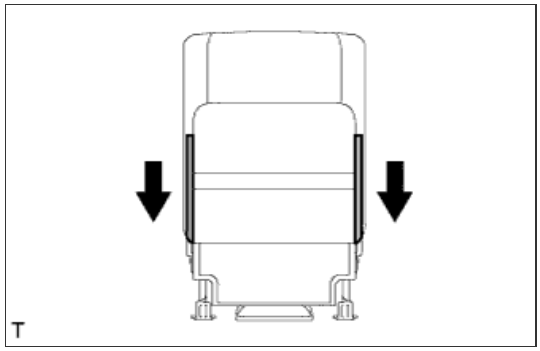
iii. Using hog ring pliers, install new hog rings to the seat frame.

c. w/o Seatback Board:

i. Attach the 4 claws to install the 2 headrest supports.

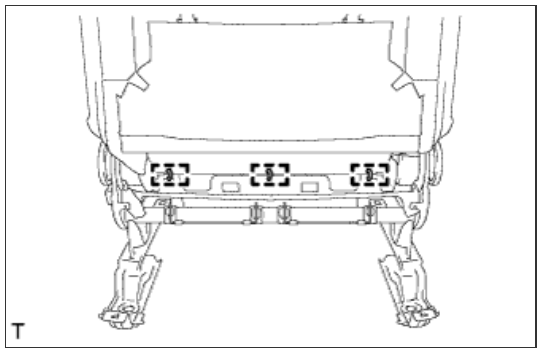


ii. w/ Front Seat Side Airbag:
Install the seatback cover bracket to the seat frame with the nut.



Torque:
5.0 N*m{ 51 kgf*cm , 44 in.*lbf }

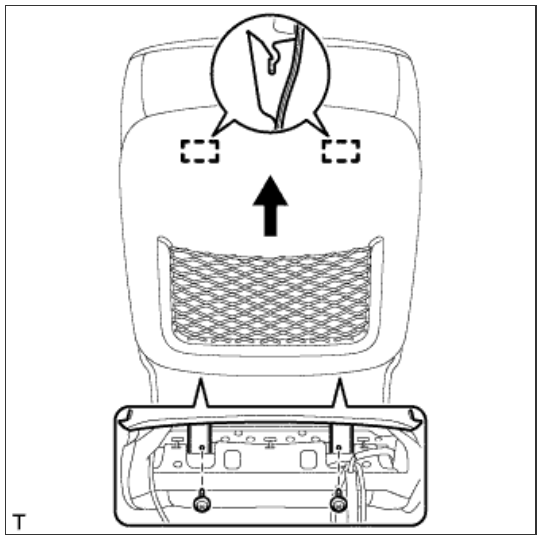
CAUTION:



After the seatback trim cover is assembled, make sure the side airbag strap is not twisted.

iii. lose the 2 fasteners, and then close the seatback cover.

iv. Using hog ring pliers, install new hog rings to the seat frame.



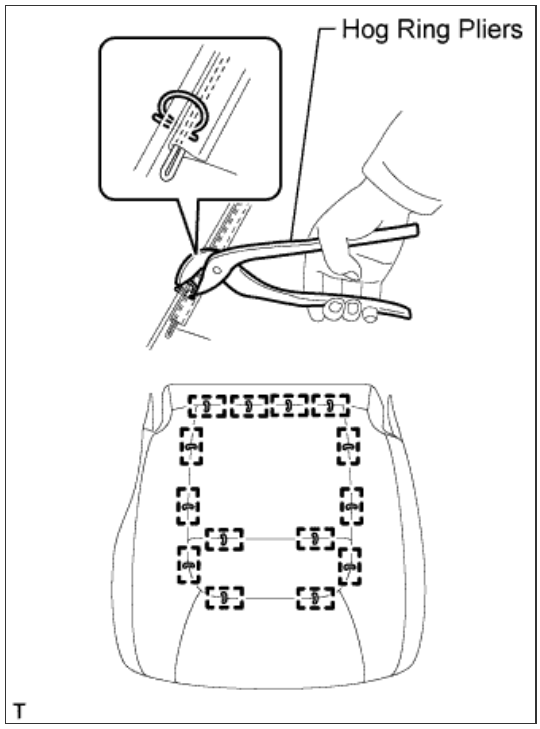
17. INSTALL FRONT SEAT HEADREST SUPPORT

a. Attach the 4 claws to install the 2 headrest supports.

18. INSTALL FRONT SEATBACK BOARD SUB-ASSEMBLY LH (w/ Seatback Board)

a. Move the seatback board in the direction of the arrow to attach the 2 hooks and install the seatback board.

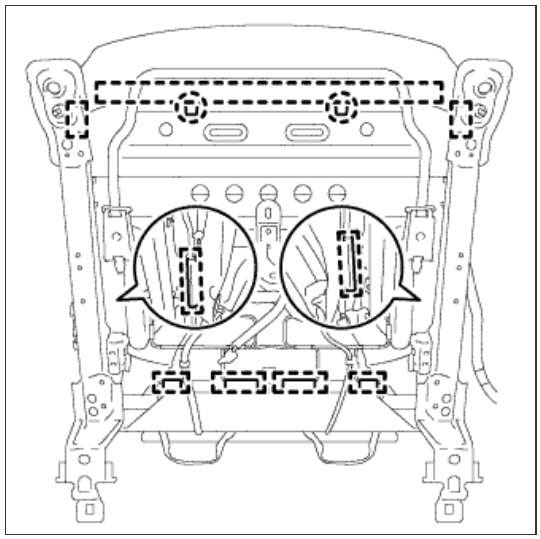
b. Install the 2 screws.



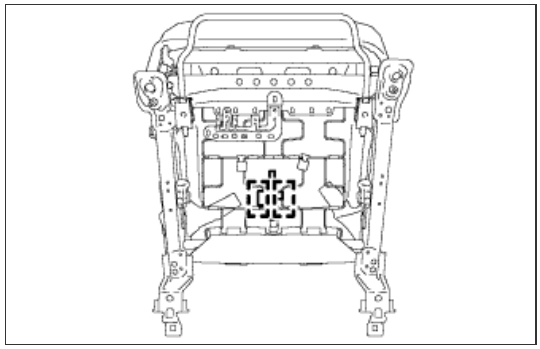
19. INSTALL FRONT SEPARATE TYPE SEAT CUSHION COVER

a. Using hog ring pliers, install the seat cushion cover to the seat cushion pad with new hog rings.

NOTICE:



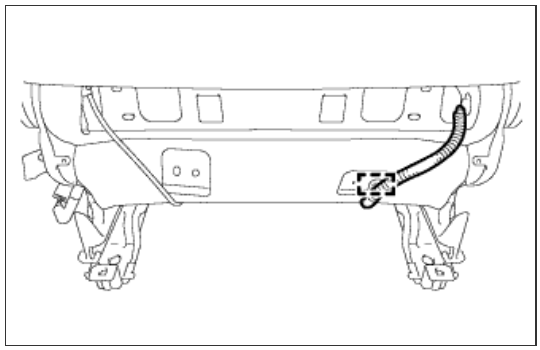
- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**



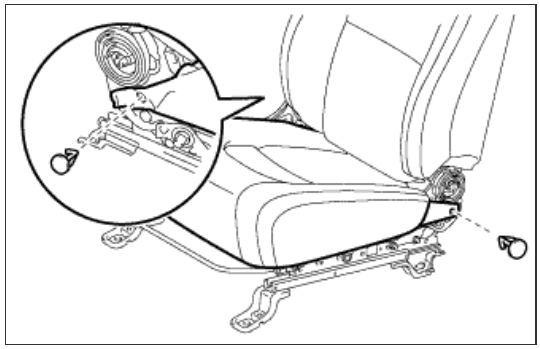
20. INSTALL SEAT CUSHION COVER WITH PAD

a. Attach the hooks to install the seat cushion cover with pad.

b. Bend the 2 seat frame claws downward.



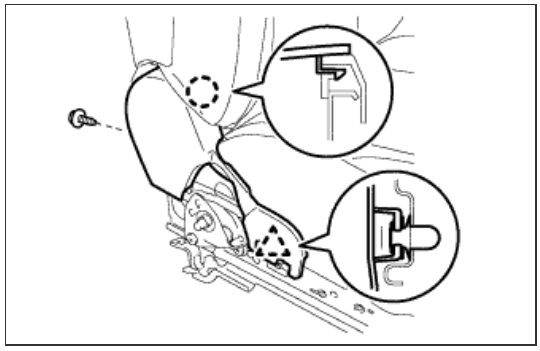
c. for Front Passenger Side:



i. Attach the 2 clamps to install the seat belt warning sensor connector.

ii. onnect the seat belt warning sensor connector.

d. Attach the wire harness clamp.



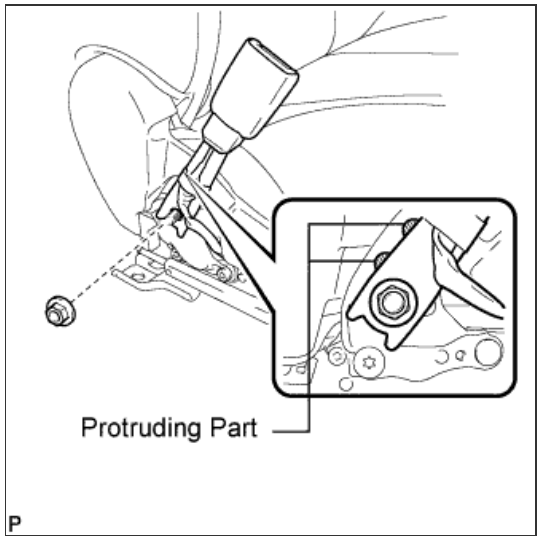
e. Install the 2 clips.

21. INSTALL FRONT INNER SEAT CUSHION SHIELD LH

a. Attach the claw and clip to install the cushion shield.

b. Install the screw.

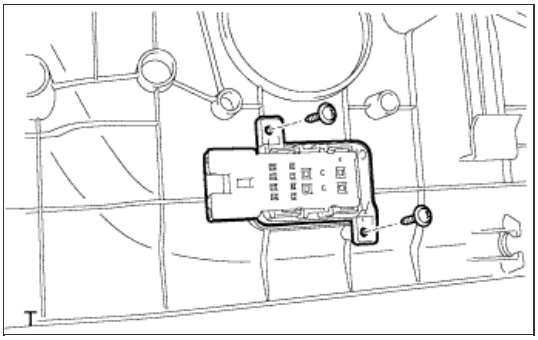
22. INSTALL FRONT SEAT INNER BELT ASSEMBLY LH



a. Install the front seat inner belt assembly with the nut.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

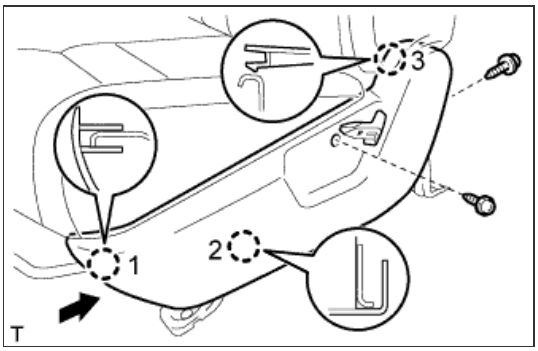


Do not allow the anchor part of the front seat inner belt assembly to overlap the protruding part of the front seat adjuster.

b. onnect the connectors and attach the clamps.

23. INSTALL LUMBAR SWITCH (w/ Lumbar Support)

a. Install the lumbar switch with the 2 screws.

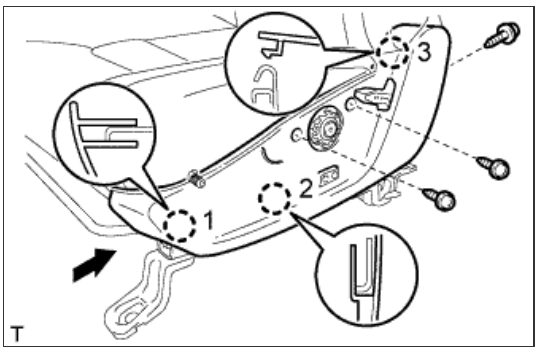


24. INSTALL FRONT SEAT CUSHION SHIELD LH

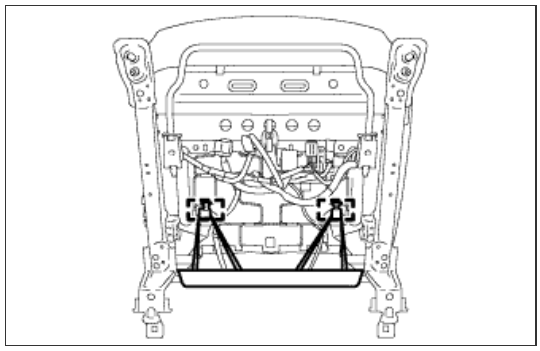
a. for 4 Way Seat Type:

i. Attach the 3 claws in the order shown in the illustration to install the cushion shield.

ii. Install the 2 screws.

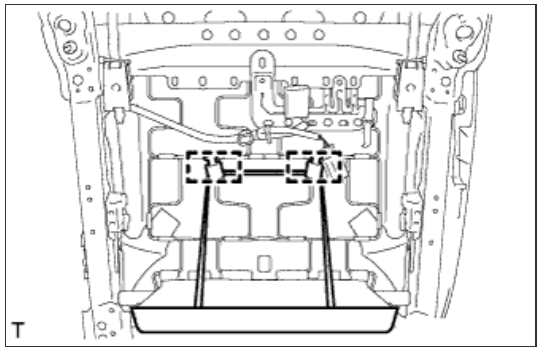


b. w/ Lumbar Support:
onnect the lumbar switch connector.



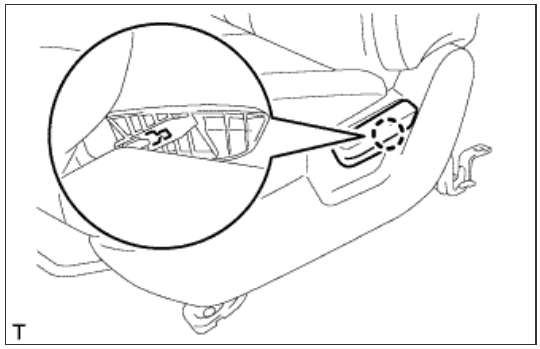
c. for 8 Way Seat Type:

i. Attach the 3 claws in the order shown in the illustration to install the cushion shield.



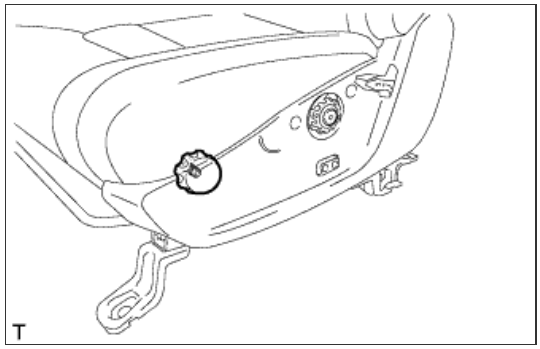
ii. Install the 3 screws.

d. w/ Seatback Board:
Attach the 2 rubber bands to the hooks.



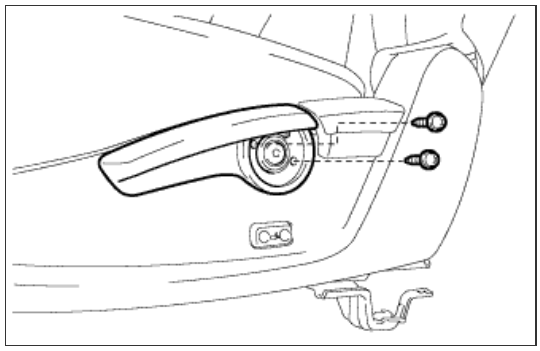
e. w/o Seatback Board:
Attach the 2 rubber bands to the hooks.

25. INSTALL RECLININ ADJUSTER RELEASE HANDLE LH



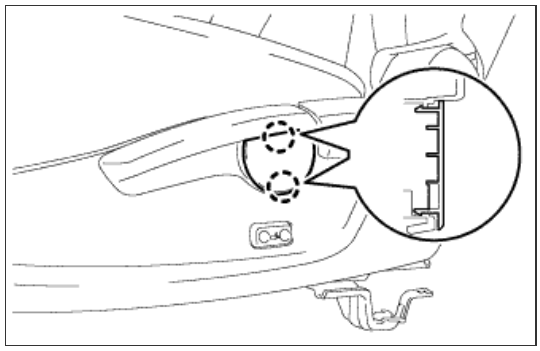
a. Attach the claw to install the reclining adjuster release handle.

26. INSTALL VERTICAL SEAT ADJUSTER KNOB (for 8 Way Seat Type)



a. Install the snap ring to the vertical seat adjuster knob.

b. Install the vertical seat adjuster knob to the front seat.



27. INSTALL VERTICAL ADJUSTING HANDLE LH (for 8 Way Seat Type)

a. Install the vertical adjusting handle with the 2 screws.

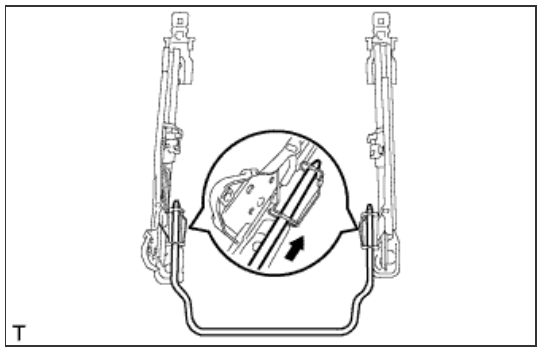
28. INSTALL VERTICAL ADJUSTER COVER LH (for 8 Way Seat Type)

a. Attach the 2 claws to install the vertical adjuster cover.

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

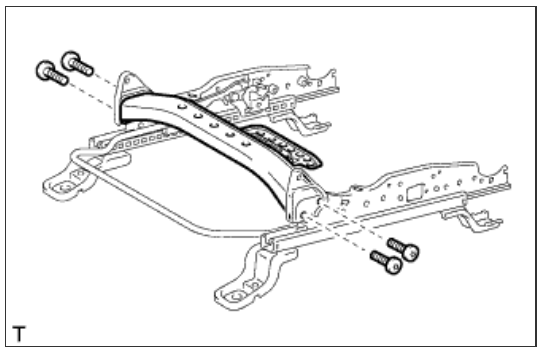


HINT:

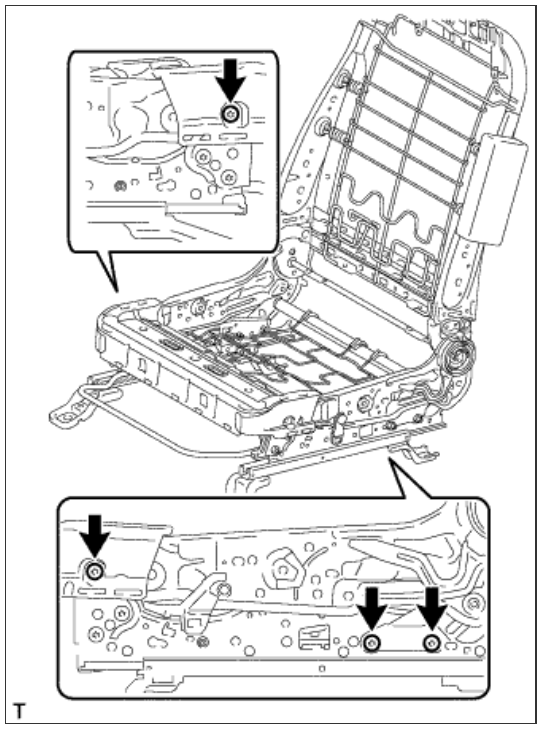
- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL FRONT OUTER SEAT TRACK ASSEMBLY LH

2. INSTALL FRONT INNER SEAT TRACK ASSEMBLY LH



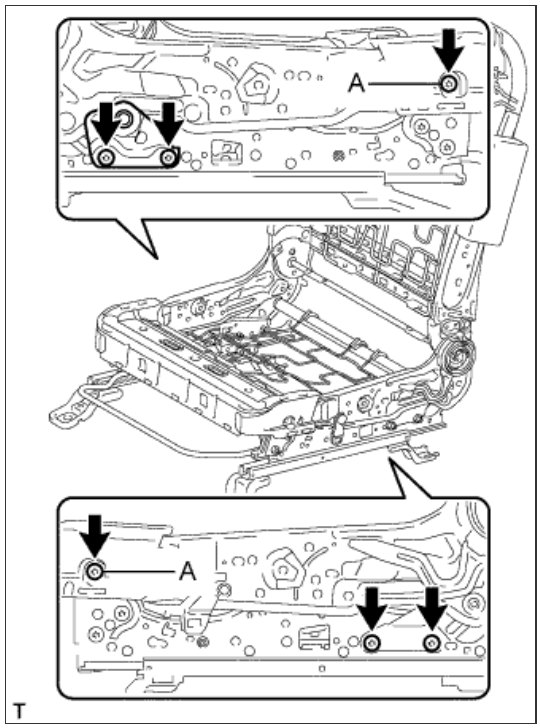
a. Attach the 2 springs to install the seat track adjusting handle as shown in the illustration.



b. for 4 Way Seat Type:

i. Using a T40 "TORX" socket, install the reinforcement with the 4 bolts.

Torque:
25 N*m{ 255 kgf*cm , 18 ft.*lbf }



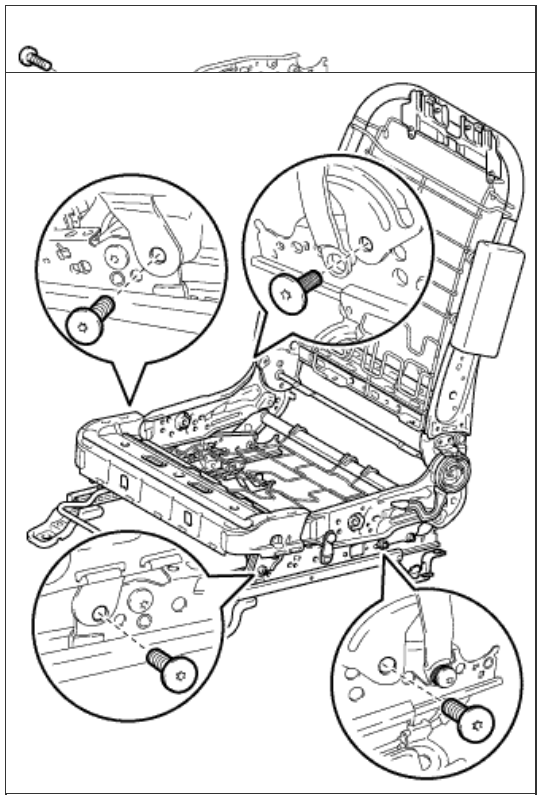
ii. Temporarily install the seat frame with adjuster with 4 bolts.

iii. Temporarily install the inner seat track bracket with 2 bolts.

iv. Using a T40 "TORX" socket, tighten the 6 bolts.

Torque:
25 N*m{ 255 kgf*cm , 18 ft.*lbf }
Bolt A:
13 N*m{ 133 kgf*cm , 10 ft.*lbf }

c. for 8 Way Seat Type:

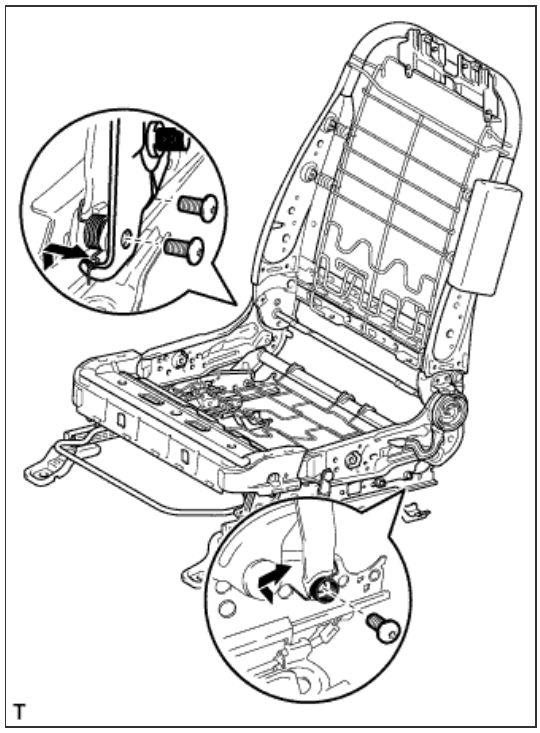


i. Using a T40 "TORX" socket, install the reinforcement with the 2 bolts.

Torque:
25 N*m{ 255 kgf*cm , 18 ft.*lbf }

ii. Temporarily install the seat frame with adjuster with the 4 bolts.

iii. Using a T40 "TORX" socket, tighten the 4 bolts.



Torque:
25 N*m{ 255 kgf*cm , 18 ft.*lbf }

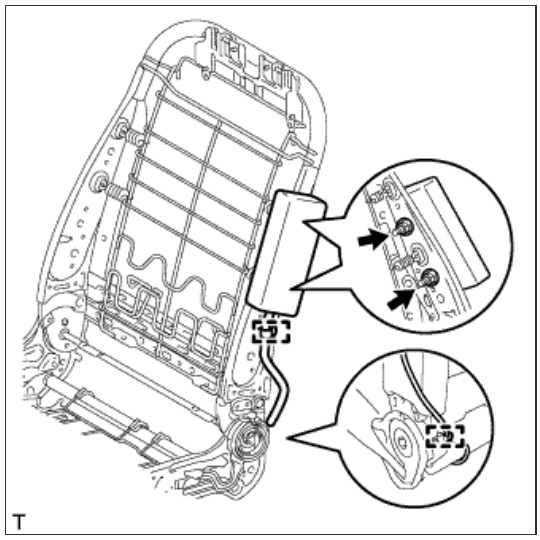
iv. Using a T40 "TORX" socket, install the inner seat track bracket with the 3 bolts.

Torque:
25 N*m{ 255 kgf*cm , 18 ft.*lbf }

v. Install the 2 springs.

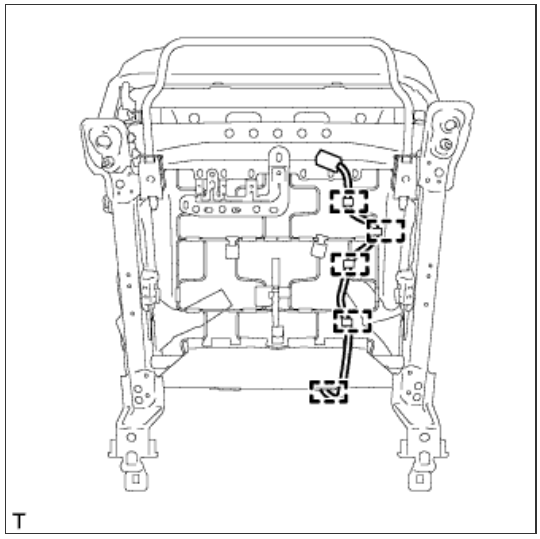
3. INSTALL FRONT SEAT WIRE LH

4. INSTALL FRONT SEAT SIDE AIRBAG ASSEMBLY LH



CAUTION:

Make sure that the seat frame assembly is not deformed. If it is, replace it with a new one.



a. Install the front seat side airbag assembly with 2 nuts.

Torque:
5.5 N*m{ 56 kgf*cm , 49 in.*lbf }

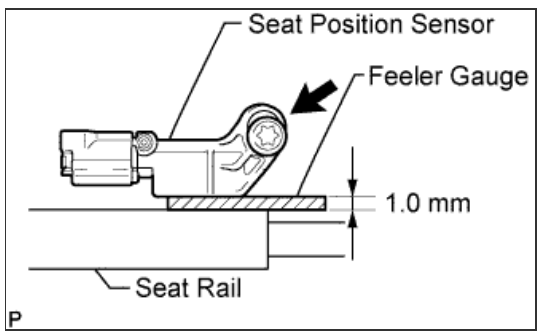
b. Attach the 2 clamps to connect the wire harness.

c. Attach the 5 clamps to connect the wire harness.

5. INSTALL SEAT POSITION SENSOR

a. heck that the engine switch is off.

b. heck that the cable is disconnected from the battery negative (- terminal.



CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (- battery terminal to disable the SRS system.

c. Using a 1.0 mm (0.0393 in. feeler gauge, install the seat position sensor.

NOTICE:

- **If the seat position sensor has been dropped, or there are an cracks, dents or other defects in the case or connector, replace the seat position sensor with a new one.**
- **When installing the seat position sensor, be careful that the SRS wiring does not interfere with other parts and that it is not pinched between other parts.**

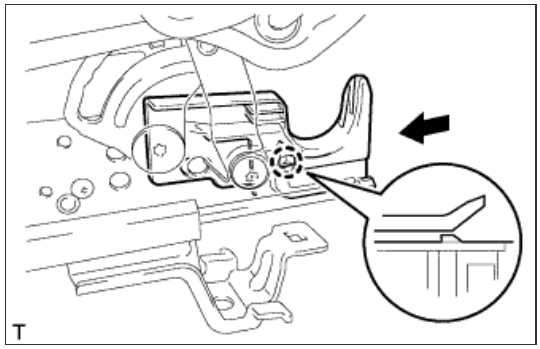
HINT:

Be sure that the clearance between the seat position sensor and the seat rail is within 0.6 to 1.4 mm (0.02 6 to 0.0551 in. .

d. Using a T30 "TORX" socket wrench, install the seat position sensor with the screw.

Torque:
8.0 N*m{ 82 kgf*cm , 71 in.*lbf }

e. Make sure that the clearance between the seat position sensor and the seat rail is within 0.6 to 1.4 mm (0.02 6 to 0.0551 in. .



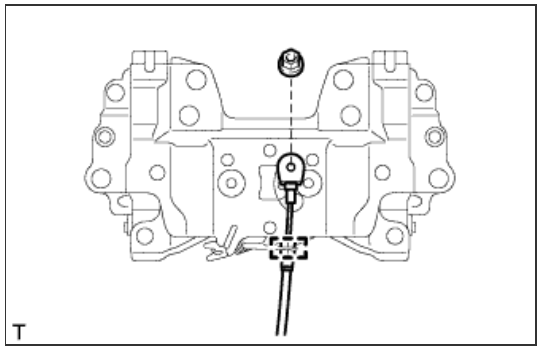
f. heck that there is no looseness in the installation parts of the seat position sensor.

g. onnect the connector.

h. Install the seat slide position sensor protector to the seat position sensor.

6. INSTALL FRONT LOWER SEAT CUSHION SHIELD RH

a. Attach the claw to install the lower seat cushion shield.

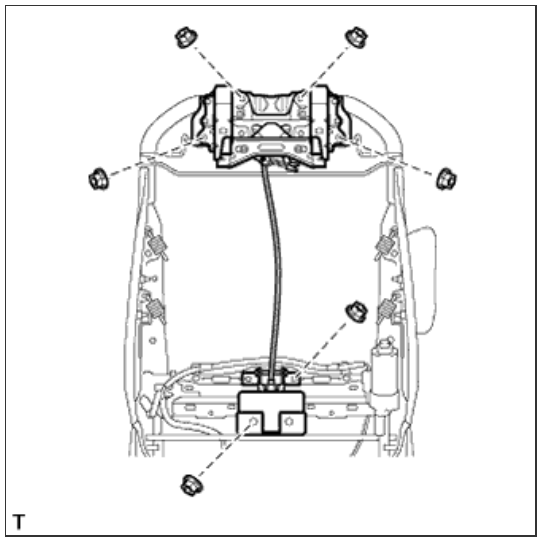


7. INSTALL FRONT LOWER SEAT CUSHION SHIELD LH

a. Attach the claw to install the lower seat cushion shield.

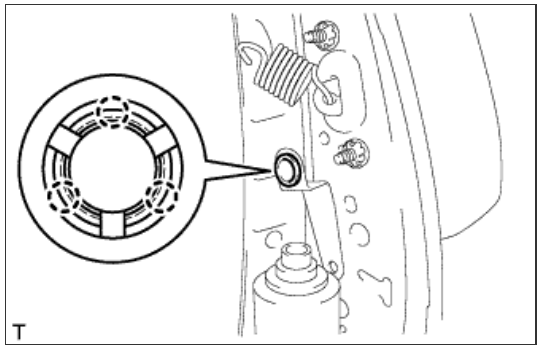
8. INSTALL UPPER ACTIVE HEADREST UNIT (w/ Active Headrest)

a. Install the upper active headrest unit to the lower active headrest unit with the cable clamp and nut.



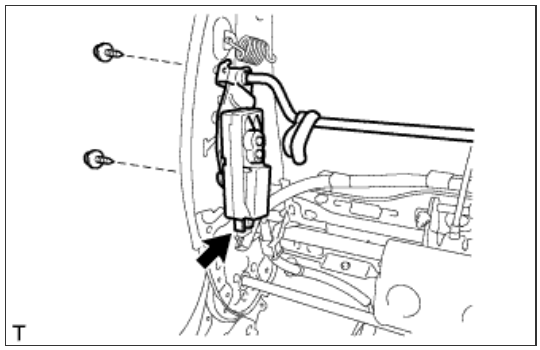
Torque:
5.0 N*m{ 51 kgf*cm , 44 in.*lbf }

9. INSTALL LOWER ACTIVE HEADREST UNIT (w/ Active Headrest)



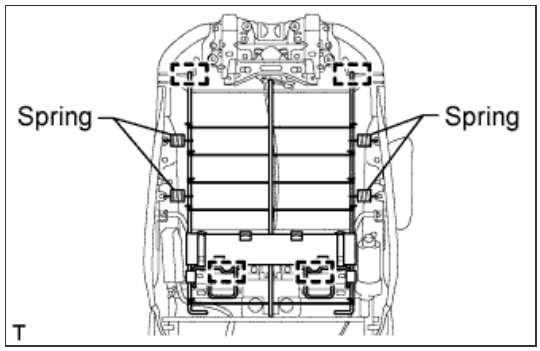
a. Install the lower active headrest unit together with the upper active headrest unit with the 6 nuts.

Torque:
Upper active headrest unit:
14 N*m{ 143 kgf*cm , 10 ft.*lbf }
Lower active headrest unit:
5.0 N*m{ 51 kgf*cm , 44 in.*lbf }



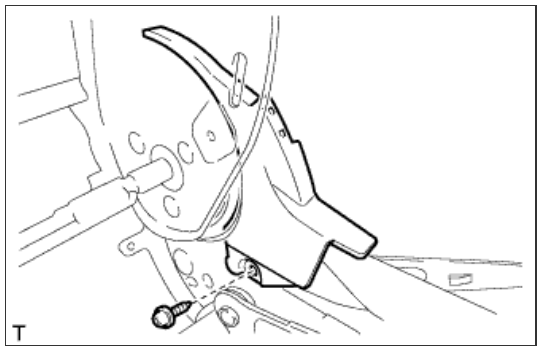
10. INSTALL LUMBAR SUPPORT ADJUSTER ASSEMBLY LH (w/Lumbar Support)

a. Attach the 3 claws to install the bush.



b. Install the lumbar support adjuster with the 2 screws.

c. onnect the lumbar support adjuster connector.



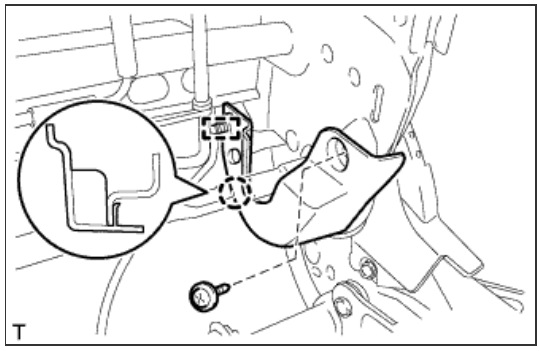
d. Attach the 4 hooks to install the seatback spring.

e. Install the 4 springs.

11. INSTALL OUTSIDE RECLINING ADJUSTER COVER RH

a. Install the outside reclining adjuster cover with the screw.

12. INSTALL OUTSIDE RECLINING ADJUSTER COVER LH



a. Install the outside reclining adjuster cover with the screw.

13. INSTALL INSIDE RECLINING ADJUSTER COVER RH

a. Attach the claw to install the inside reclining adjuster cover.

b. Install the screw.

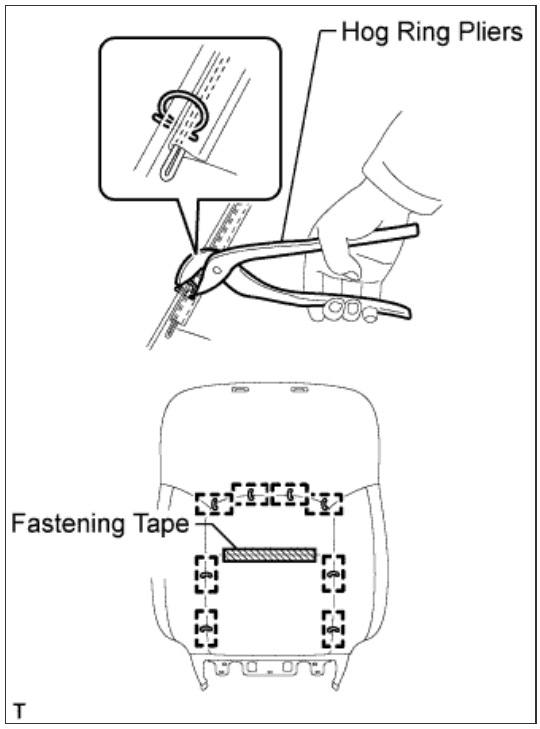
c. Attach the wire harness clamp.

14. INSTALL INSIDE RECLINING ADJUSTER COVER LH

a. Attach the claw to install the inside reclining adjuster cover.

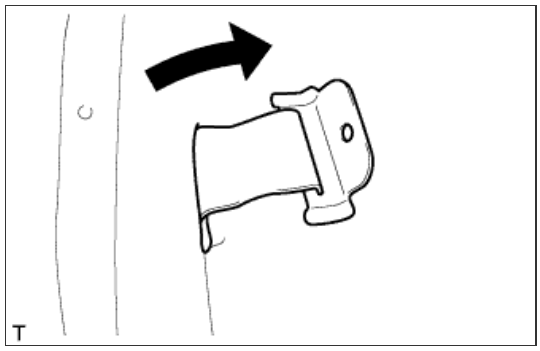
b. Install the screw.

c. Attach the wire harness clamp.



15. INSTALL FRONT SEPARATE TYPE SEATBACK COVER

a. Attach the fastening tape to install the seatback cover.



b. Using hog ring pliers, install new hog rings.

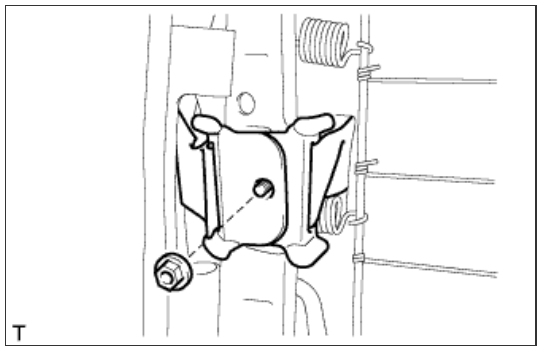
NOTICE:

- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**

c. w/ Front Seat Side Airbag:
onnect the seatback cover bracket to the seatback pad.

16. INSTALL SEATBACK COVER WITH PAD

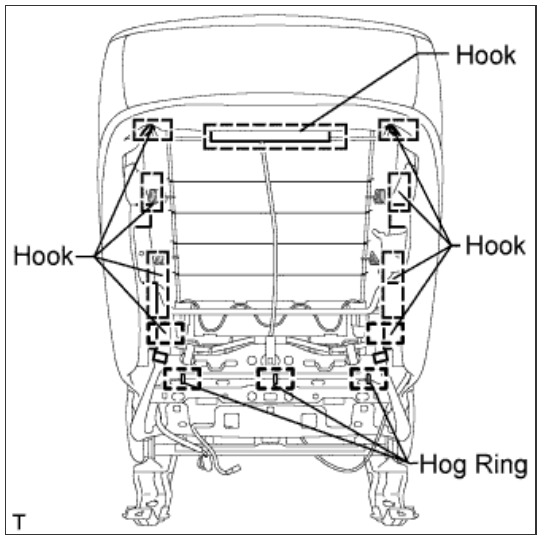
a. Install the seatback cover with pad to the seatback frame.



b. w/ Seatback Board:

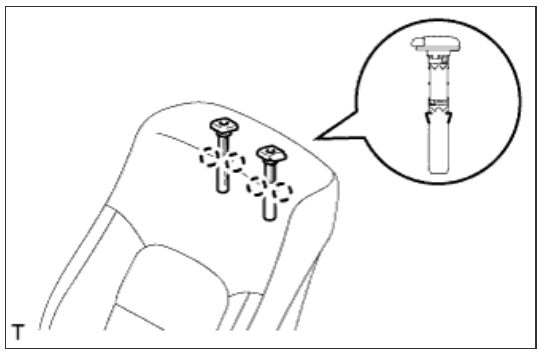
i. w/ Front Seat Side Airbag:
Install the seatback cover bracket to the seat frame with the nut.

Torque:
5.0 N*m{ 51 kgf*cm , 44 in.*lbf }



CAUTION:

After the seatback trim cover is assembled, make sure the side airbag strap is not twisted.

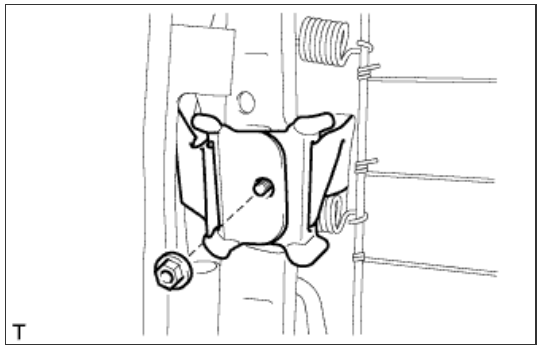


ii. Attach the hooks.

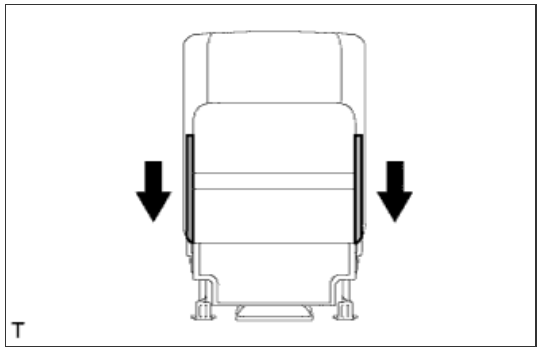
iii. Using hog ring pliers, install new hog rings to the seat frame.

c. w/o Seatback Board:

i. Attach the 4 claws to install the 2 headrest supports.

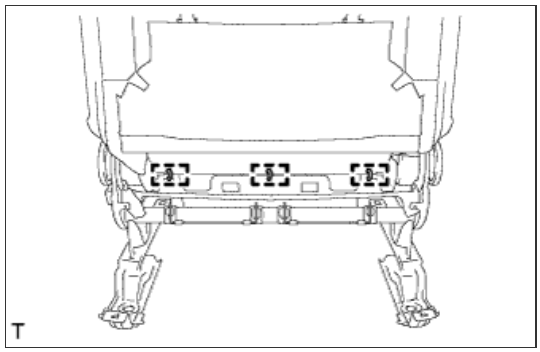


ii. w/ Front Seat Side Airbag:
Install the seatback cover bracket to the seat frame with the nut.



Torque:
5.0 N*m{ 51 kgf*cm , 44 in.*lbf }

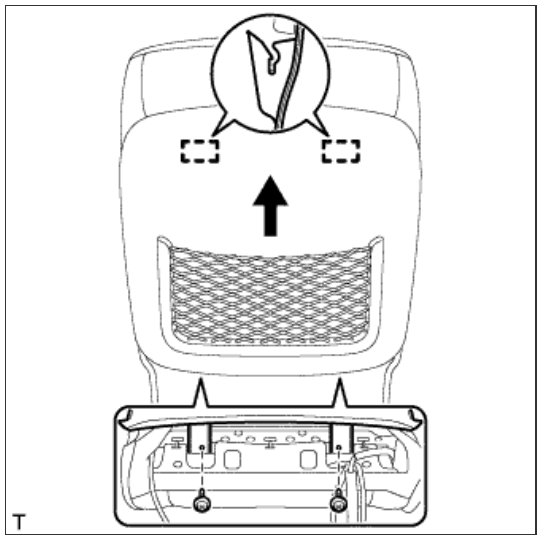
CAUTION:



After the seatback trim cover is assembled, make sure the side airbag strap is not twisted.

iii. lose the 2 fasteners, and then close the seatback cover.

iv. Using hog ring pliers, install new hog rings to the seat frame.



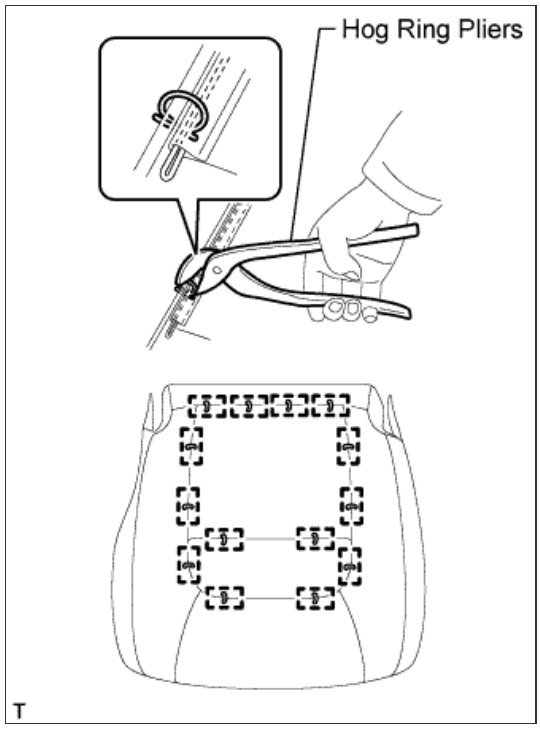
17. INSTALL FRONT SEAT HEADREST SUPPORT

a. Attach the 4 claws to install the 2 headrest supports.

18. INSTALL FRONT SEATBACK BOARD SUB-ASSEMBLY LH (w/ Seatback Board)

a. Move the seatback board in the direction of the arrow to attach the 2 hooks and install the seatback board.

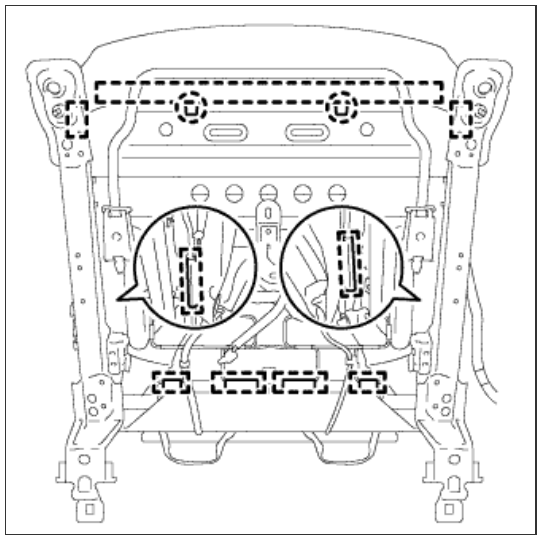
b. Install the 2 screws.



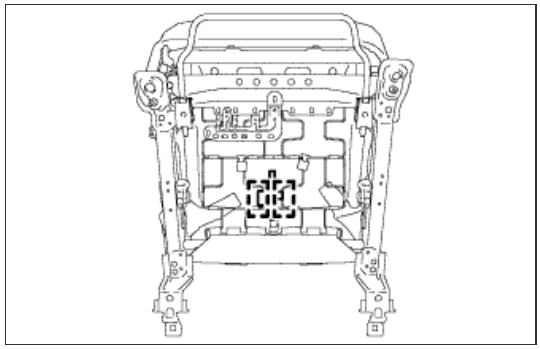
19. INSTALL FRONT SEPARATE TYPE SEAT CUSHION COVER

a. Using hog ring pliers, install the seat cushion cover to the seat cushion pad with new hog rings.

NOTICE:



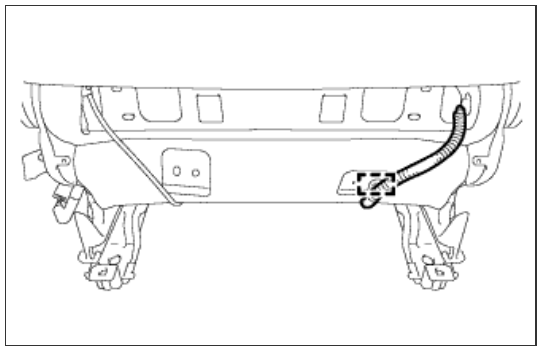
- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**



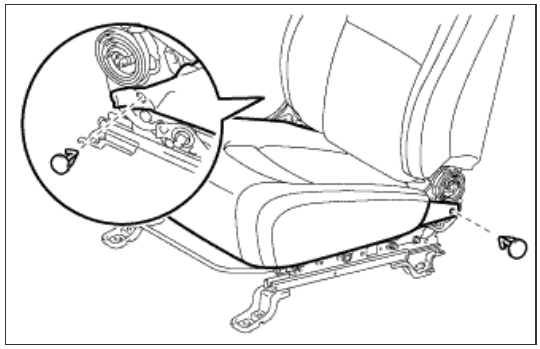
20. INSTALL SEAT CUSHION COVER WITH PAD

a. Attach the hooks to install the seat cushion cover with pad.

b. Bend the 2 seat frame claws downward.



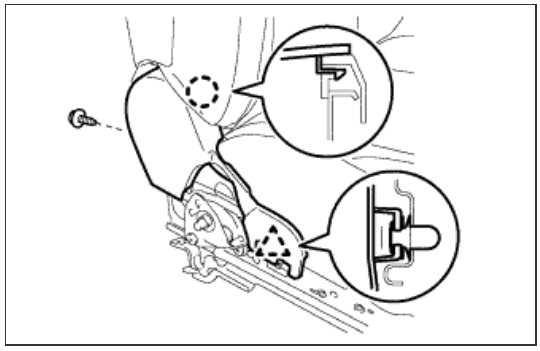
c. for Front Passenger Side:



i. Attach the 2 clamps to install the seat belt warning sensor connector.

ii. onnect the seat belt warning sensor connector.

d. Attach the wire harness clamp.



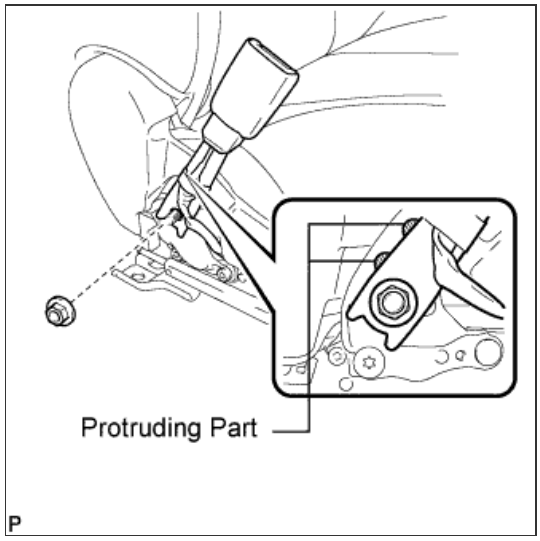
e. Install the 2 clips.

21. INSTALL FRONT INNER SEAT CUSHION SHIELD LH

a. Attach the claw and clip to install the cushion shield.

b. Install the screw.

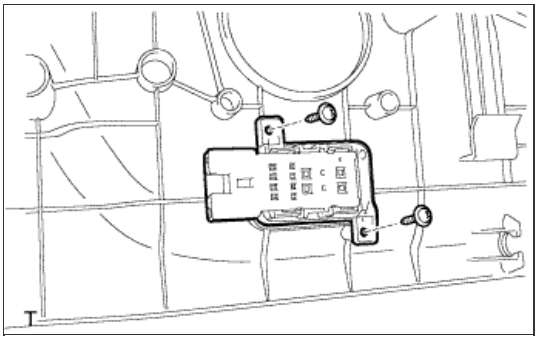
22. INSTALL FRONT SEAT INNER BELT ASSEMBLY LH



a. Install the front seat inner belt assembly with the nut.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

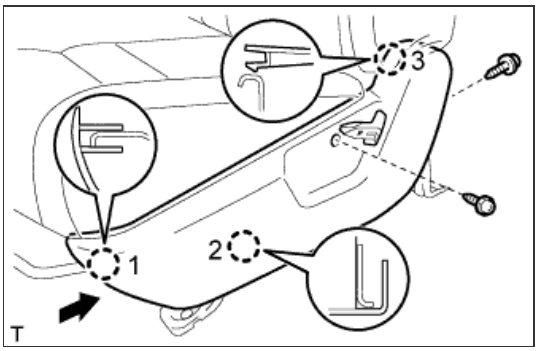


Do not allow the anchor part of the front seat inner belt assembly to overlap the protruding part of the front seat adjuster.

b. onnect the connectors and attach the clamps.

23. INSTALL LUMBAR SWITCH (w/ Lumbar Support)

a. Install the lumbar switch with the 2 screws.

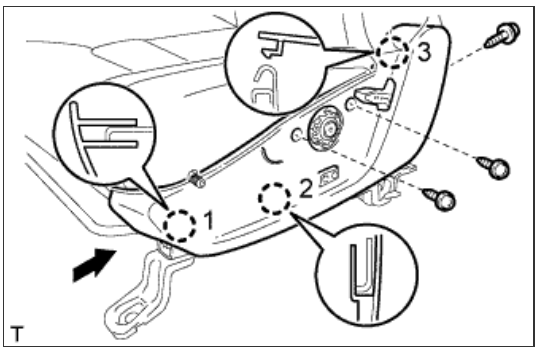


24. INSTALL FRONT SEAT CUSHION SHIELD LH

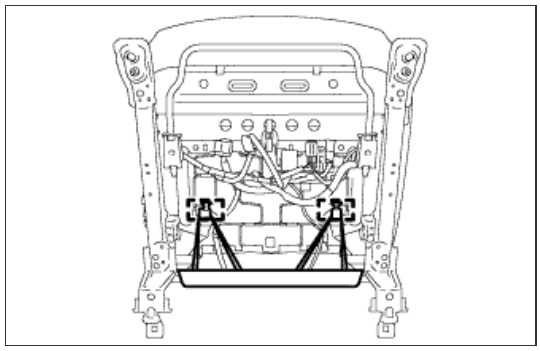
a. for 4 Way Seat Type:

i. Attach the 3 claws in the order shown in the illustration to install the cushion shield.

ii. Install the 2 screws.

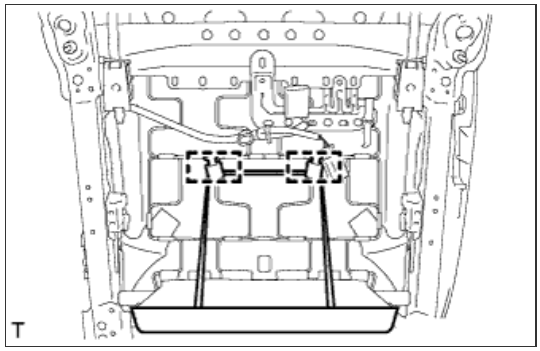


b. w/ Lumbar Support:
onnect the lumbar switch connector.



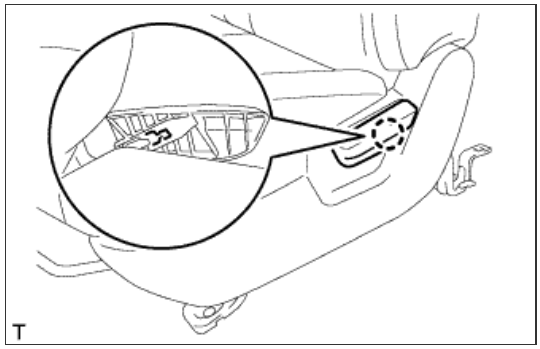
c. for 8 Way Seat Type:

i. Attach the 3 claws in the order shown in the illustration to install the cushion shield.



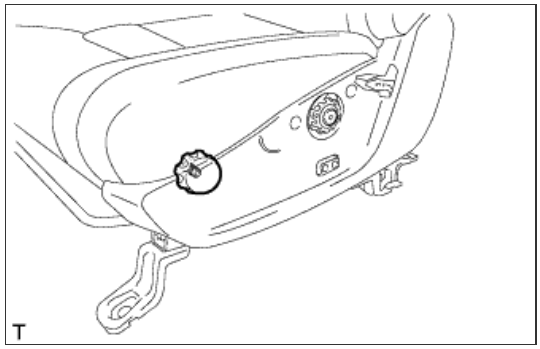
ii. Install the 3 screws.

d. w/ Seatback Board:
Attach the 2 rubber bands to the hooks.



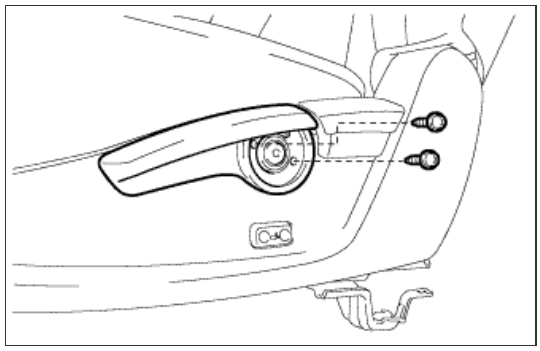
e. w/o Seatback Board:
Attach the 2 rubber bands to the hooks.

25. INSTALL RECLININ ADJUSTER RELEASE HANDLE LH



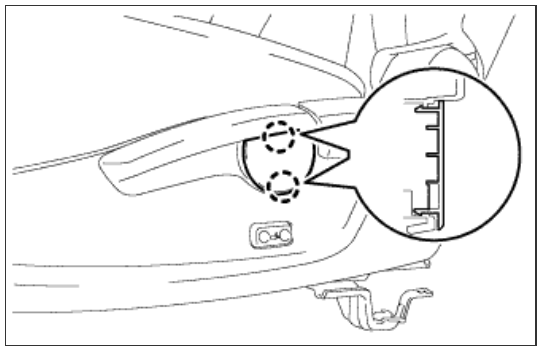
a. Attach the claw to install the reclining adjuster release handle.

26. INSTALL VERTICAL SEAT ADJUSTER KNOB (for 8 Way Seat Type)



a. Install the snap ring to the vertical seat adjuster knob.

b. Install the vertical seat adjuster knob to the front seat.



27. INSTALL VERTICAL ADJUSTING HANDLE LH (for 8 Way Seat Type)

a. Install the vertical adjusting handle with the 2 screws.

28. INSTALL VERTICAL ADJUSTER COVER LH (for 8 Way Seat Type)

a. Attach the 2 claws to install the vertical adjuster cover.

for Preparation Click here

HINT:

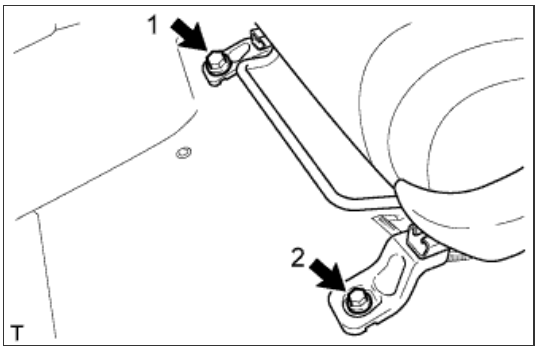
- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL FRONT SEAT ASSEMBLY LH

a. Place the front seat assembly in the cabin.

NOTICE:

Be careful not to damage the vehicle body.



b. Connect the seat wire connectors under the seat.

c. Temporarily install the front seat assembly with the 4 bolts.

d. Operate the seat track adjusting handle to move the seat to the rearmost position.

e. Tighten the bolts in the order indicated in the illustration.

Torque:
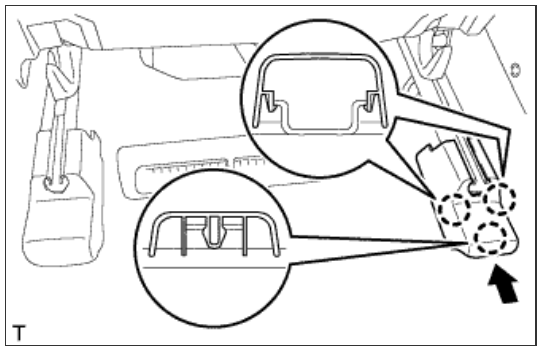
37 N*m{ 377 kgf*cm , 27 ft.*lbf }

f. Operate the seat track adjusting handle to move the seat to the foremost position.



g. Tighten the bolts in the order indicated in the illustration.

Torque:
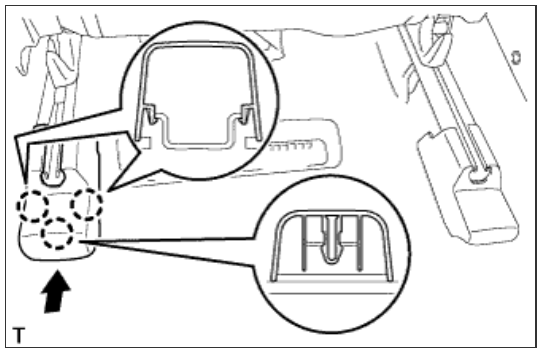
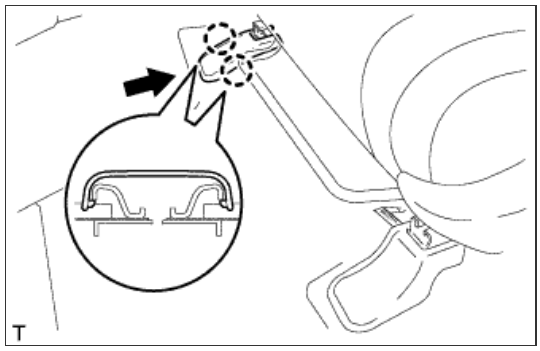
37 N*m{ 377 kgf*cm , 27 ft.*lbf }



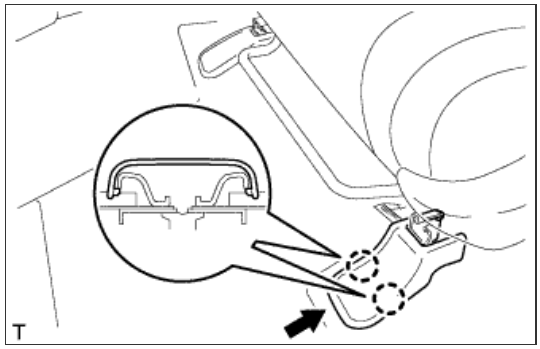
2. INSTALL REAR INNER SEAT TRACK BRACKET COVER LH

a. Attach the 3 claws to install the seat track cover.



3. INSTALL REAR OUTER FRONT SEAT TRACK COVER LH

a. Attach the 3 claws to install the seat track cover.



4. INSTALL FRONT INNER SEAT TRACK BRACKET COVER LH

a. Attach the 2 claws to install the seat track bracket cover.

5. INSTALL FRONT OUTER SEAT TRACK BRACKET COVER LH

a. Attach the 2 claws to install the seat track bracket cover.

6. INSTALL FRONT SEAT HEADREST ASSEMBLY

7. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL

a. Connect the cable to the negative (-) battery terminal.

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

b. Restore the Autoaway/Return function setting to the previous condition by changing the customize parameter (Click here).

8. CHECK SRS WARNING LIGHT

a. Check the SRS warning light (Click here).

9. INSPECT FRONT SEAT ASSEMBLY

for Preparation Click here

HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

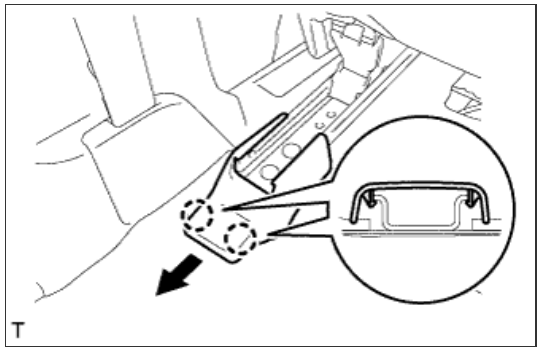
1. REMOVE FRONT SEAT HEADREST ASSEMBLY



2. REMOVE REAR OUTER SEAT TRACK BRACKET COVER LH

a. Operate the power seat switch (slide switch) to move the seat to the foremost position.

b. Using a screwdriver, detach the 2 claws and remove the cover.

HINT:

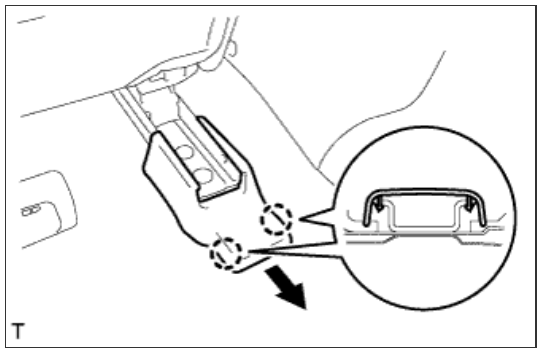
Tape the screwdriver tip before use.



3. REMOVE REAR INNER SEAT TRACK BRACKET COVER LH

a. Using a screwdriver, detach the 2 claws and remove the cover.

HINT:

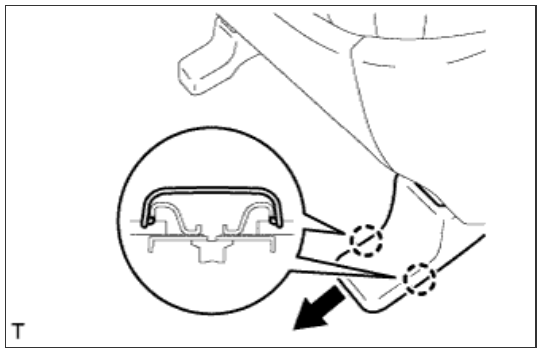
Tape the screwdriver tip before use.



4. REMOVE FRONT OUTER SEAT TRACK BRACKET COVER LH

a. Operate the power seat switch (slide switch) to move the seat to the rearmost position.

b. Using a screwdriver, detach the 2 claws and remove the cover.

HINT:

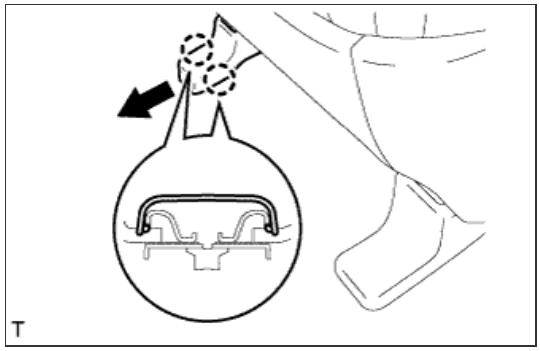
Tape the screwdriver tip before use.



5. REMOVE FRONT INNER SEAT TRACK BRACKET COVER LH

a. Using a screwdriver, detach the 2 claws and remove the cover.

HINT:

Tape the screwdriver tip before use.

6. REMOVE FRONT SEAT ASSEMBLY LH

a. Disable the Autoaway/Return function by changing the customize parameter (Click here).

NOTICE:

Record the current customize parameter setting (whether the Autoaway/Return function is enabled or disabled) in order to restore the current setting after finishing the operation.

HINT:

Performing the above operation causes the Autoaway/Return function to be disabled when the engine switch is turned off.

b. Turn the engine switch on (IG). Operate the tilt and telescopic switch to fully retract and tilt up the steering column assembly.

c. Turn the engine switch off.

d. Remove the 2 bolts.

e. Operate the power seat switch (slide switch) to move the seat to the foremost position.

f. Remove the 2 bolts.

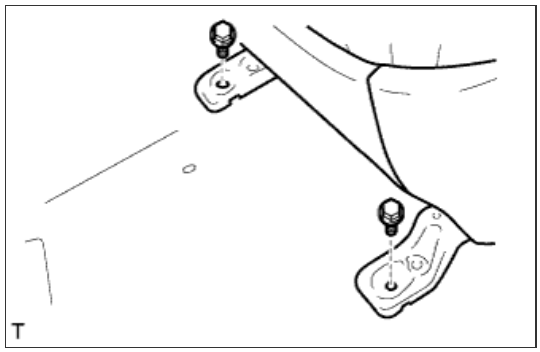
g. Operate the power seat switch (slide switch) and move the seat to the center position, and operate the power seat switch (reclining switch) and move the seatback to the upright position.

h. Disconnect the cable from the negative (-) battery terminal.

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

NOTICE:



When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

i. Disconnect the connectors under the seat.

j. Remove the front seat assembly.

NOTICE:

Be careful not to damage the vehicle body.

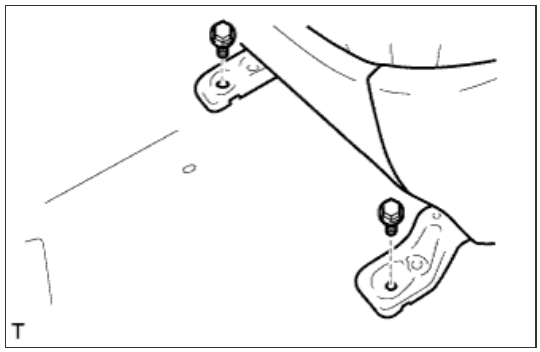
CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

NOTICE:



When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

i. Disconnect the connectors under the seat.

j. Remove the front seat assembly.

NOTICE:

Be careful not to damage the vehicle body.

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

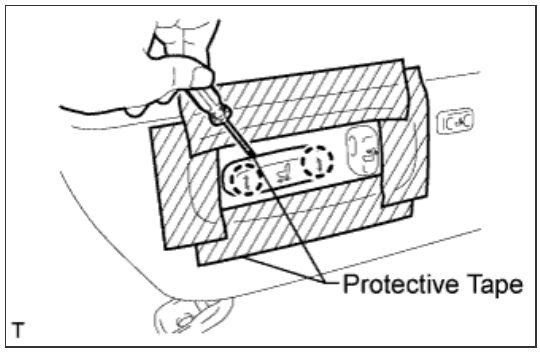
- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**



1. REMOVE SLIDE AND VERTICAL POWER SEAT SWITCH KNOB

a. Apply protective tape around the cushion shield.

b. Using a screwdriver, detach the 2 claws and remove the knob.

HINT:

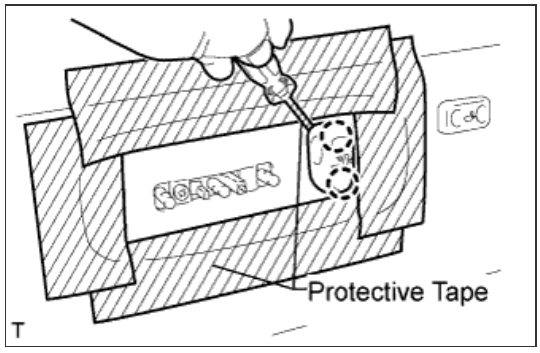
Tape the screwdriver tip before use.



2. REMOVE RECLINING POWER SEAT SWITCH KNOB

a. Using a screwdriver, detach the 2 claws and remove the knob.

HINT:

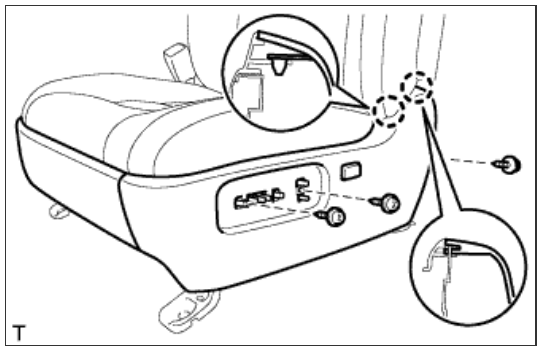
Tape the screwdriver tip before use.

3. REMOVE FRONT SEAT CUSHION SHIELD LH

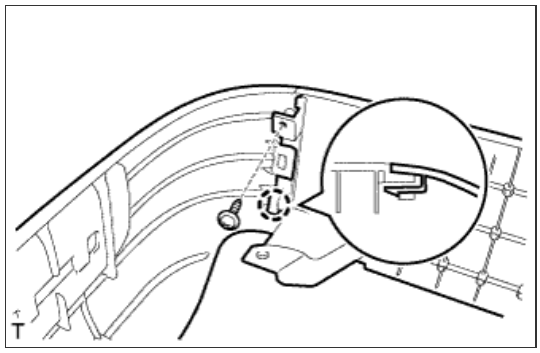
a. Remove the 2 rubber bands from the hooks.



b. Remove the 2 screws.

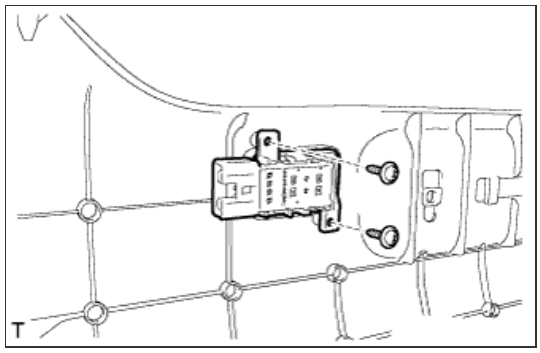
c. Remove the 3 screws.

d. Detach the 2 claws and remove the cushion shield.



e. for Driver Side:
Disconnect the power seat lumbar switch connectors.

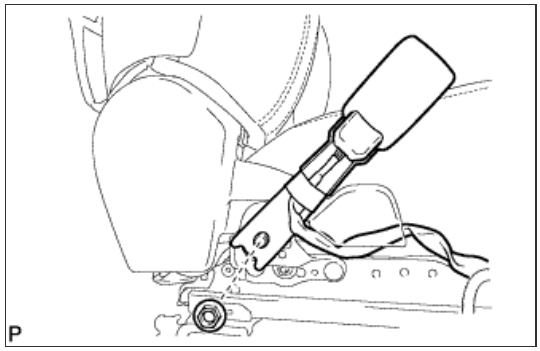
4. REMOVE FRONT INNER NO. 1 SEAT CUSHION SHIELD LH



a. Remove the screw.

b. Detach the claw and remove the cushion shield.

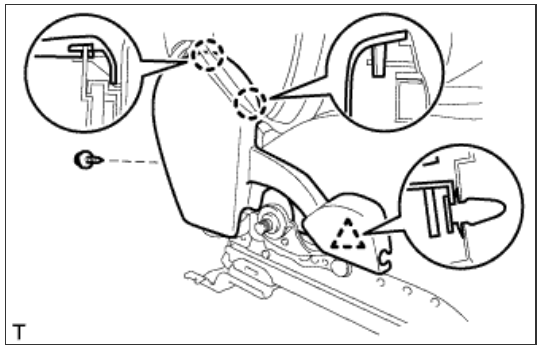
5. REMOVE LUMBAR SWITCH (for Driver Side)



a. Remove the 2 screws and switch.

6. REMOVE FRONT SEAT INNER BELT ASSEMBLY LH

a. Disconnect the connectors and detach the clamps.

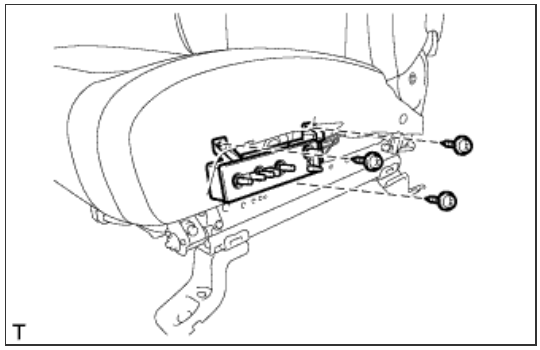


b. Remove the nut and front seat inner belt assembly.

7. REMOVE FRONT INNER SEAT CUSHION SHIELD LH

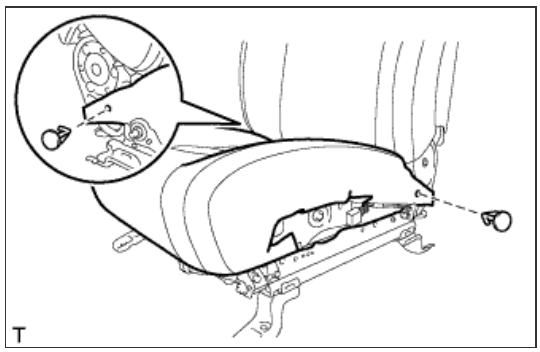
a. Remove the screw.

b. Detach the 2 claws and clip, and then remove the cushion shield.



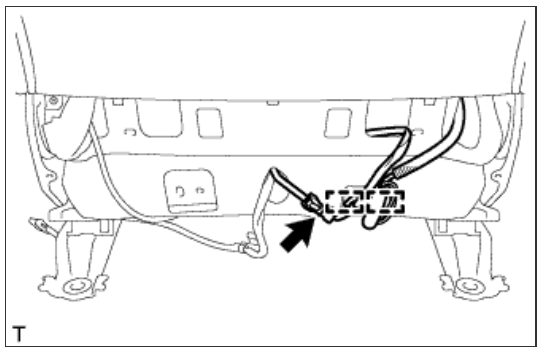
8. REMOVE FRONT POWER SEAT SWITCH LH

a. w/ Seat Position Memory System:
Disconnect the 2 connectors.

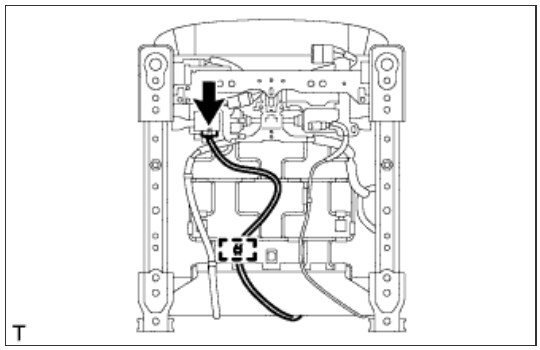


b. w/o Seat Position Memory System:
Disconnect the connector.

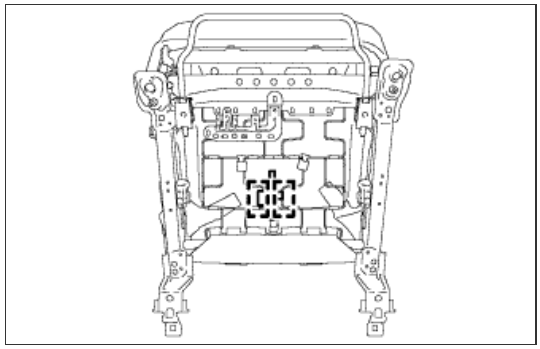
c. Remove the 3 screws and switch.



9. REMOVE SEAT CUSHION COVER WITH PAD



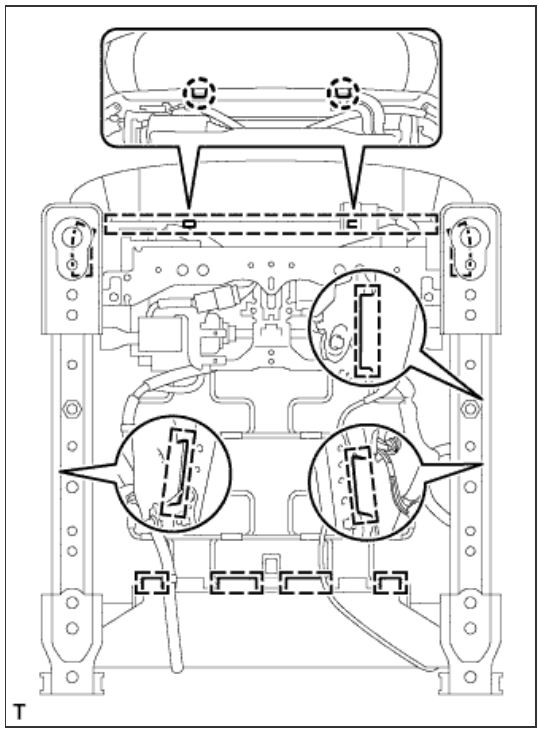
a. Using a clip remover, remove the 2 clips.



b. Disconnect the seat heater connector and detach the 2 wire harness clamps.

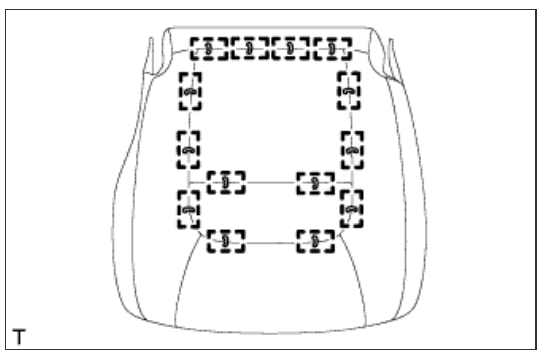
c. Disconnect the seat heater control connector and detach the wire harness clamp.

d. for Front Passenger Side:



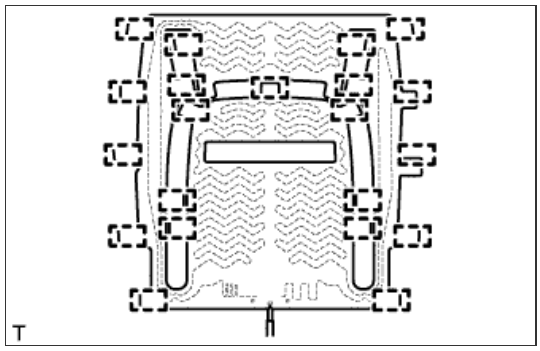
i. Disconnect the seat belt warning sensor connector.

ii. Detach the 2 clamps and remove the seat belt warning sensor connector.



e. Bend the 2 seat frame claws upward.

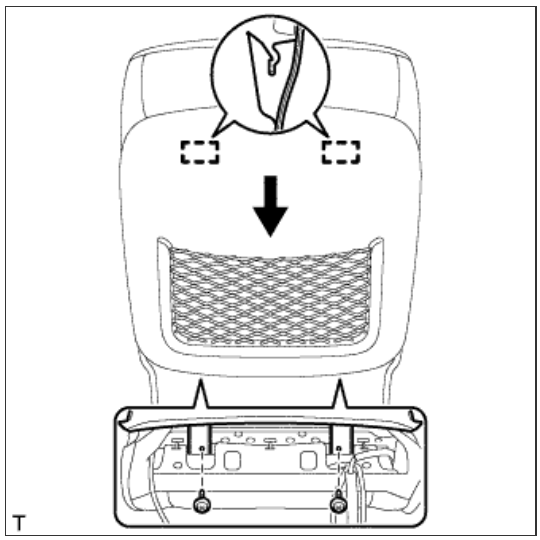
f. Detach the hooks and remove the seat cushion cover with pad.



10. REMOVE FRONT SEPARATE TYPE SEAT CUSHION COVER

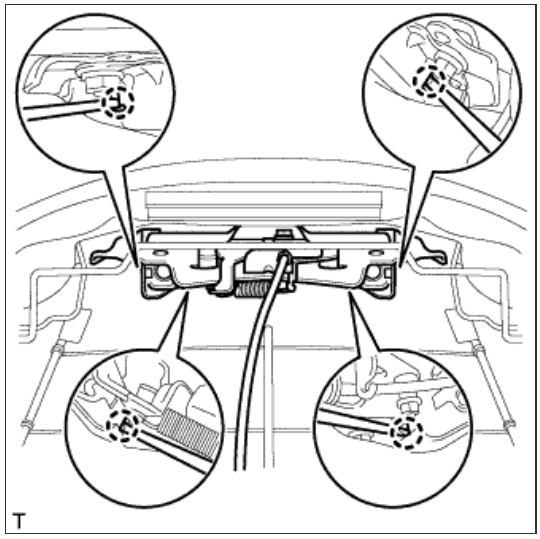
a. Remove the hog rings and front seat cushion cover.

11. REMOVE FRONT SEAT CUSHION HEATER ASSEMBLY LH (w/ Seat Heater System)



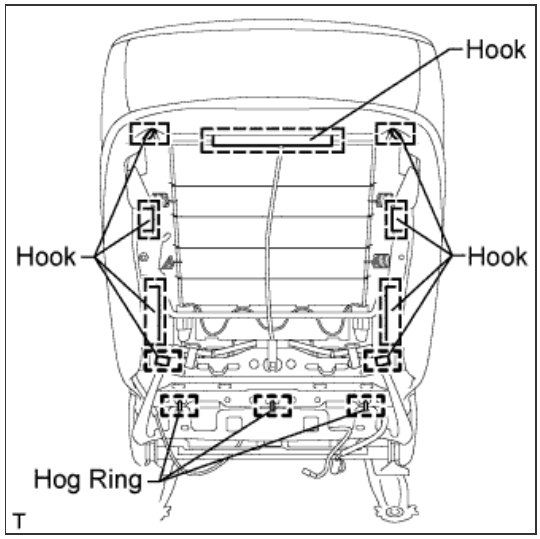
a. Cut off the tack pins which fasten the seat heater to the seat cushion cover, and then remove the seat cushion heater from the seat cushion cover.

12. REMOVE FRONT SEATBACK BOARD SUB-ASSEMBLY LH



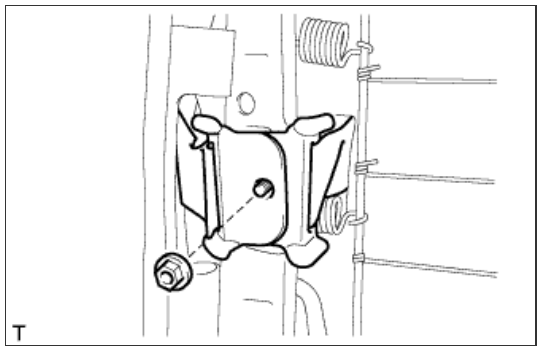
a. Remove the 2 screws.

b. Move the seatback board in the direction of the arrow to detach the 2 hooks and remove the seatback board.



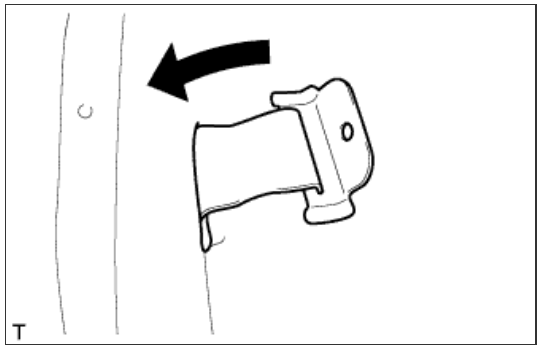
13. REMOVE FRONT SEAT HEADREST SUPPORT

a. Using a screwdriver, detach the 4 claws and remove the 2 headrest supports.



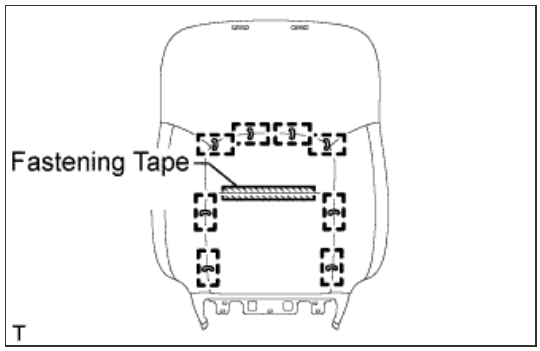
14. REMOVE SEATBACK COVER WITH PAD

a. Remove the 3 hog rings and detach the 9 hooks.



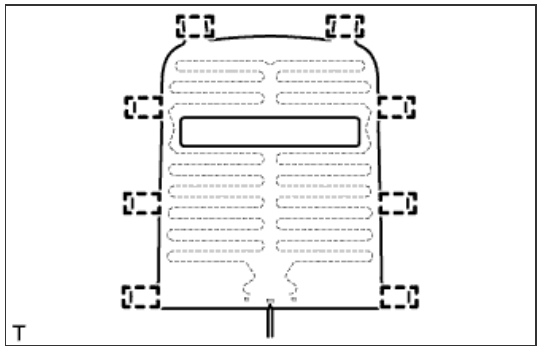
b. Remove the nut and seatback cover bracket from the seat frame.

c. Remove the seatback cover with pad.



15. REMOVE FRONT SEPARATE TYPE SEATBACK COVER

a. Disconnect the seatback cover bracket from the seatback pad.

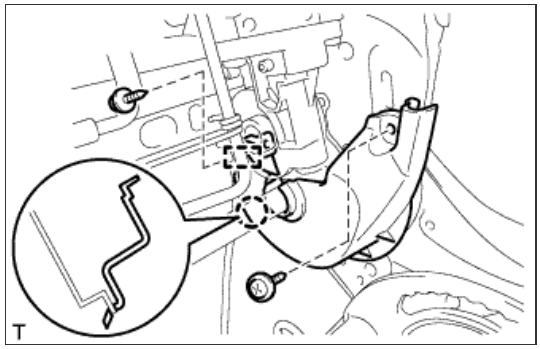


b. Remove the hog rings.

c. Detach the fastening tape and remove the seatback cover.

16. REMOVE FRONT SEATBACK HEATER ASSEMBLY LH (w/ Seat Heater System)

a. Cut off the tack pins which fasten the seatback heater to the seatback cover, and then remove the seatback heater from the seatback cover.



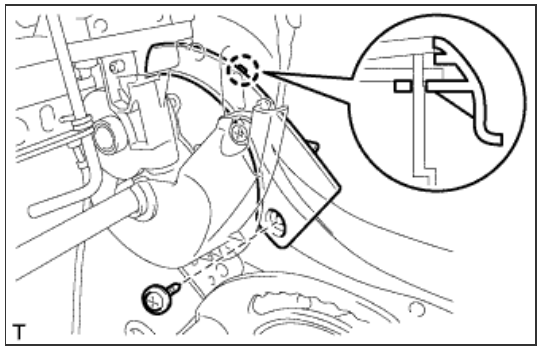
17. REMOVE INSIDE RECLINING ADJUSTER COVER LH

a. Detach the wire harness clamp.

b. Remove the 2 screws.

c. Detach the claw and remove the cover.

18. REMOVE INSIDE RECLINING ADJUSTER COVER RH



a. Detach the wire harness clamp.

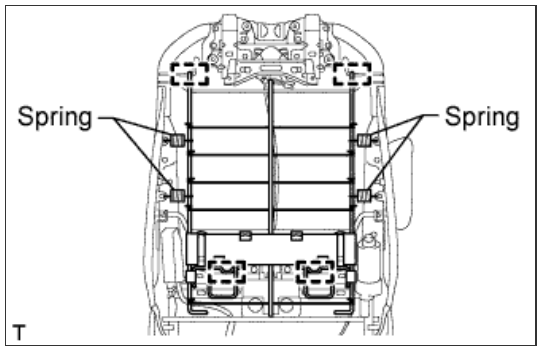
b. Remove the 2 screws.

c. Detach the claw and remove the cover.

19. REMOVE OUTSIDE RECLINING ADJUSTER COVER LH

a. Remove the screw and detach the claw, and then remove the reclining adjuster cover.

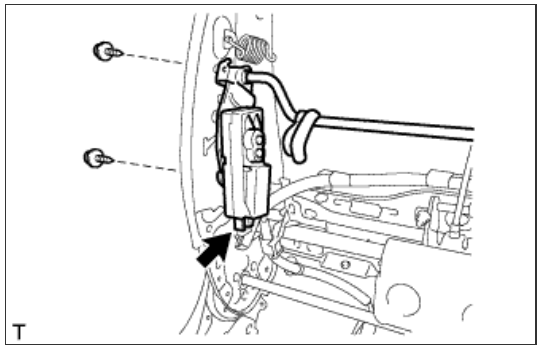
20. REMOVE OUTSIDE RECLINING ADJUSTER COVER RH



a. Remove the screw and detach the claw, and then remove the reclining adjuster cover.

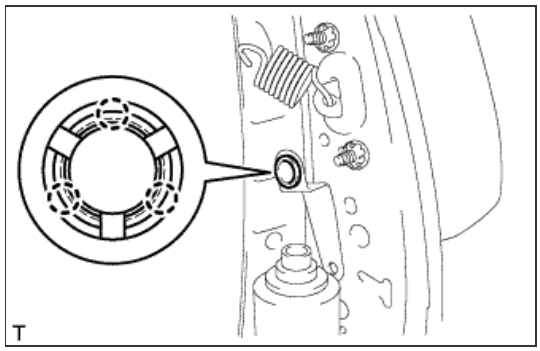
21. REMOVE LUMBAR SUPPORT ADJUSTER ASSEMBLY LH (for Driver Side)

a. Remove the 4 springs.



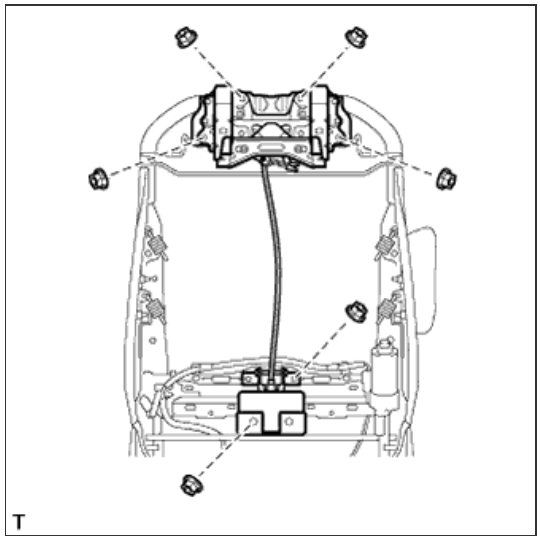
a. Remove the 4 springs.

b. Detach the 4 hooks and remove the seatback spring.



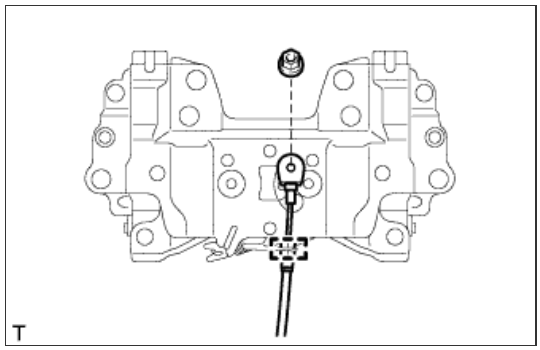
c. Disconnect the lumbar support adjuster connector.

d. Remove the 2 screws and lumbar support adjuster.



e. Detach the 3 claws and remove the bush from the seat frame.

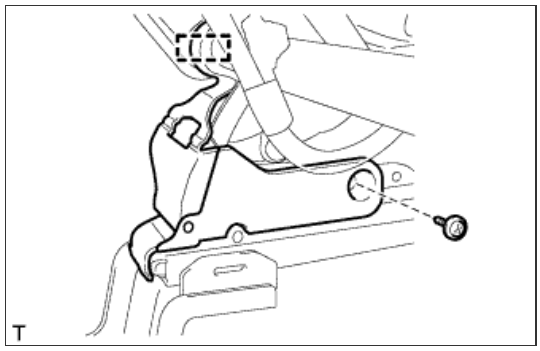
22. REMOVE LOWER ACTIVE HEADREST UNIT



a. Remove the 6 nuts, and then remove the lower active headrest unit together with the upper active headrest unit.

23. REMOVE UPPER ACTIVE HEADREST UNIT

a. Remove the nut and cable clamp to remove the upper active headrest unit from



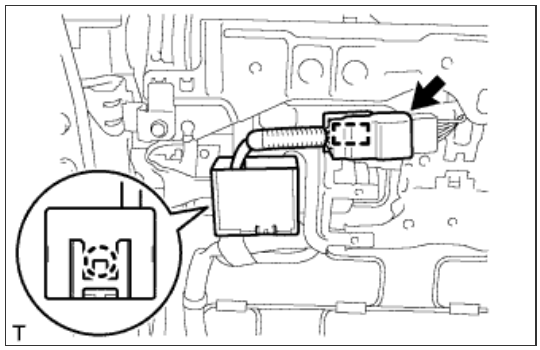
the lower active headrest unit.

24. REMOVE FRONT LOWER SEAT CUSHION SHIELD LH

a. Remove the screw.

b. Detach the hook and remove the lower cushion shield.

25. REMOVE FRONT LOWER SEAT CUSHION SHIELD RH

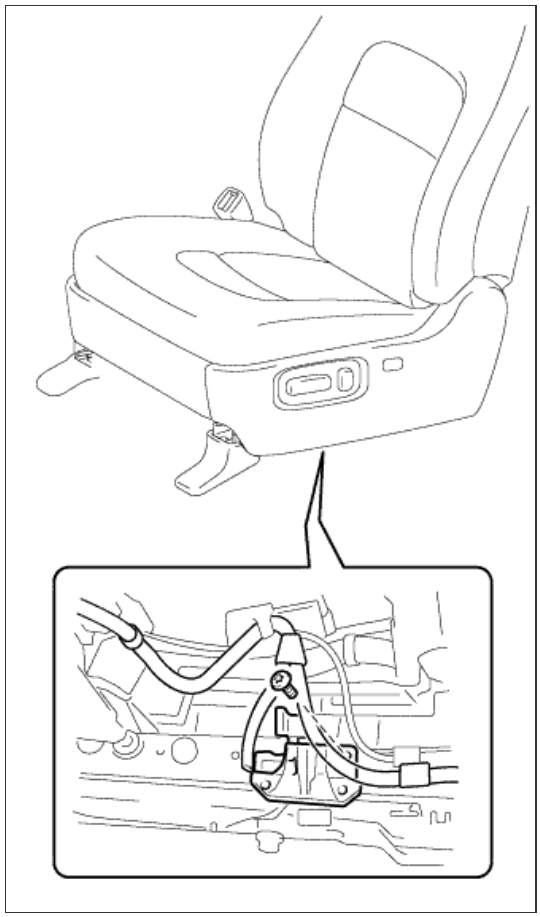


a. Remove the screw.

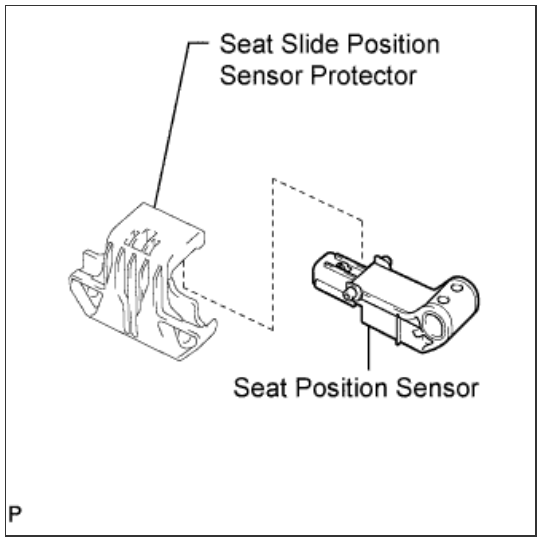
b. Detach the hook and remove the lower cushion shield.

26. REMOVE SEAT HEATER CONTROL SUB-ASSEMBLY (w/ Seat Heater System)

a. Disconnect the seat heater control connector and detach the clamp.



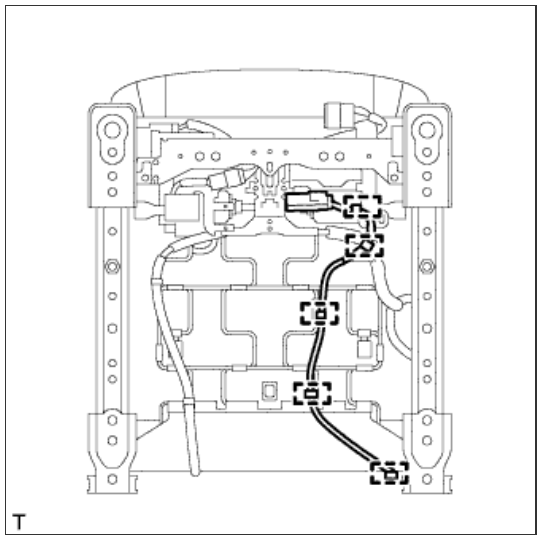
b. Using a screwdriver, detach the claw and remove the seat heater control.



27. REMOVE SEAT POSITION SENSOR

a. Using a T30 "TORX" socket wrench, remove the screw and seat position sensor with sensor protector.

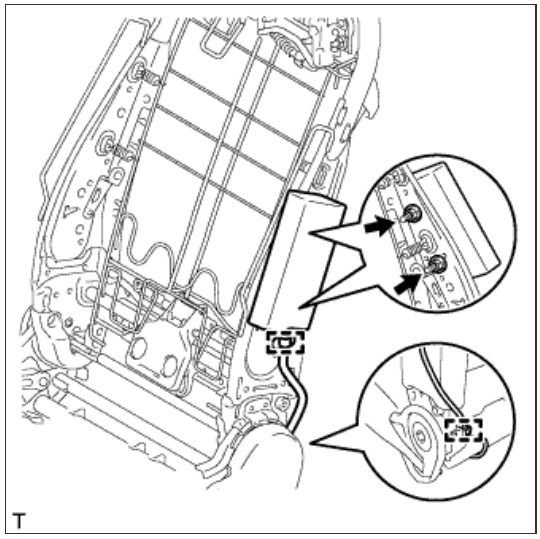
b. Disconnect the connector.



c. Remove the seat slide position sensor protector from the seat position sensor.

28. REMOVE FRONT SEAT SIDE AIRBAG ASSEMBLY LH

a. Detach the 5 clamps and disconnect the wire harness.



b. Detach the 2 clamps and disconnect the wire harness.

c. Remove the 2 nuts and front seat side airbag assembly .

CAUTION:

Make sure that the seat frame assembly is not deformed. If it is, replace it with a new one.

29. REMOVE FRONT SEAT WIRE LH

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

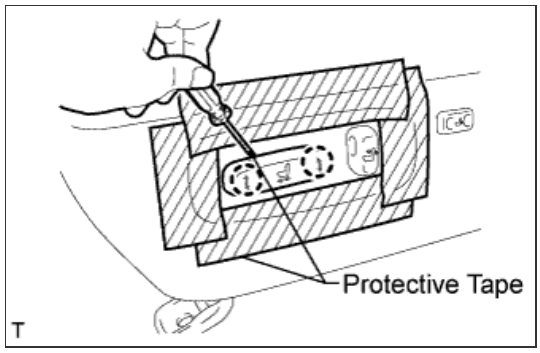
- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**



1. REMOVE SLIDE AND VERTICAL POWER SEAT SWITCH KNOB

a. Apply protective tape around the cushion shield.

b. Using a screwdriver, detach the 2 claws and remove the knob.

HINT:

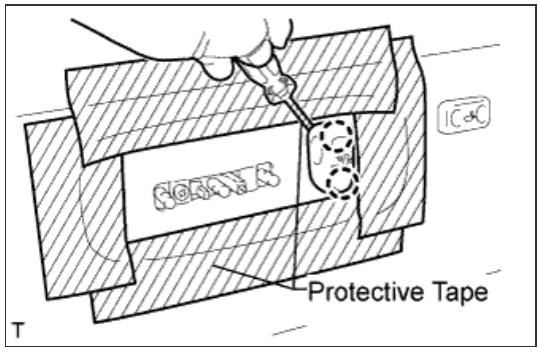
Tape the screwdriver tip before use.



2. REMOVE RECLINING POWER SEAT SWITCH KNOB

a. Using a screwdriver, detach the 2 claws and remove the knob.

HINT:

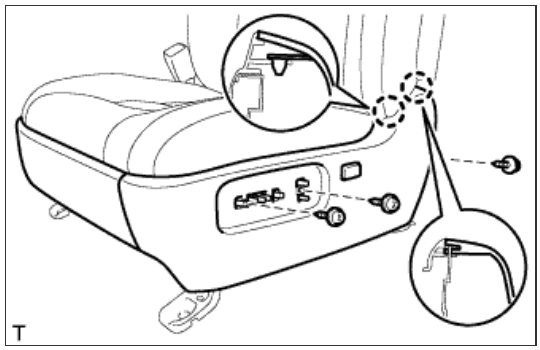
Tape the screwdriver tip before use.

3. REMOVE FRONT SEAT CUSHION SHIELD LH

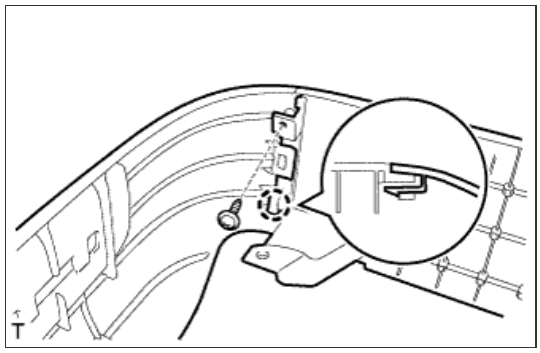
a. Remove the 2 rubber bands from the hooks.



b. Remove the 2 screws.

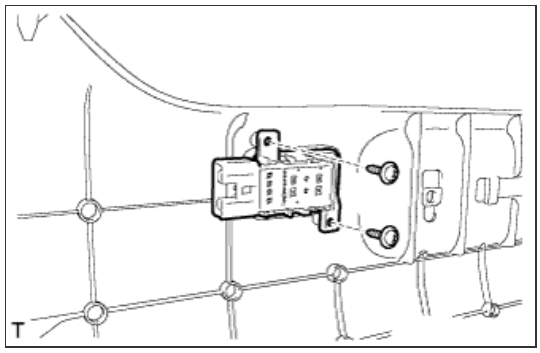
c. Remove the 3 screws.

d. Detach the 2 claws and remove the cushion shield.



e. for Driver Side:
Disconnect the power seat lumbar switch connectors.

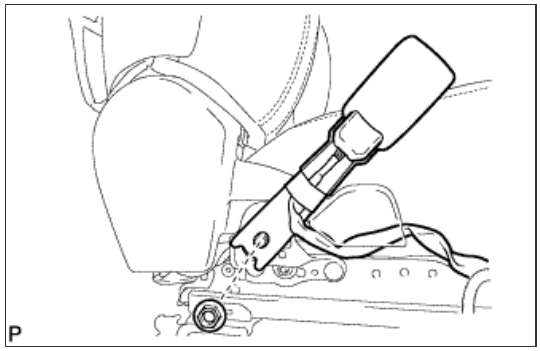
4. REMOVE FRONT INNER NO. 1 SEAT CUSHION SHIELD LH



a. Remove the screw.

b. Detach the claw and remove the cushion shield.

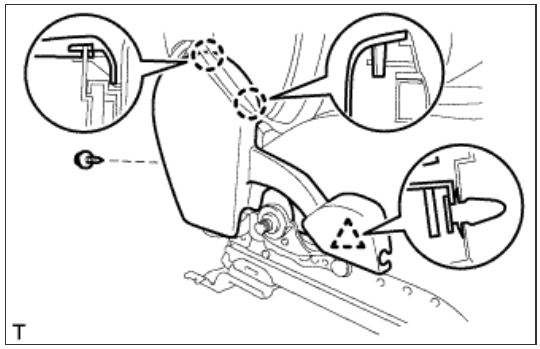
5. REMOVE LUMBAR SWITCH (for Driver Side)



a. Remove the 2 screws and switch.

6. REMOVE FRONT SEAT INNER BELT ASSEMBLY LH

a. Disconnect the connectors and detach the clamps.

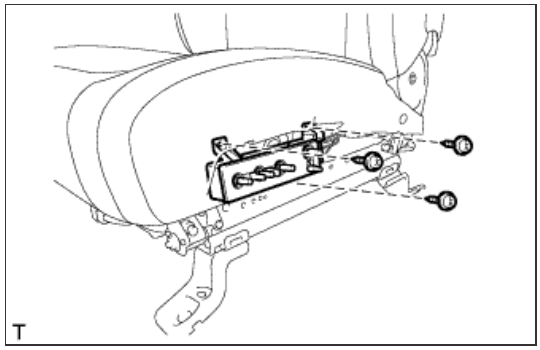


b. Remove the nut and front seat inner belt assembly.

7. REMOVE FRONT INNER SEAT CUSHION SHIELD LH

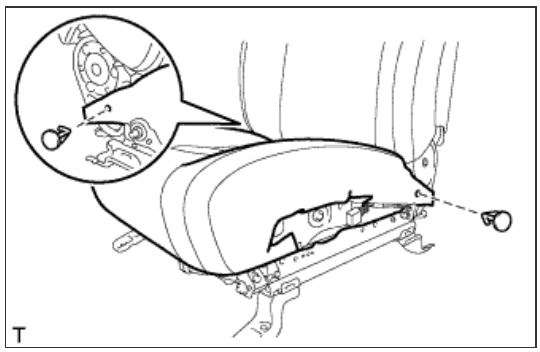
a. Remove the screw.

b. Detach the 2 claws and clip, and then remove the cushion shield.



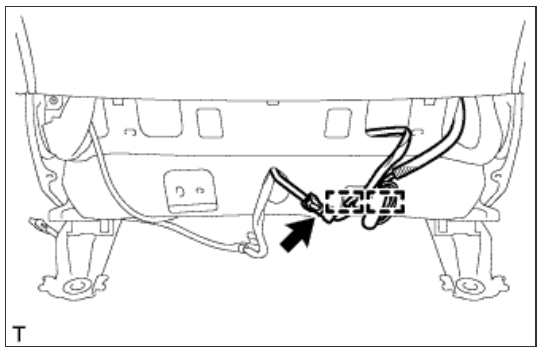
8. REMOVE FRONT POWER SEAT SWITCH LH

a. w/ Seat Position Memory System:
Disconnect the 2 connectors.

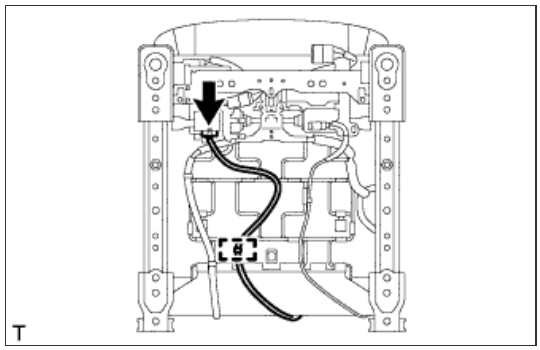


b. w/o Seat Position Memory System:
Disconnect the connector.

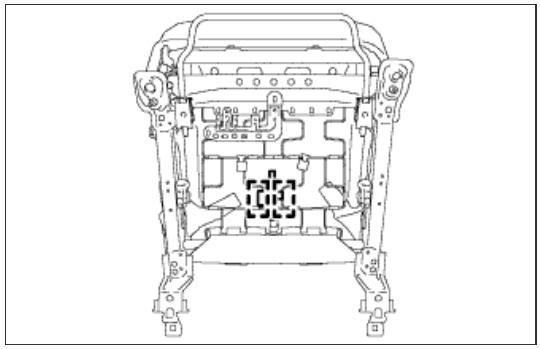
c. Remove the 3 screws and switch.



9. REMOVE SEAT CUSHION COVER WITH PAD



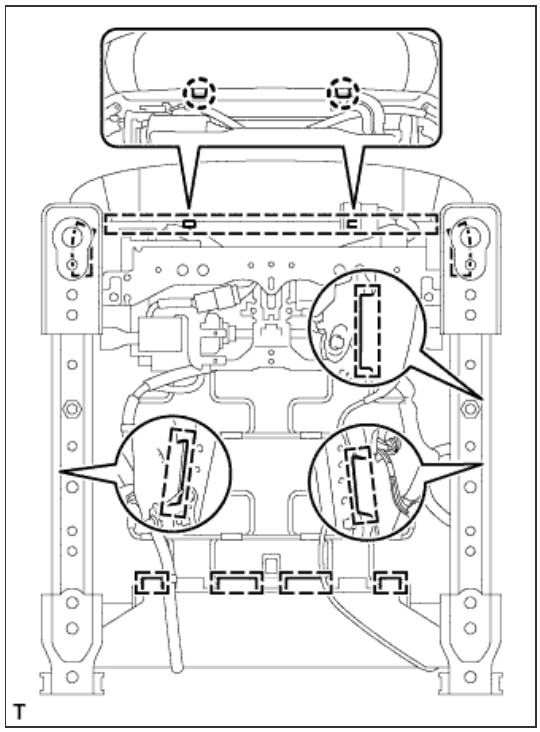
a. Using a clip remover, remove the 2 clips.



b. Disconnect the seat heater connector and detach the 2 wire harness clamps.

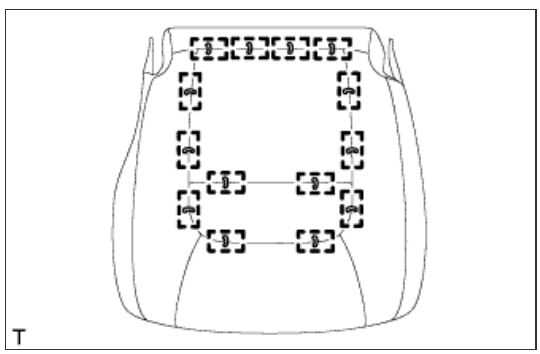
c. Disconnect the seat heater control connector and detach the wire harness clamp.

d. for Front Passenger Side:



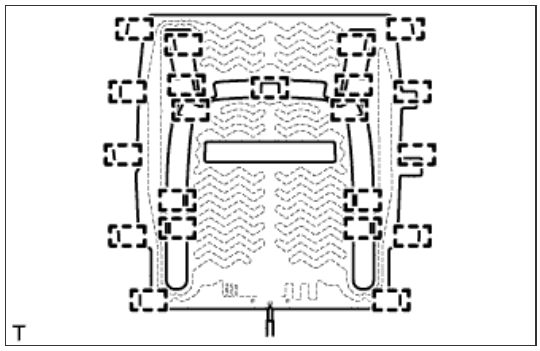
i. Disconnect the seat belt warning sensor connector.

ii. Detach the 2 clamps and remove the seat belt warning sensor connector.



e. Bend the 2 seat frame claws upward.

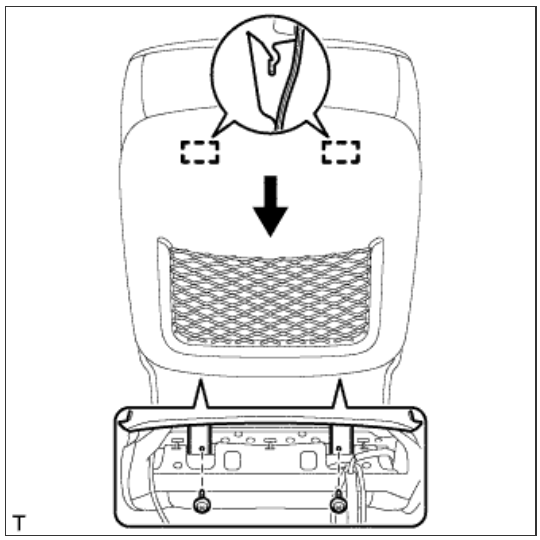
f. Detach the hooks and remove the seat cushion cover with pad.



10. REMOVE FRONT SEPARATE TYPE SEAT CUSHION COVER

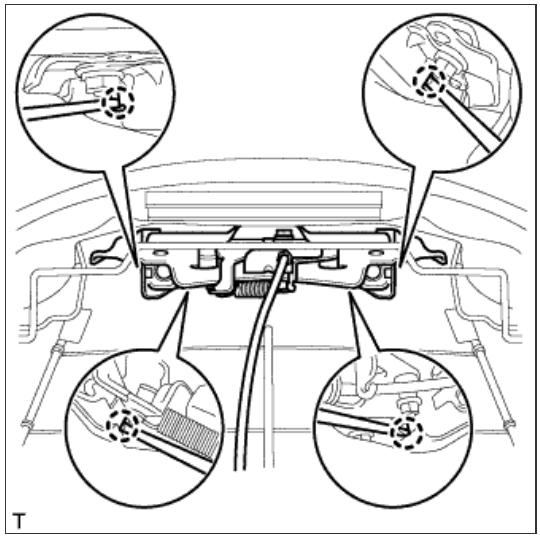
a. Remove the hog rings and front seat cushion cover.

11. REMOVE FRONT SEAT CUSHION HEATER ASSEMBLY LH (w/ Seat Heater System)



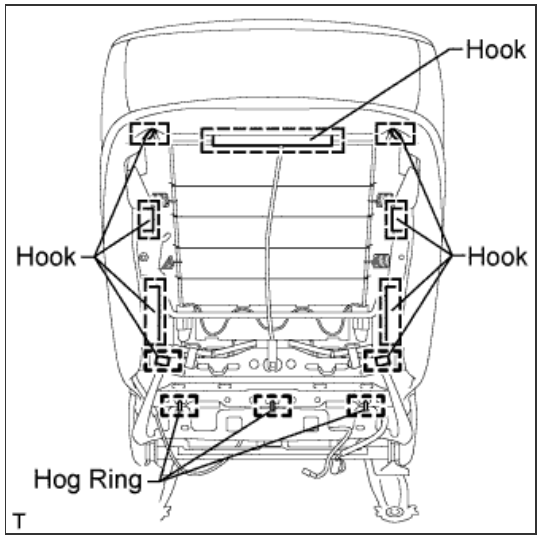
a. Cut off the tack pins which fasten the seat heater to the seat cushion cover, and then remove the seat cushion heater from the seat cushion cover.

12. REMOVE FRONT SEATBACK BOARD SUB-ASSEMBLY LH



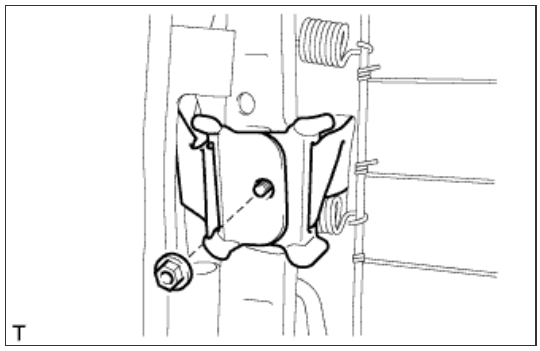
a. Remove the 2 screws.

b. Move the seatback board in the direction of the arrow to detach the 2 hooks and remove the seatback board.



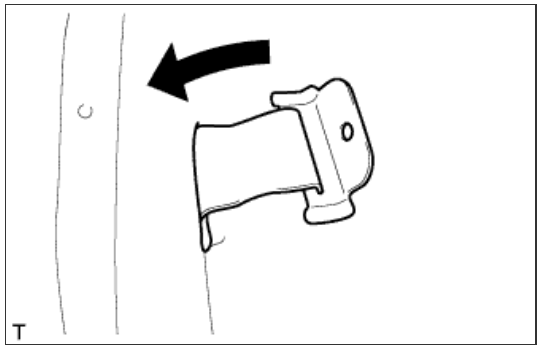
13. REMOVE FRONT SEAT HEADREST SUPPORT

a. Using a screwdriver, detach the 4 claws and remove the 2 headrest supports.



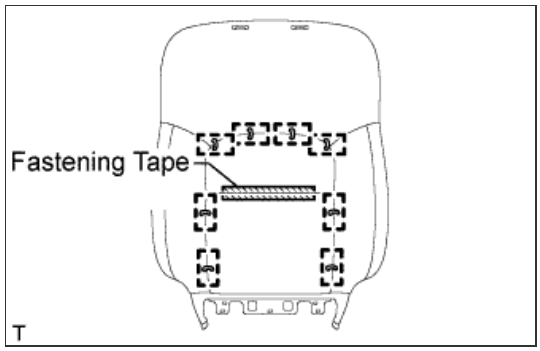
14. REMOVE SEATBACK COVER WITH PAD

a. Remove the 3 hog rings and detach the 9 hooks.



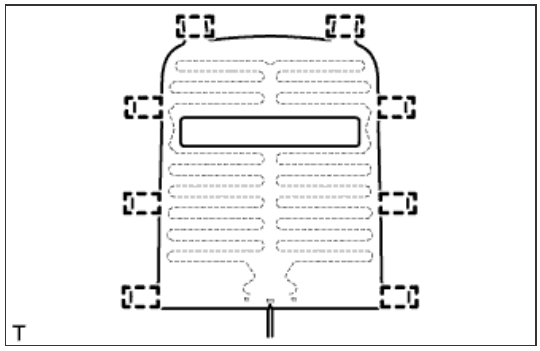
b. Remove the nut and seatback cover bracket from the seat frame.

c. Remove the seatback cover with pad.



15. REMOVE FRONT SEPARATE TYPE SEATBACK COVER

a. Disconnect the seatback cover bracket from the seatback pad.

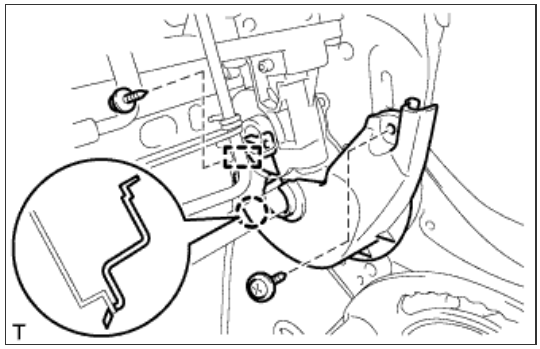


b. Remove the hog rings.

c. Detach the fastening tape and remove the seatback cover.

16. REMOVE FRONT SEATBACK HEATER ASSEMBLY LH (w/ Seat Heater System)

a. Cut off the tack pins which fasten the seatback heater to the seatback cover, and then remove the seatback heater from the seatback cover.



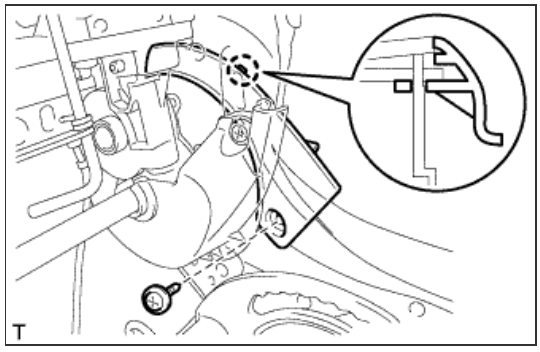
17. REMOVE INSIDE RECLINING ADJUSTER COVER LH

a. Detach the wire harness clamp.

b. Remove the 2 screws.

c. Detach the claw and remove the cover.

18. REMOVE INSIDE RECLINING ADJUSTER COVER RH



a. Detach the wire harness clamp.

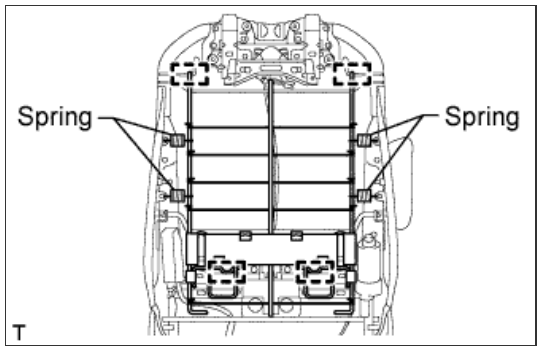
b. Remove the 2 screws.

c. Detach the claw and remove the cover.

19. REMOVE OUTSIDE RECLINING ADJUSTER COVER LH

a. Remove the screw and detach the claw, and then remove the reclining adjuster cover.

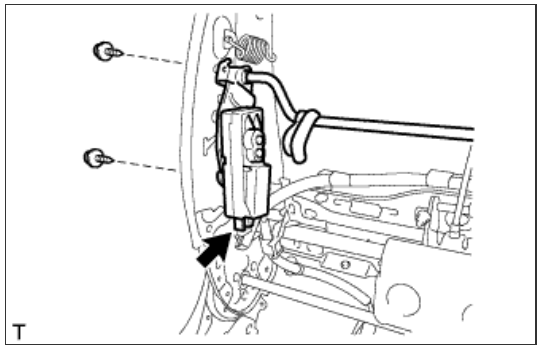
20. REMOVE OUTSIDE RECLINING ADJUSTER COVER RH



a. Remove the screw and detach the claw, and then remove the reclining adjuster cover.

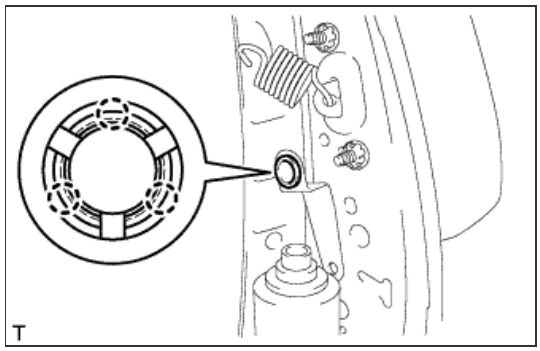
21. REMOVE LUMBAR SUPPORT ADJUSTER ASSEMBLY LH (for Driver Side)

a. Remove the 4 springs.



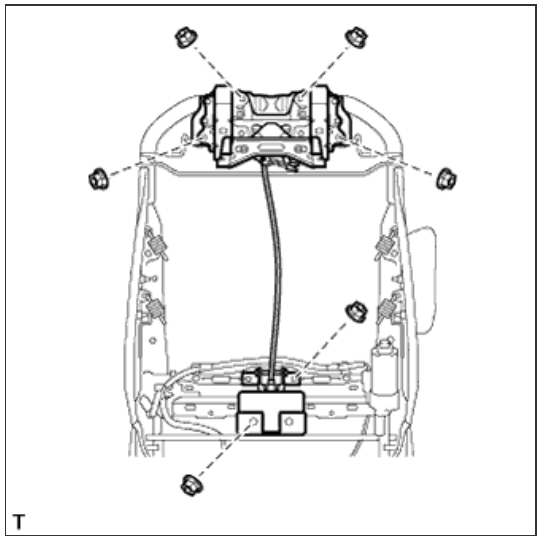
a. Remove the 4 springs.

b. Detach the 4 hooks and remove the seatback spring.



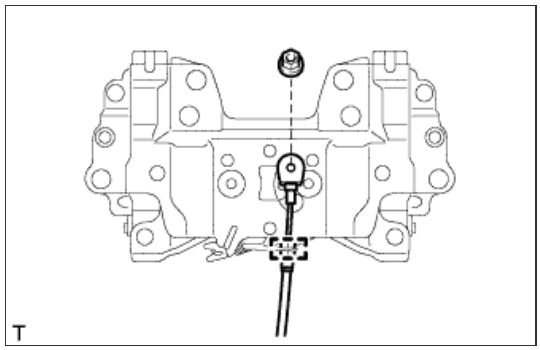
c. Disconnect the lumbar support adjuster connector.

d. Remove the 2 screws and lumbar support adjuster.



e. Detach the 3 claws and remove the bush from the seat frame.

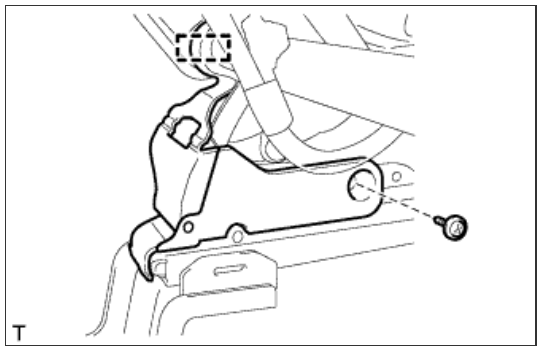
22. REMOVE LOWER ACTIVE HEADREST UNIT



a. Remove the 6 nuts, and then remove the lower active headrest unit together with the upper active headrest unit.

23. REMOVE UPPER ACTIVE HEADREST UNIT

a. Remove the nut and cable clamp to remove the upper active headrest unit from



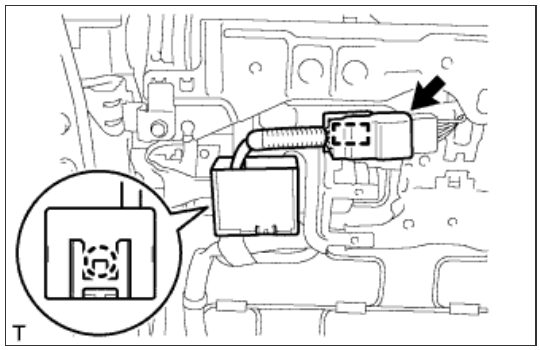
the lower active headrest unit.

24. REMOVE FRONT LOWER SEAT CUSHION SHIELD LH

a. Remove the screw.

b. Detach the hook and remove the lower cushion shield.

25. REMOVE FRONT LOWER SEAT CUSHION SHIELD RH

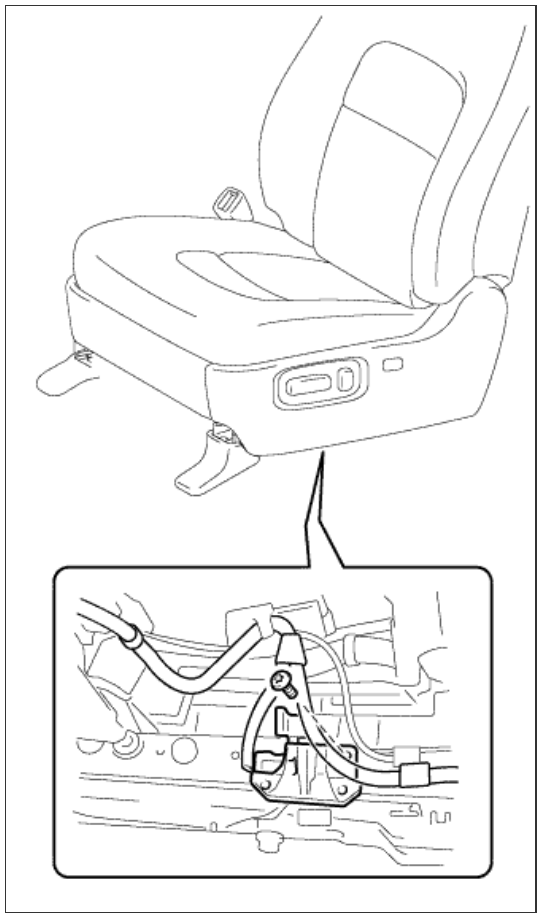


a. Remove the screw.

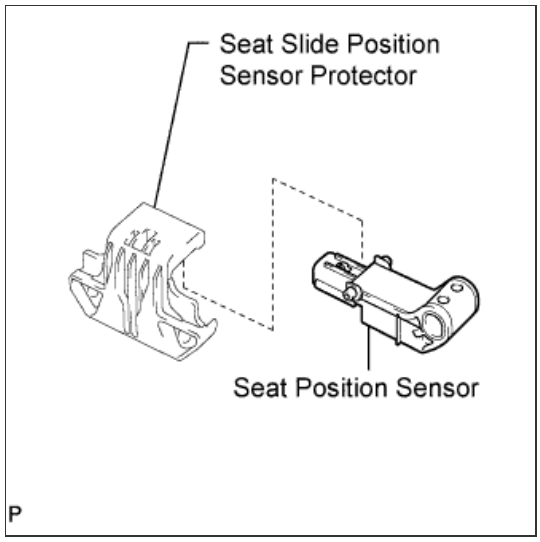
b. Detach the hook and remove the lower cushion shield.

26. REMOVE SEAT HEATER CONTROL SUB-ASSEMBLY (w/ Seat Heater System)

a. Disconnect the seat heater control connector and detach the clamp.



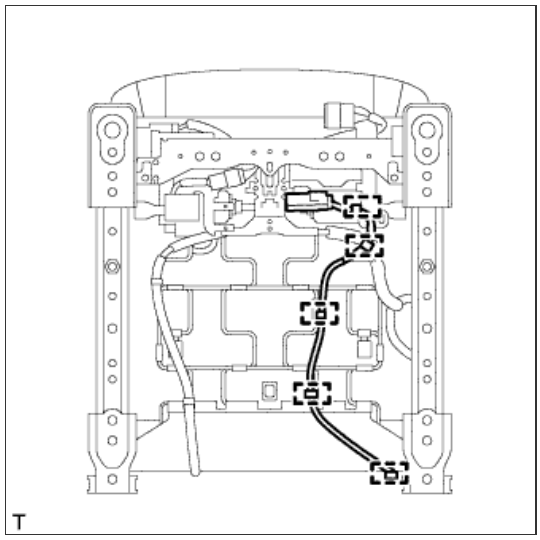
b. Using a screwdriver, detach the claw and remove the seat heater control.



27. REMOVE SEAT POSITION SENSOR

a. Using a T30 "TORX" socket wrench, remove the screw and seat position sensor with sensor protector.

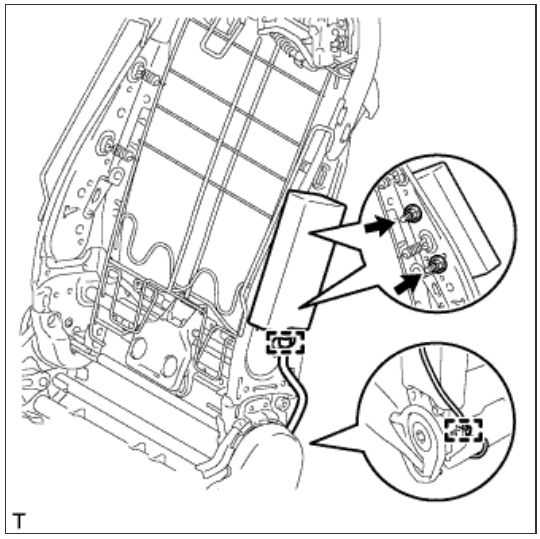
b. Disconnect the connector.



c. Remove the seat slide position sensor protector from the seat position sensor.

28. REMOVE FRONT SEAT SIDE AIRBAG ASSEMBLY LH

a. Detach the 5 clamps and disconnect the wire harness.



b. Detach the 2 clamps and disconnect the wire harness.

c. Remove the 2 nuts and front seat side airbag assembly .

CAUTION:

Make sure that the seat frame assembly is not deformed. If it is, replace it with a new one.

29. REMOVE FRONT SEAT WIRE LH

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

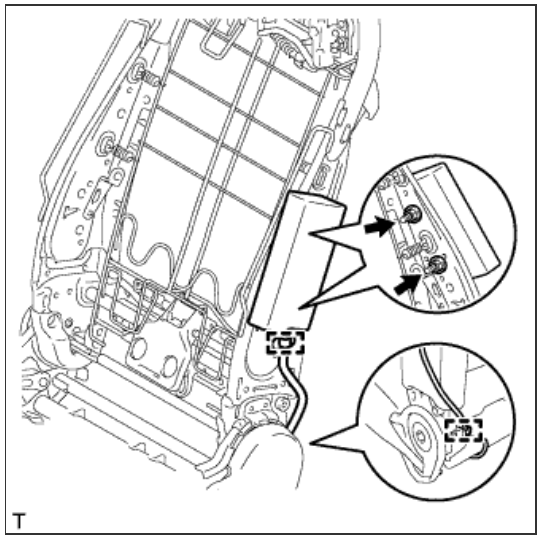
- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

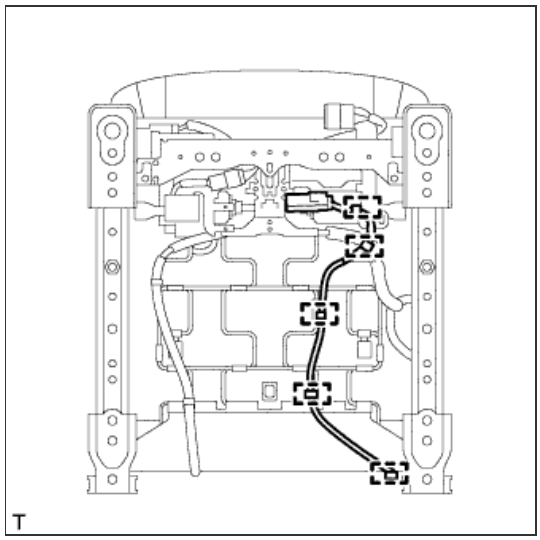
1. INSTALL FRONT SEAT WIRE LH

2. INSTALL FRONT SEAT SIDE AIRBAG ASSEMBLY LH



CAUTION:

Make sure that the seat frame assembly is not deformed. If it is, replace it with a new one.



a. Install the front seat side airbag assembly with 2 nuts.

Torque:
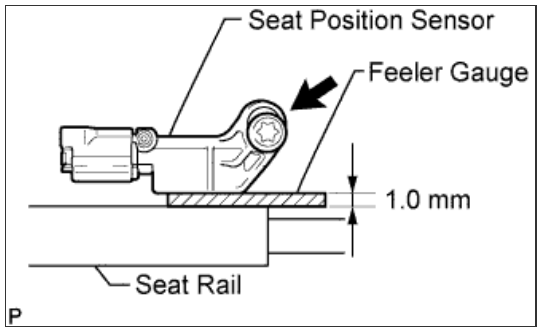
5.5 N*m{ 56 kgf*cm , 49 in.*lbf }

b. Attach the 2 clamps to connect the wire harness.

c. Attach the 5 clamps to connect the wire harness.

3. INSTALL SEAT POSITION SENSOR



a. Check that the engine switch is off.

b. Check that the cable is disconnected from the battery negative (-) terminal.

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

c. Using a .0 mm (0.0393 in.) feeler gauge, install the seat position sensor.

NOTICE:

- **If the seat position sensor has been dropped, or there are any cracks, dents or other defects in the case or connector, replace the seat position sensor with a new one.**
- **When installing the seat position sensor, be careful that the SRS wiring does not interfere with other parts and that it is not pinched between other parts.**

HINT:

Be sure that the clearance between the seat position sensor and the seat rail is within 0.6 to .4 mm (0.0236 to 0.055 in.).

d. Using a T30 R socket wrench, install the seat position sensor with the screw.

Torque:
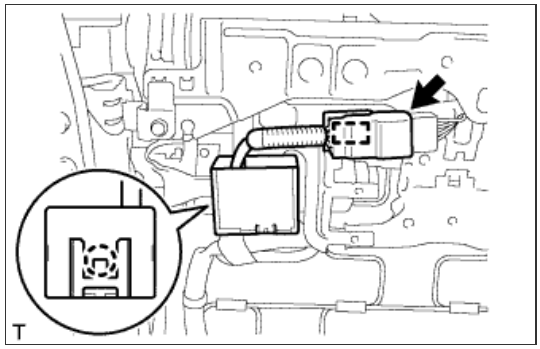
8.0 N*m{ 82 kgf*cm , 71 in.*lbf }

e. Make sure that the clearance between the seat position sensor and the seat rail is within 0.6 to .4 mm (0.0236 to 0.055 in.).

f. Check that there is no looseness in the installation parts of the seat position sensor.

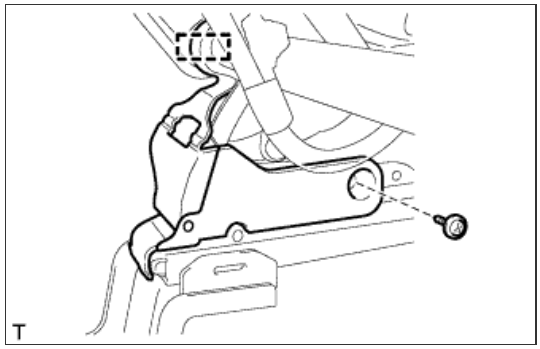


g. Connect the connector.

h. Install the seat slide position sensor protector to the seat position sensor.

4. INSTALL SEAT HEATER CONTROL SUB-ASSEMBLY (w 3eat Heater System)

a. Attach the claw to install the seat heater control.



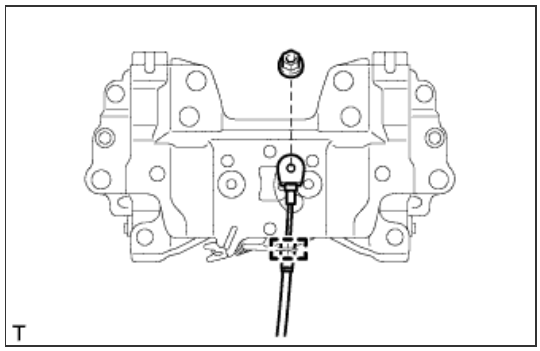
b. Attach the clamp and connect the seat heater control connector.

5. INSTALL FRONT LOWER SEAT CUSHION SHIELD RH

a. Attach the hook to install the lower cushion shield.

b. Install the screw.

6. INSTALL FRONT LOWER SEAT CUSHION SHIELD LH



a. Attach the hook to install the lower cushion shield.

b. Install the screw.

7. INSTALL UPPER ACTI E HEADREST UNIT

a. Install the upper active headrest unit to the lower active headrest unit with the cable clamp and nut.

Torque:
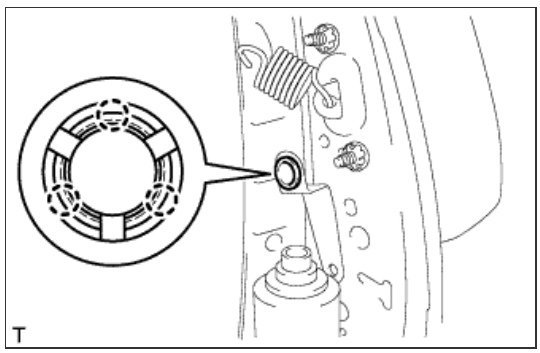
5.0 N*m{ 51 kgf*cm , 44 in.*lbf }

8. INSTALL LOWER ACTI E HEADREST UNIT



a. Install the lower active headrest unit together with the upper active headrest unit with the 6 nuts.

Torque:
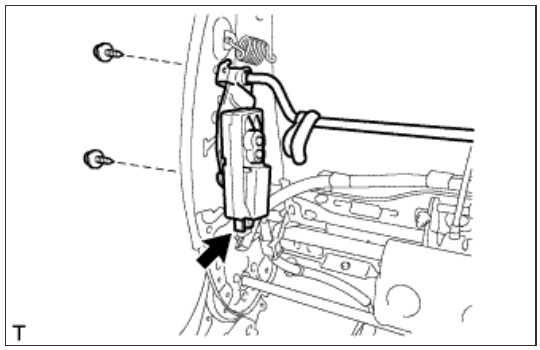
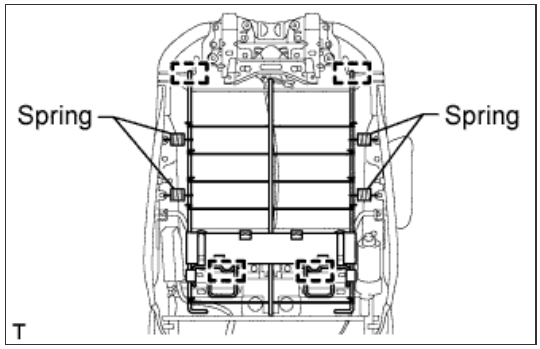
Upper active headrest unit:
14 N*m{ 143 kgf*cm , 10 ft.*lbf }
Lower active headrest unit:
5.0 N*m{ 51 kgf*cm , 44 in.*lbf }



9. INSTALL LUMBAR SUPPORT AD USTER ASSEMBLY LH (for Driver Side)

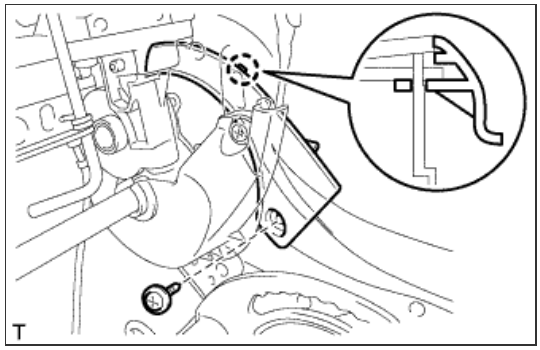
a. Attach the 3 claws to install the bush.



b. Install the lumbar support adjuster with the 2 screws.

c. Connect the lumbar support adjuster connector.

d. Attach the 4 hooks to install the seatback spring.



e. Install the 4 springs.

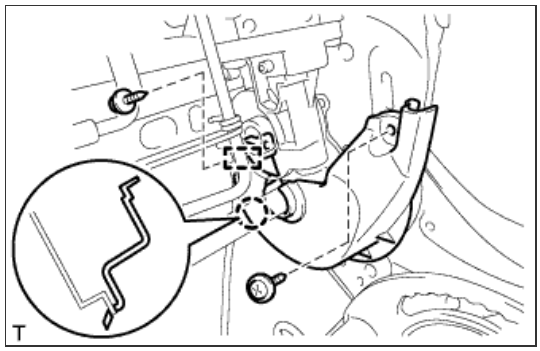
10. INSTALL OUTSIDE RECLINING AD USTER CO ER RH

a. Attach the claw to install the reclining adjuster cover.

b. Install the screw.

11. INSTALL OUTSIDE RECLINING AD USTER CO ER LH

a. Attach the claw to install the reclining adjuster cover.



b. Install the screw.

12. INSTALL INSIDE RECLINING AD USTER CO ER RH

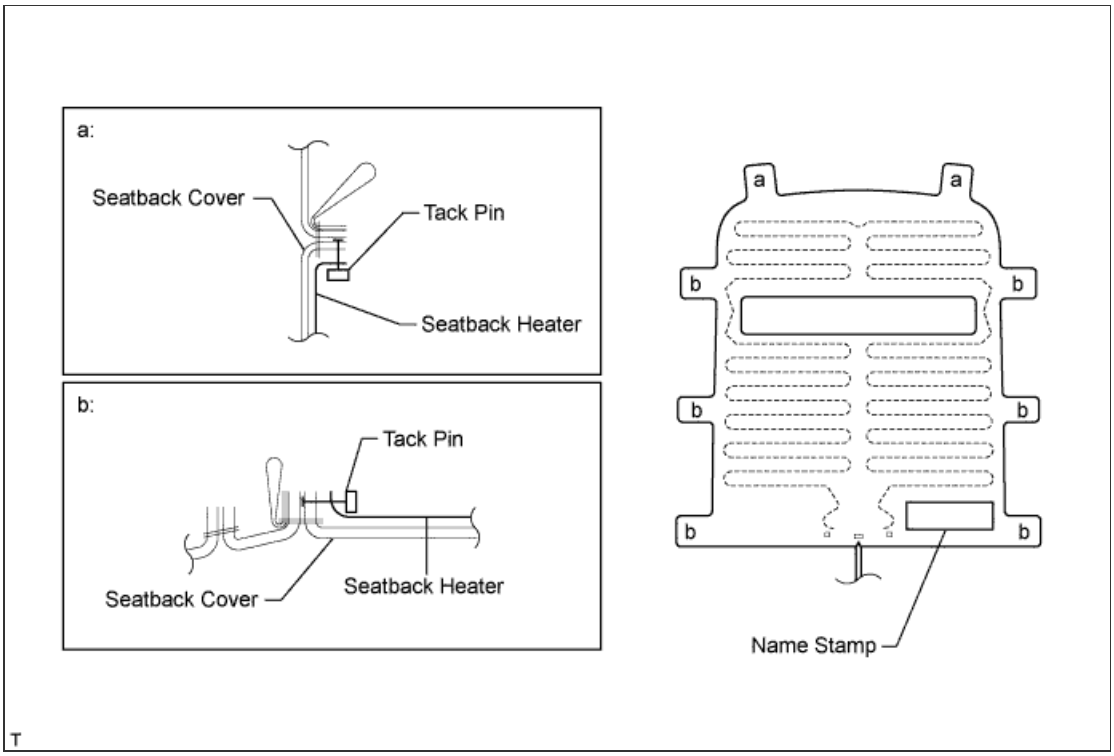
a. Attach the claw to install the cover.

b. Install the 2 screws.

c. Attach the wire harness clamp.

13. INSTALL INSIDE RECLINING AD USTER CO ER LH

a. Attach the claw to install the cover.



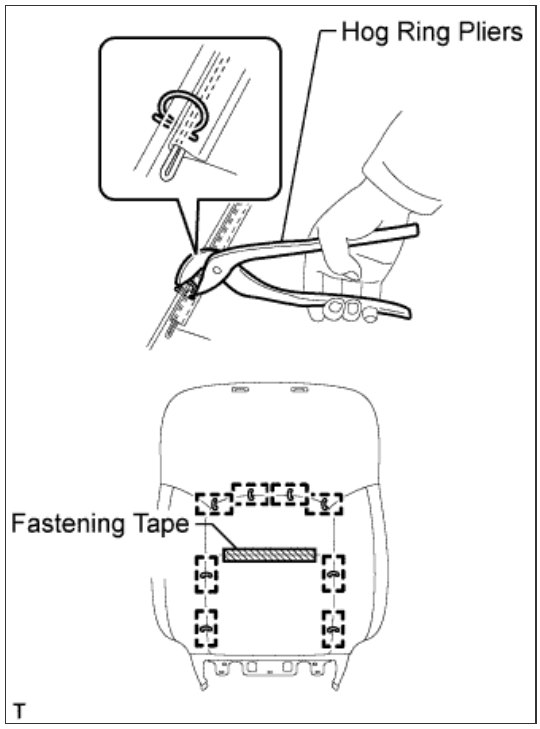
b. Install the 2 screws.

c. Attach the wire harness clamp.

14. INSTALL FRONT SEATBAC HEATER ASSEMBLY LH (w Sat Heater System)

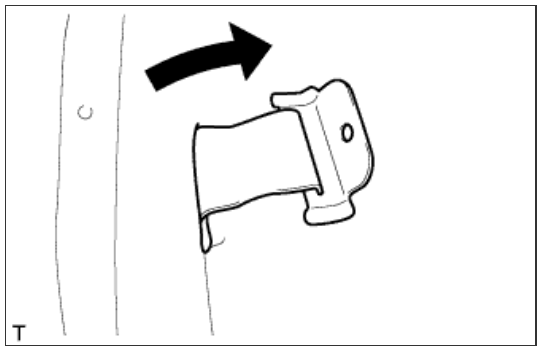
a. Set the seatback heater with the name stamp side facing the seatback cover.

b. Install the seatback heater with new tack pins.



15. INSTALL FRONT SEPARATE TYPE SEATBAC CO ER

a. Attach the fastening tape to install the seatback cover with new hog rings.



b. Using hog ring pliers, install the seatback cover

NOTICE:

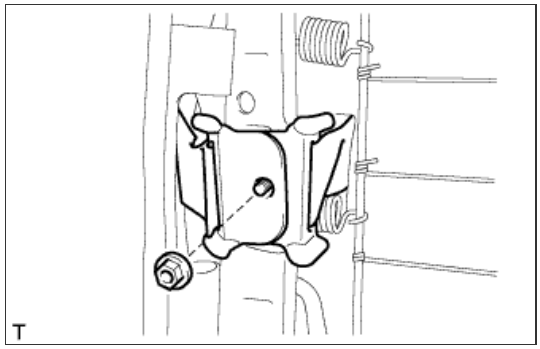
- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**

c. Connect the seatback cover bracket to the seatback pad.

16. INSTALL SEATBAC CO ER WITH PAD



a. Install the seatback cover with pad to the seatback frame.

b. Install the seatback cover bracket to the seat frame with the nut.

Torque:
5.0 N*m{ 51 kgf*cm , 44 in.*lbf }

CAUTION:

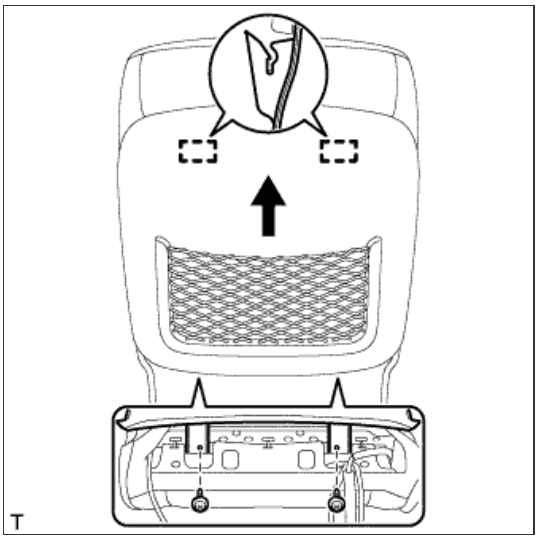
After the seatback trim cover is assembled, make sure the side airbag strap is not twisted.

c. Attach the 9 hooks.

d. Using hog ring pliers, install 3 new hog rings to the seat frame.

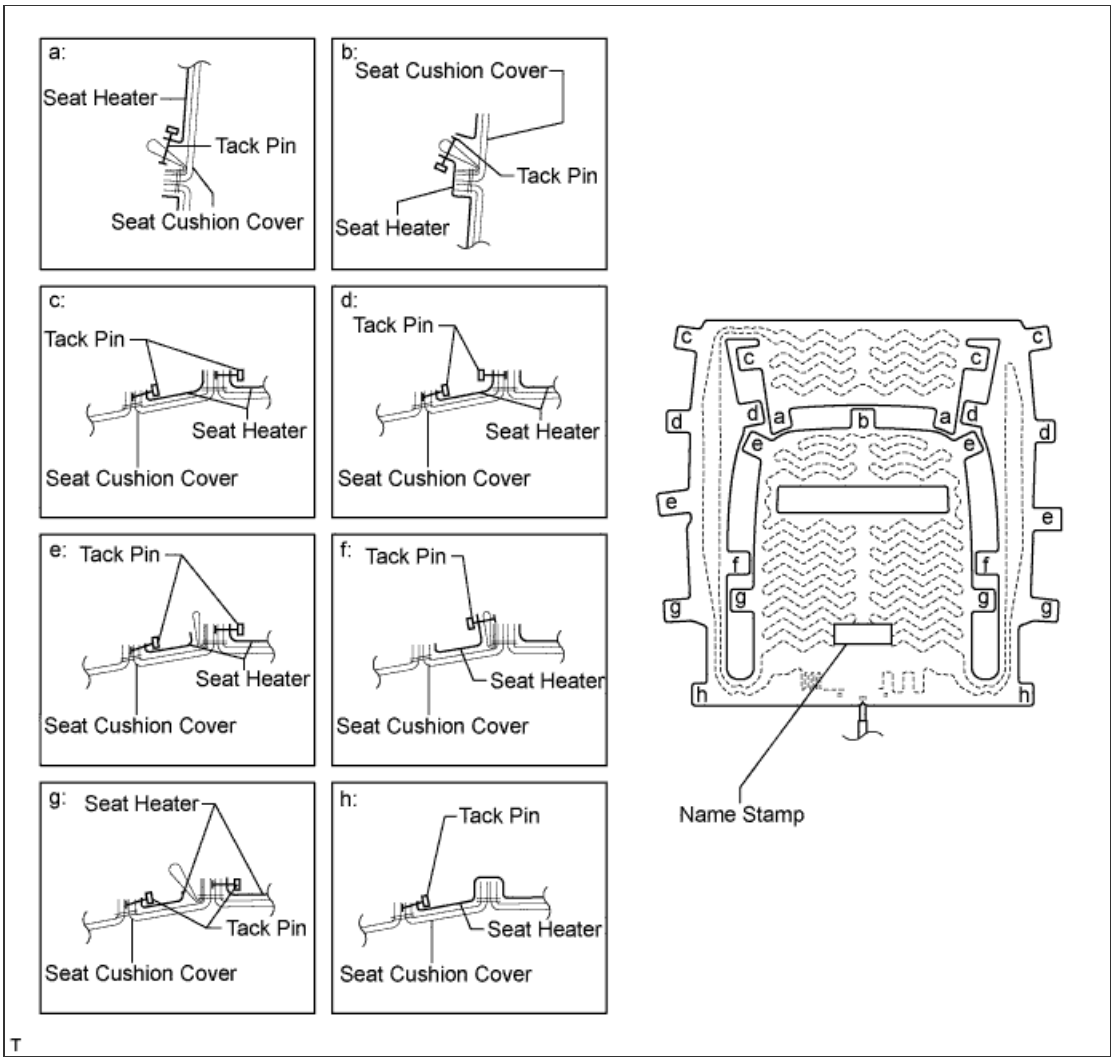


17. INSTALL FRONT SEAT HEADREST SUPPORT

a. Attach the 4 claws to install the 2 headrest supports.

18. INSTALL FRONT SEATBAC BOARD SUB-ASSEMBLY LH

a. Move the seatback board in the direction of the arrow to attach the 2 hooks and install the seatback board.

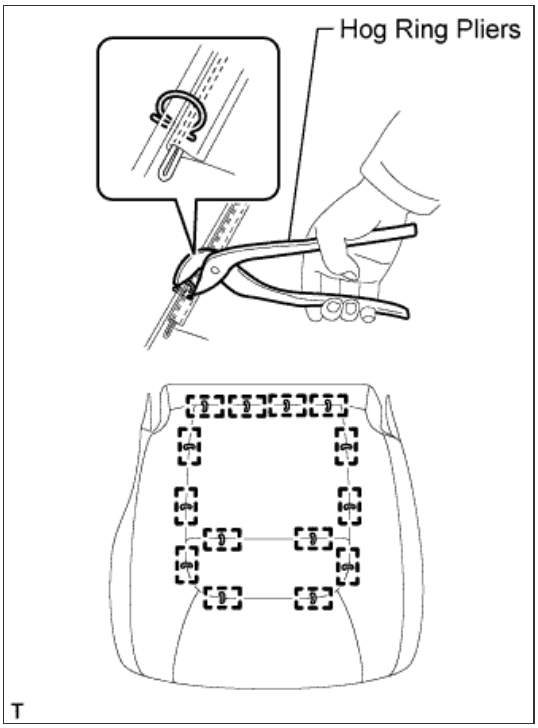


b. Install the 2 screws.

19. INSTALL FRONT SEAT CUSHION HEATER ASSEMBLY LH (w Seat Heater System)

a. Set the seat cushion heater with the name stamp side facing the seat cushion cover.

b. Install the seat cushion heater with new tack pins.



20. INSTALL FRONT SEPARATE TYPE SEAT CUSHION CO ER

a. Using hog ring pliers, install the seat cushion cover to the seat cushion pad with new hog rings.

NOTICE:

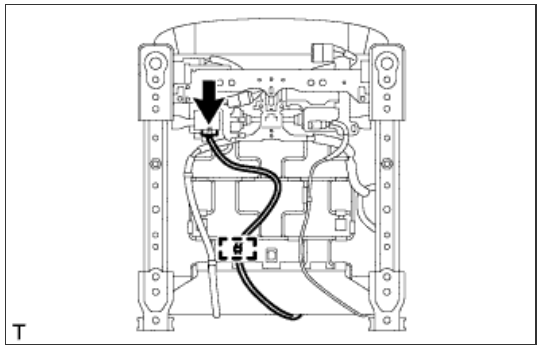
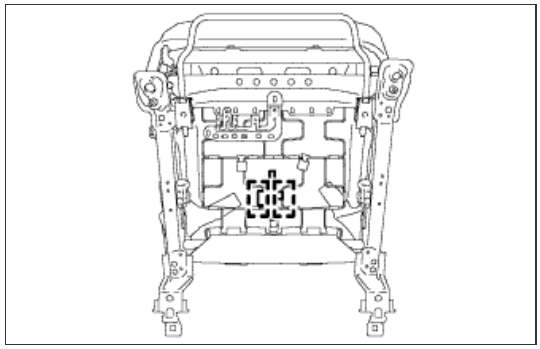
- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**



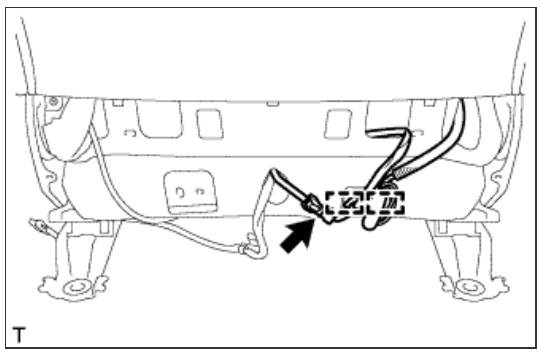
21. INSTALL SEAT CUSHION CO ER WITH PAD

a. Attach the hooks to install the seat cushion cover with pad.

b. Bend the 2 seat frame claws downward.

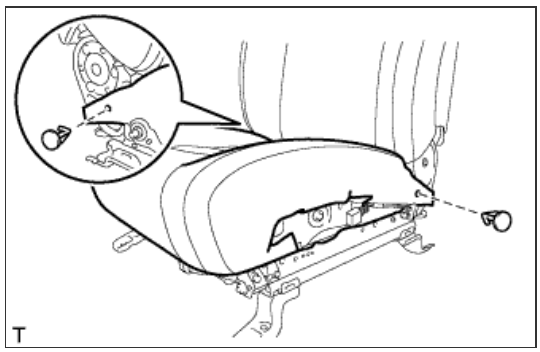


c. Connect the seat heater control connector and attach the wire harness clamp.



d. for Front Passenger Side

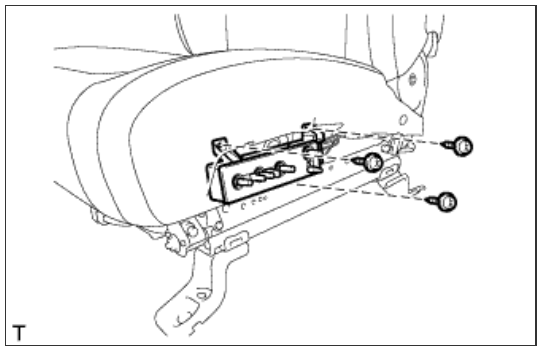
i. Attach the 2 clamps to install the seat belt warning sensor connector.



ii. Connect the seat belt warning sensor connector.

e. Connect the seat heater connector and attach the 2 wire harness clamps.

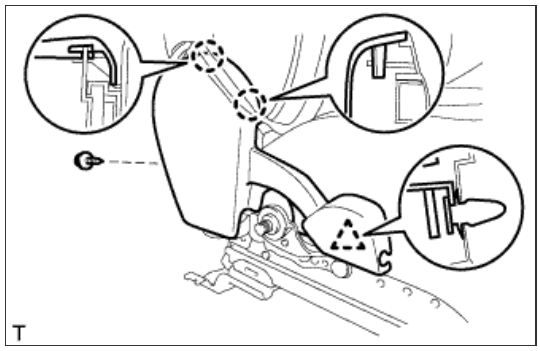
f. Install the 2 clips.



22. INSTALL FRONT POWER SEAT SWITCH LH

a. Install the switch with the 3 screws.

b. w Seat Position Memory System
Connect the 2 connectors.



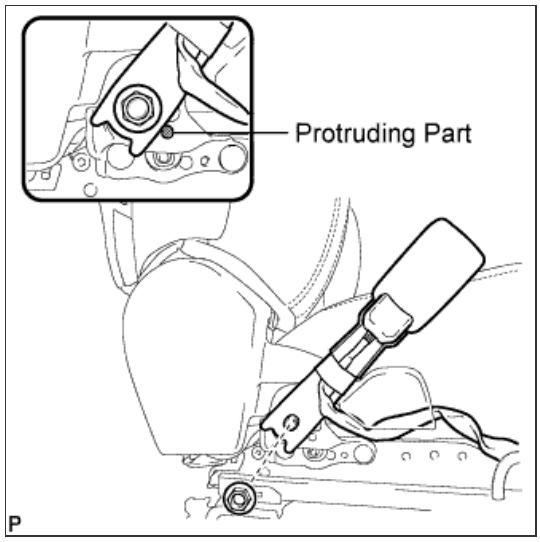
c. w o Seat Position Memory System
Connect the connector.

23. INSTALL FRONT INNER SEAT CUSHION SHIELD LH

a. Attach the 2 claws and clip to install the cushion shield.

b. Install the screw.

24. INSTALL FRONT SEAT INNER BELT ASSEMBLY LH



a. Install the front seat inner belt assembly with the nut.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

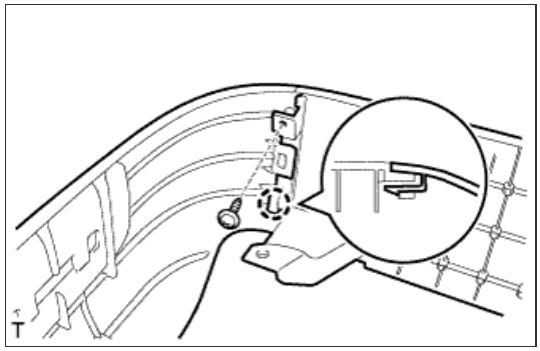
Do not allow the anchor part of the front seat inner belt assembly to overlap the protruding parts of the front seat adjuster.

b. Connect the connectors and attach the clamps.

25. INSTALL LUMBAR SWITCH (for Driver Side)

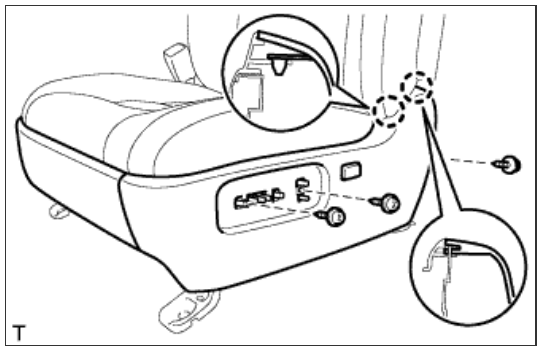


a. Install the lumbar switch with the 2 screws.

26. INSTALL FRONT INNER NO. 1 SEAT CUSHION SHIELD LH

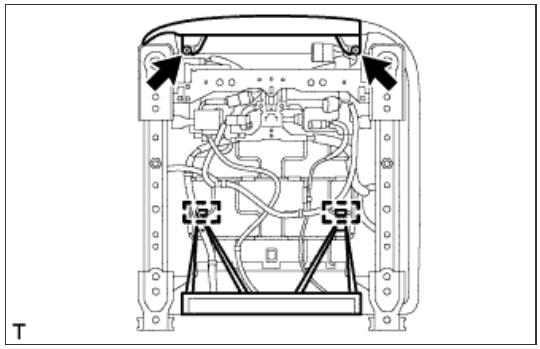
a. Attach the claw to install the cushion shield.

b. Install the screw.



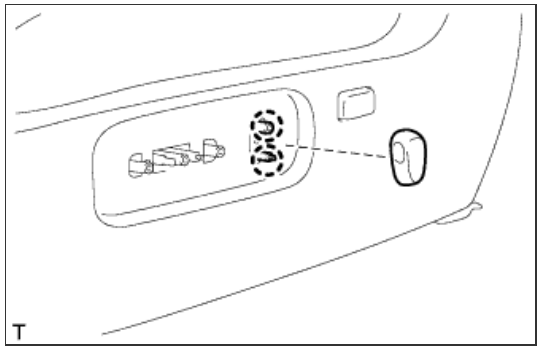
27. INSTALL FRONT SEAT CUSHION SHIELD LH

a. for Driver Side
Connect the lumbar switch connectors.



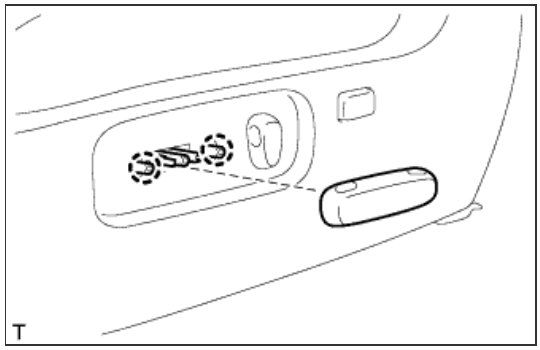
b. Attach the 2 claws to install the cushion shield.

c. Install the 3 screws.



d. Install the 2 screws.

e. Attach the 2 rubber bands to the hooks.



28. INSTALL RECLINING POWER SEAT SWITCH NOB

a. Attach the 2 claws to install the knob.

29. INSTALL SLIDE AND ERTICAL POWER SEAT SWITCH NOB

a. Attach the 2 claws to install the knob.

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL FRONT SEAT WIRE LH

2. INSTALL FRONT SEAT SIDE AIRBAG ASSEMBLY LH

CAUTION:

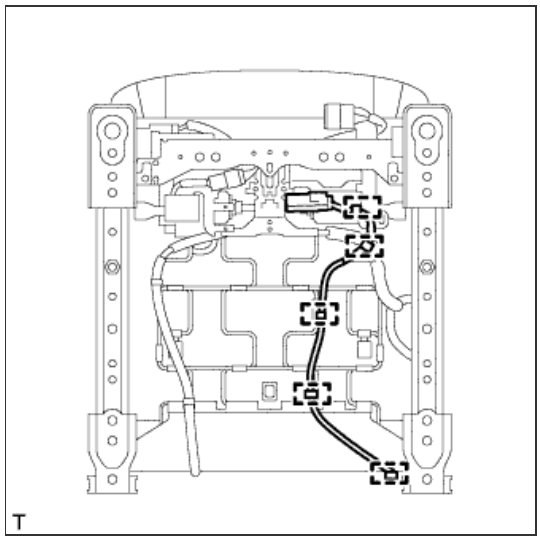
Make sure that the seat frame assembly is not deformed. If it is, replace it with a new one.



a. Install the front seat side airbag assembly with 2 nuts.

Torque:
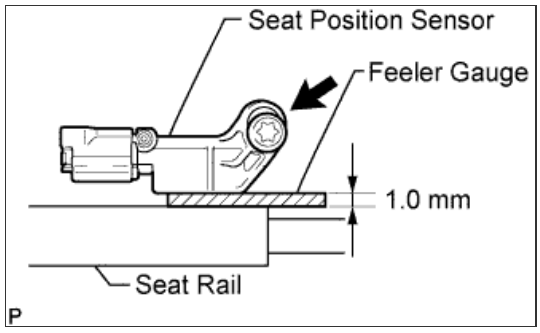
5.5 N*m{ 56 kgf*cm , 49 in.*lbf }

b. Attach the 2 clamps to connect the wire harness.

c. Attach the 5 clamps to connect the wire harness.

3. INSTALL SEAT POSITION SENSOR



a. Check that the engine switch is off.

b. Check that the cable is disconnected from the battery negative (-) terminal.

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

c. Using a .0 mm (0.0393 in.) feeler gauge, install the seat position sensor.

NOTICE:

- **If the seat position sensor has been dropped, or there are any cracks, dents or other defects in the case or connector, replace the seat position sensor with a new one.**
- **When installing the seat position sensor, be careful that the SRS wiring does not interfere with other parts and that it is not pinched between other parts.**

HINT:

Be sure that the clearance between the seat position sensor and the seat rail is within 0.6 to .4 mm (0.0236 to 0.055 in.).

d. Using a T30 R socket wrench, install the seat position sensor with the screw.

Torque:
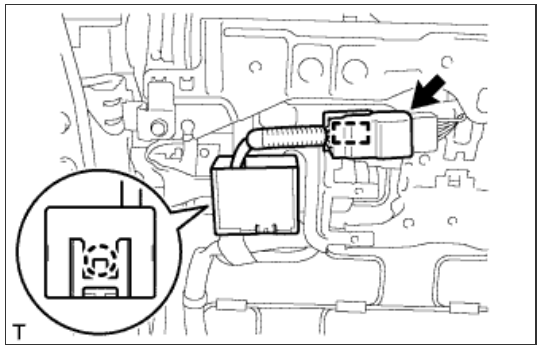
8.0 N*m{ 82 kgf*cm , 71 in.*lbf }

e. Make sure that the clearance between the seat position sensor and the seat rail is within 0.6 to .4 mm (0.0236 to 0.055 in.).

f. Check that there is no looseness in the installation parts of the seat position sensor.

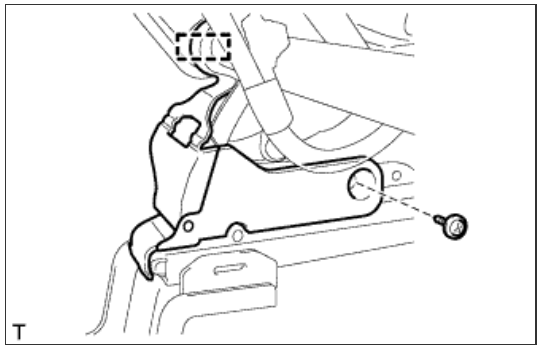


g. Connect the connector.

h. Install the seat slide position sensor protector to the seat position sensor.

4. INSTALL SEAT HEATER CONTROL SUB-ASSEMBLY (w 3eat Heater System)

a. Attach the claw to install the seat heater control.



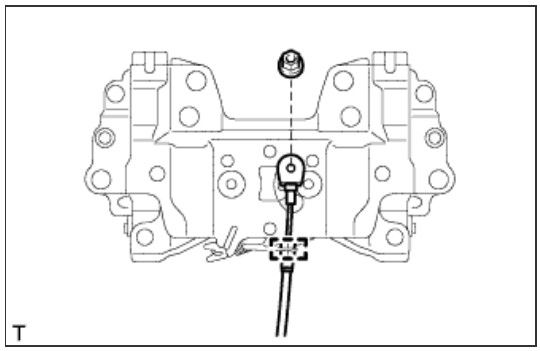
b. Attach the clamp and connect the seat heater control connector.

5. INSTALL FRONT LOWER SEAT CUSHION SHIELD RH

a. Attach the hook to install the lower cushion shield.

b. Install the screw.

6. INSTALL FRONT LOWER SEAT CUSHION SHIELD LH



a. Attach the hook to install the lower cushion shield.

b. Install the screw.

7. INSTALL UPPER ACTI E HEADREST UNIT

a. Install the upper active headrest unit to the lower active headrest unit with the cable clamp and nut.

Torque:
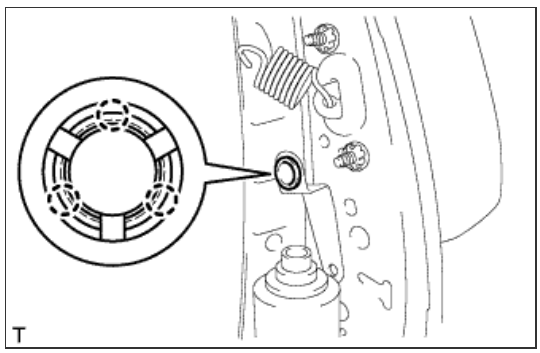
5.0 N*m{ 51 kgf*cm , 44 in.*lbf }

8. INSTALL LOWER ACTI E HEADREST UNIT



a. Install the lower active headrest unit together with the upper active headrest unit with the 6 nuts.

Torque:
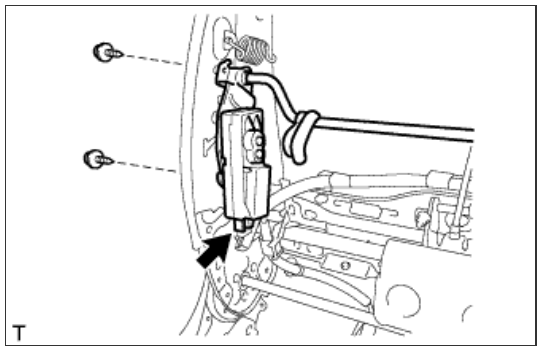
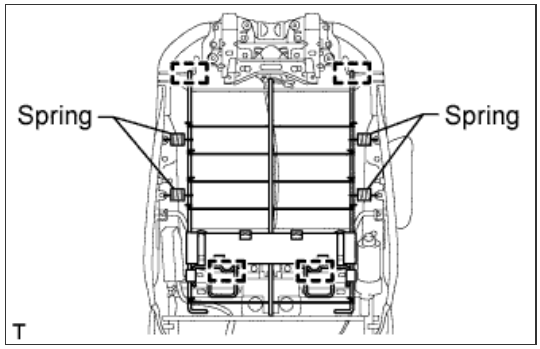
Upper active headrest unit:
14 N*m{ 143 kgf*cm , 10 ft.*lbf }
Lower active headrest unit:
5.0 N*m{ 51 kgf*cm , 44 in.*lbf }



9. INSTALL LUMBAR SUPPORT AD USTER ASSEMBLY LH (for Driver Side)

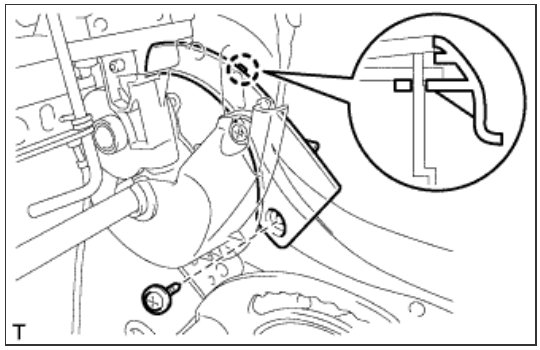
a. Attach the 3 claws to install the bush.



b. Install the lumbar support adjuster with the 2 screws.

c. Connect the lumbar support adjuster connector.

d. Attach the 4 hooks to install the seatback spring.



e. Install the 4 springs.

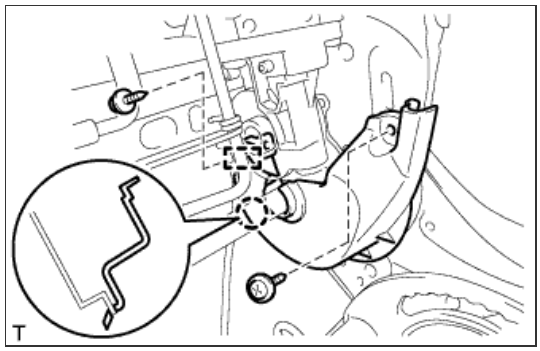
10. INSTALL OUTSIDE RECLINING AD USTER CO ER RH

a. Attach the claw to install the reclining adjuster cover.

b. Install the screw.

11. INSTALL OUTSIDE RECLINING AD USTER CO ER LH

a. Attach the claw to install the reclining adjuster cover.



b. Install the screw.

12. INSTALL INSIDE RECLINING AD USTER CO ER RH

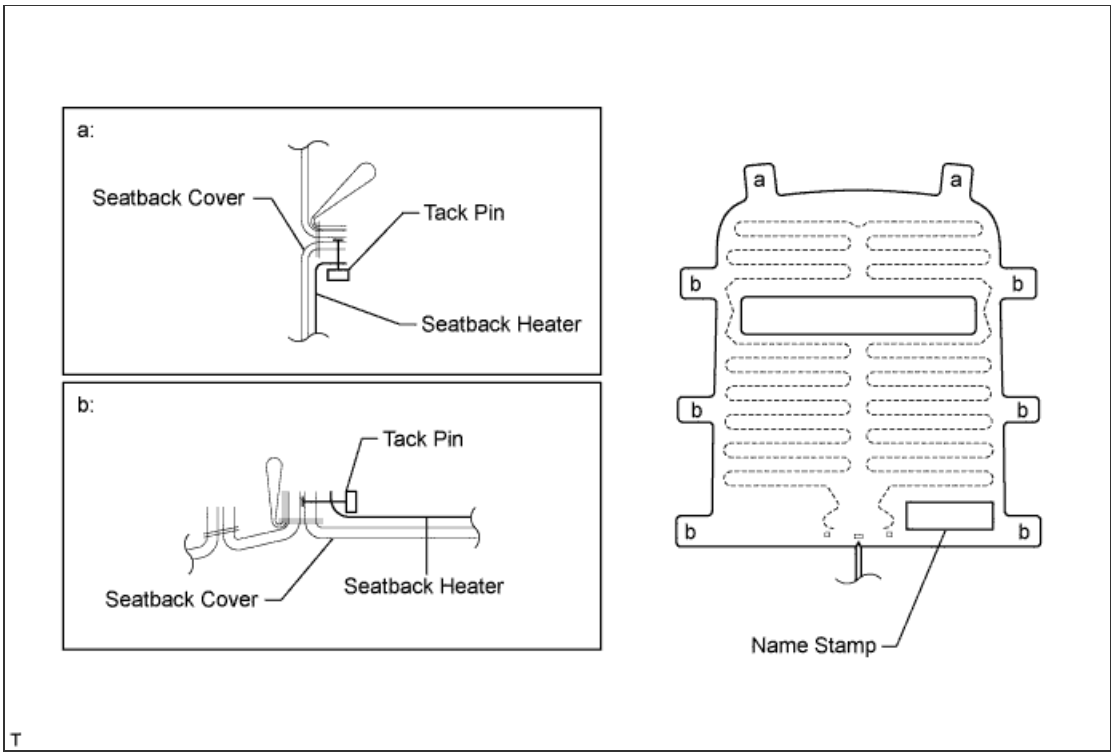
a. Attach the claw to install the cover.

b. Install the 2 screws.

c. Attach the wire harness clamp.

13. INSTALL INSIDE RECLINING AD USTER CO ER LH

a. Attach the claw to install the cover.



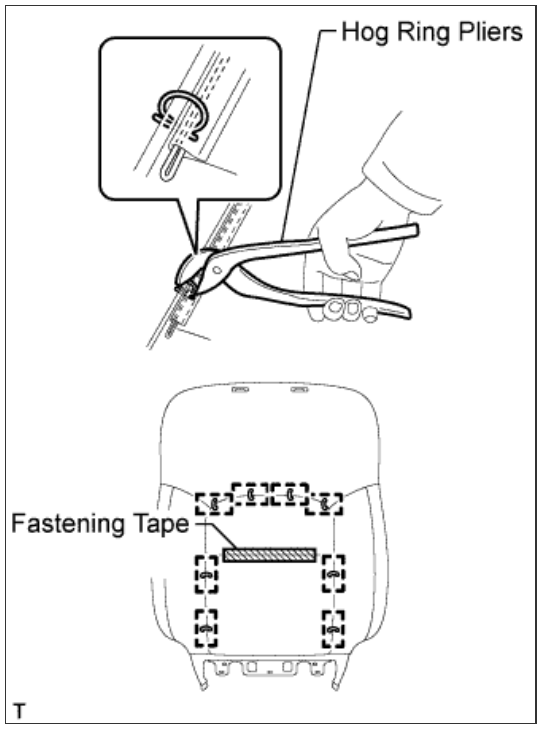
b. Install the 2 screws.

c. Attach the wire harness clamp.

14. INSTALL FRONT SEATBAC HEATER ASSEMBLY LH (w Sat Heater System)

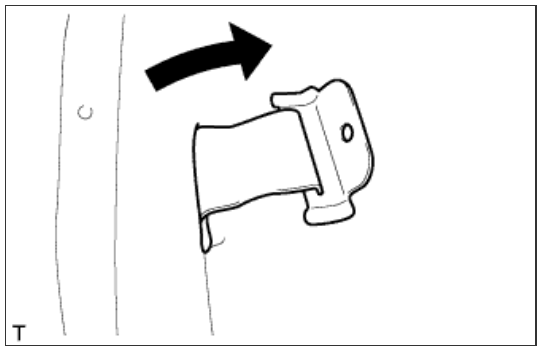
a. Set the seatback heater with the name stamp side facing the seatback cover.

b. Install the seatback heater with new tack pins.



15. INSTALL FRONT SEPARATE TYPE SEATBAC CO ER

a. Attach the fastening tape to install the seatback cover with new hog rings.



b. Using hog ring pliers, install the seatback cover

NOTICE:

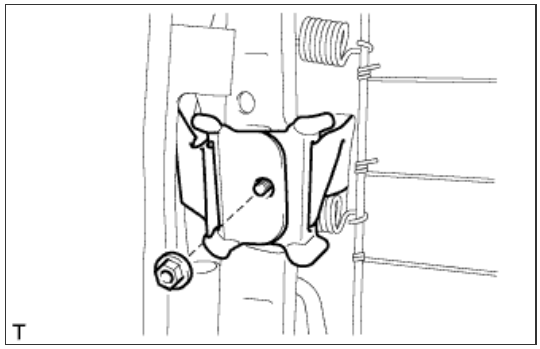
- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**

c. Connect the seatback cover bracket to the seatback pad.

16. INSTALL SEATBAC CO ER WITH PAD



a. Install the seatback cover with pad to the seatback frame.

b. Install the seatback cover bracket to the seat frame with the nut.

Torque:
5.0 N*m{ 51 kgf*cm , 44 in.*lbf }

CAUTION:

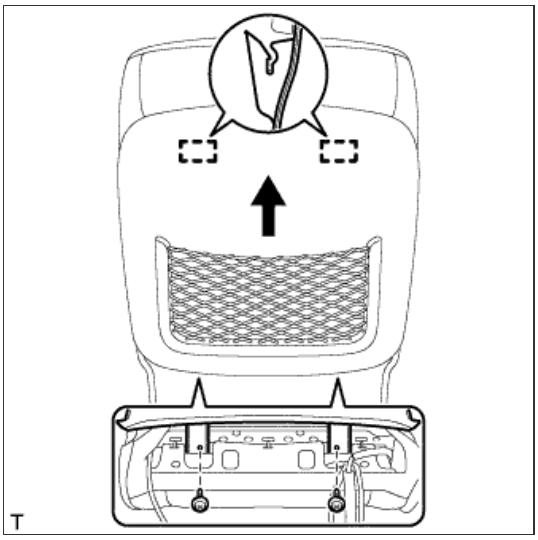
After the seatback trim cover is assembled, make sure the side airbag strap is not twisted.

c. Attach the 9 hooks.

d. Using hog ring pliers, install 3 new hog rings to the seat frame.

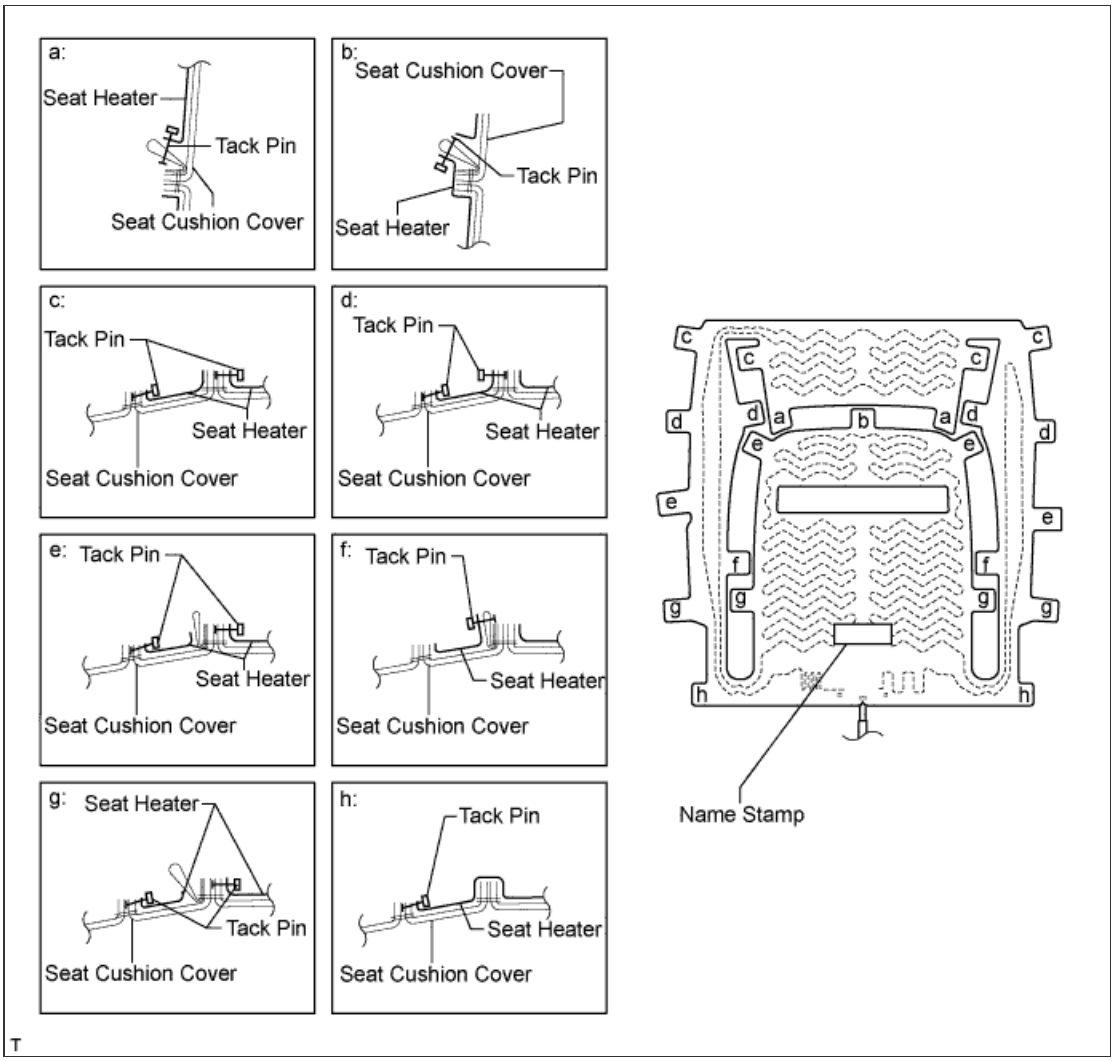


17. INSTALL FRONT SEAT HEADREST SUPPORT

a. Attach the 4 claws to install the 2 headrest supports.

18. INSTALL FRONT SEATBAC BOARD SUB-ASSEMBLY LH

a. Move the seatback board in the direction of the arrow to attach the 2 hooks and install the seatback board.

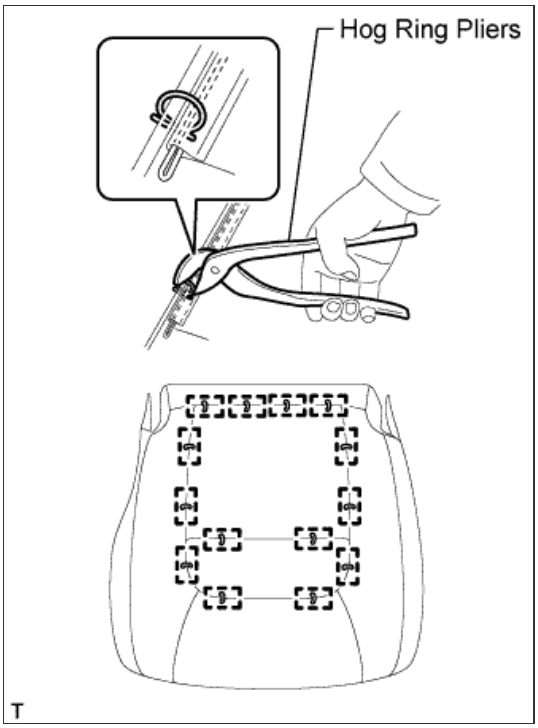


b. Install the 2 screws.

19. INSTALL FRONT SEAT CUSHION HEATER ASSEMBLY LH (w Seat Heater System)

a. Set the seat cushion heater with the name stamp side facing the seat cushion cover.

b. Install the seat cushion heater with new tack pins.



20. INSTALL FRONT SEPARATE TYPE SEAT CUSHION CO ER

a. Using hog ring pliers, install the seat cushion cover to the seat cushion pad with new hog rings.

NOTICE:

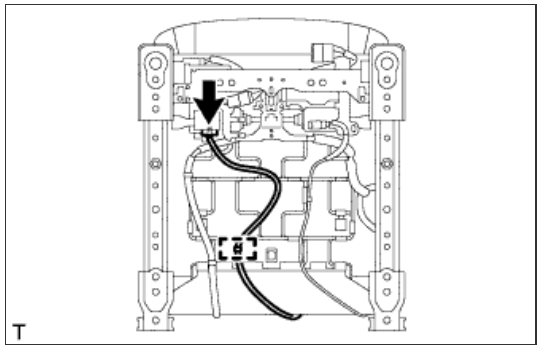
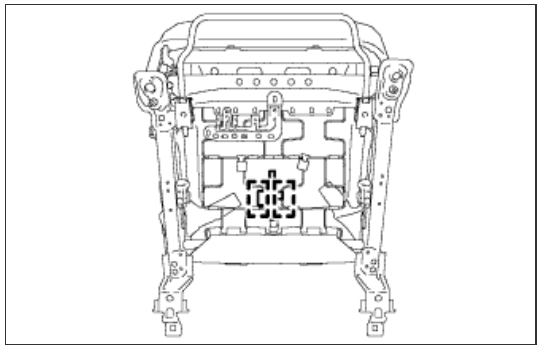
- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**



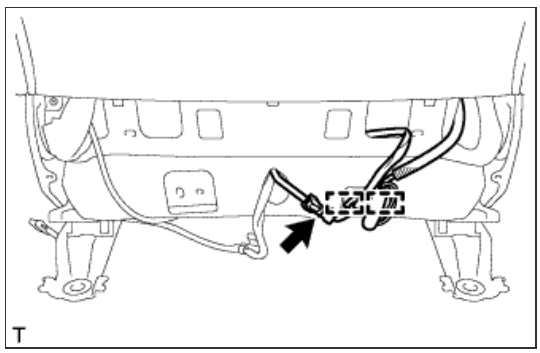
21. INSTALL SEAT CUSHION CO ER WITH PAD

a. Attach the hooks to install the seat cushion cover with pad.

b. Bend the 2 seat frame claws downward.

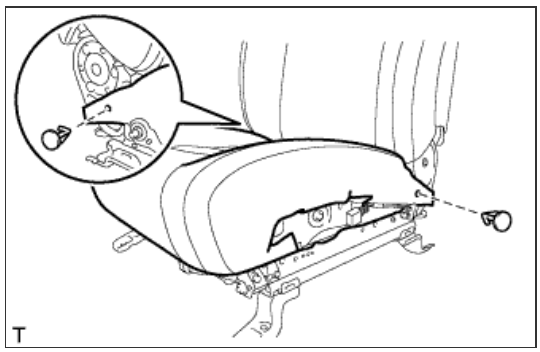


c. Connect the seat heater control connector and attach the wire harness clamp.



d. for Front Passenger Side

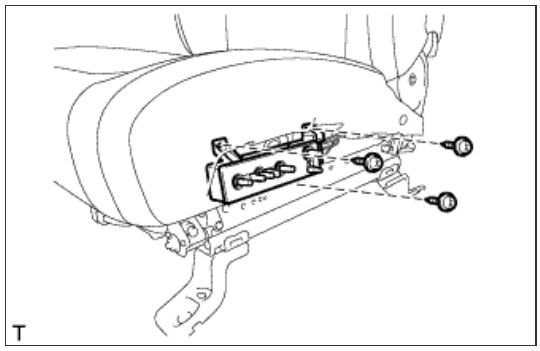
i. Attach the 2 clamps to install the seat belt warning sensor connector.



ii. Connect the seat belt warning sensor connector.

e. Connect the seat heater connector and attach the 2 wire harness clamps.

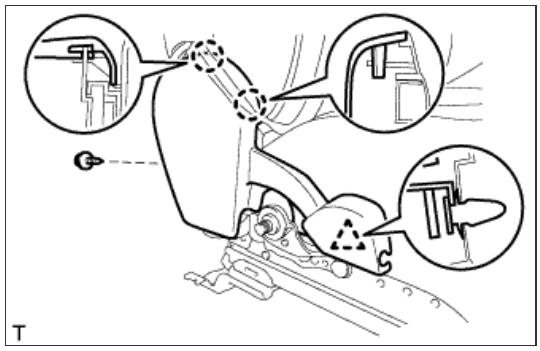
f. Install the 2 clips.



22. INSTALL FRONT POWER SEAT SWITCH LH

a. Install the switch with the 3 screws.

b. w Seat Position Memory System
Connect the 2 connectors.



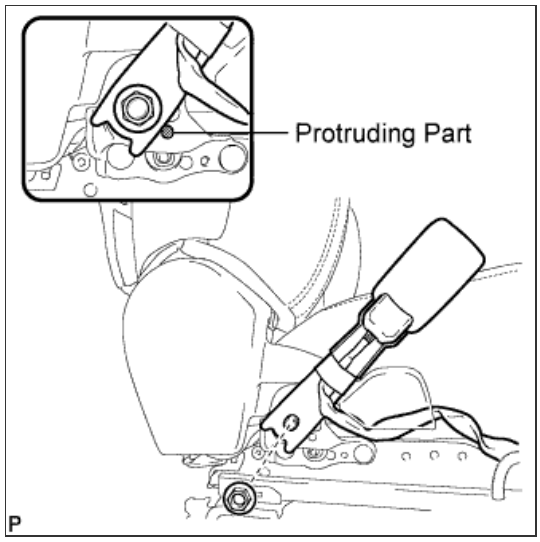
c. w o Seat Position Memory System
Connect the connector.

23. INSTALL FRONT INNER SEAT CUSHION SHIELD LH

a. Attach the 2 claws and clip to install the cushion shield.

b. Install the screw.

24. INSTALL FRONT SEAT INNER BELT ASSEMBLY LH



a. Install the front seat inner belt assembly with the nut.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

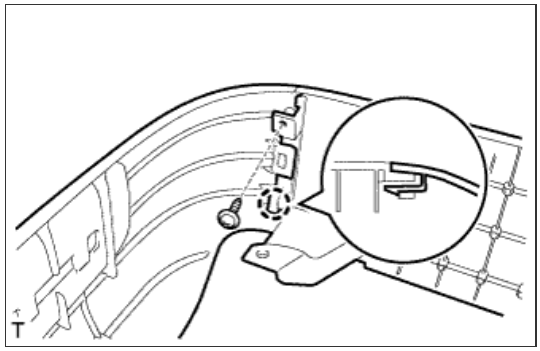
Do not allow the anchor part of the front seat inner belt assembly to overlap the protruding parts of the front seat adjuster.

b. Connect the connectors and attach the clamps.

25. INSTALL LUMBAR SWITCH (for Driver Side)

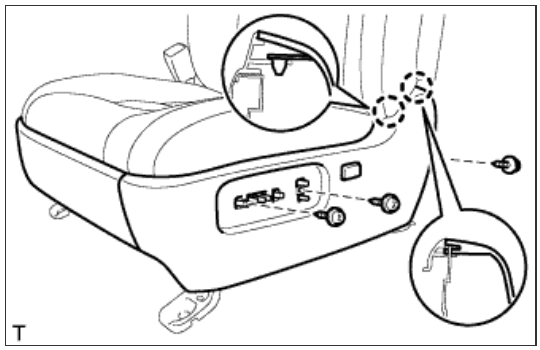


a. Install the lumbar switch with the 2 screws.

26. INSTALL FRONT INNER NO. 1 SEAT CUSHION SHIELD LH

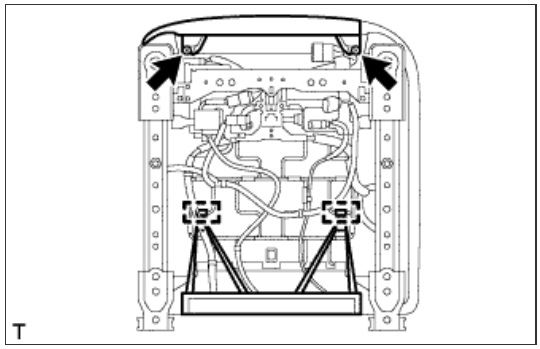
a. Attach the claw to install the cushion shield.

b. Install the screw.



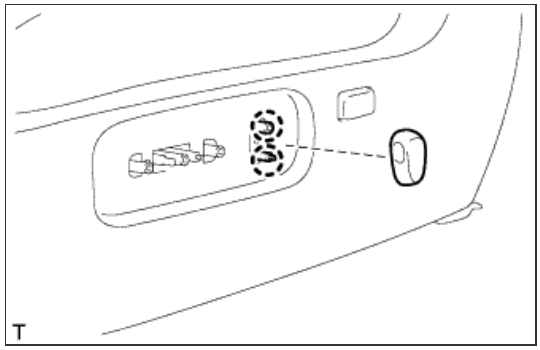
27. INSTALL FRONT SEAT CUSHION SHIELD LH

a. for Driver Side
Connect the lumbar switch connectors.



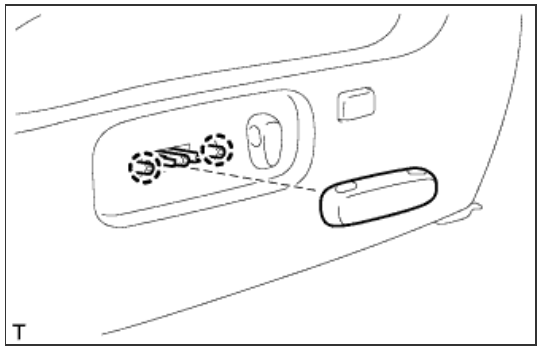
b. Attach the 2 claws to install the cushion shield.

c. Install the 3 screws.



d. Install the 2 screws.

e. Attach the 2 rubber bands to the hooks.



28. INSTALL RECLINING POWER SEAT SWITCH NOB

a. Attach the 2 claws to install the knob.

29. INSTALL SLIDE AND ERTICAL POWER SEAT SWITCH NOB

a. Attach the 2 claws to install the knob.

for Preparation Click here

HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL FRONT SEAT ASSEMBLY LH

a. Place the front seat assembly in the cabin.

NOTICE:

Be careful not to damage the vehicle body.

b. Connect the seat wire connectors under the seat.

c. Connect the cable to the negative (-) battery terminal.

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

d. Temporarily install the front seat assembly with the 4 bolts.

e. Operate the power seat switch (slide switch) to move the seat to the rearmost position.

f. Tighten the bolts in the order shown in the illustration.

Torque:
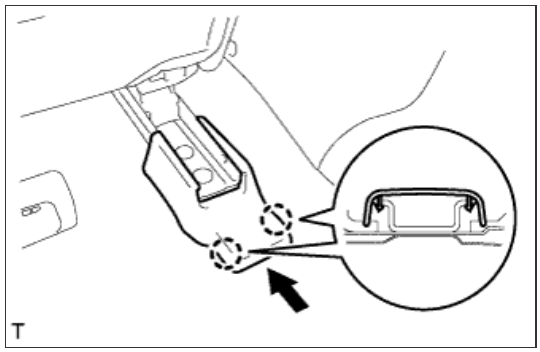
37 N*m{ 377 kgf*cm , 27 ft.*lbf }

g. Operate the power seat switch (slide switch) to move the seat to the foremost position.



h. Tighten the bolts in the order shown in the illustration.

Torque:
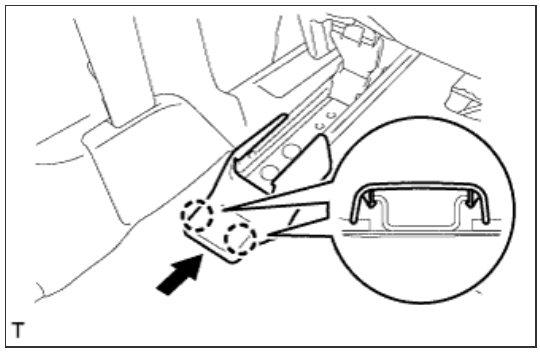
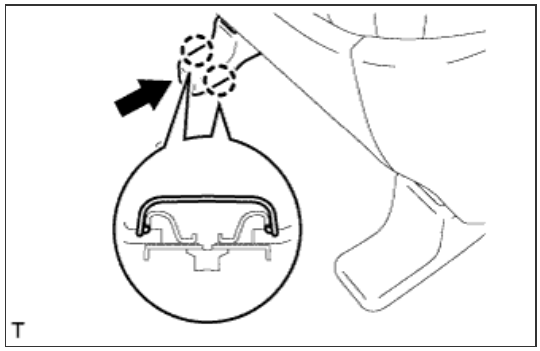
37 N*m{ 377 kgf*cm , 27 ft.*lbf }



2. INSTALL REAR INNER SEAT TRACK BRACKET COVER LH

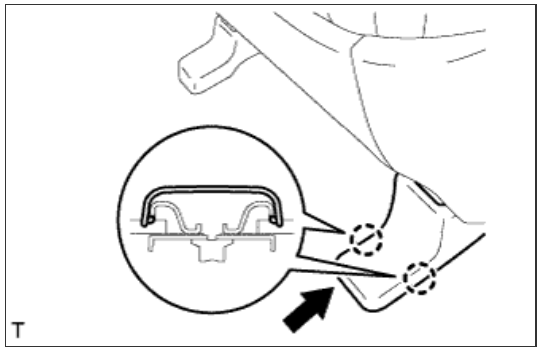
a. Attach the 2 claws to install the cover.



3. INSTALL REAR OUTER SEAT TRACK BRACKET COVER LH

a. Attach the 2 claws to install the cover.

4. INSTALL FRONT INNER SEAT TRACK BRACKET COVER LH



a. Attach the 2 claws to install the cover.

5. INSTALL FRONT OUTER SEAT TRACK BRACKET COVER LH

a. Attach the 2 claws to install the cover.

b. Restore the Autoaway/Return function setting to the previous condition by changing the customize parameter (Click here).

6. INSTALL FRONT SEAT HEADREST ASSEMBLY

7. CHECK SRS ARNING LIGHT

a. Check the SRS warning light (Click here).

8. INSPECT FRONT SEAT ASSEMBLY

a. w/ Seat Position Memory System:
Check the power seat operation (Click here).

b. w/o Seat Position Memory System:
Check the power seat operation (Click here).

c. w/ Seat Heater System:
Check the seat heater operation.

i. Turn the engine switch on ( ).

ii. Turn the seat heater switch on.

iii. Wait 5 minutes or more and confirm that the seat surface becomes warm.

for Preparation Click here

HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

2. REMOVE REAR NO. 2 SEAT CUSHION HINGE COVER

a. Using a screwdriver, detach the 6 claws and remove the cover.

HINT:

Tape the screwdriver tip before use.

3. REMOVE REAR NO. 4 SEAT CUSHION HINGE COVER

a. Using a screwdriver, detach the 6 claws and remove the cover.

HINT:

Tape the screwdriver tip before use.

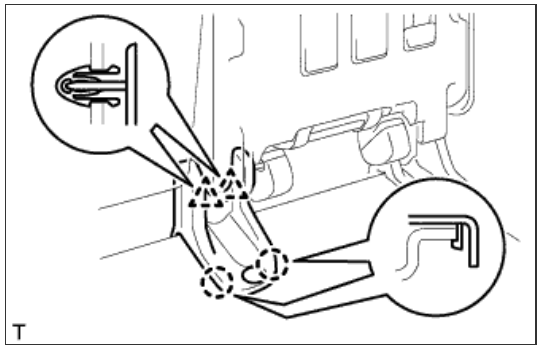
4. REMOVE REAR NO. 1 SEAT CUSHION HINGE COVER



a. Operate the reclining adjuster release handle to move the seat into the position shown in the illustration.

b. Using a screwdriver, detach the 2 claws and 2 clips, and remove the cover.

HINT:

Tape the screwdriver tip before use.

5. REMOVE REAR NO. 3 SEAT CUSHION HINGE COVER

a. Using a screwdriver, detach the 2 claws and 2 clips, and remove the cover.

HINT:

Tape the screwdriver tip before use.

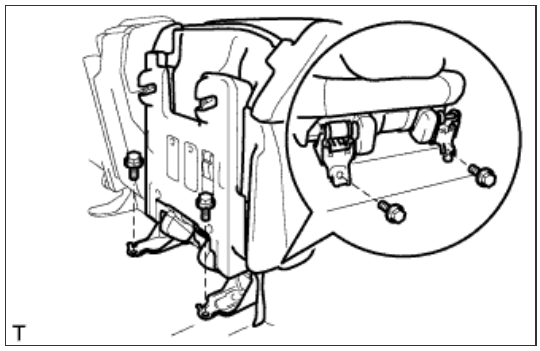
6. REMOVE REAR NO. 1 SEAT ASSEMBLY RH

a. w/ Rear Seat Side Airbag:
Disconnect the connector.



b. w/ Seat Heater System:
Disconnect the connector.

c. Remove the 4 bolts and seat assembly.

NOTICE:

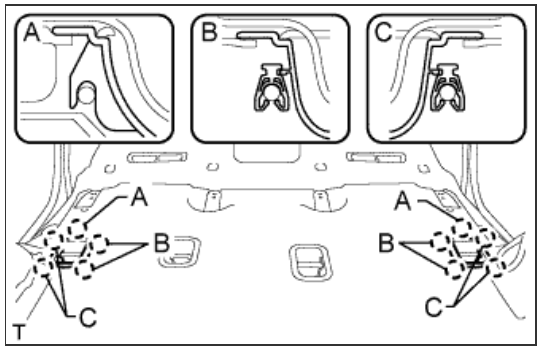
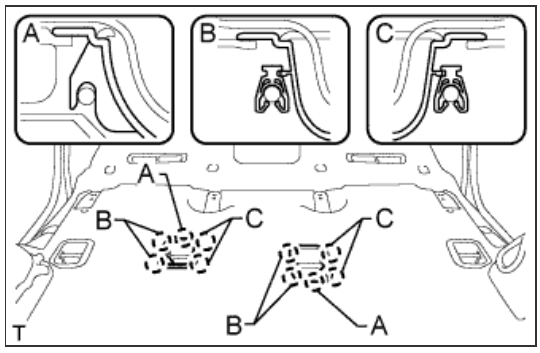
e careful not to damage the vehicle body.



7. REMOVE REAR NO. 1 SEAT ASSEMBLY LH

a. Remove the rear No. 1 seat assembly H (Click here).

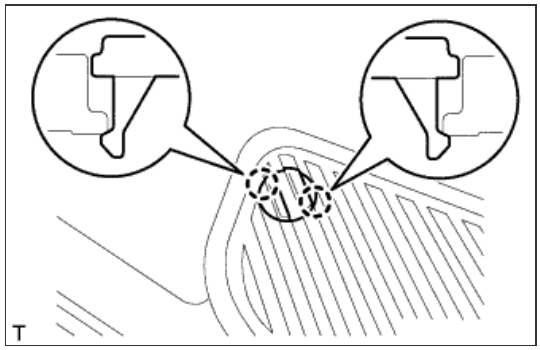


8. REMOVE REAR NO. 1 SEAT PROTECTOR

a. Detach the 10 claws and remove the 2 seat protectors.

9. REMOVE REAR NO. 2 SEAT PROTECTOR

a. Detach the 10 claws and remove the 2 seat protectors.



10. REMOVE REAR STEP COVER

HINT:

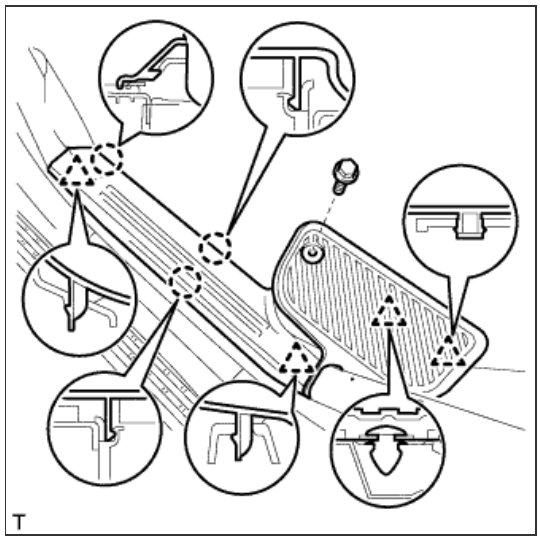
Use the same procedure to remove the step cover on the other side.



a. Detach the 2 claws and remove the step cover.

11. REMOVE REAR DOOR SCUFF PLATE LH

a. Remove the screw.

b. Detach the 3 claws and 4 clips, and remove the scuff plate.

12. REMOVE REAR DOOR SCUFF PLATE RH

HINT:

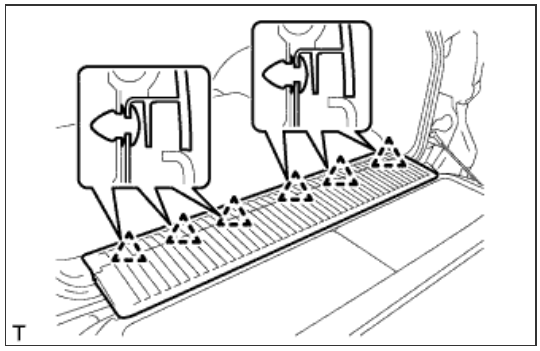
Use the same procedures described for the H side.



13. REMOVE REAR NO. 2 SEAT ASSEMBLY

a. for Face to Face Seat Type:
Remove the rear No. 2 seat assembly (Click here).

b. except Face to Face Seat Type:
Remove the rear No. 2 seat assembly (Click here).

14. REMOVE REAR FLOOR MAT REAR SUPPORT PLATE

a. Detach the 6 clips and remove the support plate.

15. REMOVE REAR SEAT COVER CAP (w/ Rear No. 2 Seat, except Face to Face Seat Type)

HINT:

Use the same procedure to remove the rear seat cover cap on the other side.

a. Using a screwdriver, detach the 3 claws and remove the rear seat cover cap.

HINT:

Tape the screwdriver tip before use.

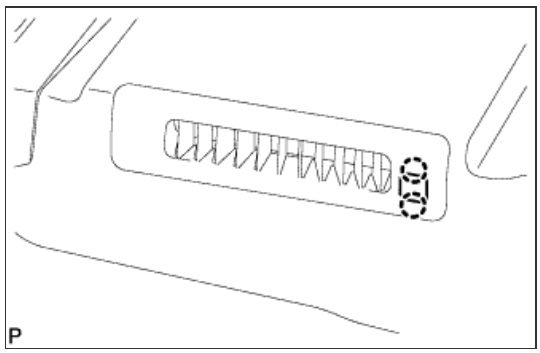
16. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY LH

a. w/ Sliding Roof:
Remove the front uarter trim panel assembly H (Click here).

b. w/o Sliding Roof:
Remove the front uarter trim panel assembly H (Click here).

17. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY RH

a. w/ Sliding Roof:
Remove the front uarter trim panel assembly RH (Click here).



b. w/o Sliding Roof:
Remove the front uarter trim panel assembly RH (Click here).

18. REMOVE AIR DUCT PLUG (w/ Rear Air Conditioning System)

a. Detach the 2 claws and remove the plug.

HINT:

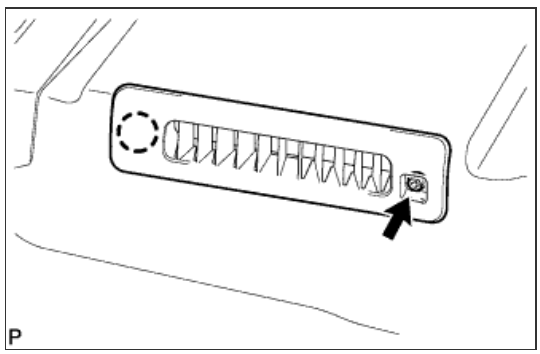
Use the same procedures for both sides.



19. REMOVE REAR AIR DUCT GUIDE (w/ Rear Air Conditioning System)

a. Remove the screw.

b. Detach the claw and remove the guide.

HINT:

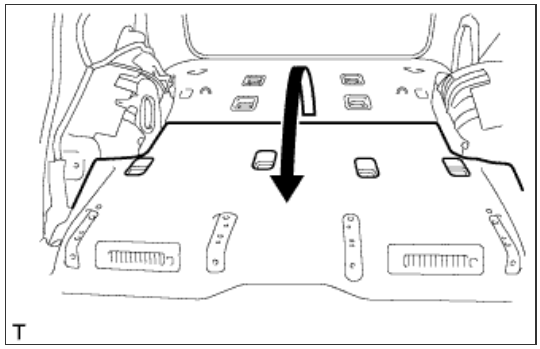
Use the same procedures for both sides.



20. REMOVE FRONT FLOOR CARPET ASSEMBLY

a. Fold back the floor carpet.

HINT:

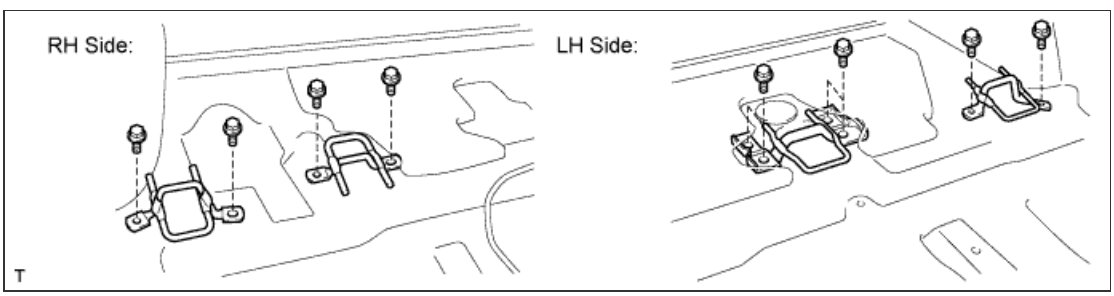
Fold back the carpet until it is possible to remove the rear No. 6 air duct.

21. REMOVE REAR NO. 6 AIR DUCT (w/ Rear Air Conditioning System)



a. Disconnect the 2 connectors.

b. Remove the screws and duct.

22. REMOVE REAR SEAT CUSHION LOCK STRIKER SUB-ASSEMBLY

a. Remove the 10 bolts and 4 lock strikers.

for Preparation Click here

HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

2. REMOVE REAR NO. 2 SEAT CUSHION HINGE COVER

a. Using a screwdriver, detach the 6 claws and remove the cover.

HINT:

Tape the screwdriver tip before use.

3. REMOVE REAR NO. 4 SEAT CUSHION HINGE COVER

a. Using a screwdriver, detach the 6 claws and remove the cover.

HINT:

Tape the screwdriver tip before use.

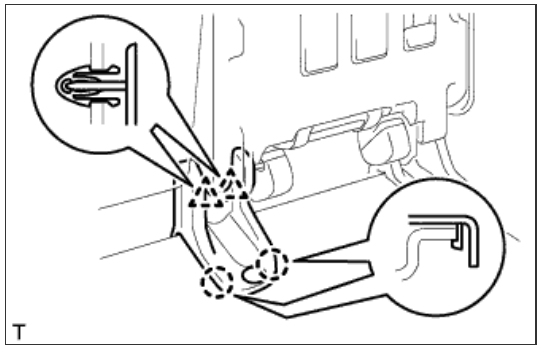
4. REMOVE REAR NO. 1 SEAT CUSHION HINGE COVER



a. Operate the reclining adjuster release handle to move the seat into the position shown in the illustration.

b. Using a screwdriver, detach the 2 claws and 2 clips, and remove the cover.

HINT:

Tape the screwdriver tip before use.

5. REMOVE REAR NO. 3 SEAT CUSHION HINGE COVER

a. Using a screwdriver, detach the 2 claws and 2 clips, and remove the cover.

HINT:

Tape the screwdriver tip before use.

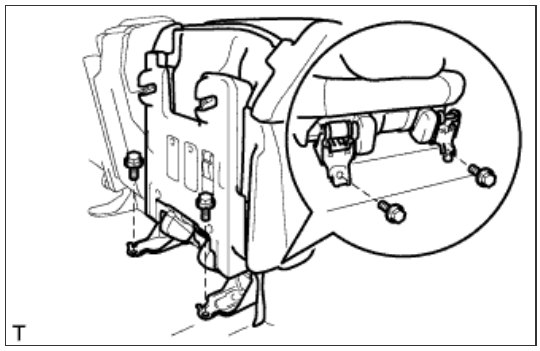
6. REMOVE REAR NO. 1 SEAT ASSEMBLY RH

a. w/ Rear Seat Side Airbag:
Disconnect the connector.



b. w/ Seat Heater System:
Disconnect the connector.

c. Remove the 4 bolts and seat assembly.

NOTICE:

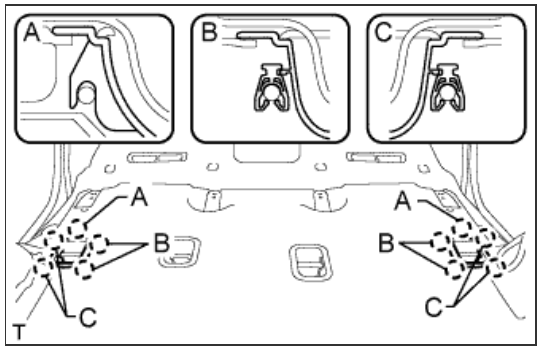
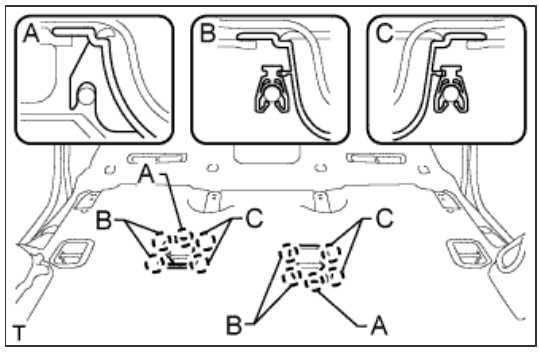
e careful not to damage the vehicle body.



7. REMOVE REAR NO. 1 SEAT ASSEMBLY LH

a. Remove the rear No. 1 seat assembly H (Click here).

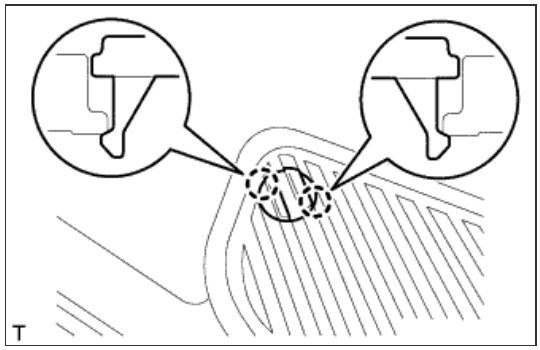


8. REMOVE REAR NO. 1 SEAT PROTECTOR

a. Detach the 10 claws and remove the 2 seat protectors.

9. REMOVE REAR NO. 2 SEAT PROTECTOR

a. Detach the 10 claws and remove the 2 seat protectors.



10. REMOVE REAR STEP COVER

HINT:

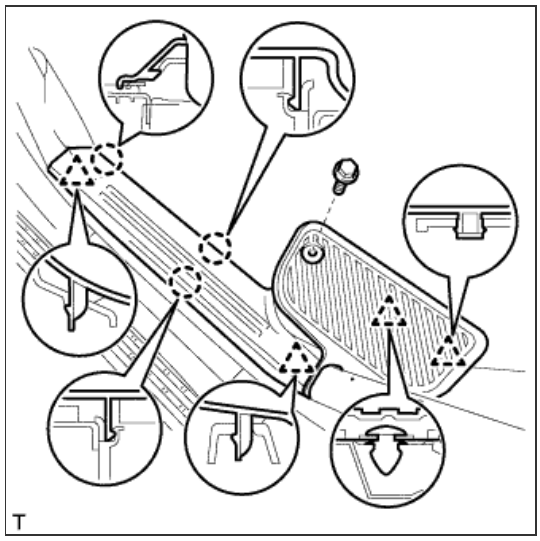
Use the same procedure to remove the step cover on the other side.



a. Detach the 2 claws and remove the step cover.

11. REMOVE REAR DOOR SCUFF PLATE LH

a. Remove the screw.

b. Detach the 3 claws and 4 clips, and remove the scuff plate.

12. REMOVE REAR DOOR SCUFF PLATE RH

HINT:

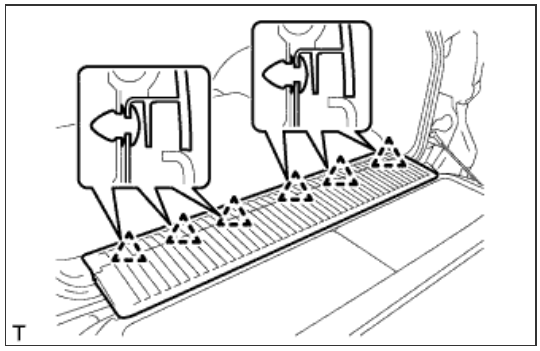
Use the same procedures described for the H side.



13. REMOVE REAR NO. 2 SEAT ASSEMBLY

a. for Face to Face Seat Type:
Remove the rear No. 2 seat assembly (Click here).

b. except Face to Face Seat Type:
Remove the rear No. 2 seat assembly (Click here).

14. REMOVE REAR FLOOR MAT REAR SUPPORT PLATE

a. Detach the 6 clips and remove the support plate.

15. REMOVE REAR SEAT COVER CAP (w/ Rear No. 2 Seat, except Face to Face Seat Type)

HINT:

Use the same procedure to remove the rear seat cover cap on the other side.

a. Using a screwdriver, detach the 3 claws and remove the rear seat cover cap.

HINT:

Tape the screwdriver tip before use.

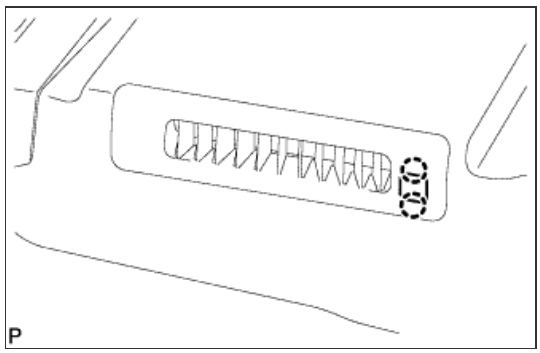
16. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY LH

a. w/ Sliding Roof:
Remove the front uarter trim panel assembly H (Click here).

b. w/o Sliding Roof:
Remove the front uarter trim panel assembly H (Click here).

17. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY RH

a. w/ Sliding Roof:
Remove the front uarter trim panel assembly RH (Click here).



b. w/o Sliding Roof:
Remove the front uarter trim panel assembly RH (Click here).

18. REMOVE AIR DUCT PLUG (w/ Rear Air Conditioning System)

a. Detach the 2 claws and remove the plug.

HINT:

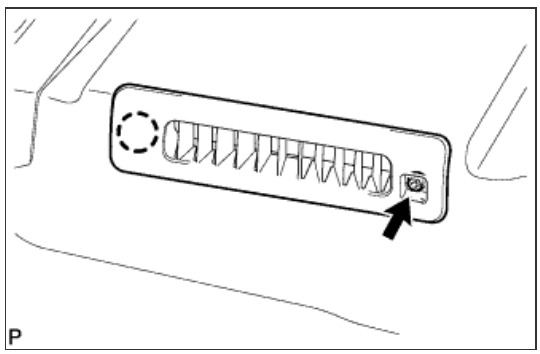
Use the same procedures for both sides.



19. REMOVE REAR AIR DUCT GUIDE (w/ Rear Air Conditioning System)

a. Remove the screw.

b. Detach the claw and remove the guide.

HINT:

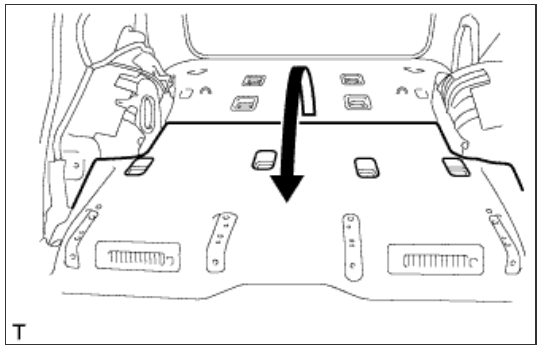
Use the same procedures for both sides.



20. REMOVE FRONT FLOOR CARPET ASSEMBLY

a. Fold back the floor carpet.

HINT:

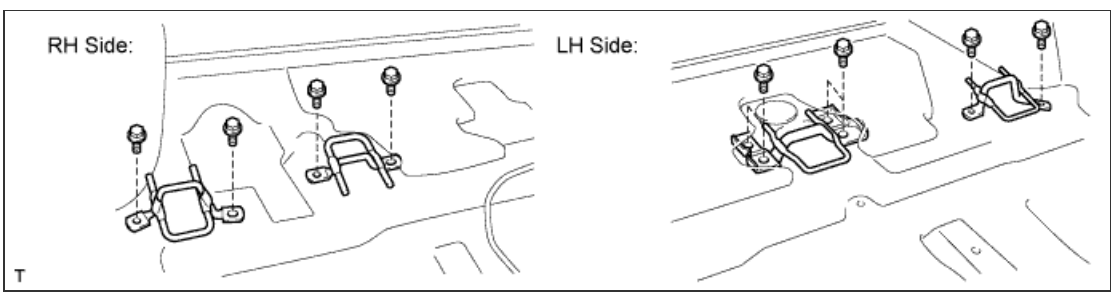
Fold back the carpet until it is possible to remove the rear No. 6 air duct.

21. REMOVE REAR NO. 6 AIR DUCT (w/ Rear Air Conditioning System)



a. Disconnect the 2 connectors.

b. Remove the screws and duct.

22. REMOVE REAR SEAT CUSHION LOCK STRIKER SUB-ASSEMBLY

a. Remove the 10 bolts and 4 lock strikers.

for Preparation Click here

HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

2. REMOVE REAR NO. 2 SEAT CUSHION HINGE COVER

a. Using a screwdriver, detach the 6 claws and remove the cover.

HINT:

Tape the screwdriver tip before use.

3. REMOVE REAR NO. 4 SEAT CUSHION HINGE COVER

a. Using a screwdriver, detach the 7 claws and remove the cover.

HINT:

Tape the screwdriver tip before use.

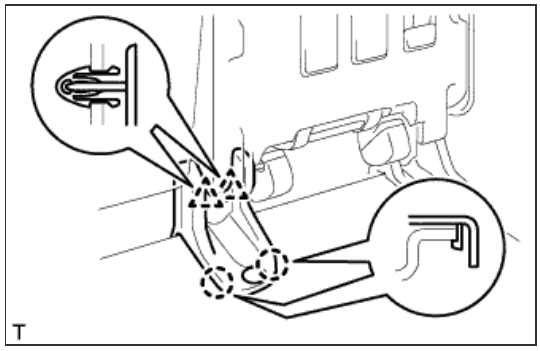
4. REMOVE REAR NO. 1 SEAT CUSHION HINGE COVER



a. Operate the reclining ad uster release handle to move the seat into the position shown in the illustration.

b. Using a screwdriver, detach the 2 claws and 2 clips, and remove the cover.

HINT:

Tape the screwdriver tip before use.

5. REMOVE REAR NO. 3 SEAT CUSHION HINGE COVER

a. Using a screwdriver, detach the 2 claws and 2 clips, and remove the cover.

HINT:

Tape the screwdriver tip before use.

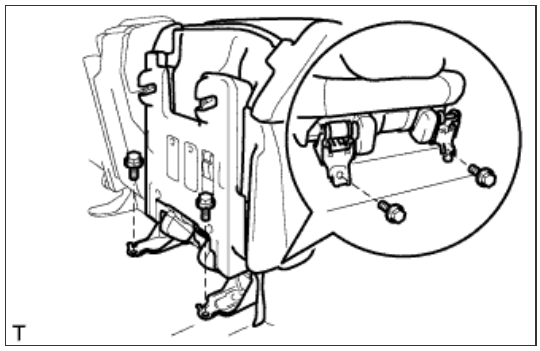
6. REMOVE REAR NO. 1 SEAT ASSEMBLY RH

a. w/ Rear Seat Side Airbag:
Disconnect the connector.



b. w/ Seat Heater System:
Disconnect the connector.

c. Remove the 4 bolts and seat assembly.

NOTICE:

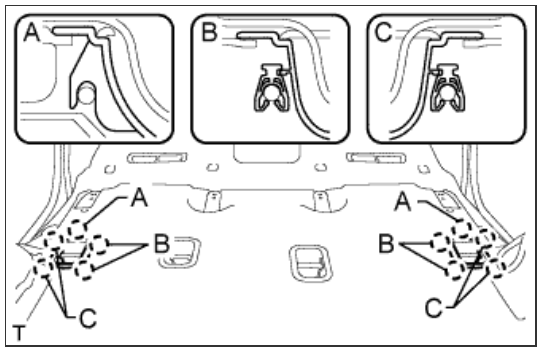
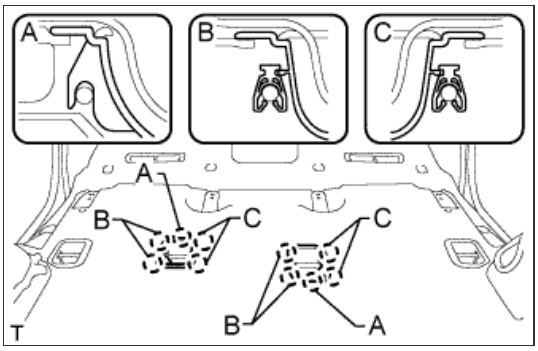
Be careful not to damage the vehicle body.



7. REMOVE REAR NO. 1 SEAT ASSEMBLY LH

a. Remove the rear o. 1 seat assembly (Click here).

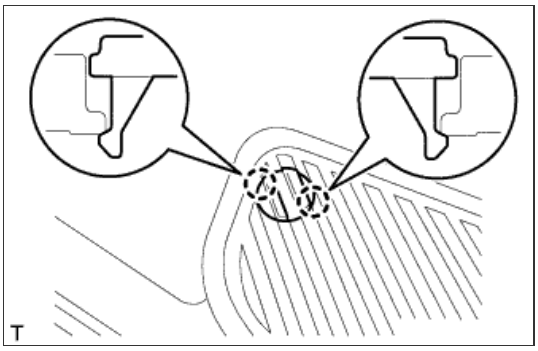


8. REMOVE REAR NO. 1 SEAT PROTECTOR

a. Detach the 10 claws and remove the 2 seat protectors.

9. REMOVE REAR NO. 2 SEAT PROTECTOR

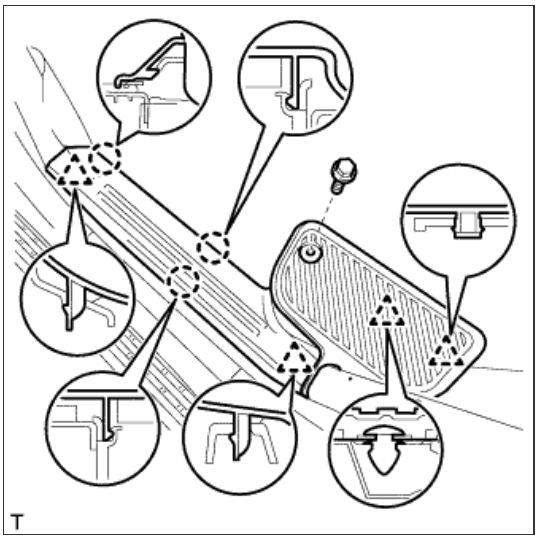
a. Detach the 10 claws and remove the 2 seat protectors.



10. REMOVE REAR STEP COVER

HINT:

Use the same procedure to remove the step cover on the other side.



a. Detach the 2 claws and remove the step cover.

11. REMOVE REAR DOOR SCUFF PLATE LH

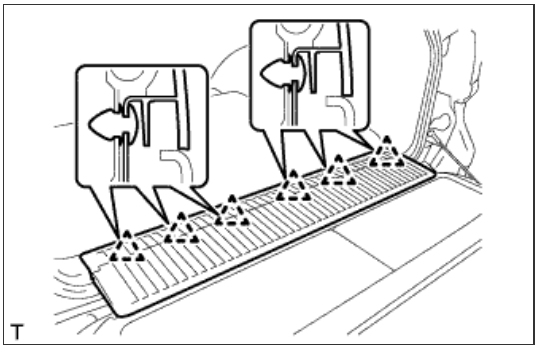
a. Remove the screw.

b. Detach the 3 claws and 4 clips, and remove the scuff plate.

12. REMOVE REAR DOOR SCUFF PLATE RH

HINT:

Use the same procedures described for the side.



13. REMOVE REAR NO. 2 SEAT ASSEMBLY

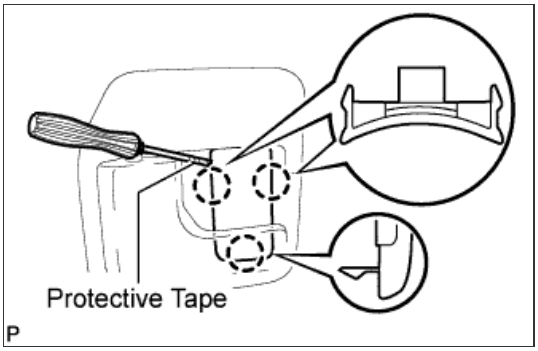
a. for Face to Face Seat Type:
Remove the rear o. 2 seat assembly (Click here).

b. except Face to Face Seat Type:
Remove the rear o. 2 seat assembly (Click here).

14. REMOVE REAR FLOOR MAT REAR SUPPORT PLATE

a. Detach the 6 clips and remove the support plate.

15. REMOVE REAR SEAT COVER CAP (w/ Rear No. 2 Seat, except Face to Face Seat Type)



HINT:

Use the same procedure to remove the rear seat cover cap on the other side.

a. Using a screwdriver, detach the 3 claws and remove the rear seat cover cap.

HINT:

Tape the screwdriver tip before use.

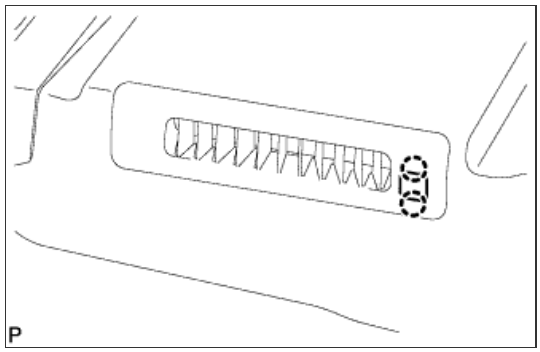
16. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY LH

a. w/ Sliding Roof:
Remove the front uarter trim panel assembly (Click here).

b. w/o Sliding Roof:
Remove the front uarter trim panel assembly (Click here).

17. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY RH

a. w/ Sliding Roof:
Remove the front uarter trim panel assembly RH (Click here).



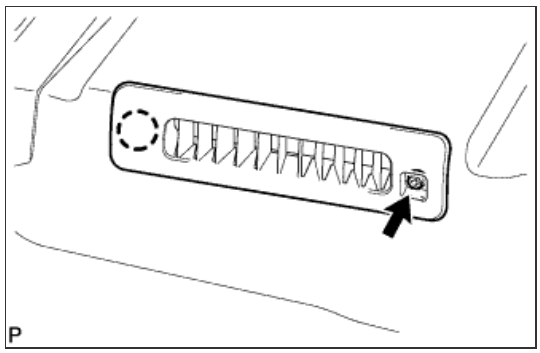
b. w/o Sliding Roof:
Remove the front uarter trim panel assembly RH (Click here).

18. REMOVE AIR DUCT PLUG (w/ Rear Air Conditioning System)

a. Detach the 2 claws and remove the plug.

HINT:

Use the same procedures for both sides.



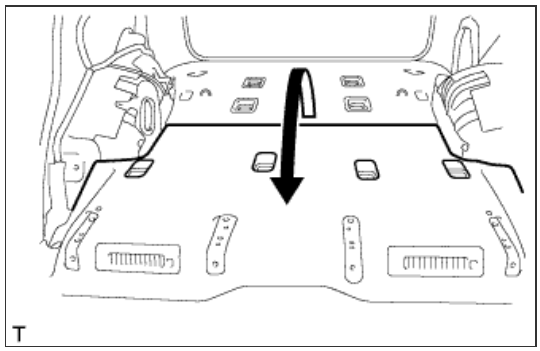
19. REMOVE REAR AIR DUCT GUIDE (w/ Rear Air Conditioning System)

a. Remove the screw.

b. Detach the claw and remove the guide.

HINT:

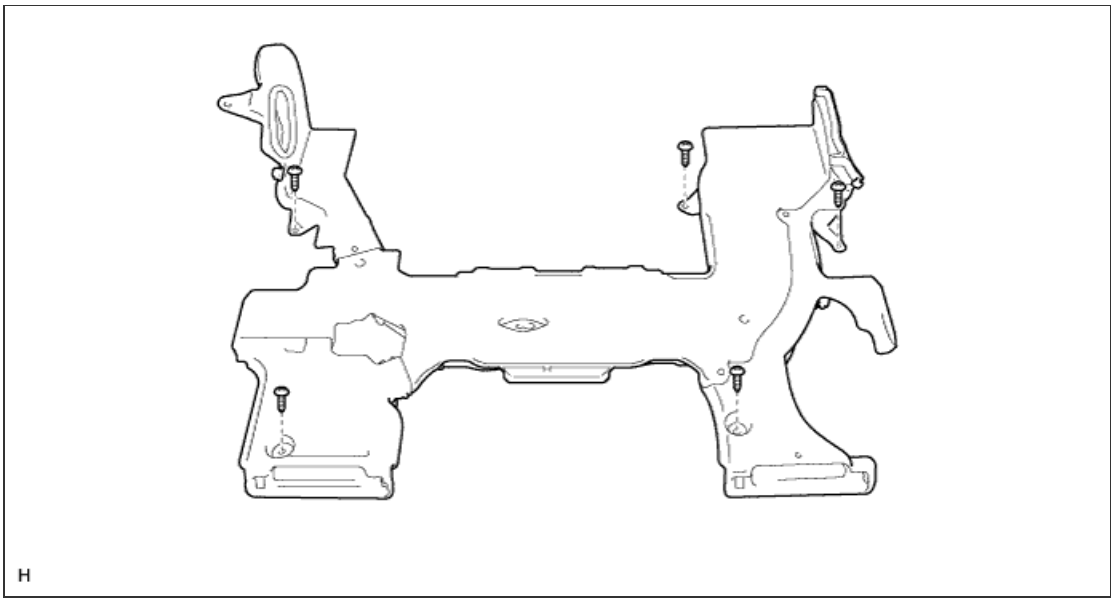
Use the same procedures for both sides.



20. REMOVE FRONT FLOOR CARPET ASSEMBLY

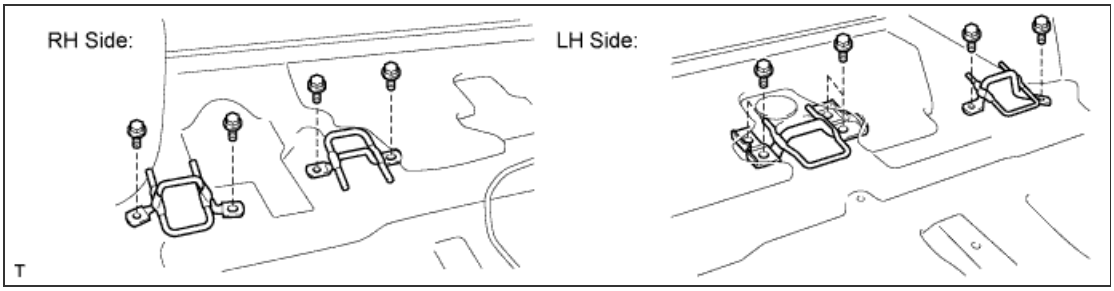
a. Fold back the floor carpet.

HINT:



Fold back the carpet until it is possible to remove the rear o. 6 air duct.

21. REMOVE REAR NO. 6 AIR DUCT (w/ Rear Air Conditioning System)



a. Disconnect the 2 connectors.

b. Remove the 5 screws and duct.

22. REMOVE REAR SEAT CUSHION LOCK STRIKER SUB-ASSEMBLY

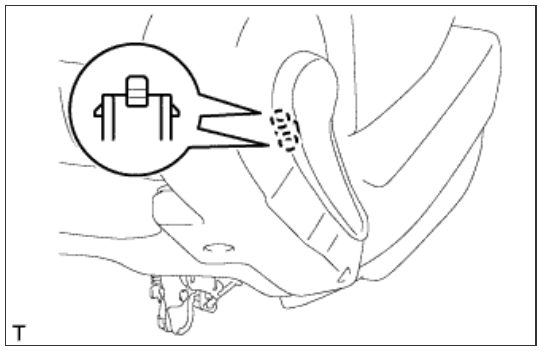
a. Remove the 10 bolts and 4 lock strikers.

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

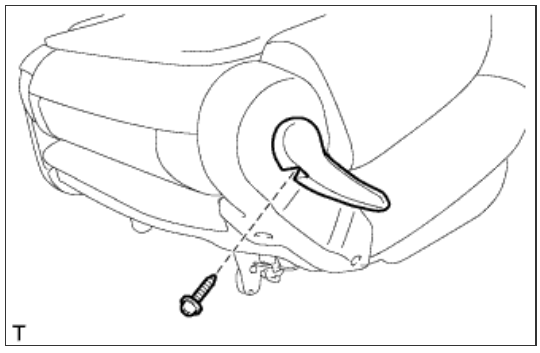
HINT:



- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. REMOVE SEAT ADJUSTER BOLT COVER

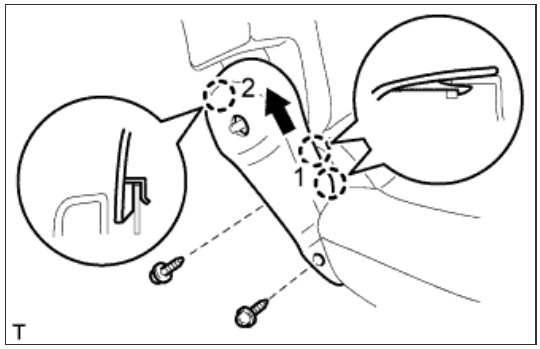
a. Using a screwdriver, detach the 2 claws and remove the cover.



HINT:

Tape the screwdriver tip before use.

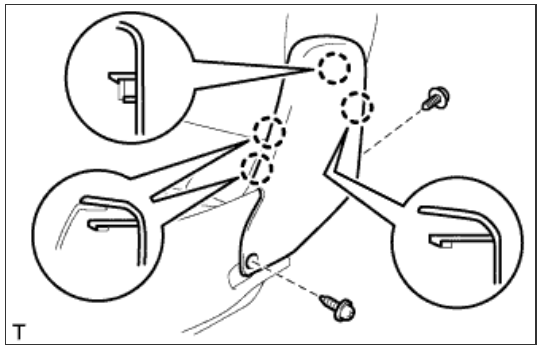
2. REMOVE RECLINING ADJUSTER RELEASE HANDLE RH



a. Remove the screw and release handle.

3. REMOVE REAR NO. 1 SEAT RECLINING COVER RH

a. Remove the 2 screws.

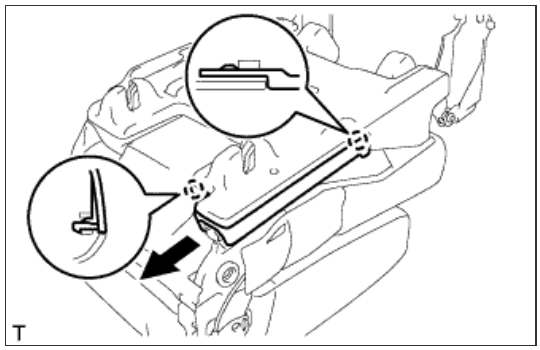


b. Detach the claws in the order shown in the illustration, and then remove the cover.

4. REMOVE REAR NO. 1 SEAT RECLINING COVER LH

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.

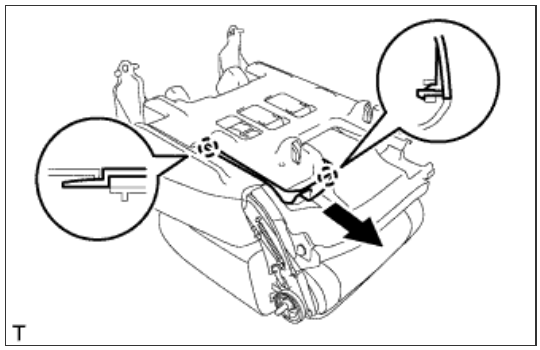


5. REMOVE UPPER SEAT TRACK RAIL COVER LH

a. Using a screwdriver, detach the 2 claws and remove the cover.

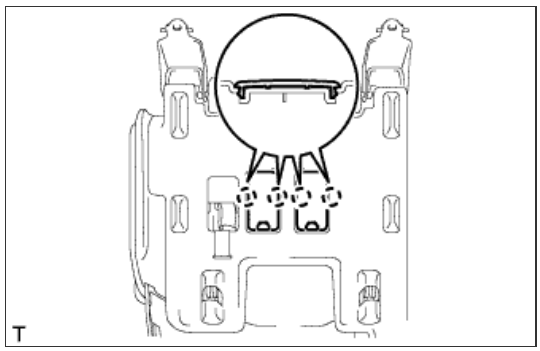
HINT:

Tape the screwdriver tip before use.



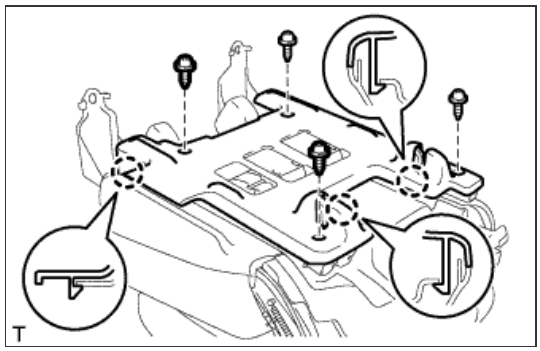
6. REMOVE UPPER SEAT TRACK RAIL COVER RH

a. Using a screwdriver, detach the 2 claws and remove the cover.



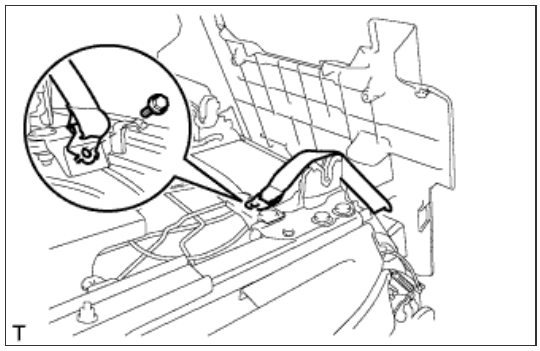
HINT:

Tape the screwdriver tip before use.



7. REMOVE NO. 1 SEAT CUSHION COVER

a. Detach the 4 claws and remove the 2 covers.

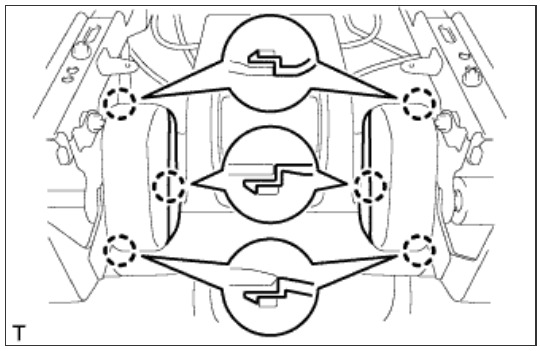


8. REMOVE REAR NO. 2 SEAT LEG SIDE COVER

a. Remove the 4 screws and detach the claws.

b. Remove the bolt that is securing the fold seat stopper band and remove the seat leg side cover together with the fold seat stopper band.

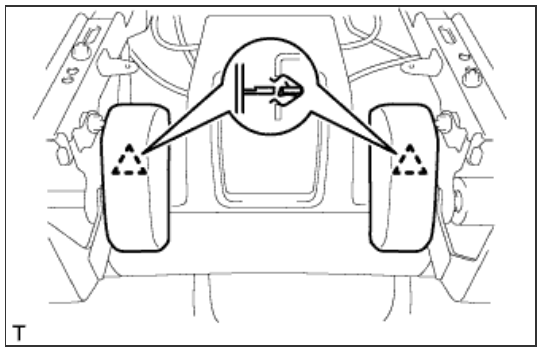
9. REMOVE FOLD SEAT STOPPER BAND ASSEMBLY



a. Remove the fold seat stopper band from the seat leg side cover.

10. REMOVE REAR SEAT SIDE HINGE FEMALE COVER

a. Using a screwdriver, detach the 6 claws and remove the 2 covers.

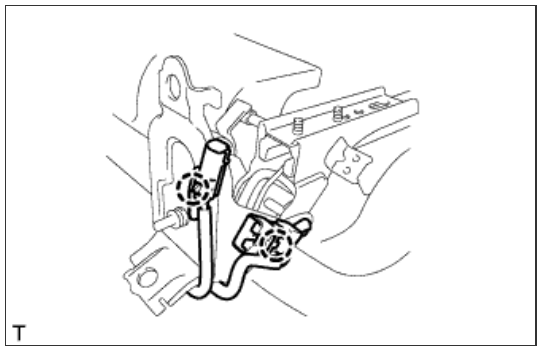


HINT:

Tape the screwdriver tip before use.

11. REMOVE REAR SEAT SIDE HINGE MALE COVER LH

a. Detach the clip and remove the cover.

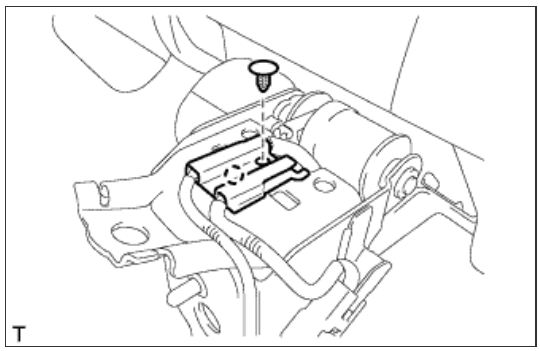


12. REMOVE REAR SEAT SIDE HINGE MALE COVER RH

a. Detach the clip and remove the cover.

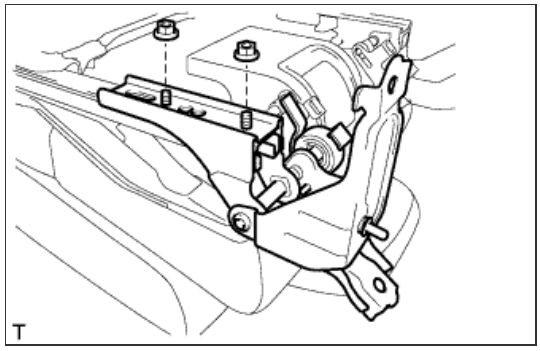
13. REMOVE REAR NO. 2 SEAT PROTECTOR

a. w/ Rear Seat Side Airbag:
Detach the claw and remove the wire harness connector.



b. w/ Seat Heater System:
Detach the claw and remove the wire harness connector.

c. Using a clip remover, remove the clip.

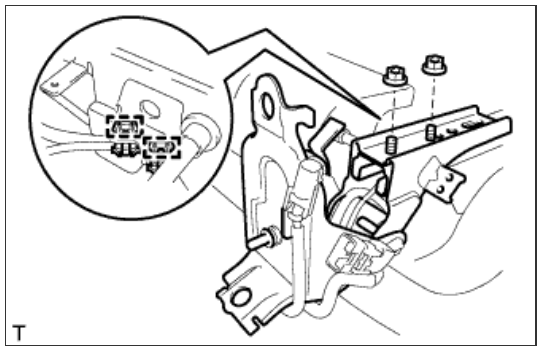


d. Detach the claw and remove the seat protector from the seat hinge.

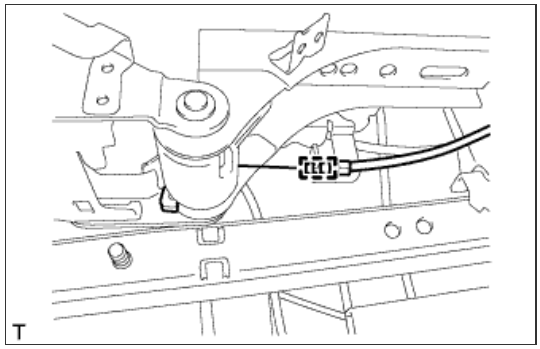
e. Detach the 2 claws, open the protector and remove the wire harness.

14. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH

a. Remove the 2 nuts and hinge.



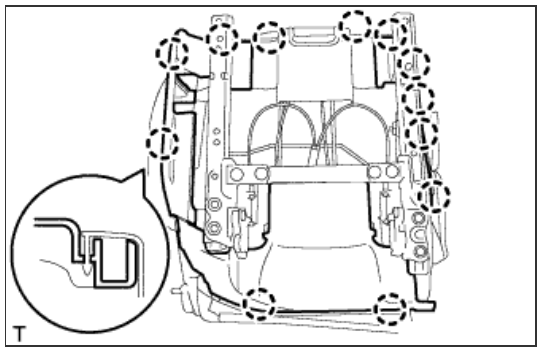
15. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH



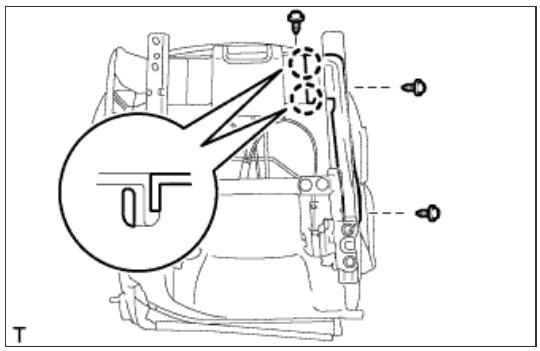
a. w/ Rear Seat Side Airbag:
Detach the wire harness clamp.

b. w/ Seat Heater System:
Detach the wire harness clamp.

c. Remove the 2 nuts and hinge.



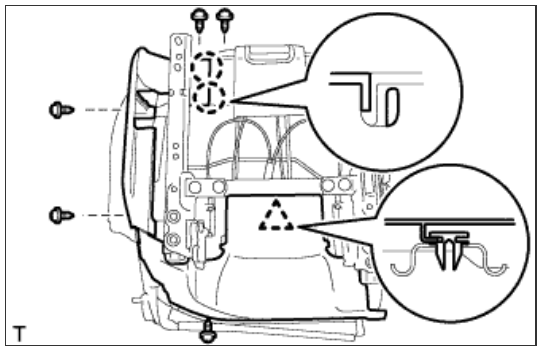
d. Detach the cable clamp and disconnect the cable.



16. REMOVE REAR SEAT COVER

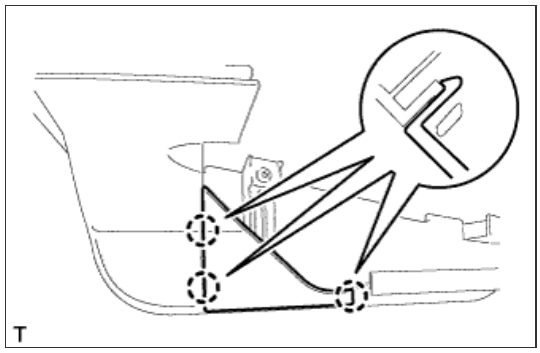
a. Detach the 12 claws.

b. Remove the screws.



c. Detach the 2 claws and remove the cover.

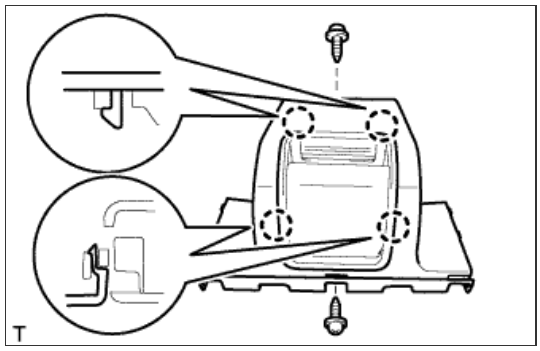
17. REMOVE REAR UNDER SIDE COVER LH



a. Remove the 5 screws.

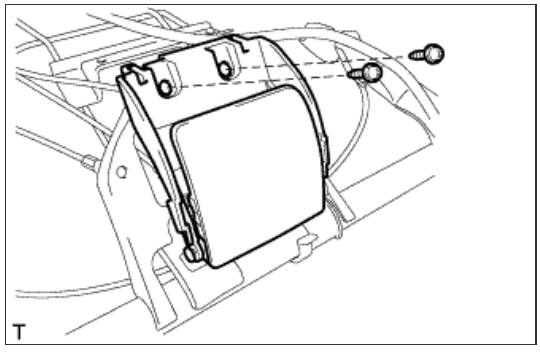
b. Detach the clip and 2 claws, and remove the cover.

18. REMOVE NO. 1 SEAT CUSHION PLATE



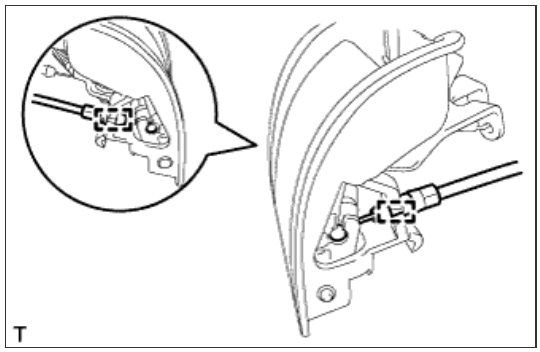
a. Detach the claws and remove the seat cushion plate.

19. REMOVE REAR SEAT UNDER TRAY COVER RH

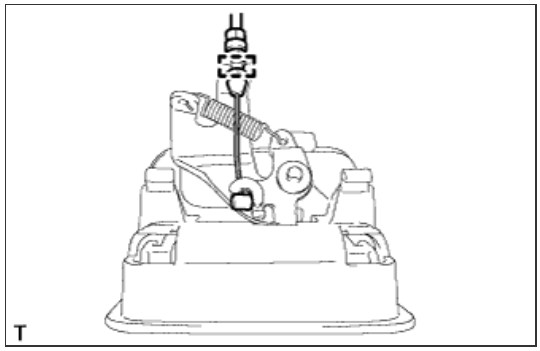


a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.



20. REMOVE REAR SEAT TRACK HANDLE SUB-ASSEMBLY



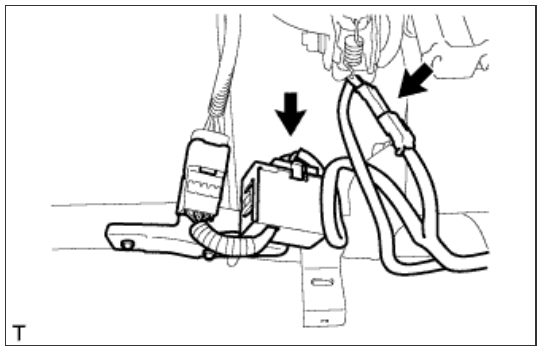
a. Remove the 2 screws and seat track handle.

b. Detach the 2 cable clamps and disconnect the 2 cables.

c. Detach the cable clamp and disconnect the cable.

21. REMOVE FOLD SEAT LOCK CONTROL CABLE SUB-ASSEMBLY

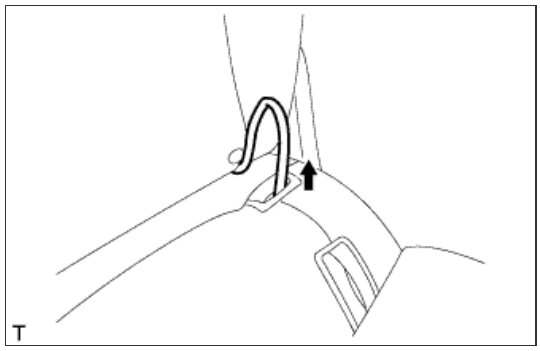
22. REMOVE SEAT CUSHION COVER WITH PAD



a. w/ Rear Seat Side Airbag:

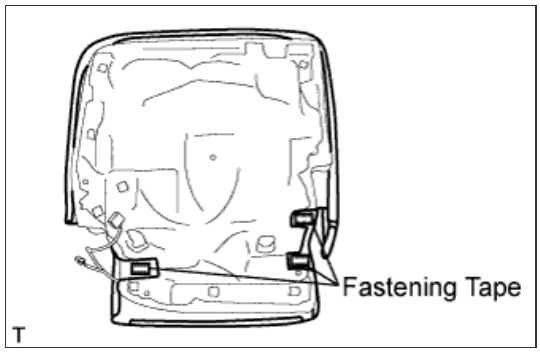
i. Detach the side airbag wire harness clamps.

ii. Remove the side airbag wire harness through the hole in the seat cushion.



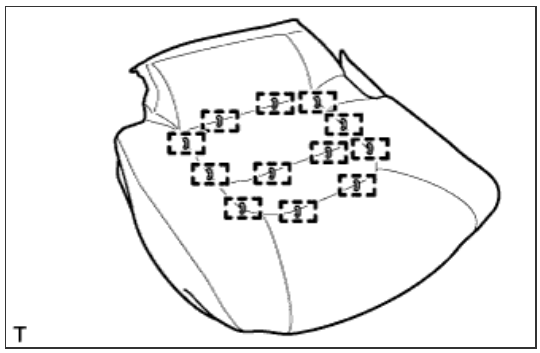
b. w/ Seat Heater System:

i. Disconnect the 2 seat heater connectors.



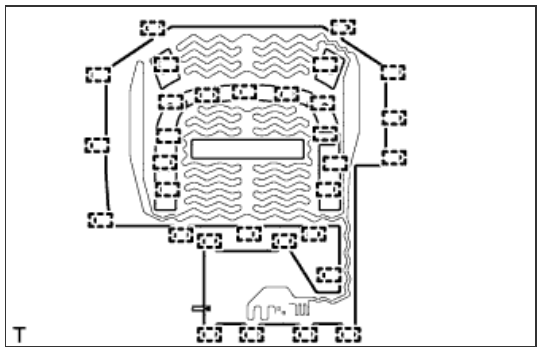
ii. Remove the seatback heater wire harness through the hole in the seat cushion.

c. Remove the seat cushion cover with pad.



23. REMOVE REAR SEPARATE TYPE SEAT CUSHION COVER

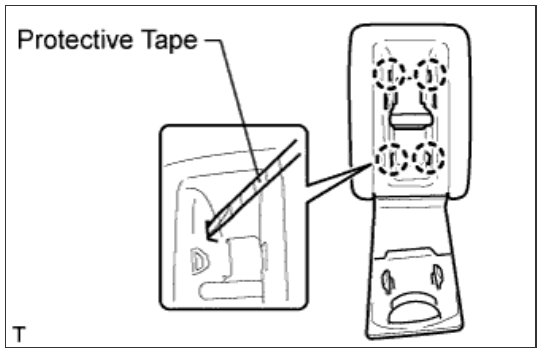
a. Detach the pieces of fastening tape.



b. Remove the hog rings and cover.

24. REMOVE REAR SEAT CUSHION HEATER ASSEMBLY (w/ Seat Heater System)

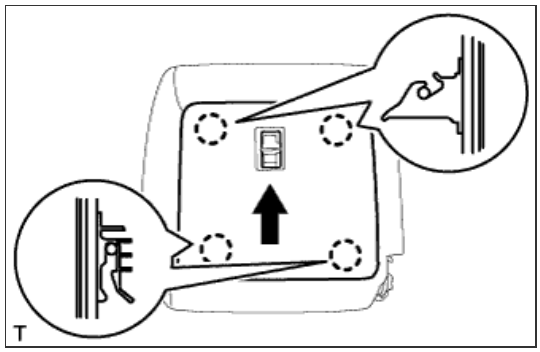
a. Cut off the tack pins which fasten the seat heater to the seat cushion cover, and then remove the seat cushion heater from the seat cushion cover.



25. REMOVE REAR SEATBACK COVER

a. Using a screwdriver, detach the 4 claws and remove the cover.

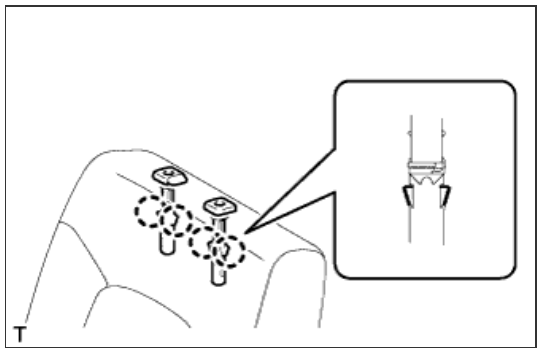
HINT:



Tape the screwdriver tip before use.

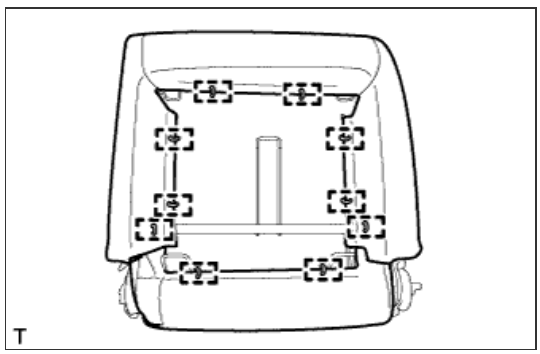
26. REMOVE REAR SEATBACK BOARD SUB-ASSEMBLY RH

a. Detach the 2 claws on the top of the board.



b. Pull up the board to detach the 2 claws on the bottom of the board and remove it.

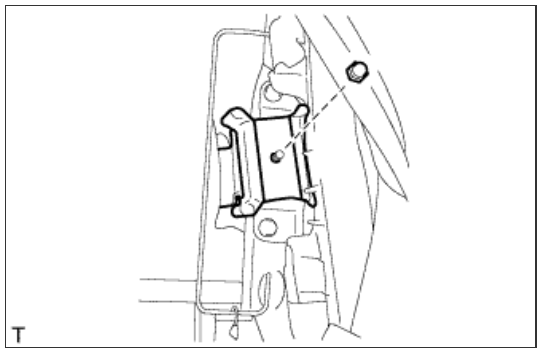
27. REMOVE REAR SEAT HEADREST ASSEMBLY



28. REMOVE REAR NO. 1 SEAT HEADREST SUPPORT ASSEMBLY

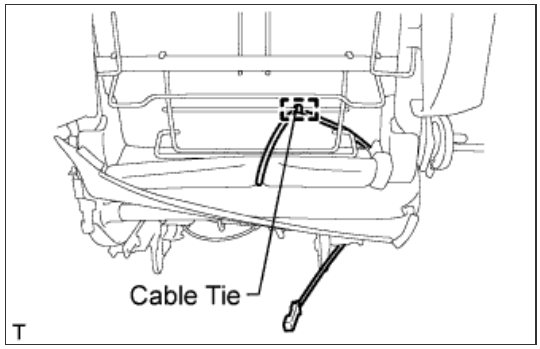
a. Detach the 4 claws and remove the 2 supports.

29. REMOVE SEATBACK COVER WITH PAD



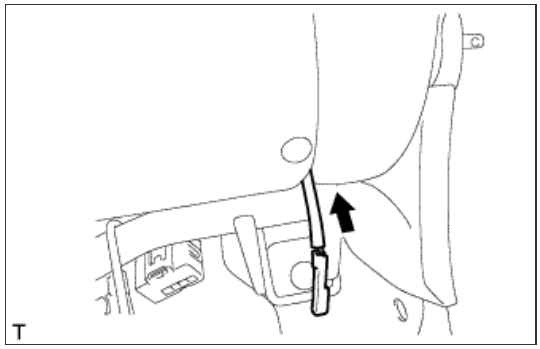
a. Remove the hog rings.

b. w/ Rear Seat Side Airbag:



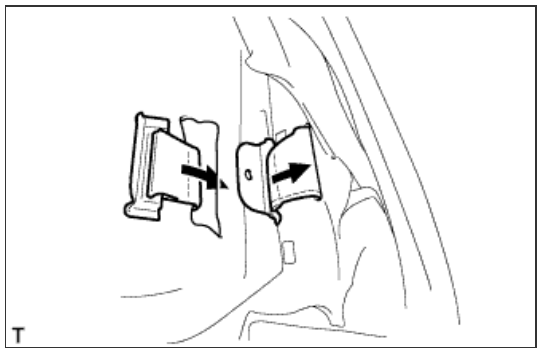
i. Remove the cap nut and seatback cover bracket from the seat frame.

ii. Remove the side airbag wire harness through the hole in the seatback.

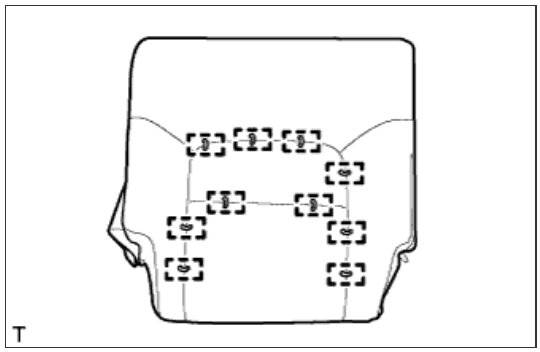


c. w/ Seat Heater System:

i. Cut the cable tie and disconnect the seatback heater wire harness.



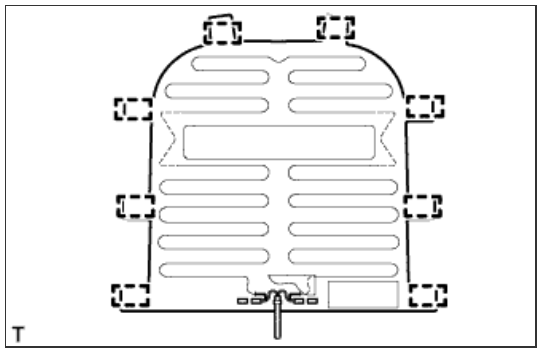
ii. Remove the seatback heater wire harness through the hole in the seatback.



d. Remove the seatback cover with pad.

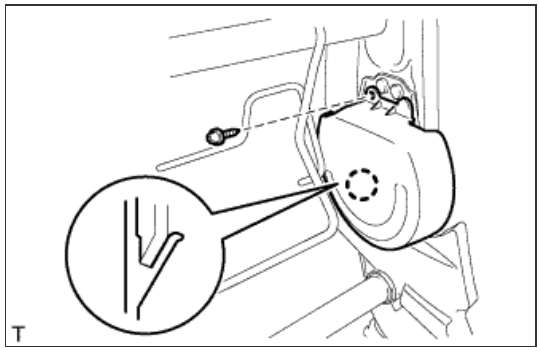
30. REMOVE REAR SEPARATE TYPE SEATBACK COVER

a. w/ Rear Seat Side Airbag:
Disconnect the seatback cover bracket from the seatback pad.



b. Remove the hog rings and rear seatback cover.

31. REMOVE REAR SEATBACK HEATER ASSEMBLY (w/ Seat Heater System)



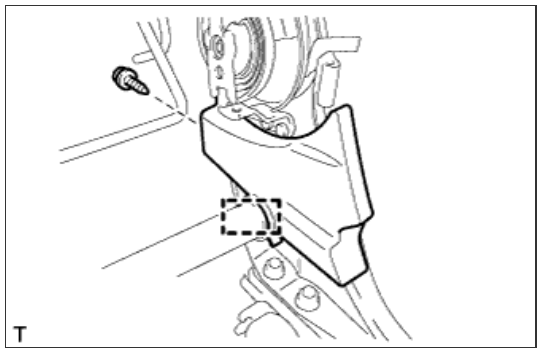
a. Cut off the tack pins which fasten the seatback heater to the seatback cover, and then remove the seatback heater from the seatback cover.

32. REMOVE REAR SEAT RECLINING COVER LH

a. Remove the screw.

b. Detach the claw and remove the cover.

33. REMOVE REAR SEAT RECLINING COVER RH

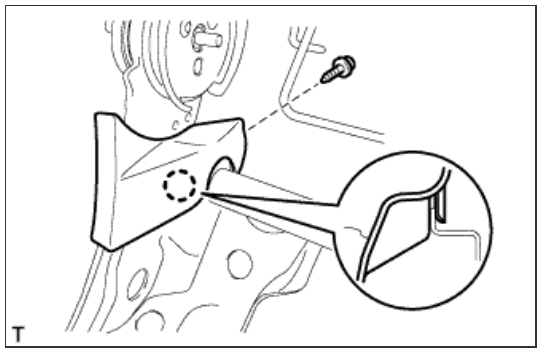


a. Remove the screw.

b. Detach the claw and remove the cover.

34. REMOVE REAR NO. 2 SEAT RECLINING COVER LH

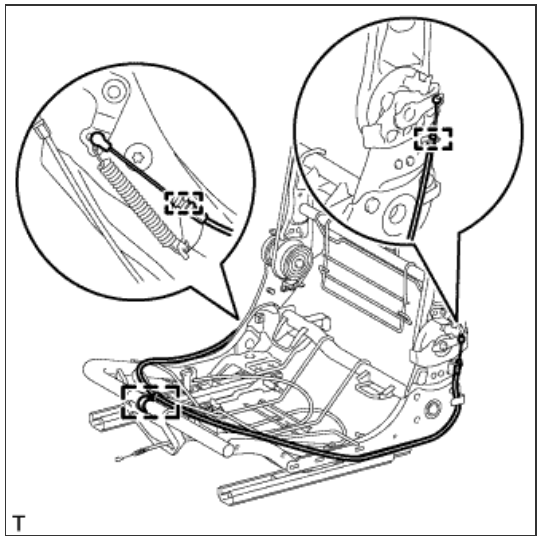
a. Remove the screw.



b. Detach the clamp and remove the cover.

35. REMOVE REAR NO. 1 SEAT RECLINING COVER RH

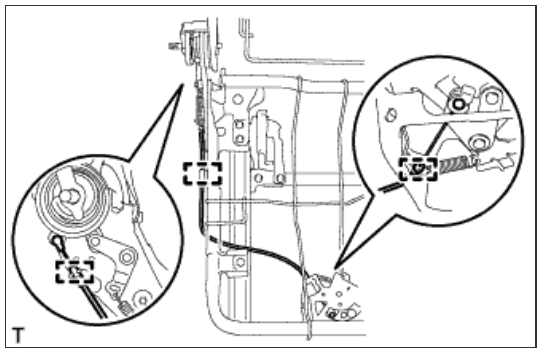
a. Remove the screw.



b. Detach the claw and remove the cover.

36. REMOVE RECLINING ADJUSTING CABLE ASSEMBLY RH

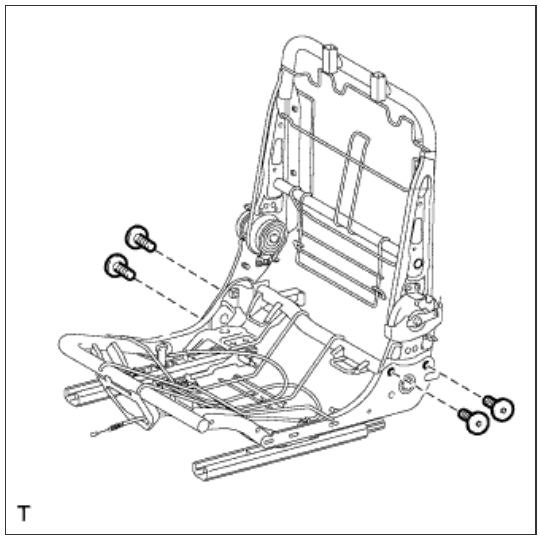
a. Detach the 2 cable clamps and disconnect the cable.



b. Detach the clamp and remove the adjusting cable.

37. REMOVE NO. 1 FOLD SEAT LOCK CONTROL CABLE ASSEMBLY

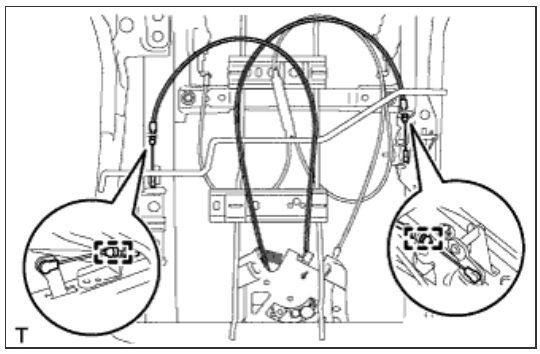
a. Detach the 2 cable clamps and disconnect the cable.



b. Detach the clamp and remove the lock control cable.

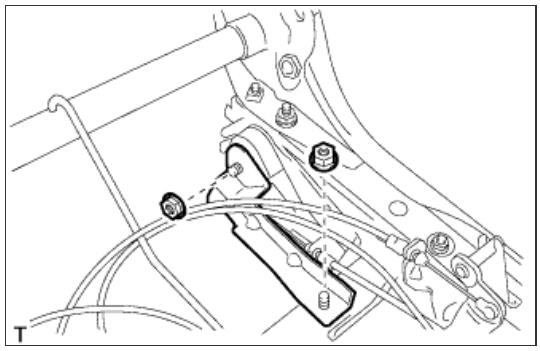
38. REMOVE REAR SEATBACK FRAME SUB-ASSEMBLY RH

a. Using a T40 "TORX" socket, remove the 4 bolts.



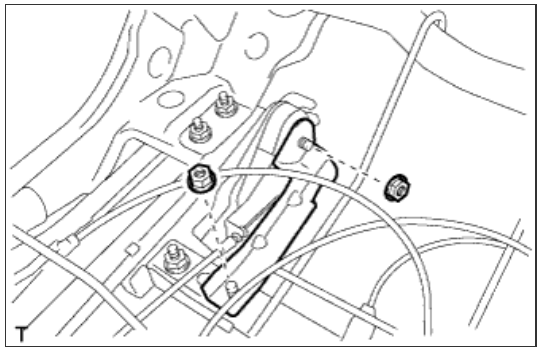
b. Remove the seatback frame.

39. REMOVE FOLD SEAT LOCK CONTROL CABLE SUB-ASSEMBLY



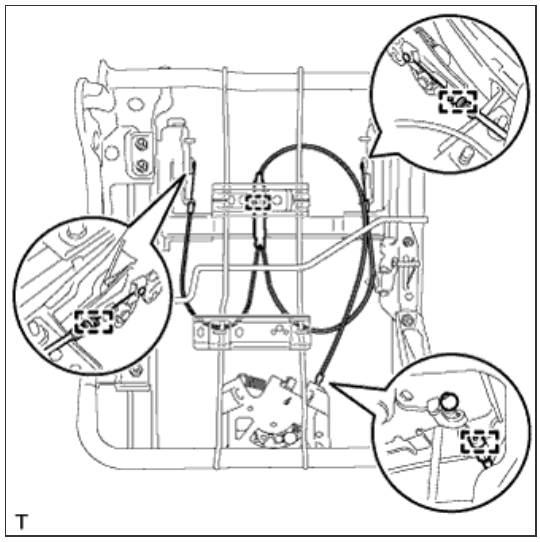
a. Detach the 2 cable clamps and disconnect the 2 cables.

b. Remove the 2 fold seat lock control cables.



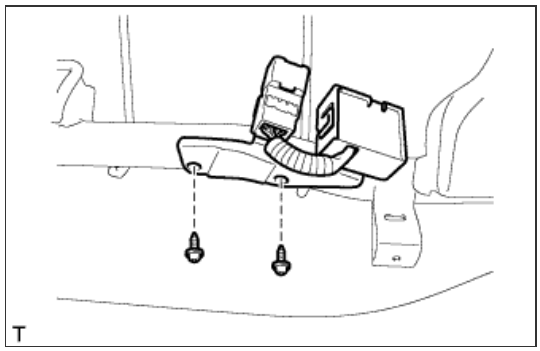
40. REMOVE REAR NO. 1 SEAT LOCK CABLE ASSEMBLY

a. Remove the 2 nuts and lower seat track bracket.



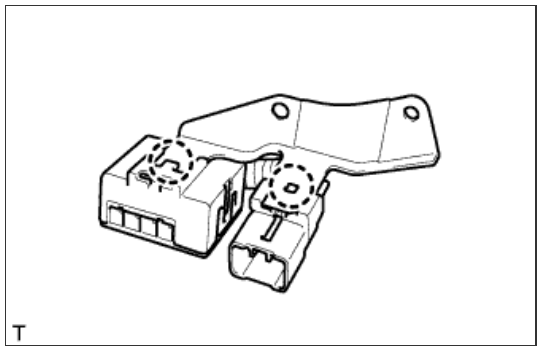
b. Remove the 2 nuts and lower seat track bracket.

c. Detach the cable clamps and disconnect the cables.



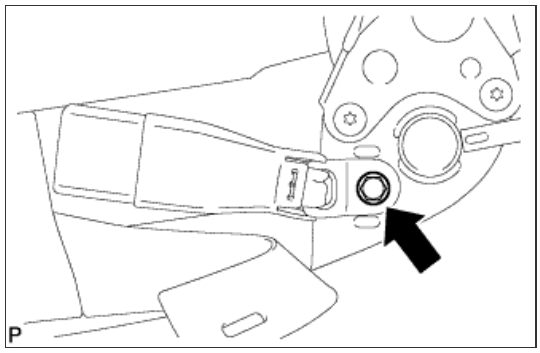
d. Detach the clamp and remove the seat lock cable.

41. REMOVE REAR SEAT CUSHION HOLDER BRACKET RH (w/ Seat Heater System)



a. Disconnect the seat wire connector.

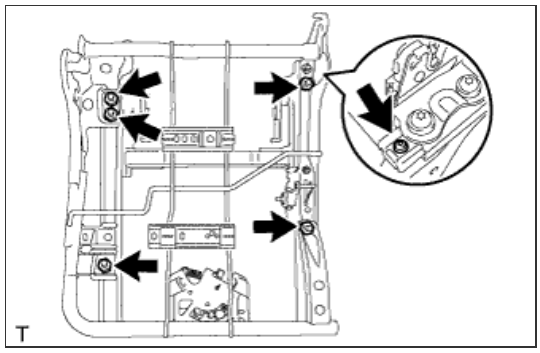
b. Remove the 2 screws and holder bracket.



42. REMOVE SEAT HEATER CONTROL SUB-ASSEMBLY RH (w/ Seat Heater System)

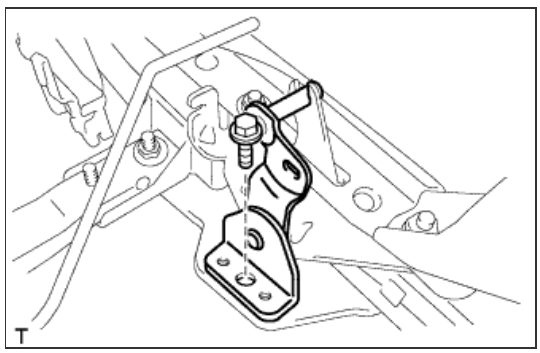
a. Detach the 2 claws and remove the seat heater control.

43. REMOVE REAR NO. 1 SEAT INNER BELT ASSEMBLY RH



a. Remove the bolt and belt.

44. REMOVE REAR SEAT CUSHION FRAME SUB-ASSEMBLY RH



a. Using a T40 "TORX" socket, remove the bolt.

b. Remove the 5 nuts and seat cushion frame.

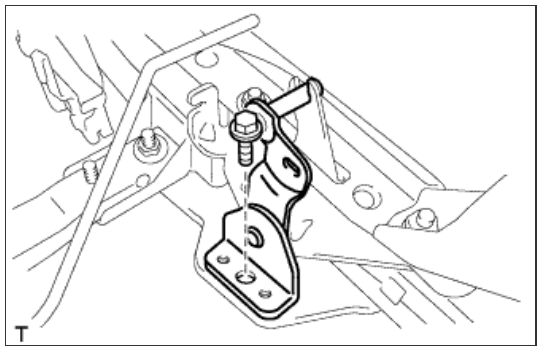
45. REMOVE REAR NO. 1 SEAT LOCK CONTROL LEVER

a. Remove the bolt and lock control lever.

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.



HINT:

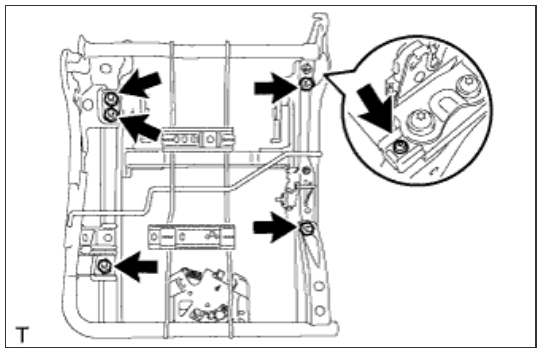
- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL REAR NO. 1 SEAT LOCK CONTROL LEVER

a. Install the lock control lever with the bolt.

Torque:
13 N*m{ 133 kgf*cm , 10 ft.*lbf }

2. INSTALL REAR SEAT CUSHION FRAME SUB-ASSEMBLY RH



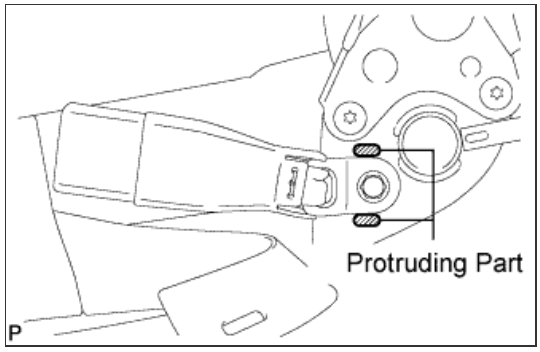
a. Temporarily install the seat cushion frame with the 5 nuts and bolt.

b. Tighten the 5 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

c. Using a T40 "T socket, tighten the bolt.

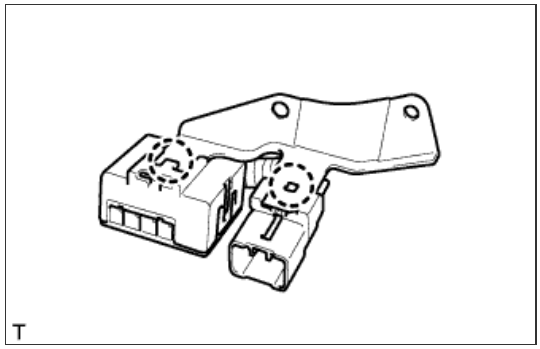
Torque:
21 N*m{ 214 kgf*cm , 15 ft.*lbf }



3. INSTALL REAR NO. 1 SEAT INNER BELT ASSEMBLY RH

a. Install the belt with the bolt.

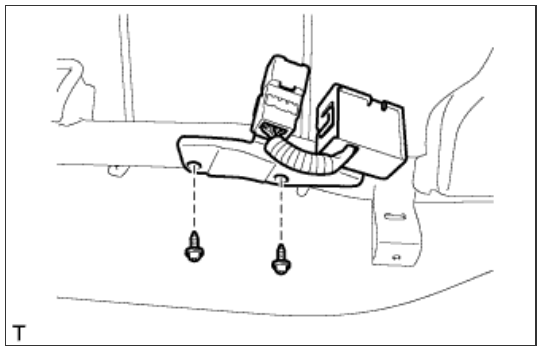
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }



NOTICE:

Do not overlap the anchor part of the seat belt and protruding parts of the seat.

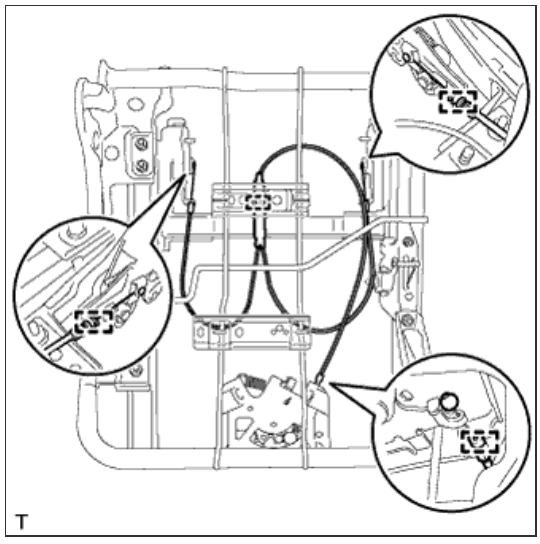
4. INSTALL SEAT HEATER CONTROL SUB-ASSEMBLY RH (w/ Seat Heater System)



a. Attach the 2 claws to install the seat heater control.

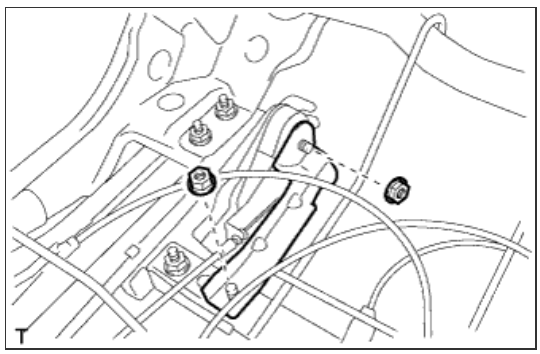
5. INSTALL REAR SEAT CUSHION HOLDER BRACKET RH (w/ Seat Heater System)

a. Install the holder bracket with the 2 screws.



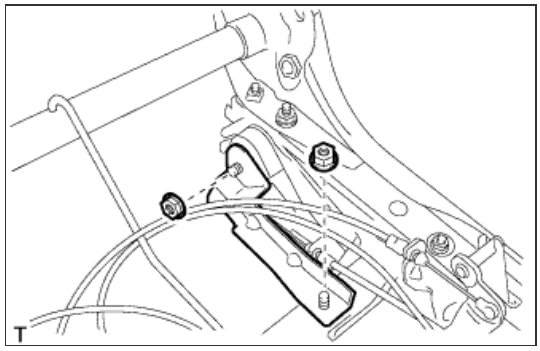
b. Connect the seat wire connector.

6. INSTALL REAR NO. 1 SEAT LOCK CABLE ASSEMBLY



a. Attach the clamp to install the seat lock cable.

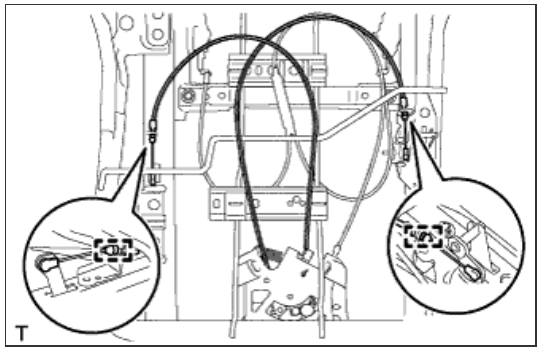
b. Attach the 3 cable clamps to connect the 3 cables.



c. Install the lower seat track bracket with the 2 nuts.

Torque:
21 N*m{ 214 kgf*cm , 15 ft.*lbf }

d. Install the lower seat track bracket with the 2 nuts.

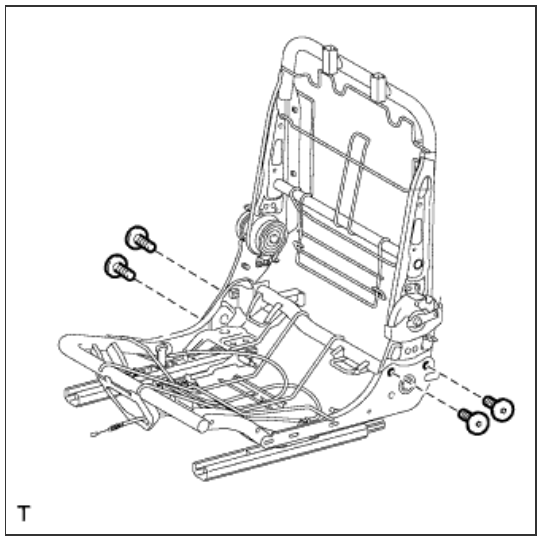


Torque:
21 N*m{ 214 kgf*cm , 15 ft.*lbf }

7. INSTALL FOLD SEAT LOCK CONTROL CABLE SUB-ASSEMBLY

a. Install the 2 fold seat lock control cables.

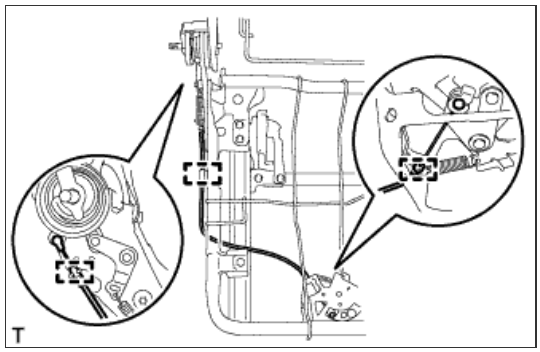
b. Attach the 2 cable clamps to connect the 2 cables.



8. INSTALL REAR SEATBACK FRAME SUB-ASSEMBLY RH

a. Temporarily install the seatback frame with the 4 bolts.

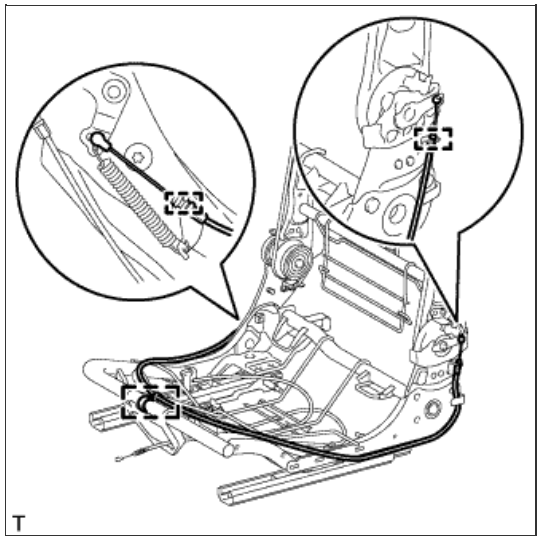
b. Using a T40 "T socket, tighten the 4 bolts.



Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

9. INSTALL NO. 1 FOLD SEAT LOCK CONTROL CABLE ASSEMBLY

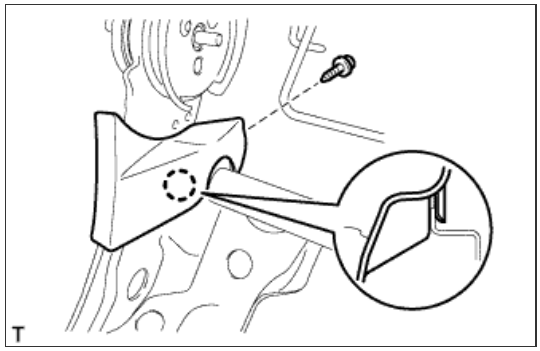
a. Attach the clamp to install the lock control cable.



b. Attach the 2 cable clamps to connect the cable.

10. INSTALL RECLINING ADJUSTING CABLE ASSEMBLY RH

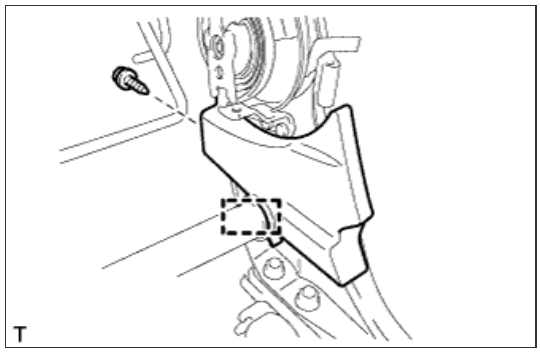
a. Attach the clamp to install the adjusting cable.



b. Attach the 2 cable clamps to connect the cable.

11. INSTALL REAR NO. 1 SEAT RECLINING COVER RH

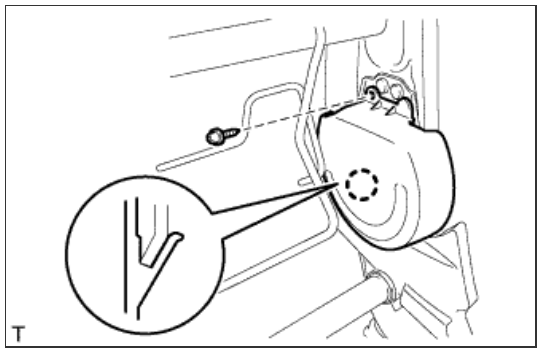
a. Attach the claw to install the cover.



b. Install the screw.

12. INSTALL REAR NO. 2 SEAT RECLINING COVER LH

a. Attach the clamp to install the cover.



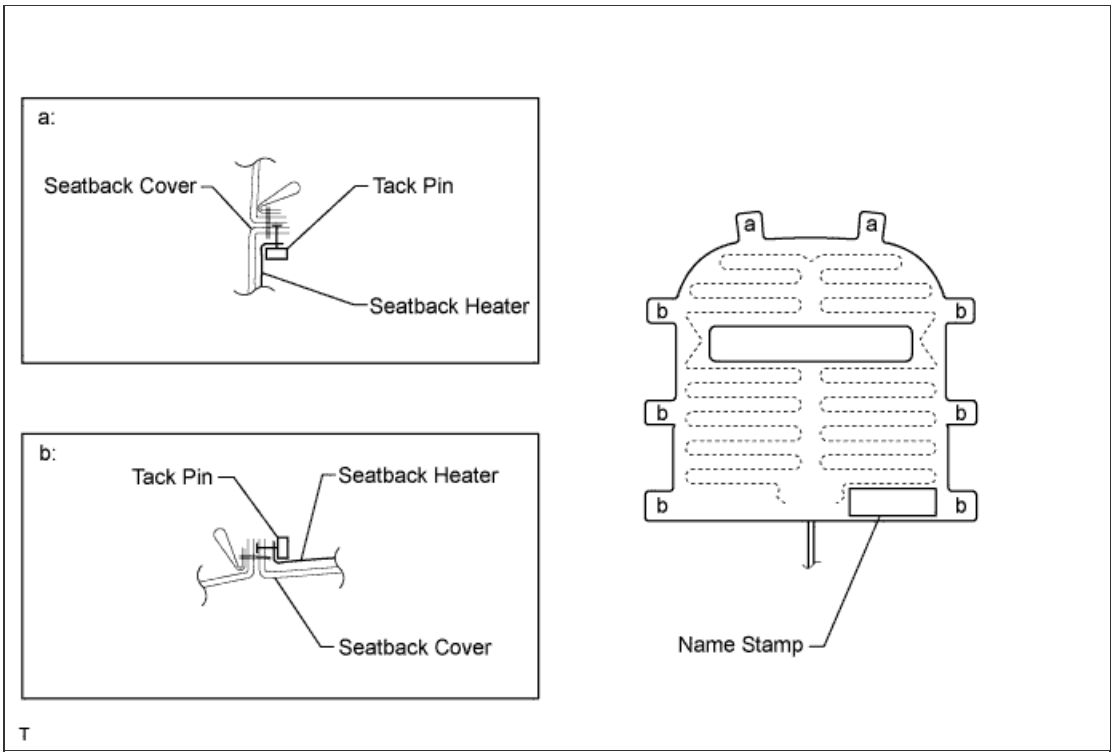
b. Install the screw.

13. INSTALL REAR SEAT RECLINING COVER RH

a. Attach the claw to install the cover.

b. Install the screw.

14. INSTALL REAR SEAT RECLINING COVER LH



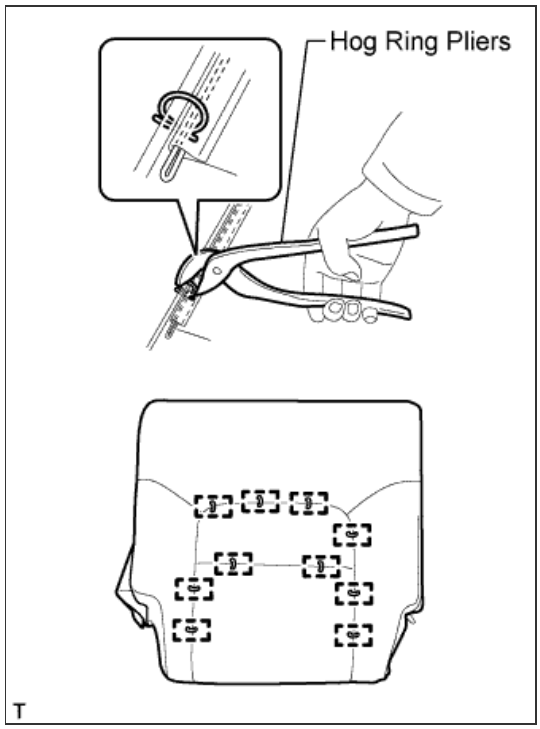
a. Attach the claw to install the cover.

b. Install the screw.

15. INSTALL REAR SEATBACK HEATER ASSEMBLY (w/ Seat Heater System)

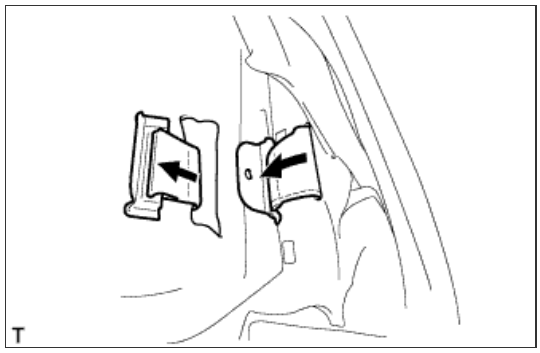
a. Set the seatback heater with the name stamp side facing the seatback cover.

b. Install the seatback heater with new tack pins.



16. INSTALL REAR SEPARATE TYPE SEATBACK COVER

a. Using hog ring pliers, install the seatback cover with new hog rings.

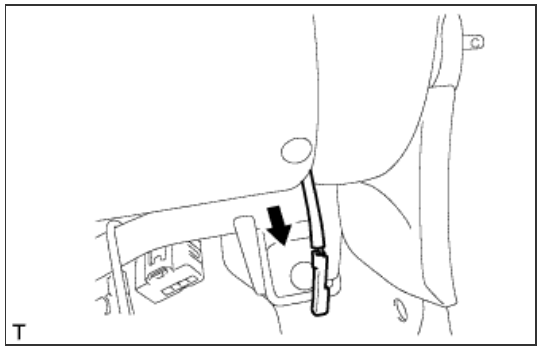


NOTICE:

- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**

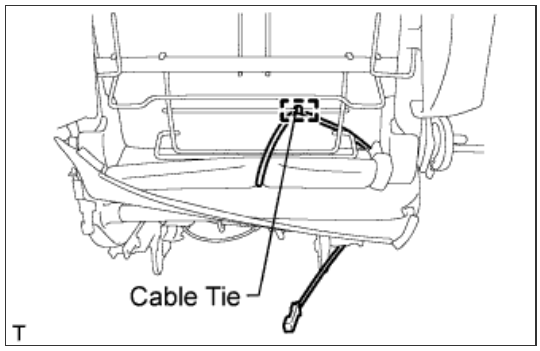
b. w/ ear Seat Side Airbag

onnect the seatback cover bracket to the seatback pad.



17. INSTALL SEATBACK COVER WITH PAD

a. Install the seatback cover with pad.

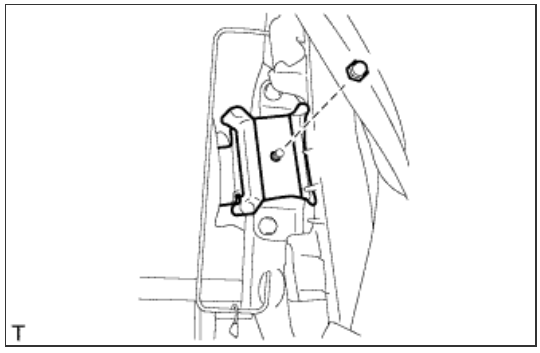


b. w/ ear Seat Side Airbag
as the side airbag wire harness through the hole in the seatback.

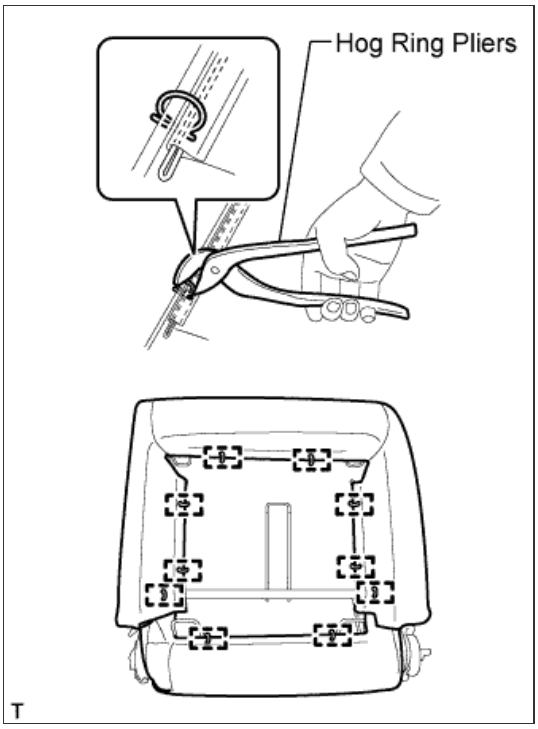
c. w/ Seat Heater System

i. as the seatback heater wire harness through the hole in the seatback.

ii. Connect the seatback heater wire harness and install a new cable tie.



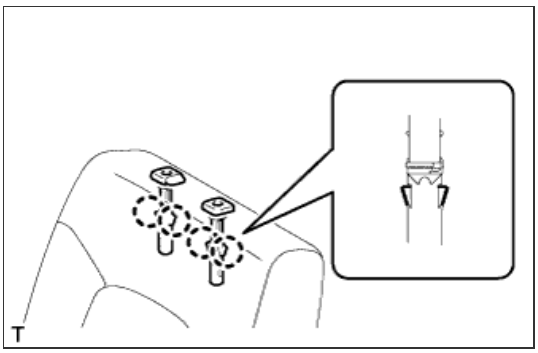
d. w/ ear Seat Side Airbag
Install the seatback cover bracket to the seat frame with the cap nut.



Torque:
5.5 N*m{ 56 kgf*cm , 49 in.*lbf }

CAUTION:

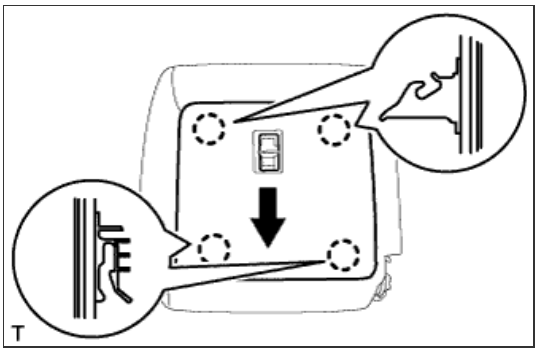
After the seatback trim cover is assembled, make sure the side airbag strap is not twisted.



e. Using hog ring pliers, install new hog rings to the seatback frame.

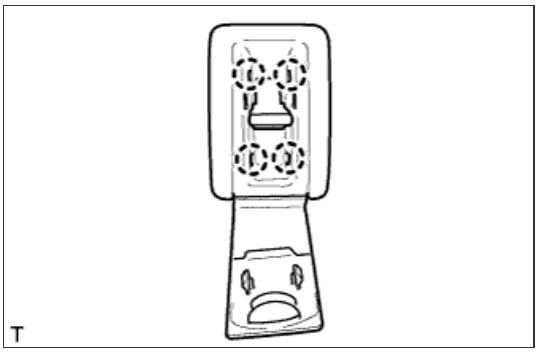
18. INSTALL REAR NO. 1 SEAT HEADREST SUPPORT ASSEMBLY

a. Attach the 4 claws to install the 2 supports.



19. INSTALL REAR SEAT HEADREST ASSEMBLY

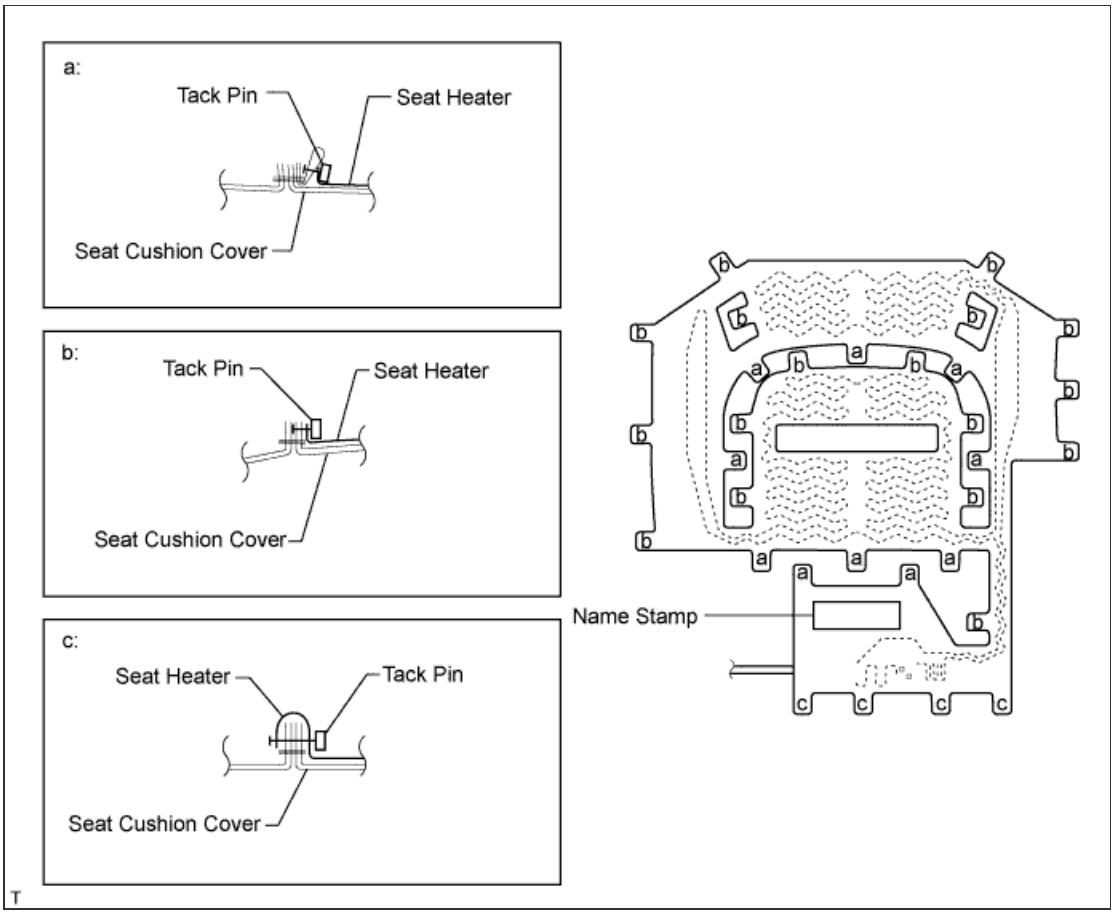
20. INSTALL REAR SEATBACK BOARD SUB-ASSEMBLY RH



a. Push the board down to attach the 2 claws on the bottom.

b. Attach the 2 claws on the top of the board to install it.

21. INSTALL REAR SEATBACK COVER

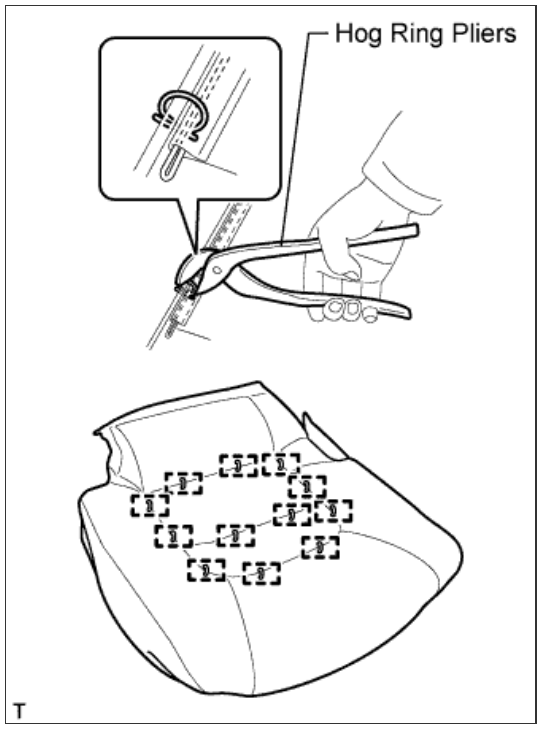


a. Attach the 4 claws to install the cover.

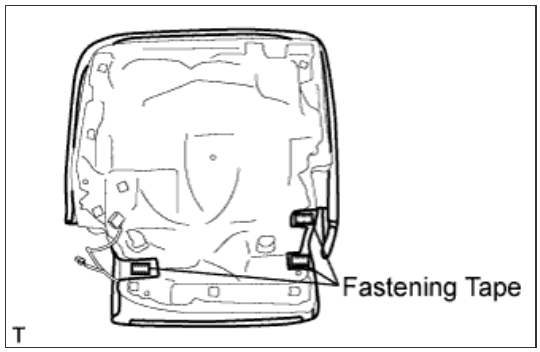
22. INSTALL REAR SEAT CUSHION HEATER ASSEMBLY (w/ Seat Heater System)

a. Set the seat cushion heater with the name stamp side facing the seat cushion cover.

b. Install the seat cushion heater with new tack pins.



23. INSTALL REAR SEPARATE TYPE SEAT CUSHION COVER

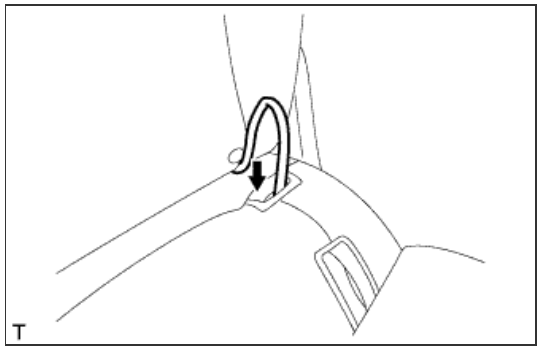


a. Using hog ring pliers, install the seat cushion cover to the seat cushion pad with new hog rings.

NOTICE:

- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**

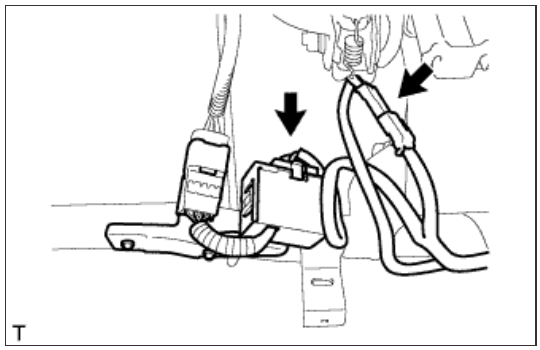
b. Attach the 3 pieces of fastening tape.



24. INSTALL SEAT CUSHION COVER WITH PAD

a. Install the seat cushion cover with pad.

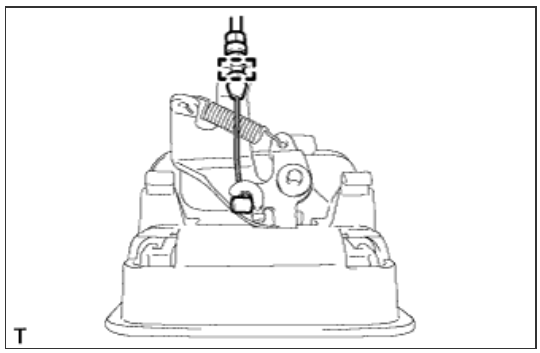
b. w/ ear Seat Side Airbag
as the side airbag wire harness through the hole in the seat cushion.



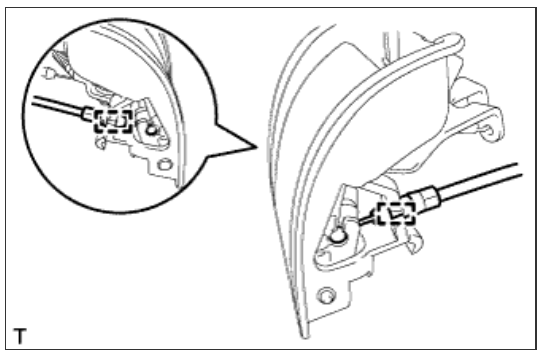
c. w/ Seat Heater System

i. as the seatback heater wire harness through the hole in the seat cushion.

ii. Connect the 2 seat heater connectors.

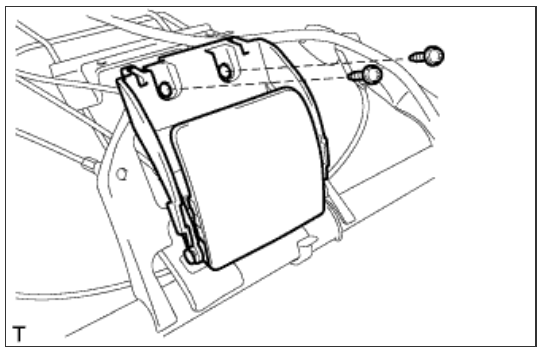


d. w/ ear Seat Side Airbag
ttah the side airbag wire harness clamps.



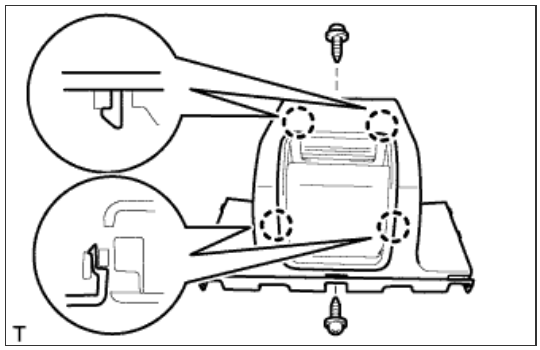
25. INSTALL FOLD SEAT LOCK CONTROL CABLE SUB-ASSEMBLY

26. INSTALL REAR SEAT TRACK HANDLE SUB-ASSEMBLY



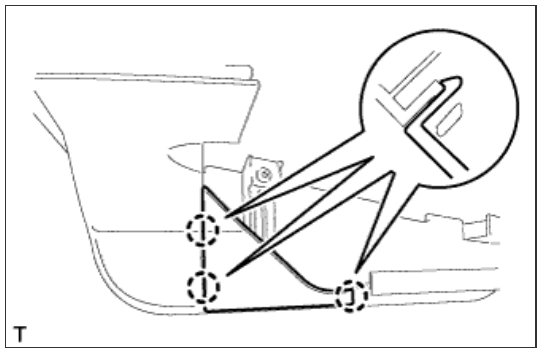
a. Attach the cable clamp to connect the cable.

b. Attach the 2 cable clamps to connect the 2 cables.



c. Install the seat track handle with the 2 screws.

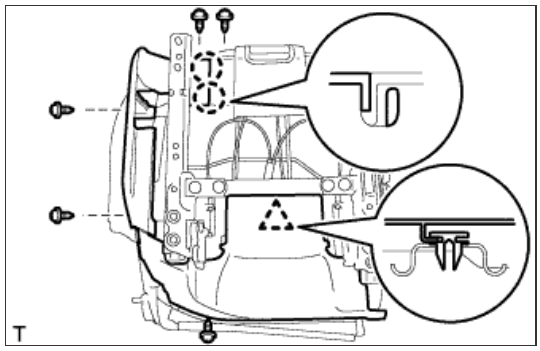
27. INSTALL REAR SEAT UNDER TRAY COVER RH



a. Attach the 4 claws to install the cover.

b. Install the 2 screws.

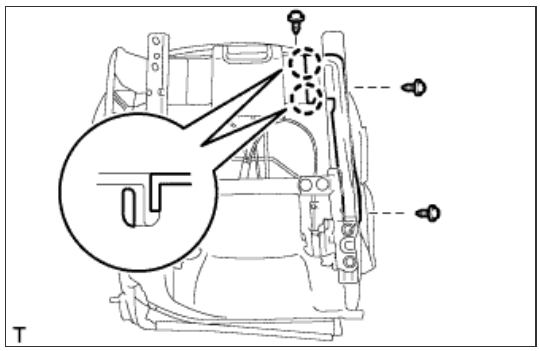
28. INSTALL NO. 1 SEAT CUSHION PLATE



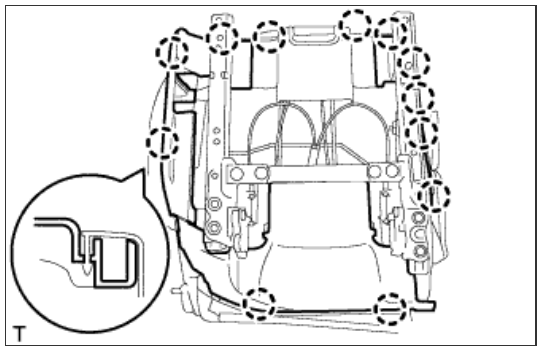
a. Attach the 3 claws to install the seat cushion plate.

29. INSTALL REAR UNDER SIDE COVER LH

a. Attach the 2 claws and clip to install the cover.



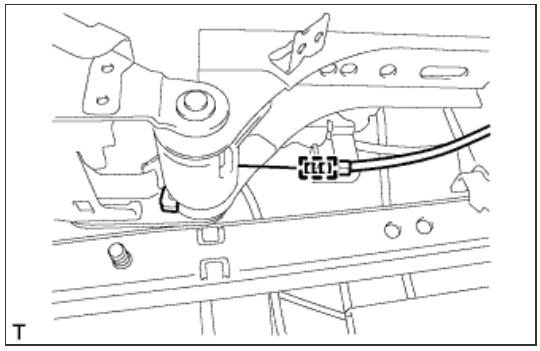
b. Install the 5 screws.



30. INSTALL REAR SEAT COVER

a. Attach the 2 claws to install the cover.

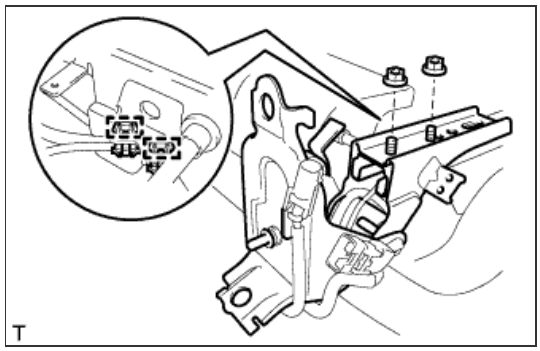
b. Install the 3 screws.



c. Attach the 12 claws.

31. INSTALL REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH

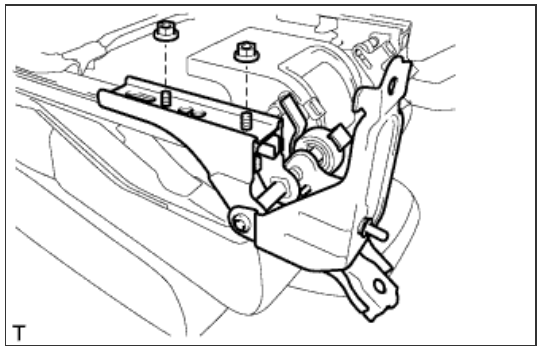
a. Attach the cable clamp to connect the cable.



b. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

c. w/ Rear Seat Side Airbag:
Attach the wire harness clamp.

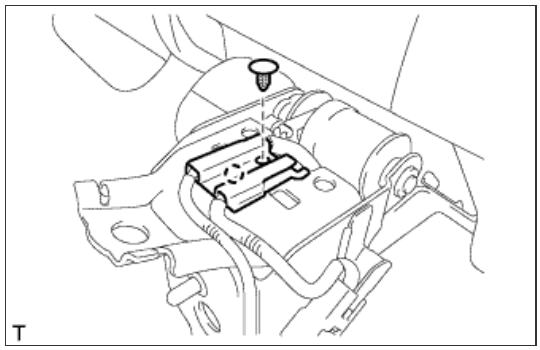


d. w/ Seat Heater System:
Attach the wire harness clamp.

32. INSTALL REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH

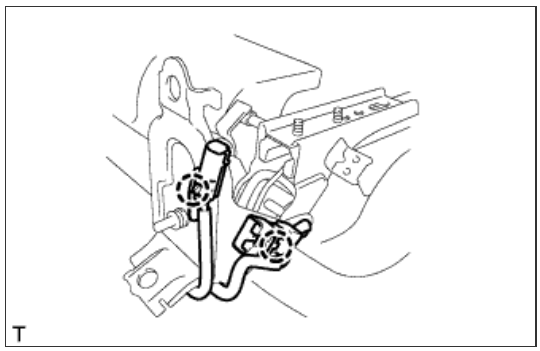
a. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }



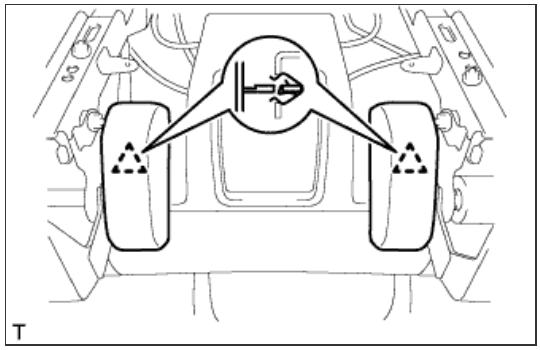
33. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Install the wire harness, and attach the 2 claws to close the protector.



b. Attach the claw to install the protector to the seat hinge.

c. Install the clip.

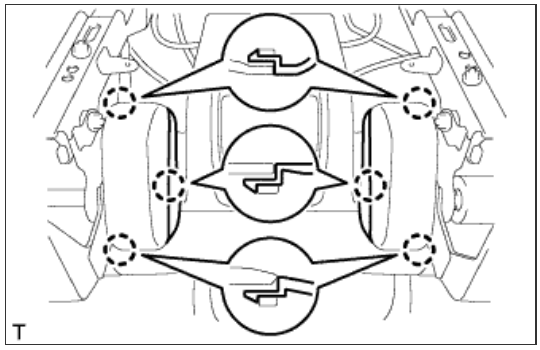


d. w/ Rear Seat Side Airbag:
Attach the claw to install the wire harness connector.

e. w/ Seat Heater System:
Attach the claw to install the wire harness connector.

34. INSTALL REAR SEAT SIDE HINGE MALE COVER RH

a. Attach the clip to install the cover.

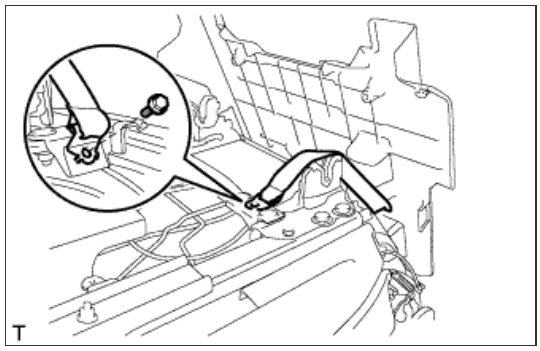


35. INSTALL REAR SEAT SIDE HINGE MALE COVER LH

a. Attach the clip to install the cover.

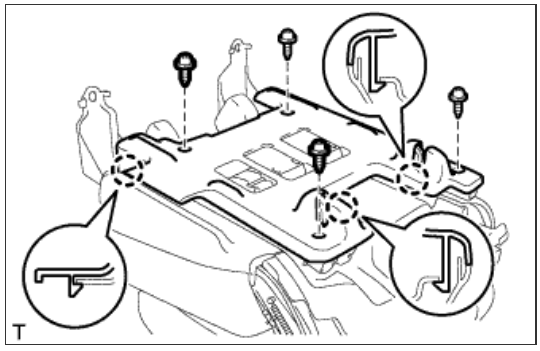
36. INSTALL REAR SEAT SIDE HINGE FEMALE COVER

a. Attach the 6 claws to install the 2 covers.



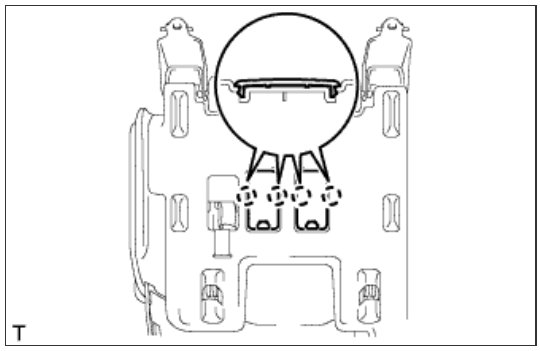
37. INSTALL FOLD SEAT STOPPER BAND ASSEMBLY

a. Install the fold seat stopper band to the seat leg side cover.



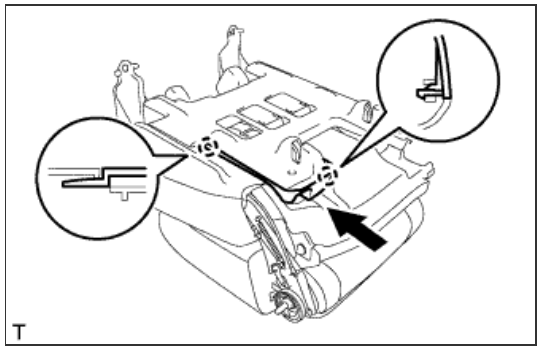
38. INSTALL REAR NO. 2 SEAT LEG SIDE COVER

a. Pass the fold seat stopper band through the seat leg side cover and attach it to the seat cushion frame with the bolt.



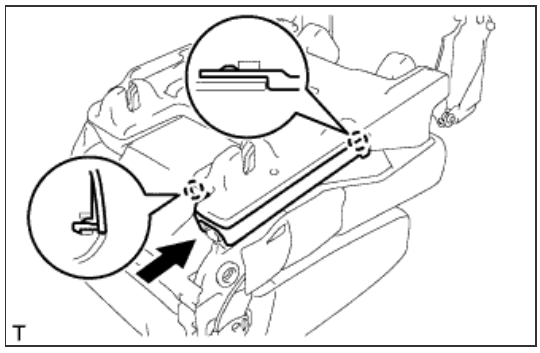
b. Attach the 3 claws to install the seat leg side cover.

c. Install the 4 screws.



39. INSTALL NO. 1 SEAT CUSHION COVER

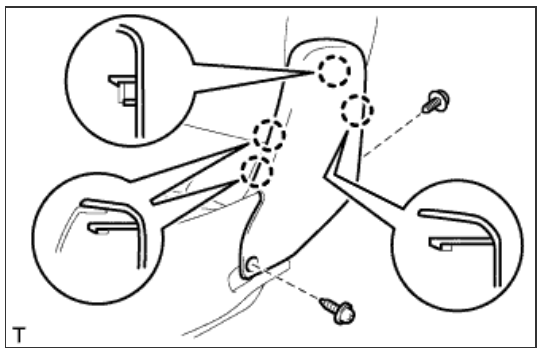
a. Attach the 4 claws to install the 2 covers.



40. INSTALL UPPER SEAT TRACK RAIL COVER RH

a. Attach the 2 claws to install the cover.

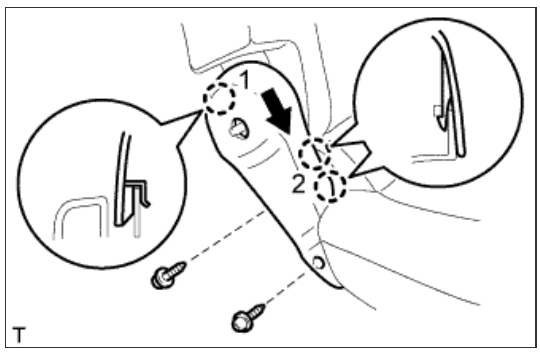
41. INSTALL UPPER SEAT TRACK RAIL COVER LH



a. Attach the 2 claws to install the cover.

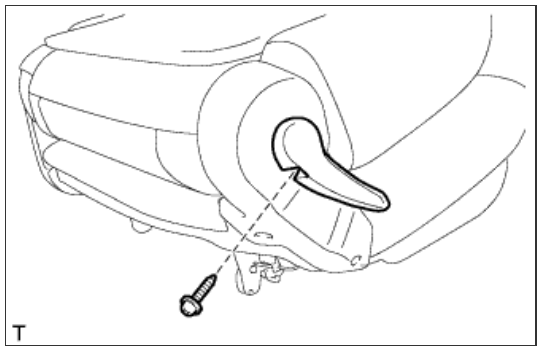
42. INSTALL REAR NO. 1 SEAT RECLINING COVER LH

a. Attach the 4 claws to install the cover.



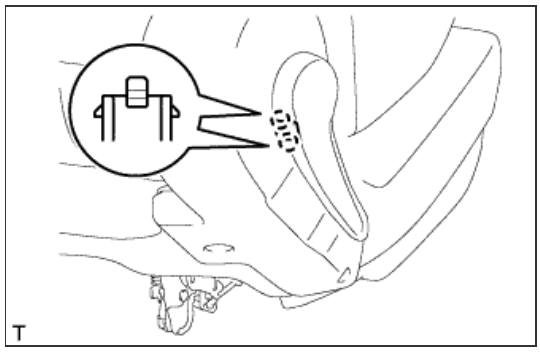
b. Install the 2 screws.

43. INSTALL REAR NO. 1 SEAT RECLINING COVER RH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

b. Install the 2 screws.



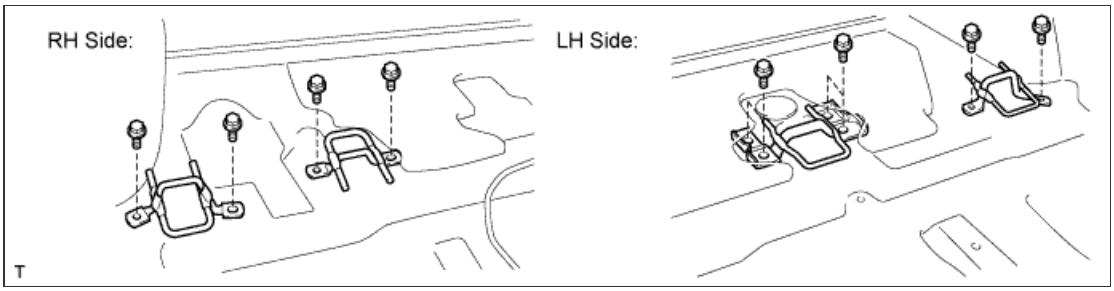
44. INSTALL RECLINING ADJUSTER RELEASE HANDLE RH

a. Install the release handle with the screw.

45. INSTALL SEAT ADJUSTER BOLT COVER

a. Attach the 2 claws to install the cover.

for Preparation Click here

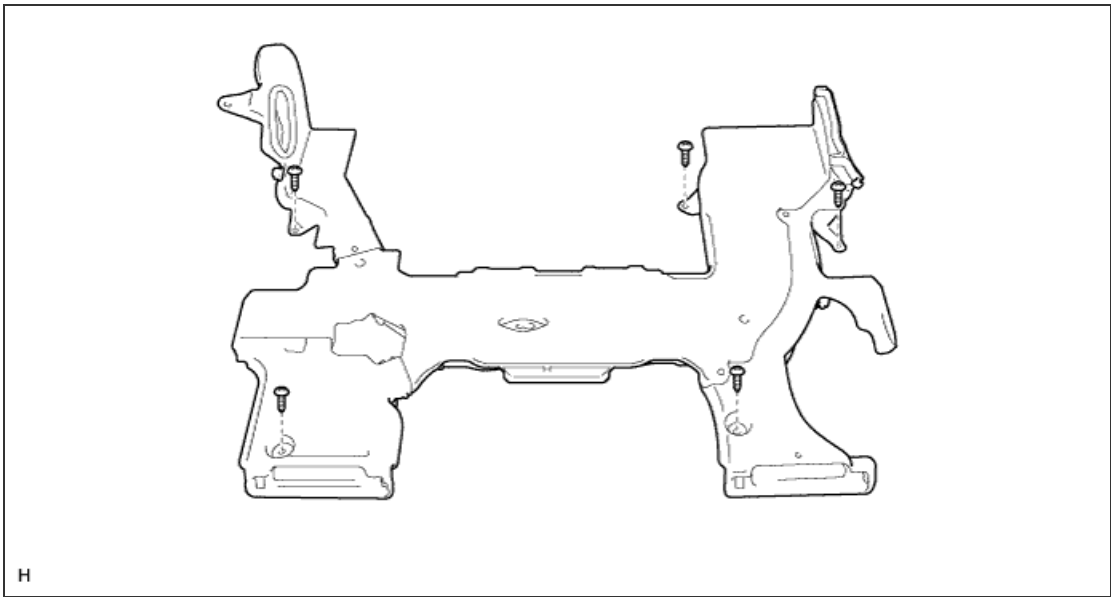


HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL REAR SEAT CUSHION LOCK STRIKER SUB-ASSEMBLY

a. Install the 4 strikers with the 10 bolts.



Torque:
37 N*m{ 377 kgf*cm , 27 ft.*lbf }

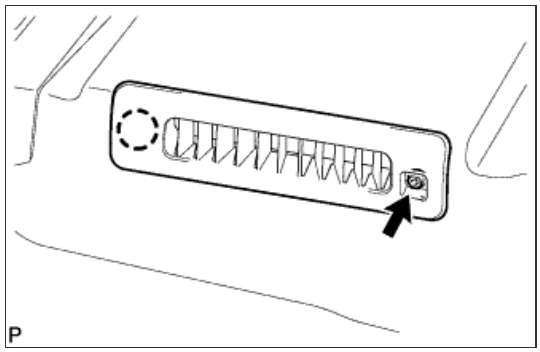
2. INSTALL REAR NO. 6 AIR DUCT (w/ Rear Air Conditioning System)

a. Install the duct with the 5 screws.

b. Connect the 2 connectors.

3. INSTALL RONT LOOR CARPET ASSEMBLY

a. Install the floor carpet.



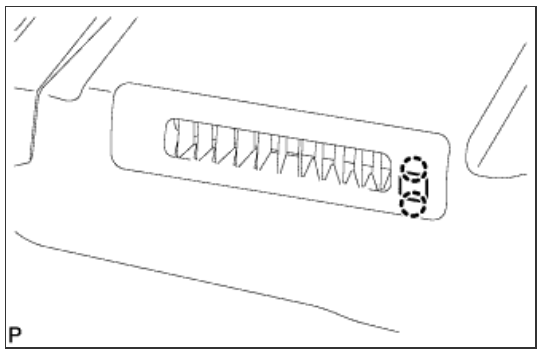
4. INSTALL REAR AIR DUCT UIDE (w/ Rear Air Conditioning System)

a. Attach the claw to install the guide.

b. Install the screw.

HINT:

Use the same procedures for both sides.



5. INSTALL AIR DUCT PLU (w/ Rear Air Conditioning System)

a. Attach the 2 claws to install the plug.

HINT:

Use the same procedures for both sides.

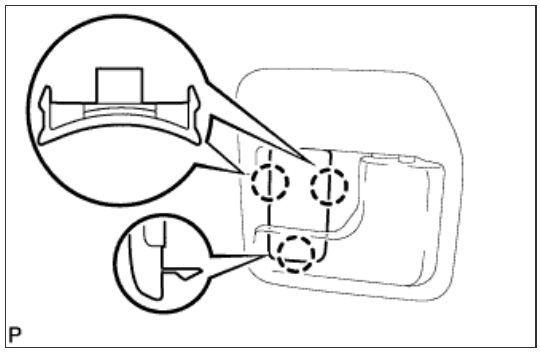
6. INSTALL RONT QUARTER TRIM PANEL ASSEMBLY LH

a. w/ Sliding Roof:
Install the front quarter trim panel assembly LH (Click here).

b. w/o Sliding Roof:
Install the front quarter trim panel assembly LH (Click here).

7. INSTALL RONT QUARTER TRIM PANEL ASSEMBLY RH

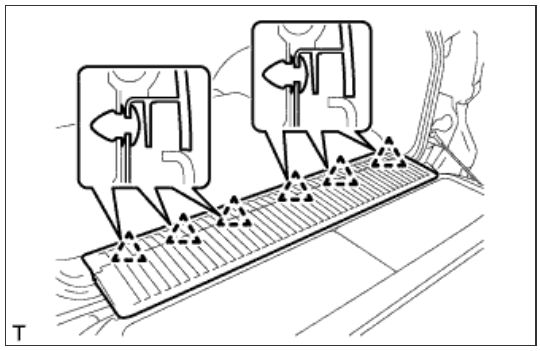
a. w/ Sliding Roof:
Install the front quarter trim panel assembly RH (Click here).



b. w/o Sliding Roof:
Install the front quarter trim panel assembly RH (Click here).

8. INSTALL REAR SEAT CO ER CAP (w/ Rear No. 2 Seat, except ae to ae Seat Type)

HINT:



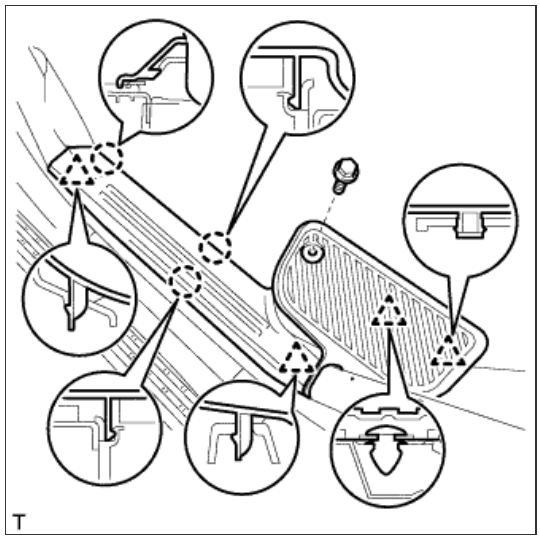
Use the same procedure to install the rear seat cover cap on the other side.

a. Attach the 3 claws to install the rear seat cover cap.

9. INSTALL REAR LOOR MAT REAR SUPPORT PLATE

a. Attach the clips to install the support plate.

10. INSTALL REAR NO. 2 SEAT ASSEMBLY



a. for Face to Face Seat Type:
Install the rear o. 2 seat assembly (Click here).

b. e cept Face to Face Seat Type:
Install the rear o. 2 seat assembly (Click here).

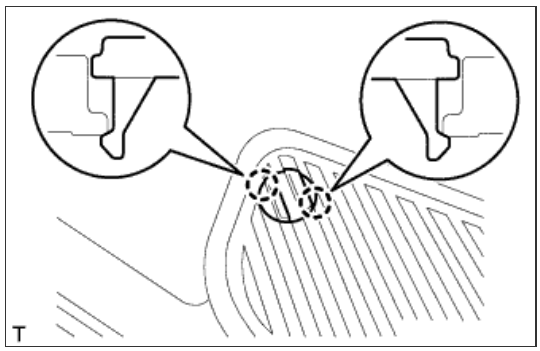
11. INSTALL REAR DOOR SCU PLATE LH

a. Attach the 3 claws and 4 clips to install the scuff plate.

b. Install the screw.

12. INSTALL REAR DOOR SCU PLATE RH

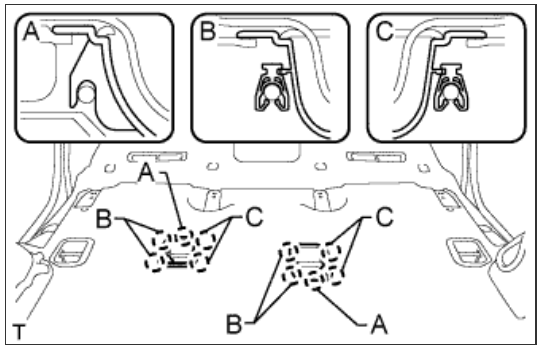
HINT:



Use the same procedures described for the LH side.

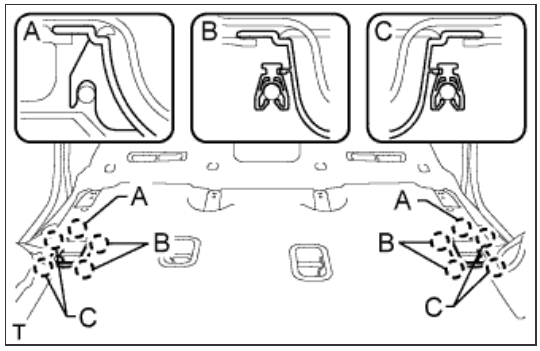
13. INSTALL REAR STEP CO ER

HINT:



Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.



14. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Attach the 10 claws to install the 2 seat protectors.

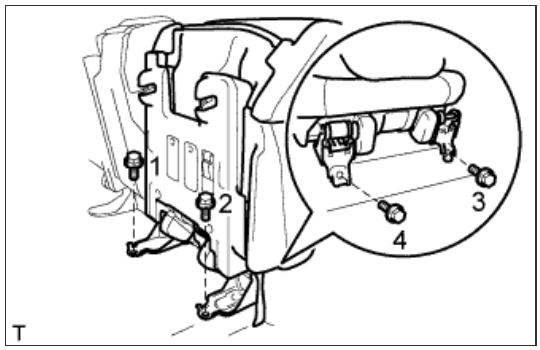
15. INSTALL REAR NO. 1 SEAT PROTECTOR

a. Attach the 10 claws to install the 2 seat protectors.

16. INSTALL REAR NO. 1 SEAT ASSEMBLY LH

a. Install the rear No. 1 seat assembly LH (Click here).

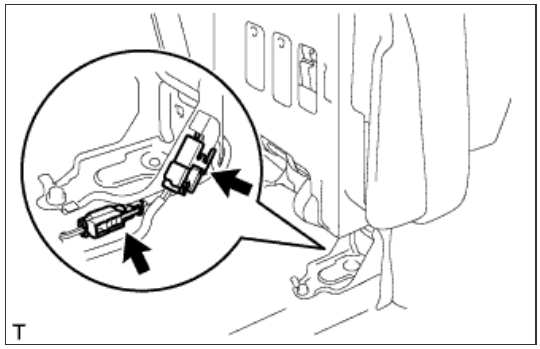
17. INSTALL REAR NO. 1 SEAT ASSEMBLY RH



a. Temporarily install the seat assembly with the 4 bolts.

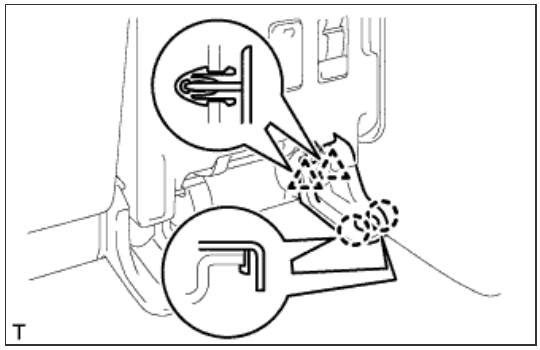
NOTICE:

Be careful not to damage the vehicle body.



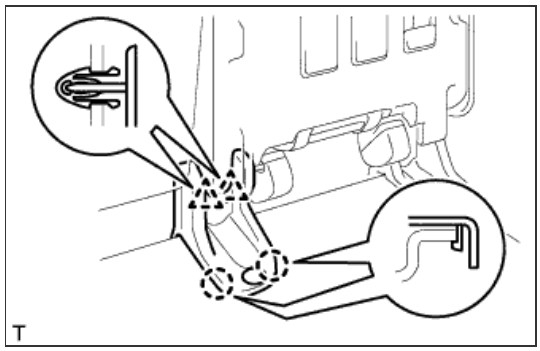
b. Tighten the bolts in the order shown in the illustration.

Torque:
37 N*m{ 377 kgf*cm , 27 ft.*lbf }



c. w/ Rear Seat Side Airbag:
Connect the connector.

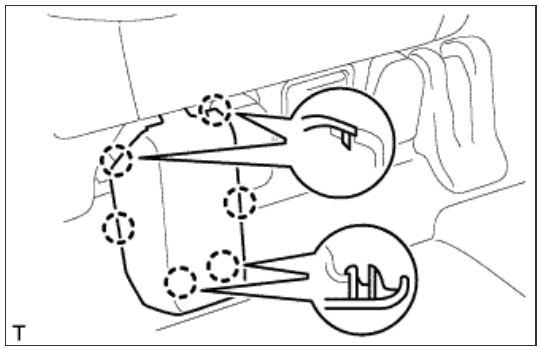
d. w/ Seat Heater System:
Connect the connector.



18. INSTALL REAR NO. 3 SEAT CUSHION HIN E CO ER

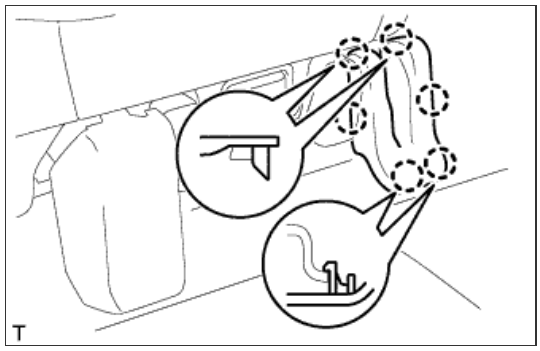
a. Attach the 2 clips and 2 claws to install the cover.

19. INSTALL REAR NO. 1 SEAT CUSHION HIN E CO ER



a. Attach the 2 clips and 2 claws to install the cover.

20. INSTALL REAR NO. 4 SEAT CUSHION HIN E CO ER



a. Return the seat to the upright position.

b. Attach the claws to install the cover.

21. INSTALL REAR NO. 2 SEAT CUSHION HINGE COVER

a. Attach the claws to install the cover.

22. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

23. CHECK SRS WARNING LIGHT

a. Check the SRS warning light (Click here).

24. INSPECT REAR NO. 1 SEAT ASSEMBLY RH

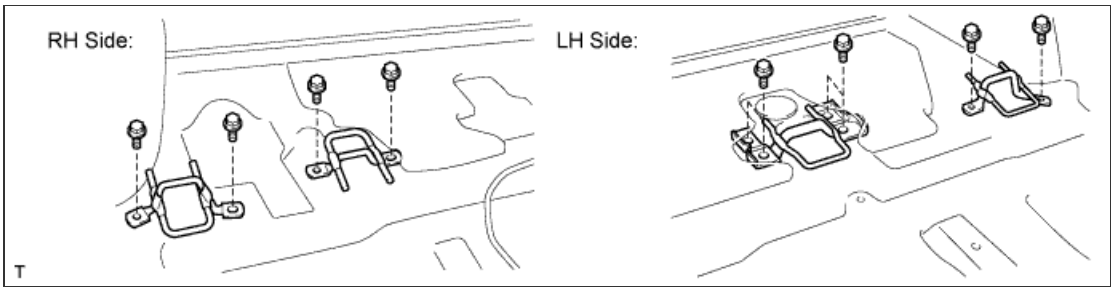
a. w/ Seat Heater System:
Check the seat heater operation.

i. Turn the engine switch on (IG).

ii. Turn the seat heater switch on.

iii. Wait 5 minutes or more and confirm that the seat surface becomes warm.

for Preparation Click here

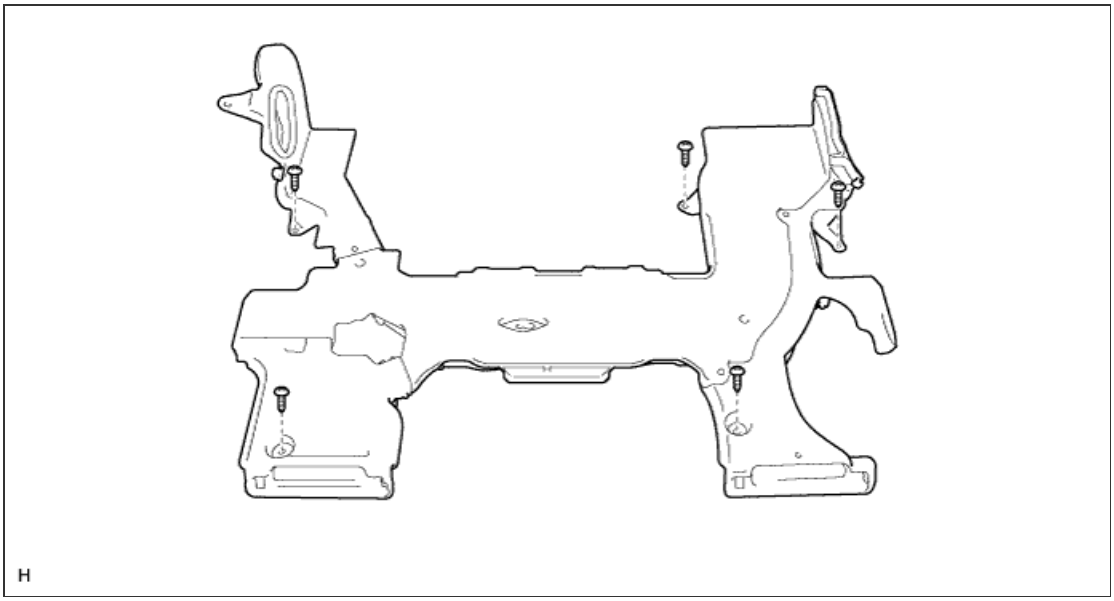


HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL REAR SEAT CUSHION LOCK STRIKER SUB-ASSEMBLY

a. Install the 4 strikers with the 10 bolts.



Torque:
37 N*m{ 377 kgf*cm , 27 ft.*lbf }

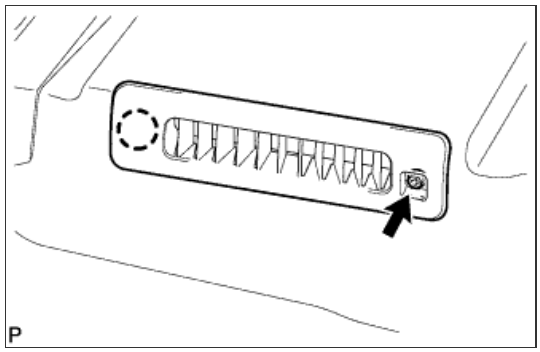
2. INSTALL REAR NO. 6 AIR DUCT (w/ Rear Air Conditioning System)

a. Install the duct with the 5 screws.

b. Connect the 2 connectors.

3. INSTALL RONT LOOR CARPET ASSEMBLY

a. Install the floor carpet.



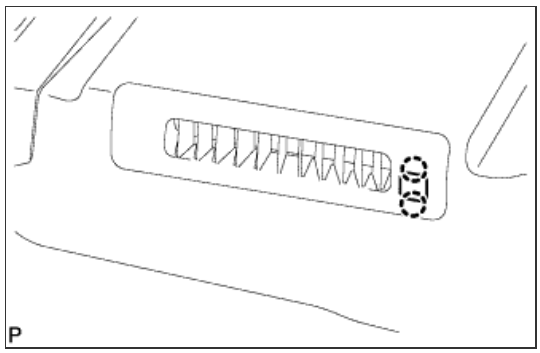
4. INSTALL REAR AIR DUCT UIDE (w/ Rear Air Conditioning System)

a. Attach the claw to install the guide.

b. Install the screw.

HINT:

Use the same procedures for both sides.



5. INSTALL AIR DUCT PLU (w/ Rear Air Conditioning System)

a. Attach the 2 claws to install the plug.

HINT:

Use the same procedures for both sides.

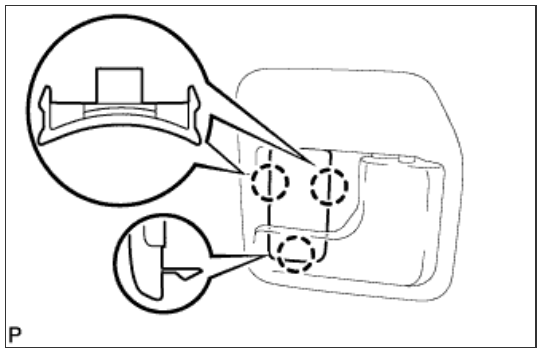
6. INSTALL RONT QUARTER TRIM PANEL ASSEMBLY LH

a. w/ Sliding Roof:
Install the front quarter trim panel assembly LH (Click here).

b. w/o Sliding Roof:
Install the front quarter trim panel assembly LH (Click here).

7. INSTALL RONT QUARTER TRIM PANEL ASSEMBLY RH

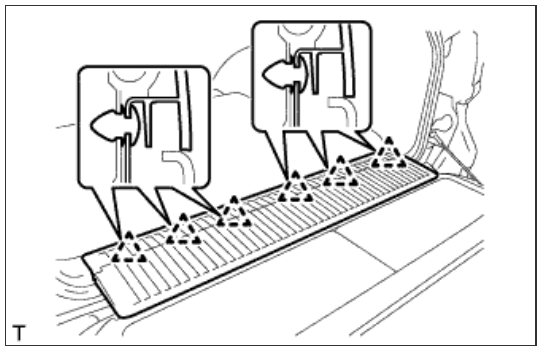
a. w/ Sliding Roof:
Install the front quarter trim panel assembly RH (Click here).



b. w/o Sliding Roof:
Install the front quarter trim panel assembly RH (Click here).

8. INSTALL REAR SEAT CO ER CAP (w/ Rear No. 2 Seat, except ae to ae Seat Type)

HINT:



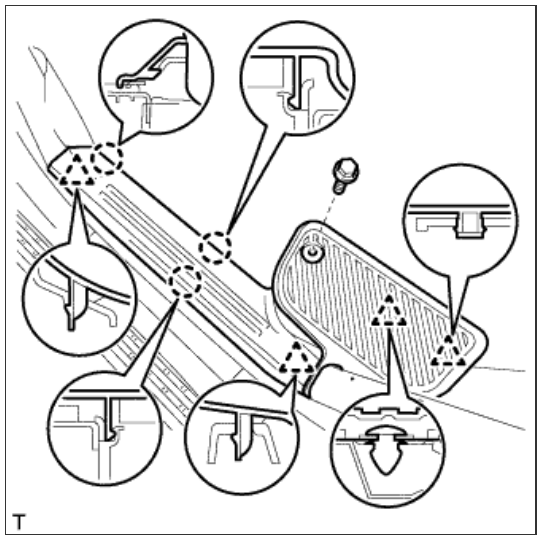
Use the same procedure to install the rear seat cover cap on the other side.

a. Attach the 3 claws to install the rear seat cover cap.

9. INSTALL REAR LOOR MAT REAR SUPPORT PLATE

a. Attach the clips to install the support plate.

10. INSTALL REAR NO. 2 SEAT ASSEMBLY



a. for Face to Face Seat Type:
Install the rear o. 2 seat assembly (Click here).

b. e cept Face to Face Seat Type:
Install the rear o. 2 seat assembly (Click here).

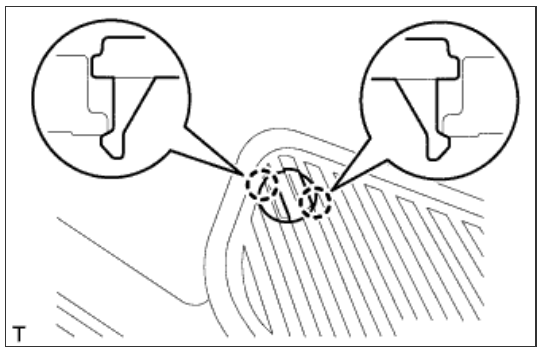
11. INSTALL REAR DOOR SCU PLATE LH

a. Attach the 3 claws and 4 clips to install the scuff plate.

b. Install the screw.

12. INSTALL REAR DOOR SCU PLATE RH

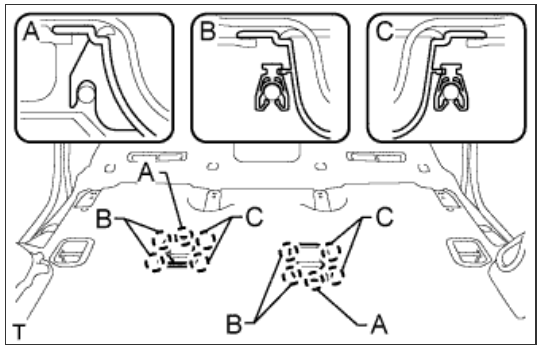
HINT:



Use the same procedures described for the LH side.

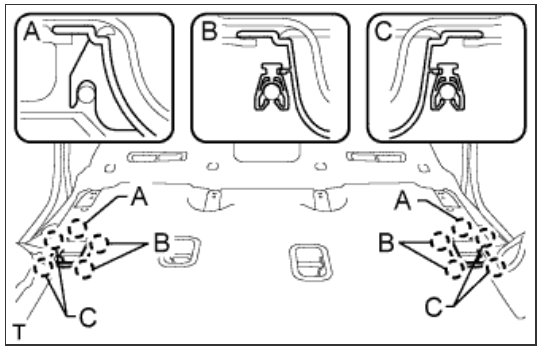
13. INSTALL REAR STEP CO ER

HINT:



Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.



14. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Attach the 10 claws to install the 2 seat protectors.

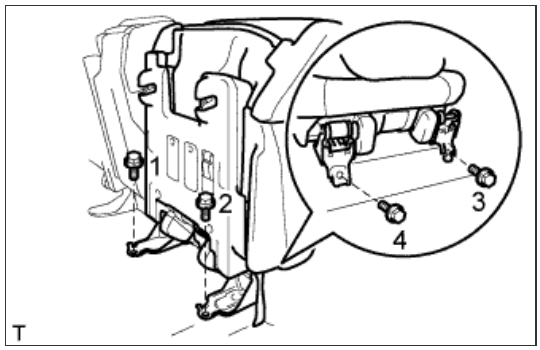
15. INSTALL REAR NO. 1 SEAT PROTECTOR

a. Attach the 10 claws to install the 2 seat protectors.

16. INSTALL REAR NO. 1 SEAT ASSEMBLY LH

a. Install the rear No. 1 seat assembly LH (Click here).

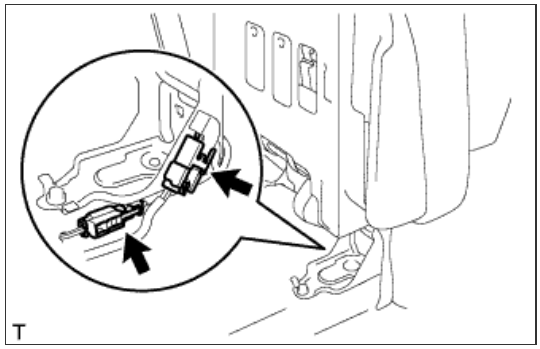
17. INSTALL REAR NO. 1 SEAT ASSEMBLY RH



a. Temporarily install the seat assembly with the 4 bolts.

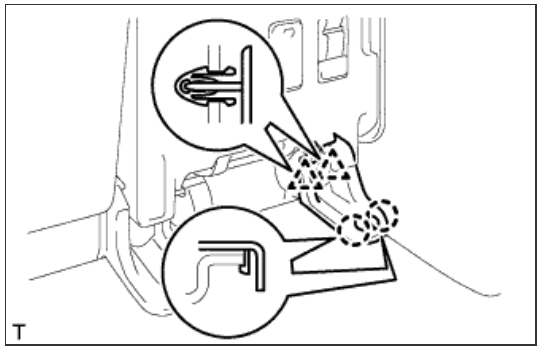
NOTICE:

Be careful not to damage the vehicle body.



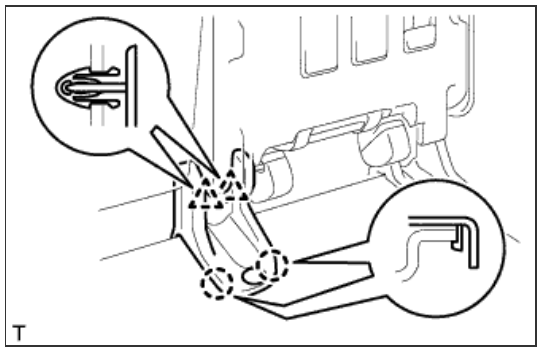
b. Tighten the bolts in the order shown in the illustration.

Torque:
37 N*m{ 377 kgf*cm , 27 ft.*lbf }



c. w/ Rear Seat Side Airbag:
Connect the connector.

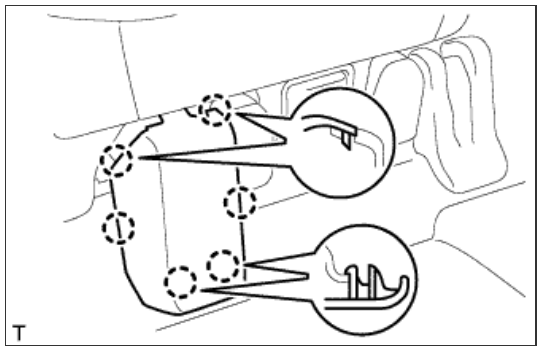
d. w/ Seat Heater System:
Connect the connector.



18. INSTALL REAR NO. 3 SEAT CUSHION HIN E CO ER

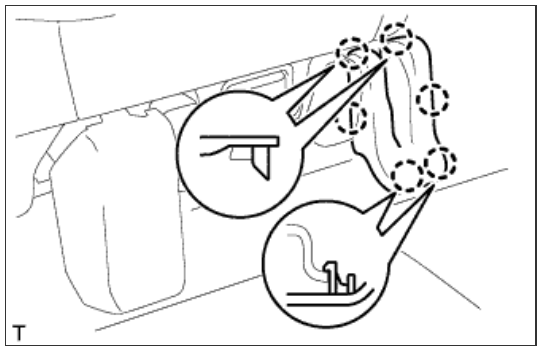
a. Attach the 2 clips and 2 claws to install the cover.

19. INSTALL REAR NO. 1 SEAT CUSHION HIN E CO ER



a. Attach the 2 clips and 2 claws to install the cover.

20. INSTALL REAR NO. 4 SEAT CUSHION HIN E CO ER



a. Return the seat to the upright position.

b. Attach the claws to install the cover.

21. INSTALL REAR NO. 2 SEAT CUSHION HINGE COVER

a. Attach the claws to install the cover.

22. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

23. CHECK SRS WARNING LIGHT

a. Check the SRS warning light (Click here).

24. INSPECT REAR NO. 1 SEAT ASSEMBLY RH

a. w/ Seat Heater System:
Check the seat heater operation.

i. Turn the engine switch on (IG).

ii. Turn the seat heater switch on.

iii. Wait 5 minutes or more and confirm that the seat surface becomes warm.

Install the front quarter trim panel assembly LH (Click here).

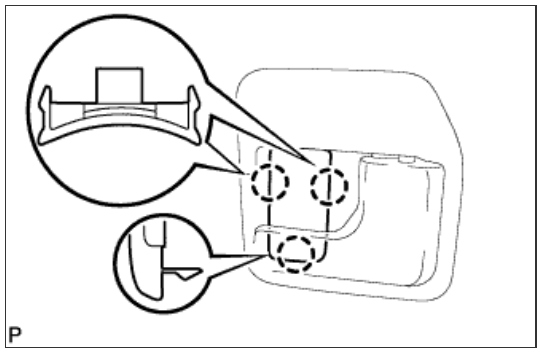
7. INSTALL RONT QUARTER TRIM PANEL ASSEMBLY RH

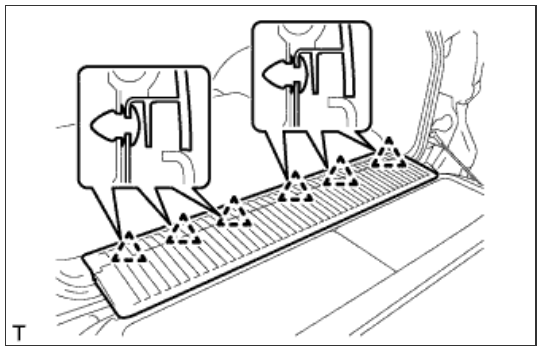
a. w/ Sliding Roof:
Install the front quarter trim panel assembly RH (Click here).



b. w/o Sliding Roof:
Install the front quarter trim panel assembly RH (Click here).

8. INSTALL REAR SEAT CO ER CAP (w/ Rear No. 2 Seat, except ae to ae Seat Type)

HINT:



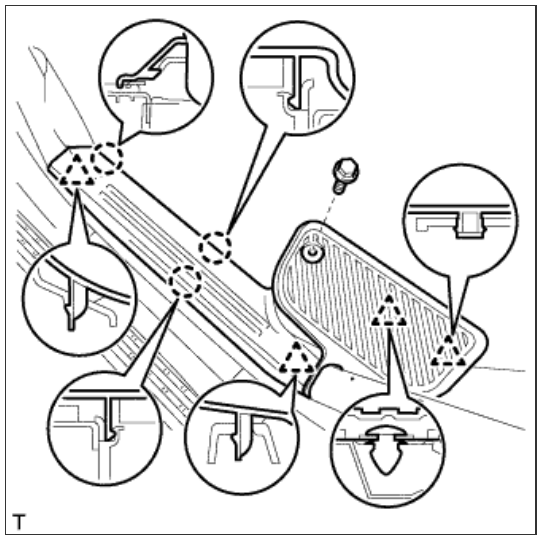
Use the same procedure to install the rear seat cover cap on the other side.

a. Attach the 3 claws to install the rear seat cover cap.

9. INSTALL REAR LOOR MAT REAR SUPPORT PLATE

a. Attach the clips to install the support plate.

10. INSTALL REAR NO. 2 SEAT ASSEMBLY



a. for Face to Face Seat Type:
Install the rear o. 2 seat assembly (Click here).

b. e cept Face to Face Seat Type:
Install the rear o. 2 seat assembly (Click here).

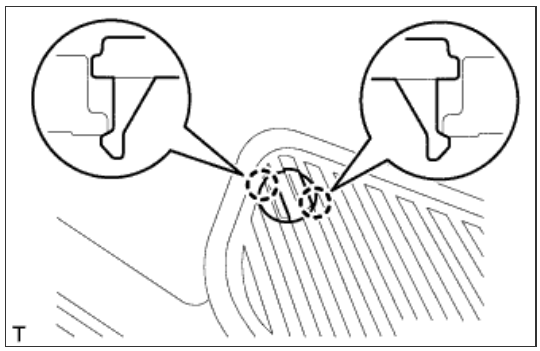
11. INSTALL REAR DOOR SCU PLATE LH

a. Attach the 3 claws and 4 clips to install the scuff plate.

b. Install the screw.

12. INSTALL REAR DOOR SCU PLATE RH

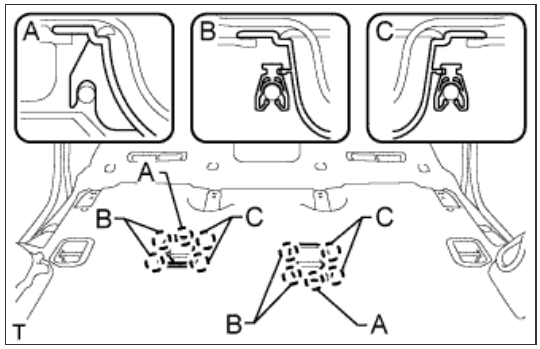
HINT:



Use the same procedures described for the LH side.

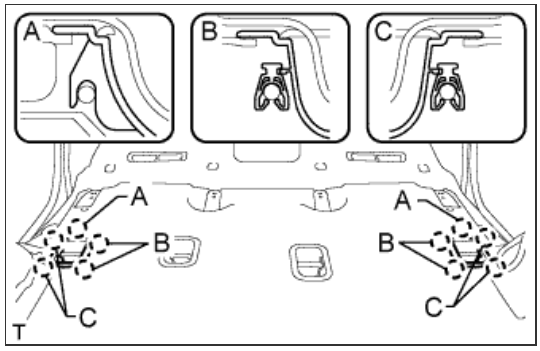
13. INSTALL REAR STEP CO ER

HINT:



Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.



14. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Attach the 10 claws to install the 2 seat protectors.

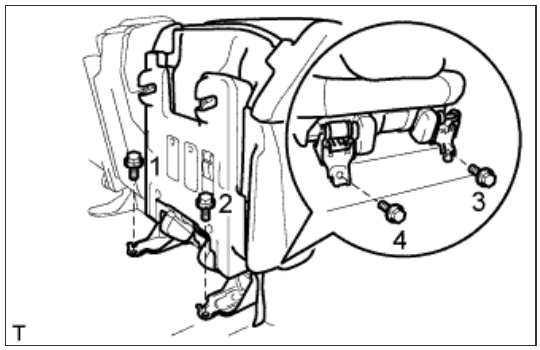
15. INSTALL REAR NO. 1 SEAT PROTECTOR

a. Attach the 10 claws to install the 2 seat protectors.

16. INSTALL REAR NO. 1 SEAT ASSEMBLY LH

a. Install the rear No. 1 seat assembly LH (Click here).

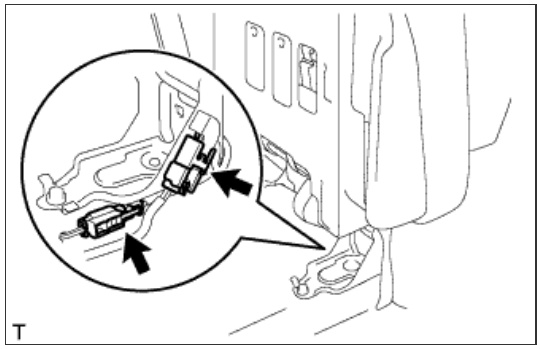
17. INSTALL REAR NO. 1 SEAT ASSEMBLY RH



a. Temporarily install the seat assembly with the 4 bolts.

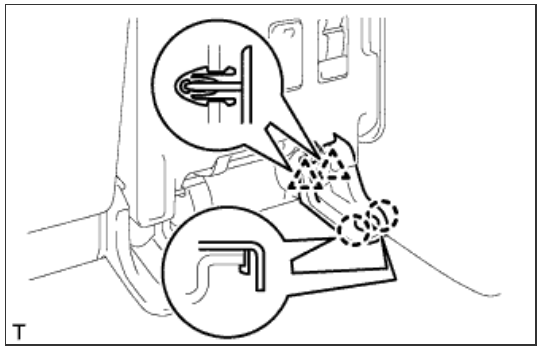
NOTICE:

Be careful not to damage the vehicle body.



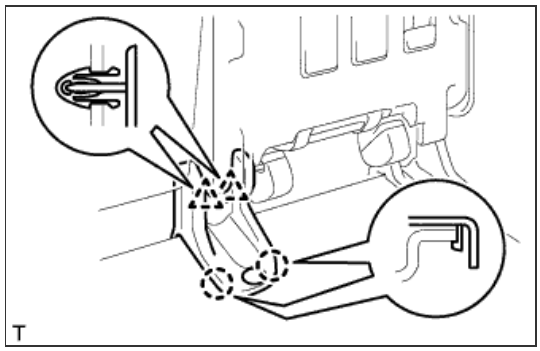
b. Tighten the bolts in the order shown in the illustration.

Torque:
37 N*m{ 377 kgf*cm , 27 ft.*lbf }



c. w/ Rear Seat Side Airbag:
Connect the connector.

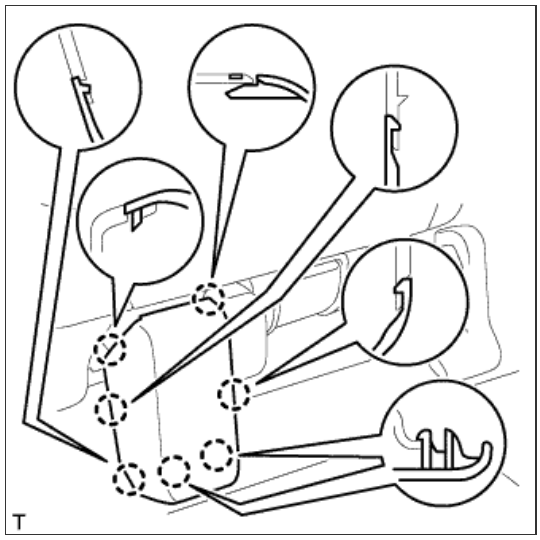
d. w/ Seat Heater System:
Connect the connector.



18. INSTALL REAR NO. 3 SEAT CUSHION HIN E CO ER

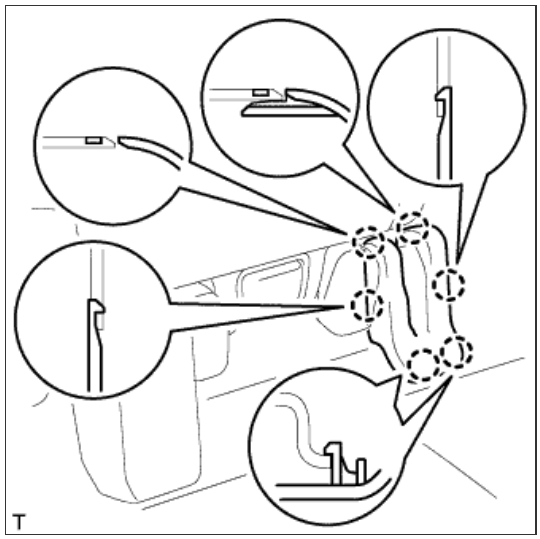
a. Attach the 2 clips and 2 claws to install the cover.

19. INSTALL REAR NO. 1 SEAT CUSHION HIN E CO ER



a. Attach the 2 clips and 2 claws to install the cover.

20. INSTALL REAR NO. 4 SEAT CUSHION HIN E CO ER



a. Return the seat to the upright position.

b. Attach the 7 claws to install the cover.

21. INSTALL REAR NO. 2 SEAT CUSHION HIN E CO ER

a. Attach the claws to install the cover.

22. CONNECT CABLE TO NE ATI E BATTERY TERMINAL

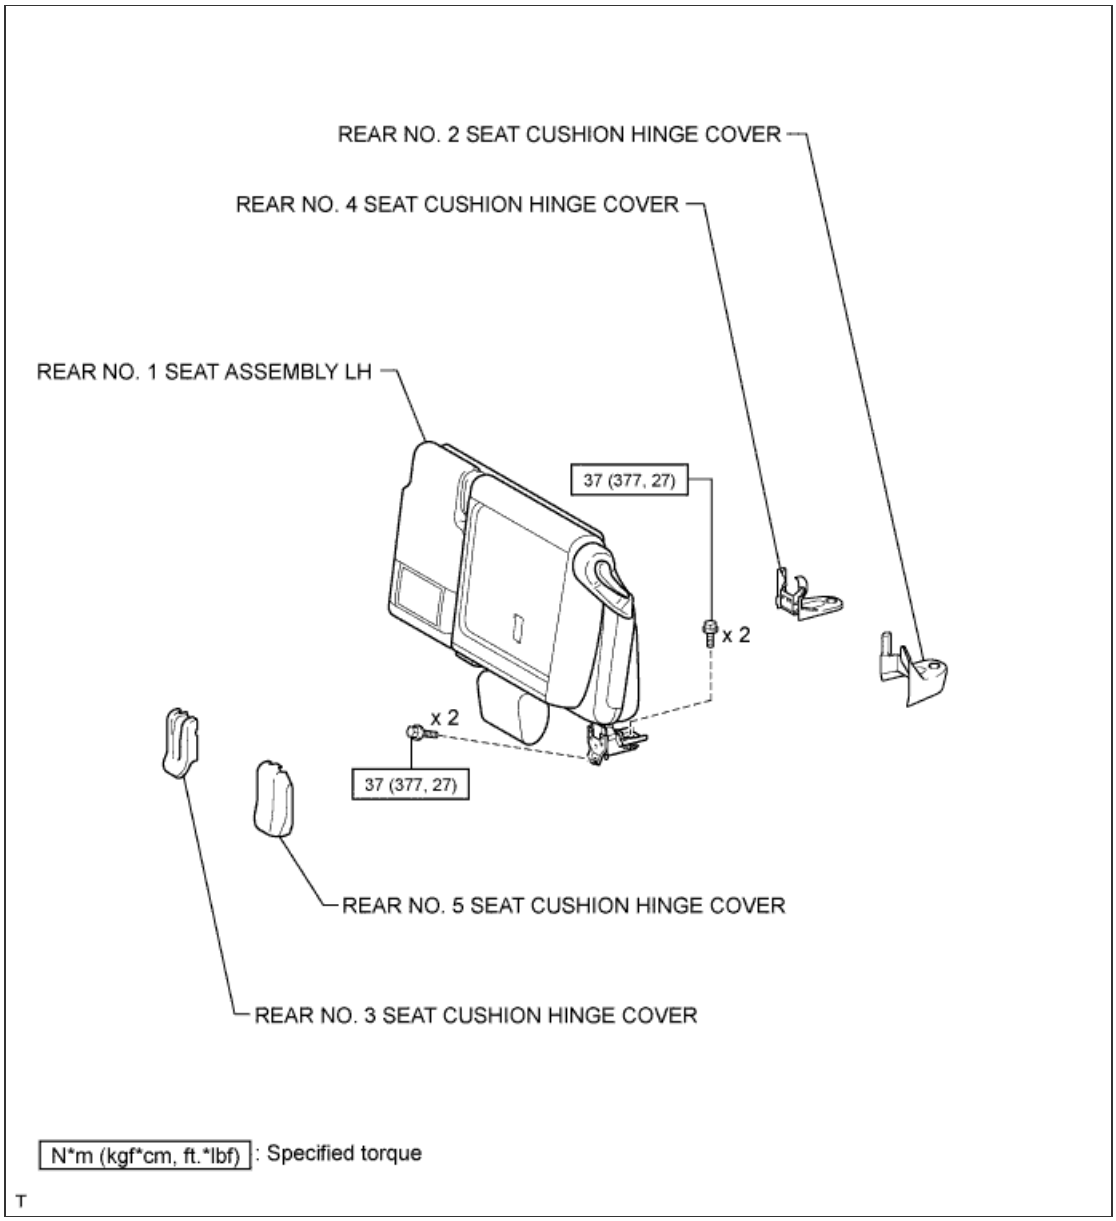
NOTICE:

In disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

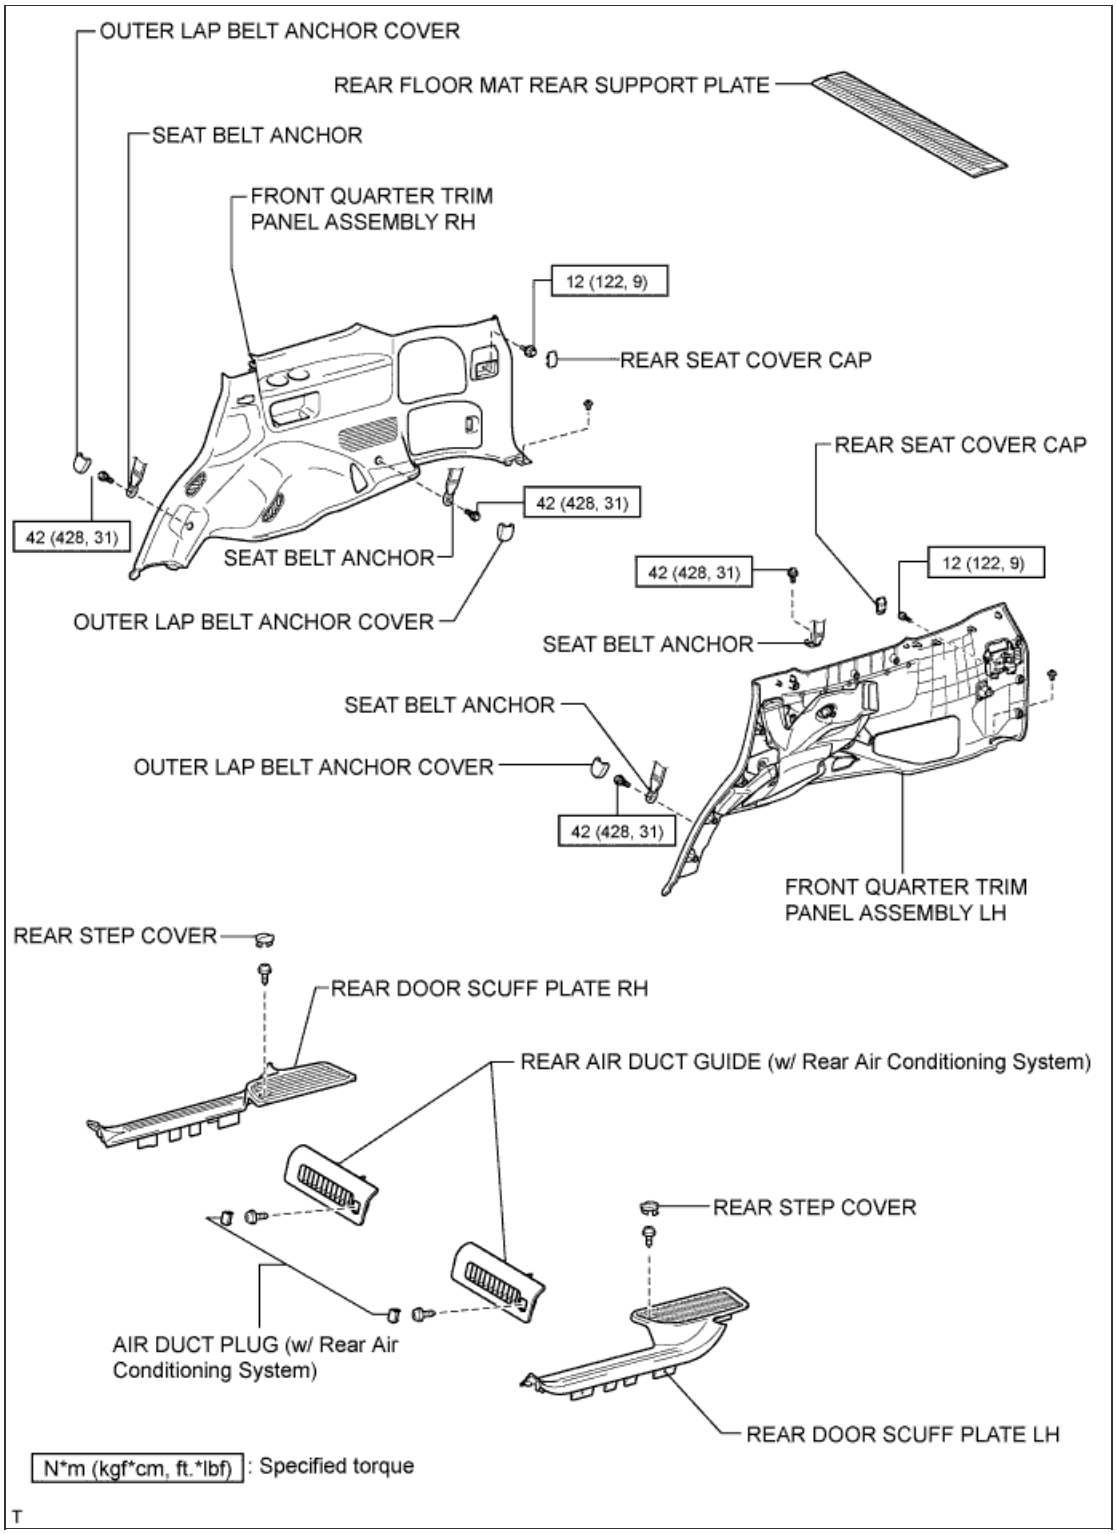
23. CHECK SRS ARNN LI HT

a. Check the SRS warning light (Click here).

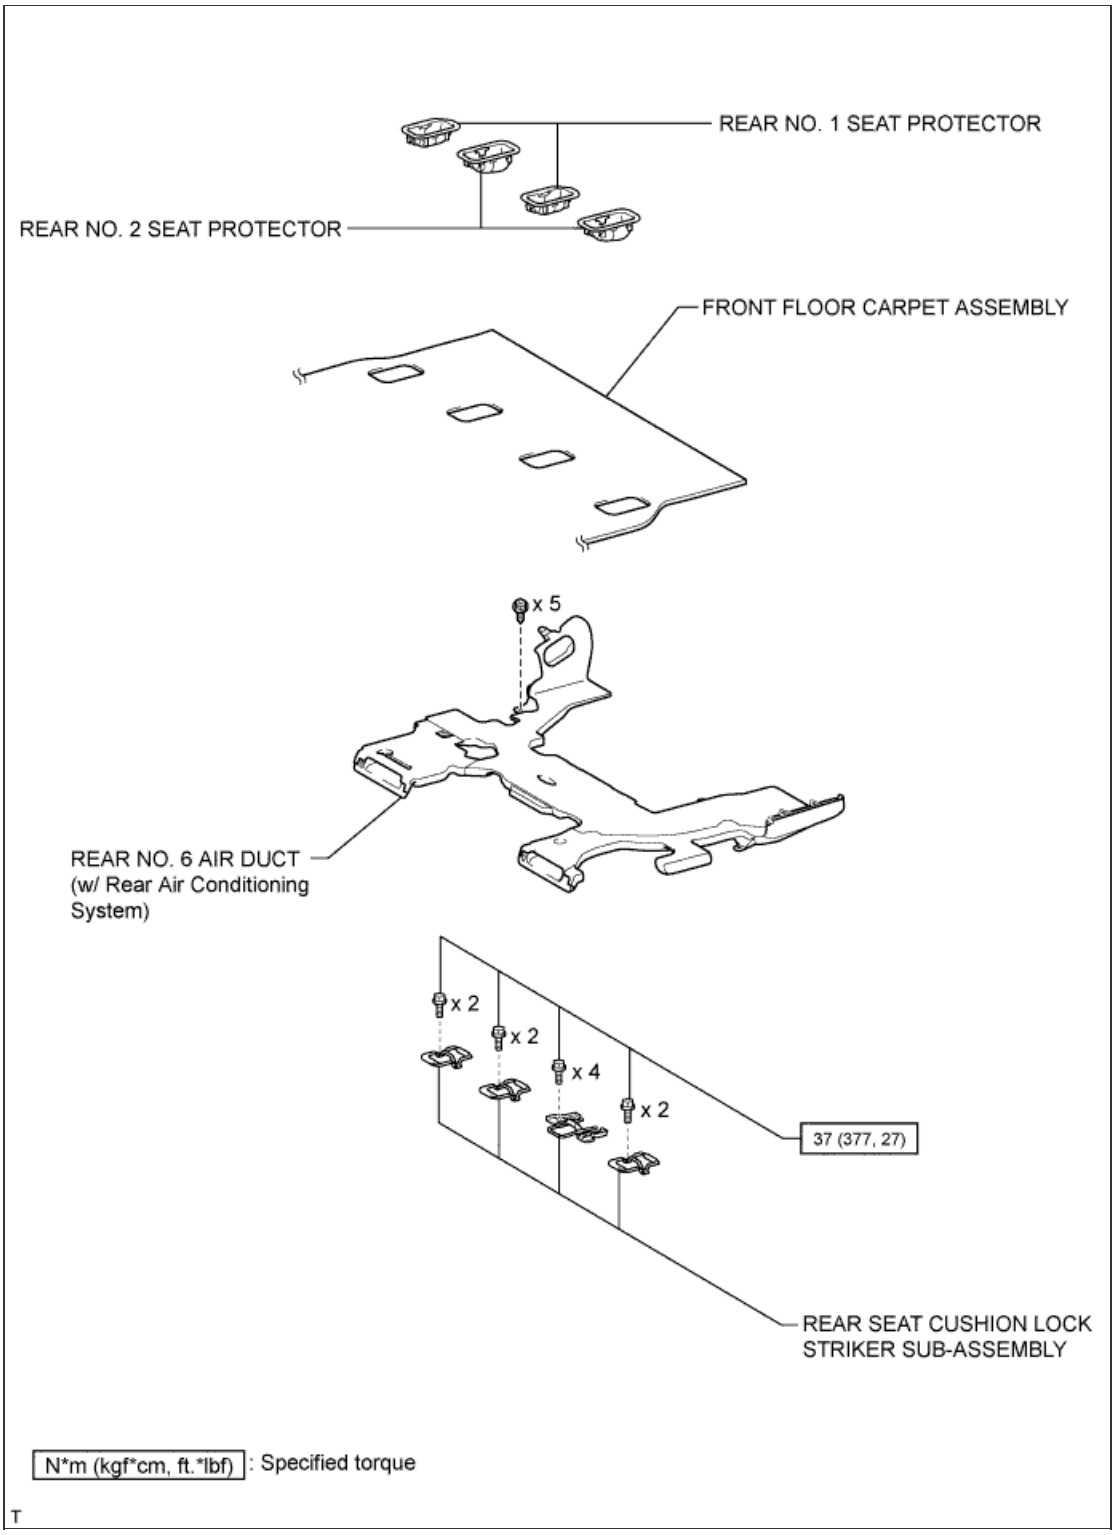
24. INSPECT REAR NO. 1 SEAT ASSEMBLY RH



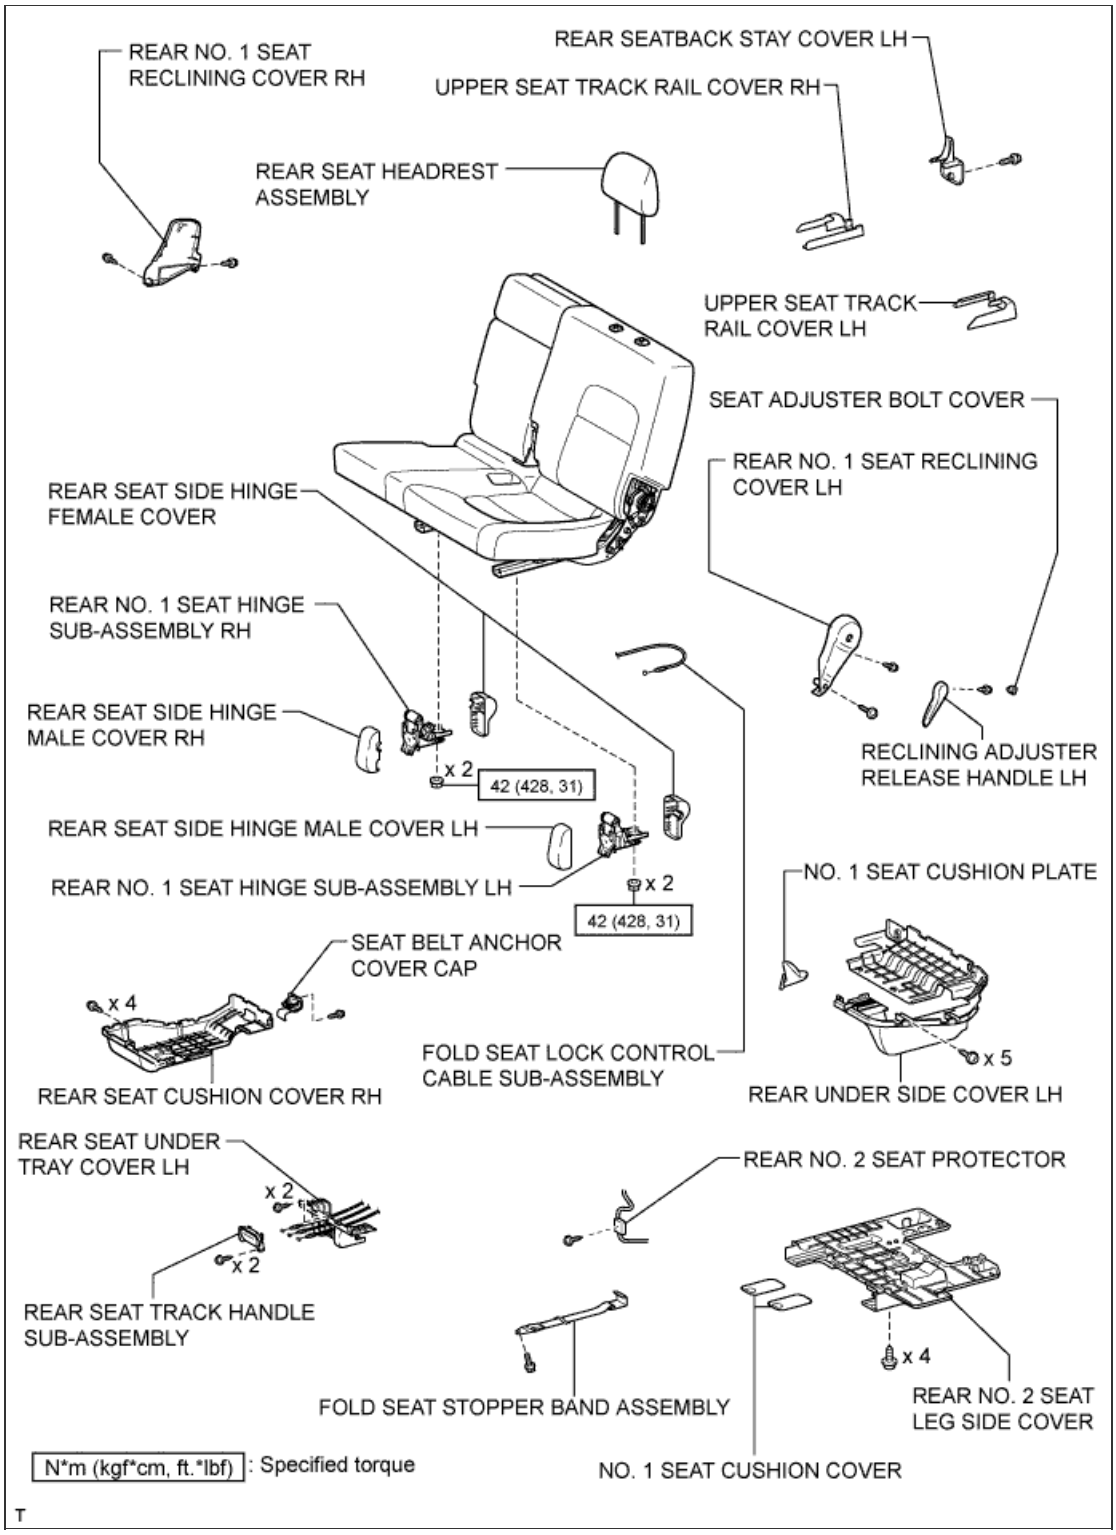
a. w/ Seat Heater System:
Check the seat heater operation.



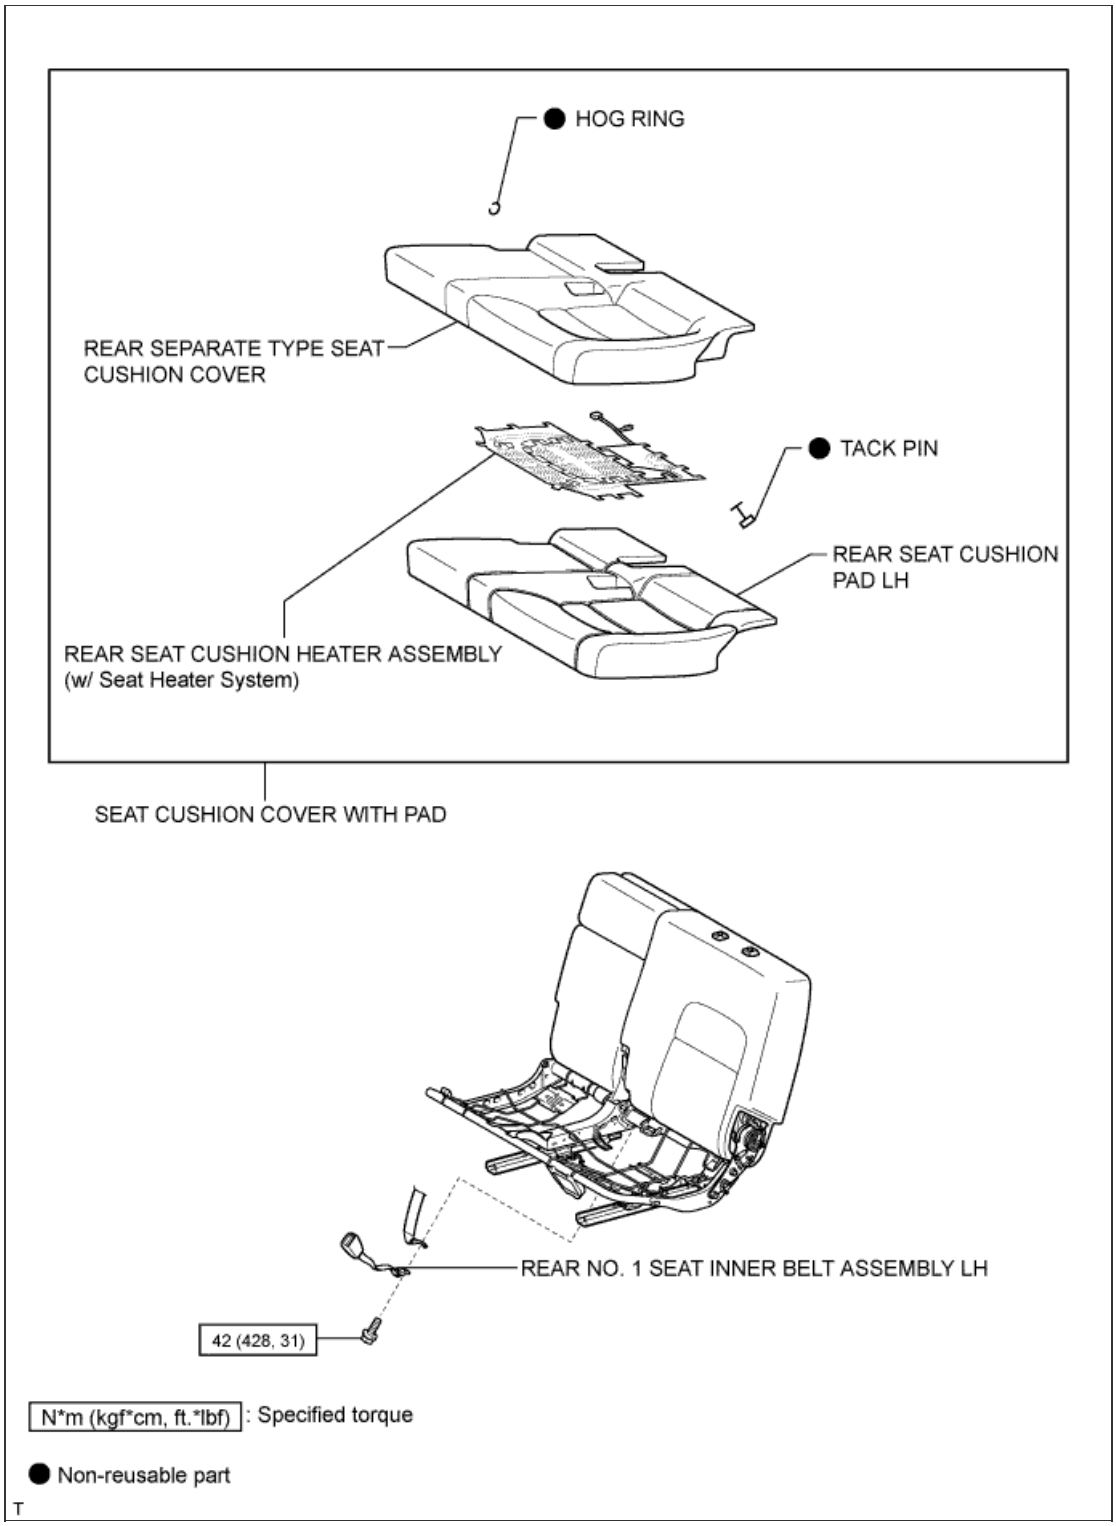
i. Turn the engine switch on (IG).



ii. Turn the seat heater switch on.



iii. ai5 minutes or more and confirm that the seat surface becomes warm.



for Preparation Click here

HINT:

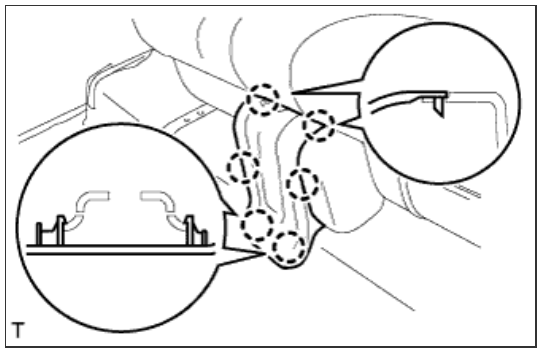
- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

NOTICE:



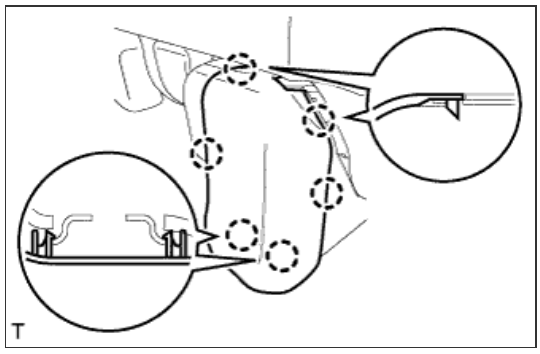
When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

2. REMOVE REAR NO. 3 SEAT CUSHION HINGE COVER

a. Using a screwdriver, detach the 6 claws and remove the cover.

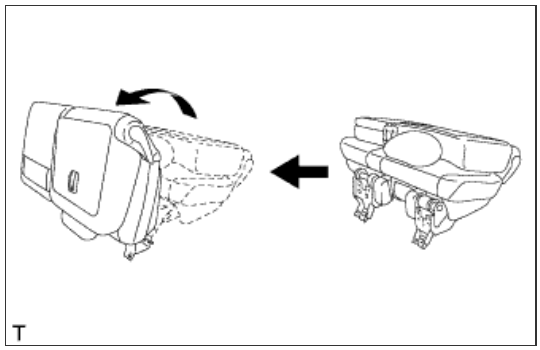
HINT:

Tape the screwdriver tip before use.



3. REMOVE REAR NO. 5 SEAT CUSHION HINGE COVER

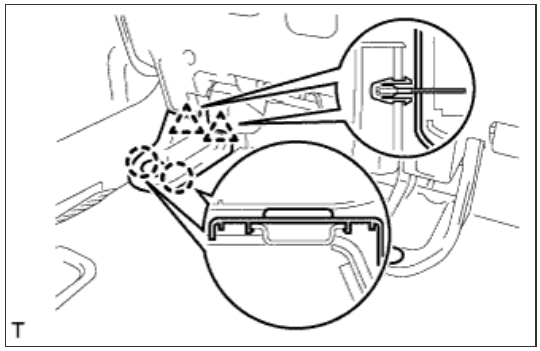
a. Using a screwdriver, detach the 6 claws and remove the cover.



HINT:

Tape the screwdriver tip before use.

4. REMOVE REAR NO. 2 SEAT CUSHION HINGE COVER

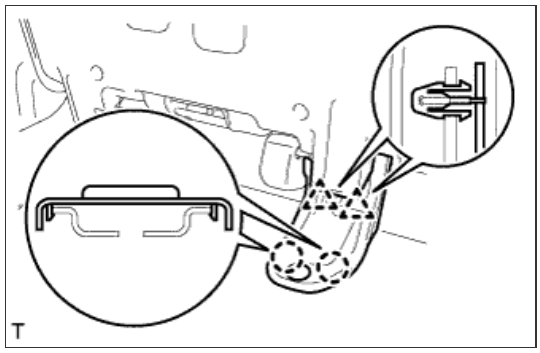


a. Operate the reclining adjuster release handle to move the seat into the position shown in the illustration.

b. Using a screwdriver, detach the 2 claws and 2 clips, and remove the cover.

HINT:

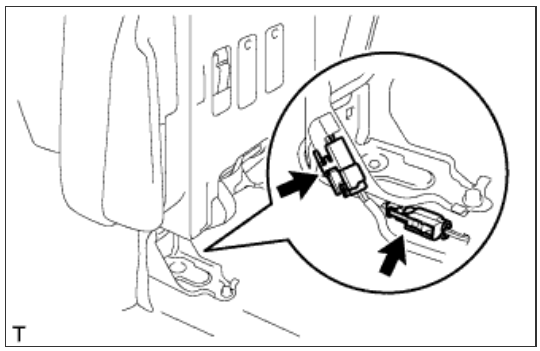
Tape the screwdriver tip before use.



5. REMOVE REAR NO. 4 SEAT CUSHION HINGE COVER

a. Using a screwdriver, detach the 2 claws and 2 clips, and remove the cover.

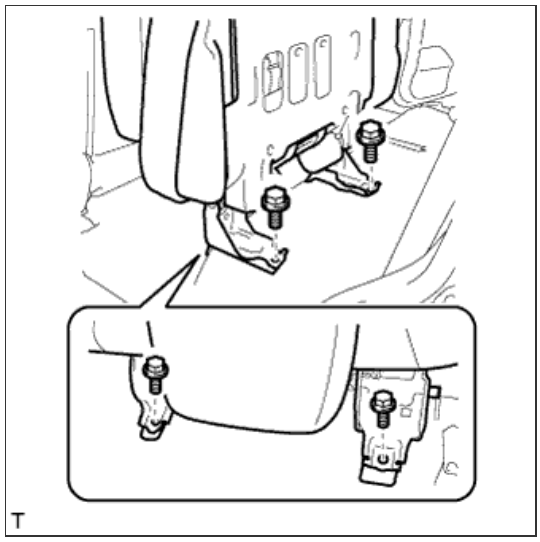
HINT:



Tape the screwdriver tip before use.

6. REMOVE REAR NO. 1 SEAT ASSEMBLY LH

a. w/ Rear Seat Side Airbag:
Disconnect the connector.

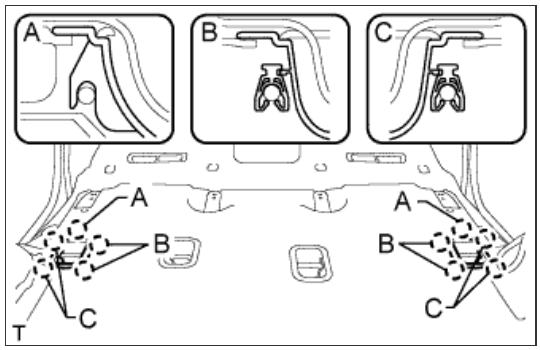


b. w/ Seat Heater System:
Disconnect the connector.

c. Remove the 4 bolts and seat assembly.

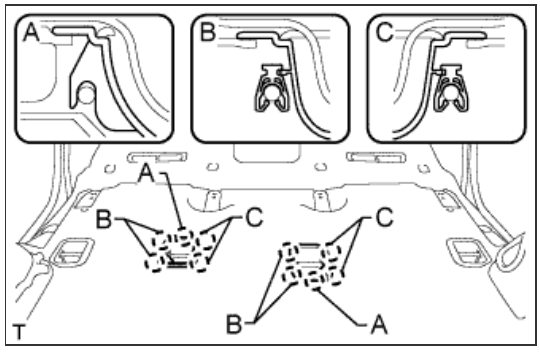
NOTICE:

e careful not to damage the vehicle body.



7. REMOVE REAR NO. 1 SEAT ASSEMBLY RH

a. Remove the rear No. 1 seat assembly RH (Click here).

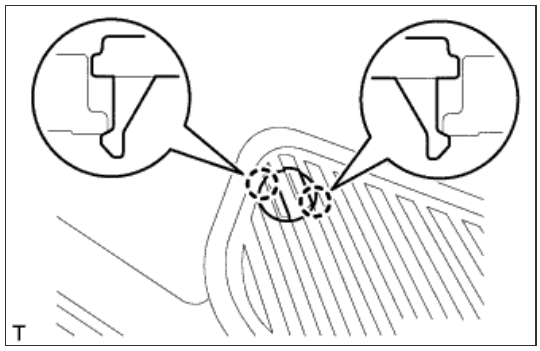


8. REMOVE REAR NO. 1 SEAT PROTECTOR

a. Detach the 10 claws and remove the 2 seat protectors.

9. REMOVE REAR NO. 2 SEAT PROTECTOR

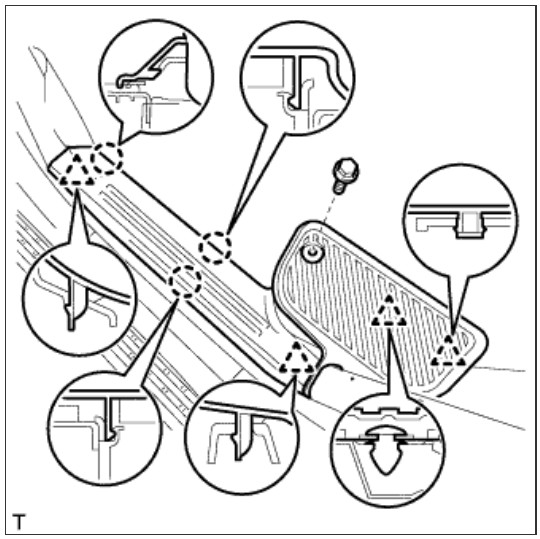
a. Detach the 10 claws and remove the 2 seat protectors.



10. REMOVE REAR STEP COVER

HINT:

Use the same procedure to remove the step cover on the other side.



a. Detach the 2 claws and remove the step cover.

11. REMOVE REAR DOOR SCUFF PLATE LH

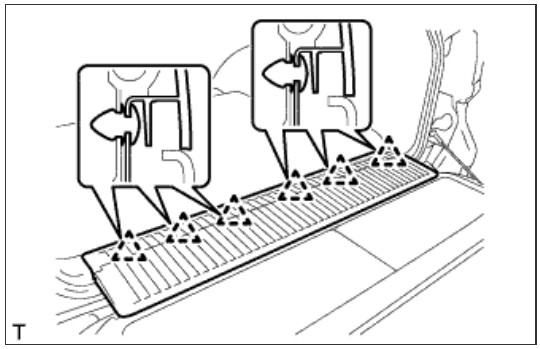
a. Remove the screw.

b. Detach the claws and 4 clips, and remove the scuff plate.

12. REMOVE REAR DOOR SCUFF PLATE RH

HINT:

Use the same procedures described for the H side.



13. REMOVE REAR NO. 2 SEAT ASSEMBLY

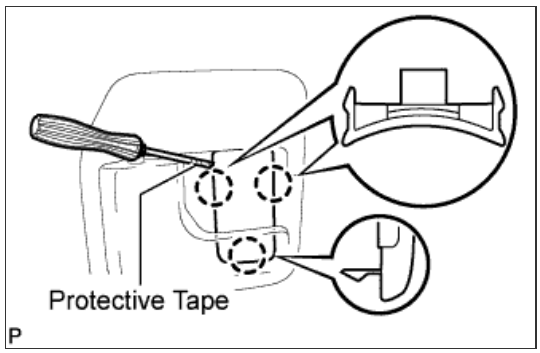
a. for Face to Face Seat Type:
Remove the rear No. 2 seat assembly (Click here).

b. except Face to Face Seat Type:
Remove the rear No. 2 seat assembly (Click here).

14. REMOVE REAR FLOOR MAT REAR SUPPORT PLATE

a. Detach the 6 clips and remove the support plate.

15. REMOVE REAR SEAT COVER CAP (w/ Rear No. 2 Seat, except Face to Face Seat Type)



HINT:

Use the same procedure to remove the rear seat cover cap on the other side.

a. Using a screwdriver, detach the claws and remove the rear seat cover cap.

HINT:

Tape the screwdriver tip before use.

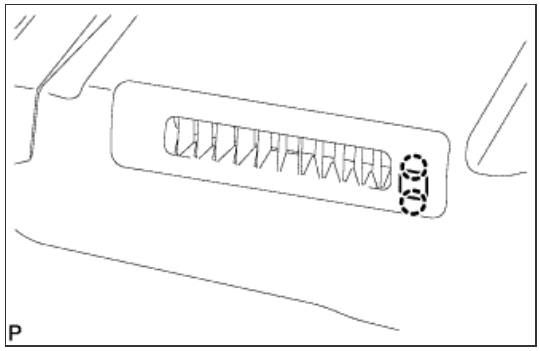
16. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY LH

a. w/ Sliding Roof:
Remove the front uarter trim panel assembly H (Click here).

b. w/o Sliding Roof:
Remove the front uarter trim panel assembly H (Click here).

17. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY RH

a. w/ Sliding Roof:
Remove the front uarter trim panel assembly RH (Click here).



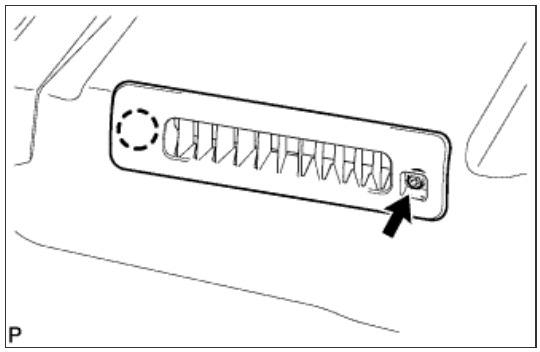
b. w/o Sliding Roof:
Remove the front uarter trim panel assembly RH (Click here).

18. REMOVE AIR DUCT PLUG (w/ Rear Air Conditioning System)

a. Detach the 2 claws and remove the plug.

HINT:

Use the same procedures for both sides.



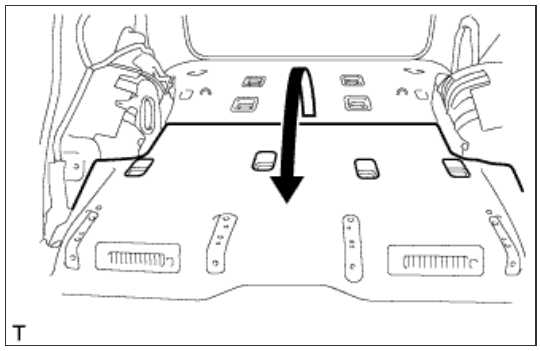
19. REMOVE REAR AIR DUCT GUIDE (w/ Rear Air Conditioning System)

a. Remove the screw.

b. Detach the claw and remove the guide.

HINT:

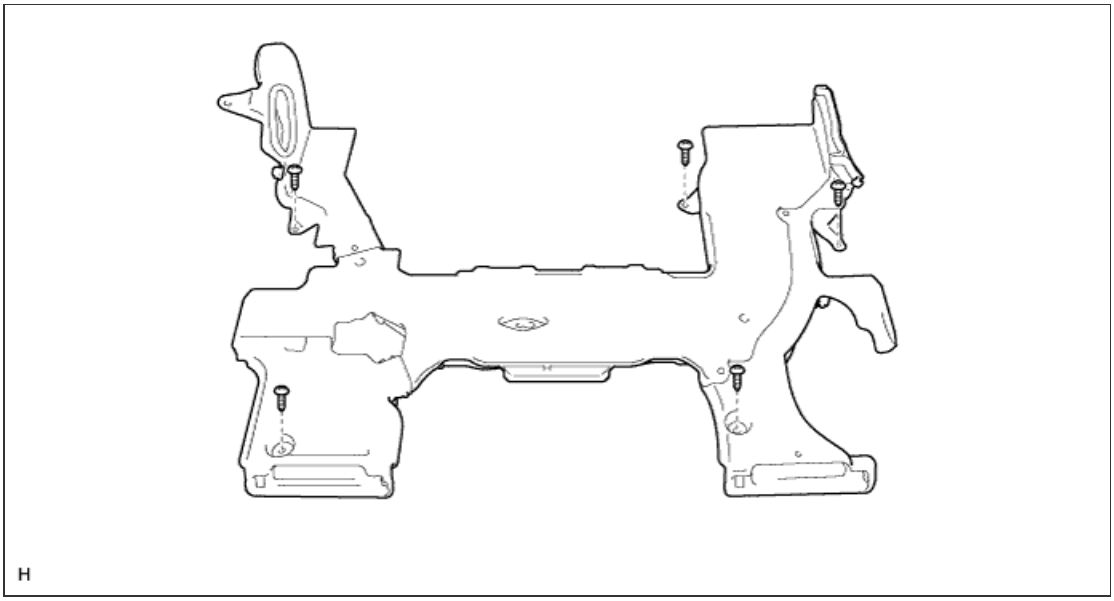
Use the same procedures for both sides.



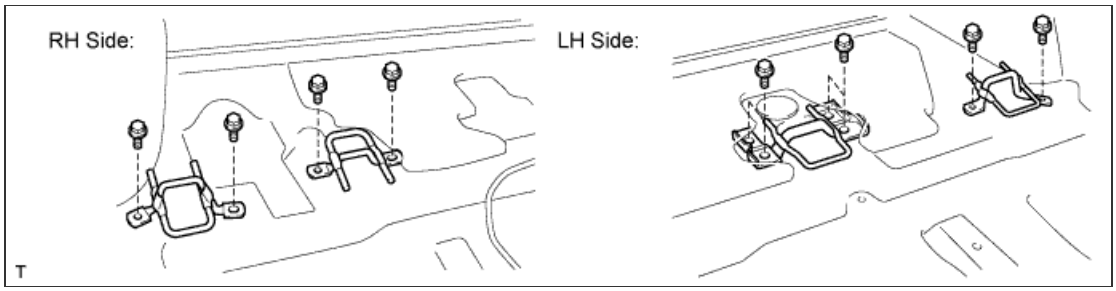
20. REMOVE FRONT FLOOR CARPET ASSEMBLY

a. Fold back the floor carpet.

HINT:



Fold back the carpet until it is possible to remove the rear No. 6 air duct.



21. REMOVE REAR NO. 6 AIR DUCT (w/ Rear Air Conditioning System)

a. Disconnect the 2 connectors.

b. Remove the screws and duct.

22. REMOVE REAR SEAT CUSHION LOCK STRIKER SUB-ASSEMBLY

a. Remove the 10 bolts and 4 lock strikers.

for Preparation Click here

HINT:

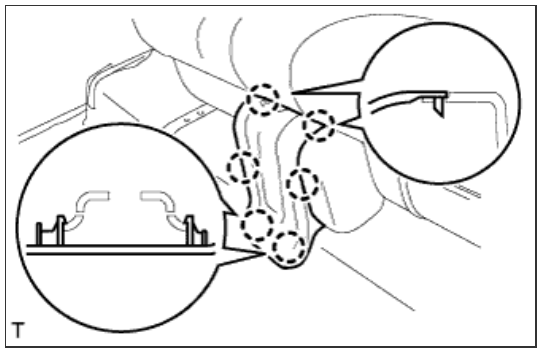
- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

NOTICE:



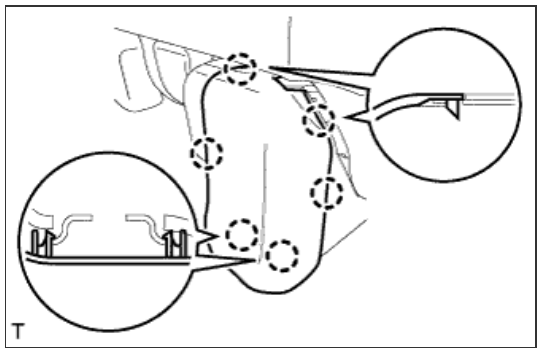
When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

2. REMOVE REAR NO. 3 SEAT CUSHION HINGE COVER

a. Using a screwdriver, detach the 6 claws and remove the cover.

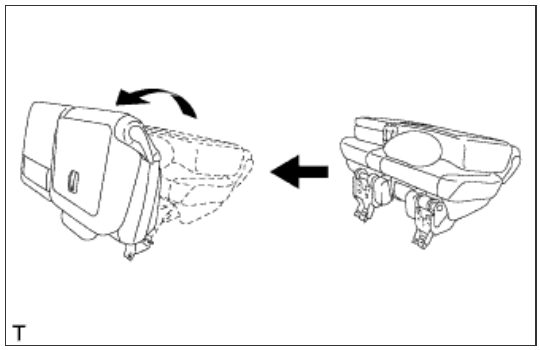
HINT:

Tape the screwdriver tip before use.



3. REMOVE REAR NO. 5 SEAT CUSHION HINGE COVER

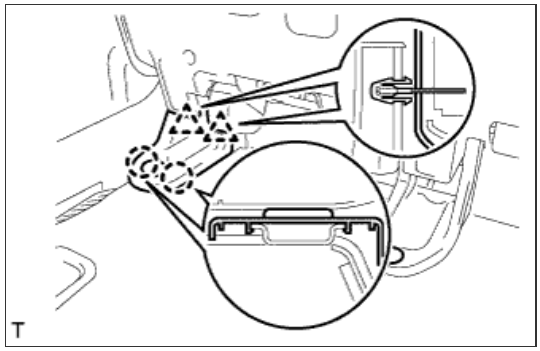
a. Using a screwdriver, detach the 6 claws and remove the cover.



HINT:

Tape the screwdriver tip before use.

4. REMOVE REAR NO. 2 SEAT CUSHION HINGE COVER

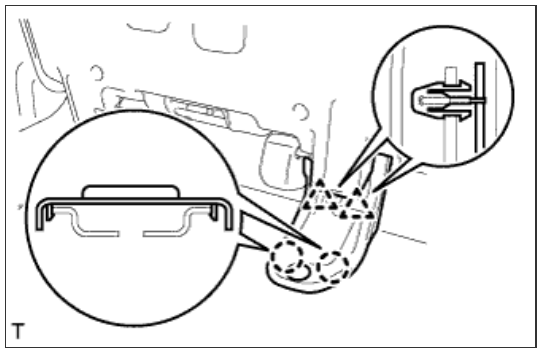


a. Operate the reclining adjuster release handle to move the seat into the position shown in the illustration.

b. Using a screwdriver, detach the 2 claws and 2 clips, and remove the cover.

HINT:

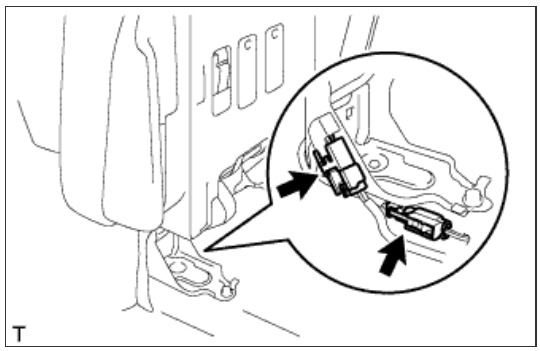
Tape the screwdriver tip before use.



5. REMOVE REAR NO. 4 SEAT CUSHION HINGE COVER

a. Using a screwdriver, detach the 2 claws and 2 clips, and remove the cover.

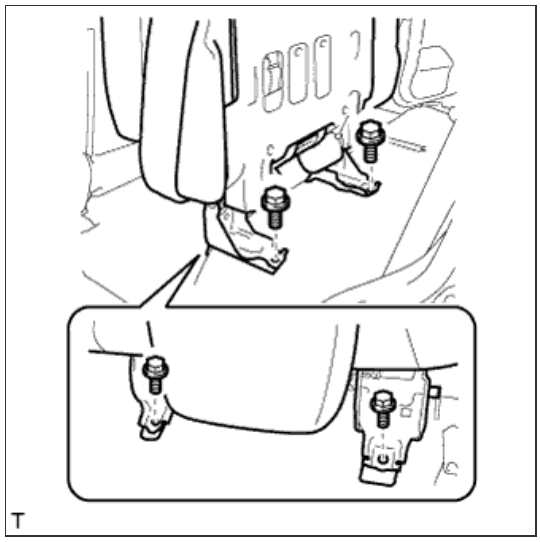
HINT:



Tape the screwdriver tip before use.

6. REMOVE REAR NO. 1 SEAT ASSEMBLY LH

a. w/ Rear Seat Side Airbag:
Disconnect the connector.

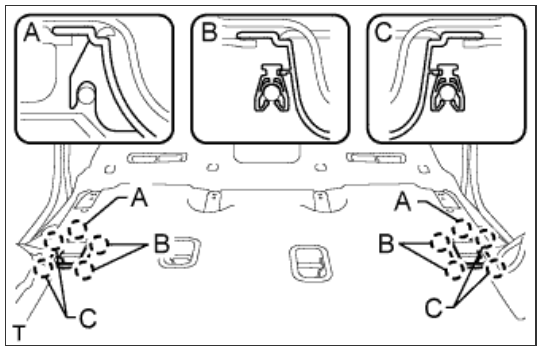


b. w/ Seat Heater System:
Disconnect the connector.

c. Remove the 4 bolts and seat assembly.

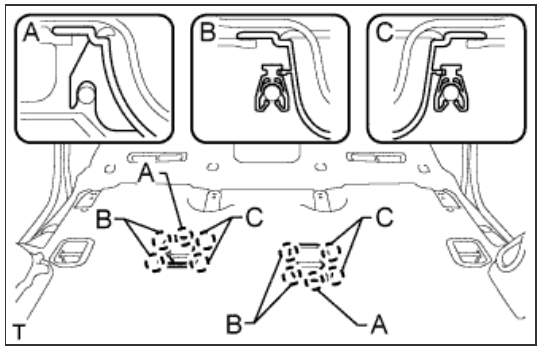
NOTICE:

e careful not to damage the vehicle body.



7. REMOVE REAR NO. 1 SEAT ASSEMBLY RH

a. Remove the rear No. 1 seat assembly RH (Click here).

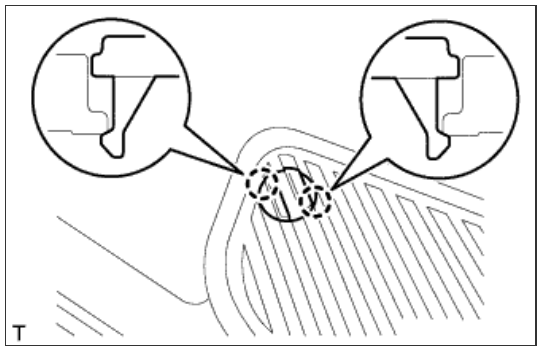


8. REMOVE REAR NO. 1 SEAT PROTECTOR

a. Detach the 10 claws and remove the 2 seat protectors.

9. REMOVE REAR NO. 2 SEAT PROTECTOR

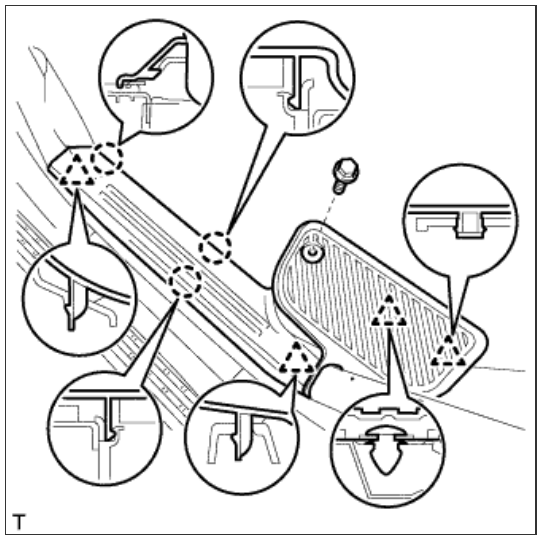
a. Detach the 10 claws and remove the 2 seat protectors.



10. REMOVE REAR STEP COVER

HINT:

Use the same procedure to remove the step cover on the other side.



a. Detach the 2 claws and remove the step cover.

11. REMOVE REAR DOOR SCUFF PLATE LH

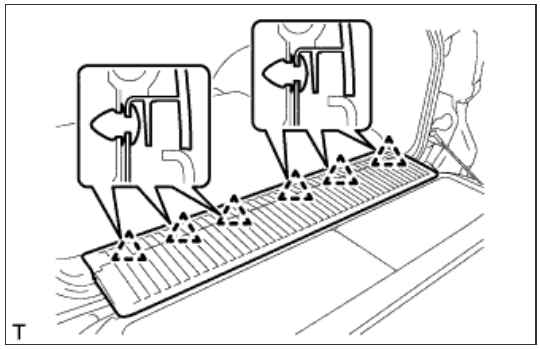
a. Remove the screw.

b. Detach the claws and 4 clips, and remove the scuff plate.

12. REMOVE REAR DOOR SCUFF PLATE RH

HINT:

Use the same procedures described for the H side.



13. REMOVE REAR NO. 2 SEAT ASSEMBLY

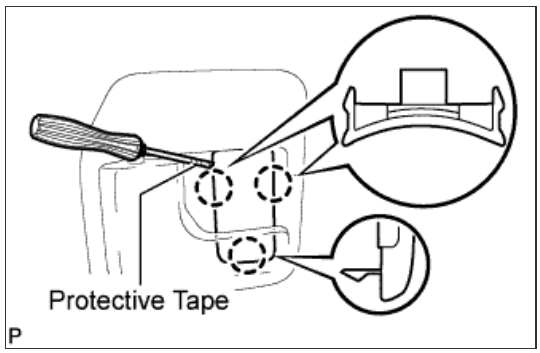
a. for Face to Face Seat Type:
Remove the rear No. 2 seat assembly (Click here).

b. except Face to Face Seat Type:
Remove the rear No. 2 seat assembly (Click here).

14. REMOVE REAR FLOOR MAT REAR SUPPORT PLATE

a. Detach the 6 clips and remove the support plate.

15. REMOVE REAR SEAT COVER CAP (w/ Rear No. 2 Seat, except Face to Face Seat Type)



HINT:

Use the same procedure to remove the rear seat cover cap on the other side.

a. Using a screwdriver, detach the claws and remove the rear seat cover cap.

HINT:

Tape the screwdriver tip before use.

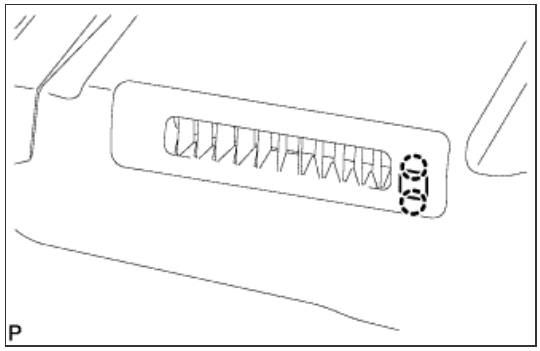
16. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY LH

a. w/ Sliding Roof:
Remove the front uarter trim panel assembly H (Click here).

b. w/o Sliding Roof:
Remove the front uarter trim panel assembly H (Click here).

17. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY RH

a. w/ Sliding Roof:
Remove the front uarter trim panel assembly RH (Click here).



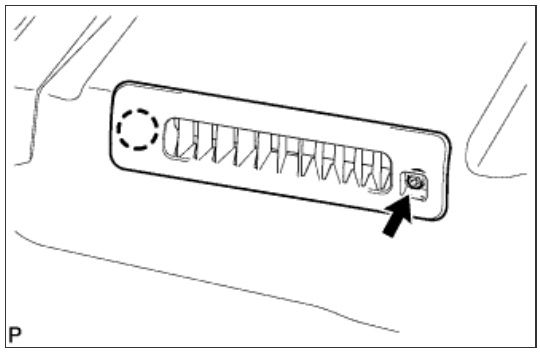
b. w/o Sliding Roof:
Remove the front uarter trim panel assembly RH (Click here).

18. REMOVE AIR DUCT PLUG (w/ Rear Air Conditioning System)

a. Detach the 2 claws and remove the plug.

HINT:

Use the same procedures for both sides.



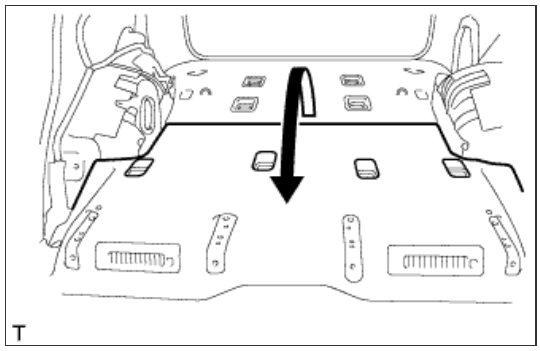
19. REMOVE REAR AIR DUCT GUIDE (w/ Rear Air Conditioning System)

a. Remove the screw.

b. Detach the claw and remove the guide.

HINT:

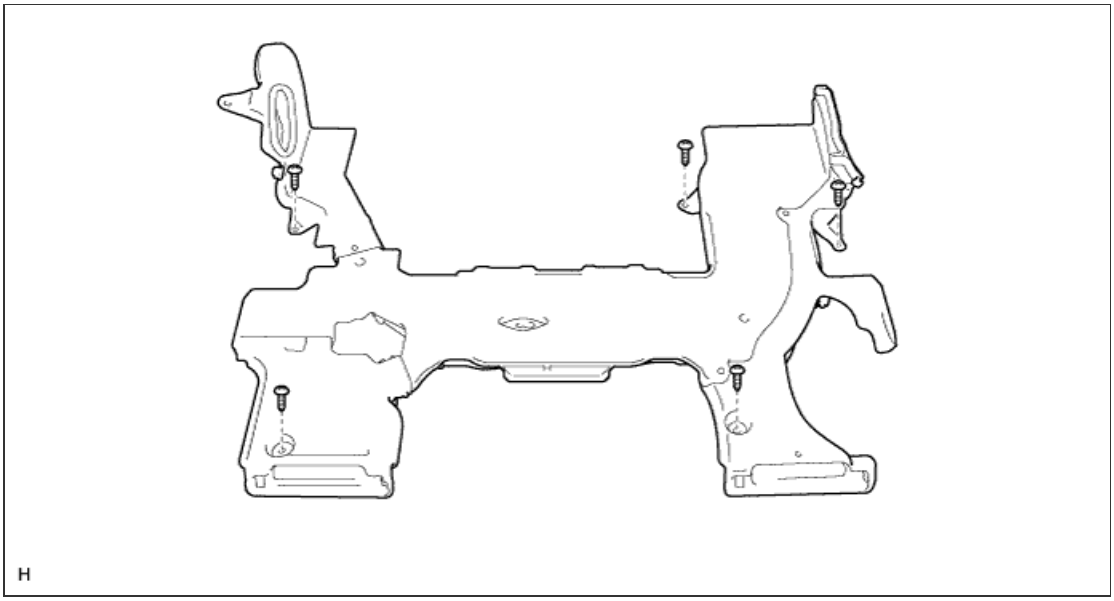
Use the same procedures for both sides.



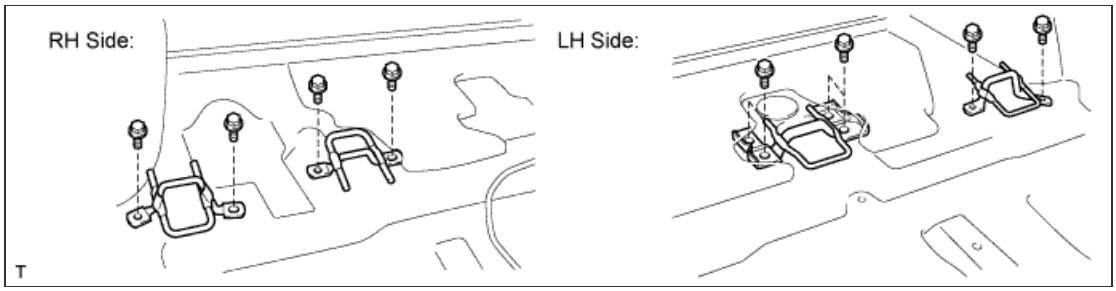
20. REMOVE FRONT FLOOR CARPET ASSEMBLY

a. Fold back the floor carpet.

HINT:



Fold back the carpet until it is possible to remove the rear No. 6 air duct.



21. REMOVE REAR NO. 6 AIR DUCT (w/ Rear Air Conditioning System)

a. Disconnect the 2 connectors.

b. Remove the screws and duct.

22. REMOVE REAR SEAT CUSHION LOCK STRIKER SUB-ASSEMBLY

a. Remove the 10 bolts and 4 lock strikers.

3. REMOVE REAR NO. 5 SEAT CUSHION HINGE COVER

a. Using a screwdriver, detach the 7 claws and remove the cover.

HINT:

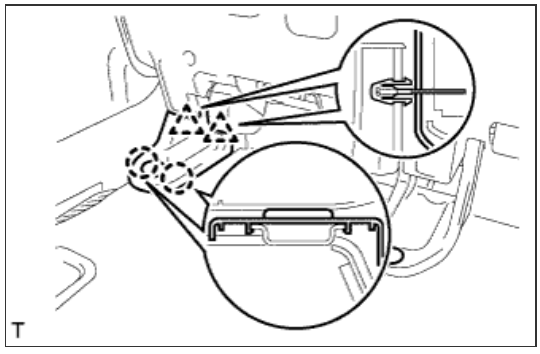
Tape the screwdriver tip before use.

4. REMOVE REAR NO. 2 SEAT CUSHION HINGE COVER



a. Operate the reclining ad uster release handle to move the seat into the position shown in the illustration.

b. Using a screwdriver, detach the 2 claws and 2 clips, and remove the cover.

HINT:

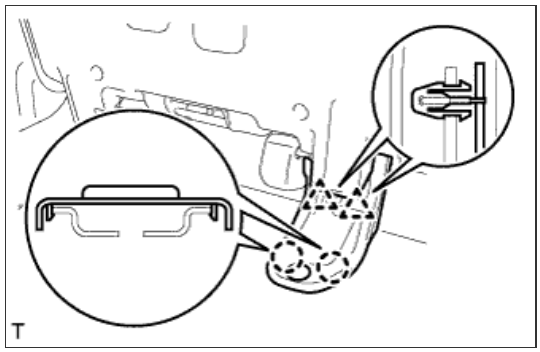
Tape the screwdriver tip before use.



5. REMOVE REAR NO. 4 SEAT CUSHION HINGE COVER

a. Using a screwdriver, detach the 2 claws and 2 clips, and remove the cover.

HINT:

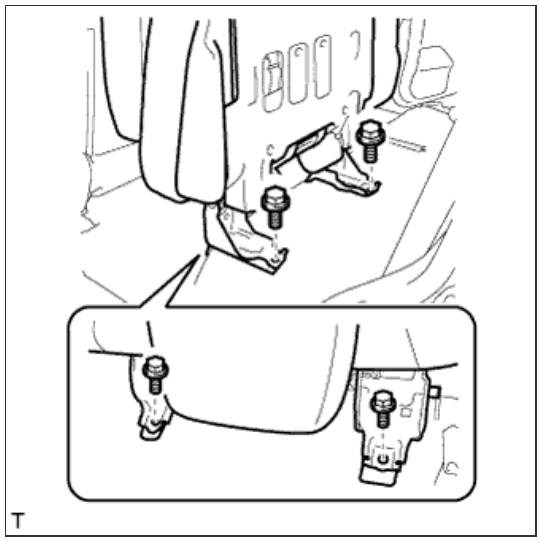
Tape the screwdriver tip before use.

6. REMOVE REAR NO. 1 SEAT ASSEMBLY LH

a. w/ Rear Seat Side Airbag:
Disconnect the connector.

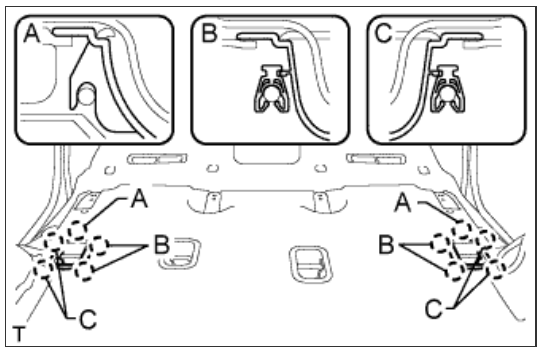


b. w/ Seat Heater System:
Disconnect the connector.

c. Remove the 4 bolts and seat assembly.

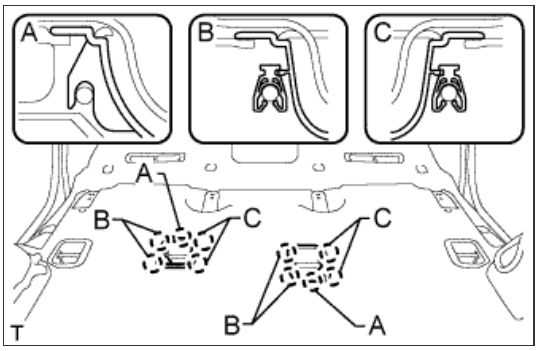
NOTICE:

Be careful not to damage the vehicle body.



7. REMOVE REAR NO. 1 SEAT ASSEMBLY RH

a. Remove the rear o. 1 seat assembly RH (Click here).

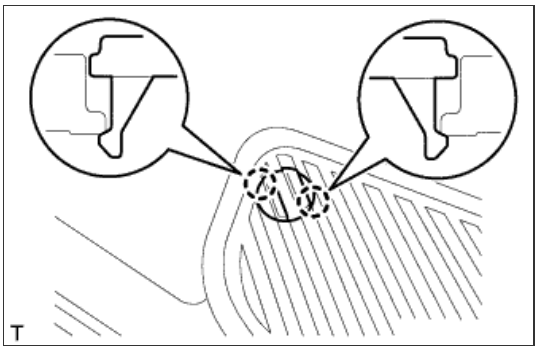


8. REMOVE REAR NO. 1 SEAT PROTECTOR

a. Detach the 10 claws and remove the 2 seat protectors.

9. REMOVE REAR NO. 2 SEAT PROTECTOR

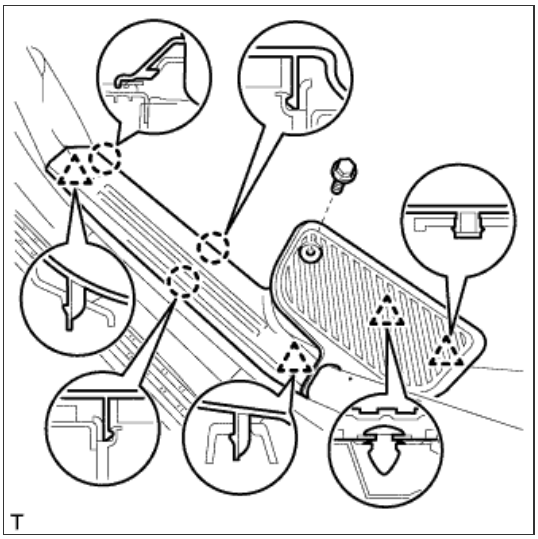
a. Detach the 10 claws and remove the 2 seat protectors.



10. REMOVE REAR STEP COVER

HINT:

Use the same procedure to remove the step cover on the other side.



a. Detach the 2 claws and remove the step cover.

11. REMOVE REAR DOOR SCUFF PLATE LH

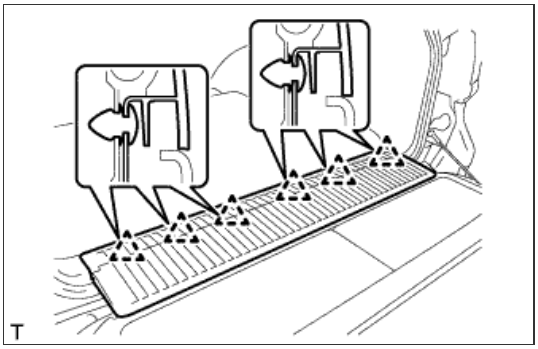
a. Remove the screw.

b. Detach the 3 claws and 4 clips, and remove the scuff plate.

12. REMOVE REAR DOOR SCUFF PLATE RH

HINT:

Use the same procedures described for the side.



13. REMOVE REAR NO. 2 SEAT ASSEMBLY

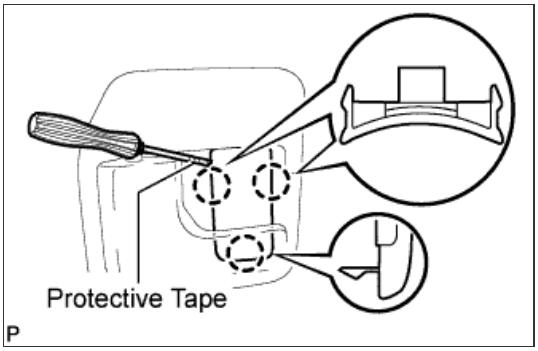
a. for Face to Face Seat Type:
Remove the rear o. 2 seat assembly (Click here).

b. except Face to Face Seat Type:
Remove the rear o. 2 seat assembly (Click here).

14. REMOVE REAR FLOOR MAT REAR SUPPORT PLATE

a. Detach the 6 clips and remove the support plate.

15. REMOVE REAR SEAT COVER CAP (w/ Rear No. 2 Seat, except Face to Face Seat Type)



HINT:

Use the same procedure to remove the rear seat cover cap on the other side.

a. Using a screwdriver, detach the 3 claws and remove the rear seat cover cap.

HINT:

Tape the screwdriver tip before use.

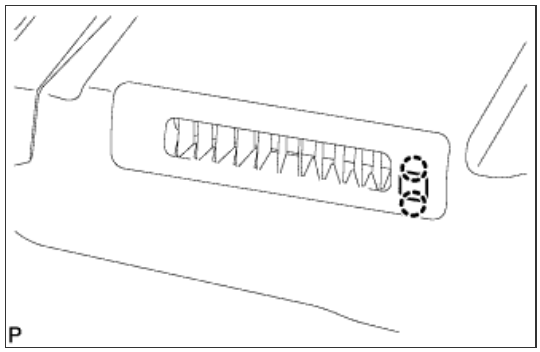
16. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY LH

a. w/ Sliding Roof:
Remove the front uarter trim panel assembly (Click here).

b. w/o Sliding Roof:
Remove the front uarter trim panel assembly (Click here).

17. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY RH

a. w/ Sliding Roof:
Remove the front uarter trim panel assembly RH (Click here).



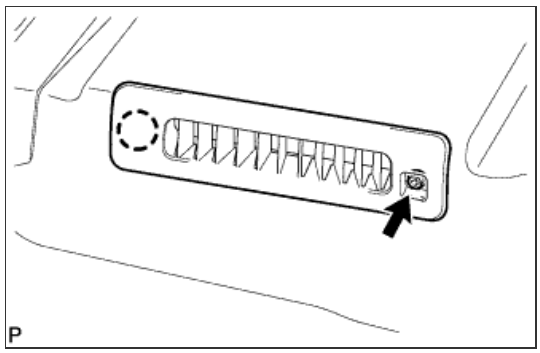
b. w/o Sliding Roof:
Remove the front uarter trim panel assembly RH (Click here).

18. REMOVE AIR DUCT PLUG (w/ Rear Air Conditioning System)

a. Detach the 2 claws and remove the plug.

HINT:

Use the same procedures for both sides.



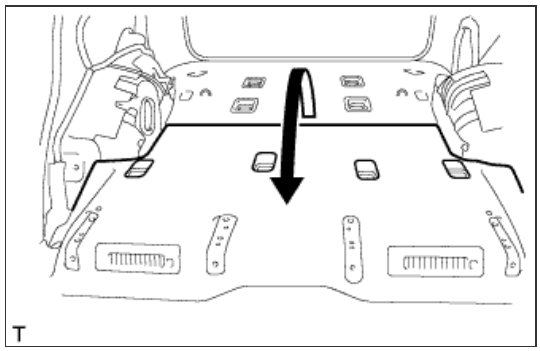
19. REMOVE REAR AIR DUCT GUIDE (w/ Rear Air Conditioning System)

a. Remove the screw.

b. Detach the claw and remove the guide.

HINT:

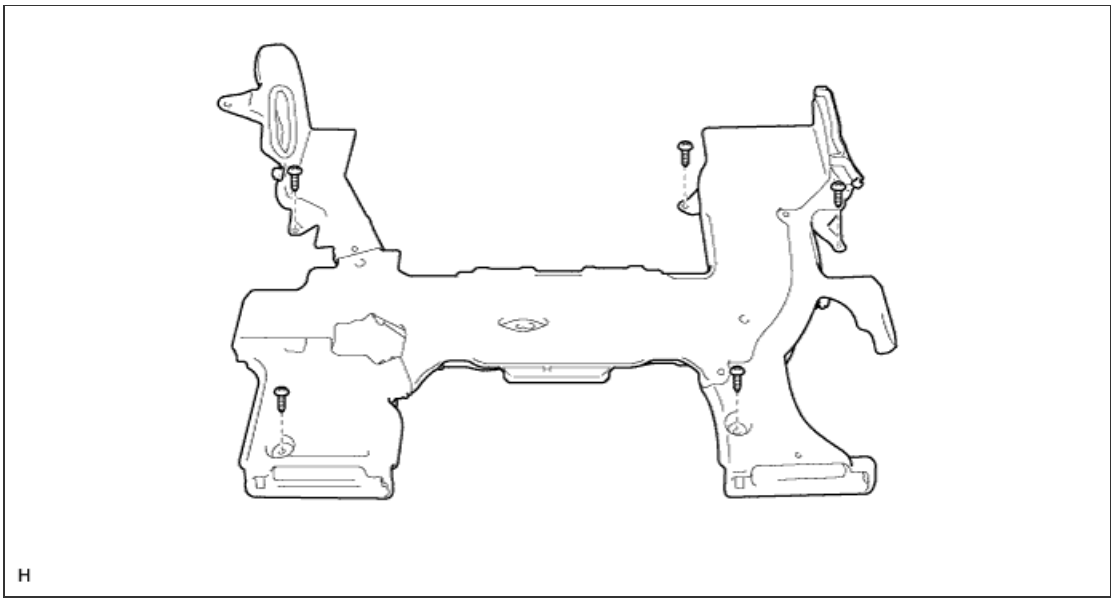
Use the same procedures for both sides.



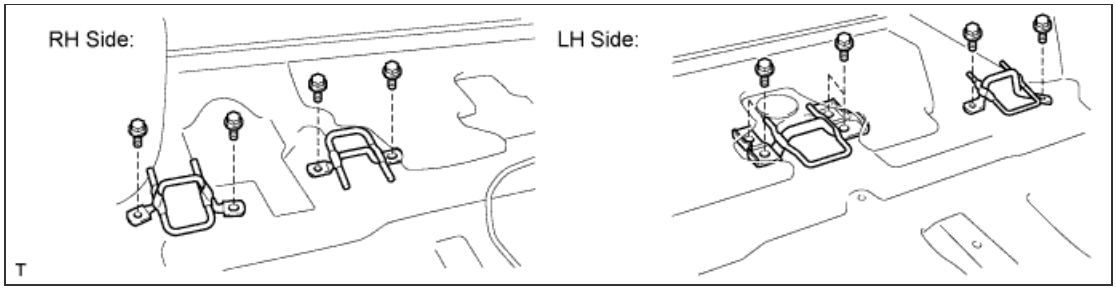
20. REMOVE FRONT FLOOR CARPET ASSEMBLY

a. Fold back the floor carpet.

HINT:



Fold back the carpet until it is possible to remove the rear o. 6 air duct.



21. REMOVE REAR NO. 6 AIR DUCT (w/ Rear Air Conditioning System)

a. Disconnect the 2 connectors.

b. Remove the 5 screws and duct.

22. REMOVE REAR SEAT CUSHION LOCK STRIKER SUB-ASSEMBLY

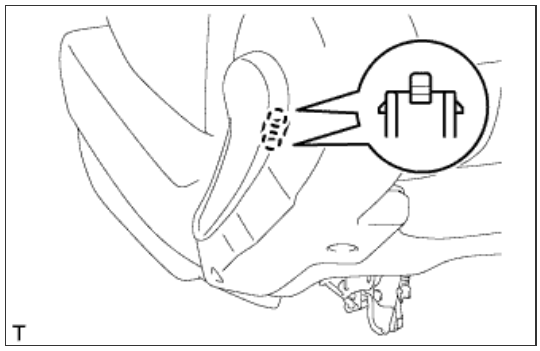
a. Remove the 10 bolts and 4 lock strikers.

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

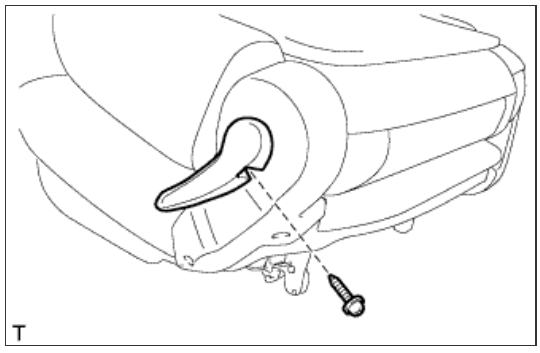
HINT:



- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. REMOVE SEAT ADJUSTER BOLT COVER

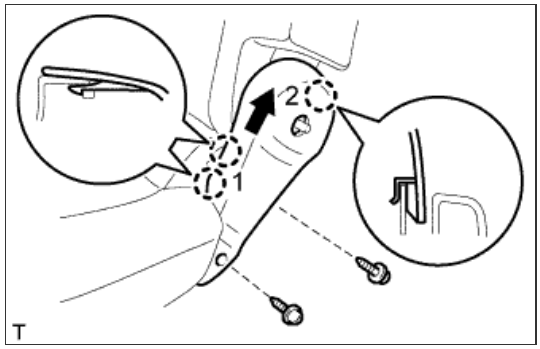
a. Using a screwdriver, detach the 2 claws and remove the cover.



HINT:

Tape the screwdriver tip before use.

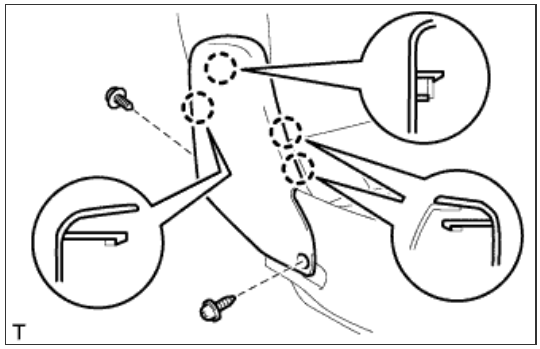
2. REMOVE RECLINING ADJUSTER RELEASE HANDLE LH



a. Remove the screw and release handle.

3. REMOVE REAR NO. 1 SEAT RECLINING COVER LH

a. Remove the 2 screws.

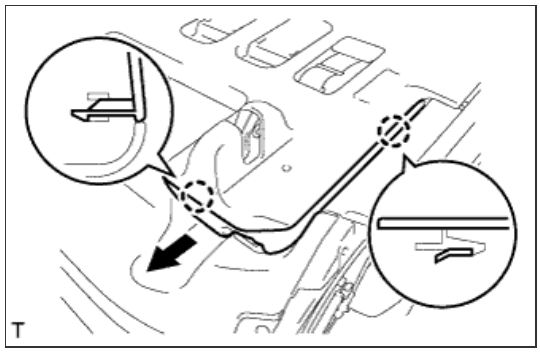


b. Detach the claws in the order shown in the illustration, and then remove the cover.

4. REMOVE REAR NO. 1 SEAT RECLINING COVER RH

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.

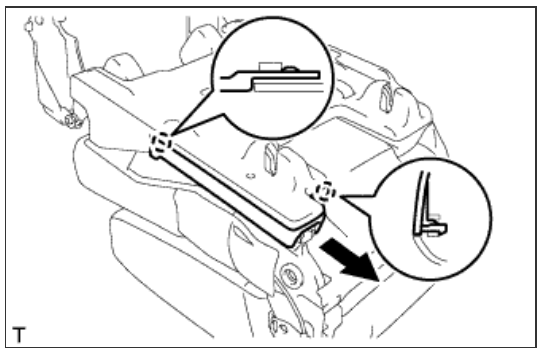


5. REMOVE UPPER SEAT TRACK RAIL COVER LH

a. Using a screwdriver, detach the 2 claws and remove the cover.

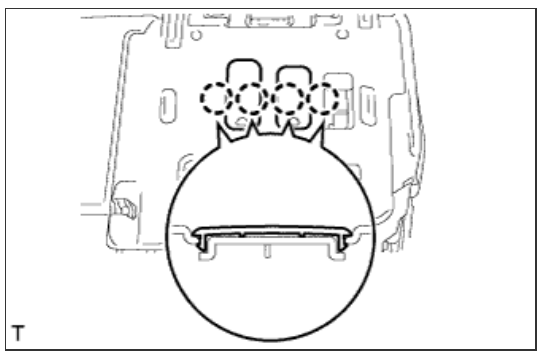
HINT:

Tape the screwdriver tip before use.



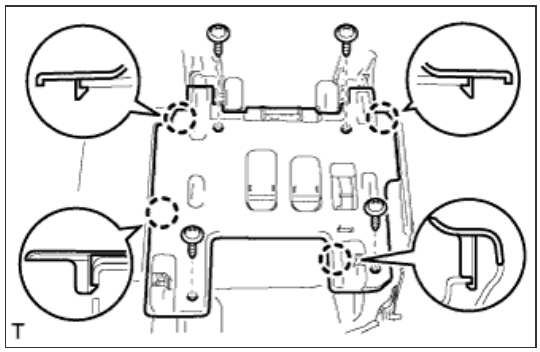
6. REMOVE UPPER SEAT TRACK RAIL COVER RH

a. Using a screwdriver, detach the 2 claws and remove the cover.



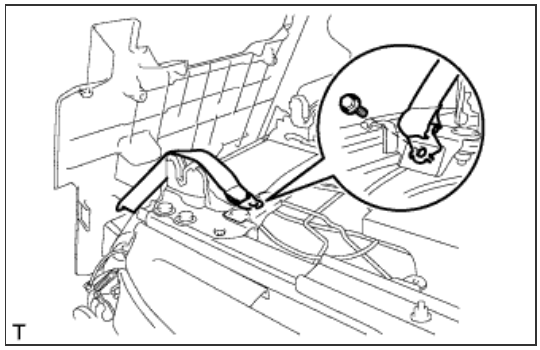
HINT:

Tape the screwdriver tip before use.



7. REMOVE NO. 1 SEAT CUSHION COVER

a. Detach the 4 claws and remove the 2 covers.

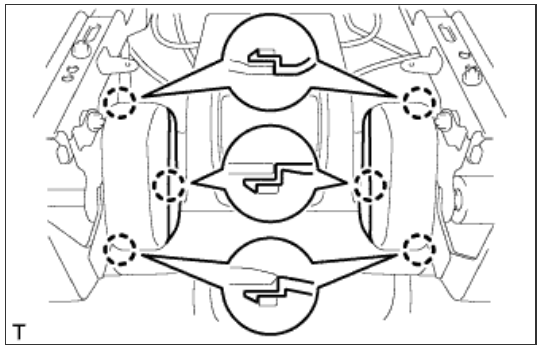


8. REMOVE REAR NO. 2 SEAT LEG SIDE COVER

a. Remove the 4 screws and detach the 4 claws.

b. Remove the bolt that is securing the fold seat stopper band and remove the seat leg side cover together with the fold seat stopper band.

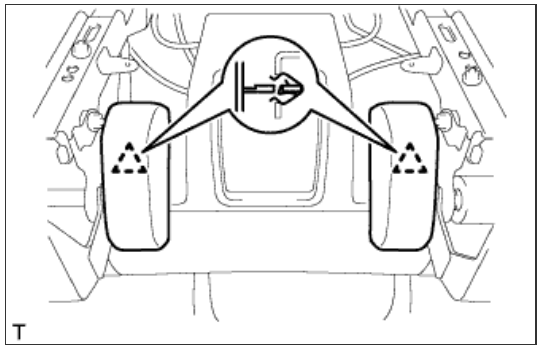
9. REMOVE FOLD SEAT STOPPER BAND ASSEMBLY



a. Remove the fold seat stopper band from the seat leg side cover.

10. REMOVE REAR SEAT SIDE HINGE FEMALE COVER

a. Using a screwdriver, detach the 6 claws and remove the 2 covers.

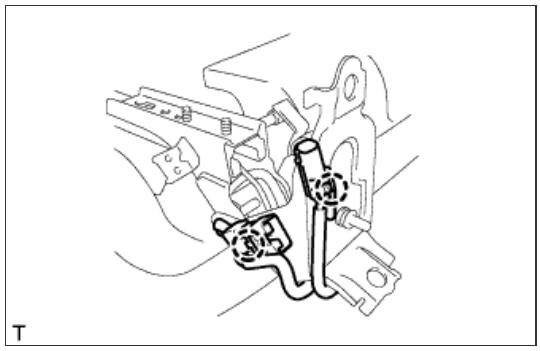


HINT:

Tape the screwdriver tip before use.

11. REMOVE REAR SEAT SIDE HINGE MALE COVER LH

a. Detach the clip and remove the cover.

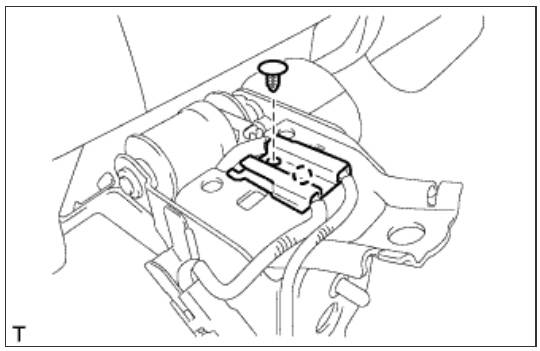


12. REMOVE REAR SEAT SIDE HINGE MALE COVER RH

a. Detach the clip and remove the cover.

13. REMOVE REAR NO. 2 SEAT PROTECTOR

a. w/ Rear Seat Side Airbag:
Detach the claw and remove the wire harness connector.

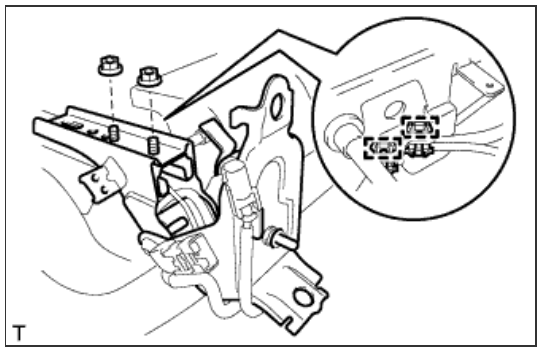


b. w/ Seat Heater System:
Detach the claw and remove the wire harness connector.

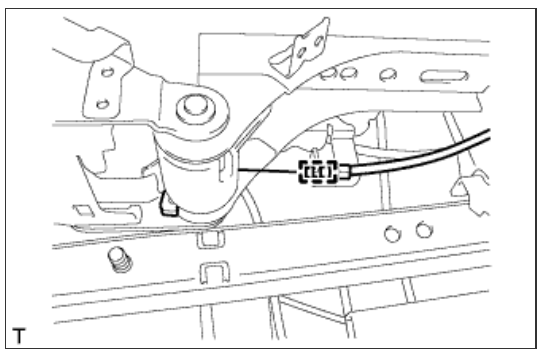
c. Using a clip remover, remove the clip.

d. Detach the claw and remove the seat protector from the seat hinge.

e. Detach the 2 claws, open the protector and remove wire harness.



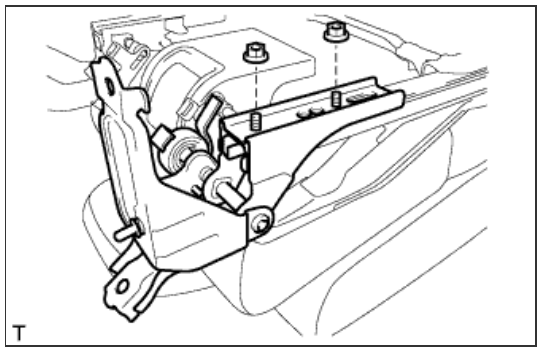
14. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH



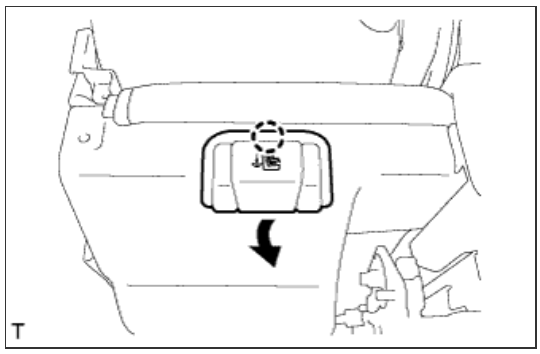
a. w/ Rear Seat Side Airbag:
Detach the wire harness clamp.

b. w/ Seat Heater System:
Detach the wire harness clamp.

c. Remove the 2 nuts and hinge.

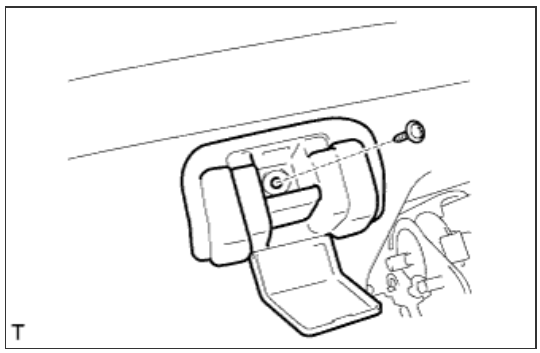


d. Detach the cable clamp and disconnect the cable.



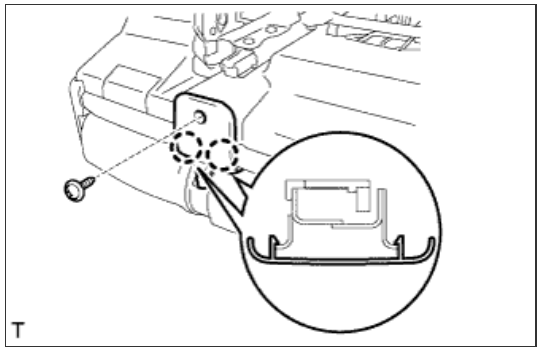
15. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH

a. Remove the 2 nuts and hinge.



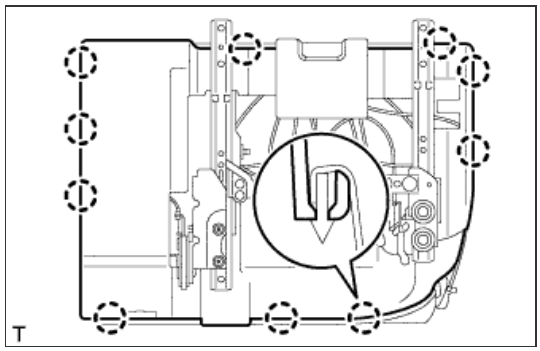
16. REMOVE SEAT BELT ANCHOR COVER CAP

a. Detach the claw and open the cap.



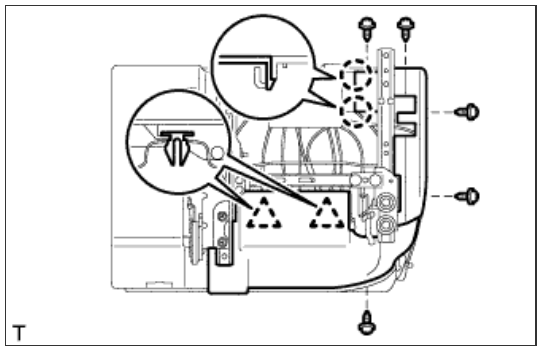
b. Remove the screw and anchor cover cap.

17. REMOVE REAR SEATBACK STAY COVER LH



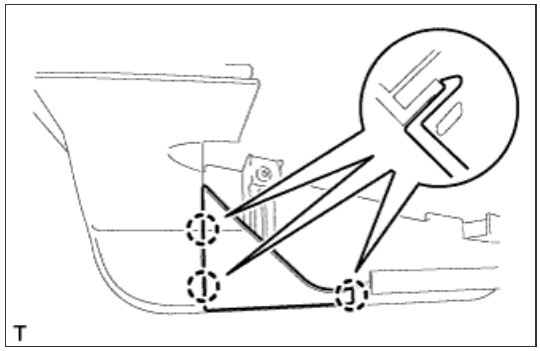
a. Remove the screw.

b. Detach the 2 claws and remove the cover.



18. REMOVE REAR UNDER SIDE COVER LH

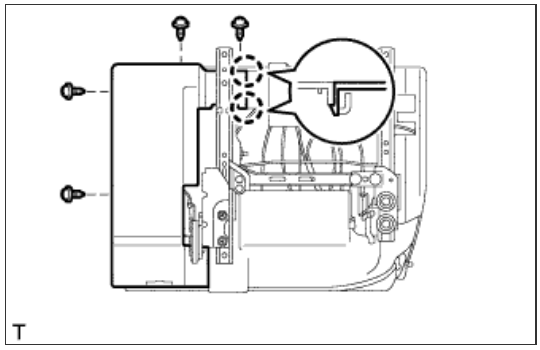
a. Detach the 10 claws.



b. Remove the 5 screws.

c. Detach the 2 clips and 2 claws, and remove the cover.

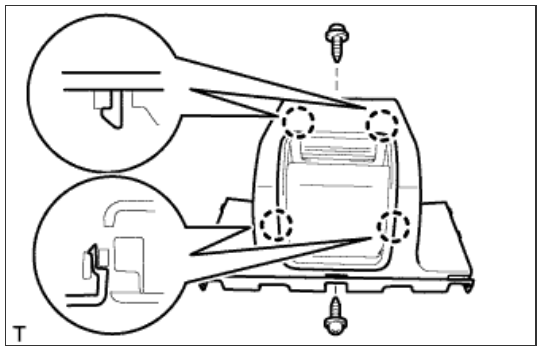
19. REMOVE NO. 1 SEAT CUSHION PLATE



a. Detach the claws and remove the seat cushion plate.

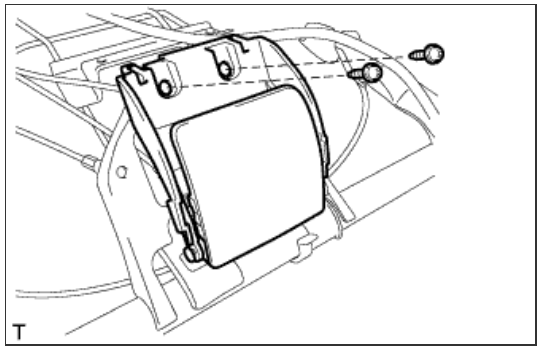
20. REMOVE REAR SEAT CUSHION COVER RH

a. Remove the 4 screws.



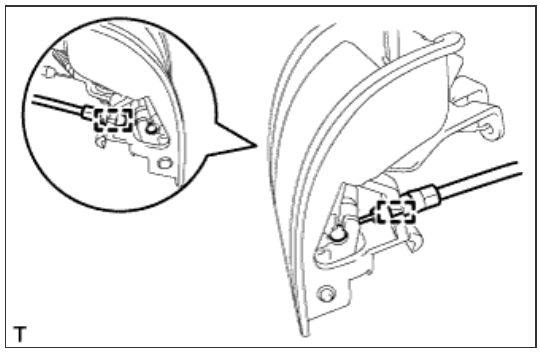
b. Detach the 2 claws and remove the cover.

21. REMOVE REAR SEAT UNDER TRAY COVER LH

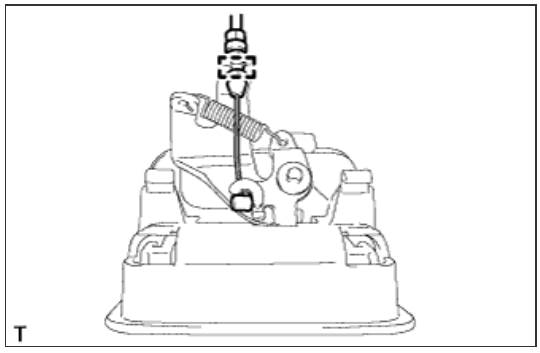


a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.



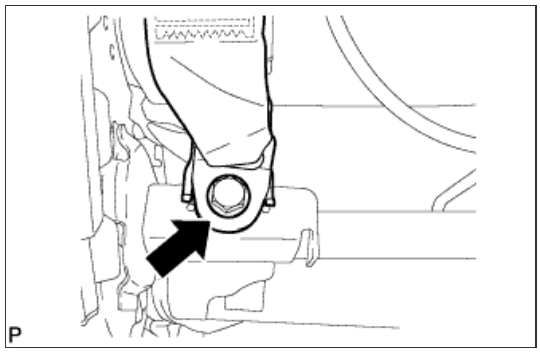
22. REMOVE REAR SEAT TRACK HANDLE SUB-ASSEMBLY



a. Remove the 2 screws and seat track handle.

b. Detach the 2 cable clamps and disconnect the 2 cables.

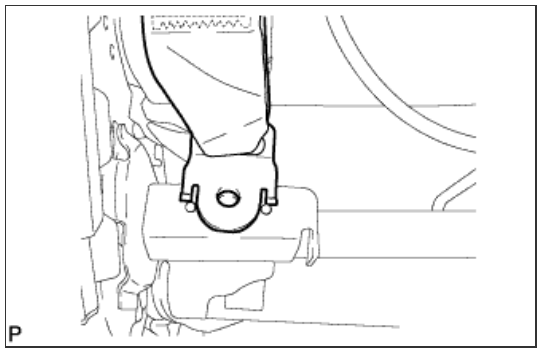
c. Detach the cable clamp and disconnect the cable.



23. REMOVE FOLD SEAT LOCK CONTROL CABLE SUB-ASSEMBLY

24. REMOVE REAR NO. 1 SEAT INNER BELT ASSEMBLY LH

a. Remove the bolt and belt.



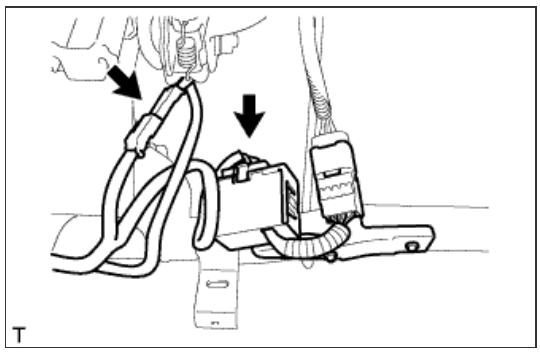
HINT:

The No. 1 seat point type belt anchor is fixed with the same bolt as the rear No. 1 seat inner belt LH. Therefore, it becomes disconnected when the bolt is removed.

25. DISCONNECT NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

a. Disconnect the belt anchor.

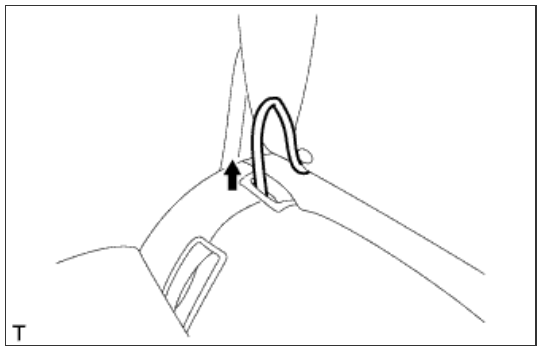
26. REMOVE SEAT CUSHION COVER WITH PAD



a. w/ Rear Seat Side Airbag:

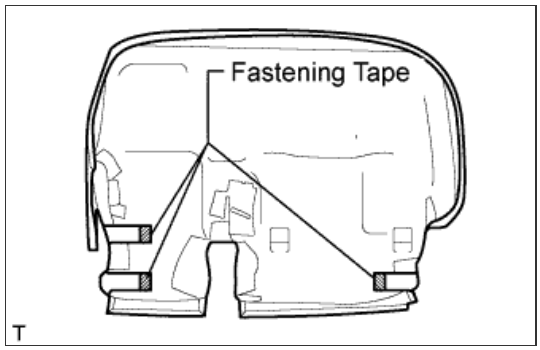
i. Detach the side airbag wire harness clamps.

ii. Remove the side airbag wire harness through the hole in the seat cushion.



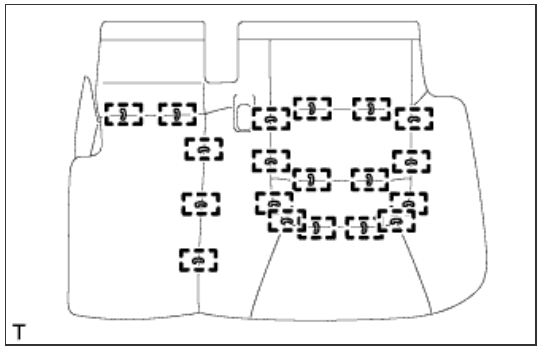
b. w/ Seat Heater System:

i. Disconnect the 2 seat heater connectors.



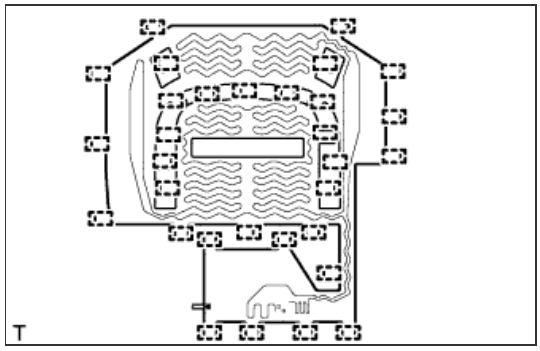
ii. Remove the seatback heater wire harness through the hole in the seat cushion.

c. Remove the seat cushion cover with pad.



27. REMOVE REAR SEPARATE TYPE SEAT CUSHION COVER

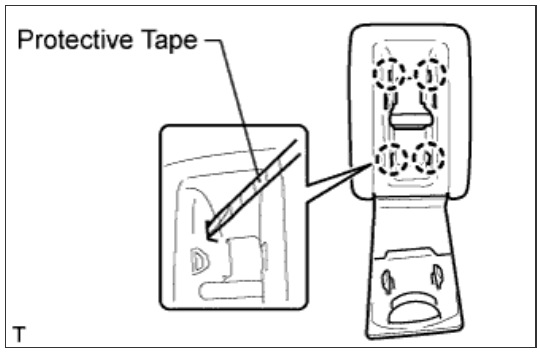
a. Detach the pieces of fastening tape.



b. Remove the hog rings and cover.

28. REMOVE REAR SEAT CUSHION HEATER ASSEMBLY (w/ Seat Heater System)

a. ut off the tack pins which fasten the seat heater to the seat cushion cover, and then remove the seat cushion heater from the seat cushion cover.

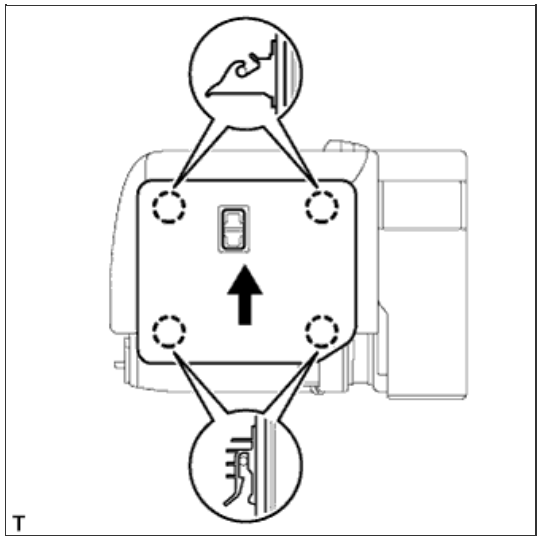


29. REMOVE REAR SEATBACK COVER

a. Using a screwdriver, detach the 4 claws and remove the cover.

HINT:

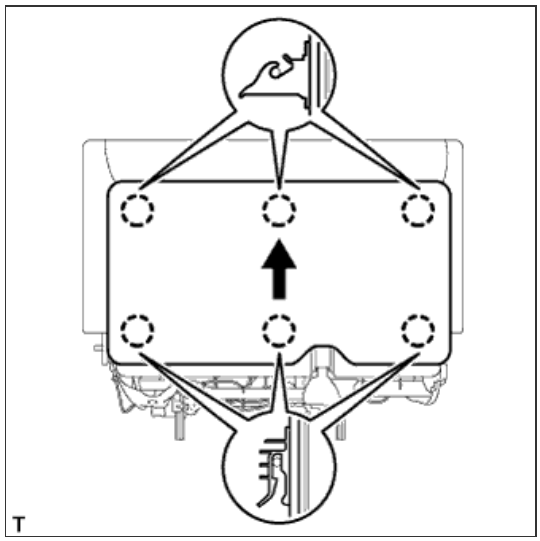
Tape the screwdriver tip before use.



30. REMOVE REAR SEATBACK BOARD SUB-ASSEMBLY LH

a. w/ enter Armrest:

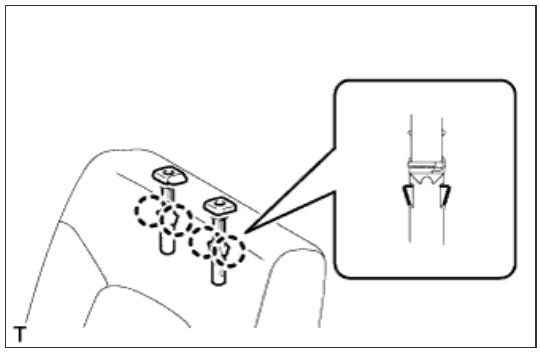
i. Detach the 2 claws on the top of the board.



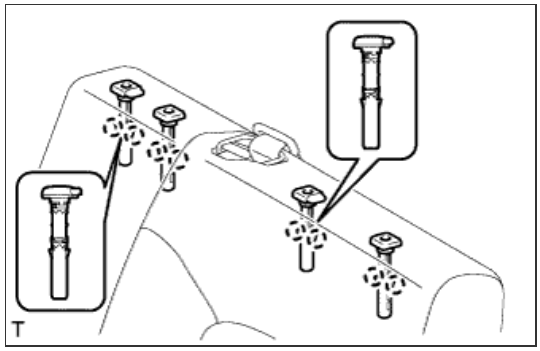
ii. ull up the board to detach the 2 claws on the bottom of the board and remove it.

b. w/o enter Armrest:

i. Detach the claws on the top of the board.



ii. ull up the board to detach the claws on the bottom of the board and remove it.

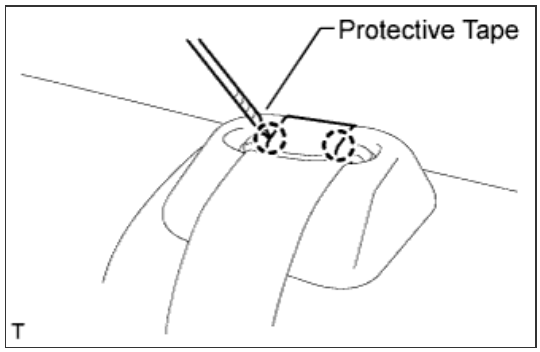


31. REMOVE REAR SEAT HEADREST ASSEMBLY

32. REMOVE REAR NO. 1 SEAT HEADREST SUPPORT ASSEMBLY

a. w/ enter Armrest:
Detach the 4 claws and remove the 2 supports.

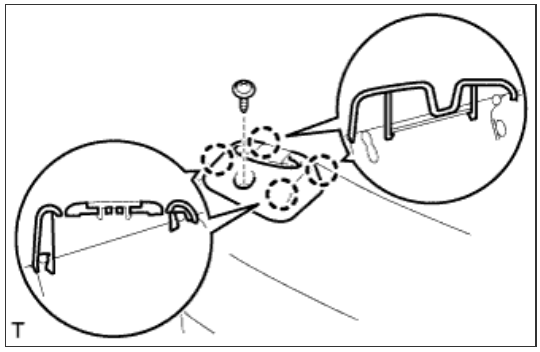
b. w/o enter Armrest:
Detach the 8 claws and remove the 4 supports.



33. REMOVE SHOULDER BELT ANCHOR COVER

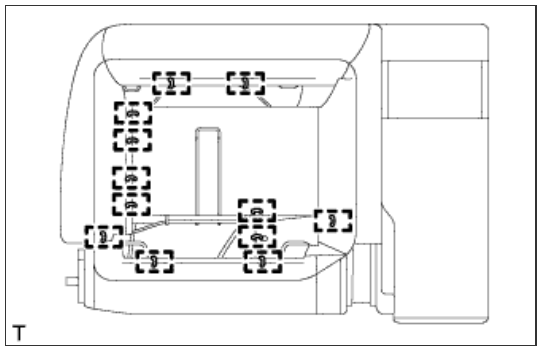
a. Using a screwdriver, detach the 2 claws and remove the cover.

HINT:



Tape the screwdriver tip before use.

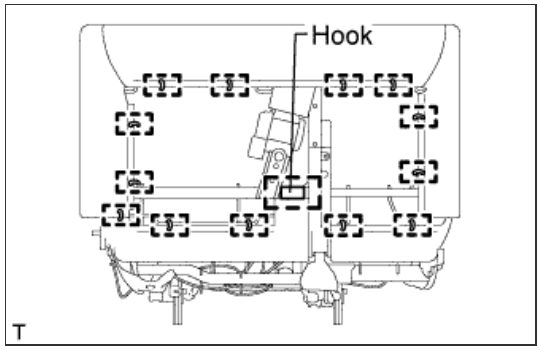
34. REMOVE REAR SEAT BELT HOLE COVER LH



a. Remove the screw.

b. Detach the 4 claws and remove the cover.

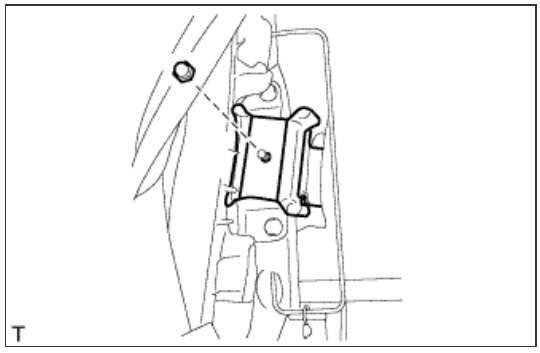
35. REMOVE SEATBACK COVER WITH PAD



a. w/ enter Armrest:
Remove the hog rings.

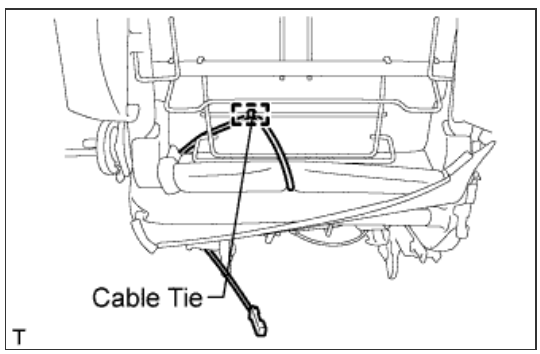
b. w/o enter Armrest:

i. Remove the hog rings.



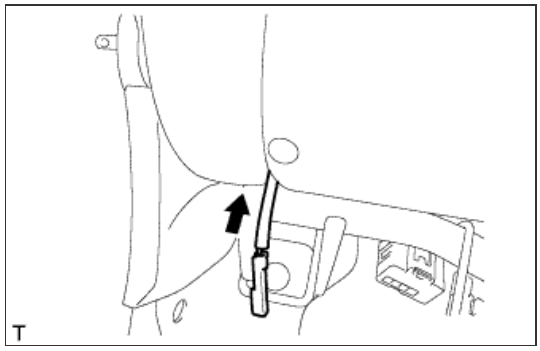
ii. Detach the hook.

c. w/ Rear Seat Side Airbag:

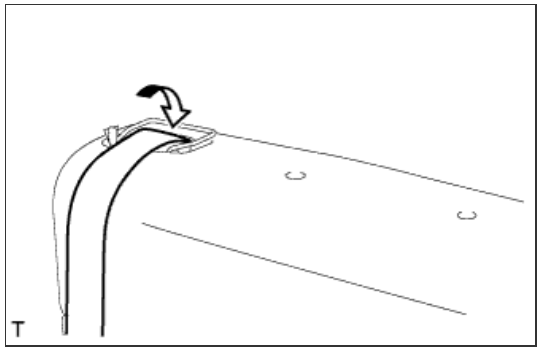


i. Remove the cap nut and seatback cover bracket from the seat frame.

ii. Remove the side airbag wire harness through the hole in the seatback.

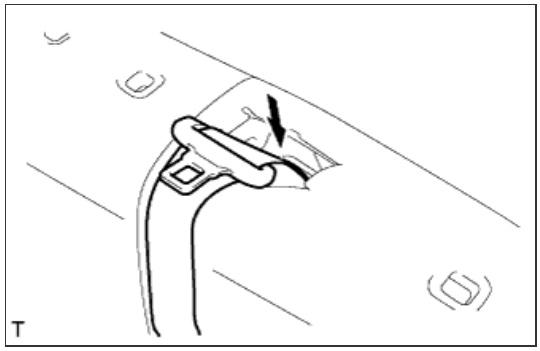


d. w/ Seat Heater System:

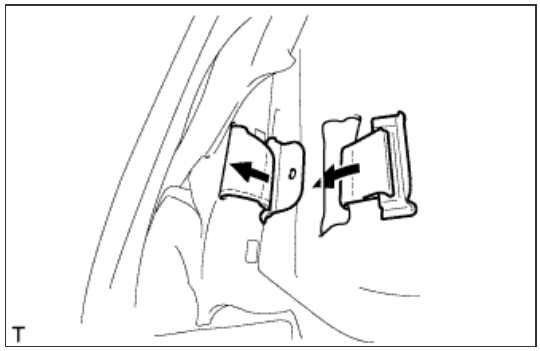


i. ut the cable tie and disconnect the seatback heater wire harness.

ii. Remove the seatback heater wire harness through the hole in the seatback.

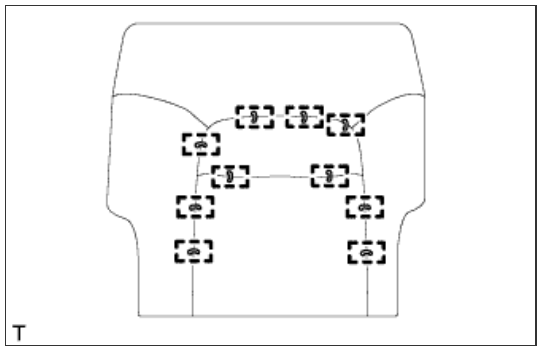


e. w/ enter Armrest:
ull the seat belt into the inside of the seat.

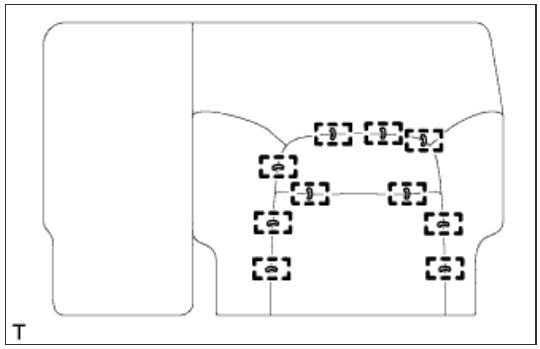


f. w/o enter Armrest:
ull the seat belt into the inside of the seat.

g. Remove the seatback cover with pad.

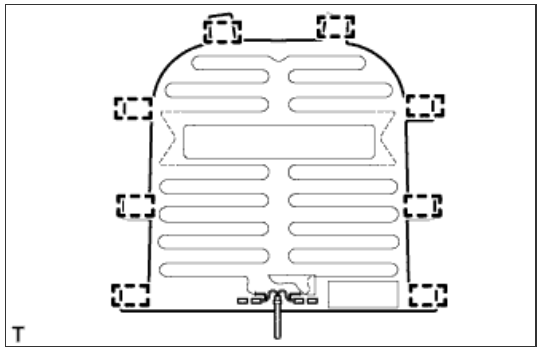


36. REMOVE REAR SEPARATE TYPE SEATBACK COVER



a. w/ Rear Seat Side Airbag:
Disconnect the seatback cover bracket from the seatback pad.

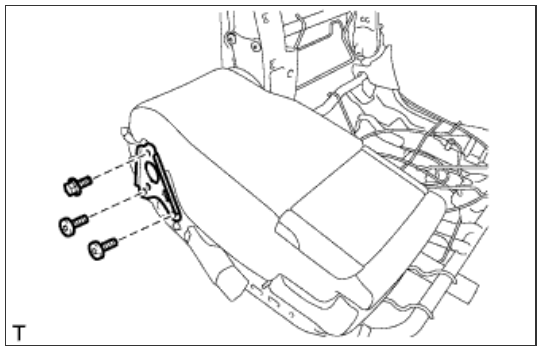
b. w/ enter Armrest:
Remove the hog rings and rear seatback cover.



c. w/o enter Armrest:
Remove the hog rings and rear seatback cover.

37. REMOVE REAR SEATBACK HEATER ASSEMBLY (w/ Seat Heater System)

a. ut off the tack pins which fasten the seatback heater to the seatback cover, and then remove the seatback heater from the seatback cover.



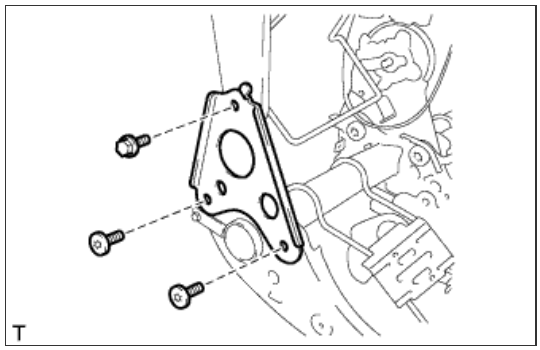
38. REMOVE SEATBACK STOPPER PLATE

a. w/ enter Armrest:

i. Using a T40 TOR socket, remove the 2 bolts.

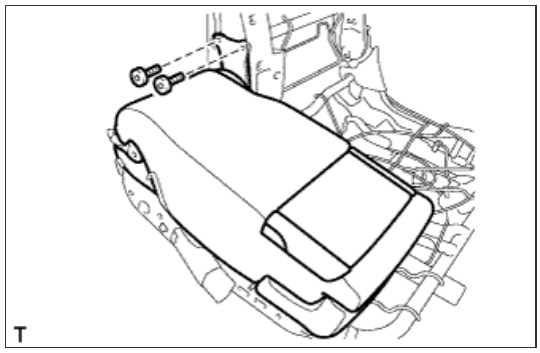
ii. Remove the bolt and stopper plate.

iii. Remove the bush from the stopper plate.



b. w/o enter Armrest:

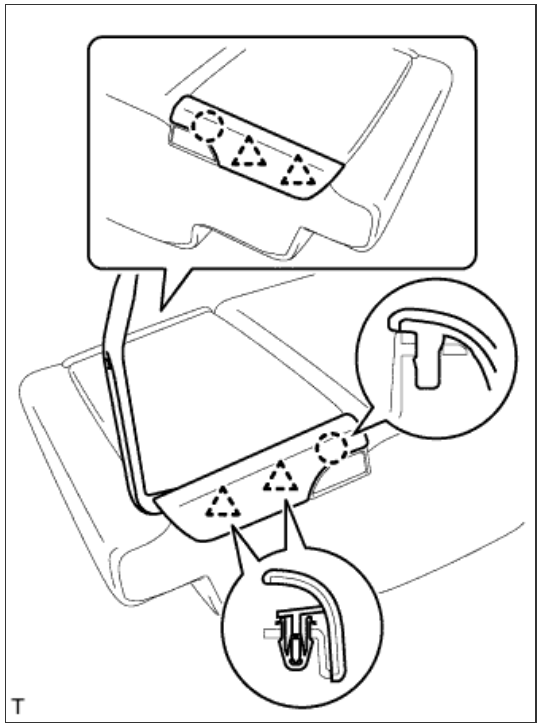
i. Using a T40 TOR socket, remove the 2 bolts.



ii. Remove the bolt and stopper plate.

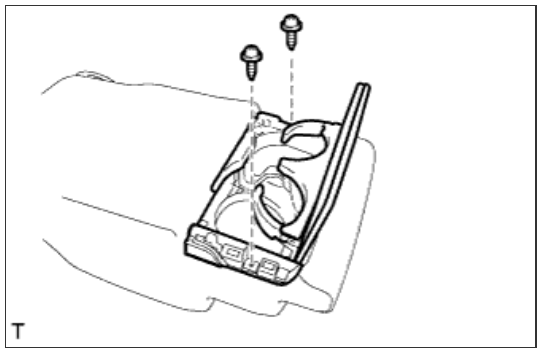
iii. Remove the bush from the stopper plate.

39. REMOVE REAR CENTER SEAT ARMREST ASSEMBLY (w/ Center Armrest)



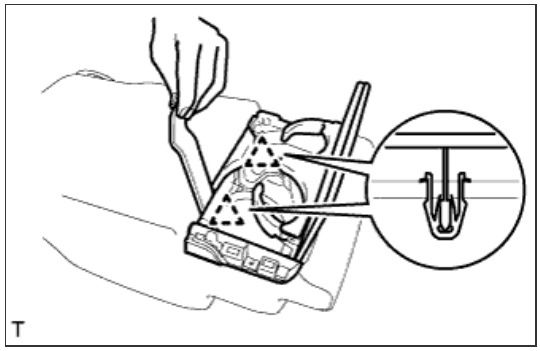
a. Using a T40 TOR socket, remove the 2 bolts and center seat armrest.

40. REMOVE REAR CENTER SEAT HEADREST ASSEMBLY (w/ Center Armrest)



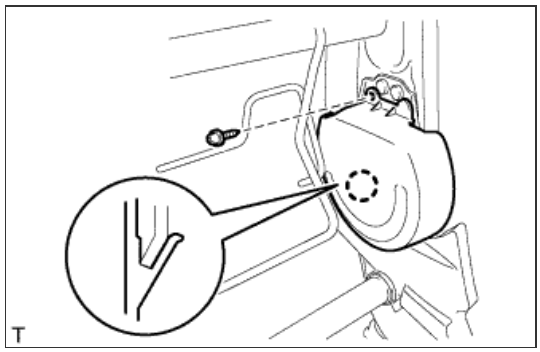
41. REMOVE NO. 1 SEAT ARMREST PLATE (w/ Center Armrest)

a. Using a moulding remover, detach the 4 clips and 2 claws, and then remove the 2 armrest plates.



42. REMOVE CUP HOLDER ASSEMBLY (w/ Center Armrest)

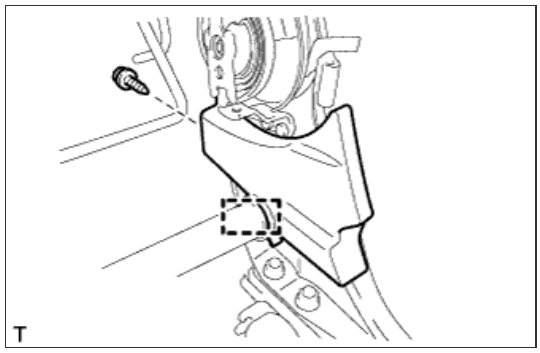
a. Remove the 2 screws.



b. Using a moulding remover, detach the 2 clips and remove the cup holder.

43. REMOVE REAR SEAT RECLINING COVER LH

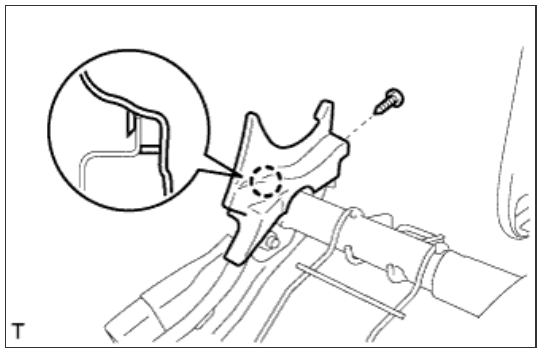
a. Remove the screw.



b. Detach the claw and remove the cover.

44. REMOVE REAR NO. 2 SEAT RECLINING COVER LH

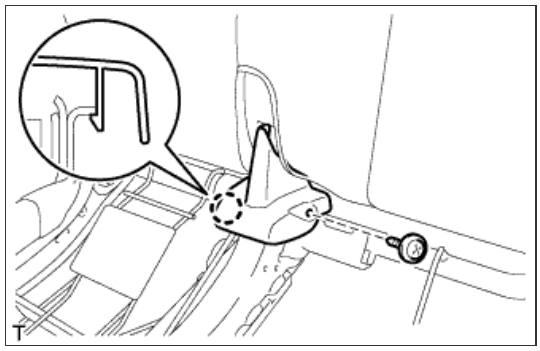
a. Remove the screw.



b. Detach the clamp and remove the cover.

45. REMOVE REAR NO. 1 SEAT RECLINING COVER RH

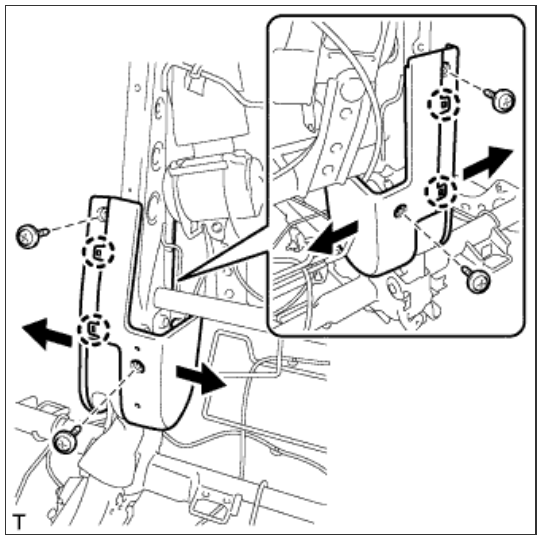
a. Remove the screw.



b. Detach the claw and remove the cover.

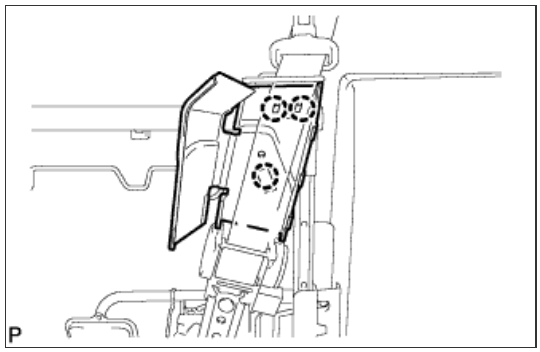
46. REMOVE REAR SEATBACK HINGE COVER LH

a. Remove the screw.



b. Detach the claw and remove the cover.

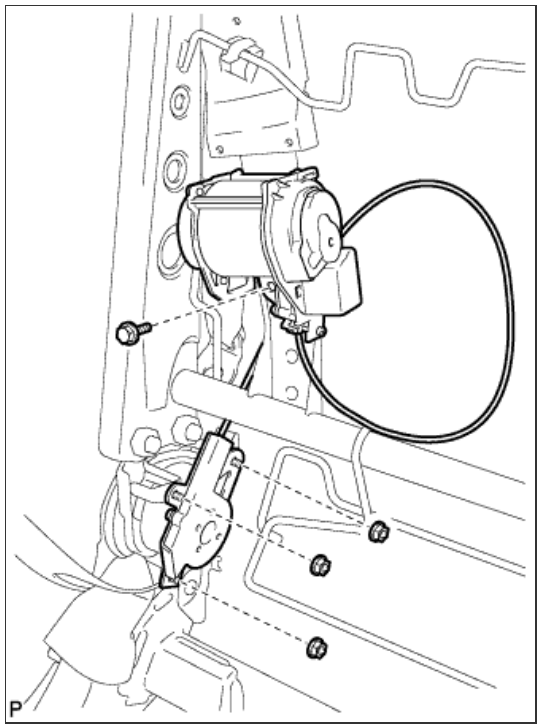
47. REMOVE REAR LOWER SEATBACK COVER SUB-ASSEMBLY LH



a. Remove the 4 screws.

b. Detach the 4 claws and remove the cover.

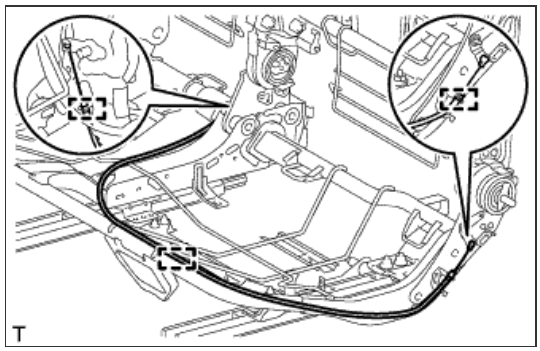
48. REMOVE REAR SEAT SHOULDER BELT HOLE COVER LH



a. Using a screwdriver, detach the claws and remove the shoulder belt hole cover.

49. REMOVE NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

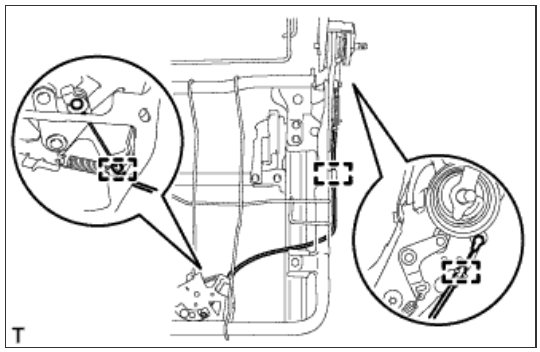
a. Remove the nuts and belt sensor.



b. Remove the nut and then remove the outer belt.

50. REMOVE RECLINING ADJUSTING CABLE ASSEMBLY LH

a. Detach the 2 cable clamps and disconnect the cable.

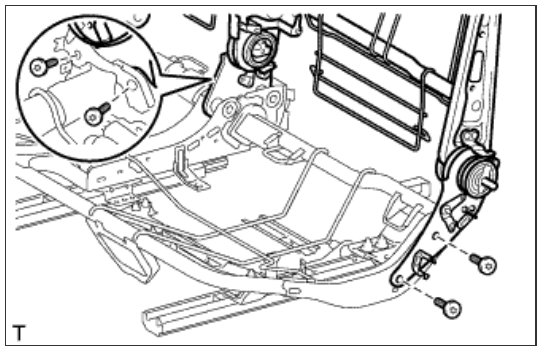


b. Detach the clamp and remove the adjusting cable.

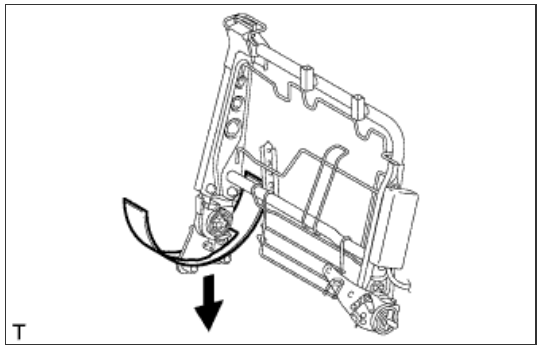
51. REMOVE NO. 2 FOLD SEAT LOCK CONTROL CABLE ASSEMBLY

a. Detach the 2 cable clamps and disconnect the cable.

b. Detach the clamp and remove the lock control cable.



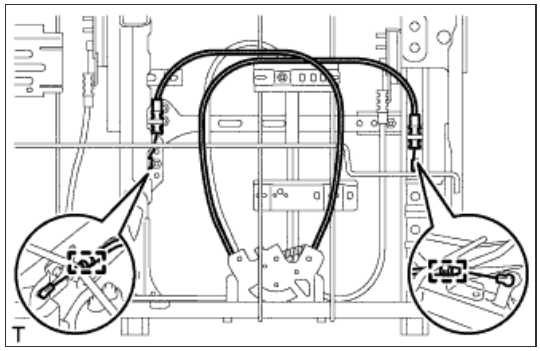
52. REMOVE REAR SEATBACK FRAME SUB-ASSEMBLY LH



a. LH Side:
Using a T40 TOR socket, remove the 2 bolts.

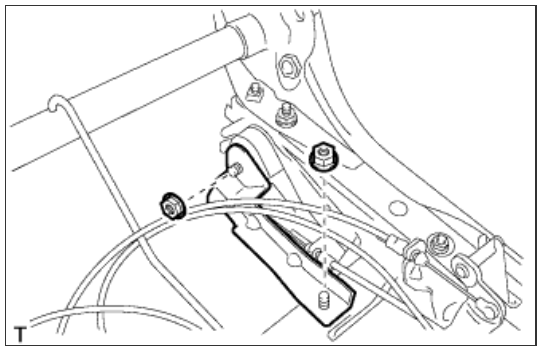
b. RH Side:
Using a T55 TOR socket, remove the 2 bolts.

c. Remove the seatback frame sub assembly.



d. Remove the lower seatback cover.

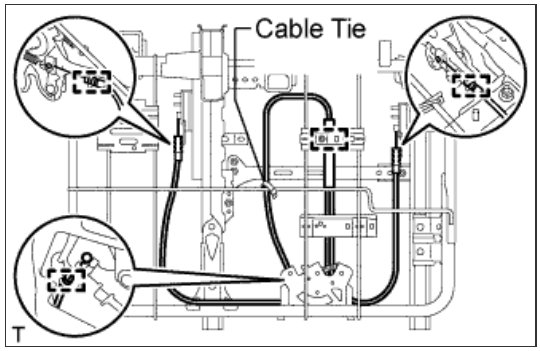
53. REMOVE FOLD SEAT LOCK CONTROL CABLE SUB-ASSEMBLY



a. Detach the 2 cable clamps and disconnect the 2 cables.

b. Remove the 2 fold seat lock cables.

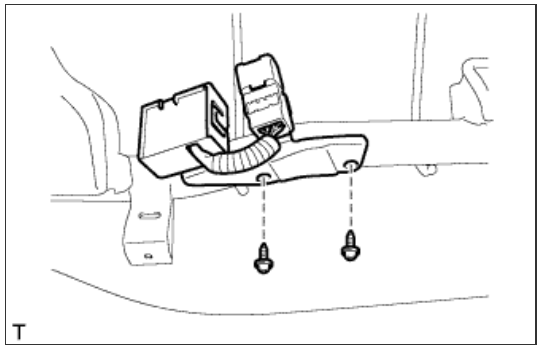
54. REMOVE REAR NO. 1 SEAT LOCK CABLE ASSEMBLY



a. Remove the 2 nuts and lower seat track bracket.

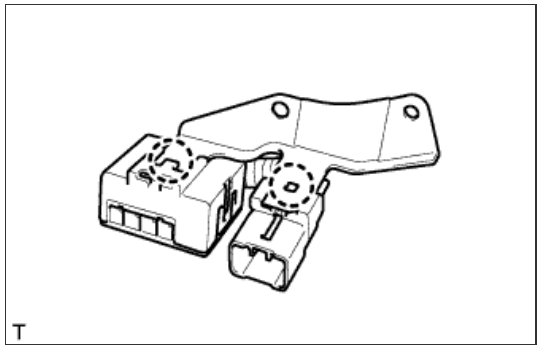
b. ut the cable tie and disconnect the cable.

c. Detach the cable clamps and disconnect the cables.



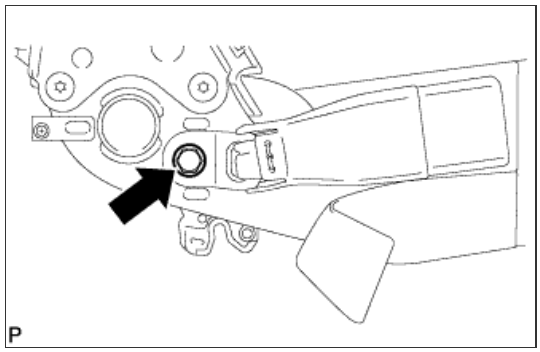
d. Detach the clamp and remove the seat lock cable.

55. REMOVE REAR SEAT CUSHION HOLDER BRACKET LH (w/ Seat Heater System)



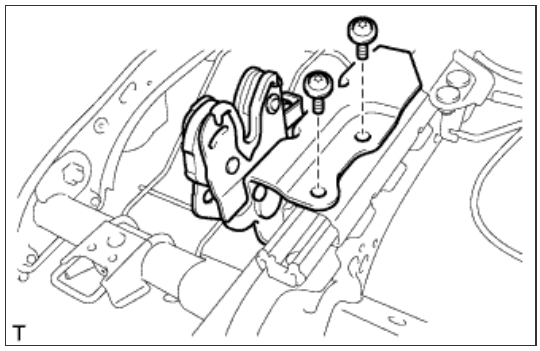
a. Disconnect the seat wire connector.

b. Remove the 2 screws and holder bracket.



56. REMOVE SEAT HEATER CONTROL SUB-ASSEMBLY LH (w/ Seat Heater System)

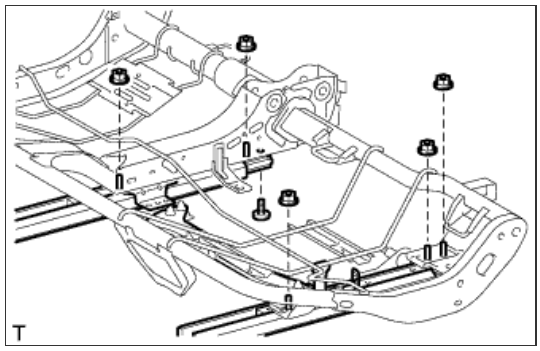
a. Detach the 2 claws and remove the seat heater control.



57. REMOVE REAR SEAT INNER BELT ASSEMBLY

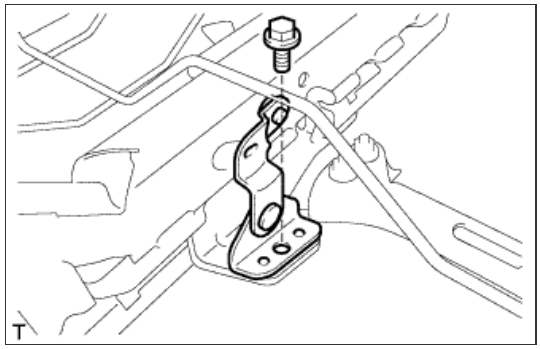
a. Remove the bolt and belt.

58. REMOVE NO. 1 SEAT LEG ASSEMBLY LH



a. Using a T40 TOR socket, remove the 2 bolts and seat leg assembly.

59. REMOVE REAR SEAT CUSHION FRAME SUB-ASSEMBLY LH



a. Using a T40 TOR socket, remove the bolt.

b. Remove the 5 nuts and seat cushion frame.

60. REMOVE REAR SEAT LOCK CONTROL LEVER LH

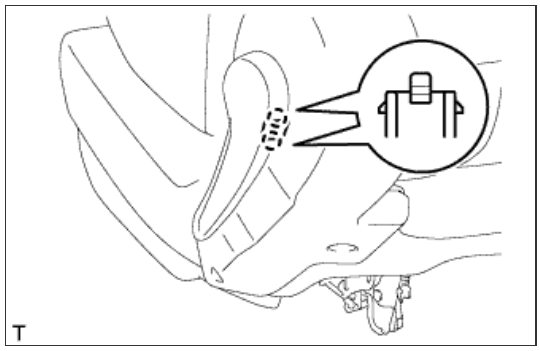
a. Remove the bolt and lock control lever.

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

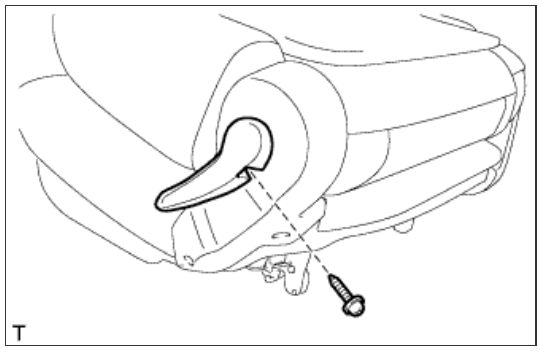
HINT:



- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. REMOVE SEAT ADJUSTER BOLT COVER

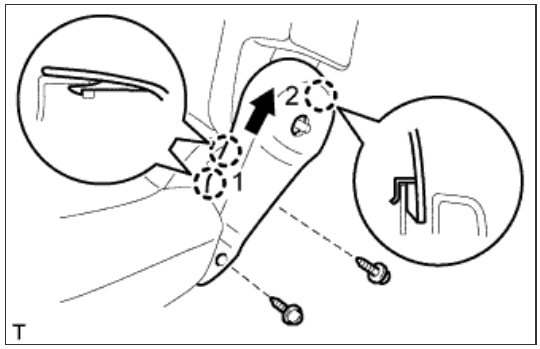
a. Using a screwdriver, detach the 2 claws and remove the cover.



HINT:

Tape the screwdriver tip before use.

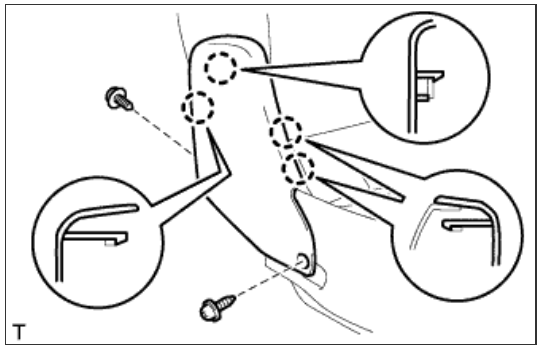
2. REMOVE RECLINING ADJUSTER RELEASE HANDLE LH



a. Remove the screw and release handle.

3. REMOVE REAR NO. 1 SEAT RECLINING COVER LH

a. Remove the 2 screws.

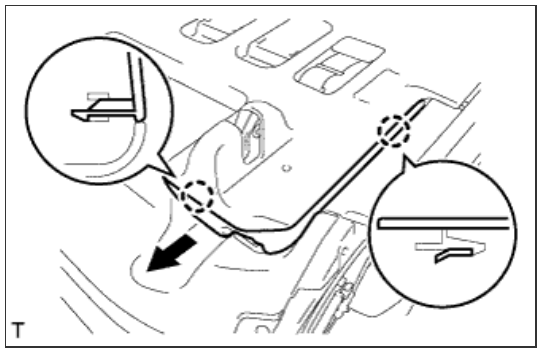


b. Detach the claws in the order shown in the illustration, and then remove the cover.

4. REMOVE REAR NO. 1 SEAT RECLINING COVER RH

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.

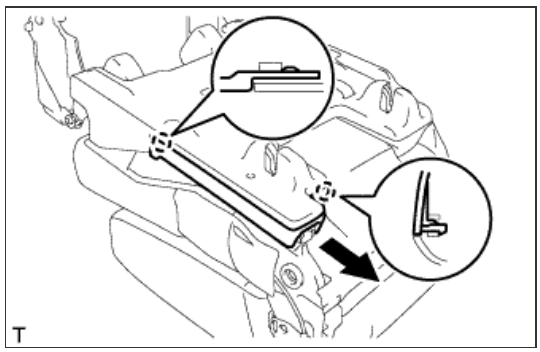


5. REMOVE UPPER SEAT TRACK RAIL COVER LH

a. Using a screwdriver, detach the 2 claws and remove the cover.

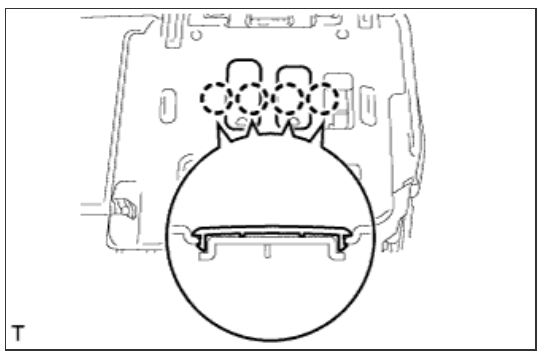
HINT:

Tape the screwdriver tip before use.



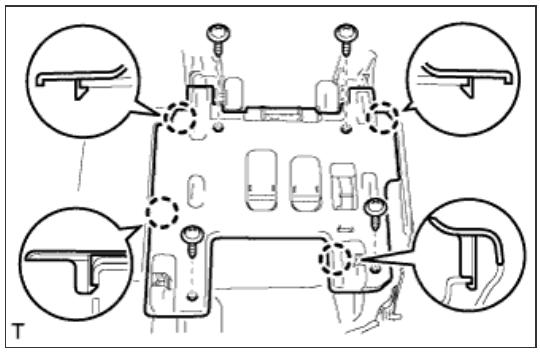
6. REMOVE UPPER SEAT TRACK RAIL COVER RH

a. Using a screwdriver, detach the 2 claws and remove the cover.



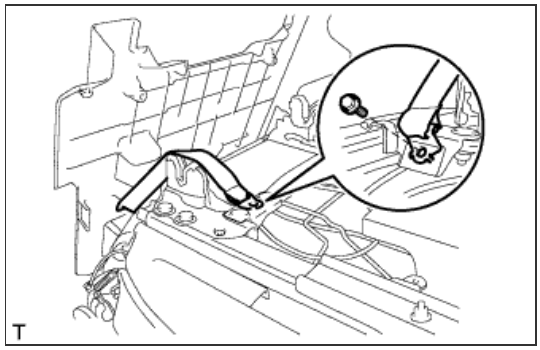
HINT:

Tape the screwdriver tip before use.



7. REMOVE NO. 1 SEAT CUSHION COVER

a. Detach the 4 claws and remove the 2 covers.

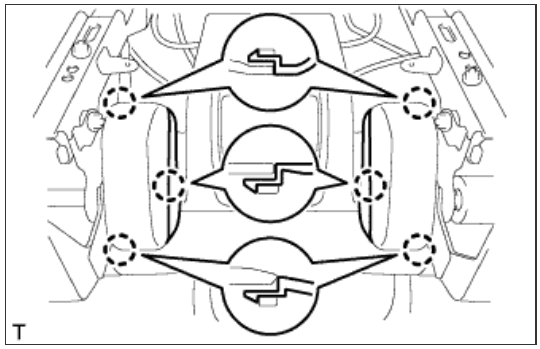


8. REMOVE REAR NO. 2 SEAT LEG SIDE COVER

a. Remove the 4 screws and detach the 4 claws.

b. Remove the bolt that is securing the fold seat stopper band and remove the seat leg side cover together with the fold seat stopper band.

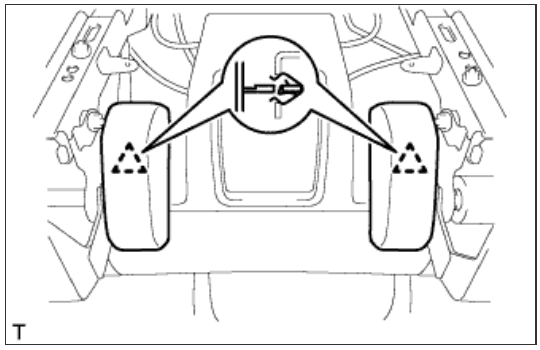
9. REMOVE FOLD SEAT STOPPER BAND ASSEMBLY



a. Remove the fold seat stopper band from the seat leg side cover.

10. REMOVE REAR SEAT SIDE HINGE FEMALE COVER

a. Using a screwdriver, detach the 6 claws and remove the 2 covers.

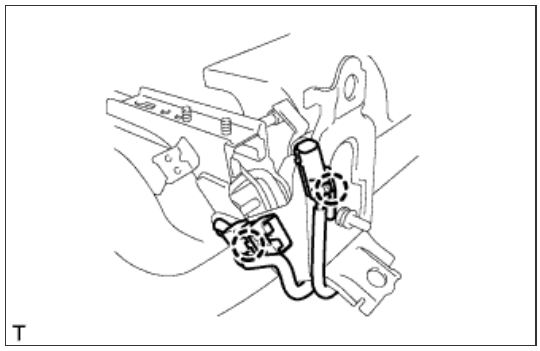


HINT:

Tape the screwdriver tip before use.

11. REMOVE REAR SEAT SIDE HINGE MALE COVER LH

a. Detach the clip and remove the cover.

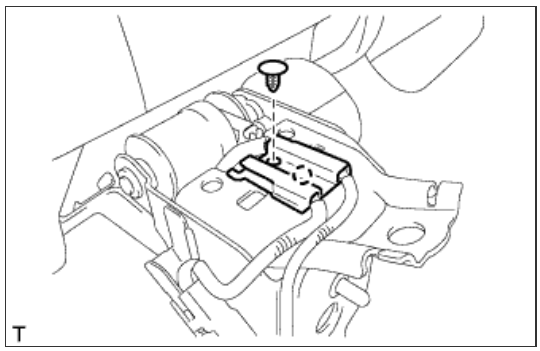


12. REMOVE REAR SEAT SIDE HINGE MALE COVER RH

a. Detach the clip and remove the cover.

13. REMOVE REAR NO. 2 SEAT PROTECTOR

a. w/ Rear Seat Side Airbag:
Detach the claw and remove the wire harness connector.

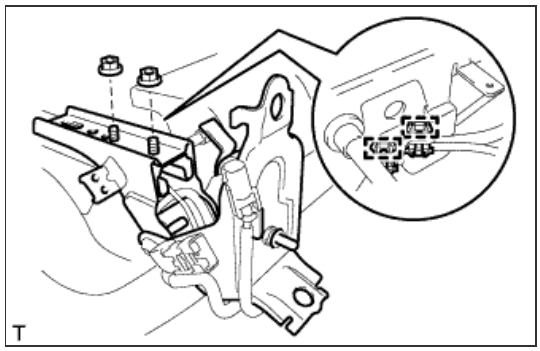


b. w/ Seat Heater System:
Detach the claw and remove the wire harness connector.

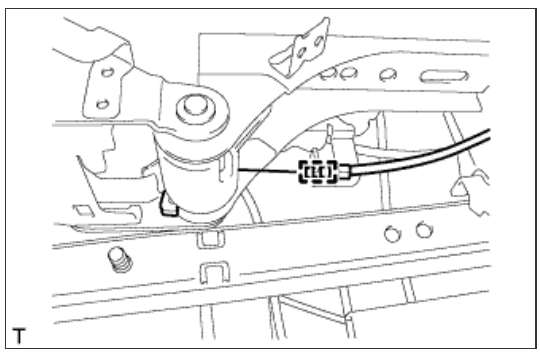
c. Using a clip remover, remove the clip.

d. Detach the claw and remove the seat protector from the seat hinge.

e. Detach the 2 claws, open the protector and remove wire harness.



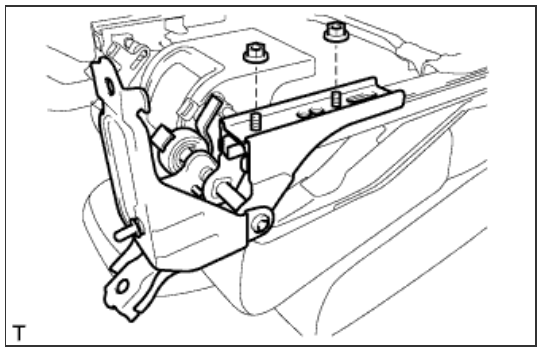
14. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH



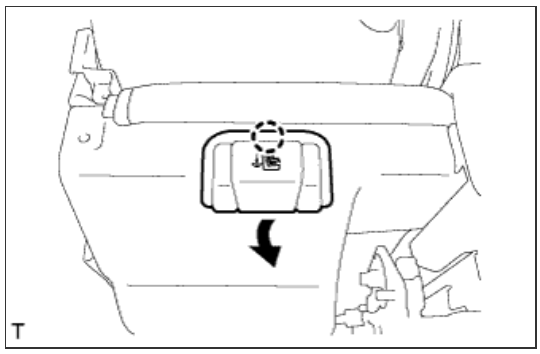
a. w/ Rear Seat Side Airbag:
Detach the wire harness clamp.

b. w/ Seat Heater System:
Detach the wire harness clamp.

c. Remove the 2 nuts and hinge.

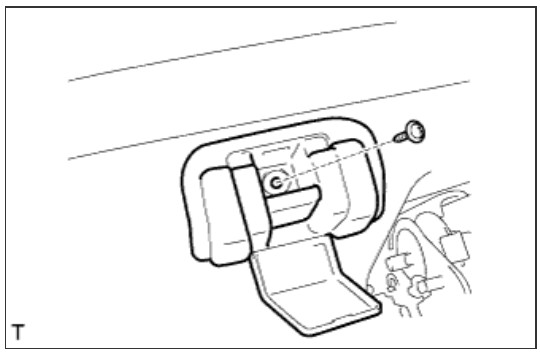


d. Detach the cable clamp and disconnect the cable.



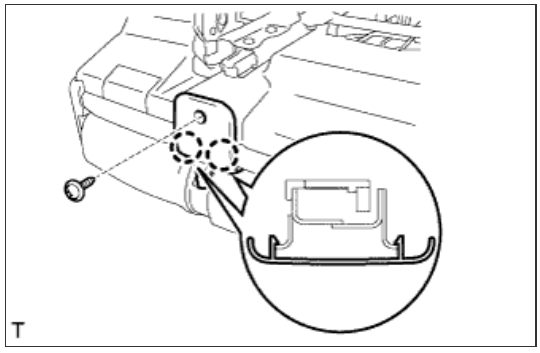
15. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH

a. Remove the 2 nuts and hinge.



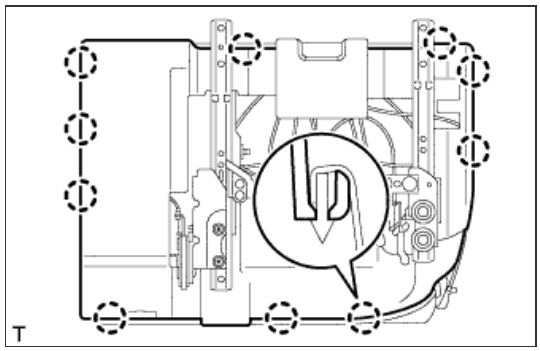
16. REMOVE SEAT BELT ANCHOR COVER CAP

a. Detach the claw and open the cap.



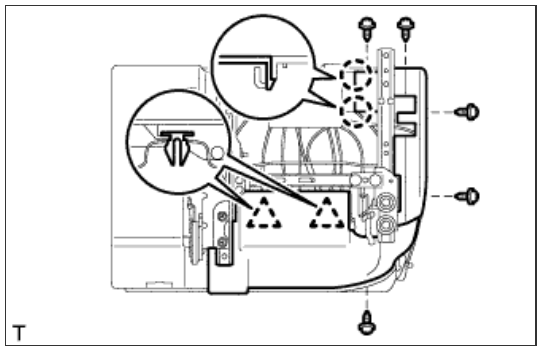
b. Remove the screw and anchor cover cap.

17. REMOVE REAR SEATBACK STAY COVER LH



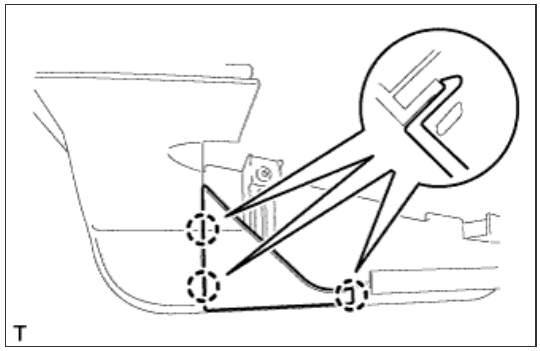
a. Remove the screw.

b. Detach the 2 claws and remove the cover.



18. REMOVE REAR UNDER SIDE COVER LH

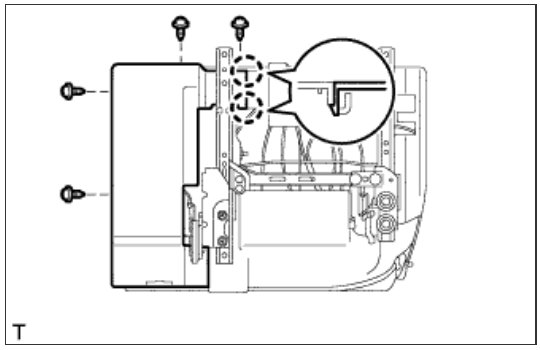
a. Detach the 10 claws.



b. Remove the 5 screws.

c. Detach the 2 clips and 2 claws, and remove the cover.

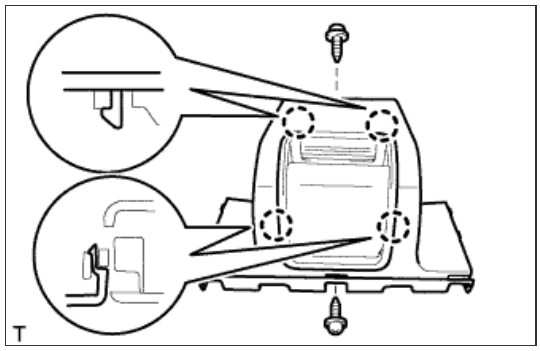
19. REMOVE NO. 1 SEAT CUSHION PLATE



a. Detach the claws and remove the seat cushion plate.

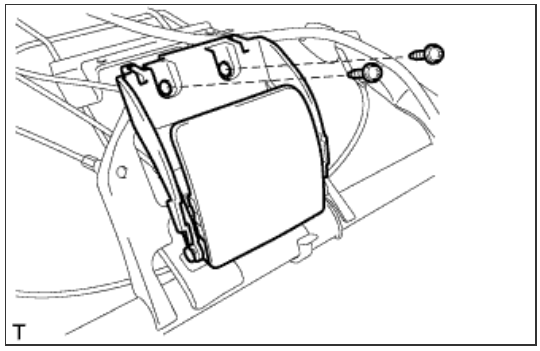
20. REMOVE REAR SEAT CUSHION COVER RH

a. Remove the 4 screws.



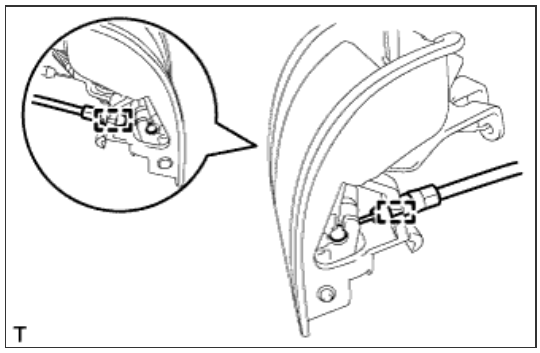
b. Detach the 2 claws and remove the cover.

21. REMOVE REAR SEAT UNDER TRAY COVER LH

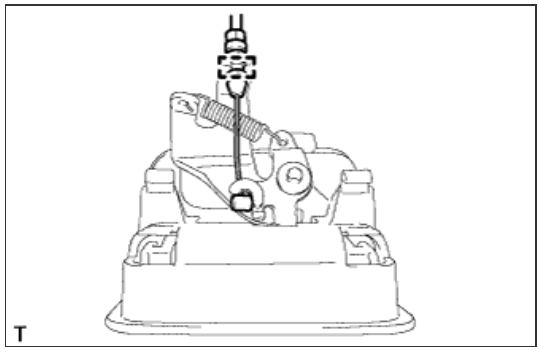


a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.



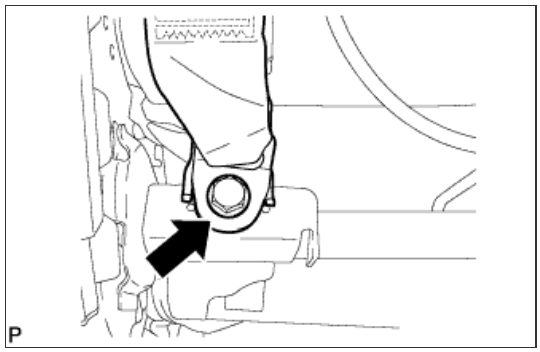
22. REMOVE REAR SEAT TRACK HANDLE SUB-ASSEMBLY



a. Remove the 2 screws and seat track handle.

b. Detach the 2 cable clamps and disconnect the 2 cables.

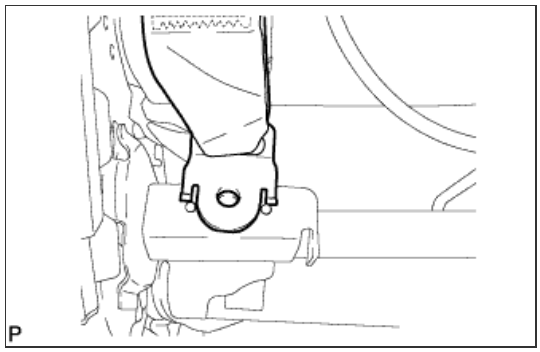
c. Detach the cable clamp and disconnect the cable.



23. REMOVE FOLD SEAT LOCK CONTROL CABLE SUB-ASSEMBLY

24. REMOVE REAR NO. 1 SEAT INNER BELT ASSEMBLY LH

a. Remove the bolt and belt.



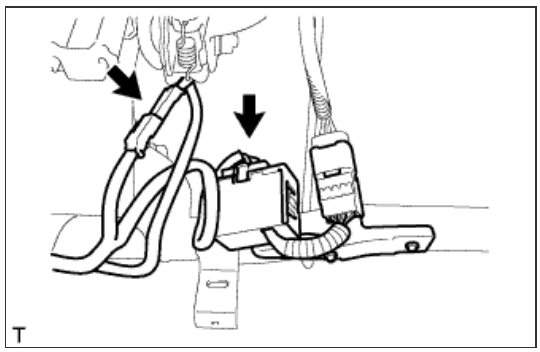
HINT:

The No. 1 seat point type belt anchor is fixed with the same bolt as the rear No. 1 seat inner belt LH. Therefore, it becomes disconnected when the bolt is removed.

25. DISCONNECT NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

a. Disconnect the belt anchor.

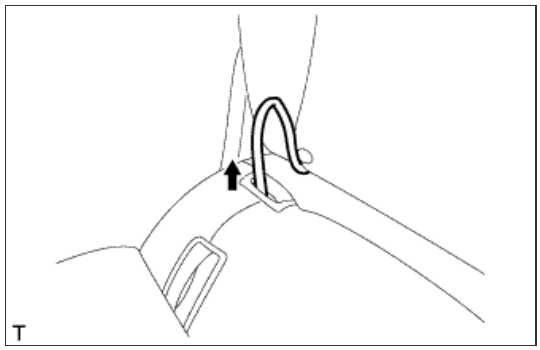
26. REMOVE SEAT CUSHION COVER WITH PAD



a. w/ Rear Seat Side Airbag:

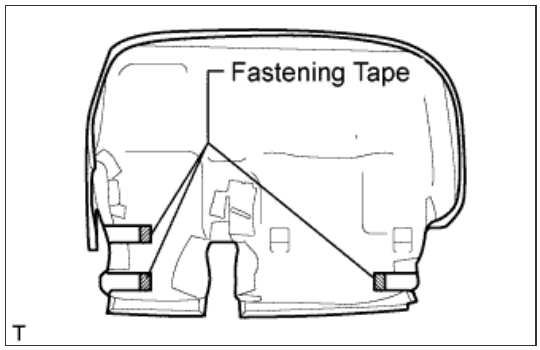
i. Detach the side airbag wire harness clamps.

ii. Remove the side airbag wire harness through the hole in the seat cushion.



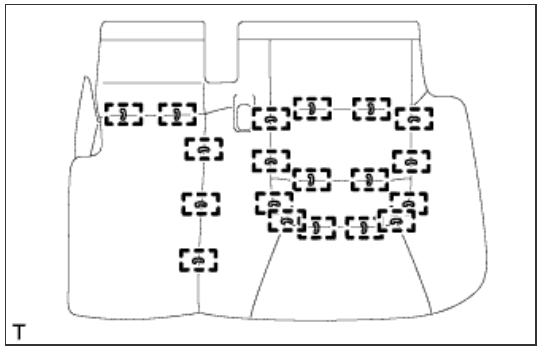
b. w/ Seat Heater System:

i. Disconnect the 2 seat heater connectors.



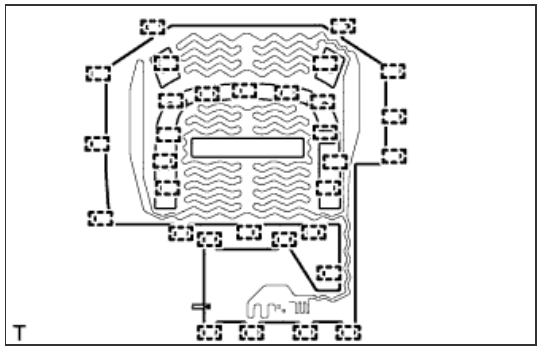
ii. Remove the seatback heater wire harness through the hole in the seat cushion.

c. Remove the seat cushion cover with pad.



27. REMOVE REAR SEPARATE TYPE SEAT CUSHION COVER

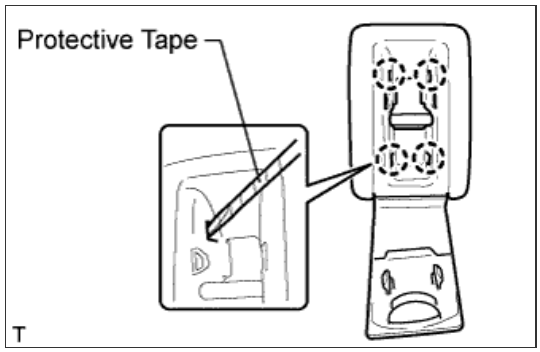
a. Detach the pieces of fastening tape.



b. Remove the hog rings and cover.

28. REMOVE REAR SEAT CUSHION HEATER ASSEMBLY (w/ Seat Heater System)

a. ut off the tack pins which fasten the seat heater to the seat cushion cover, and then remove the seat cushion heater from the seat cushion cover.

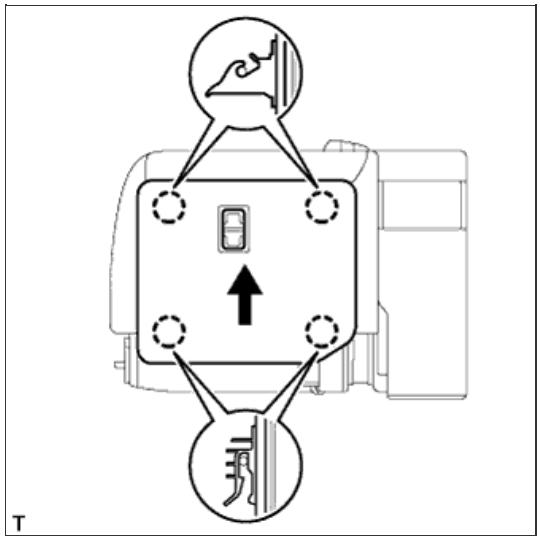


29. REMOVE REAR SEATBACK COVER

a. Using a screwdriver, detach the 4 claws and remove the cover.

HINT:

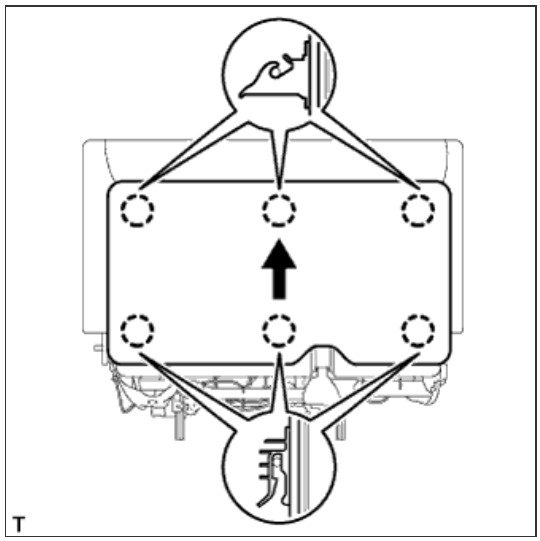
Tape the screwdriver tip before use.



30. REMOVE REAR SEATBACK BOARD SUB-ASSEMBLY LH

a. w/ enter Armrest:

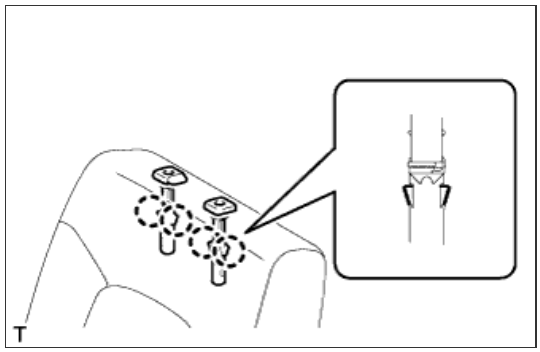
i. Detach the 2 claws on the top of the board.



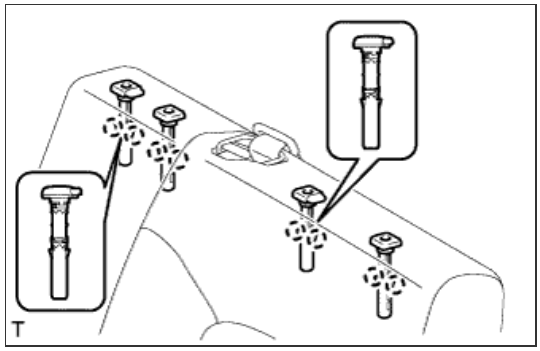
ii. ull up the board to detach the 2 claws on the bottom of the board and remove it.

b. w/o enter Armrest:

i. Detach the claws on the top of the board.



ii. ull up the board to detach the claws on the bottom of the board and remove it.

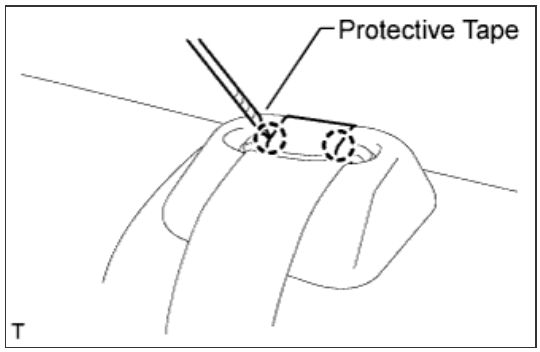


31. REMOVE REAR SEAT HEADREST ASSEMBLY

32. REMOVE REAR NO. 1 SEAT HEADREST SUPPORT ASSEMBLY

a. w/ enter Armrest:
Detach the 4 claws and remove the 2 supports.

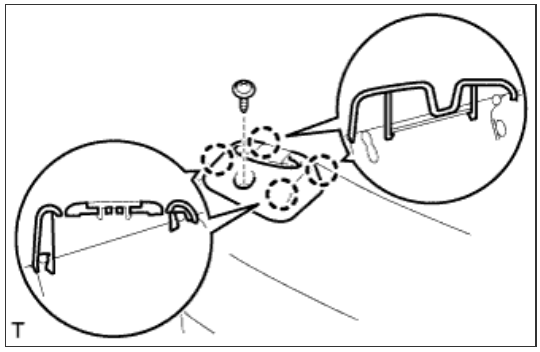
b. w/o enter Armrest:
Detach the 8 claws and remove the 4 supports.



33. REMOVE SHOULDER BELT ANCHOR COVER

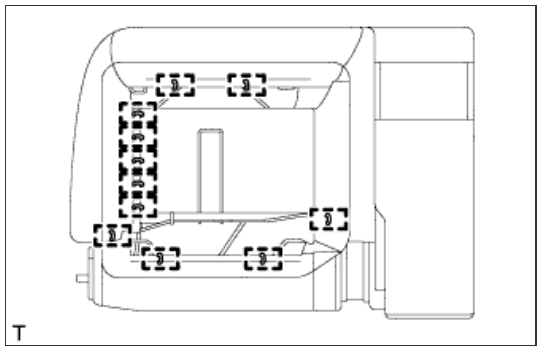
a. Using a screwdriver, detach the 2 claws and remove the cover.

HINT:



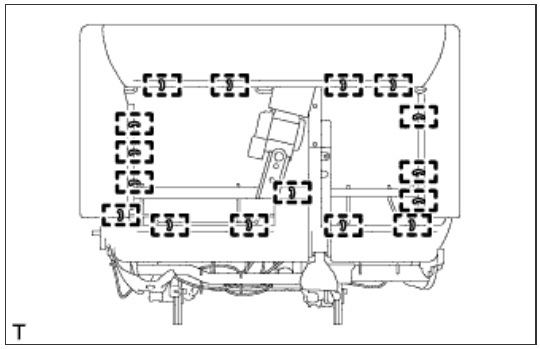
Tape the screwdriver tip before use.

34. REMOVE REAR SEAT BELT HOLE COVER LH



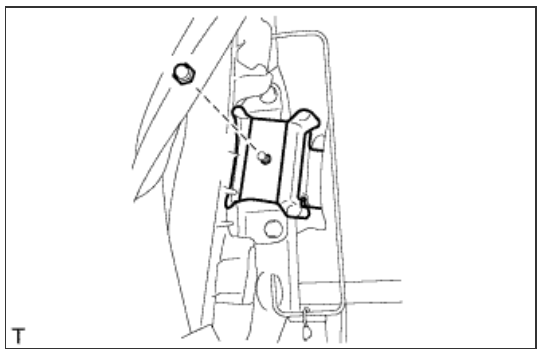
a. Remove the screw.

b. Detach the 4 claws and remove the cover.



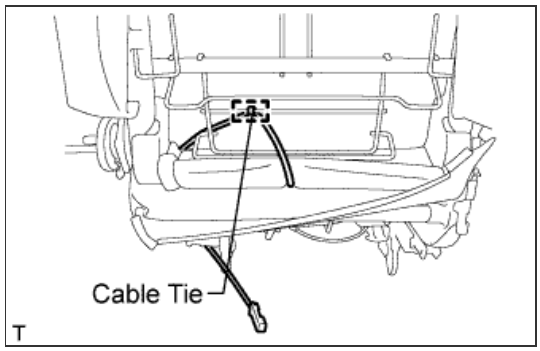
35. REMOVE SEATBACK COVER WITH PAD

a. w/ enter Armrest:
Remove the hog rings.



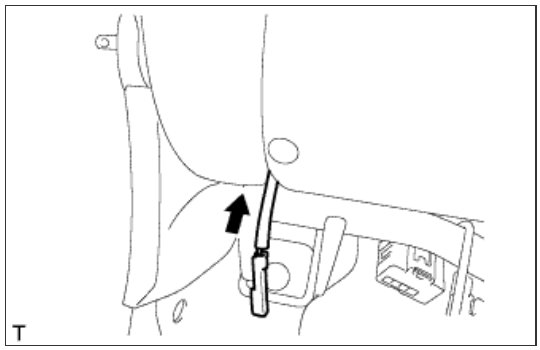
b. w/o enter Armrest:
Remove the hog rings.

c. w/ Rear Seat Side Airbag:

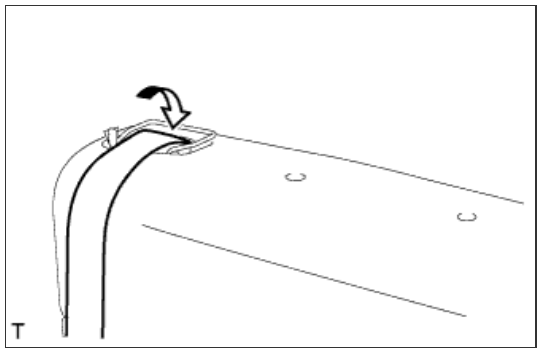


i. Remove the cap nut and seatback cover bracket from the seat frame.

ii. Remove the side airbag wire harness through the hole in the seatback.

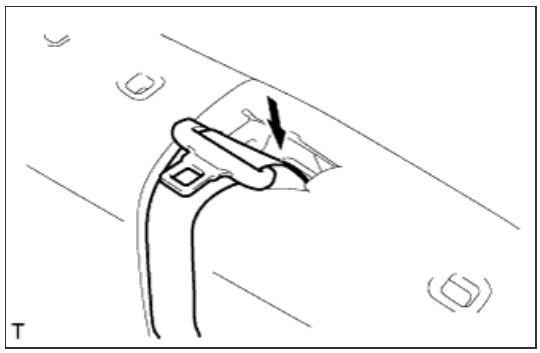


d. w/ Seat Heater System:

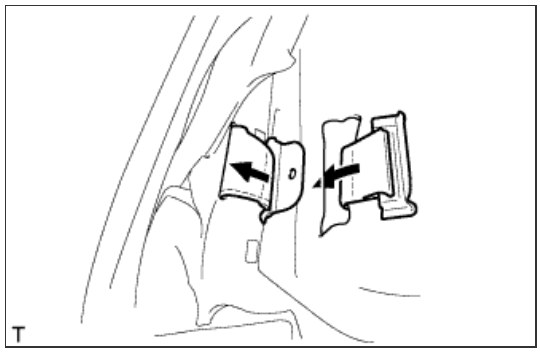


i. ut the cable tie and disconnect the seatback heater wire harness.

ii. Remove the seatback heater wire harness through the hole in the seatback.

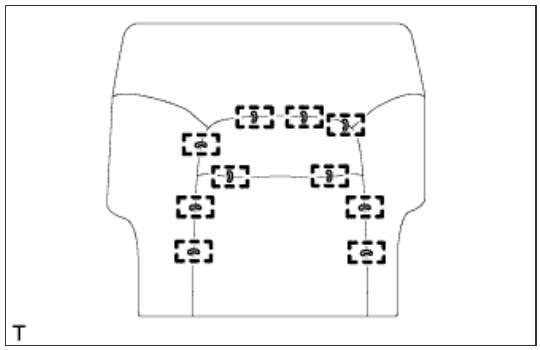


e. w/ enter Armrest:
ull the seat belt into the inside of the seat.

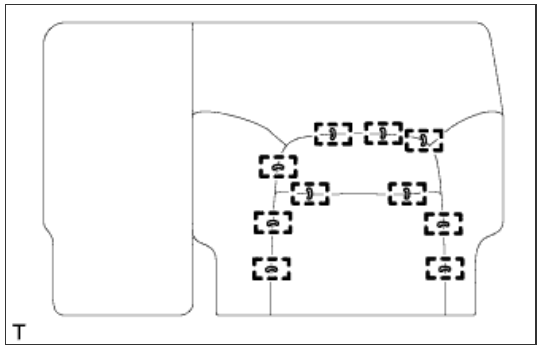


f. w/o enter Armrest:
ull the seat belt into the inside of the seat.

g. Remove the seatback cover with pad.

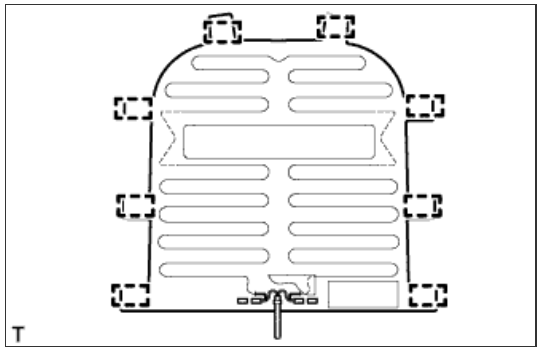


36. REMOVE REAR SEPARATE TYPE SEATBACK COVER



a. w/ Rear Seat Side Airbag:
Disconnect the seatback cover bracket from the seatback pad.

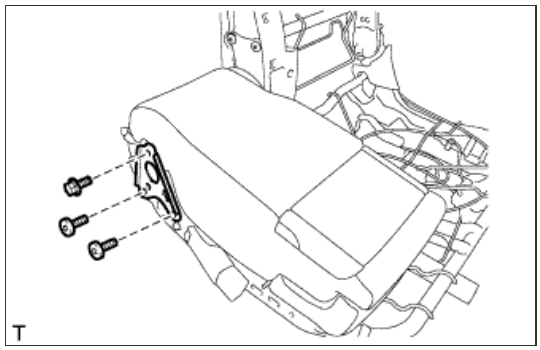
b. w/ enter Armrest:
Remove the hog rings and rear seatback cover.



c. w/o enter Armrest:
Remove the hog rings and rear seatback cover.

37. REMOVE REAR SEATBACK HEATER ASSEMBLY (w/ Seat Heater System)

a. ut off the tack pins which fasten the seatback heater to the seatback cover, and then remove the seatback heater from the seatback cover.



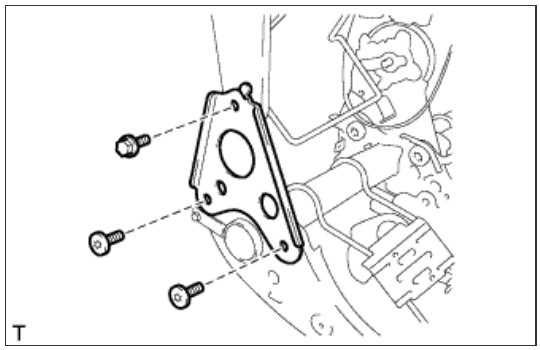
38. REMOVE SEATBACK STOPPER PLATE

a. w/ enter Armrest:

i. Using a T40 TOR socket, remove the 2 bolts.

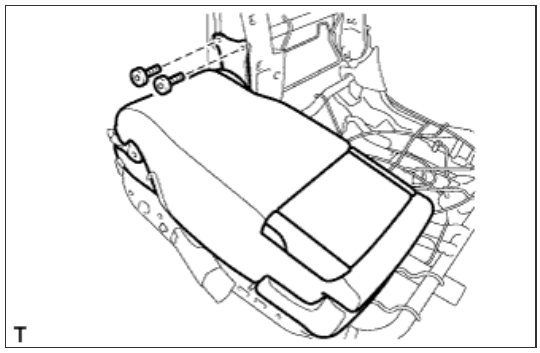
ii. Remove the bolt and stopper plate.

iii. Remove the bush from the stopper plate.



b. w/o enter Armrest:

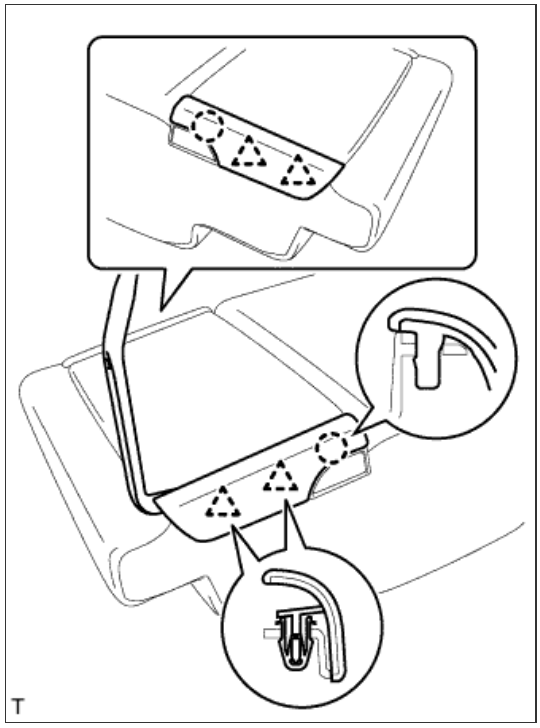
i. Using a T40 TOR socket, remove the 2 bolts.



ii. Remove the bolt and stopper plate.

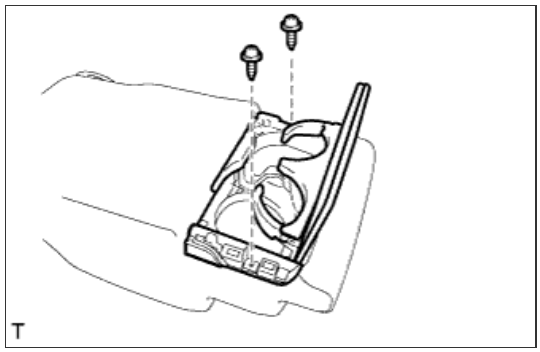
iii. Remove the bush from the stopper plate.

39. REMOVE REAR CENTER SEAT ARMREST ASSEMBLY (w/ Center Armrest)



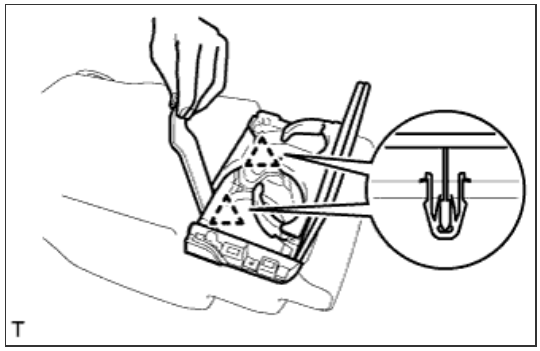
a. Using a T40 TOR socket, remove the 2 bolts and center seat armrest.

40. REMOVE REAR CENTER SEAT HEADREST ASSEMBLY (w/ Center Armrest)



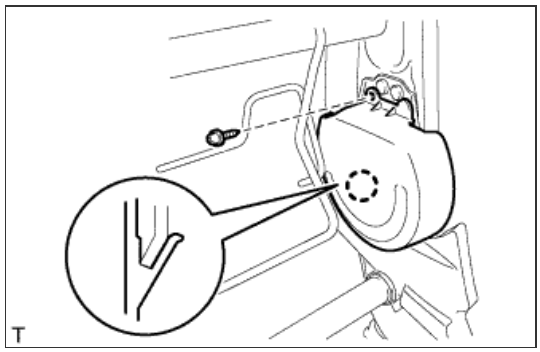
41. REMOVE NO. 1 SEAT ARMREST PLATE (w/ Center Armrest)

a. Using a moulding remover, detach the 4 clips and 2 claws, and then remove the 2 armrest plates.



42. REMOVE CUP HOLDER ASSEMBLY (w/ Center Armrest)

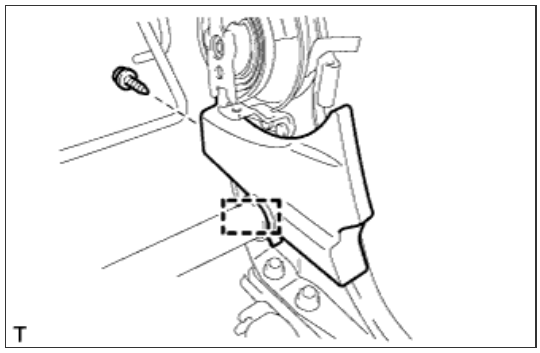
a. Remove the 2 screws.



b. Using a moulding remover, detach the 2 clips and remove the cup holder.

43. REMOVE REAR SEAT RECLINING COVER LH

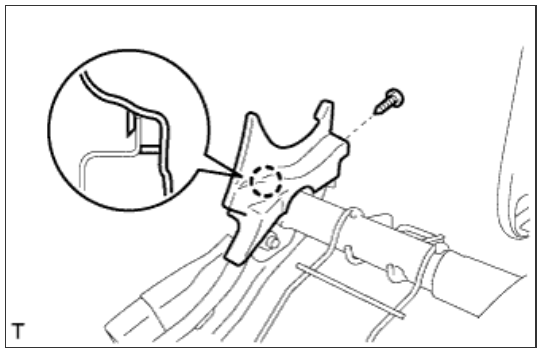
a. Remove the screw.



b. Detach the claw and remove the cover.

44. REMOVE REAR NO. 2 SEAT RECLINING COVER LH

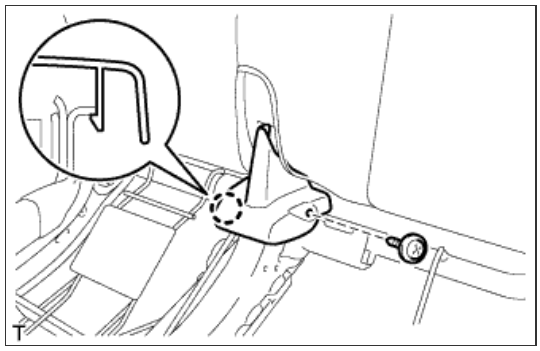
a. Remove the screw.



b. Detach the clamp and remove the cover.

45. REMOVE REAR NO. 1 SEAT RECLINING COVER RH

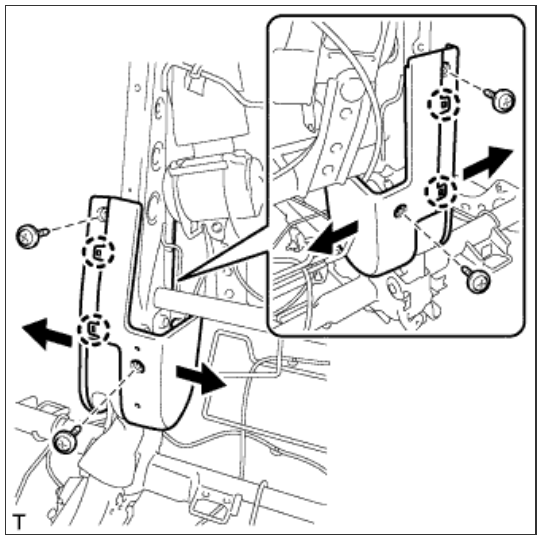
a. Remove the screw.



b. Detach the claw and remove the cover.

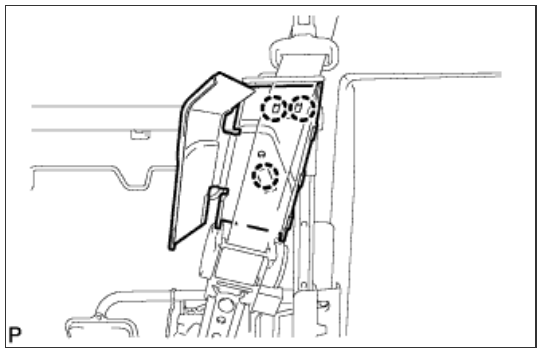
46. REMOVE REAR SEATBACK HINGE COVER LH

a. Remove the screw.



b. Detach the claw and remove the cover.

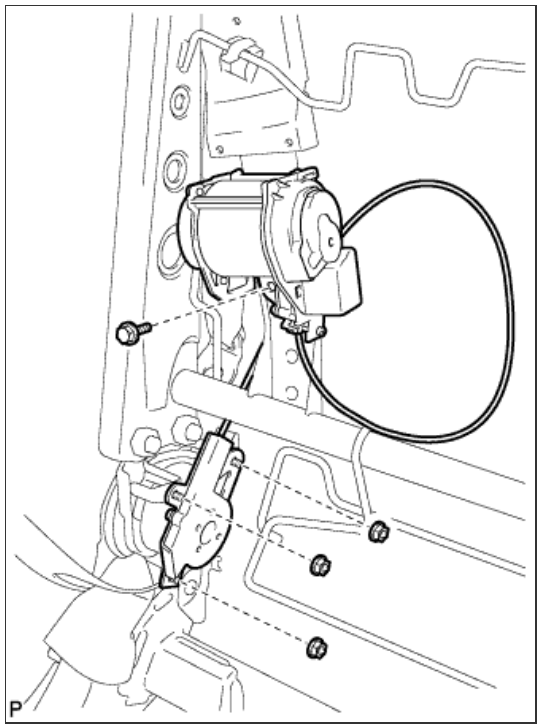
47. REMOVE REAR LOWER SEATBACK COVER SUB-ASSEMBLY LH



a. Remove the 4 screws.

b. Detach the 4 claws and remove the cover.

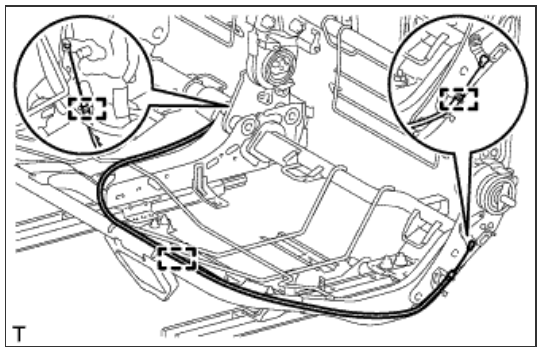
48. REMOVE REAR SEAT SHOULDER BELT HOLE COVER LH



a. Using a screwdriver, detach the claws and remove the shoulder belt hole cover.

49. REMOVE NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

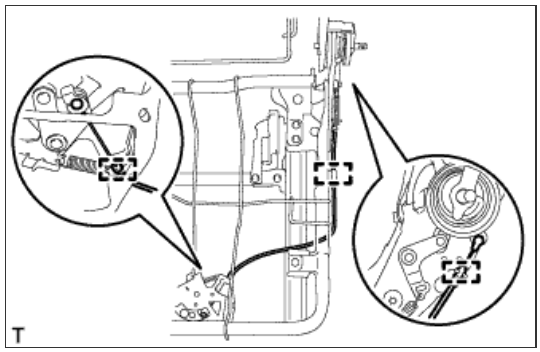
a. Remove the nuts and belt sensor.



b. Remove the nut and then remove the outer belt.

50. REMOVE RECLINING ADJUSTING CABLE ASSEMBLY LH

a. Detach the 2 cable clamps and disconnect the cable.

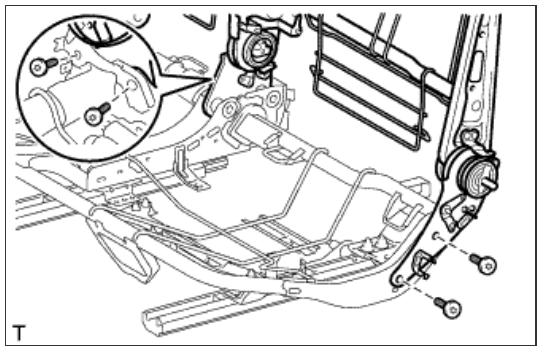


b. Detach the clamp and remove the adjusting cable.

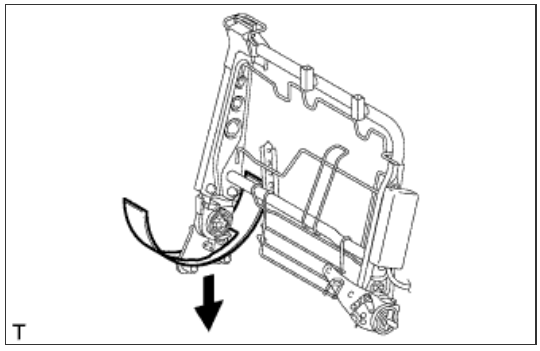
51. REMOVE NO. 2 FOLD SEAT LOCK CONTROL CABLE ASSEMBLY

a. Detach the 2 cable clamps and disconnect the cable.

b. Detach the clamp and remove the lock control cable.



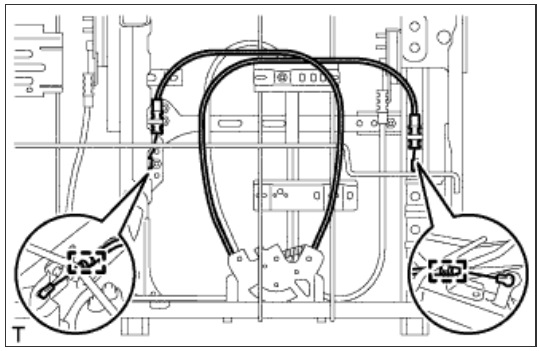
52. REMOVE REAR SEATBACK FRAME SUB-ASSEMBLY LH



a. LH Side:
Using a T40 TOR socket, remove the 2 bolts.

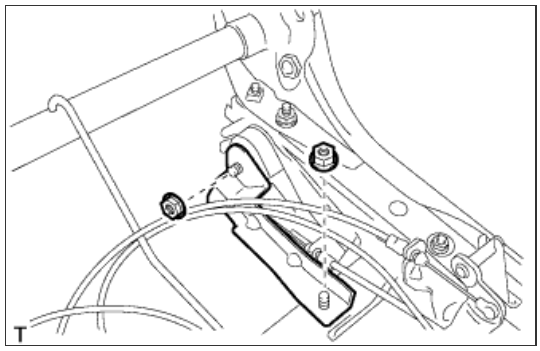
b. RH Side:
Using a T55 TOR socket, remove the 2 bolts.

c. Remove the seatback frame sub assembly.



d. Remove the lower seatback cover.

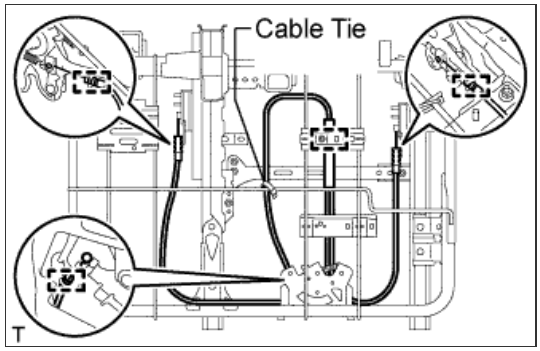
53. REMOVE FOLD SEAT LOCK CONTROL CABLE SUB-ASSEMBLY



a. Detach the 2 cable clamps and disconnect the 2 cables.

b. Remove the 2 fold seat lock cables.

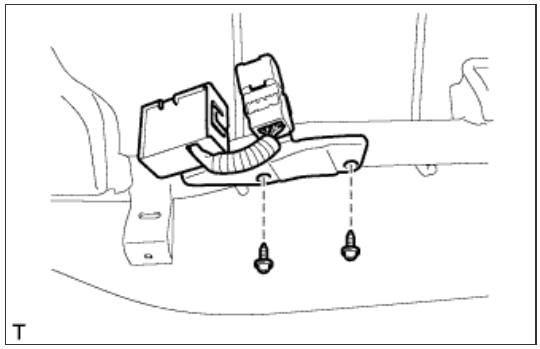
54. REMOVE REAR NO. 1 SEAT LOCK CABLE ASSEMBLY



a. Remove the 2 nuts and lower seat track bracket.

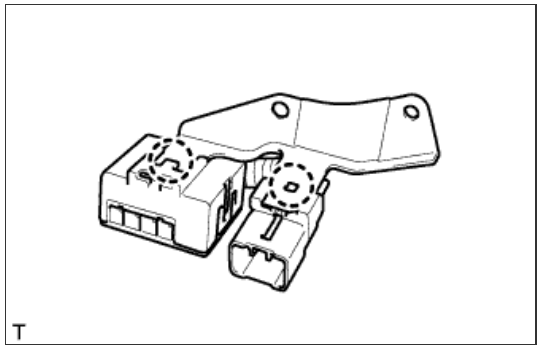
b. ut the cable tie and disconnect the cable.

c. Detach the cable clamps and disconnect the cables.



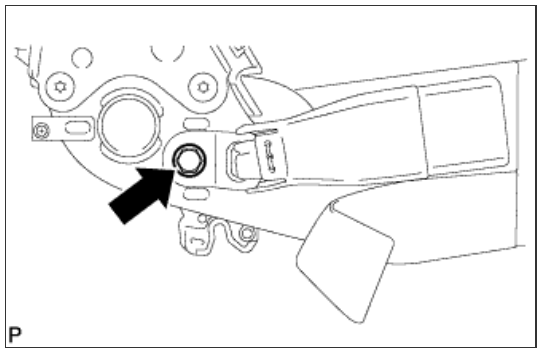
d. Detach the clamp and remove the seat lock cable.

55. REMOVE REAR SEAT CUSHION HOLDER BRACKET LH (w/ Seat Heater System)



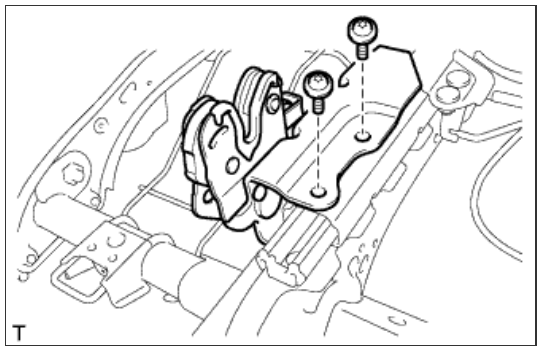
a. Disconnect the seat wire connector.

b. Remove the 2 screws and holder bracket.



56. REMOVE SEAT HEATER CONTROL SUB-ASSEMBLY LH (w/ Seat Heater System)

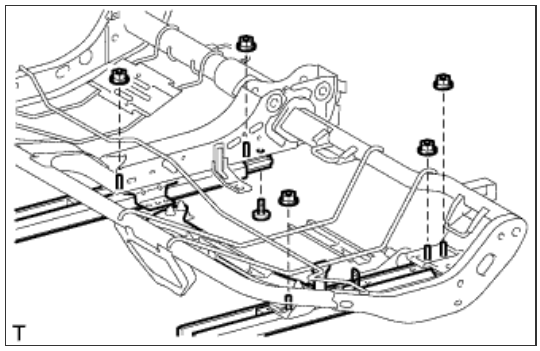
a. Detach the 2 claws and remove the seat heater control.



57. REMOVE REAR SEAT INNER BELT ASSEMBLY

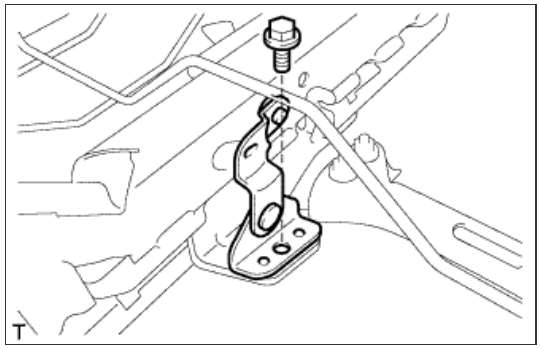
a. Remove the bolt and belt.

58. REMOVE NO. 1 SEAT LEG ASSEMBLY LH



a. Using a T40 TOR socket, remove the 2 bolts and seat leg assembly.

59. REMOVE REAR SEAT CUSHION FRAME SUB-ASSEMBLY LH



a. Using a T40 TOR socket, remove the bolt.

b. Remove the 5 nuts and seat cushion frame.

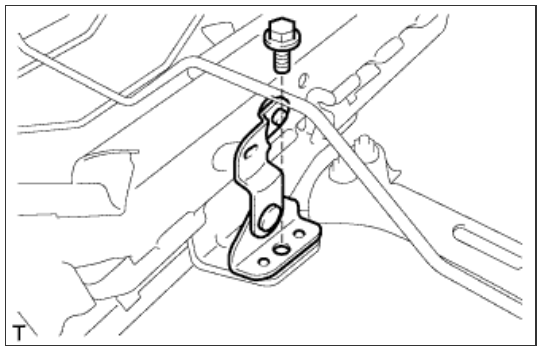
60. REMOVE REAR SEAT LOCK CONTROL LEVER LH

a. Remove the bolt and lock control lever.

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.



HINT:

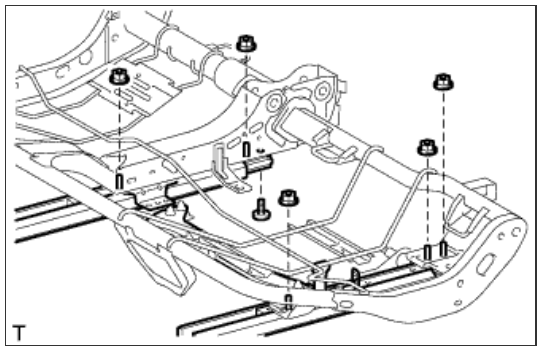
- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL REAR SEAT LOCK CONTROL LEVER LH

a. Install the lock control lever with the bolt.

Torque:
13 N*m{ 133 kgf*cm , 10 ft.*lbf }

2. INSTALL REAR SEAT CUSHION FRAME SUB-ASSEMBLY LH

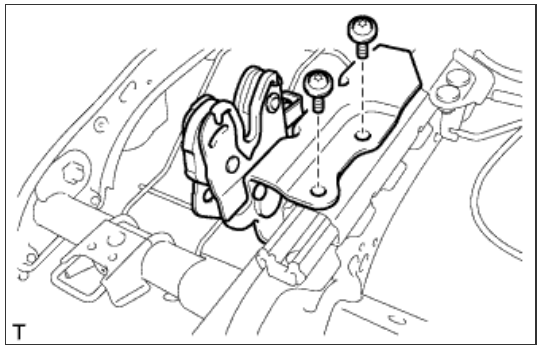


a. Temporarily install the seat cushion frame with the 5 nuts and bolt.

b. Tighten the 5 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

c. Using a T40 "TORX" socket, tighten the bolt.

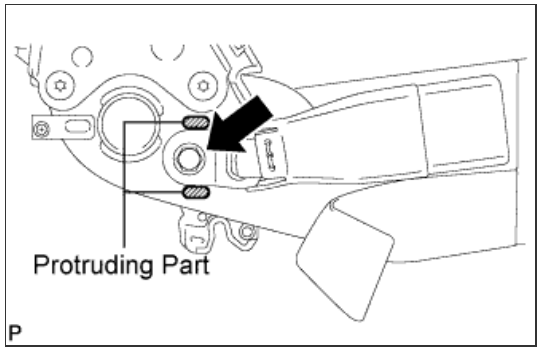


Torque:
21 N*m{ 214 kgf*cm , 15 ft.*lbf }

3. INSTALL NO. 1 SEAT LE ASSEMBLY LH

a. Using a T40 "TORX" socket, install the seat leg assembly with the 2 bolts.

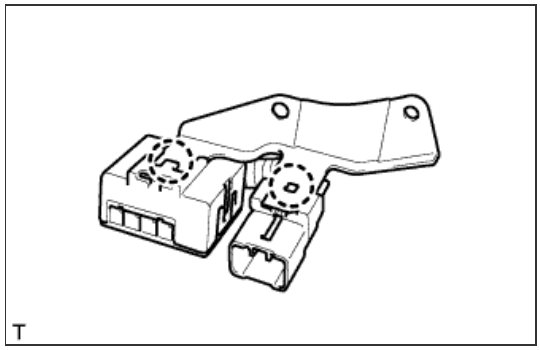
Torque:
21 N*m{ 214 kgf*cm , 15 ft.*lbf }



4. INSTALL REAR SEAT INNER BELT ASSEMBLY

a. Install the seat belt with the bolt.

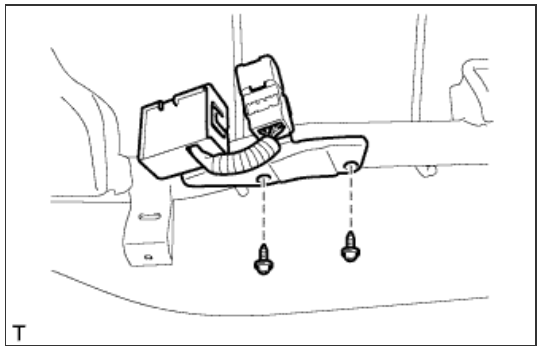
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }



NOTICE:

The anchor part of the seat belt must not overlap the protruding part.

5. INSTALL SEAT HEATER CONTROL SUB-ASSEMBLY LH (w/ Seat Heater System)

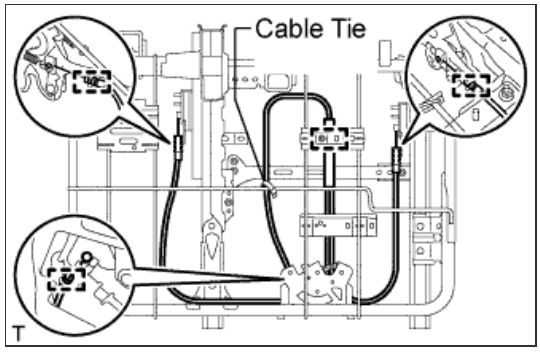


a. Attach the 2 claws to install the seat heater control.

6. INSTALL REAR SEAT CUSHION HOLDER BRACKET LH (w/ Seat Heater System)

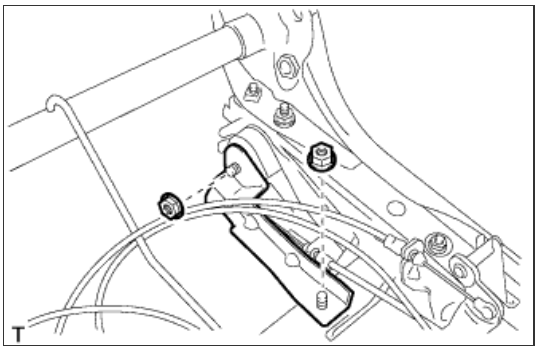
a. Install the holder bracket with the 2 screws.

b. onnect the seat wire connector.



7. INSTALL REAR NO. 1 SEAT LOCK CABLE ASSEMBLY

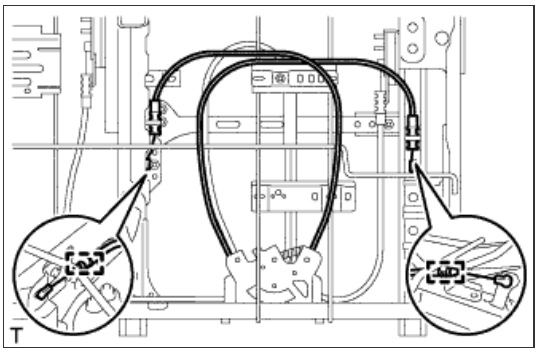
a. Attach the clamp to install the seat lock cable.



b. Attach the 3 cable clamps to connect the 3 cables.

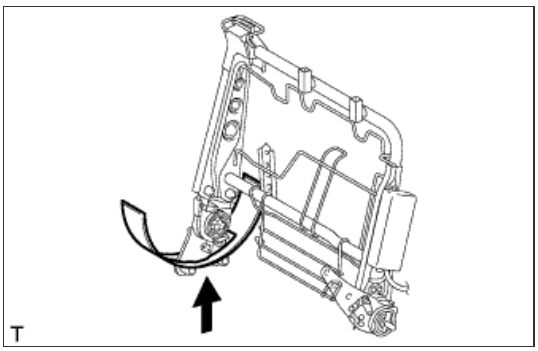
c. onnect the cable and install a new cable tie.

d. Install the lower seat track bracket with the 2 nuts.



Torque:
21 N*m{ 214 kgf*cm , 15 ft.*lbf }

8. INSTALL FOLD SEAT LOCK CONTROL CABLE SUB-ASSEMBLY

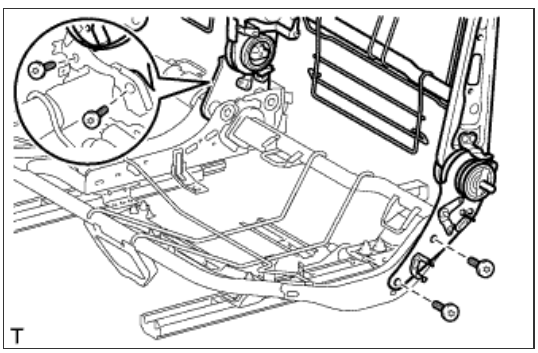


a. Install the 2 fold seat lock control cables.

b. Attach the 2 cable clamps to connect the 2 cables.

9. INSTALL REAR SEATBACK FRAME SUB-ASSEMBLY LH

a. Install the lower seatback cover.

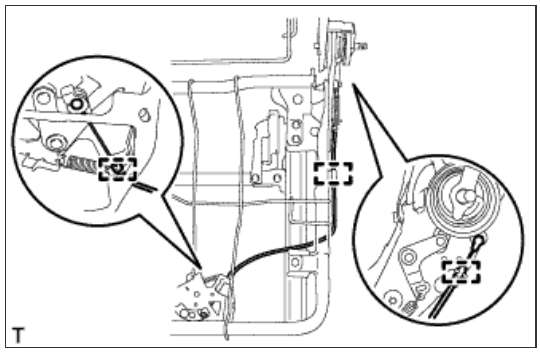


b. Temporarily install the seatback frame with the 4 bolts.

c. LH Side:
Using a T40 "TORX" socket, tighten the 2 bolts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

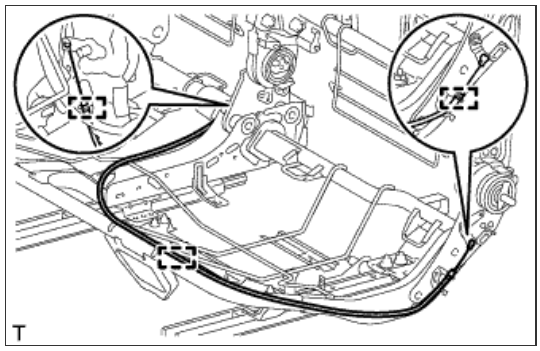
d. RH Side:
Using a T55 "TORX" socket, tighten the 2 bolts.



Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

10. INSTALL NO. 2 FOLD SEAT LOCK CONTROL CABLE ASSEMBLY

a. Attach the clamp to install the lock control cable.

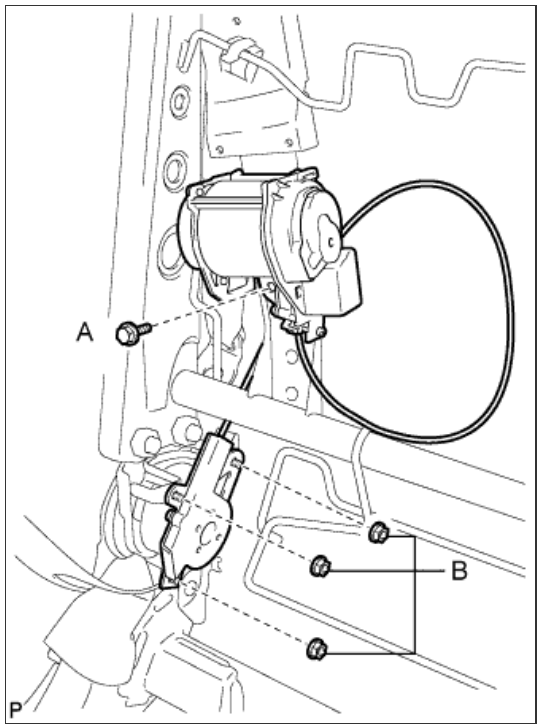


b. Attach the 2 cable clamps to connect the cable.

11. INSTALL RECLININ ADJUSTIN CABLE ASSEMBLY LH

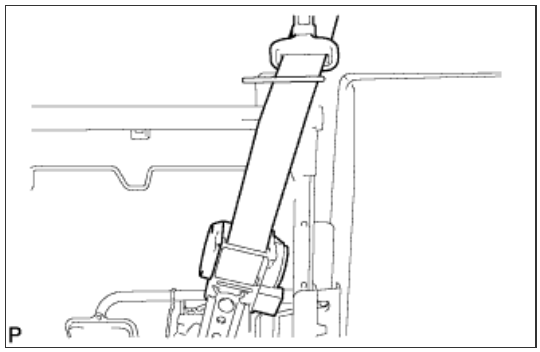
a. Attach the clamp to install the adjusting cable.

b. Attach the 2 cable clamps to connect the cable.



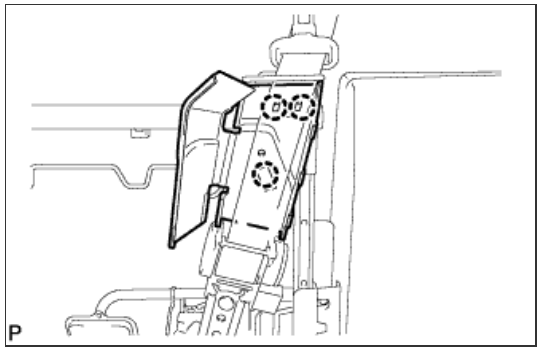
12. INSTALL NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

a. Install the belt with the nut labeled A.



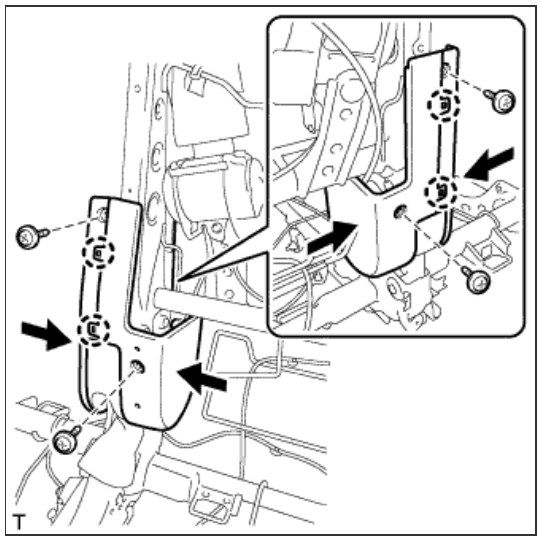
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

b. Install the belt sensor with the 3 nuts labeled B.



13. INSTALL REAR SEAT SHOULDER BELT HOLE COVER LH

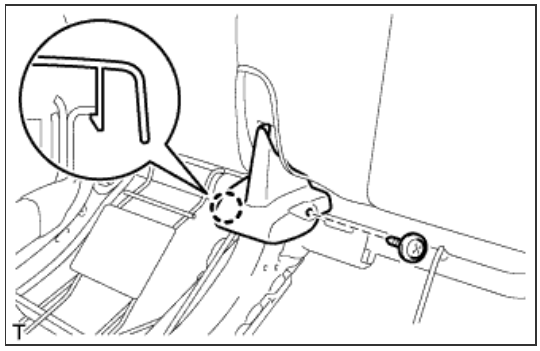
a. Install the seat belt as shown in the illustration.



b. Attach the 3 claws to install the shoulder belt hole cover.

14. INSTALL REAR LOWER SEATBACK COVER SUB-ASSEMBLY LH

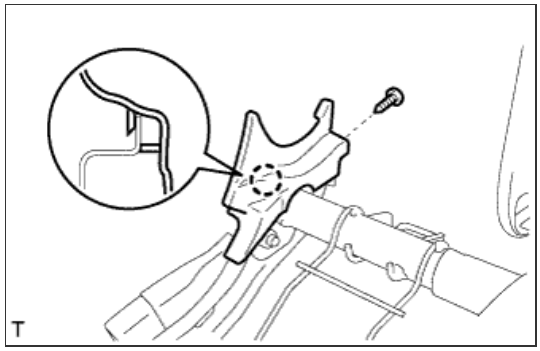
a. Attach the 4 claws to install the cover.



b. Install the 4 screws.

15. INSTALL REAR SEATBACK HIN E COVER LH

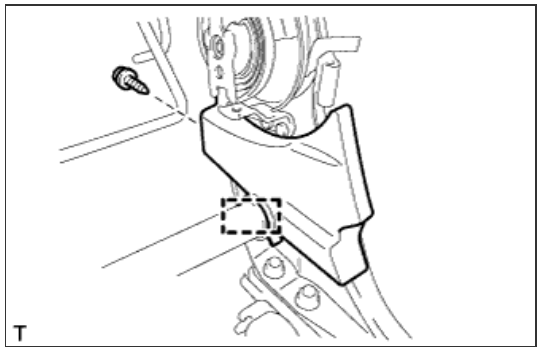
a. Attach the claw to install the cover.



b. Install the screw.

16. INSTALL REAR NO. 1 SEAT RECLININ COVER RH

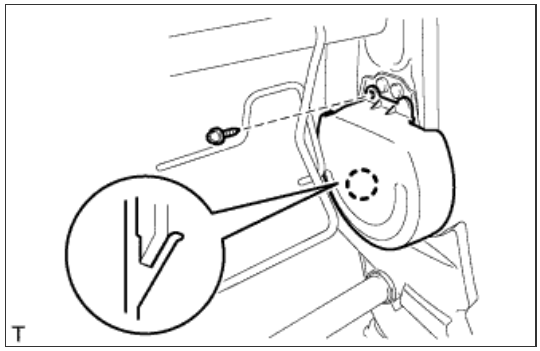
a. Attach the claw to install the cover.



b. Install the screw.

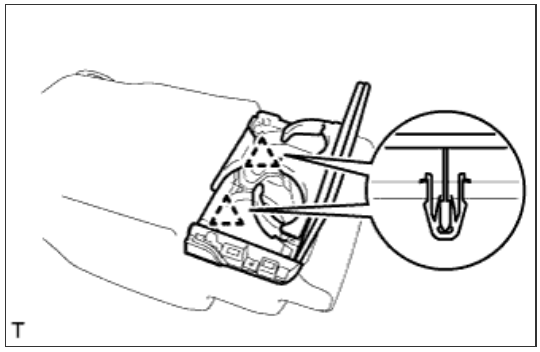
17. INSTALL REAR NO. 2 SEAT RECLININ COVER LH

a. Attach the clamp to install the cover.



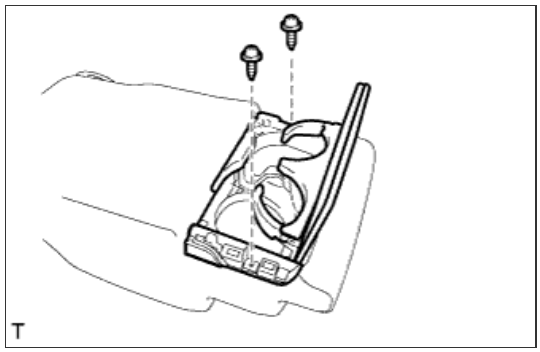
b. Install the screw.

18. INSTALL REAR SEAT RECLININ COVER LH



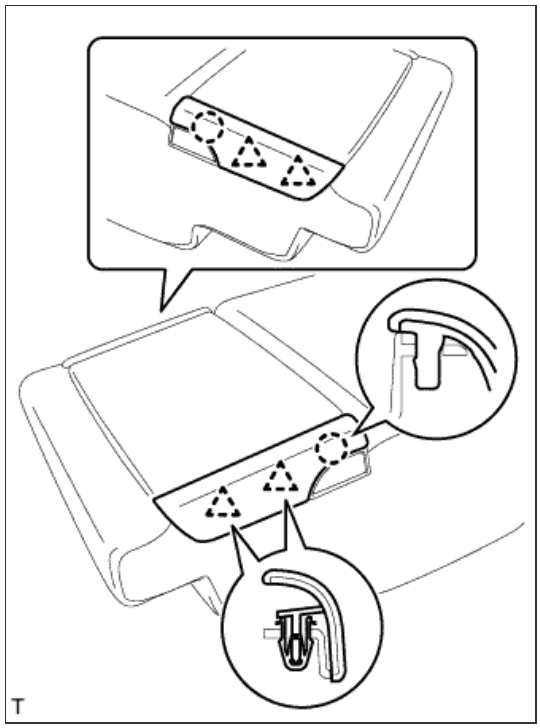
a. Attach the claw to install the cover.

b. Install the screw.



19. INSTALL CUP HOLDER ASSEMBLY (w/ Center Armrest)

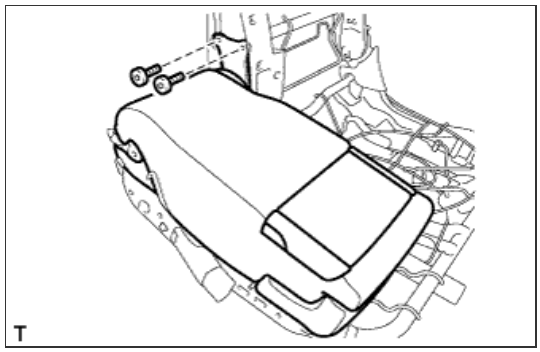
a. Attach the 2 clips to install the cup holder.



b. Install the 2 screws.

20. INSTALL NO. 1 SEAT ARMREST PLATE (w/ Center Armrest)

a. Attach the 2 claws and 4 clips to install the 2 armrest plates.



21. INSTALL REAR CENTER SEAT HEADREST ASSEMBLY (w/ Center Armrest)

22. INSTALL REAR CENTER SEAT ARMREST ASSEMBLY (w/ Center Armrest)

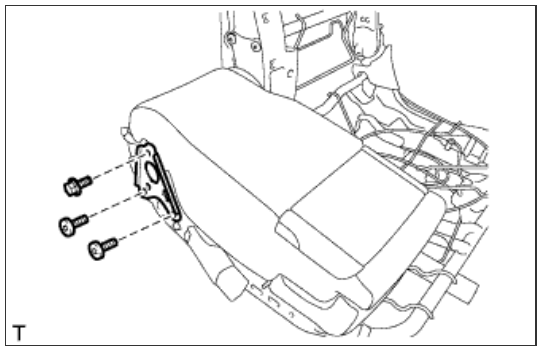
a. Using a T40 "TORX" socket, install the center seat armrest with the 2 bolts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

23. INSTALL SEATBACK STOPPER PLATE

a. w/ enter Armrest:

i. Install the bush to the stopper plate.



ii. Temporarily install the stopper plate with the 3 bolts.

iii. Using a T40 "TORX" socket, tighten the 2 bolts.

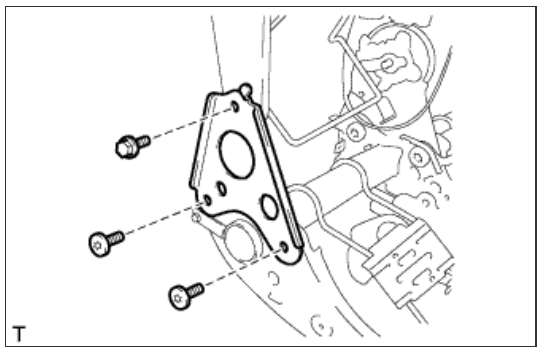
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

iv. Tighten the bolt.

Torque:
15 N*m{ 153 kgf*cm , 11 ft.*lbf }

b. w/o enter Armrest:

i. Install the bush to the stopper plate.

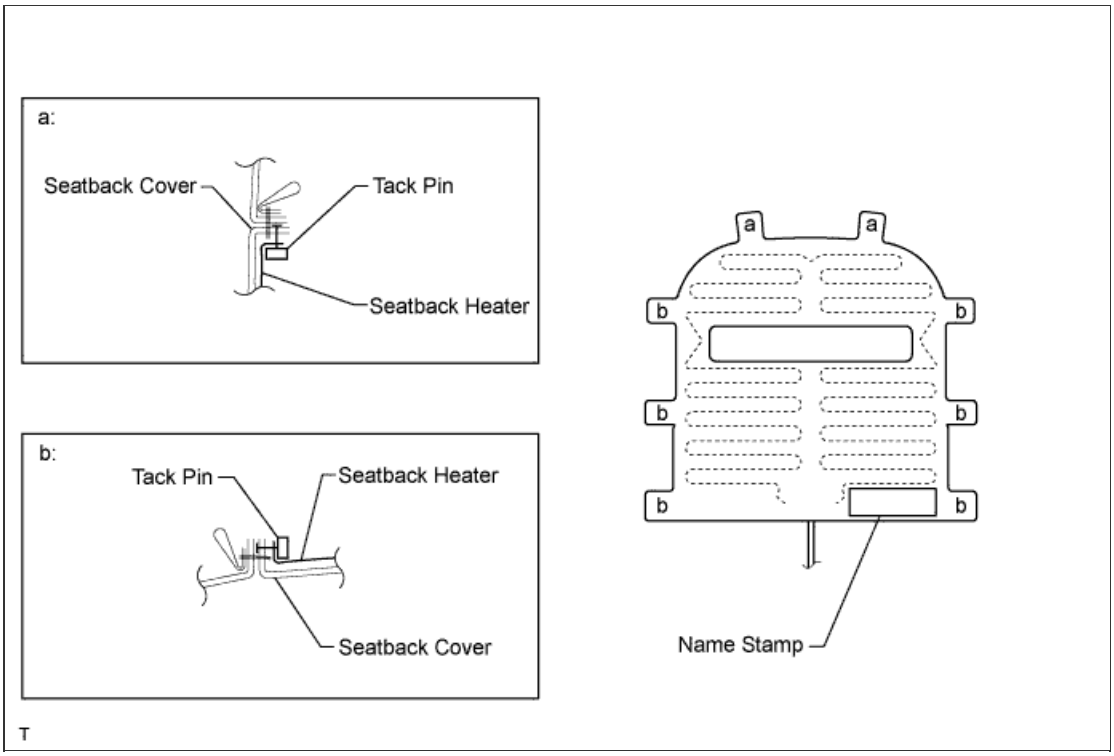


ii. Temporarily install the stopper plate with the 3 bolts.

iii. Using a T40 "TORX" socket, tighten the 2 bolts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

iv. Tighten the bolt.

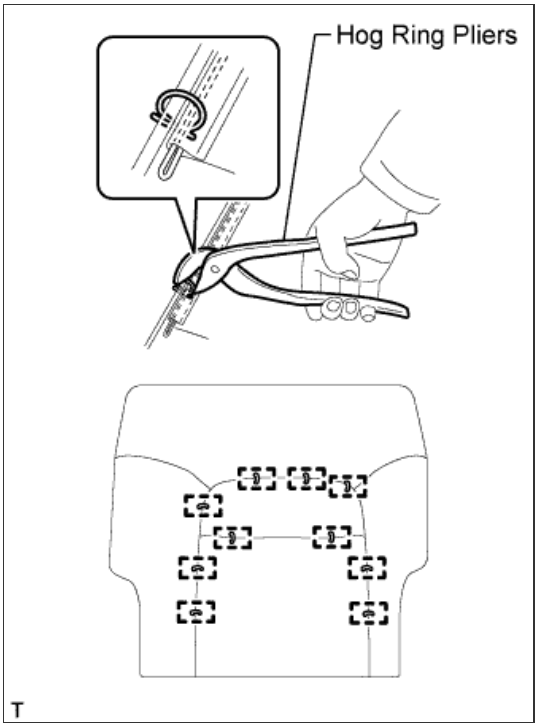


Torque:
15 N*m{ 153 kgf*cm , 11 ft.*lbf }

24. INSTALL REAR SEATBACK HEATER ASSEMBLY (w/ Seat Heater System)

a. Set the seatback heater with the name stamp side facing the seatback cover.

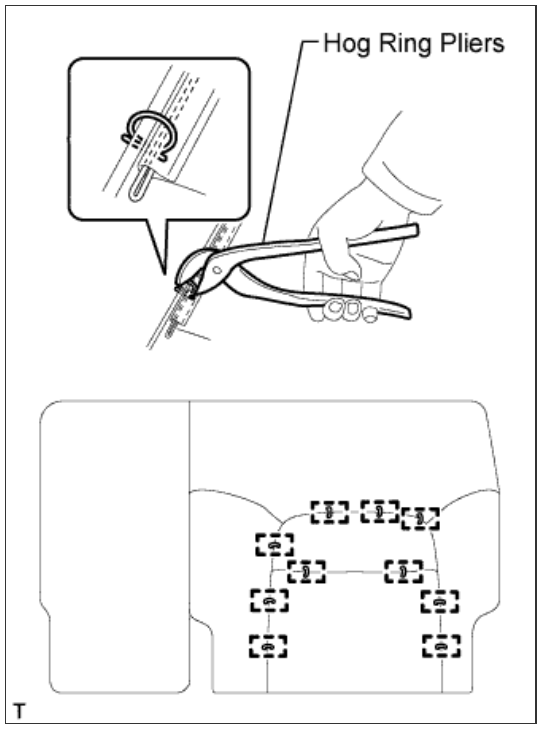
b. Install the seatback heater with new tack pins.



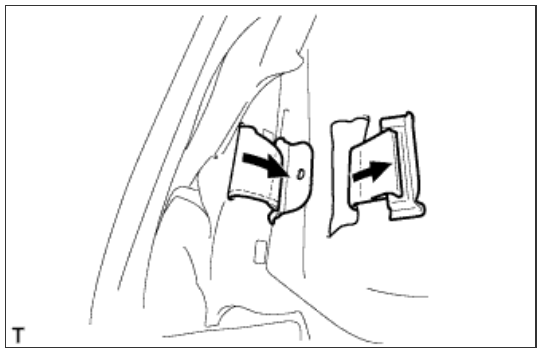
25. INSTALL REAR SEPARATE TYPE SEATBACK COVER

a. w/ enter Armrest:
Using hog ring pliers, install the seatback cover with new hog rings.

NOTICE:



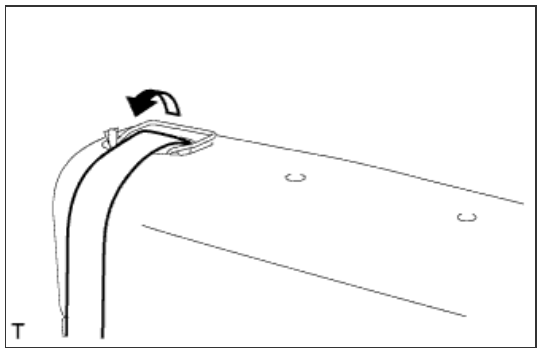
- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**



b. w/o enter Armrest:
Using hog ring pliers, install the seatback cover with new hog rings.

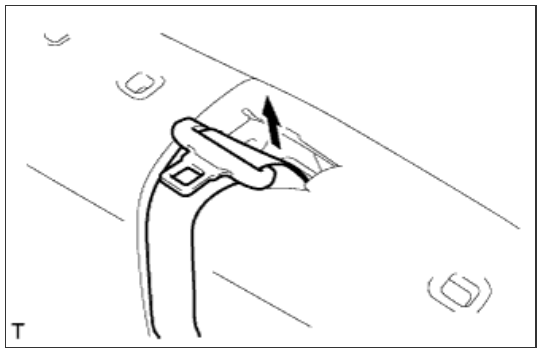
NOTICE:

- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**



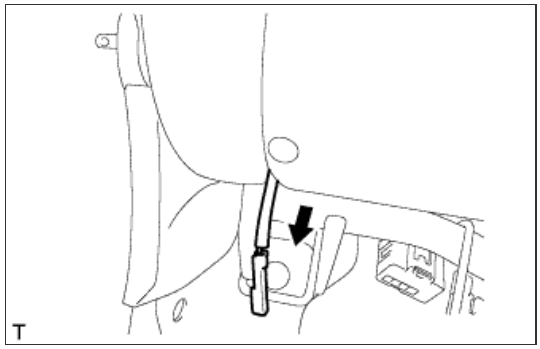
c. w/ Rear Seat Side Airbag:
onnect the seatback cover bracket to the seatback pad.

26. INSTALL SEATBACK COVER WITH PAD



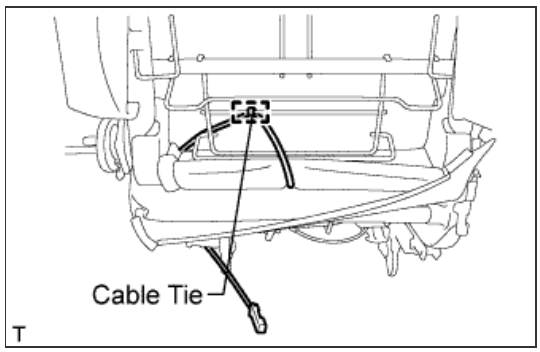
a. Install the seatback cover with pad.

b. w/ enter Armrest:
ull out the seat belt.



c. w/o enter Armrest:
ull out the seat belt.

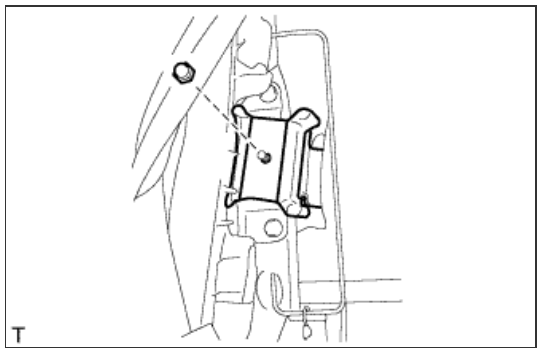
d. w/ Rear Seat Side Airbag:
ass the side airbag wire harness through the hole in the seatback.



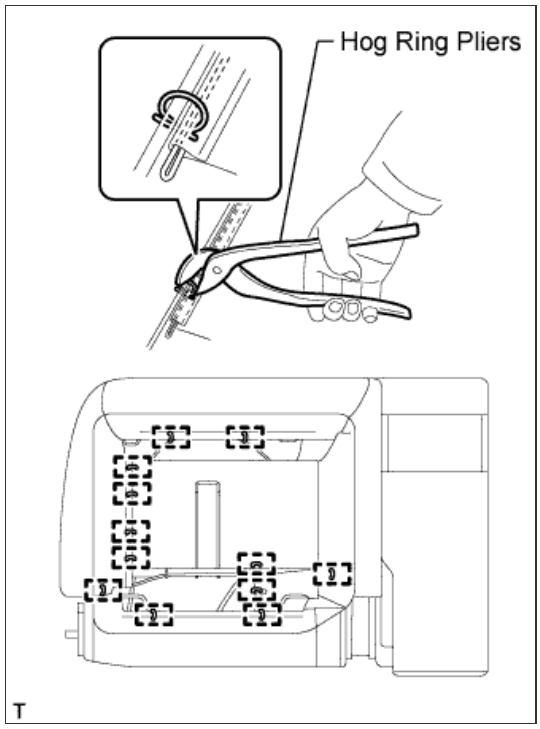
e. w/ Seat Heater System:
ass the seatback heater wire harness through the hole in the seatback.

i.

ii. onnect the seatback heater wire harness and install a new cable tie.



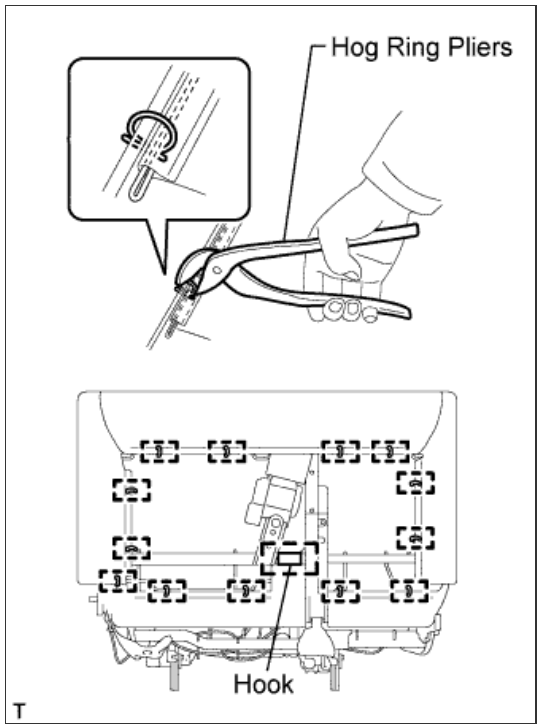
f. w/ Rear Seat Side Airbag:
Install the seatback cover bracket to the seat frame with the cap nut.



Torque:
5.5 N*m{ 56 kgf*cm , 49 in.*lbf }

NOTICE:

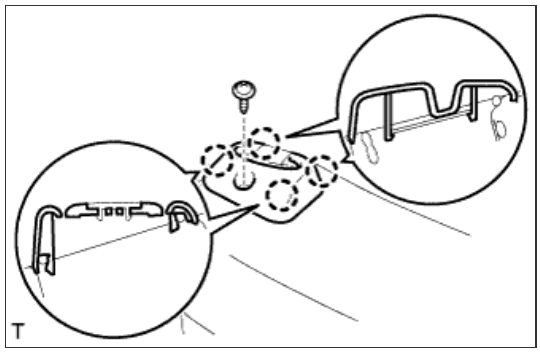
After the seatback trim cover is assembled, make sure the side airbag strap is not twisted.



g. w/ enter Armrest:
Using hog ring pliers, install new hog rings to the seatback frame.

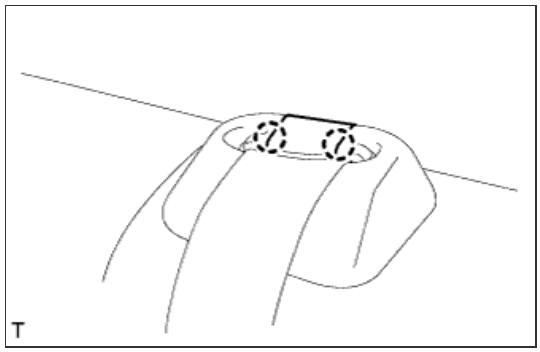
h. w/o enter Armrest:

i. Using hog ring pliers, install new hog rings to the seatback frame.



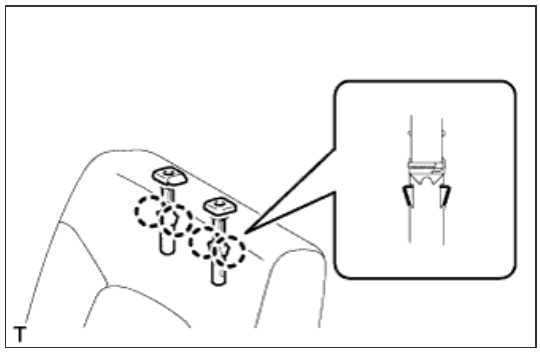
ii. Attach the hook.

27. INSTALL REAR SEAT SHOULDER BELT HOLE COVER LH



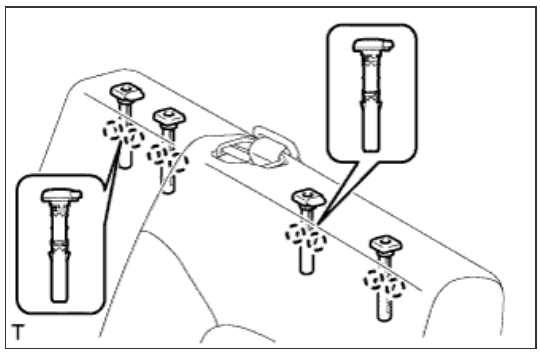
a. Attach the 4 claws to install the cover.

b. Install the screw.



28. INSTALL SHOULDER BELT ANCHOR COVER

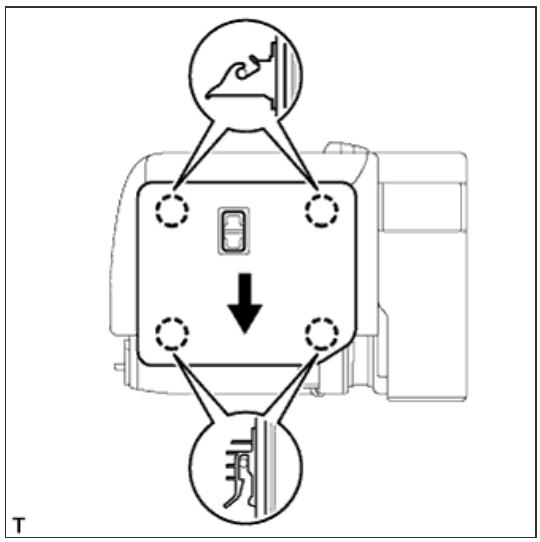
a. Attach the 2 claws to install the cover.



29. INSTALL REAR NO. 1 SEAT HEADREST SUPPORT ASSEMBLY

a. w/ enter Armrest:
Attach the 4 claws to install the 2 supports.

b. w/o enter Armrest:
Attach the 8 claws to install the 4 supports.

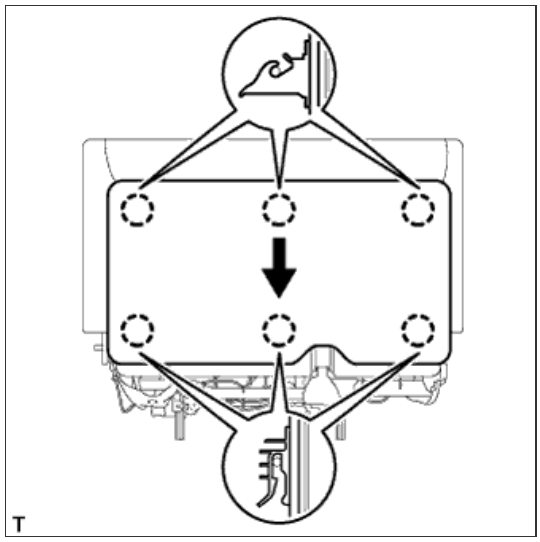


30. INSTALL REAR SEAT HEADREST ASSEMBLY

31. INSTALL REAR SEATBACK BOARD SUB-ASSEMBLY LH

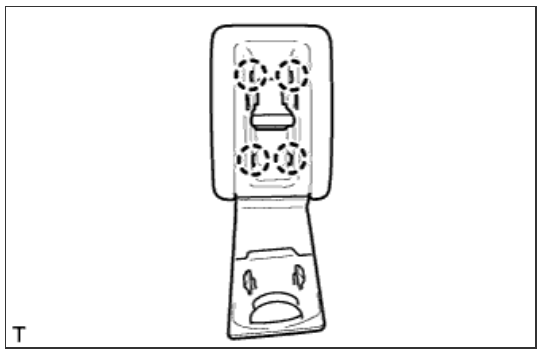
a. w/ enter Armrest:

i. ush the board down to attach the 2 claws on the bottom.



ii. Attach the 2 claws on the top of the board to install it.

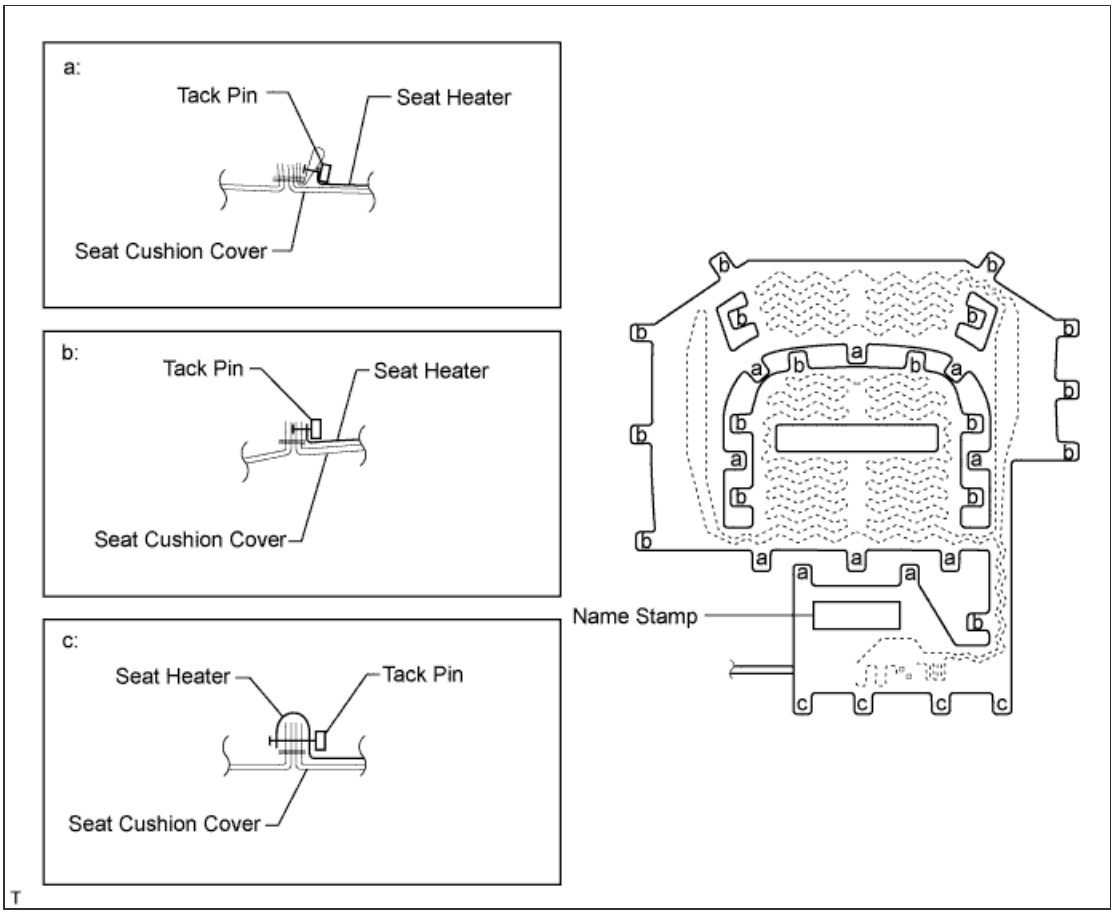
b. w/o enter Armrest:



i. ush the board down to attach the 3 claws on the bottom.

ii. Attach the 3 claws on the top of the board to install it.

32. INSTALL REAR SEATBACK COVER

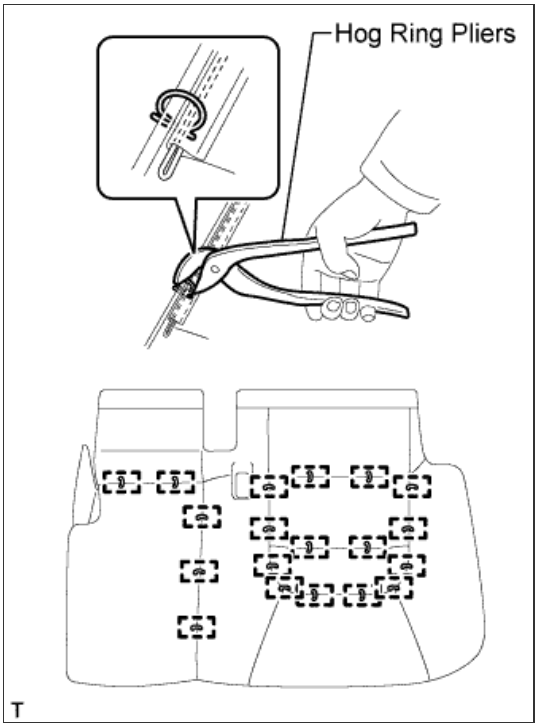


a. Attach the 4 claws to install the cover.

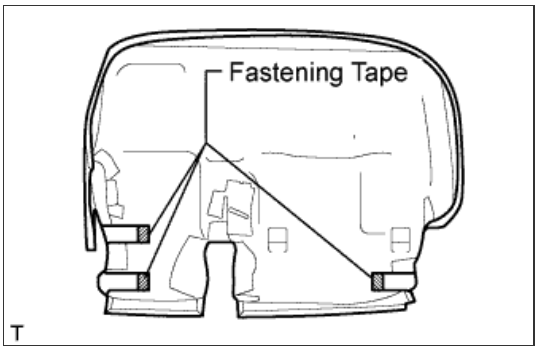
33. INSTALL REAR SEAT CUSHION HEATER ASSEMBLY (w/ Seat Heater System)

a. Set the seat cushion heater with the name stamp side facing the seat cushion cover.

b. Install the seat cushion heater with new tack pins.



34. INSTALL REAR SEPARATE TYPE SEAT CUSHION COVER

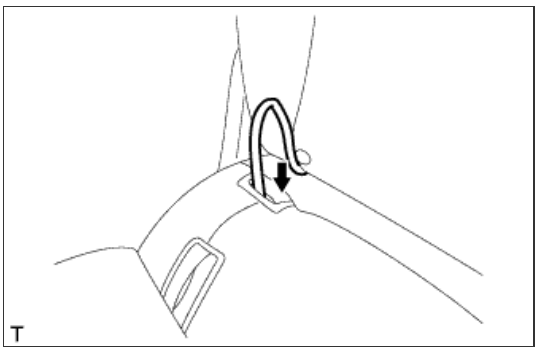


a. Using hog ring pliers, install the seat cushion cover to the seat cushion pad with new hog rings.

NOTICE:

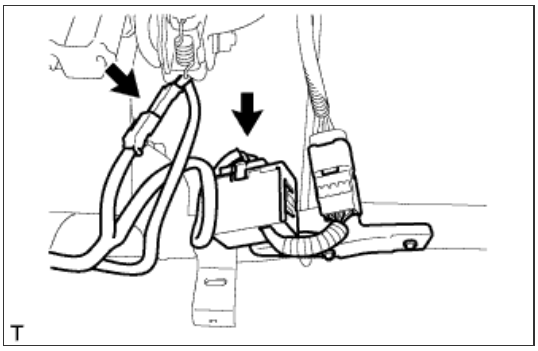
- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**

b. Attach the 3 pieces of fastening tape.



35. INSTALL SEAT CUSHION COVER WITH PAD

a. Install the seat cushion cover with pad.

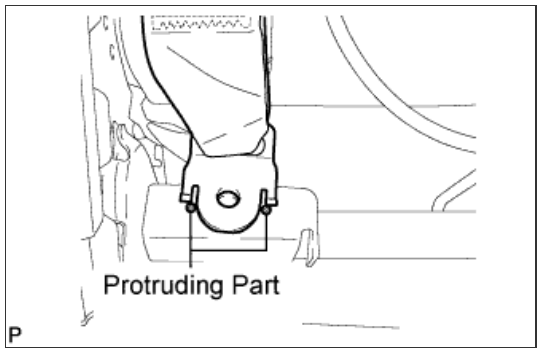


b. w/ Rear Seat Side Airbag:
ass the side airbag wire harness through the hole in the seat cushion.

c. w/ Seat Heater System:

i. ass the seatback heater wire harness through the hole in the seat cushion.

ii. onnect the 2 seat heater connectors.



d. w/ Rear Seat Side Airbag:
Attach the side airbag wire harness clamps.

36. CONNECT NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

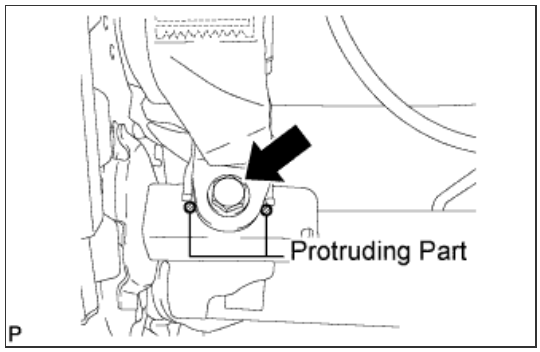
a. onnect the belt anchor.

NOTICE:

o not overlap the anchor part of the seat belt and protruding parts of the vehicle body.

37. INSTALL REAR NO. 1 SEAT BELT INNER ASSEMBLY LH

a. Install the belt with the bolt.

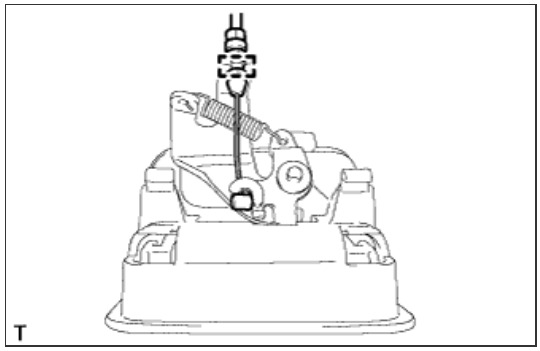


Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

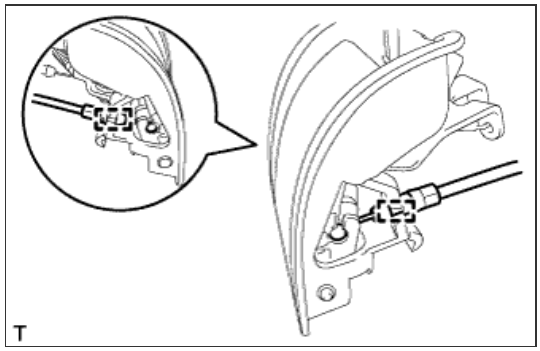
NOTICE:

o not overlap the anchor part of the seat belt and protruding parts of the vehicle body.

HINT:

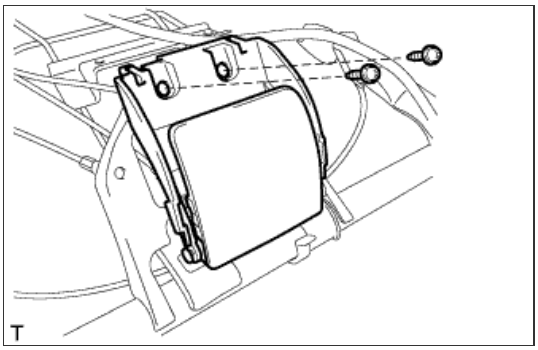


The No. 1 seat 3 point type belt anchor is fi ed with the same bolt as the rear No. 1 seat inner belt LH. Therefore, connect it when installing the rear No. 1 seat inner belt LH.



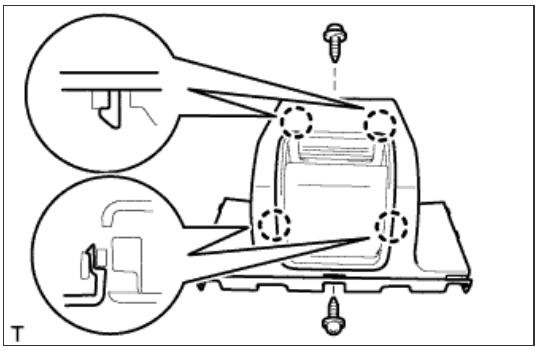
38. INSTALL FOLD SEAT LOCK CONTROL CABLE SUB-ASSEMBLY

39. INSTALL REAR SEAT TRACK HANDLE SUB-ASSEMBLY



a. Attach the cable clamp to connect the cable.

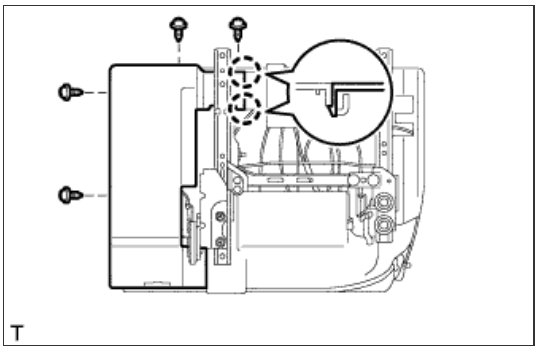
b. Attach the 2 cable clamps to connect the 2 cables.



c. Install the seat track handle with the 2 screws.

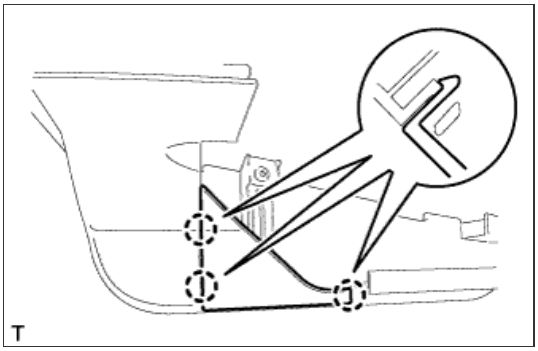
40. INSTALL REAR SEAT UNDER TRAY COVER LH

a. Attach the 4 claws to install the cover.



b. Install the 2 screws.

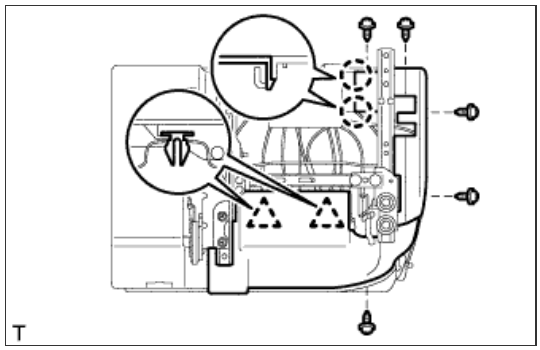
41. INSTALL REAR SEAT CUSHION COVER RH



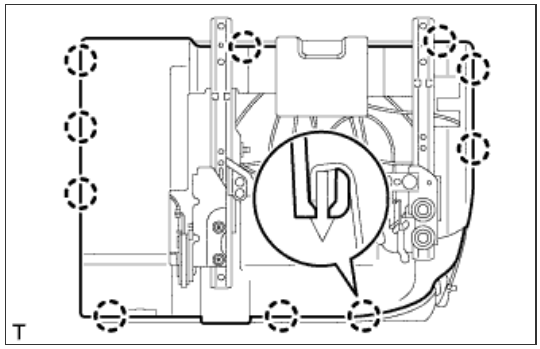
a. Attach the 2 claws to install the cover.

b. Install the 4 screws.

42. INSTALL NO. 1 SEAT CUSHION PLATE



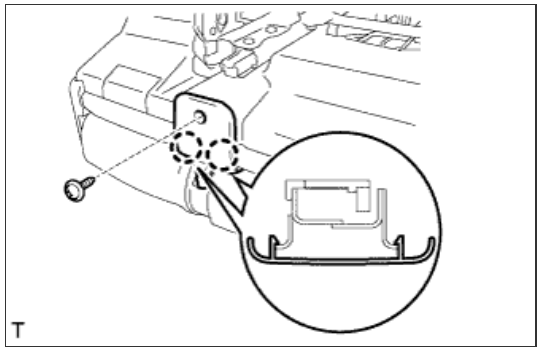
a. Attach the 3 claws to install the seat cushion plate.



43. INSTALL REAR UNDER SIDE COVER LH

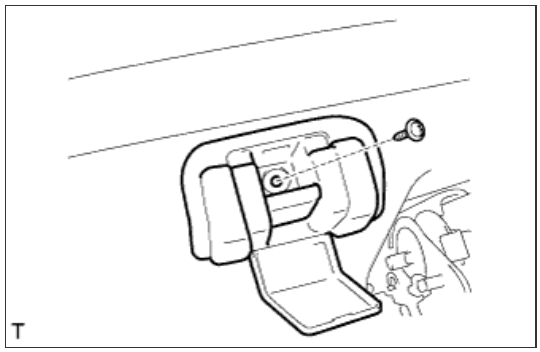
a. Attach the 2 claws and 2 clips to install the cover.

b. Install the 5 screws.



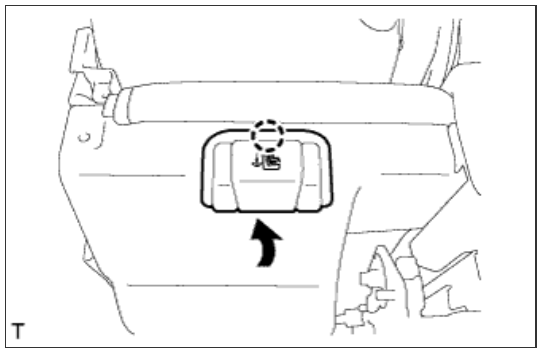
c. Attach the 10 claws.

44. INSTALL REAR SEATBACK STAY COVER LH



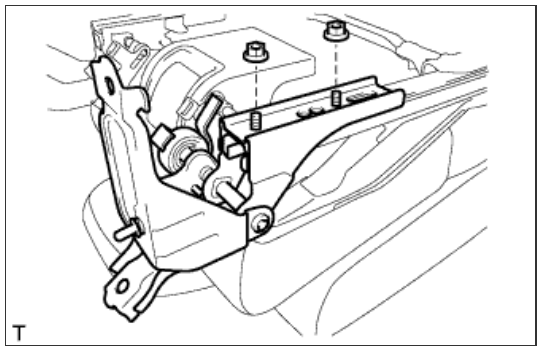
a. Attach the 2 claws to install the cover.

b. Install the screw.



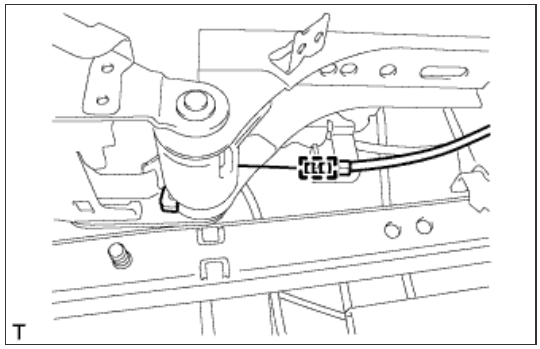
45. INSTALL SEAT BELT ANCHOR COVER CAP

a. Install the anchor cover cap with the screw.



b. Attach the claw to close the cap.

46. INSTALL REAR NO. 1 SEAT HIN E SUB-ASSEMBLY RH

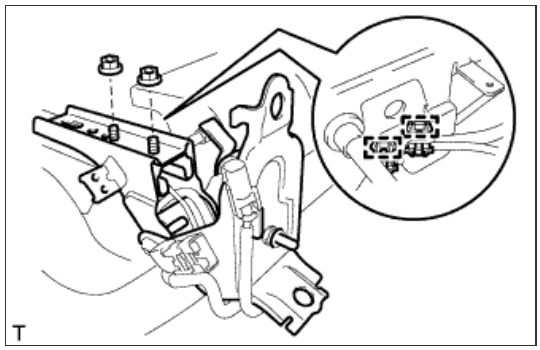


a. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

47. INSTALL REAR NO. 1 SEAT HIN E SUB-ASSEMBLY LH

a. Attach the cable clamp to connect the cable.

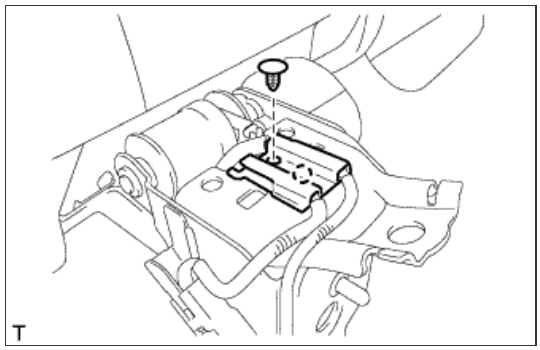


b. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

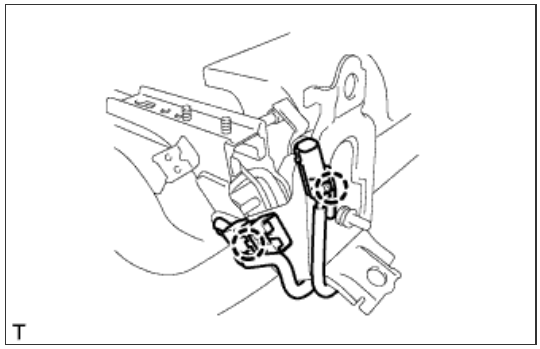
c. w/ Rear Seat Side Airbag:
Attach the wire harness clamp.

d. w/ Seat Heater System:
Attach the wire harness clamp.



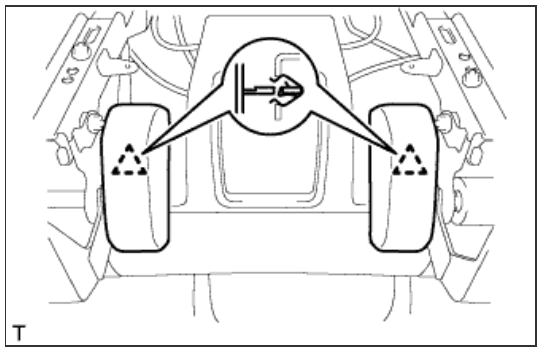
48. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Install the wire harness, and attach 2 claws to close the protector.



b. Attach the claw to install the protector to the seat hinge.

c. Install the clip.

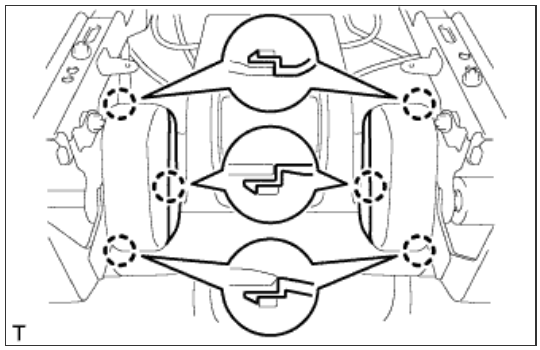


d. w/ Rear Seat Side Airbag:
Attach the claw to install the wire harness connector.

e. w/ Seat Heater System:
Attach the claw to install the wire harness connector.

49. INSTALL REAR SEAT SIDE HIN E MALE COVER RH

a. Attach the clip to install the cover.

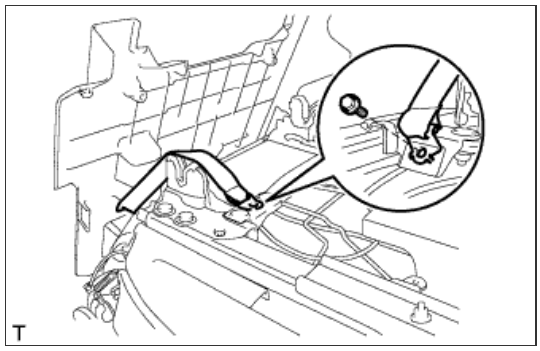


50. INSTALL REAR SEAT SIDE HIN E MALE COVER LH

a. Attach the clip to install the cover.

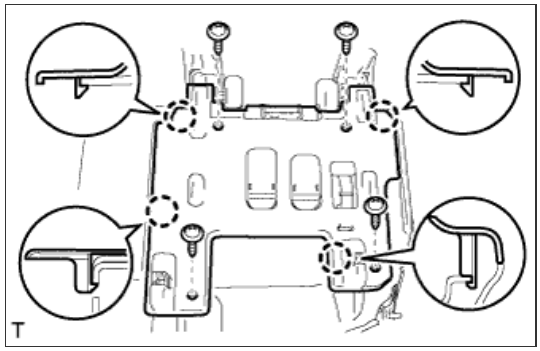
51. INSTALL REAR SEAT SIDE HIN E FEMALE COVER

a. Attach the 6 claws to install the 2 covers.



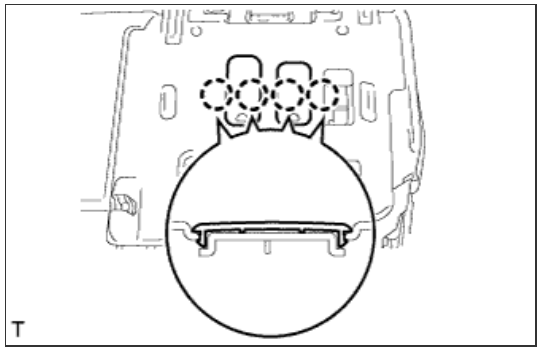
52. REMOVE FOLD SEAT STOPPER BAND ASSEMBLY

a. Install the fold seat stopper band to the seat leg side cover.



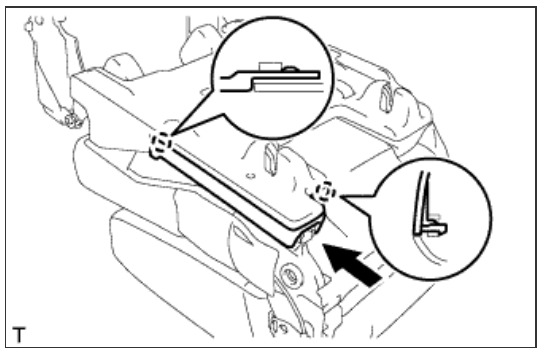
53. INSTALL REAR NO. 2 SEAT LE SIDE COVER

a. ass the fold seat stopper band through the seat leg side cover and attach it to the seat cushion frame with the bolt.



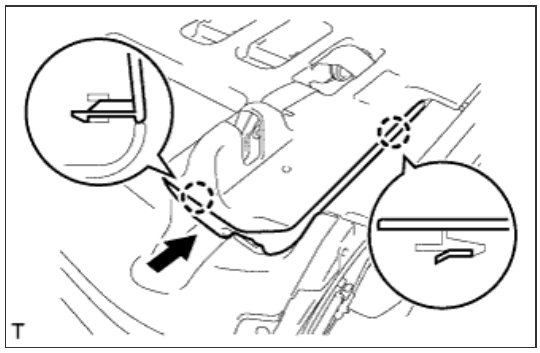
b. Attach the 4 claws to install the seat leg side cover.

c. Install the 4 screws.



54. INSTALL NO. 1 SEAT CUSHION COVER

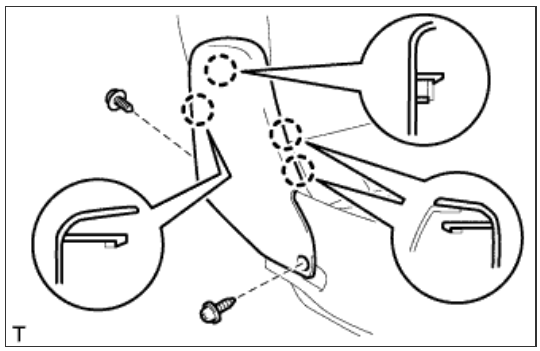
a. Attach the 4 claws to install the 2 covers.



55. INSTALL UPPER SEAT TRACK RAIL COVER RH

a. Attach the 2 claws to install the cover.

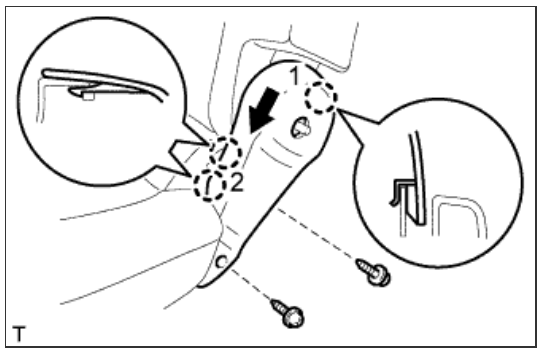
56. INSTALL UPPER SEAT TRACK RAIL COVER LH



a. Attach the 2 claws to install the cover.

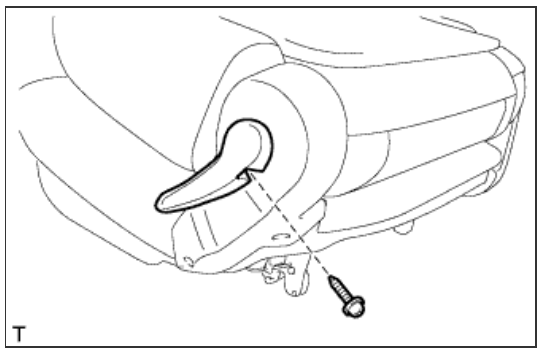
57. INSTALL REAR NO. 1 SEAT RECLININ COVER RH

a. Attach the 4 claws to install the cover.



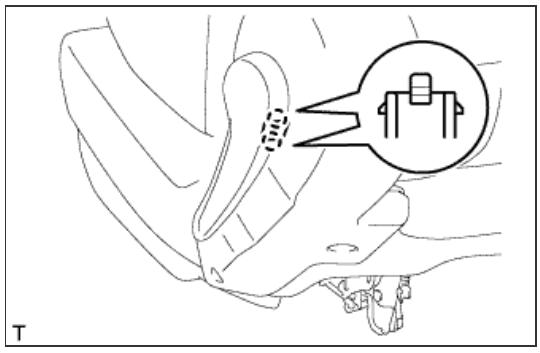
b. Install the 2 screws.

58. INSTALL REAR NO. 1 SEAT RECLININ COVER LH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

b. Install the 2 screws.



59. INSTALL RECLININ ADJUSTER RELEASE HANDLE LH

a. Install the release handle with the screw.

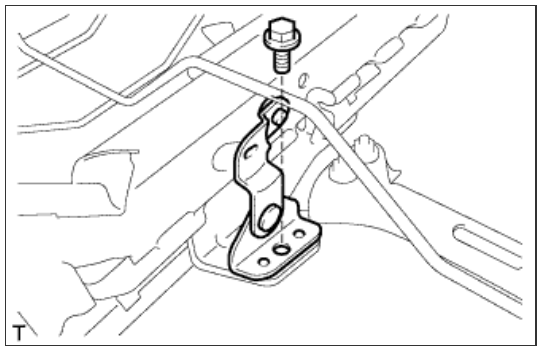
60. INSTALL SEAT ADJUSTER BOLT COVER

a. Attach the 2 claws to install the cover.

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.



HINT:

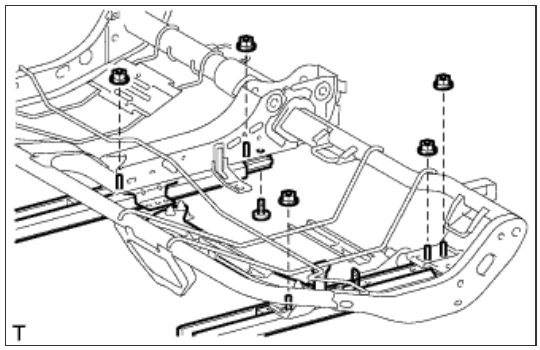
- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL REAR SEAT LOCK CONTROL LEVER LH

a. Install the lock control lever with the bolt.

Torque:
13 N*m{ 133 kgf*cm , 10 ft.*lbf }

2. INSTALL REAR SEAT CUSHION FRAME SUB-ASSEMBLY LH

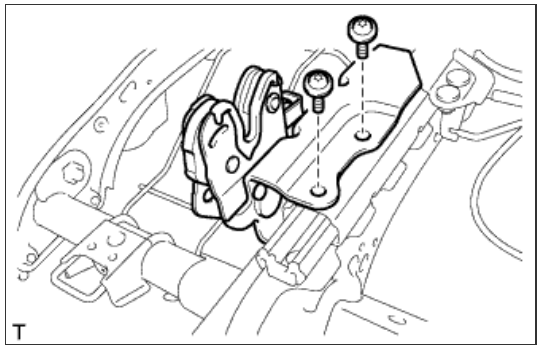


a. Temporarily install the seat cushion frame with the 5 nuts and bolt.

b. Tighten the 5 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

c. Using a T40 "TORX" socket, tighten the bolt.

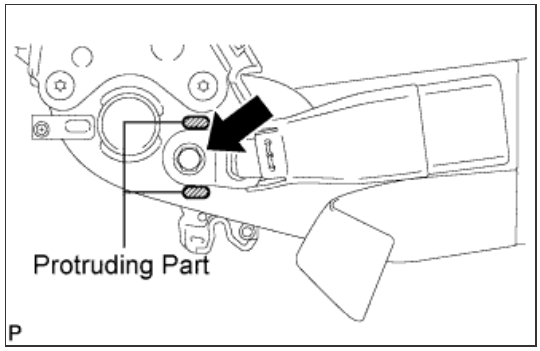


Torque:
21 N*m{ 214 kgf*cm , 15 ft.*lbf }

3. INSTALL NO. 1 SEAT LE ASSEMBLY LH

a. Using a T40 "TORX" socket, install the seat leg assembly with the 2 bolts.

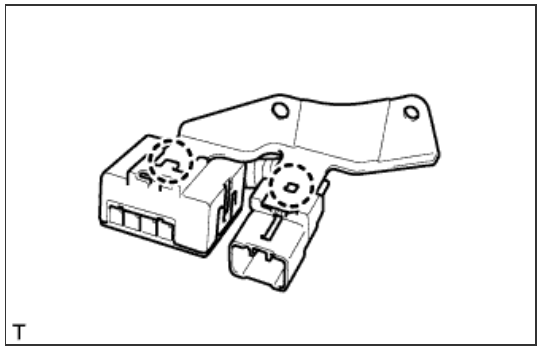
Torque:
21 N*m{ 214 kgf*cm , 15 ft.*lbf }



4. INSTALL REAR SEAT INNER BELT ASSEMBLY

a. Install the seat belt with the bolt.

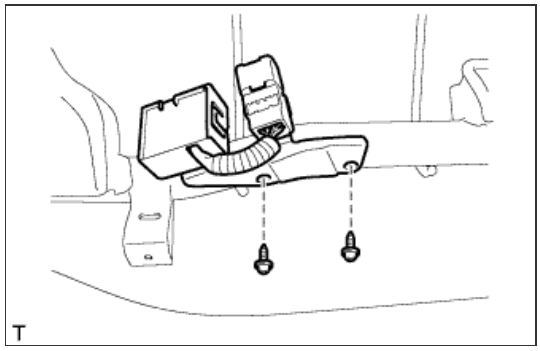
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }



NOTICE:

The anchor part of the seat belt must not overlap the protruding part.

5. INSTALL SEAT HEATER CONTROL SUB-ASSEMBLY LH (w/ Seat Heater System)

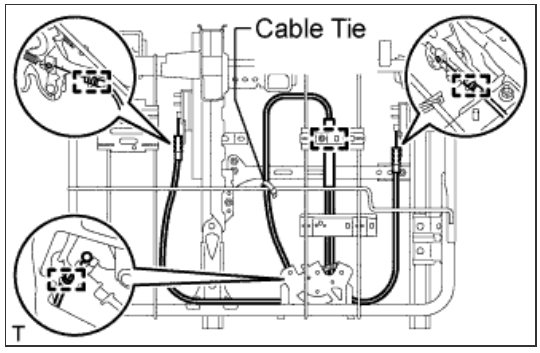


a. Attach the 2 claws to install the seat heater control.

6. INSTALL REAR SEAT CUSHION HOLDER BRACKET LH (w/ Seat Heater System)

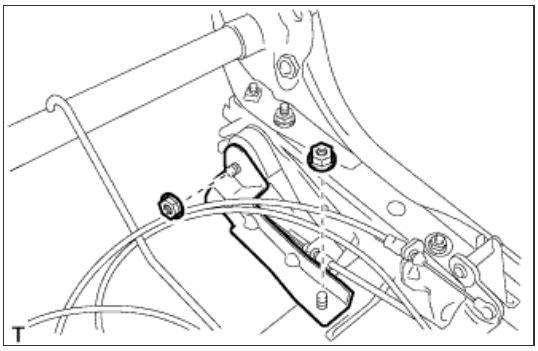
a. Install the holder bracket with the 2 screws.

b. onnect the seat wire connector.



7. INSTALL REAR NO. 1 SEAT LOCK CABLE ASSEMBLY

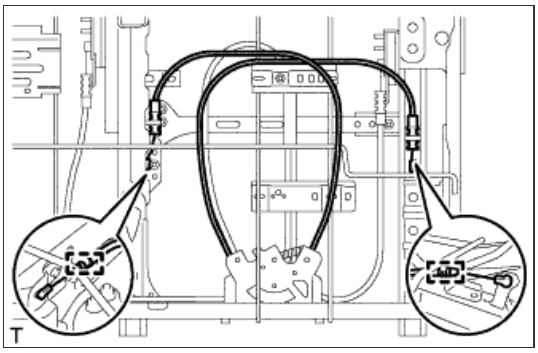
a. Attach the clamp to install the seat lock cable.



b. Attach the 3 cable clamps to connect the 3 cables.

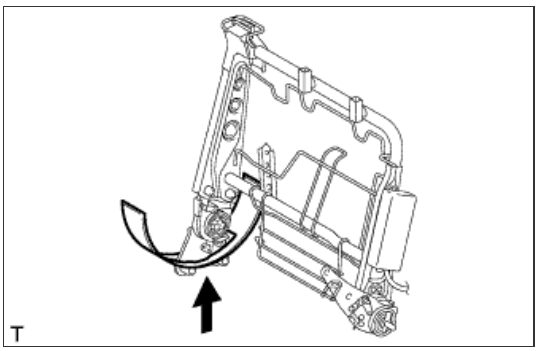
c. onnect the cable and install a new cable tie.

d. Install the lower seat track bracket with the 2 nuts.



Torque:
21 N*m{ 214 kgf*cm , 15 ft.*lbf }

8. INSTALL FOLD SEAT LOCK CONTROL CABLE SUB-ASSEMBLY

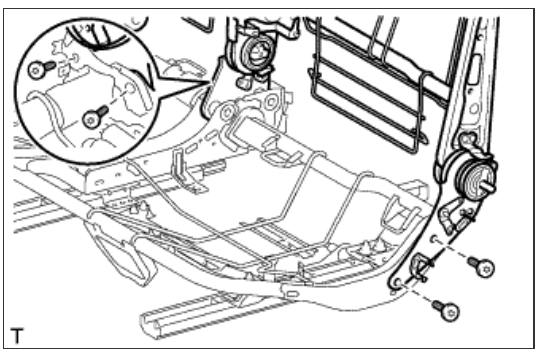


a. Install the 2 fold seat lock control cables.

b. Attach the 2 cable clamps to connect the 2 cables.

9. INSTALL REAR SEATBACK FRAME SUB-ASSEMBLY LH

a. Install the lower seatback cover.

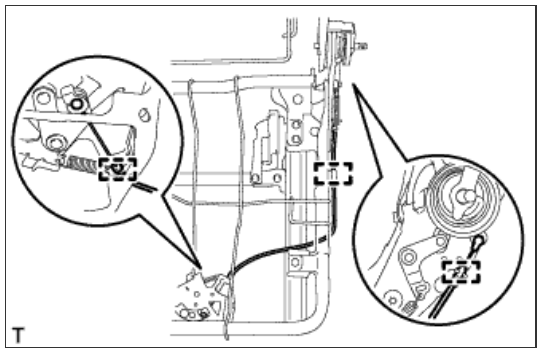


b. Temporarily install the seatback frame with the 4 bolts.

c. LH Side:
Using a T40 "TORX" socket, tighten the 2 bolts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

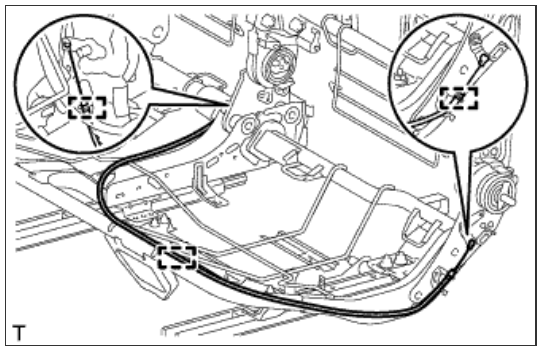
d. RH Side:
Using a T55 "TORX" socket, tighten the 2 bolts.



Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

10. INSTALL NO. 2 FOLD SEAT LOCK CONTROL CABLE ASSEMBLY

a. Attach the clamp to install the lock control cable.

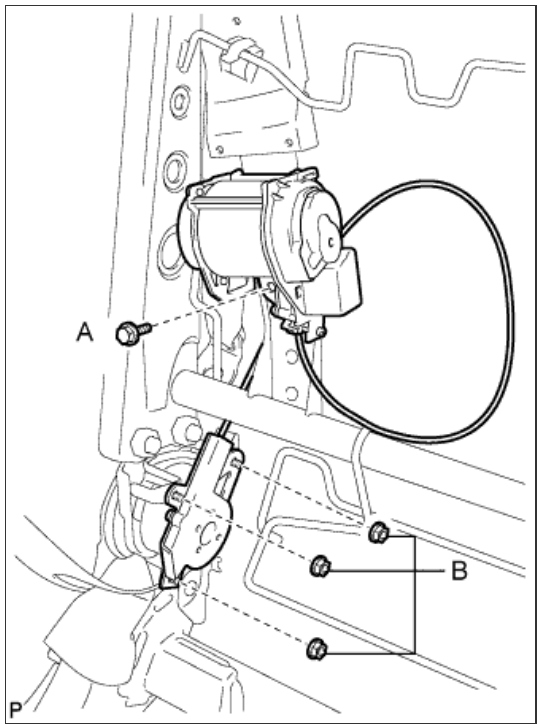


b. Attach the 2 cable clamps to connect the cable.

11. INSTALL RECLININ ADJUSTIN CABLE ASSEMBLY LH

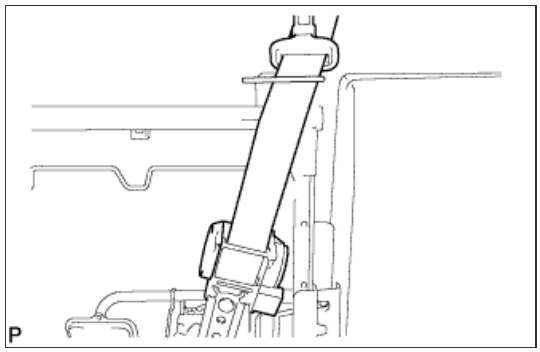
a. Attach the clamp to install the adjusting cable.

b. Attach the 2 cable clamps to connect the cable.



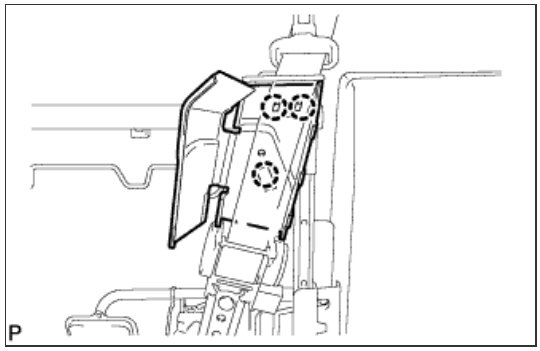
12. INSTALL NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

a. Install the belt with the nut labeled A.



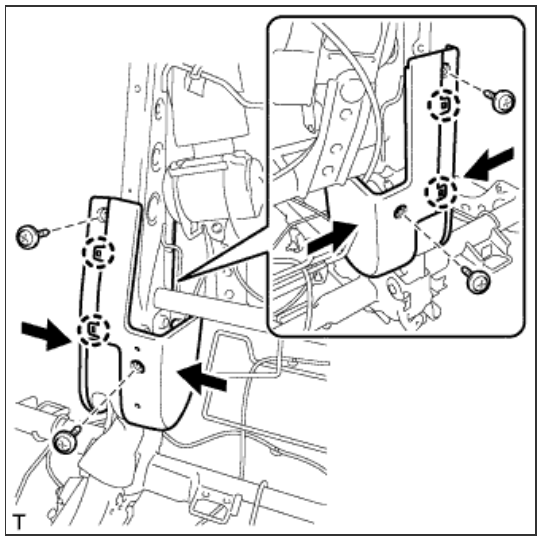
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

b. Install the belt sensor with the 3 nuts labeled B.



13. INSTALL REAR SEAT SHOULDER BELT HOLE COVER LH

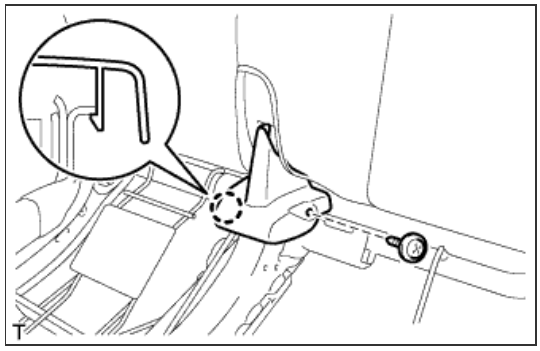
a. Install the seat belt as shown in the illustration.



b. Attach the 3 claws to install the shoulder belt hole cover.

14. INSTALL REAR LOWER SEATBACK COVER SUB-ASSEMBLY LH

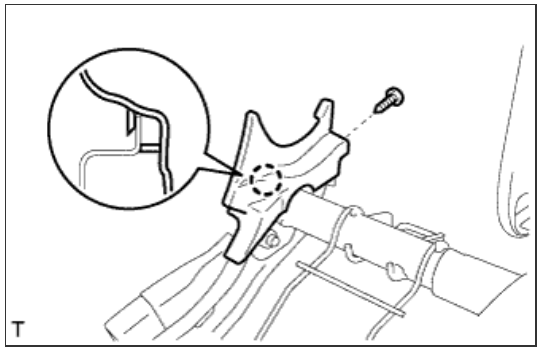
a. Attach the 4 claws to install the cover.



b. Install the 4 screws.

15. INSTALL REAR SEATBACK HIN E COVER LH

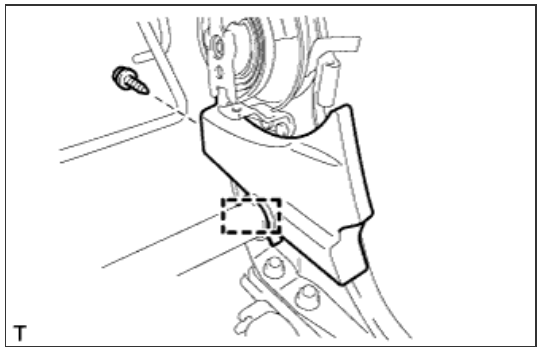
a. Attach the claw to install the cover.



b. Install the screw.

16. INSTALL REAR NO. 1 SEAT RECLININ COVER RH

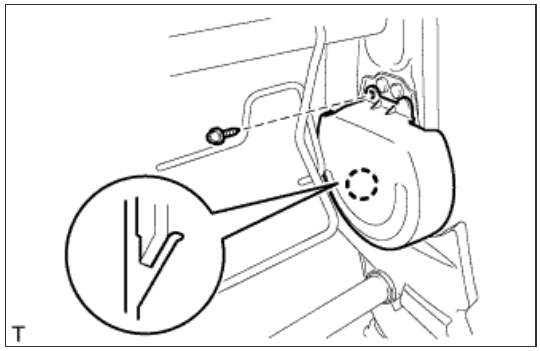
a. Attach the claw to install the cover.



b. Install the screw.

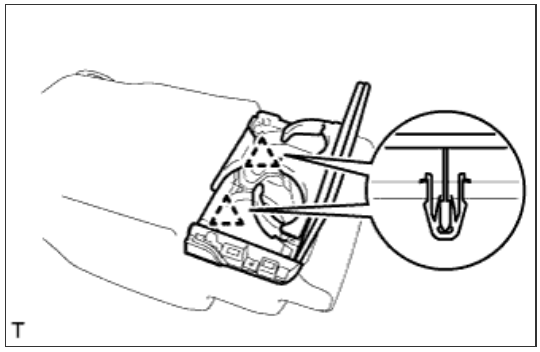
17. INSTALL REAR NO. 2 SEAT RECLININ COVER LH

a. Attach the clamp to install the cover.



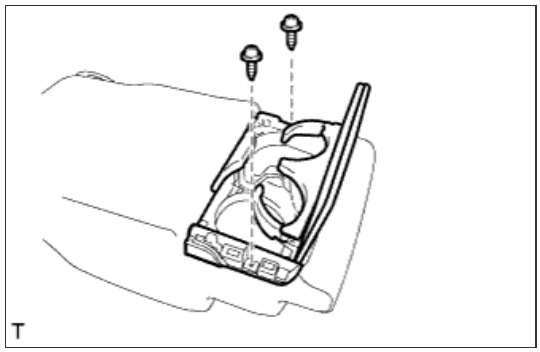
b. Install the screw.

18. INSTALL REAR SEAT RECLININ COVER LH



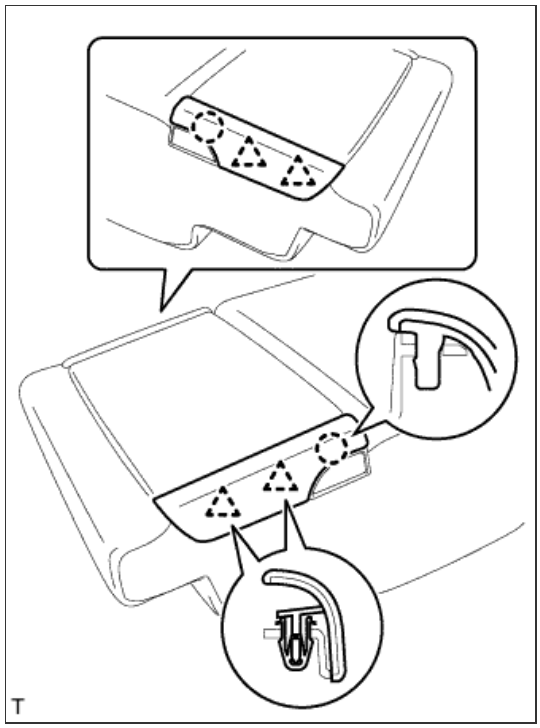
a. Attach the claw to install the cover.

b. Install the screw.



19. INSTALL CUP HOLDER ASSEMBLY (w/ Center Armrest)

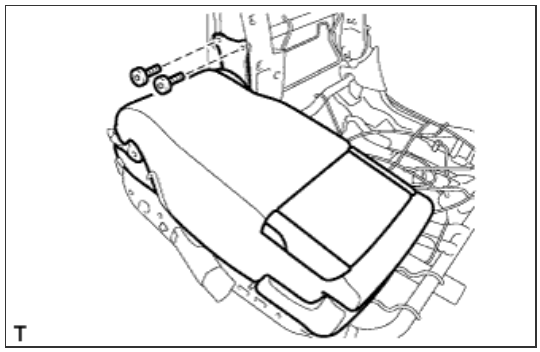
a. Attach the 2 clips to install the cup holder.



b. Install the 2 screws.

20. INSTALL NO. 1 SEAT ARMREST PLATE (w/ Center Armrest)

a. Attach the 2 claws and 4 clips to install the 2 armrest plates.



21. INSTALL REAR CENTER SEAT HEADREST ASSEMBLY (w/ Center Armrest)

22. INSTALL REAR CENTER SEAT ARMREST ASSEMBLY (w/ Center Armrest)

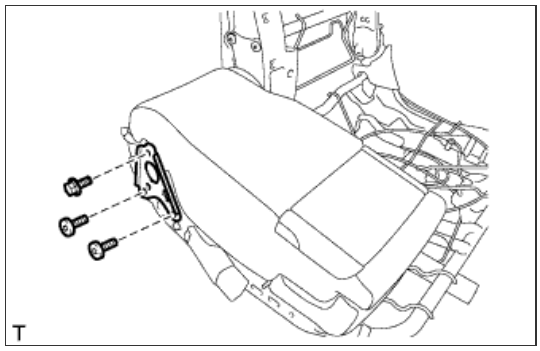
a. Using a T40 "TORX" socket, install the center seat armrest with the 2 bolts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

23. INSTALL SEATBACK STOPPER PLATE

a. w/ enter Armrest:

i. Install the bush to the stopper plate.



ii. Temporarily install the stopper plate with the 3 bolts.

iii. Using a T40 "TORX" socket, tighten the 2 bolts.

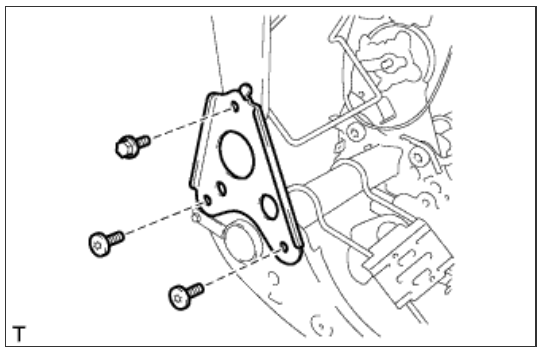
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

iv. Tighten the bolt.

Torque:
15 N*m{ 153 kgf*cm , 11 ft.*lbf }

b. w/o enter Armrest:

i. Install the bush to the stopper plate.

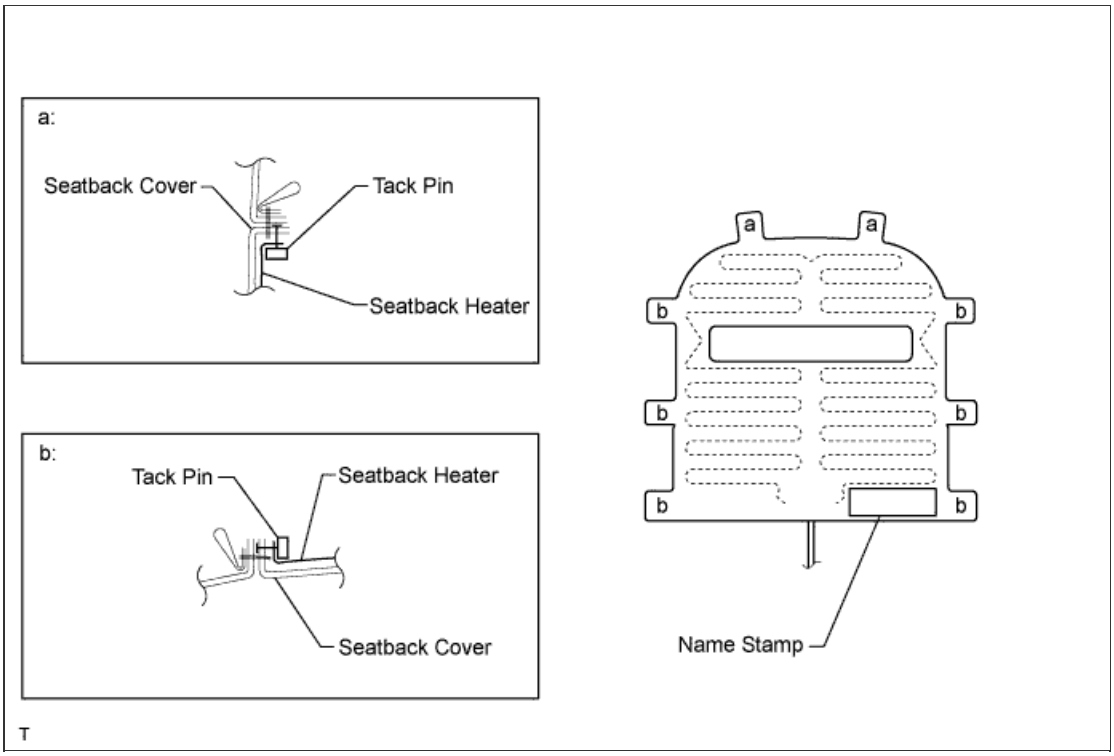


ii. Temporarily install the stopper plate with the 3 bolts.

iii. Using a T40 "TORX" socket, tighten the 2 bolts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

iv. Tighten the bolt.

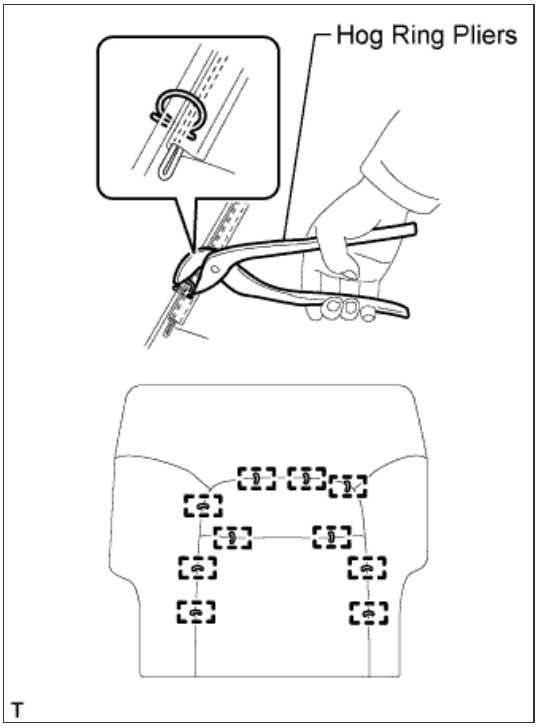


Torque:
15 N*m{ 153 kgf*cm , 11 ft.*lbf }

24. INSTALL REAR SEATBACK HEATER ASSEMBLY (w/ Seat Heater System)

a. Set the seatback heater with the name stamp side facing the seatback cover.

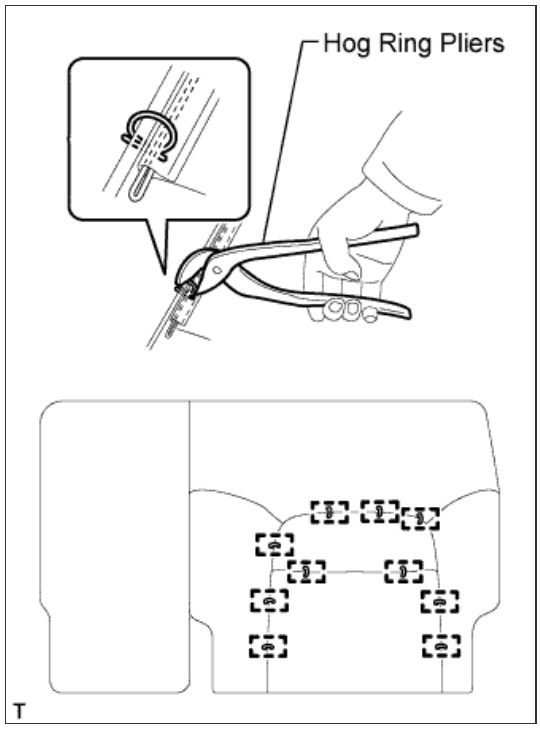
b. Install the seatback heater with new tack pins.



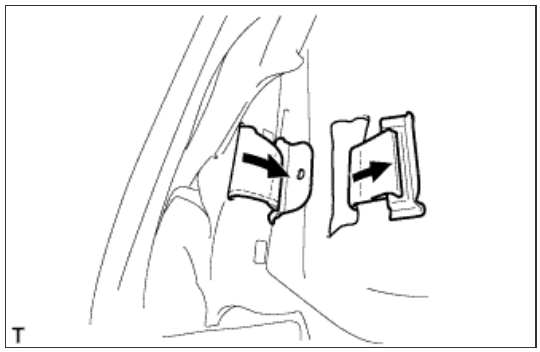
25. INSTALL REAR SEPARATE TYPE SEATBACK COVER

a. w/ enter Armrest:
Using hog ring pliers, install the seatback cover with new hog rings.

NOTICE:



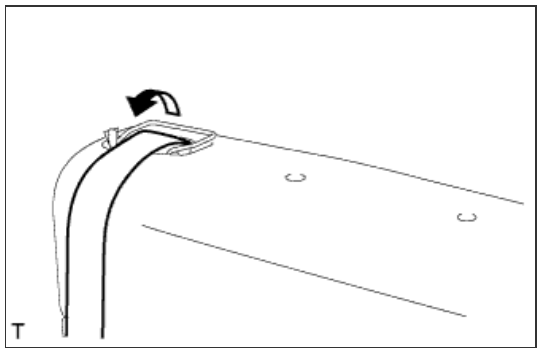
- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**



b. w/o enter Armrest:
Using hog ring pliers, install the seatback cover with new hog rings.

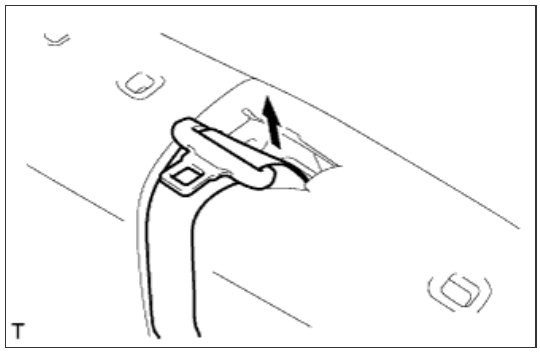
NOTICE:

- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**



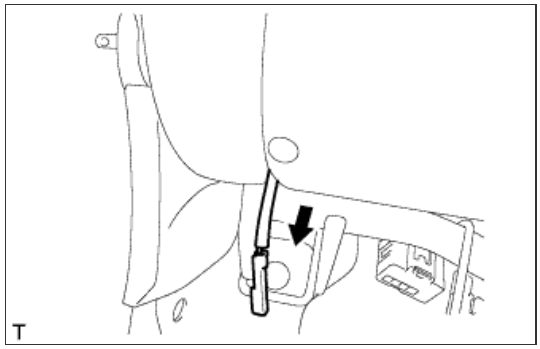
c. w/ Rear Seat Side Airbag:
onnect the seatback cover bracket to the seatback pad.

26. INSTALL SEATBACK COVER WITH PAD



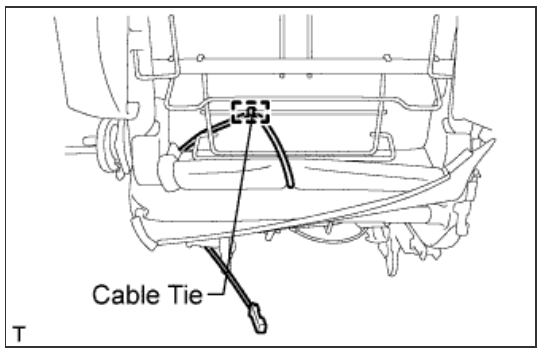
a. Install the seatback cover with pad.

b. w/ enter Armrest:
ull out the seat belt.



c. w/o enter Armrest:
ull out the seat belt.

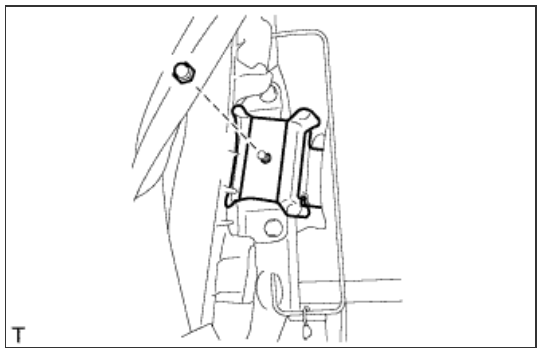
d. w/ Rear Seat Side Airbag:
ass the side airbag wire harness through the hole in the seatback.



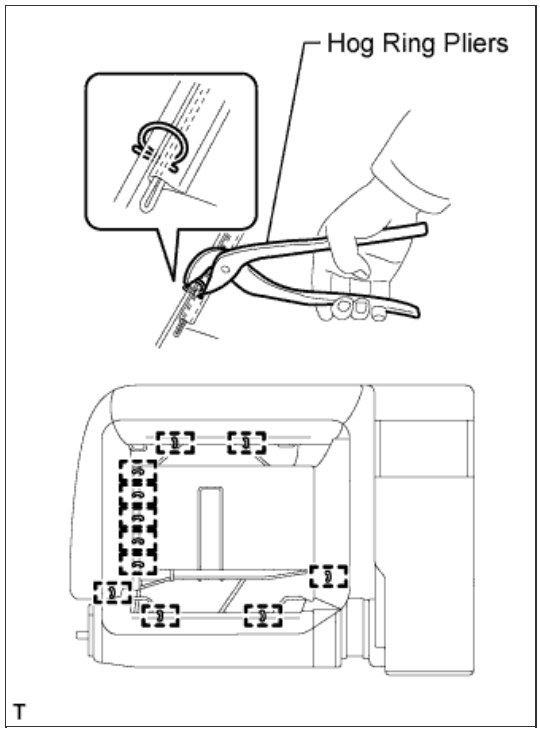
e. w/ Seat Heater System:
ass the seatback heater wire harness through the hole in the seatback.

i.

ii. onnect the seatback heater wire harness and install a new cable tie.

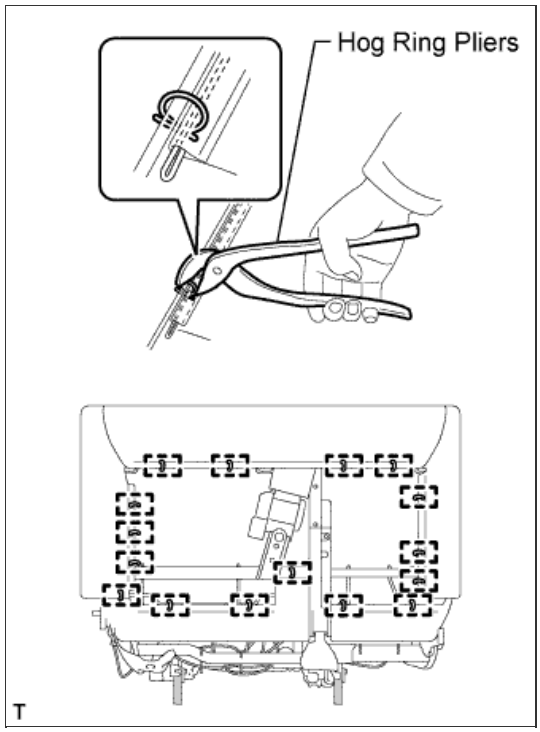


f. w/ Rear Seat Side Airbag:
Install the seatback cover bracket to the seat frame with the cap nut.



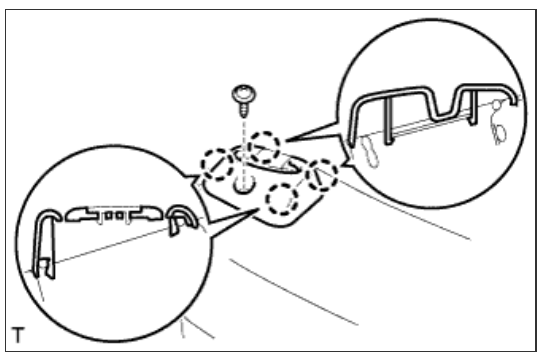
Torque:
5.5 N*m{ 56 kgf*cm , 49 in.*lbf }

NOTICE:



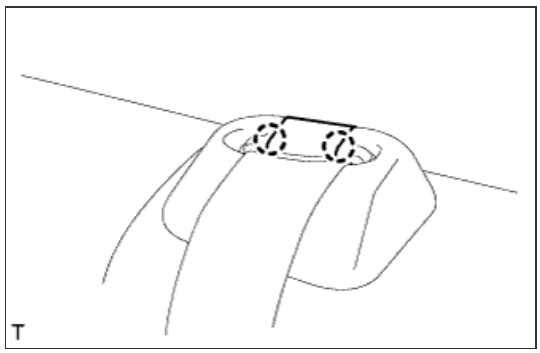
After the seatback trim cover is assembled, make sure the side airbag strap is not twisted.

g. w/ enter Armrest:
Using hog ring pliers, install new hog rings to the seatback frame.



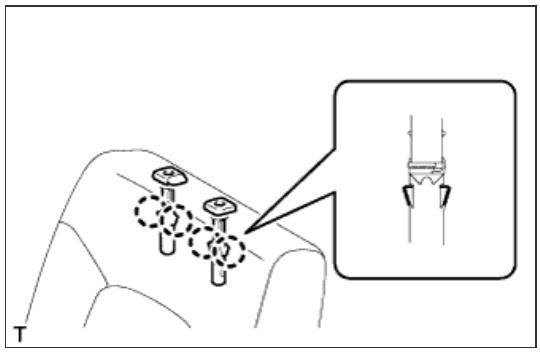
h. w/o enter Armrest:
Using hog ring pliers, install new hog rings to the seatback frame.

27. INSTALL REAR SEAT SHOULDER BELT HOLE COVER LH



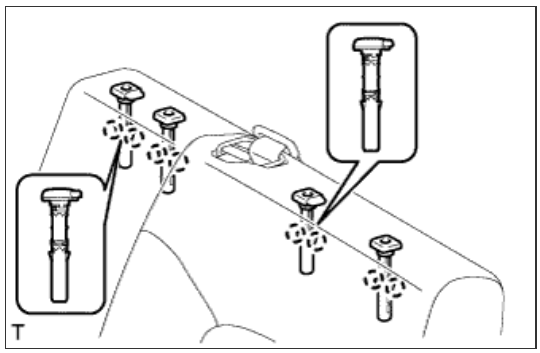
a. Attach the 4 claws to install the cover.

b. Install the screw.



28. INSTALL SHOULDER BELT ANCHOR COVER

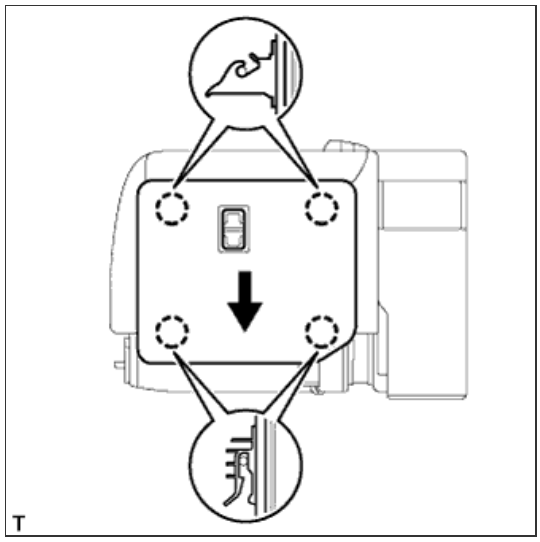
a. Attach the 2 claws to install the cover.



29. INSTALL REAR NO. 1 SEAT HEADREST SUPPORT ASSEMBLY

a. w/ enter Armrest:
Attach the 4 claws to install the 2 supports.

b. w/o enter Armrest:
Attach the 8 claws to install the 4 supports.

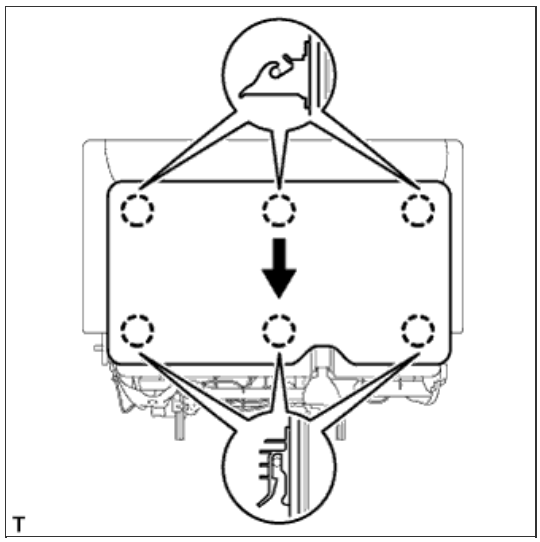


30. INSTALL REAR SEAT HEADREST ASSEMBLY

31. INSTALL REAR SEATBACK BOARD SUB-ASSEMBLY LH

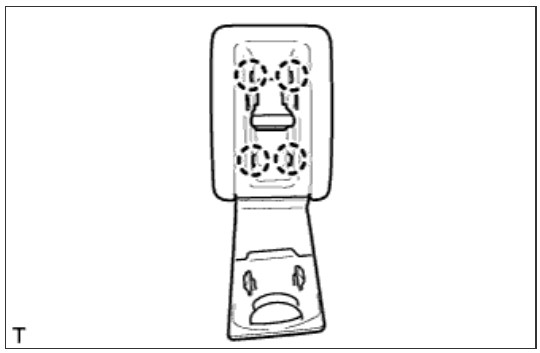
a. w/ enter Armrest:

i. ush the board down to attach the 2 claws on the bottom.



ii. Attach the 2 claws on the top of the board to install it.

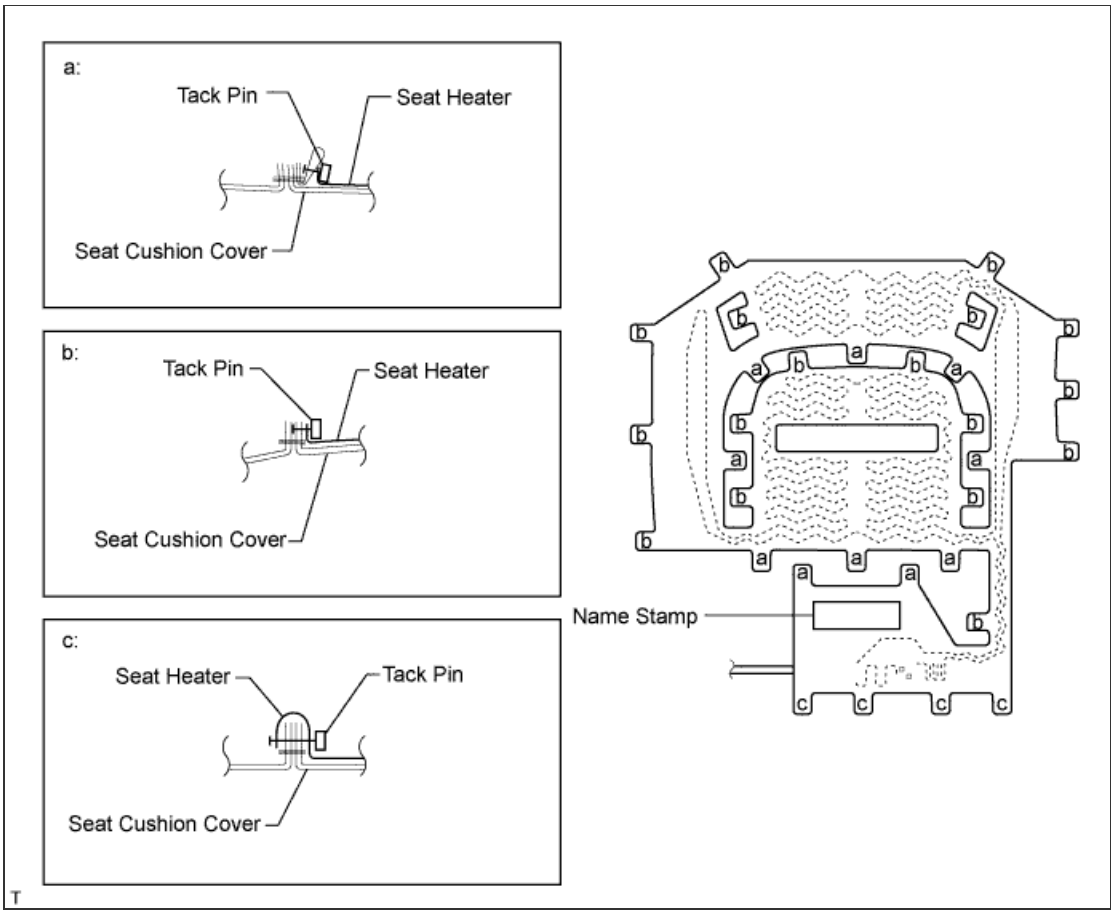
b. w/o enter Armrest:



i. ush the board down to attach the 3 claws on the bottom.

ii. Attach the 3 claws on the top of the board to install it.

32. INSTALL REAR SEATBACK COVER

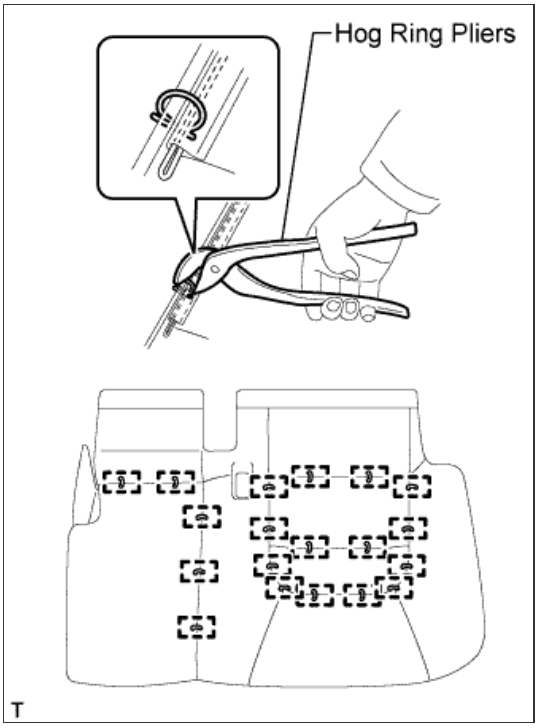


a. Attach the 4 claws to install the cover.

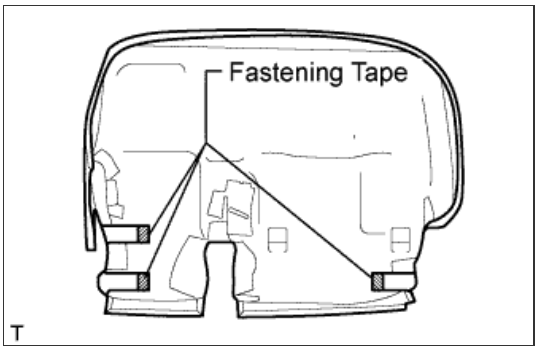
33. INSTALL REAR SEAT CUSHION HEATER ASSEMBLY (w/ Seat Heater System)

a. Set the seat cushion heater with the name stamp side facing the seat cushion cover.

b. Install the seat cushion heater with new tack pins.



34. INSTALL REAR SEPARATE TYPE SEAT CUSHION COVER

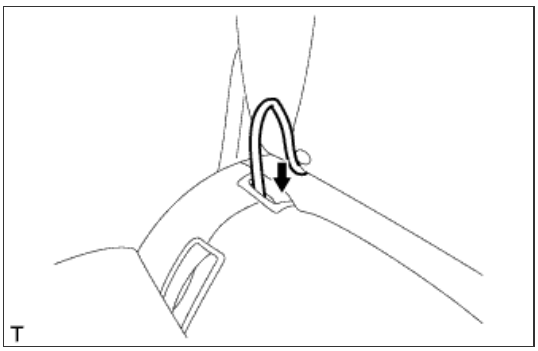


a. Using hog ring pliers, install the seat cushion cover to the seat cushion pad with new hog rings.

NOTICE:

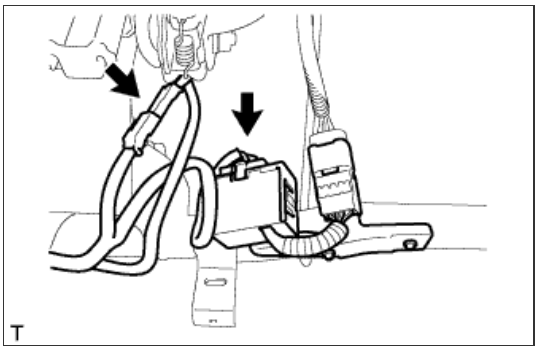
- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**

b. Attach the 3 pieces of fastening tape.



35. INSTALL SEAT CUSHION COVER WITH PAD

a. Install the seat cushion cover with pad.

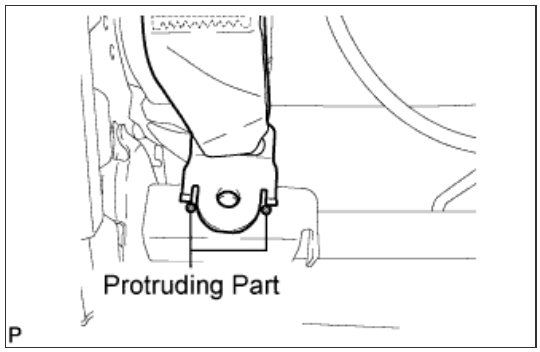


b. w/ Rear Seat Side Airbag:
ass the side airbag wire harness through the hole in the seat cushion.

c. w/ Seat Heater System:

i. ass the seatback heater wire harness through the hole in the seat cushion.

ii. onnect the 2 seat heater connectors.



d. w/ Rear Seat Side Airbag:
Attach the side airbag wire harness clamps.

36. CONNECT NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

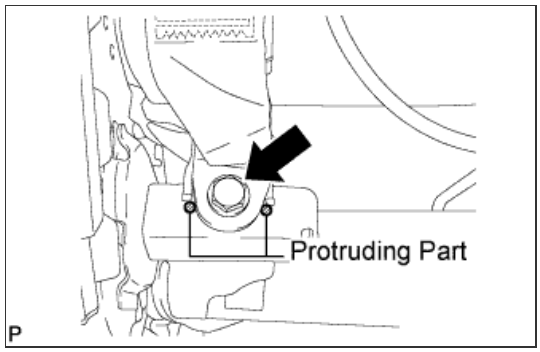
a. onnect the belt anchor.

NOTICE:

o not overlap the anchor part of the seat belt and protruding parts of the vehicle body.

37. INSTALL REAR NO. 1 SEAT INNER BELT ASSEMBLY LH

a. Install the belt with the bolt.

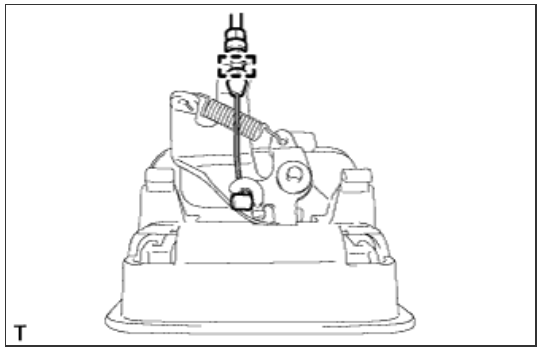


Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

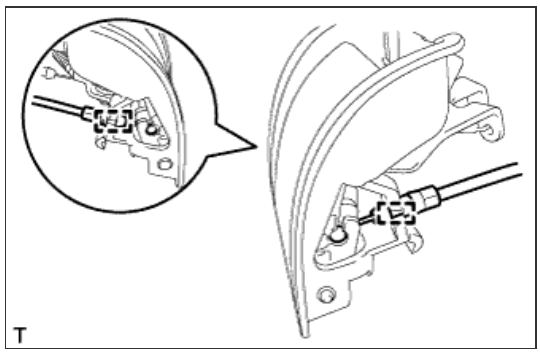
NOTICE:

o not overlap the anchor part of the seat belt and protruding parts of the vehicle body.

HINT:

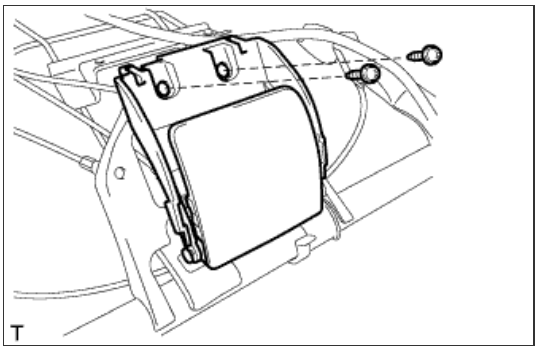


The No. 1 seat 3 point type belt anchor is fi ed with the same bolt as the rear No. 1 seat inner belt LH. Therefore, connect it when installing the rear No. 1 seat inner belt LH.



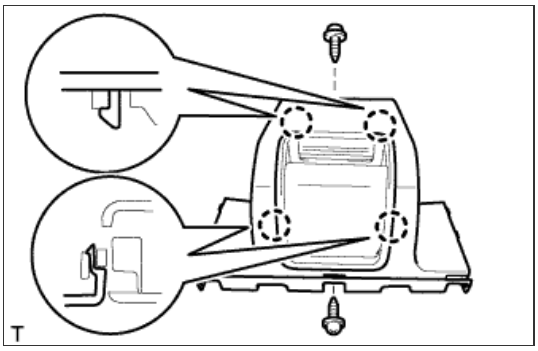
38. INSTALL FOLD SEAT LOCK CONTROL CABLE SUB-ASSEMBLY

39. INSTALL REAR SEAT TRACK HANDLE SUB-ASSEMBLY



a. Attach the cable clamp to connect the cable.

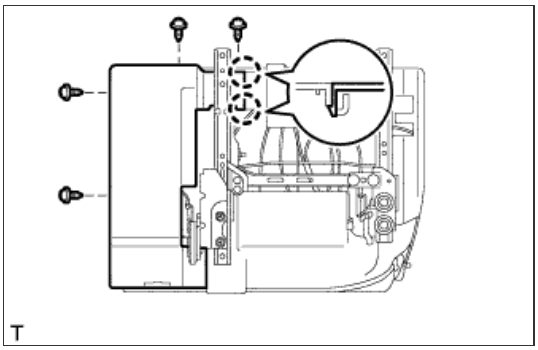
b. Attach the 2 cable clamps to connect the 2 cables.



c. Install the seat track handle with the 2 screws.

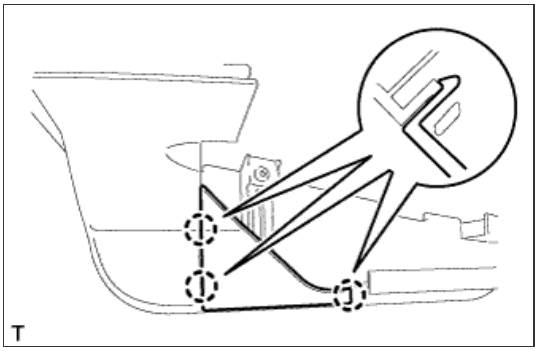
40. INSTALL REAR SEAT UNDER TRAY COVER LH

a. Attach the 4 claws to install the cover.



b. Install the 2 screws.

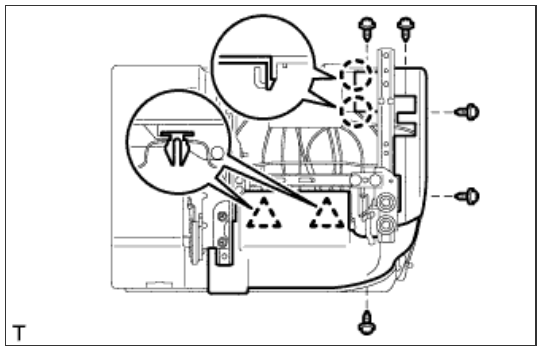
41. INSTALL REAR SEAT CUSHION COVER RH



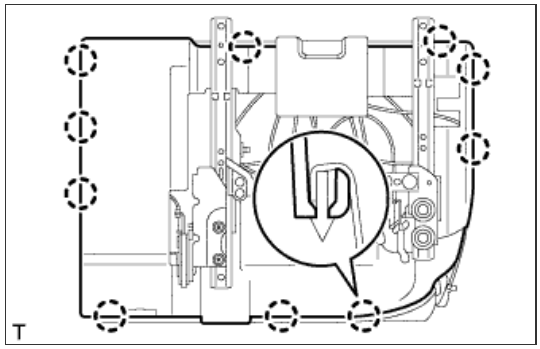
a. Attach the 2 claws to install the cover.

b. Install the 4 screws.

42. INSTALL NO. 1 SEAT CUSHION PLATE



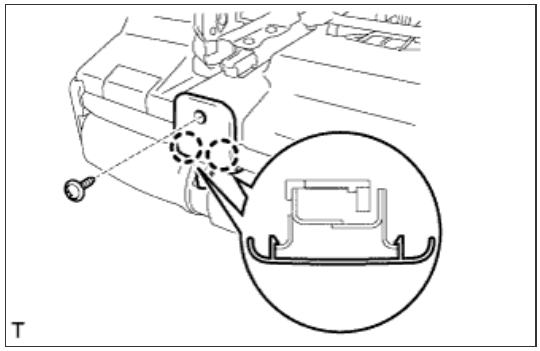
a. Attach the 3 claws to install the seat cushion plate.



43. INSTALL REAR UNDER SIDE COVER LH

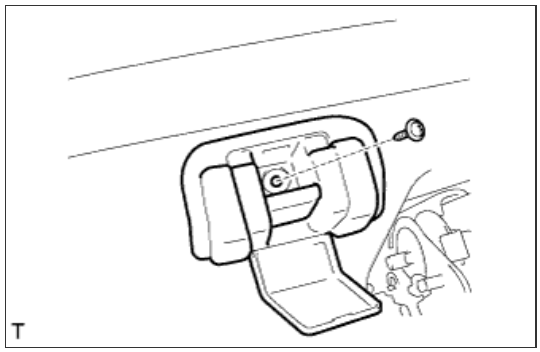
a. Attach the 2 claws and 2 clips to install the cover.

b. Install the 5 screws.



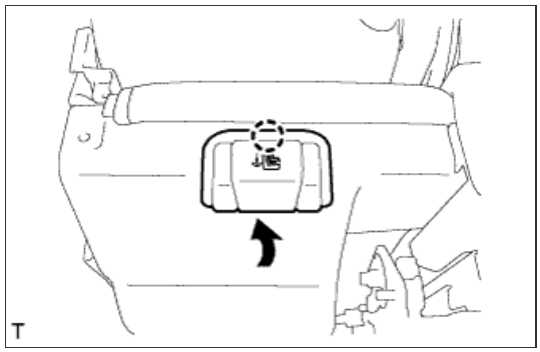
c. Attach the 10 claws.

44. INSTALL REAR SEATBACK STAY COVER LH



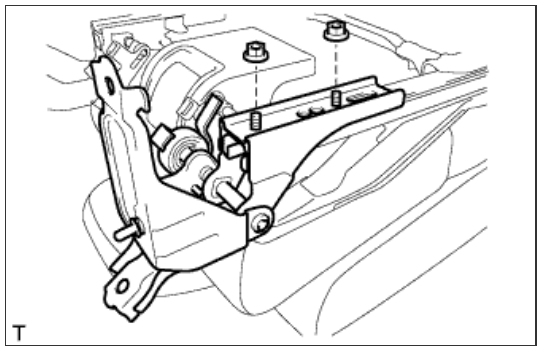
a. Attach the 2 claws to install the cover.

b. Install the screw.



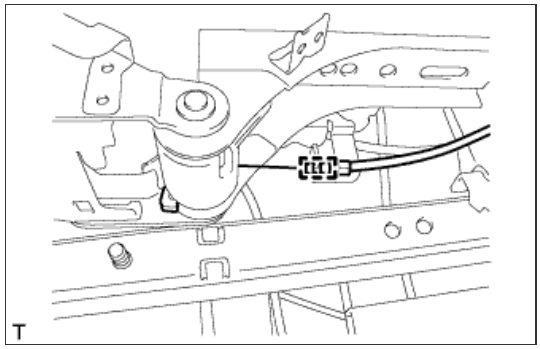
45. INSTALL SEAT BELT ANCHOR COVER CAP

a. Install the anchor cover cap with the screw.



b. Attach the claw to close the cap.

46. INSTALL REAR NO. 1 SEAT HIN E SUB-ASSEMBLY RH

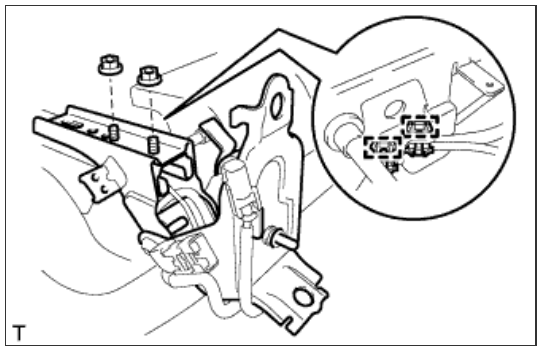


a. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

47. INSTALL REAR NO. 1 SEAT HIN E SUB-ASSEMBLY LH

a. Attach the cable clamp to connect the cable.

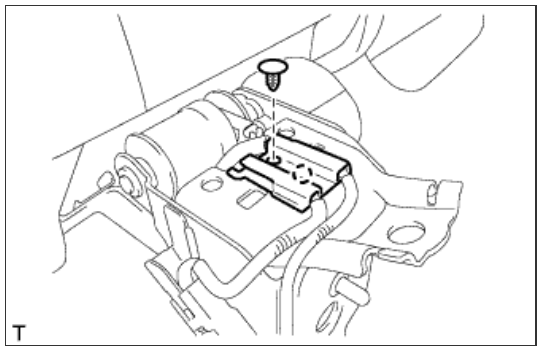


b. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

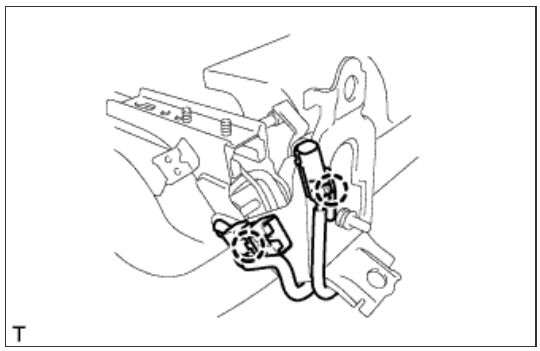
c. w/ Rear Seat Side Airbag:
Attach the wire harness clamp.

d. w/ Seat Heater System:
Attach the wire harness clamp.



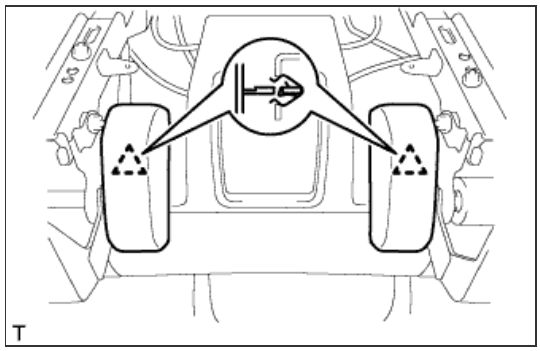
48. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Install the wire harness, and attach 2 claws to close the protector.



b. Attach the claw to install the protector to the seat hinge.

c. Install the clip.

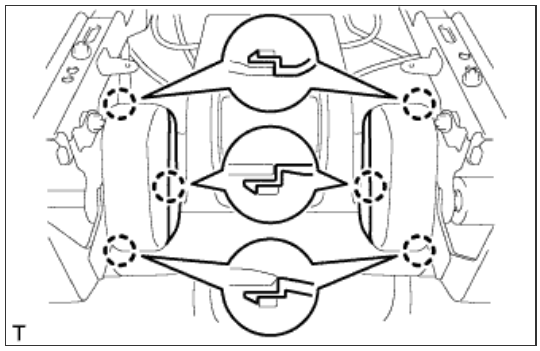


d. w/ Rear Seat Side Airbag:
Attach the claw to install the wire harness connector.

e. w/ Seat Heater System:
Attach the claw to install the wire harness connector.

49. INSTALL REAR SEAT SIDE HIN E MALE COVER RH

a. Attach the clip to install the cover.

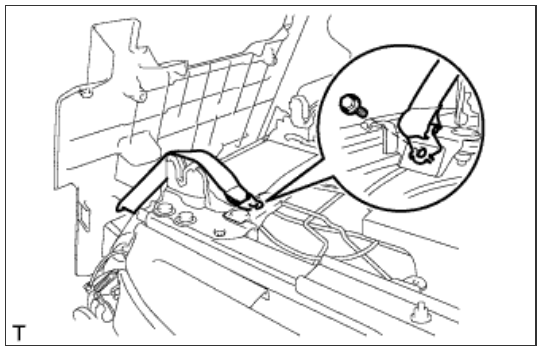


50. INSTALL REAR SEAT SIDE HIN E MALE COVER LH

a. Attach the clip to install the cover.

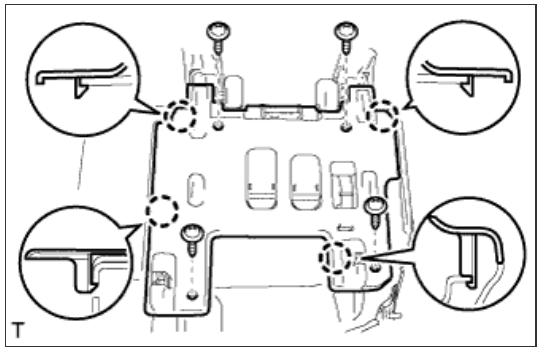
51. INSTALL REAR SEAT SIDE HIN E FEMALE COVER

a. Attach the 6 claws to install the 2 covers.



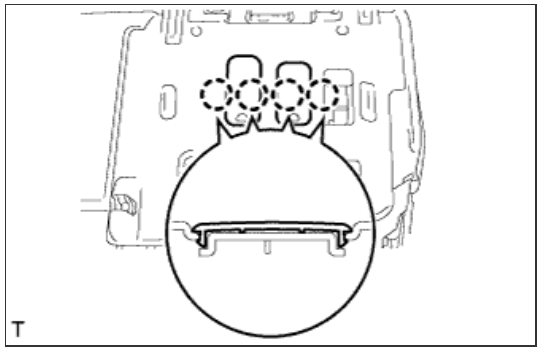
52. INSTALL FOLD SEAT STOPPER BAND ASSEMBLY

a. Install the fold seat stopper band to the seat leg side cover.



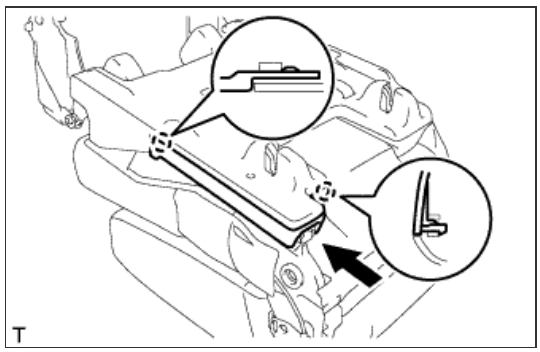
53. INSTALL REAR NO. 2 SEAT LE SIDE COVER

a. ass the fold seat stopper band through the seat leg side cover and attach it to the seat cushion frame with the bolt.



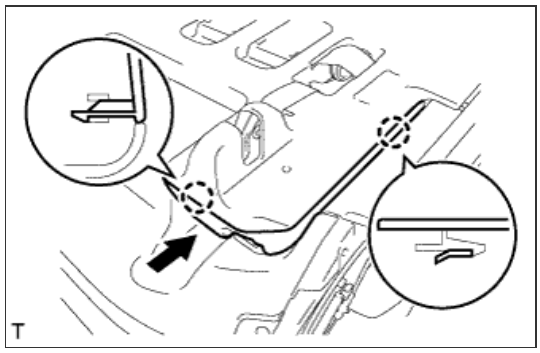
b. Attach the 4 claws to install the seat leg side cover.

c. Install the 4 screws.



54. INSTALL NO. 1 SEAT CUSHION COVER

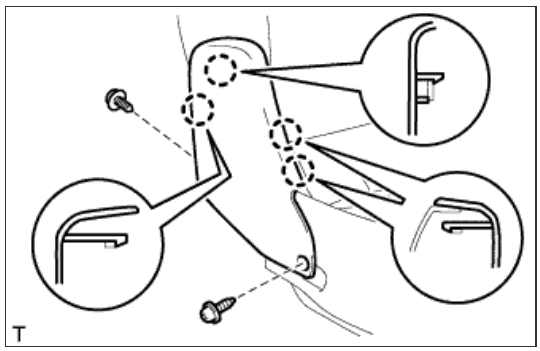
a. Attach the 4 claws to install the 2 covers.



55. INSTALL UPPER SEAT TRACK RAIL COVER RH

a. Attach the 2 claws to install the cover.

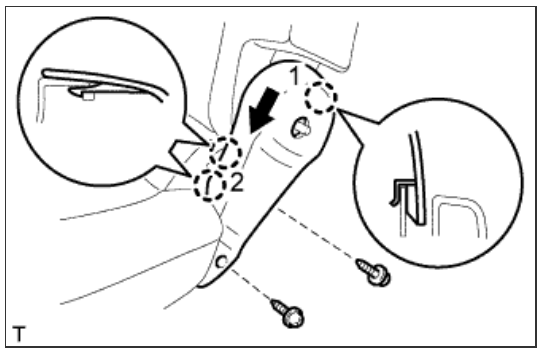
56. INSTALL UPPER SEAT TRACK RAIL COVER LH



a. Attach the 2 claws to install the cover.

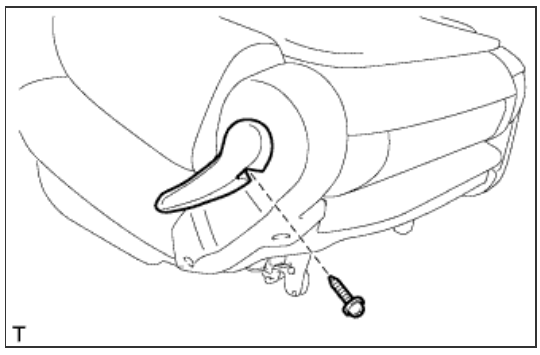
57. INSTALL REAR NO. 1 SEAT RECLININ COVER RH

a. Attach the 4 claws to install the cover.



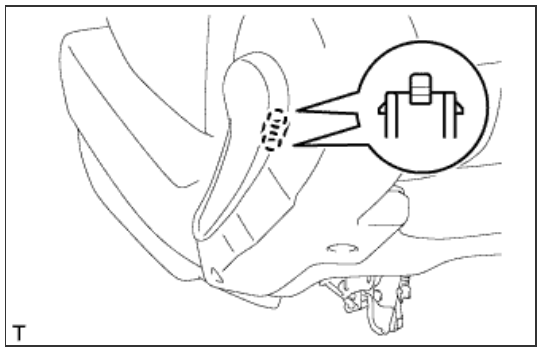
b. Install the 2 screws.

58. INSTALL REAR NO. 1 SEAT RECLININ COVER LH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

b. Install the 2 screws.



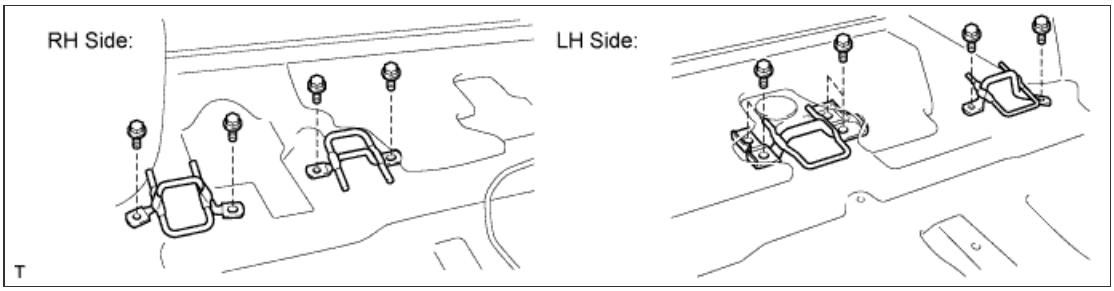
59. INSTALL RECLININ ADJUSTER RELEASE HANDLE LH

a. Install the release handle with the screw.

60. INSTALL SEAT ADJUSTER BOLT COVER

a. Attach the 2 claws to install the cover.

for Preparation Click here

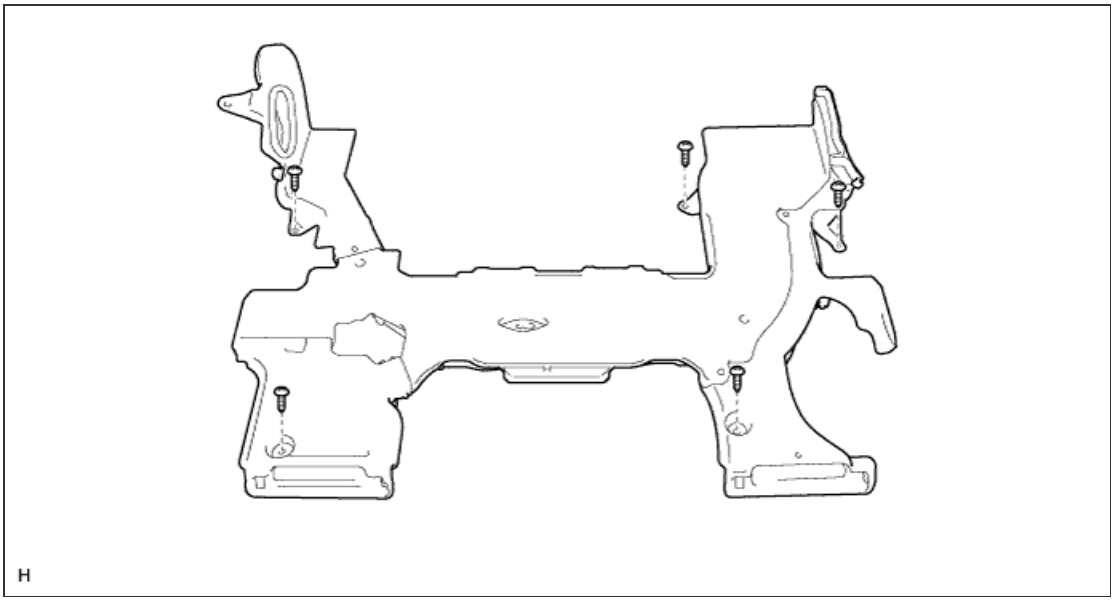


HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL REAR SEAT CUSHION LOCK STRIKER SUB-ASSEMBLY

a. Install the 4 lock strikers with the bolts.



Torque:
37 N*m{ 377 kgf*cm , 27 ft.*lbf }

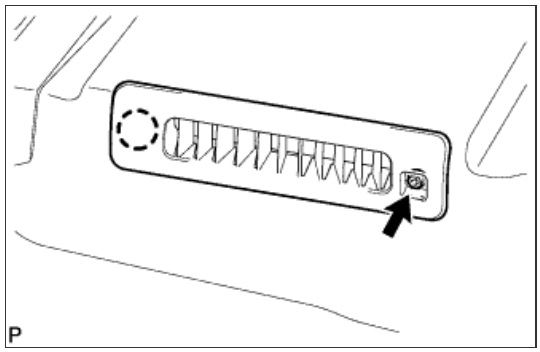
2. INSTALL REAR NO. 6 AIR DUCT (w/ Rear Air Conditioning System)

a. Install the duct with the 5 screws.

b. Connect the 2 connectors.

3. INSTALL RONT LOOR CARPET ASSEMBLY

a. Install the floor carpet.



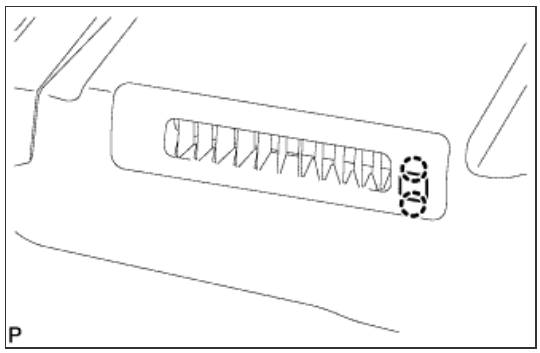
4. INSTALL REAR AIR DUCT UIDE (w/ Rear Air Conditioning System)

a. Attach the claw to install the guide.

b. Install the screw.

HINT:

Use the same procedures for both sides.



5. INSTALL AIR DUCT PLU (w/ Rear Air Conditioning System)

a. Attach the 2 claws to install the plug.

HINT:

Use the same procedures for both sides.

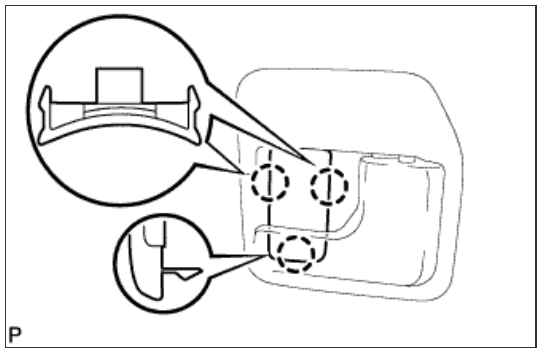
6. INSTALL RONT QUARTER TRIM PANEL ASSEMBLY LH

a. w/ Sliding Roof:
Install the front quarter trim panel assembly LH (Click here).

b. w/o Sliding Roof:
Install the front quarter trim panel assembly LH (Click here).

7. INSTALL RONT QUARTER TRIM PANEL ASSEMBLY RH

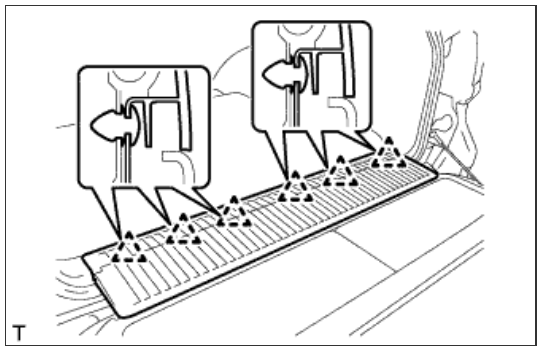
a. w/ Sliding Roof:
Install the front quarter trim panel assembly RH (Click here).



b. w/o Sliding Roof:
Install the front quarter trim panel assembly RH (Click here).

8. INSTALL REAR SEAT CO ER CAP (w/ Rear No. 2 Seat, except ae to ae Seat Type)

HINT:



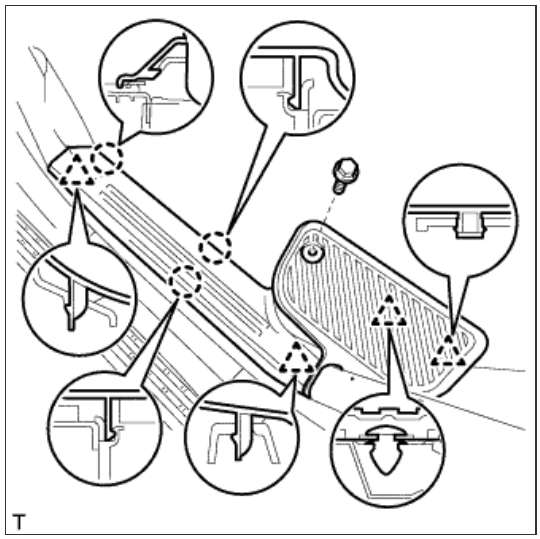
Use the same procedure to install the rear seat cover cap on the other side.

a. Attach the 3 claws to install the rear seat cover cap.

9. INSTALL REAR LOOR MAT REAR SUPPORT PLATE

a. Attach the clips to install the support plate.

10. INSTALL REAR NO. 2 SEAT ASSEMBLY



a. for Face to Face Seat Type:
Install the rear o. 2 seat assembly (Click here).

b. e cept Face to Face Seat Type:
Install the rear o. 2 seat assembly (Click here).

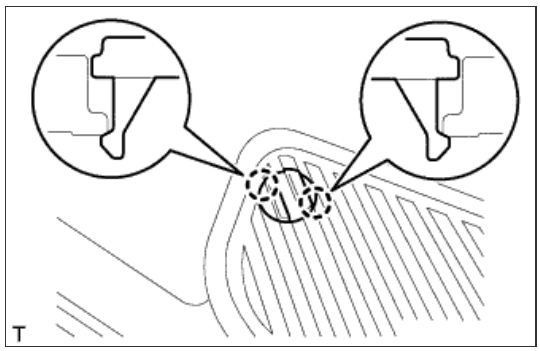
11. INSTALL REAR DOOR SCU PLATE LH

a. Attach the 3 claws and 4 clips to install the scuff plate.

b. Install the screw.

12. INSTALL REAR DOOR SCU PLATE RH

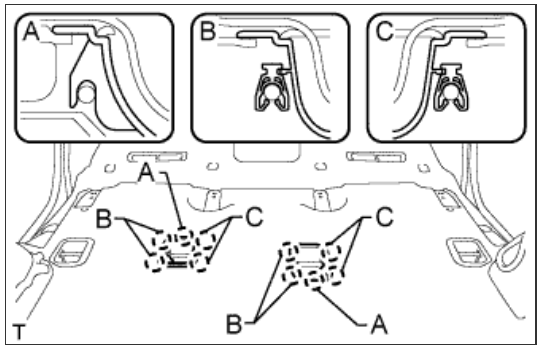
HINT:



Use the same procedures described for the LH side.

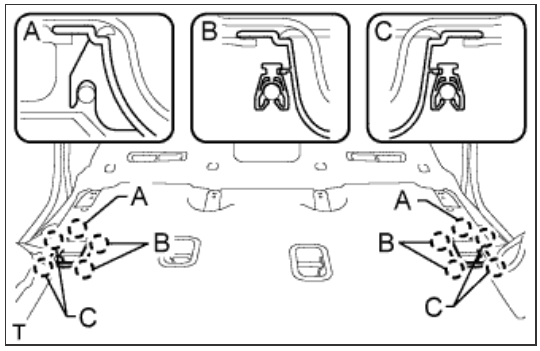
13. INSTALL REAR STEP CO ER

HINT:



Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.



14. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Attach the claws to install the 2 seat protectors.

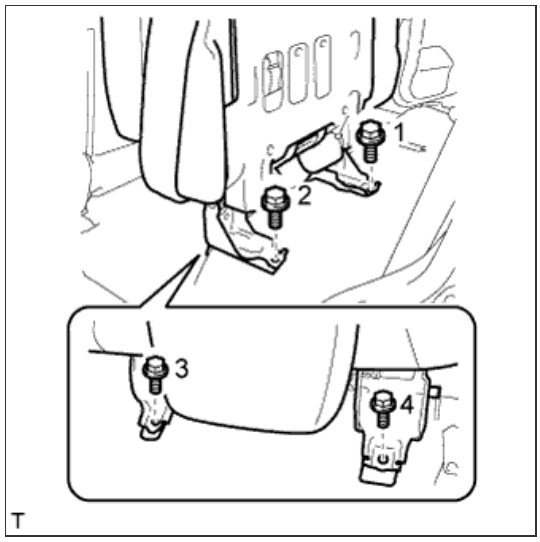
15. INSTALL REAR NO. 1 SEAT PROTECTOR

a. Attach the claws to install the 2 seat protectors.

16. INSTALL REAR NO. 1 SEAT ASSEMBLY RH

a. Install the rear o. seat assembly RH (Click here).

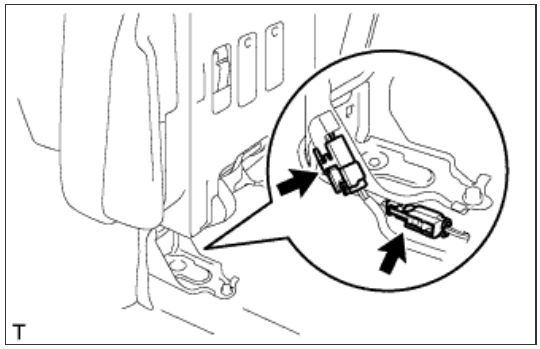
17. INSTALL REAR NO. 1 SEAT ASSEMBLY LH



a. Temporarily install the seat assembly with the 4 bolts.

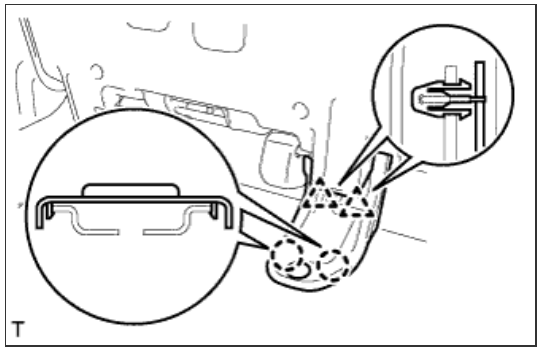
NOTICE:

Be careful not to damage the vehicle body.



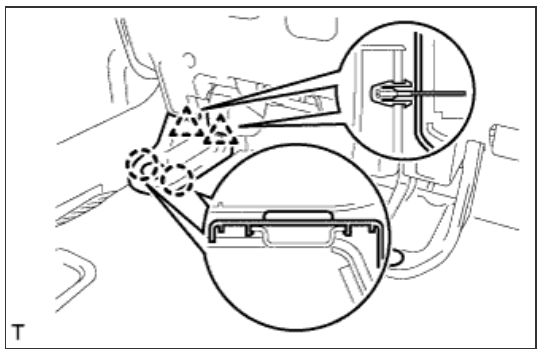
b. Tighten the bolts in the order shown in the illustration.

Torque:
37 N*m{ 377 kgf*cm , 27 ft.*lbf }



c. w/ Rear Seat Side Airbag:
Connect the connector.

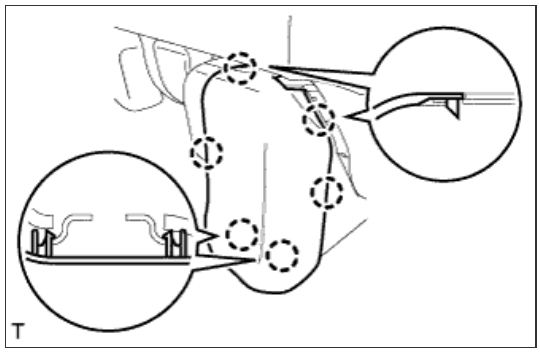
d. w/ Seat Heater System:
Connect the connector.



18. INSTALL REAR NO. 4 SEAT CUSHION HIN E CO ER

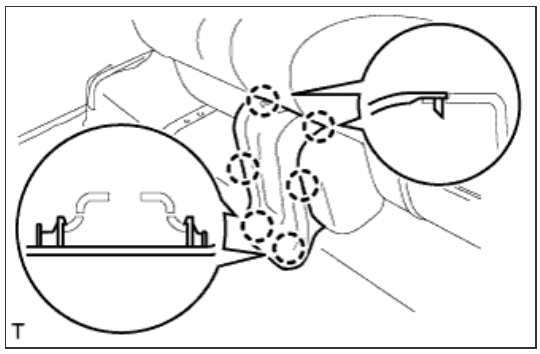
a. Attach the 2 clips and 2 claws to install the cover.

19. INSTALL REAR NO. 2 SEAT CUSHION HIN E CO ER



a. Attach the 2 clips and 2 claws to install the cover.

20. INSTALL REAR NO. 5 SEAT CUSHION HIN E CO ER



a. Return the seat to the upright position.

b. Attach the claws to install the cover.

21. INSTALL REAR NO. 3 SEAT CUSHION HIN E CO ER

a. Attach the claws to install the cover.

22. CONNECT CABLE TO NE ATI E BATTERY TERMINAL

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

23. CHECK SRS ARIN LI HT

a. Check the SRS warning light (Click here).

24. INSPECT REAR NO. 1 SEAT ASSEMBLY LH

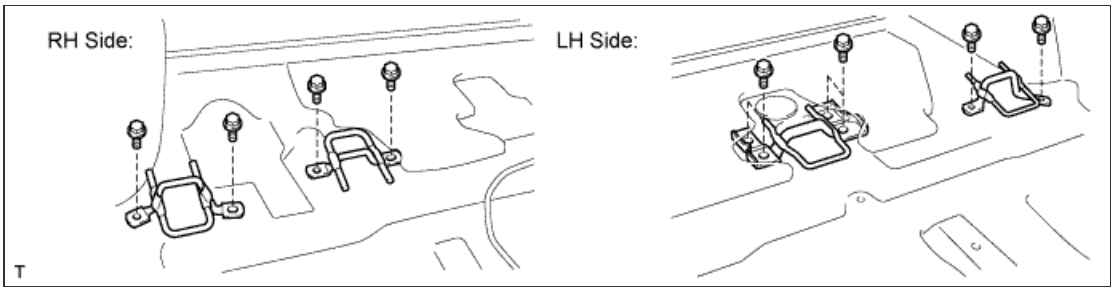
a. w/ Seat Heater System:
Check the seat heater operation.

i. Turn the engine switch on (IG).

ii. Turn the seat heater switch on.

iii. Wait 5 minutes or more and confirm that the seat surface becomes warm.

for Preparation Click here

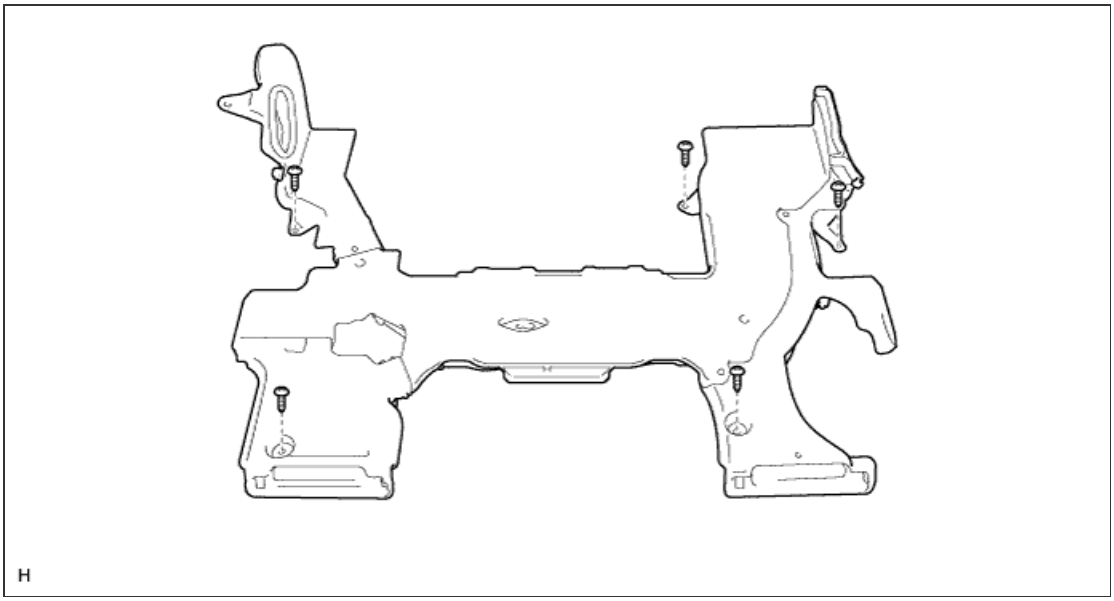


HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL REAR SEAT CUSHION LOCK STRIKER SUB-ASSEMBLY

a. Install the 4 lock strikers with the bolts.



Torque:
37 N*m{ 377 kgf*cm , 27 ft.*lbf }

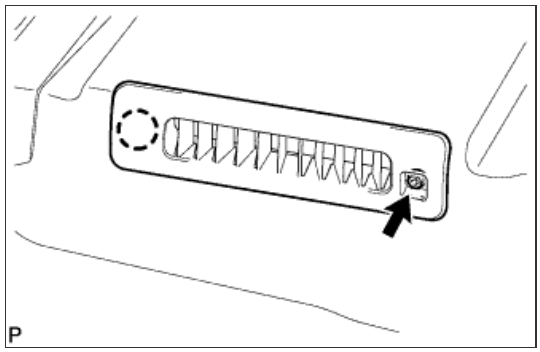
2. INSTALL REAR NO. 6 AIR DUCT (w/ Rear Air Conditioning System)

a. Install the duct with the 5 screws.

b. Connect the 2 connectors.

3. INSTALL RONT LOOR CARPET ASSEMBLY

a. Install the floor carpet.



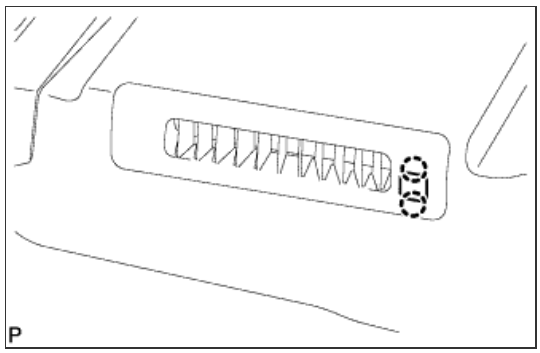
4. INSTALL REAR AIR DUCT UIDE (w/ Rear Air Conditioning System)

a. Attach the claw to install the guide.

b. Install the screw.

HINT:

Use the same procedures for both sides.



5. INSTALL AIR DUCT PLU (w/ Rear Air Conditioning System)

a. Attach the 2 claws to install the plug.

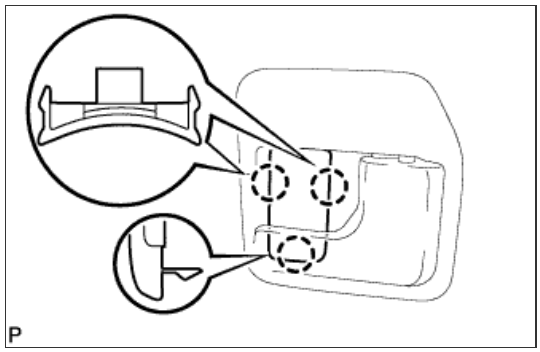
a. w/ Sliding Roof:
Install the front quarter trim panel assembly LH (Click here).

b. w/o Sliding Roof:
Install the front quarter trim panel assembly LH (Click here).

7. INSTALL RONT QUARTER TRIM PANEL ASSEMBLY RH

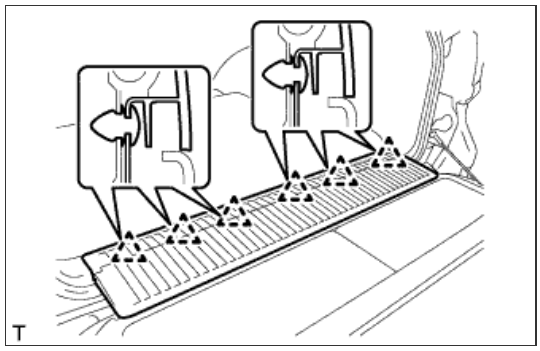
a. w/ Sliding Roof:
Install the front quarter trim panel assembly RH (Click here).



b. w/o Sliding Roof:
Install the front quarter trim panel assembly RH (Click here).

8. INSTALL REAR SEAT CO ER CAP (w/ Rear No. 2 Seat, except ae to ae Seat Type)

HINT:



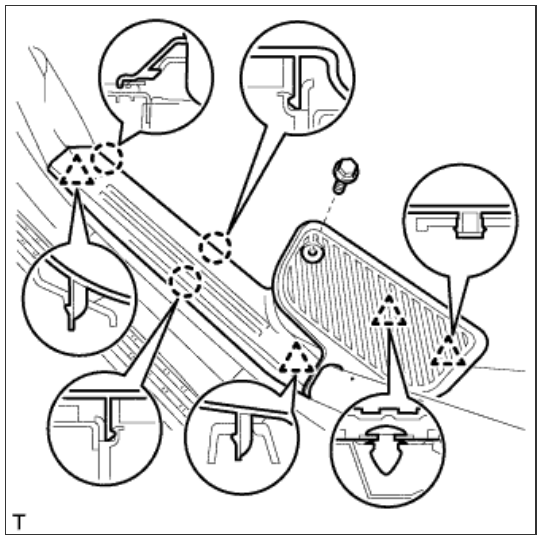
Use the same procedure to install the rear seat cover cap on the other side.

a. Attach the 3 claws to install the rear seat cover cap.

9. INSTALL REAR LOOR MAT REAR SUPPORT PLATE

a. Attach the clips to install the support plate.

10. INSTALL REAR NO. 2 SEAT ASSEMBLY



a. for Face to Face Seat Type:
Install the rear o. 2 seat assembly (Click here).

b. e cept Face to Face Seat Type:
Install the rear o. 2 seat assembly (Click here).

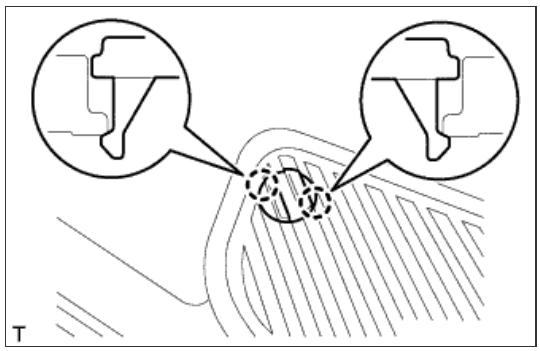
11. INSTALL REAR DOOR SCU PLATE LH

a. Attach the 3 claws and 4 clips to install the scuff plate.

b. Install the screw.

12. INSTALL REAR DOOR SCU PLATE RH

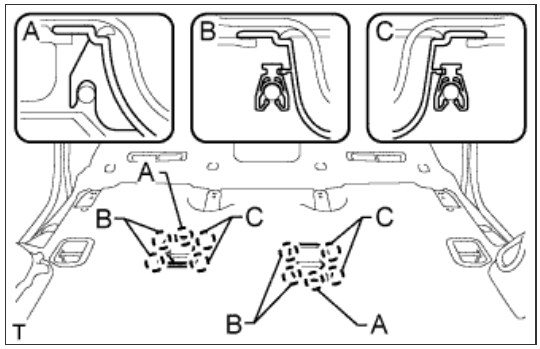
HINT:



Use the same procedures described for the LH side.

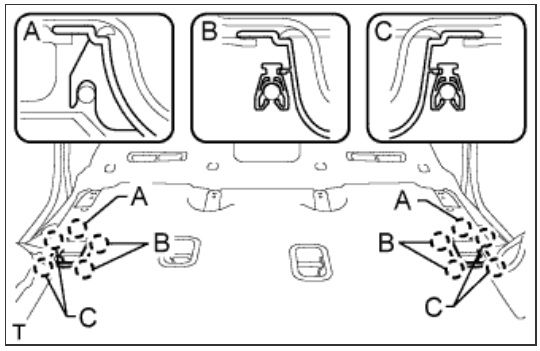
13. INSTALL REAR STEP CO ER

HINT:



Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.



14. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Attach the claws to install the 2 seat protectors.

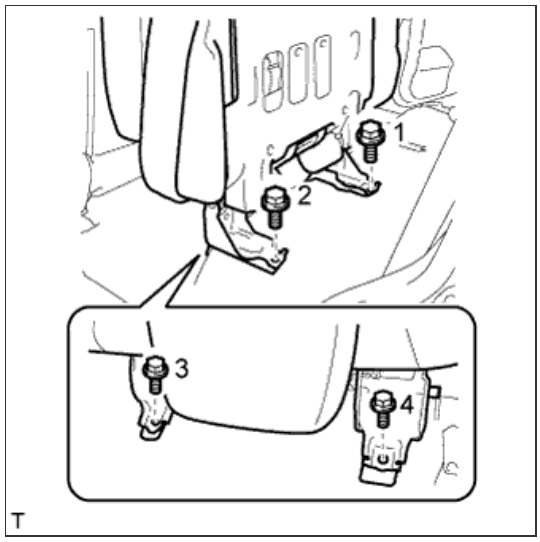
15. INSTALL REAR NO. 1 SEAT PROTECTOR

a. Attach the claws to install the 2 seat protectors.

16. INSTALL REAR NO. 1 SEAT ASSEMBLY RH

a. Install the rear o. seat assembly RH (Click here).

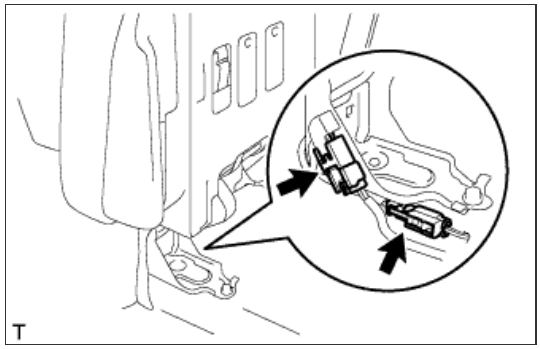
17. INSTALL REAR NO. 1 SEAT ASSEMBLY LH



a. Temporarily install the seat assembly with the 4 bolts.

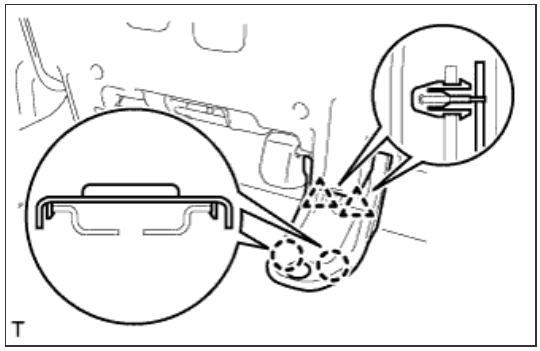
NOTICE:

Be careful not to damage the vehicle body.



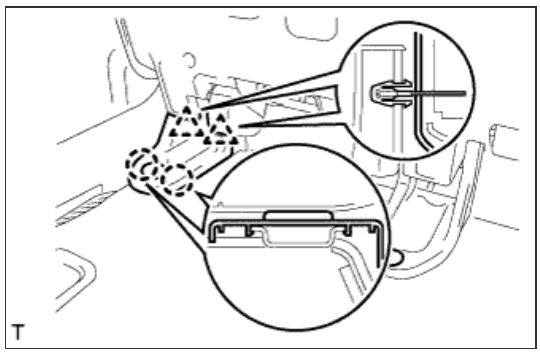
b. Tighten the bolts in the order shown in the illustration.

Torque:
37 N*m{ 377 kgf*cm , 27 ft.*lbf }



c. w/ Rear Seat Side Airbag:
Connect the connector.

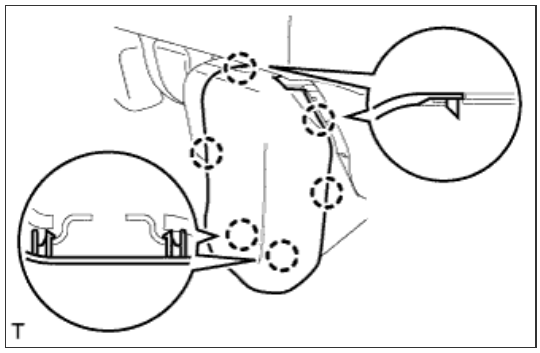
d. w/ Seat Heater System:
Connect the connector.



18. INSTALL REAR NO. 4 SEAT CUSHION HIN E CO ER

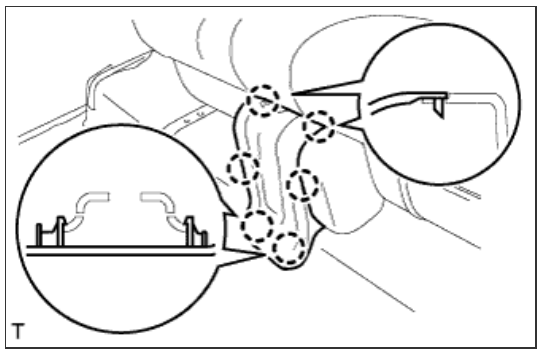
a. Attach the 2 clips and 2 claws to install the cover.

19. INSTALL REAR NO. 2 SEAT CUSHION HIN E CO ER



a. Attach the 2 clips and 2 claws to install the cover.

20. INSTALL REAR NO. 5 SEAT CUSHION HIN E CO ER



a. Return the seat to the upright position.

b. Attach the claws to install the cover.

21. INSTALL REAR NO. 3 SEAT CUSHION HIN E CO ER

a. Attach the claws to install the cover.

22. CONNECT CABLE TO NE ATI E BATTERY TERMINAL

NOTICE:

When disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

23. CHECK SRS ARIN LI HT

a. Check the SRS warning light (Click here).

24. INSPECT REAR NO. 1 SEAT ASSEMBLY LH

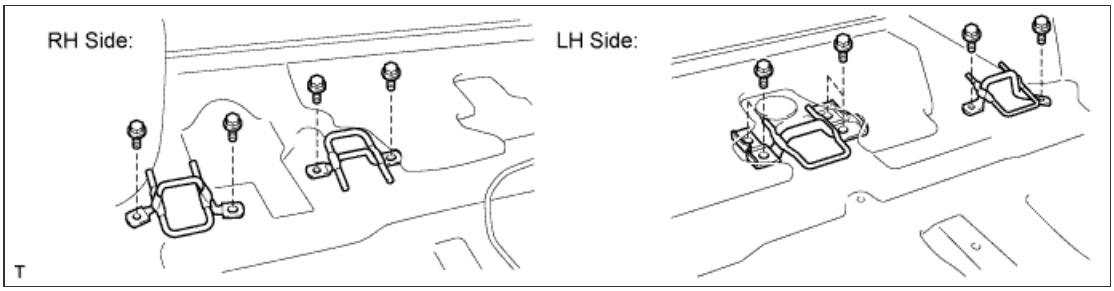
a. w/ Seat Heater System:
Check the seat heater operation.

i. Turn the engine switch on (IG).

ii. Turn the seat heater switch on.

iii. Wait 5 minutes or more and confirm that the seat surface becomes warm.

for Preparation Click here

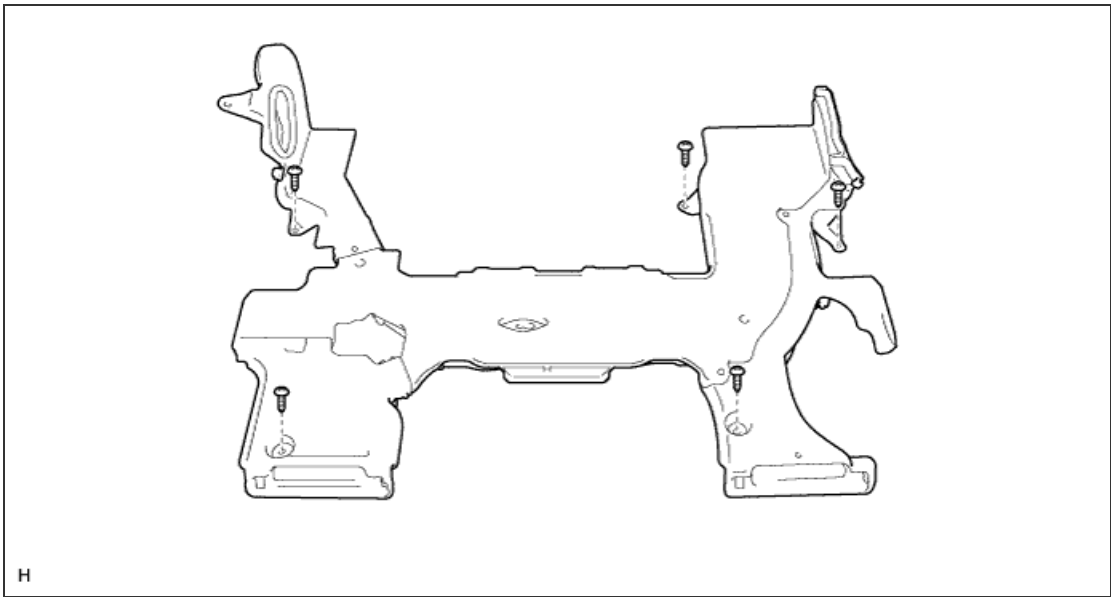


HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL REAR SEAT CUSHION LOCK STRIKER SUB-ASSEMBLY

a. Install the 4 lock strikers with the bolts.



Torque:
37 N*m{ 377 kgf*cm , 27 ft.*lbf }

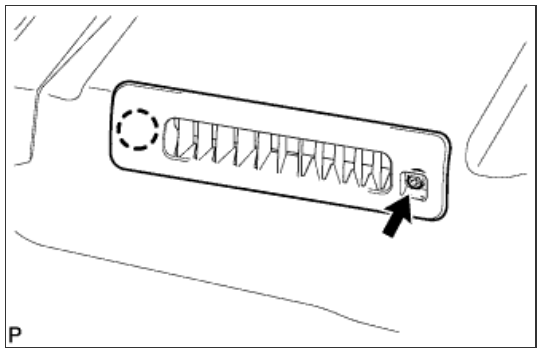
2. INSTALL REAR NO. 6 AIR DUCT (w/ Rear Air Conditioning System)

a. Install the duct with the 5 screws.

b. Connect the 2 connectors.

3. INSTALL RONT LOOR CARPET ASSEMBLY

a. Install the floor carpet.



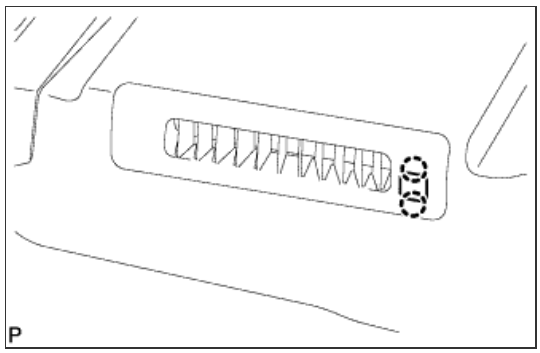
4. INSTALL REAR AIR DUCT UIDE (w/ Rear Air Conditioning System)

a. Attach the claw to install the guide.

b. Install the screw.

HINT:

Use the same procedures for both sides.



5. INSTALL AIR DUCT PLU (w/ Rear Air Conditioning System)

a. Attach the 2 claws to install the plug.

HINT:

Use the same procedures for both sides.

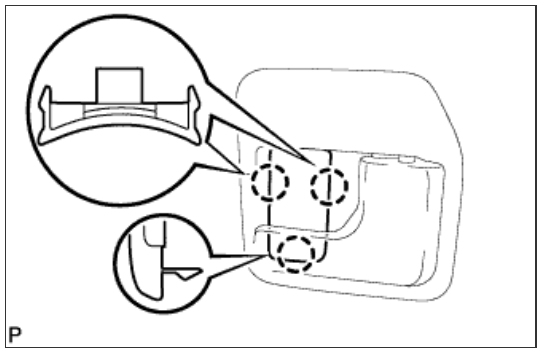
6. INSTALL RONT QUARTER TRIM PANEL ASSEMBLY LH

a. w/ Sliding Roof:
Install the front quarter trim panel assembly LH (Click here).

b. w/o Sliding Roof:
Install the front quarter trim panel assembly LH (Click here).

7. INSTALL RONT QUARTER TRIM PANEL ASSEMBLY RH

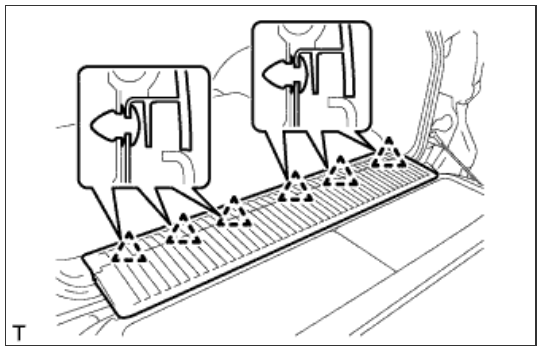
a. w/ Sliding Roof:
Install the front quarter trim panel assembly RH (Click here).



b. w/o Sliding Roof:
Install the front quarter trim panel assembly RH (Click here).

8. INSTALL REAR SEAT CO ER CAP (w/ Rear No. 2 Seat, except ae to ae Seat Type)

HINT:



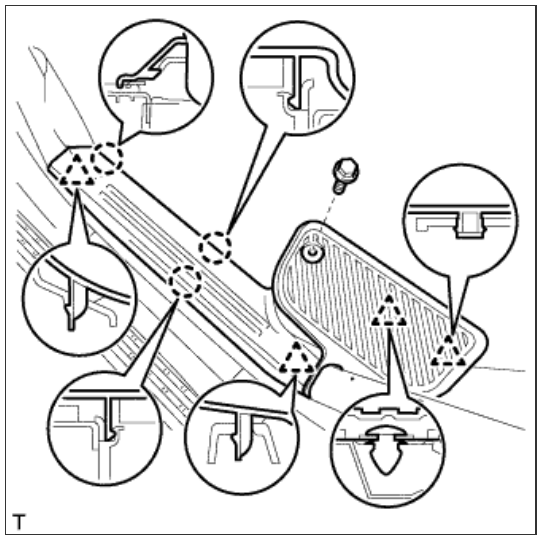
Use the same procedure to install the rear seat cover cap on the other side.

a. Attach the 3 claws to install the rear seat cover cap.

9. INSTALL REAR LOOR MAT REAR SUPPORT PLATE

a. Attach the clips to install the support plate.

10. INSTALL REAR NO. 2 SEAT ASSEMBLY



a. for Face to Face Seat Type:
Install the rear o. 2 seat assembly (Click here).

b. e cept Face to Face Seat Type:
Install the rear o. 2 seat assembly (Click here).

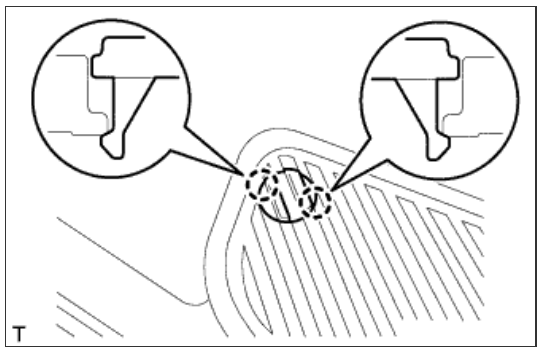
11. INSTALL REAR DOOR SCU PLATE LH

a. Attach the 3 claws and 4 clips to install the scuff plate.

b. Install the screw.

12. INSTALL REAR DOOR SCU PLATE RH

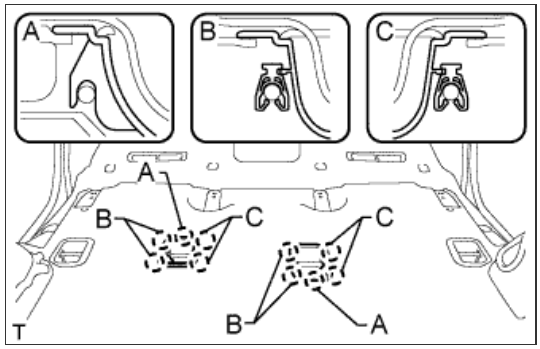
HINT:



Use the same procedures described for the LH side.

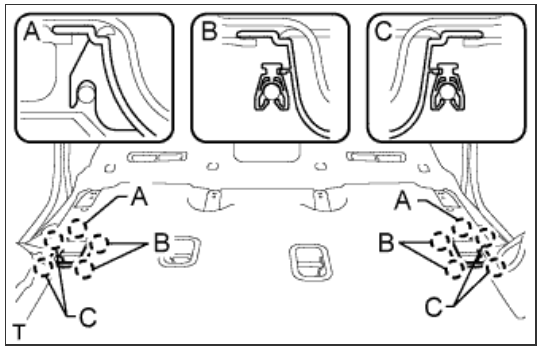
13. INSTALL REAR STEP CO ER

HINT:



Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.



14. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Attach the claws to install the 2 seat protectors.

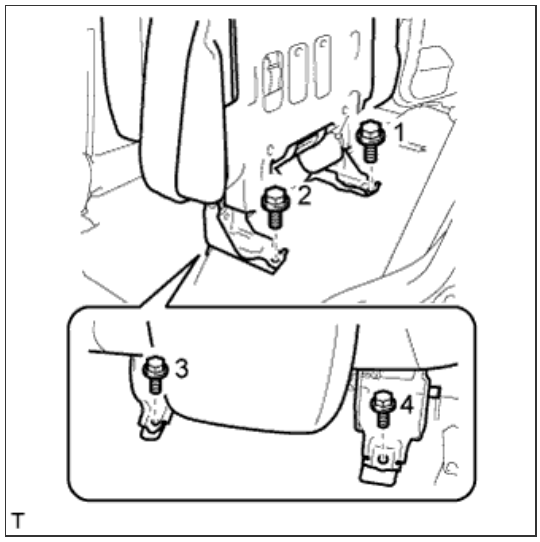
15. INSTALL REAR NO. 1 SEAT PROTECTOR

a. Attach the claws to install the 2 seat protectors.

16. INSTALL REAR NO. 1 SEAT ASSEMBLY RH

a. Install the rear o. seat assembly RH (Click here).

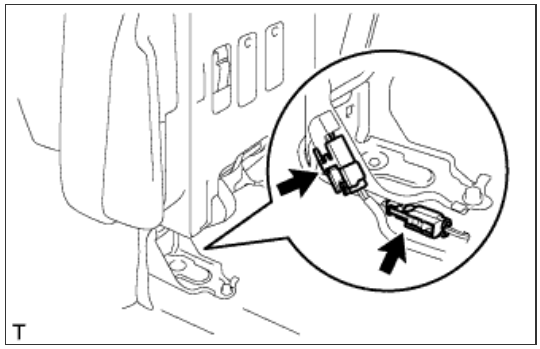
17. INSTALL REAR NO. 1 SEAT ASSEMBLY LH



a. Temporarily install the seat assembly with the 4 bolts.

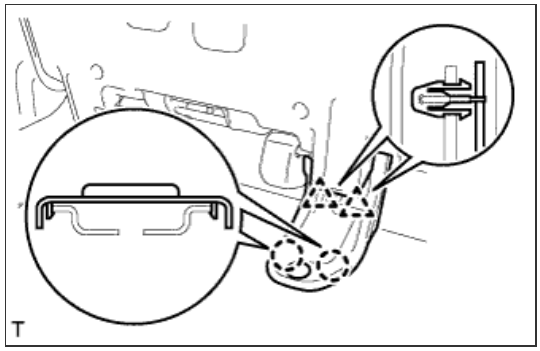
NOTICE:

Be careful not to damage the vehicle body.



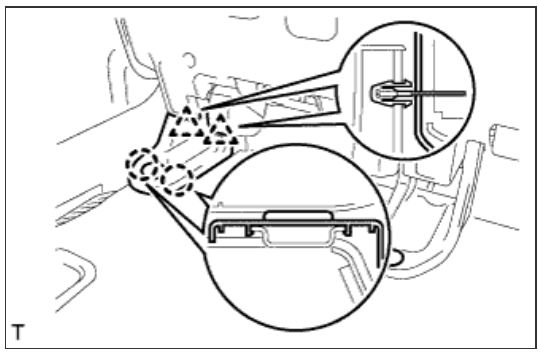
b. Tighten the bolts in the order shown in the illustration.

Torque:
37 N*m{ 377 kgf*cm , 27 ft.*lbf }



c. w/ Rear Seat Side Airbag:
Connect the connector.

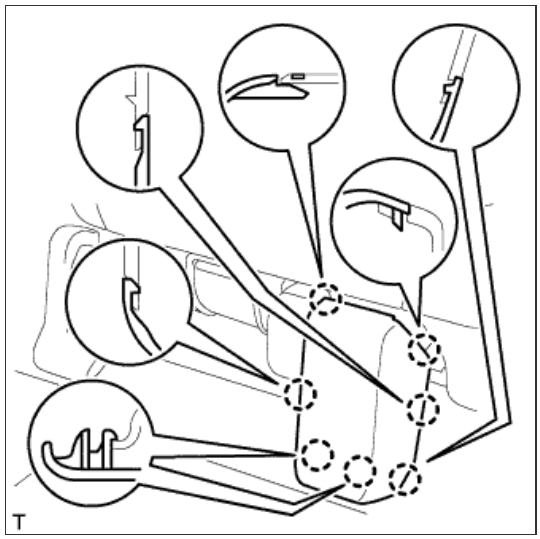
d. w/ Seat Heater System:
Connect the connector.



18. INSTALL REAR NO. 4 SEAT CUSHION HIN E CO ER

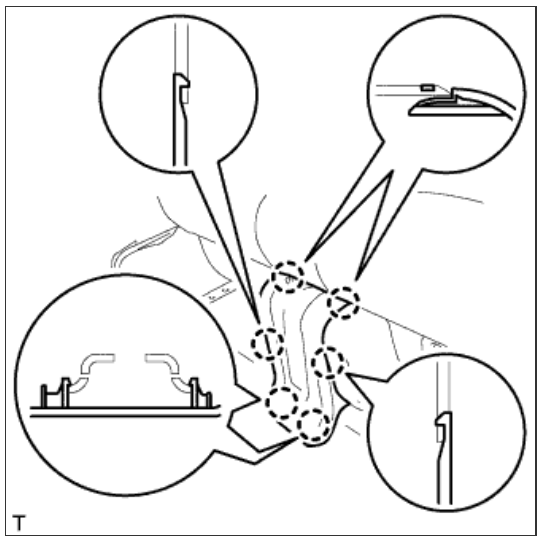
a. Attach the 2 clips and 2 claws to install the cover.

19. INSTALL REAR NO. 2 SEAT CUSHION HIN E CO ER



a. Attach the 2 clips and 2 claws to install the cover.

20. INSTALL REAR NO. 5 SEAT CUSHION HIN E CO ER



a. Return the seat to the upright position.

b. Attach the 7 claws to install the cover.

21. INSTALL REAR NO. 3 SEAT CUSHION HIN E CO ER

a. Attach the claws to install the cover.

22. CONNECT CABLE TO NE ATI E BATTERY TERMINAL

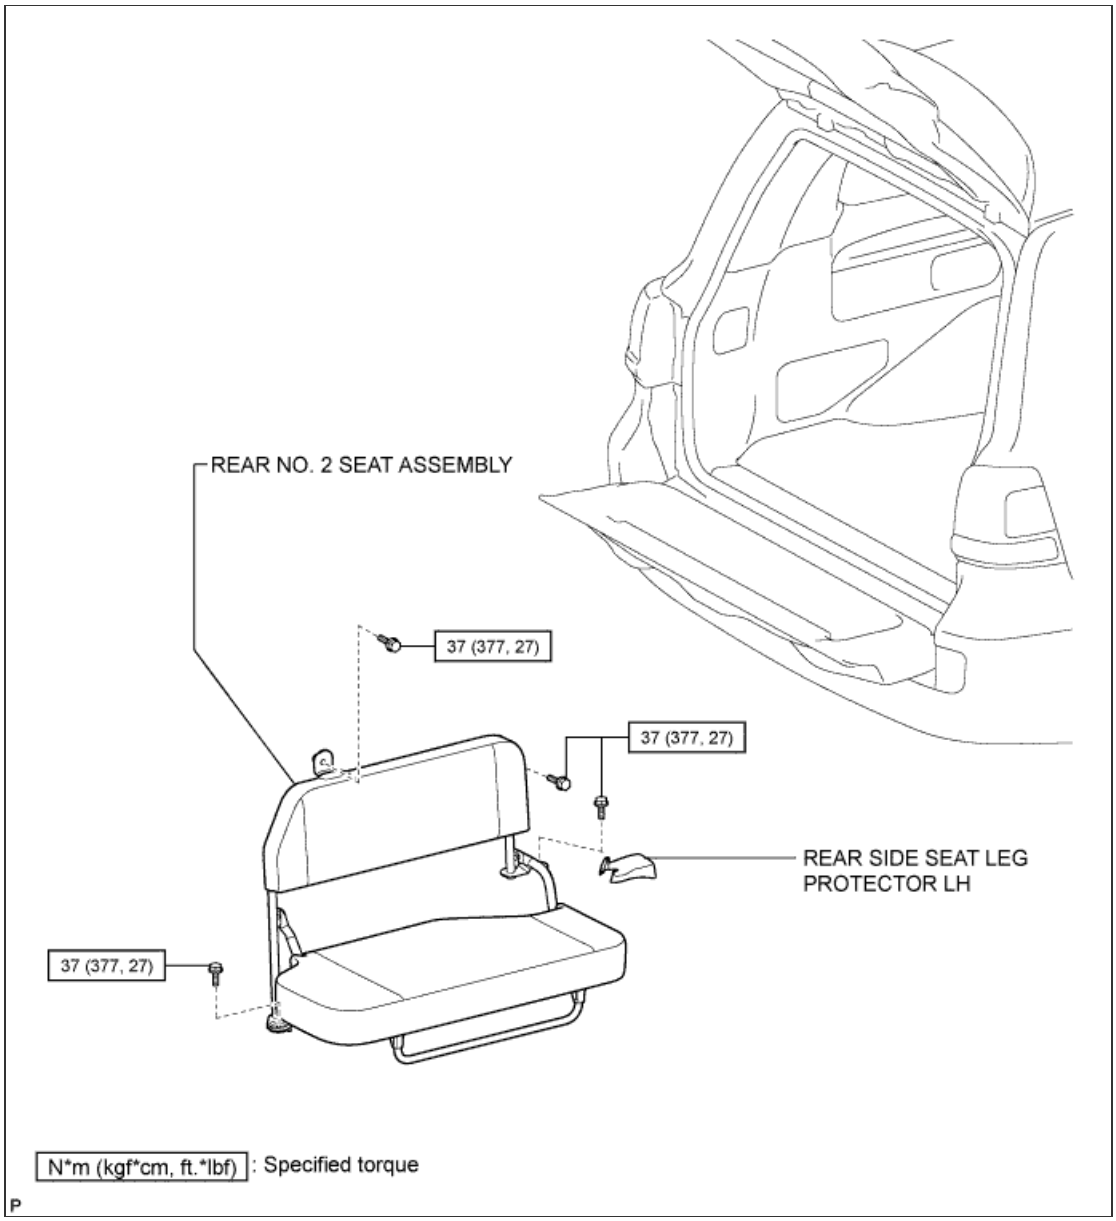
NOTICE:

hn disconnecting the cable, some systems need to be initialized after the cable is reconnected (Click here).

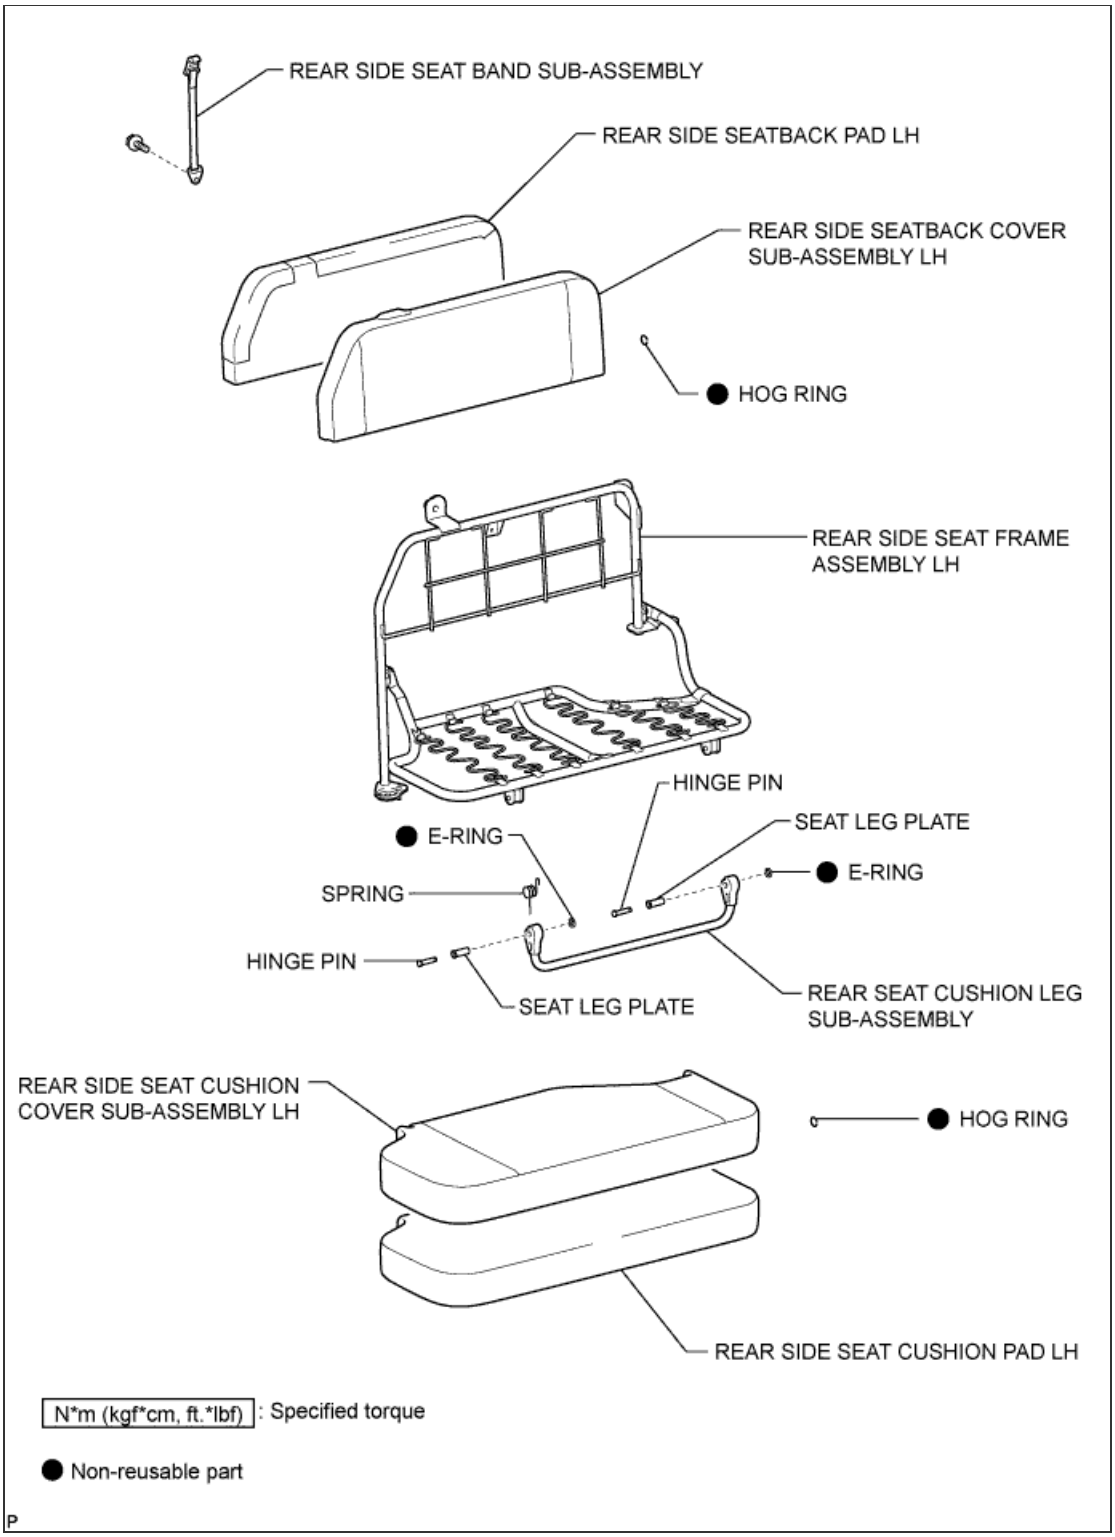
23. CHECK SRS ARIN LI HT

a. Check the SRS warning light (Click here).

24. INSPECT REAR NO. 1 SEAT ASSEMBLY LH



a. w/ Seat Heater System:
Check the seat heater operation.



i. Turn the engine switch on (IG).

ii. Turn the seat heater switch on.

iii. at 5 minutes or more and confirm that the seat surface becomes warm.

HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

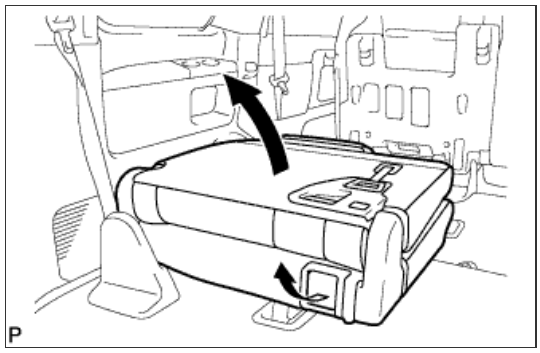
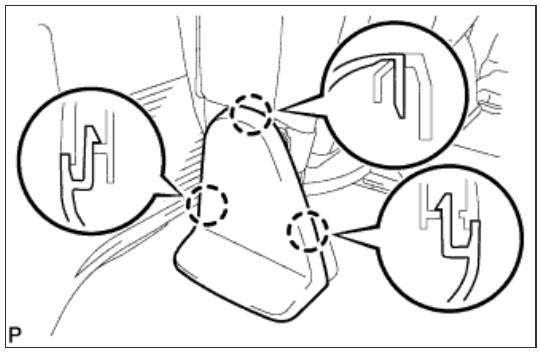
1. REMOVE REAR NO. 2 SEAT HEADREST ASSEMBLY LH

2. REMOVE REAR SEAT CUSHION HINGE COVER LH



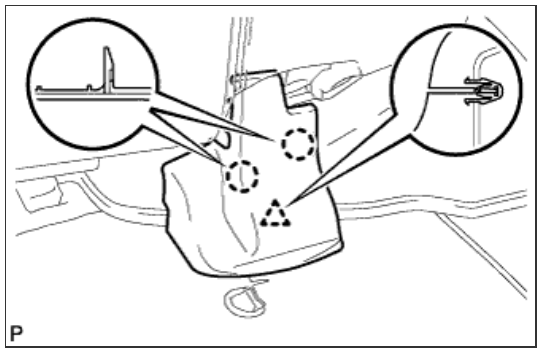
a. Operate the rear seat headrest handle and lower the headrest.

b. Operate the reclining ad ster release handle and fold down the seat.



c. Operate the seat cushion lock release lever and move the seat to the storage position.

d. Using a screwdriver, detach the 3 claws and remove the cover.

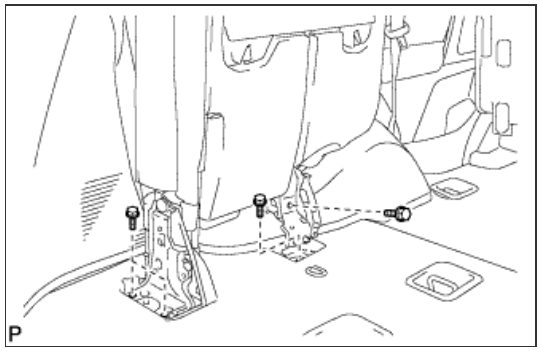


HINT:

Tape the screwdriver tip before use.

3. REMOVE REAR NO. 2 SEAT HINGE COVER LH

a. Detach the 2 claws and clip, and then remove the cover.

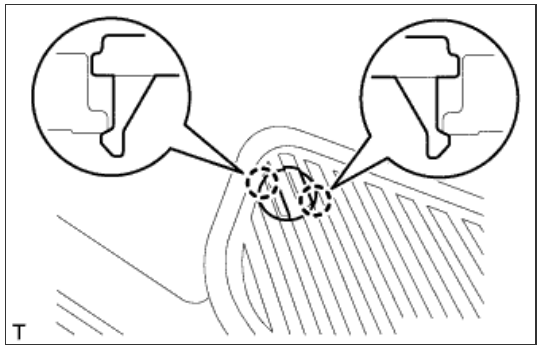


4. REMOVE REAR NO. 2 SEAT ASSEMBLY

a. Remove the 4 bolts and seat assembly.

NOTICE:

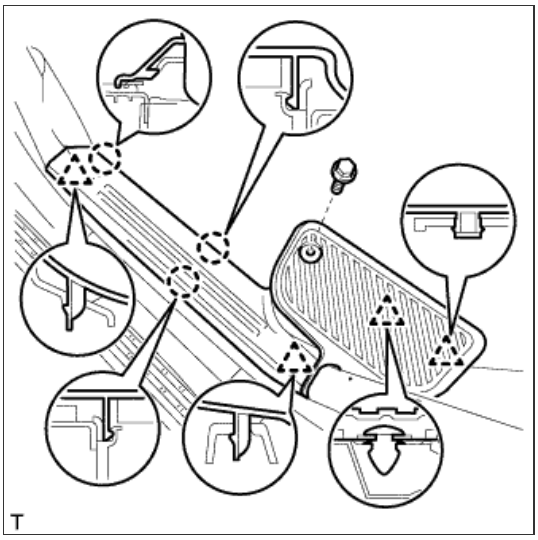
Be careful not to damage the vehicle body.



5. REMOVE REAR STEP COVER

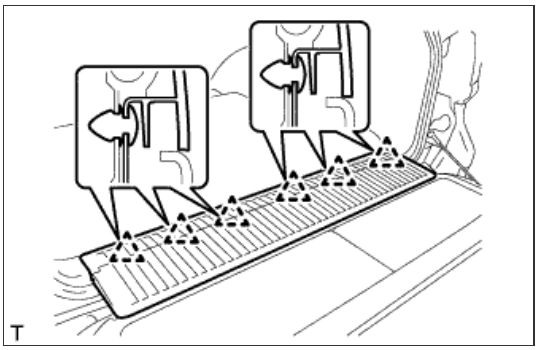
HINT:

Use the same procedure to remove the step cover on the other side.



a. Detach the 2 claws and remove the step cover.

6. INSTALL REAR DOOR SCUFF PLATE LH



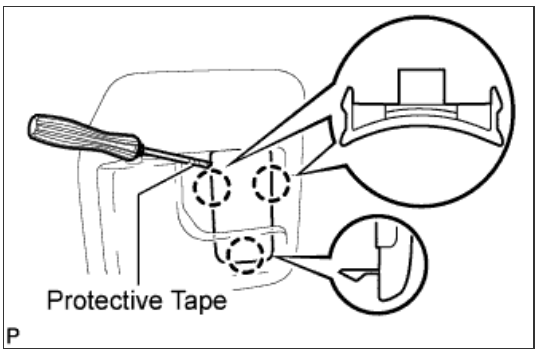
a. Remove the screw.

b. Detach the 3 claws and 4 clips, and remove the scuff plate.

7. REMOVE REAR FLOOR MAT REAR SUPPORT PLATE

a. Detach the 6 clips and remove the support plate.

8. REMOVE REAR SEAT COVER CAP



HINT:

Use the same procedure to remove the rear seat cover cap on the other side.

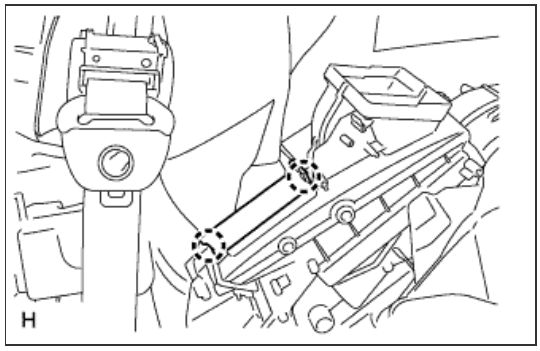
a. Using a screwdriver, detach the 3 claws and remove the rear seat cover cap.

HINT:

Tape the screwdriver tip before use.

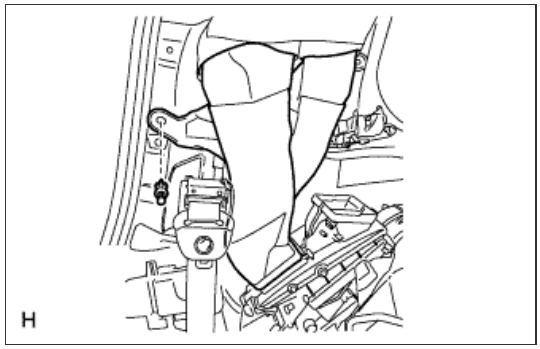
9. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY LH

a. w/ Sliding Roof:
Remove the front quarter trim panel assembly LH (Click here).



b. w/o Sliding Roof:
Remove the front quarter trim panel assembly LH (Click here).

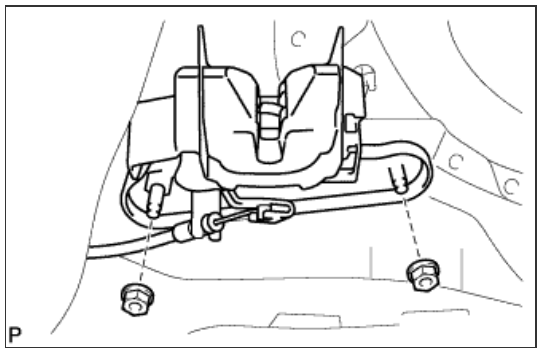
10. REMOVE REAR SEAT LOCK CONTROL LEVER SUB-ASSEMBLY LH



a. Detach the 4 claws and remove the seat lock control lever.

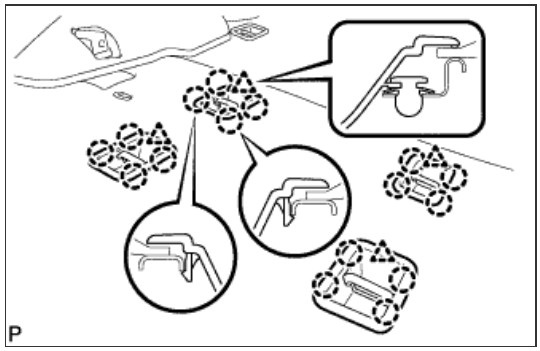
11. REMOVE REAR ROOF NO. 1 AIR DUCT (w/ Rear Air Conditioning System)

a. Detach the 2 claws and remove the cooler plate.



b. Remove the clip and duct.

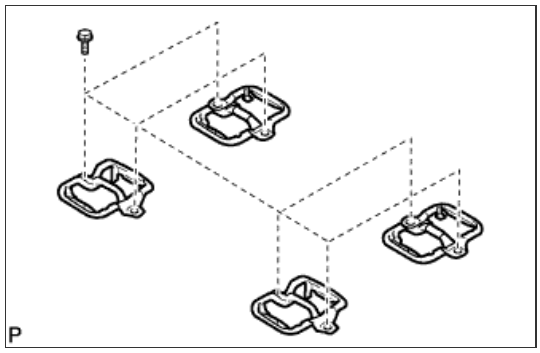
12. REMOVE FOLD SEAT LEG LOCK SUB-ASSEMBLY



a. Detach the 2 cable clamps.

b. Remove the 2 nuts and fold seat leg lock.

13. REMOVE NO. 3 SEAT CUSHION COVER



a. Detach the 4 clips and 16 claws, and then remove the 4 seat cushion covers.

14. REMOVE REAR SEAT LOCK STRIKER SUB-ASSEMBLY

a. Fold back the floor carpet.

b. Remove the 8 bolts and 4 seat lock strikers.

for Preparation Click here

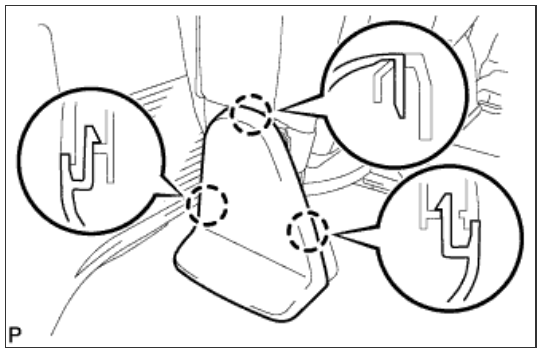
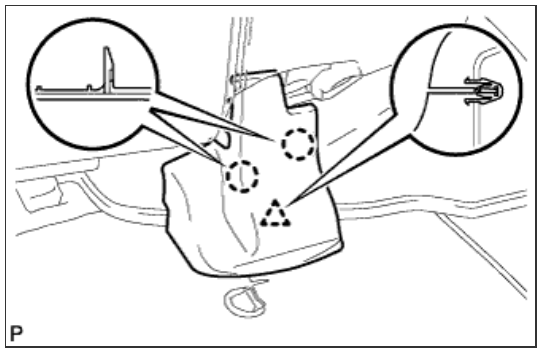
a. Operate the rear seat headrest handle and lower the headrest.

b. Operate the reclining ad ster release handle and fold down the seat.



c. Operate the seat cushion lock release lever and move the seat to the storage position.

d. Using a screwdriver, detach the 3 claws and remove the cover.

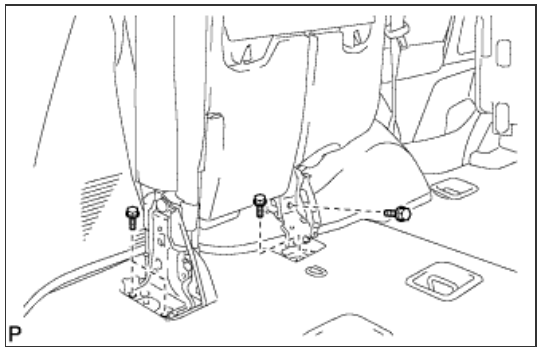


HINT:

Tape the screwdriver tip before use.

3. REMOVE REAR NO. 2 SEAT HINGE COVER LH

a. Detach the 2 claws and clip, and then remove the cover.

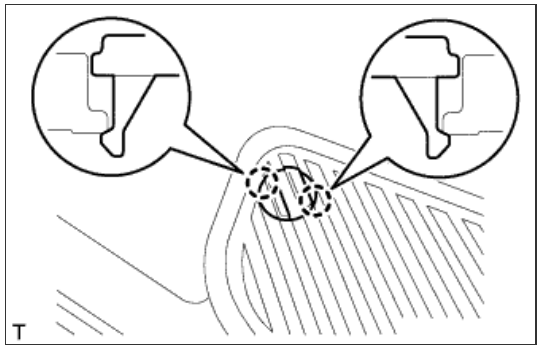


4. REMOVE REAR NO. 2 SEAT ASSEMBLY

a. Remove the 4 bolts and seat assembly.

NOTICE:

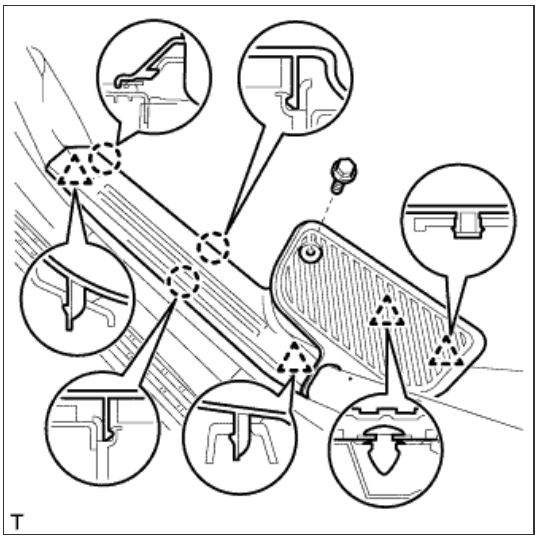
Be careful not to damage the vehicle body.



5. REMOVE REAR STEP COVER

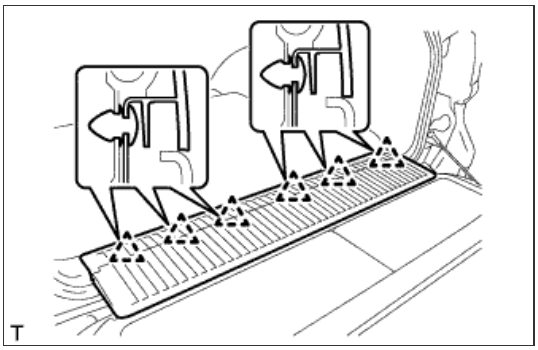
HINT:

Use the same procedure to remove the step cover on the other side.



a. Detach the 2 claws and remove the step cover.

6. INSTALL REAR DOOR SCUFF PLATE LH



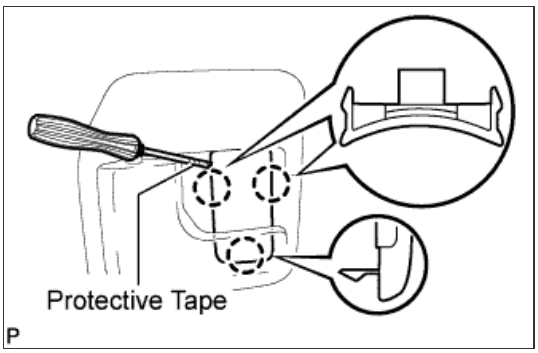
a. Remove the screw.

b. Detach the 3 claws and 4 clips, and remove the scuff plate.

7. REMOVE REAR FLOOR MAT REAR SUPPORT PLATE

a. Detach the 6 clips and remove the support plate.

8. REMOVE REAR SEAT COVER CAP



HINT:

Use the same procedure to remove the rear seat cover cap on the other side.

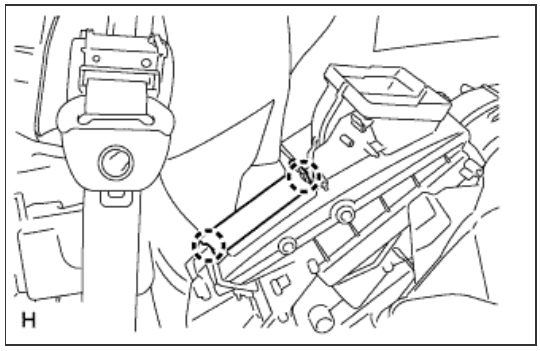
a. Using a screwdriver, detach the 3 claws and remove the rear seat cover cap.

HINT:

Tape the screwdriver tip before use.

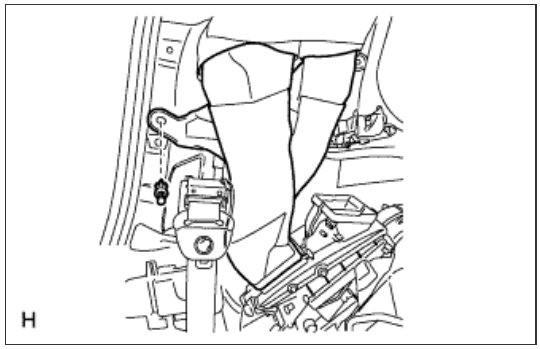
9. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY LH

a. w/ Sliding Roof:
Remove the front quarter trim panel assembly LH (Click here).



b. w/o Sliding Roof:
Remove the front quarter trim panel assembly LH (Click here).

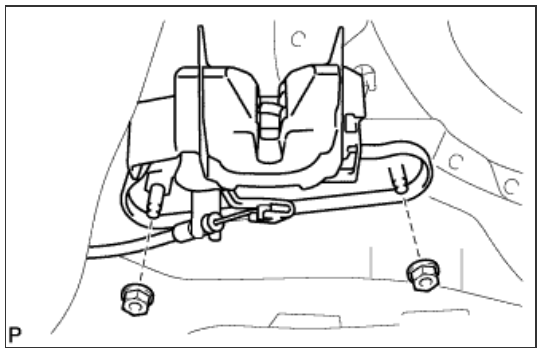
10. REMOVE REAR SEAT LOCK CONTROL LEVER SUB-ASSEMBLY LH



a. Detach the 4 claws and remove the seat lock control lever.

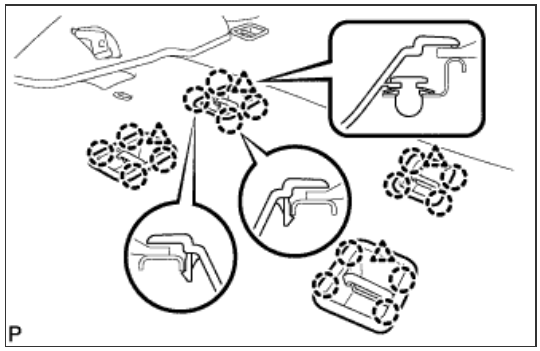
11. REMOVE REAR ROOF NO. 1 AIR DUCT (w/ Rear Air Conditioning System)

a. Detach the 2 claws and remove the cooler plate.



b. Remove the clip and duct.

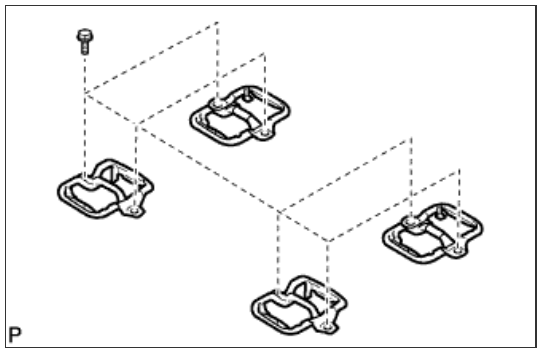
12. REMOVE FOLD SEAT LEG LOCK SUB-ASSEMBLY



a. Detach the 2 cable clamps.

b. Remove the 2 nuts and fold seat leg lock.

13. REMOVE NO. 3 SEAT CUSHION COVER



a. Detach the 4 clips and 16 claws, and then remove the 4 seat cushion covers.

14. REMOVE REAR SEAT LOCK STRIKER SUB-ASSEMBLY

a. Fold back the floor carpet.

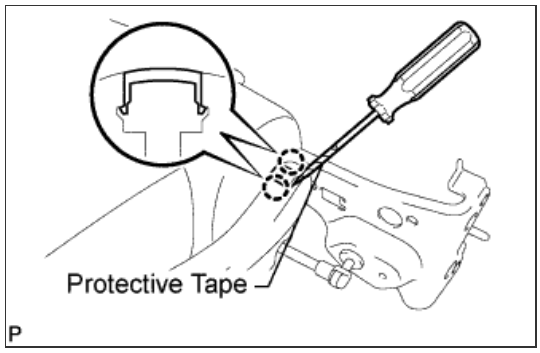
b. Remove the 8 bolts and 4 seat lock strikers.

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

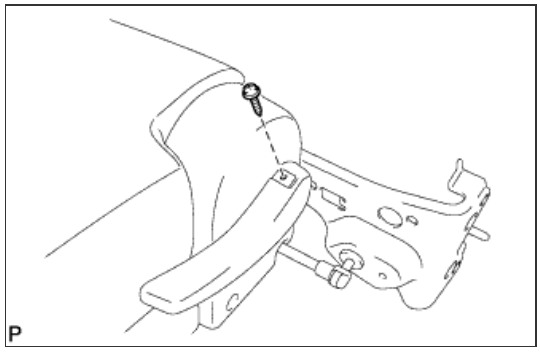
HINT:



- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. REMOVE SEAT ADJUSTER BOLT COVER

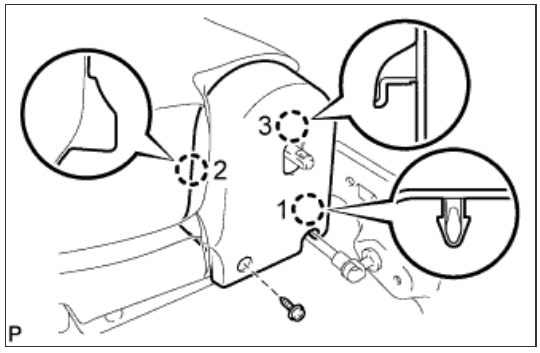
a. Using a screwdriver, detach the 2 claws and remove the cover.



HINT:

Tape the screwdriver tip before use.

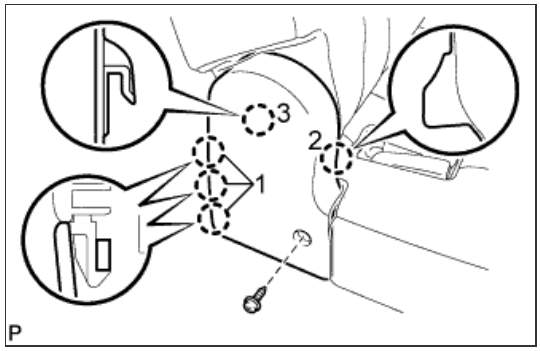
2. REMOVE NO. 2 RECLINING ADJUSTER RELEASE HANDLE LH



a. Remove the screw and release handle.

3. REMOVE RECLINING ADJUSTER COVER LH

a. Remove the screw.

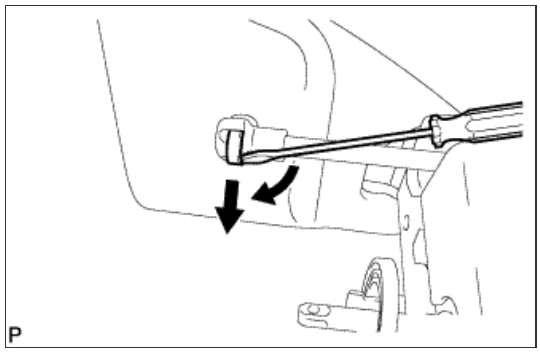


b. Detach the claws in the order shown in the illustration, and then remove the cover.

4. REMOVE RECLINING ADJUSTER COVER RH

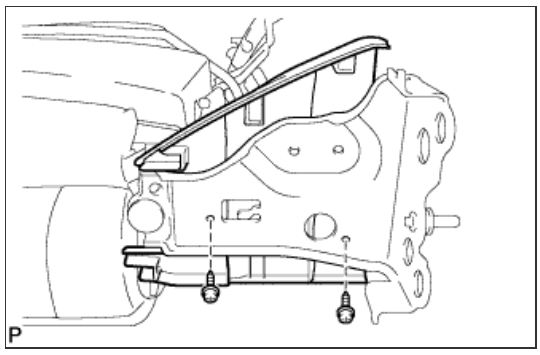
a. Remove the screw.

b. Detach the 5 claws in the order shown in the illustration, and then remove the cover.



5. REMOVE REAR SEAT REAR BRACKET COVER REAR

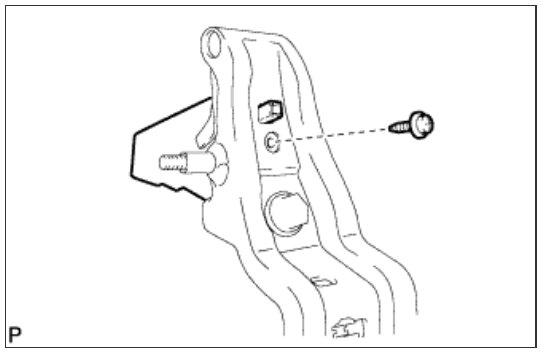
a. Detach the 2 claws and cover.



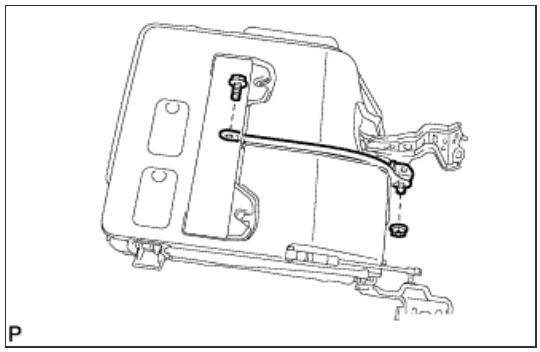
6. REMOVE REAR NO. 3 SEAT LEG COVER LH

a. Using a screwdriver, remove the spring of the seat stay ball-joint.

b. Disconnect the seat stay.

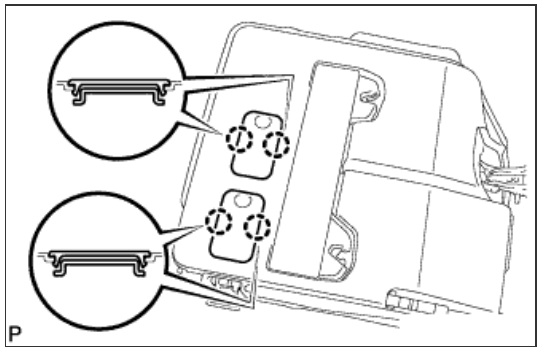


c. Remove the 2 screws and cover.



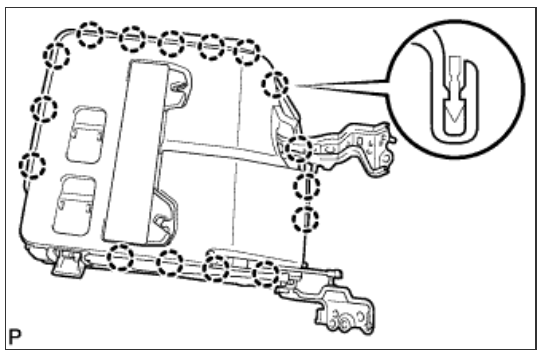
7. REMOVE NO. 2 SEAT LEG COVER NO. 2

a. Remove the screw and seat leg cover.



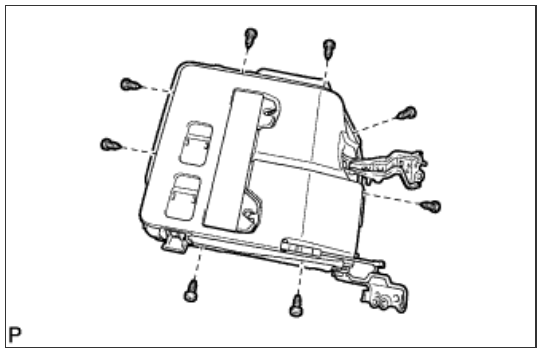
8. REMOVE 3RD SEAT LINK SUB-ASSEMBLY LH

a. Remove the bolt, nut and seat link.



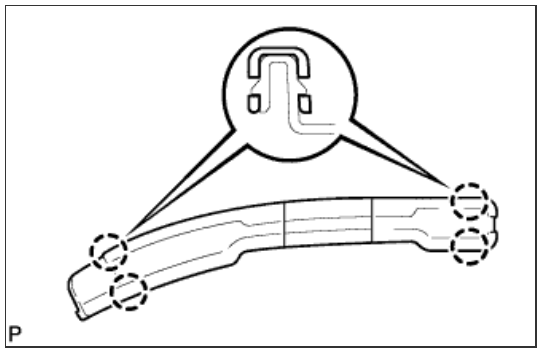
9. REMOVE 3RD SEAT CUSHION LOCK COVER

a. Detach the 4 claws and remove the 2 covers.



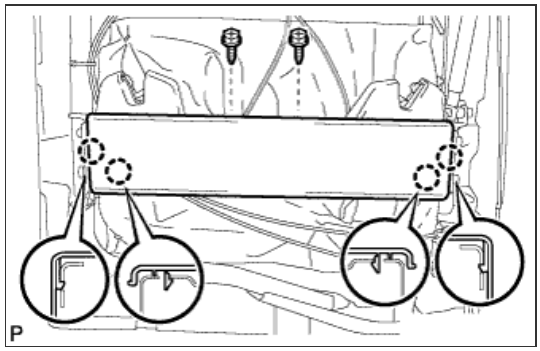
10. REMOVE REAR SEAT CUSHION UNDER COVER LH

a. Detach the 16 claws.



b. Remove the 8 screws and cover.

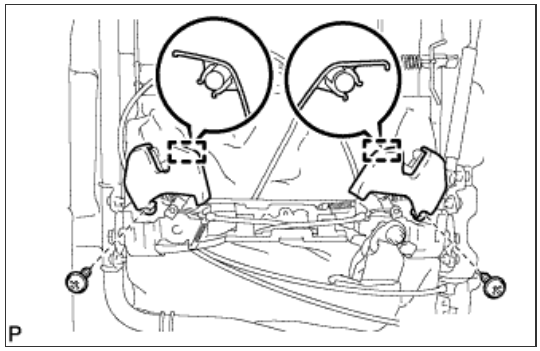
11. REMOVE NO. 3 SEAT FRONT BRACKET COVER LH



a. Detach the 4 claws and remove the cover.

12. REMOVE NO. 3 SEAT LEG COVER NO. 2

a. Remove the 2 screws.

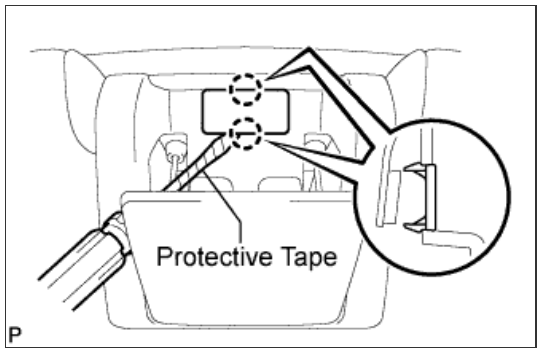


b. Detach the 4 claws and remove the cover.

13. REMOVE REAR SEAT LOCK COVER LH

a. Remove the 2 screws.

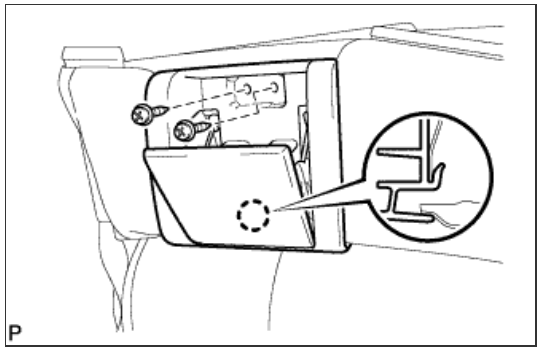
b. Detach the 2 clamps and remove the 2 covers.



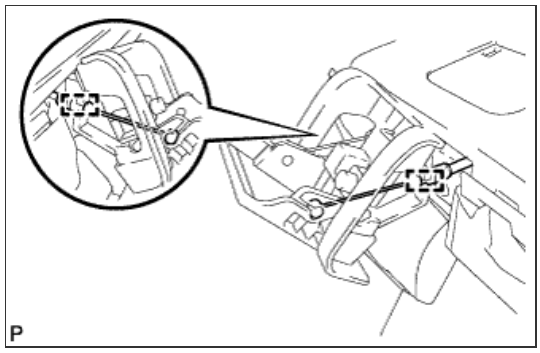
14. REMOVE SEAT STAND FRAME CAP

a. Using a screwdriver, detach the 2 claws and remove the stand frame cap.

HINT:



Tape the screwdriver tip before use.

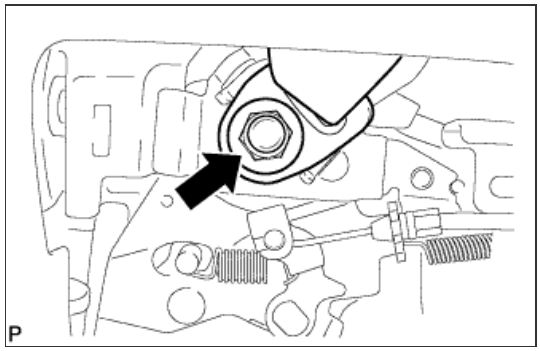


15. REMOVE SEAT CUSHION LOCK RELEASE LEVER ASSEMBLY LH

a. Remove the 2 screws.

b. Detach the claw and remove the release lever.

c. Detach the 2 cable clamps and disconnect the 2 cables.

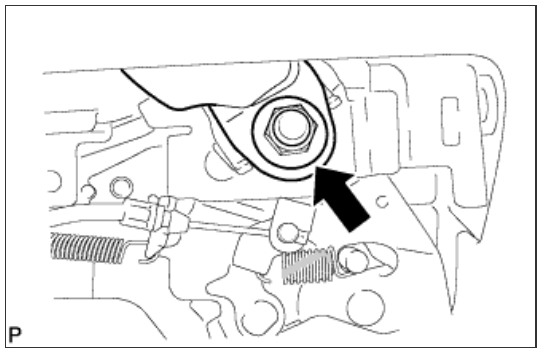


16. REMOVE REAR SEAT INNER BELT SUB-ASSEMBLY (for LH Side)

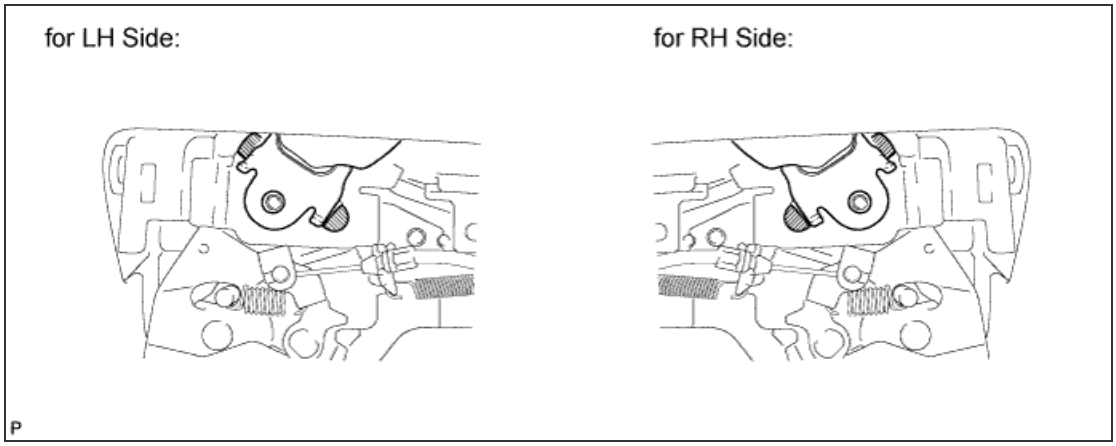
a. Remove the nut and belt.

HINT:

The rear No. 2 seat inner belt is fixed with the same nut as the rear seat inner belt. Therefore, it becomes disconnected when the nut is removed.



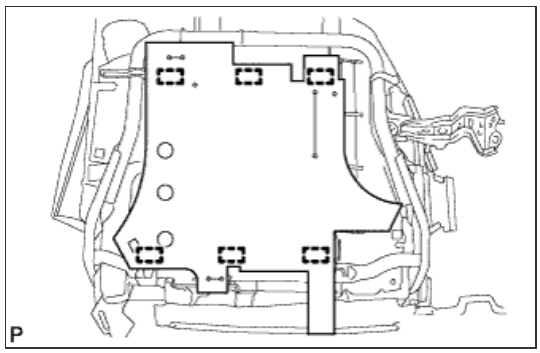
17. REMOVE REAR SEAT OUTER BELT SUB-ASSEMBLY (for RH Side)



a. Remove the nut and belt.

HINT:

The rear No. 2 seat inner belt is fixed with the same nut as the rear seat outer belt. Therefore, it becomes disconnected when the nut is removed.

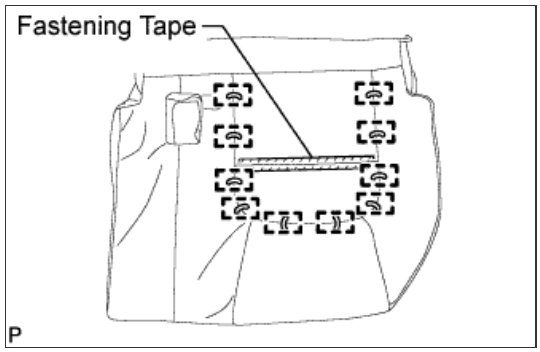


18. REMOVE REAR NO. 2 SEAT INNER BELT SUB-ASSEMBLY

a. Remove the 2 belts.

19. REMOVE REAR SEAT CUSHION CARPET

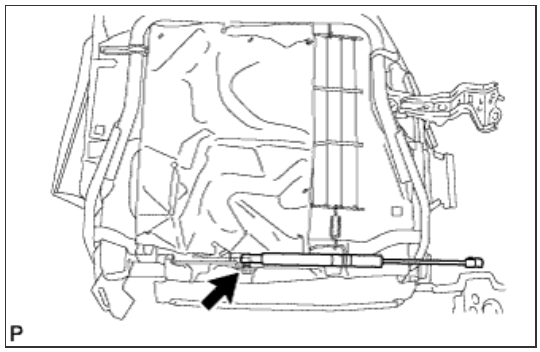
a. Cut off the tack pins which fasten the seat cushion carpet to the seat cushion pad, and then remove the seat cushion carpet from the seat cushion pad.



20. REMOVE SEAT CUSHION COVER WITH PAD

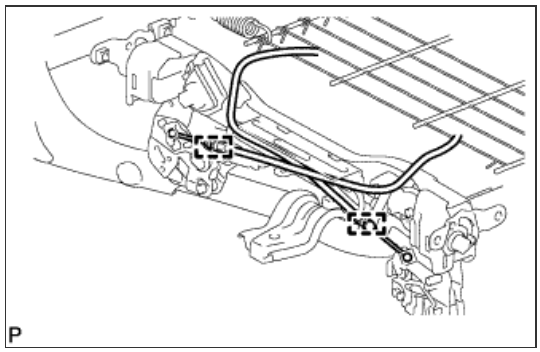
21. REMOVE NO. 3 SEAT CUSHION PAD LH

22. REMOVE NO. 3 SEAT CUSHION COVER SUB-ASSEMBLY LH



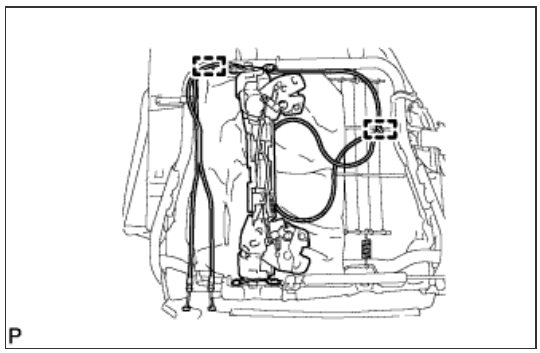
a. Remove the hog rings.

b. Detach the fastening tape and remove the seatback cover.



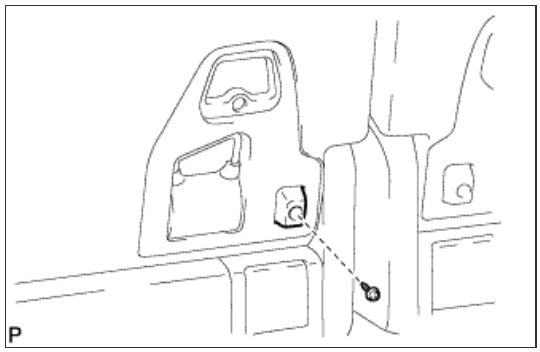
23. REMOVE NO. 2 SEAT STAY SUB-ASSEMBLY

a. Remove the bolt and seat stay.

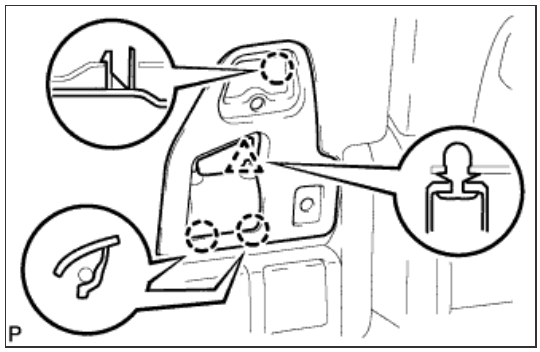


24. REMOVE NO. 3 FOLD SEAT LOCK CONTROL CABLE ASSEMBLY

a. Detach the 2 cable clamps and disconnect the 2 cables.

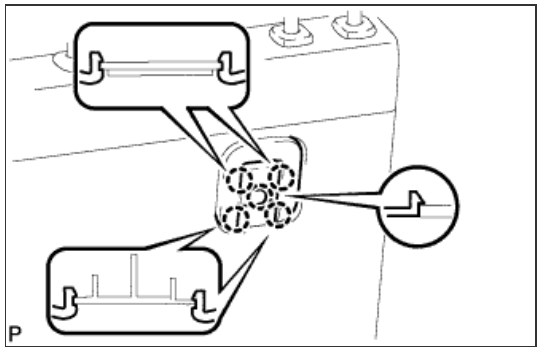


b. Detach the 2 clamps and remove the 2 cables.



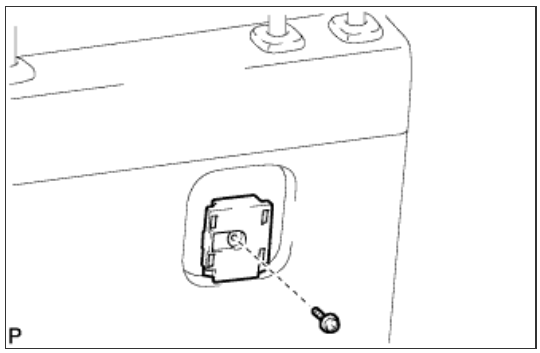
25. REMOVE REAR NO. 2 SEATBACK CUSHION

a. Remove the screw and seatback cushion.



26. REMOVE REAR LOWER SEATBACK LOCK BEZEL

a. Detach the claws and clip, and then remove the seatback lock bezel.

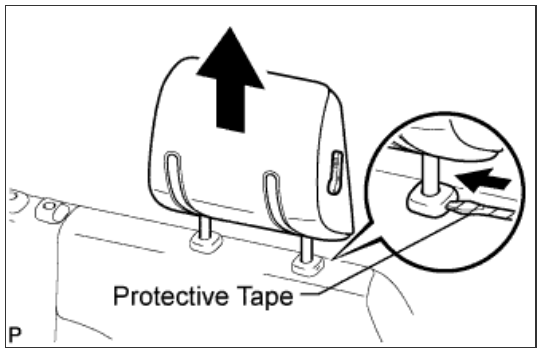


27. REMOVE REAR SEAT HINGE PAWL GUIDE

a. Detach the 5 claws and remove the guide.

28. REMOVE REAR SEAT HINGE PAWL GUIDE

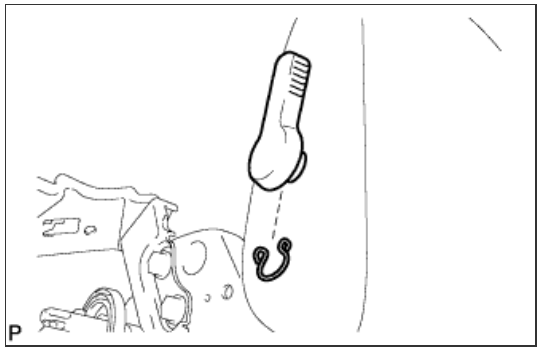
a. Remove the screw and guide.



29. REMOVE REAR SEAT HEADREST ASSEMBLY (w/ Folding Headrest)

a. While releasing the lock inside the headrest support with a screwdriver, remove the headrest.

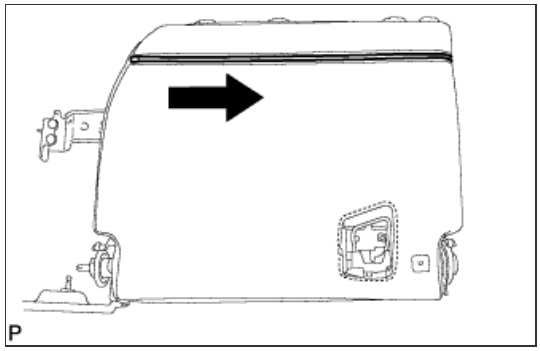
HINT:



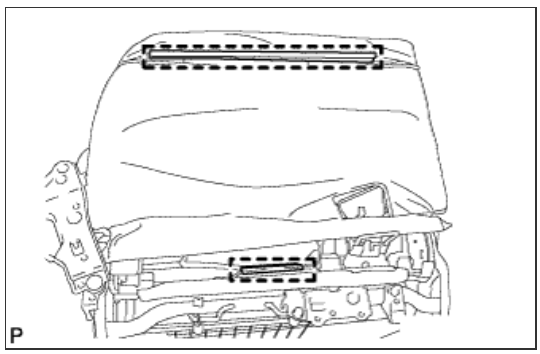
Tape the screwdriver tip before use.

30. REMOVE REAR SEAT HEADREST ASSEMBLY (w/o Folding Headrest)

31. REMOVE REAR SEAT HEADREST HANDLE



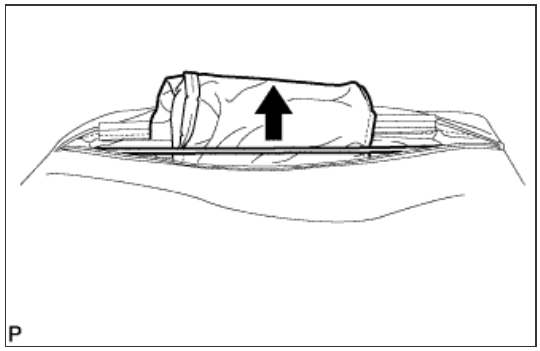
a. Remove the snap ring and headrest handle.



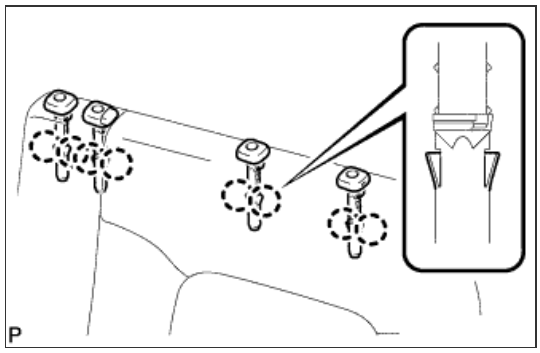
32. REMOVE SEATBACK COVER WITH PAD

a. Side

i. pen the fastener.

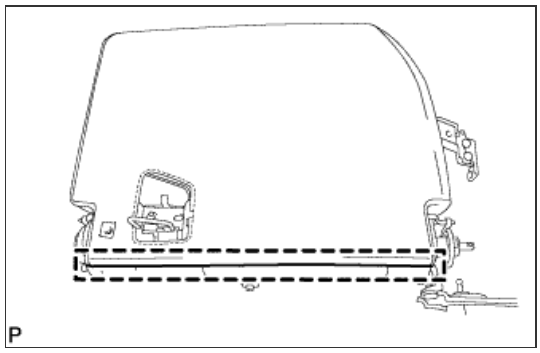


ii. Detach the 2 hooks.

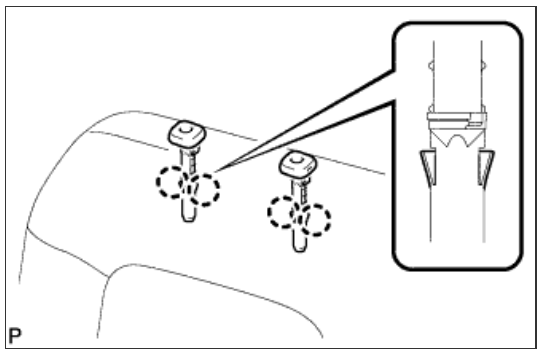


iii. Pull out the center headrest storage bag.

iv. Remove the rear seat protector.

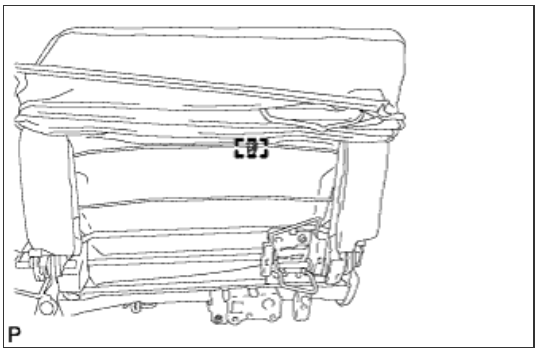


v. Detach the 8 claws and remove the 4 headrest supports.



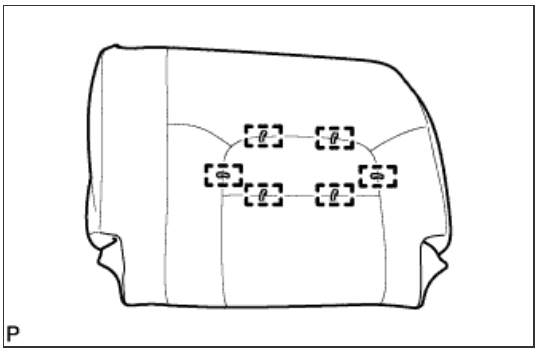
b. RH Side

i. Detach the hook.



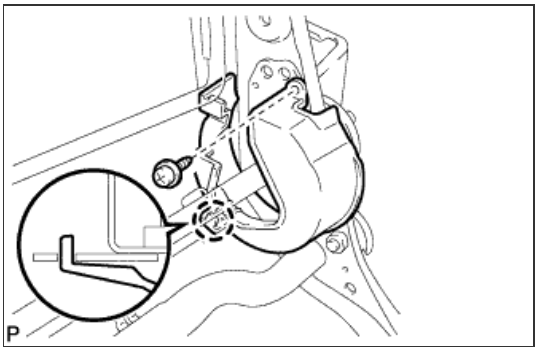
ii. Remove the rear seat protector.

iii. Detach the 4 claws and remove the 2 headrest supports.



c. Remove the hog ring and seatback cover with pad.

33. REMOVE NO. 3 SEATBACK COVER SUB-ASSEMBLY LH



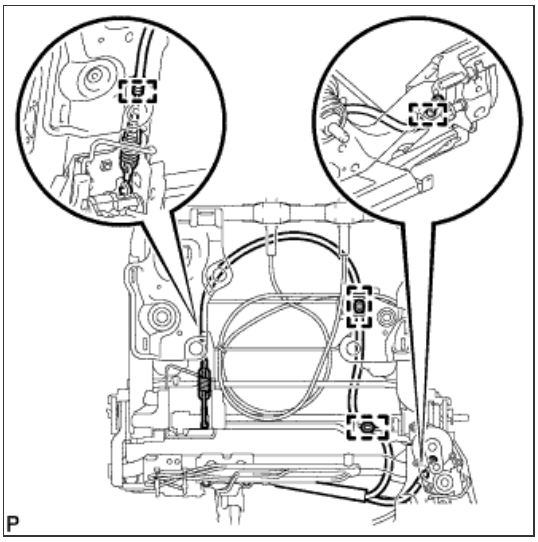
a. Remove the hog rings and seatback cover.

34. REMOVE REAR INNER SEAT RECLINING COVER LH

a. Remove the screw.

b. Detach the claw and remove the cover.

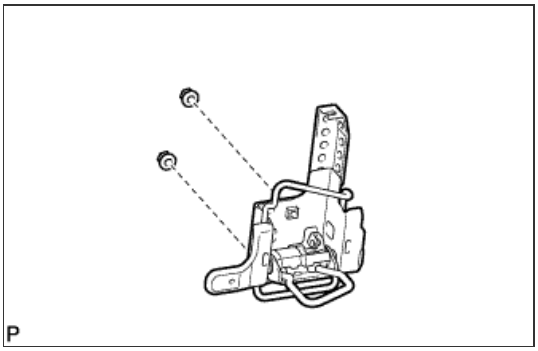
35. REMOVE REAR INNER SEAT RECLINING COVER RH



a. Remove the screw.

b. Detach the claw and remove the cover.

36. REMOVE REAR SEAT LOCK CONTROL CABLE



a. Detach the 2 cable clamps and disconnect the 2 cables.

b. Detach the 2 clamps and remove the lock control cable.

37. REMOVE REAR SEATBACK LOCK STRIKER ASSEMBLY LH

a. Remove the 2 nuts and lock striker.

38. REMOVE REAR NO. 2 SEATBACK COVER LH

a. Detach the claws and remove the cover.

39. REMOVE REAR SEATBACK LOCK STRIKER COVER LH

a. Detach the 2 clamps and remove the cover.

40. REMOVE NO. 2 SEAT RECLINING RELEASE HANDLE SUB-ASSEMBLY

a. Remove the bolt and release handle.

for Preparation Click here

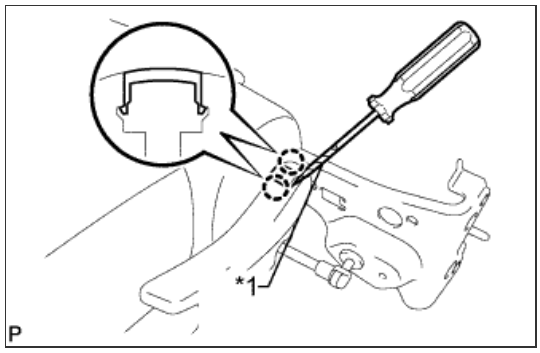
CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

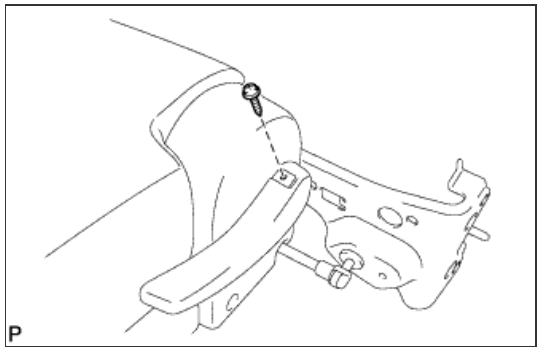
1. REMOVE SEAT ADJUSTER BOLT COVER



a. Using a screwdriver, detach the 2 claws and remove the cover.

HINT:

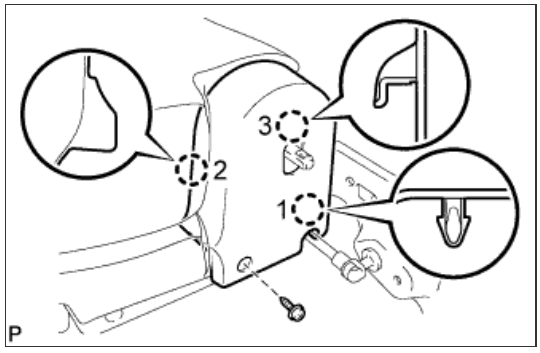
Tape the screwdriver tip before use.



Text in Illustration

	rotective Tape

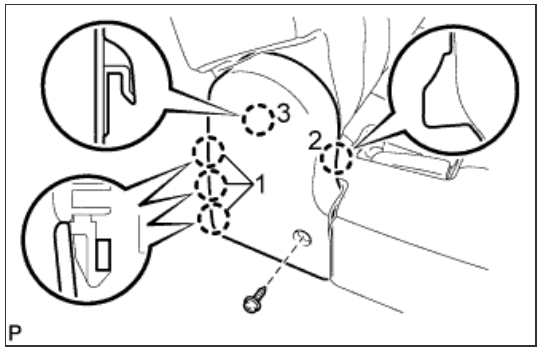
2. REMOVE NO. 2 RECLINING ADJUSTER RELEASE HANDLE LH



a. Remove the screw and release handle.

3. REMOVE RECLINING ADJUSTER COVER LH

a. Remove the screw.

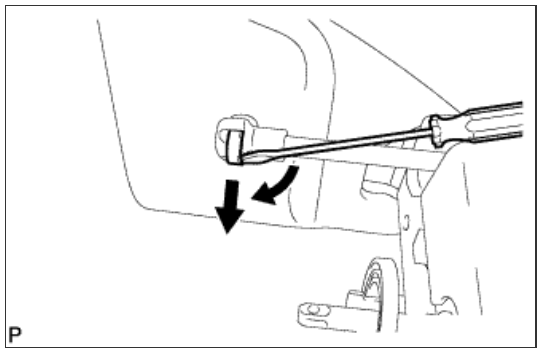


b. Detach the 3 claws in the order shown in the illustration, and then remove the cover.

4. REMOVE RECLINING ADJUSTER COVER RH

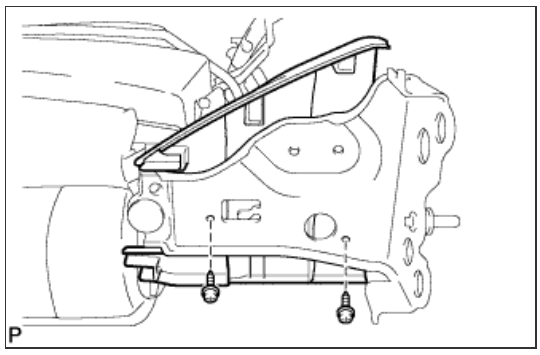
a. Remove the screw.

b. Detach the 5 claws in the order shown in the illustration, and then remove the cover.



5. REMOVE REAR SEAT REAR BRACKET COVER REAR

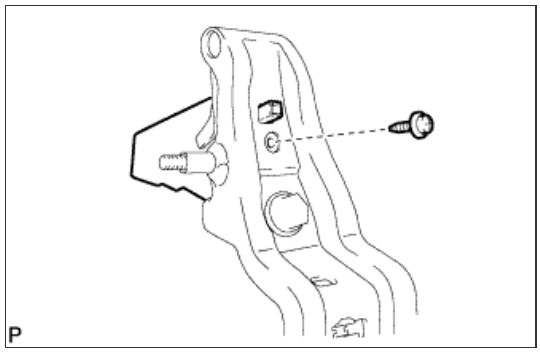
a. Detach the 2 claws and cover.



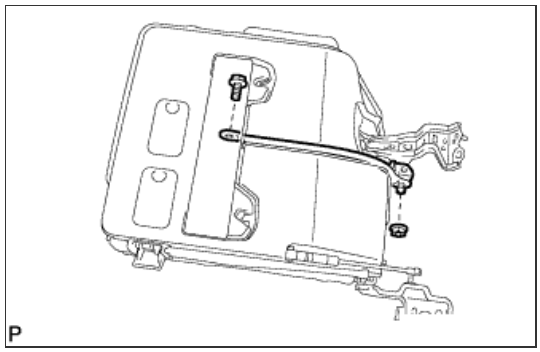
6. REMOVE REAR NO. 3 SEAT LEG COVER LH

a. Using a screwdriver, remove the spring of the seat stay ball-joint.

b. Disconnect the seat stay.

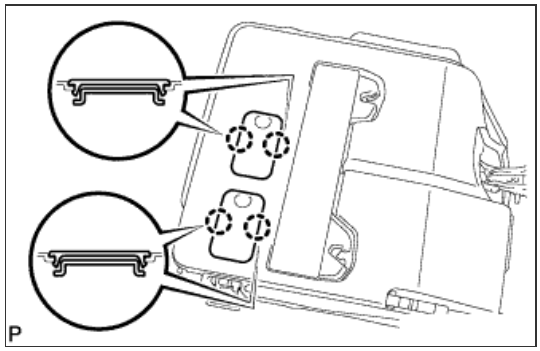


c. Remove the 2 screws and cover.



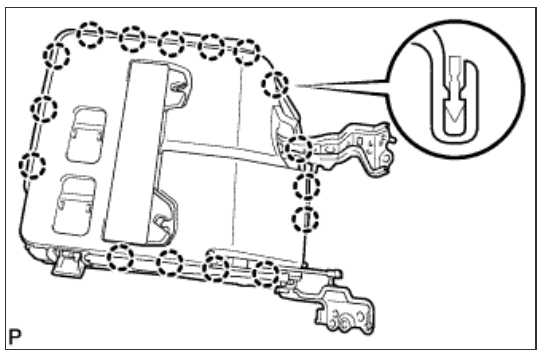
7. REMOVE NO. 2 SEAT LEG COVER NO. 2

a. Remove the screw and seat leg cover.



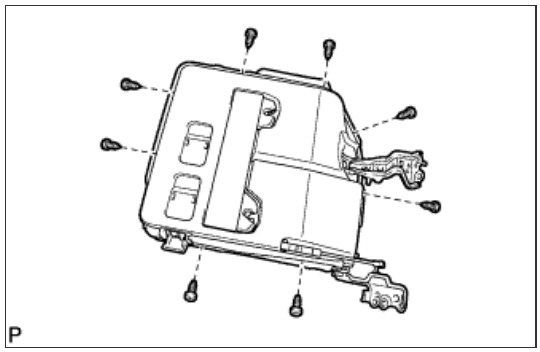
8. REMOVE 3RD SEAT LINK SUB-ASSEMBLY LH

a. Remove the bolt, nut and seat link.



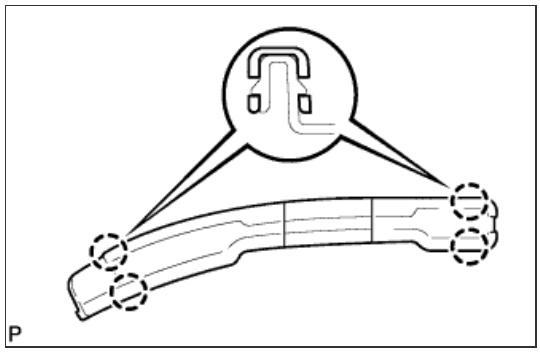
9. REMOVE 3RD SEAT CUSHION LOCK COVER

a. Detach the 4 claws and remove the 2 covers.



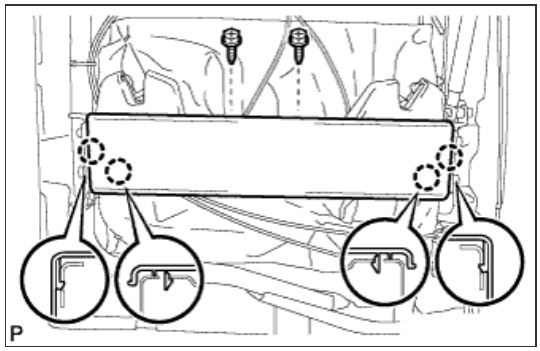
10. REMOVE REAR SEAT CUSHION UNDER COVER LH

a. Detach the 16 claws.



b. Remove the 8 screws and cover.

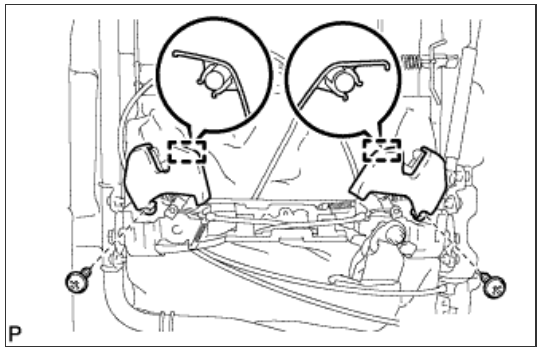
11. REMOVE NO. 3 SEAT FRONT BRACKET COVER LH



a. Detach the 4 claws and remove the cover.

12. REMOVE NO. 3 SEAT LEG COVER NO. 2

a. Remove the 2 screws.



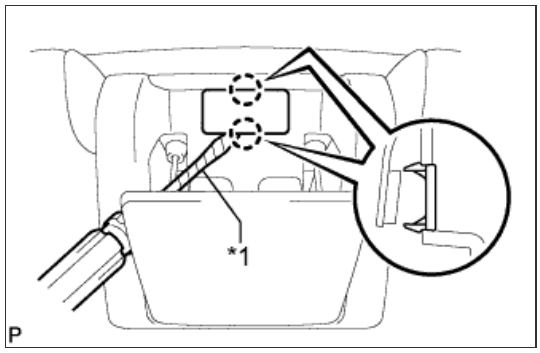
b. Detach the 4 claws and remove the cover.

13. REMOVE REAR SEAT LOCK COVER LH

a. Remove the 2 screws.

b. Detach the 2 clamps and remove the 2 covers.

14. REMOVE SEAT STAND FRAME CAP



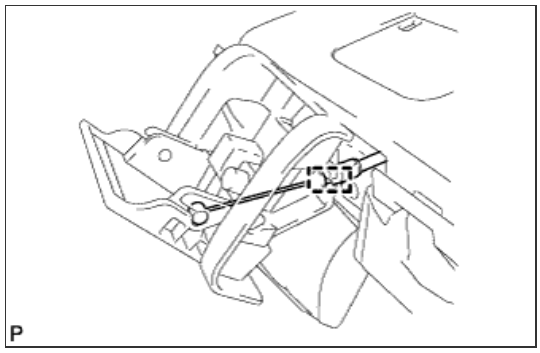
a. Using a screwdriver, detach the 2 claws and remove the stand frame cap.

HINT:

Tape the screwdriver tip before use.

Text in Illustration

	rotective Tape

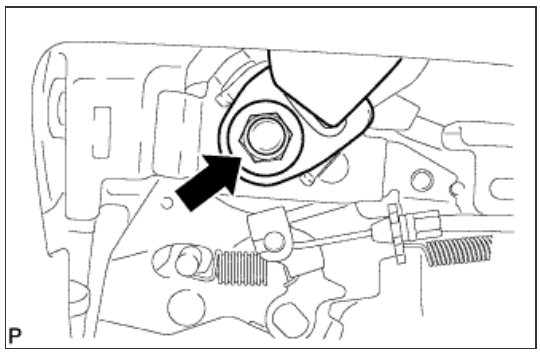


15. REMOVE SEAT CUSHION LOCK RELEASE LEVER ASSEMBLY LH

a. Remove the screw.

b. Detach the claw and remove the release lever.

c. Detach the cable clamp and disconnect the cable.

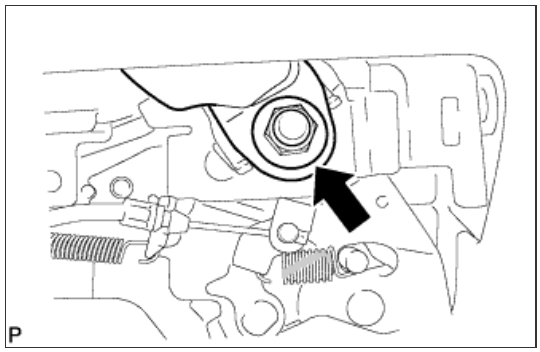


16. REMOVE REAR CENTER SEAT INNER BELT LH (w/ Rear Center Seat Headrest)

a. Remove the nut and belt.

HINT:

The rear No. 2 seat inner belt is fixed with the same nut as the rear seat inner belt. Therefore, it becomes disconnected when the nut is removed.

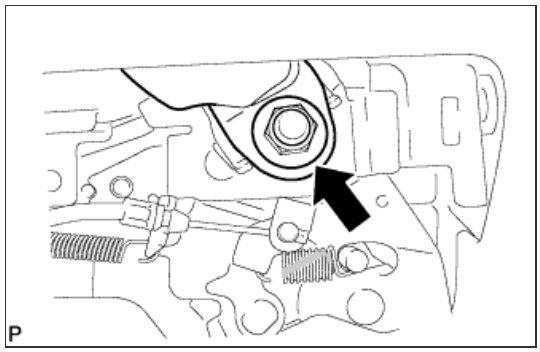


17. REMOVE REAR CENTER SEAT INNER BELT RH (w/ Rear Center Seat Headrest)

a. Remove the nut and belt.

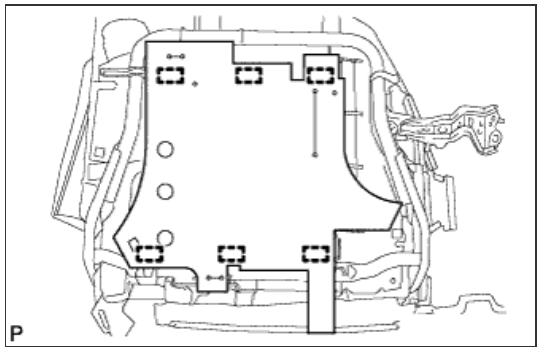
HINT:

The rear No. 2 seat inner belt is fixed with the same nut as the rear seat outer belt. Therefore, it becomes disconnected when the nut is removed.



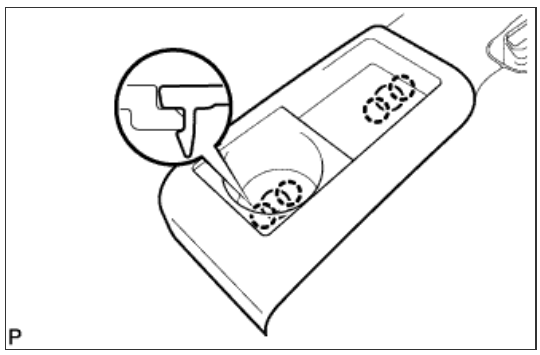
18. REMOVE REAR NO. 2 SEAT INNER BELT SUB-ASSEMBLY

a. Remove the nut and belt.



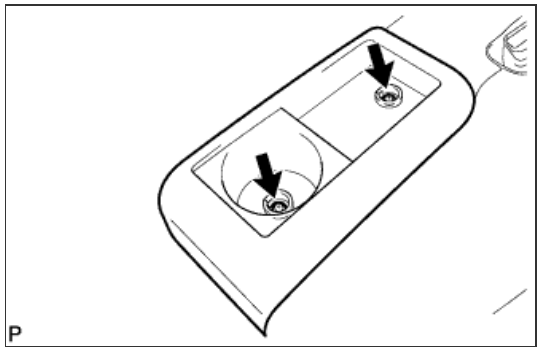
HINT:

The rear No. 2 seat inner belt is fixed with the same nut as the rear seat outer belt. Therefore, it becomes disconnected when the nut is removed.



19. REMOVE REAR SEAT CUSHION CARPET

a. Cut off the tack pins which fasten the seat cushion carpet to the seat cushion pad, and then remove the seat cushion carpet from the seat cushion pad.



20. REMOVE CAP

a. Detach the 4 claws and remove the 2 caps.

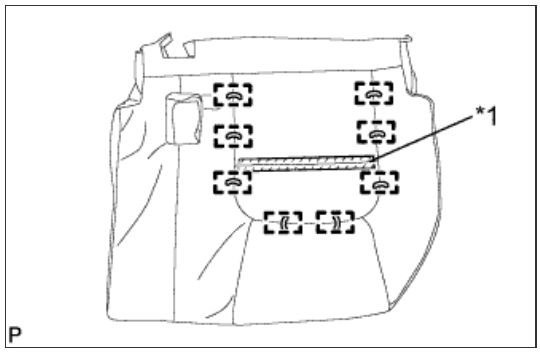
21. REMOVE NO. 2 BOTTLE HOLDER

a. Remove the 2 screws and No. 2 bottle holder.

22. REMOVE SEAT CUSHION COVER WITH PAD

23. REMOVE NO. 3 SEAT CUSHION PAD LH

24. REMOVE NO. 3 SEAT CUSHION COVER SUB-ASSEMBLY LH



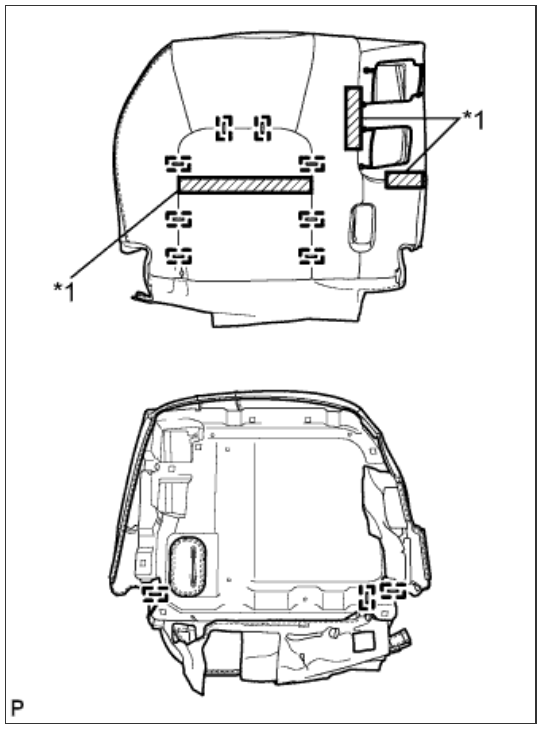
a. w/o Bottle Holder:

i. Remove the hog rings.

ii. Detach the fastening tape and remove the seat cushion cover.

Text in Illustration

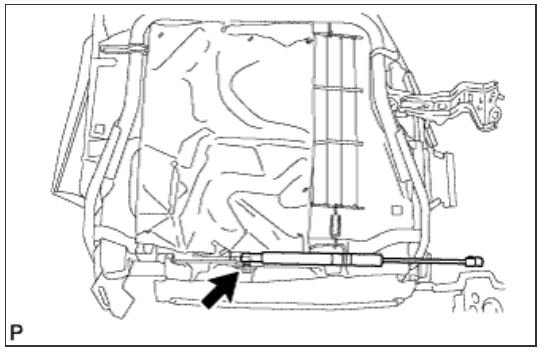
	astening Tape



b. w/ Bottle Holder:

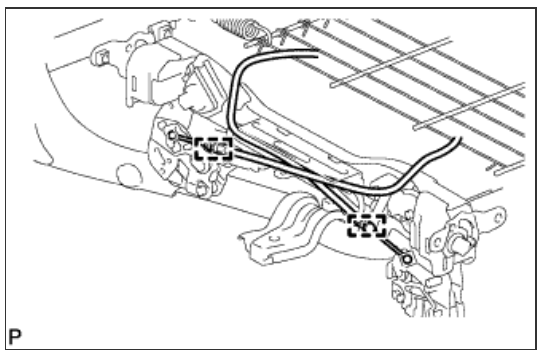
i. Remove the hog rings.

ii. Detach the 3 fastening tapes and remove the seat cushion cover.



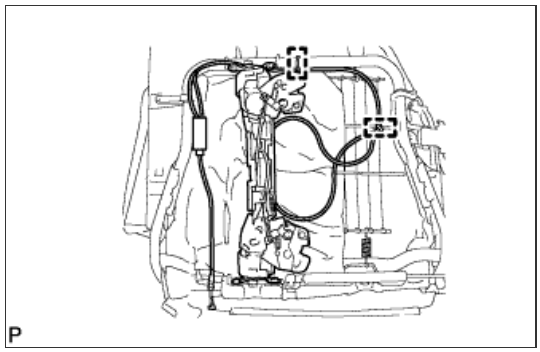
Text in Illustration

	astening Tape



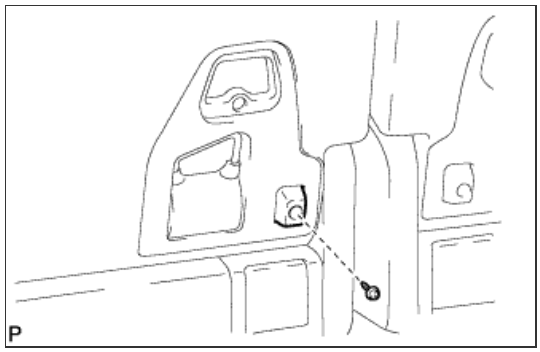
25. REMOVE NO. 2 SEAT STAY SUB-ASSEMBLY

a. Remove the bolt and seat stay.

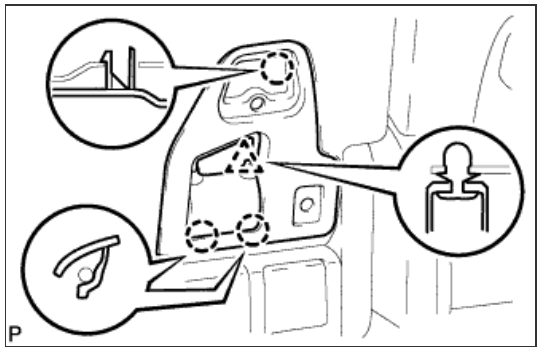


26. REMOVE NO. 3 FOLD SEAT LOCK CONTROL CABLE ASSEMBLY

a. Detach the 2 cable clamps and disconnect the 2 cables.

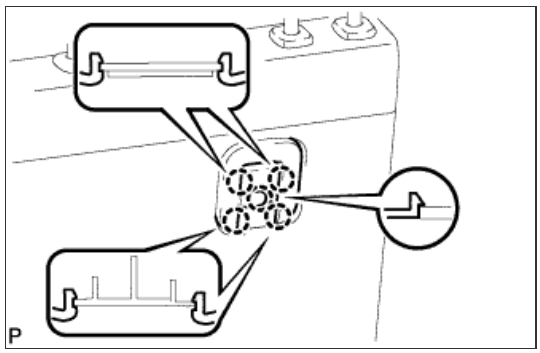


b. Detach the 2 clamps and remove the cable.



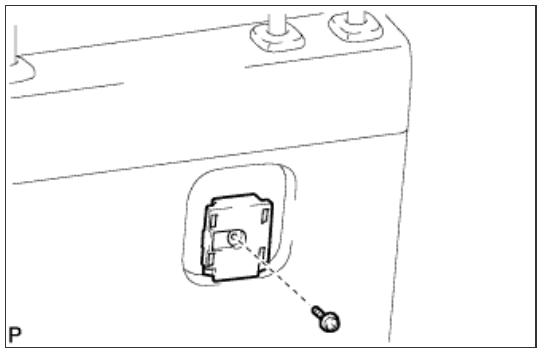
27. REMOVE REAR NO. 2 SEATBACK CUSHION

a. Remove the screw and seatback cushion.



28. REMOVE REAR LOWER SEATBACK LOCK BE EL

a. Detach the 3 claws and clip, and then remove the seatback lock bezel.



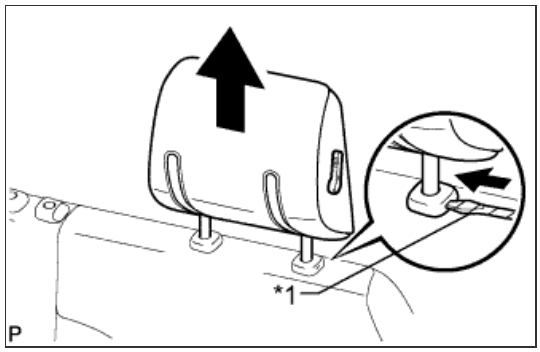
29. REMOVE REAR SEAT HINGE PAWL GUIDE

a. Detach the 5 claws and remove the guide.

30. REMOVE REAR SEAT HINGE PAWL GUIDE

a. Remove the screw and guide.

31. REMOVE REAR SEAT HEADREST ASSEMBLY (w/ Folding Headrest)



a. While releasing the lock inside the headrest support with a screwdriver, remove the headrest.

HINT:

Tape the screwdriver tip before use.

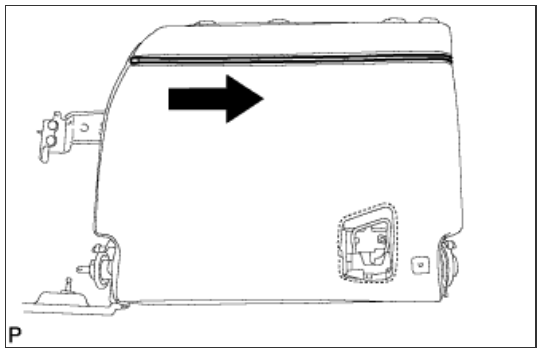
Text in Illustration

	rotective Tape

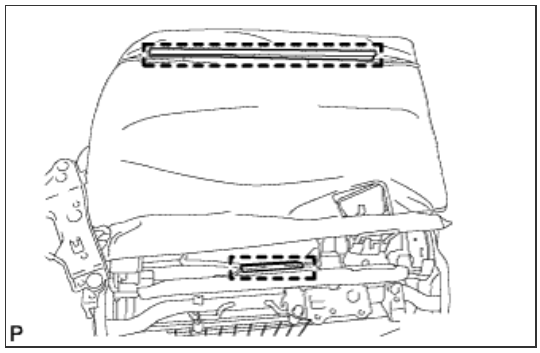
32. REMOVE REAR SEAT HEADREST ASSEMBLY (w/o Folding Headrest)

33. REMOVE REAR SEAT HEADREST HANDLE

a. Remove the snap ring and headrest handle.

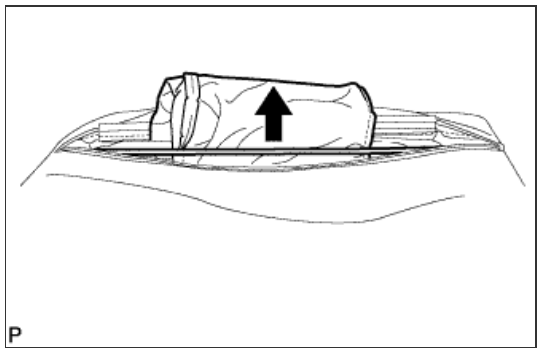


34. REMOVE SEATBACK COVER WITH PAD



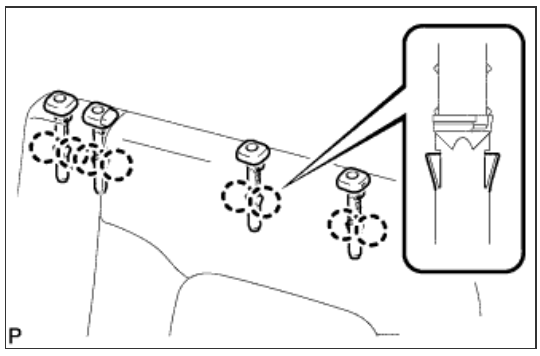
a. Side:

i. w/ Rear Center Headrest:

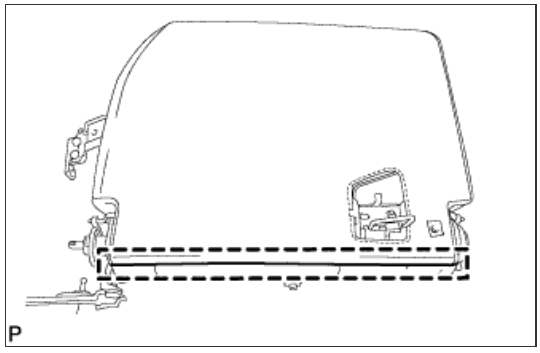


1. Open the fastener.

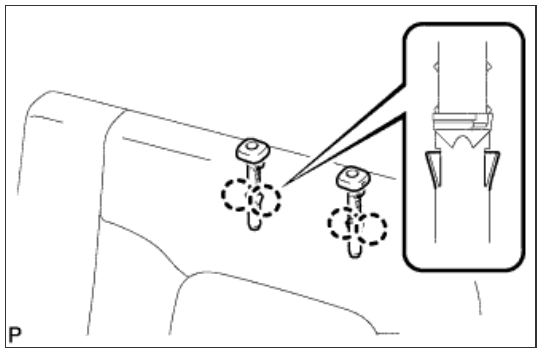
2. Detach the 2 hooks.



3. Pull out the center headrest storage bag.
4. Remove the rear seat protector.

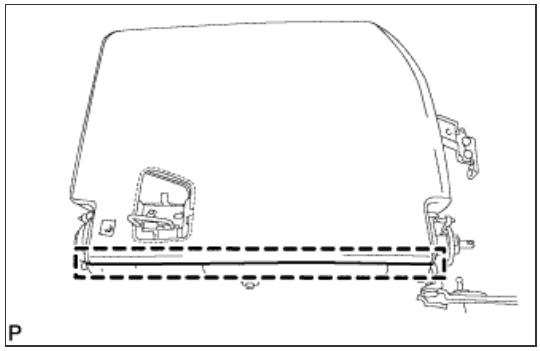


5. Detach the 8 claws and remove the 4 headrest supports.

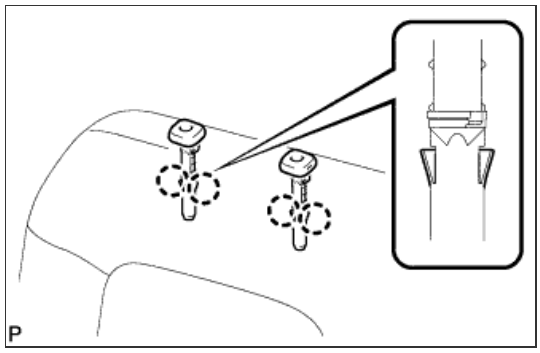


ii. w/o Rear Center Headrest:

1. Detach the hook.
2. Remove the rear seat protector.

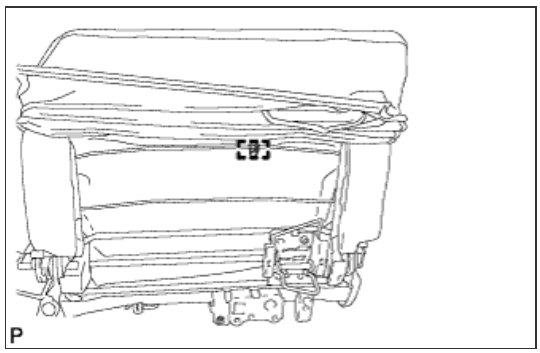


3. Detach the 4 claws and remove the 2 headrest supports.



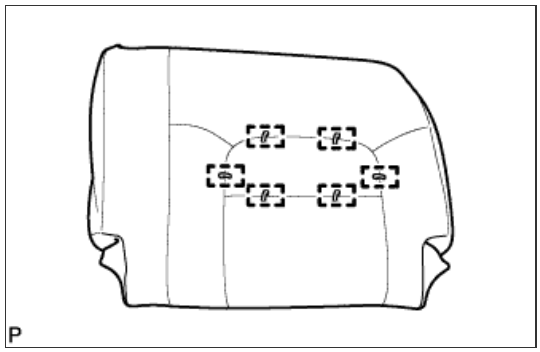
b. RH Side:

i. Detach the hook.



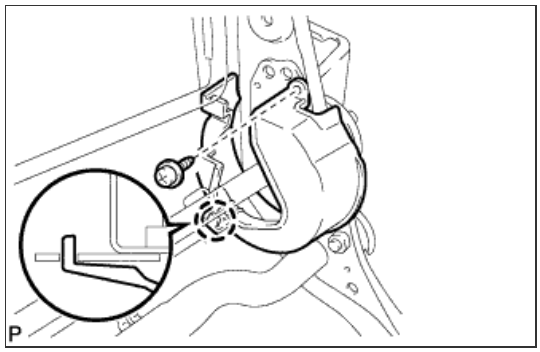
ii. Remove the rear seat protector.

iii. Detach the 4 claws and remove the 2 headrest supports.



c. Remove the hog ring and seatback cover with pad.

35. REMOVE NO. 3 SEATBACK COVER SUB-ASSEMBLY LH



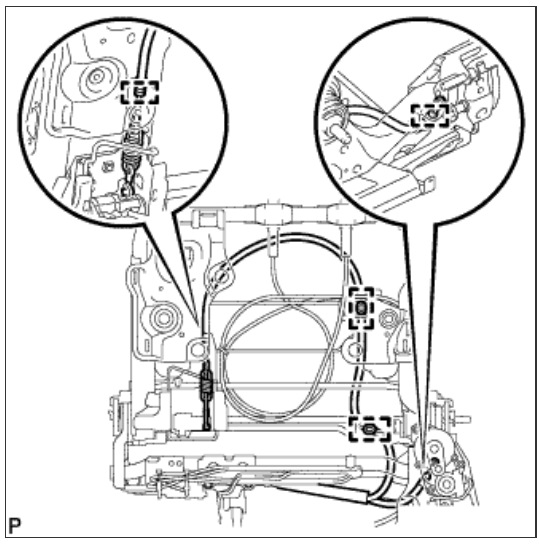
a. Remove the hog rings and seatback cover.

36. REMOVE REAR INNER SEAT RECLINING COVER LH

a. Remove the screw.

b. Detach the claw and remove the cover.

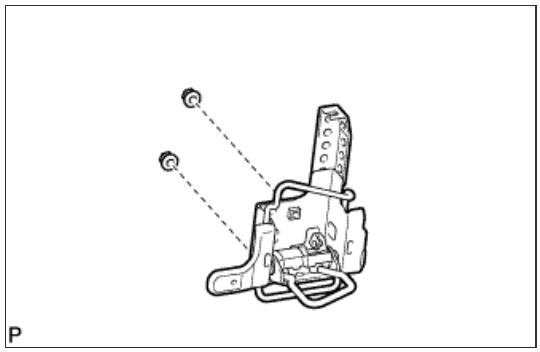
37. REMOVE REAR INNER SEAT RECLINING COVER RH



a. Remove the screw.

b. Detach the claw and remove the cover.

38. REMOVE REAR SEAT LOCK CONTROL CABLE



a. Detach the 2 cable clamps and disconnect the 2 cables.

b. Detach the 2 clamps and remove the lock control cable.

39. REMOVE REAR SEATBACK LOCK STRIKER ASSEMBLY LH

a. Remove the 2 nuts and lock striker.

40. REMOVE REAR NO. 2 SEATBACK COVER LH

a. Detach the 3 claws and remove the cover.

41. REMOVE REAR SEATBACK LOCK STRIKER COVER LH

a. Detach the 2 clamps and remove the cover.

42. REMOVE NO. 2 SEAT RECLINING RELEASE HANDLE SUB-ASSEMBLY

a. Remove the bolt and release handle.

for Preparation Click here

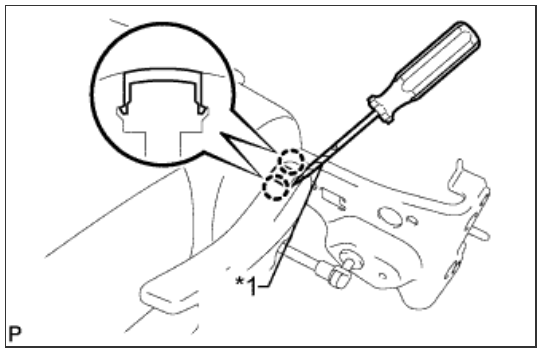
CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

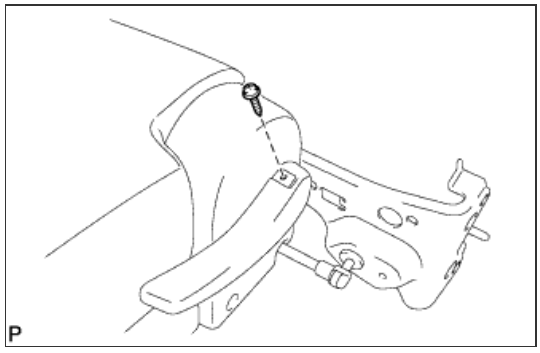
1. REMOVE SEAT ADJUSTER BOLT COVER



a. Using a screwdriver, detach the 2 claws and remove the cover.

HINT:

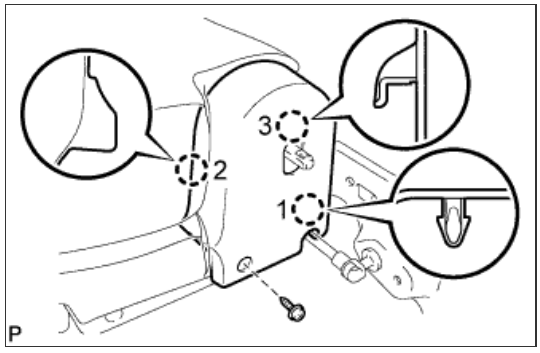
Tape the screwdriver tip before use.



Text in Illustration

	rotective Tape

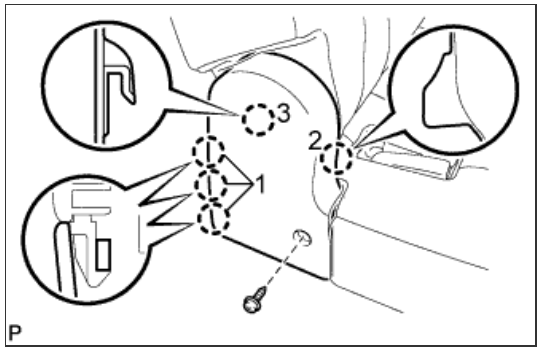
2. REMOVE NO. 2 RECLINING ADJUSTER RELEASE HANDLE LH



a. Remove the screw and release handle.

3. REMOVE RECLINING ADJUSTER COVER LH

a. Remove the screw.

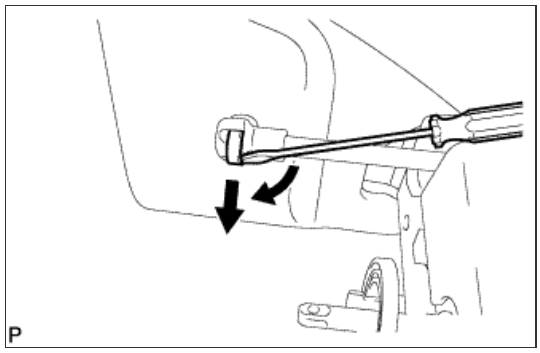


b. Detach the 3 claws in the order shown in the illustration, and then remove the cover.

4. REMOVE RECLINING ADJUSTER COVER RH

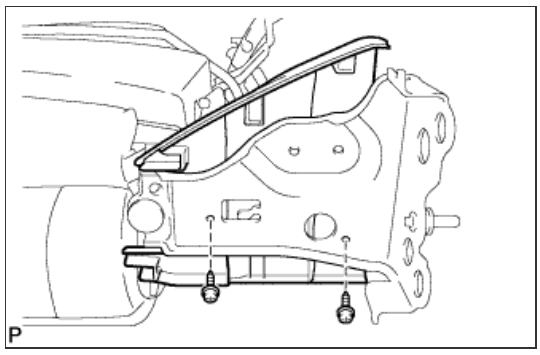
a. Remove the screw.

b. Detach the 5 claws in the order shown in the illustration, and then remove the cover.



5. REMOVE REAR SEAT REAR BRACKET COVER REAR

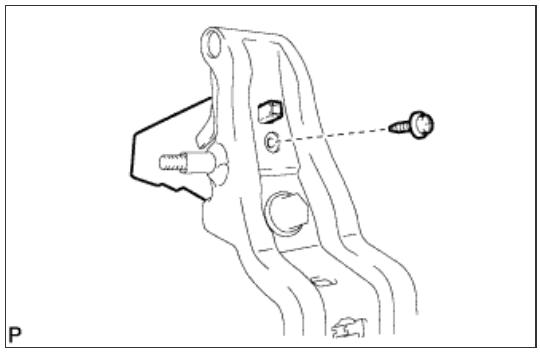
a. Detach the 2 claws and cover.



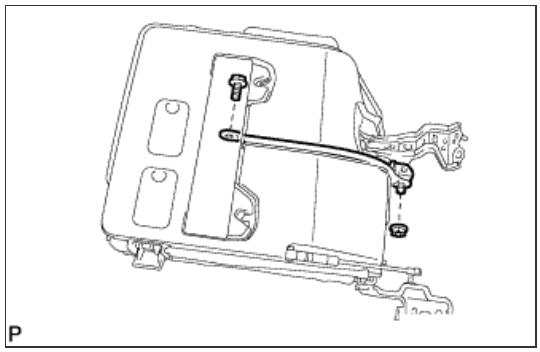
6. REMOVE REAR NO. 3 SEAT LEG COVER LH

a. Using a screwdriver, remove the spring of the seat stay ball-joint.

b. Disconnect the seat stay.

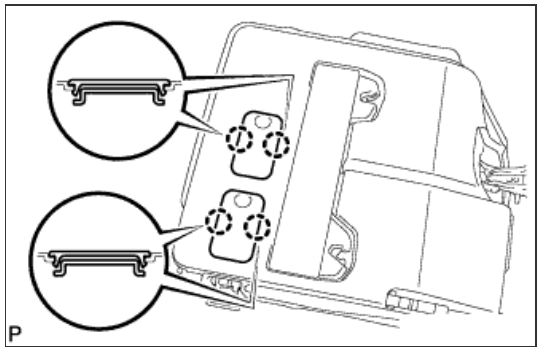


c. Remove the 2 screws and cover.



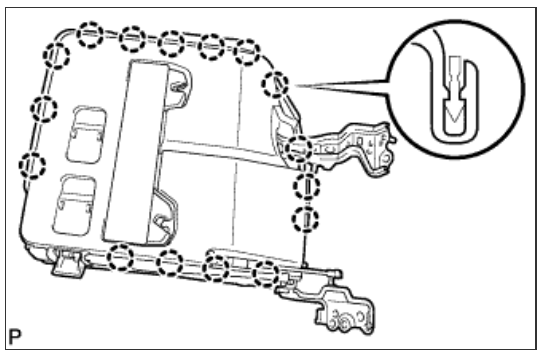
7. REMOVE NO. 2 SEAT LEG COVER NO. 2

a. Remove the screw and seat leg cover.



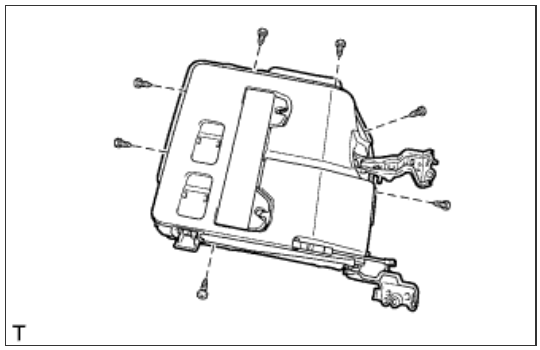
8. REMOVE 3RD SEAT LINK SUB-ASSEMBLY LH

a. Remove the bolt, nut and seat link.



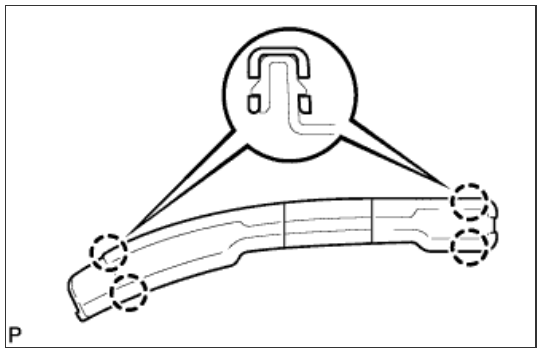
9. REMOVE 3RD SEAT CUSHION LOCK COVER

a. Detach the 4 claws and remove the 2 covers.



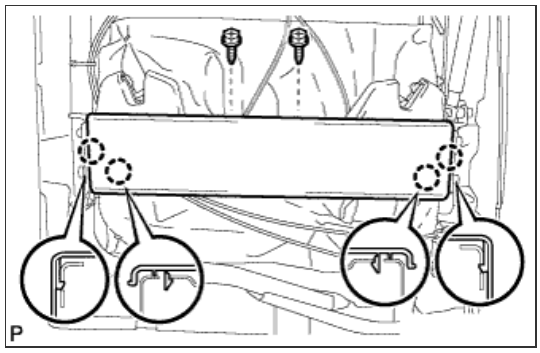
10. REMOVE REAR SEAT CUSHION UNDER COVER LH

a. Detach the 16 claws.



b. Remove the screws and cover.

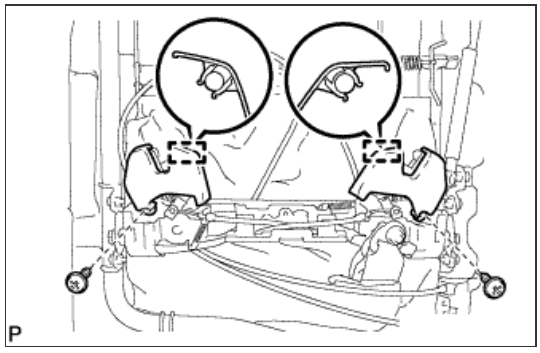
11. REMOVE NO. 3 SEAT FRONT BRACKET COVER LH



a. Detach the 4 claws and remove the cover.

12. REMOVE NO. 3 SEAT LEG COVER NO. 2

a. Remove the 2 screws.



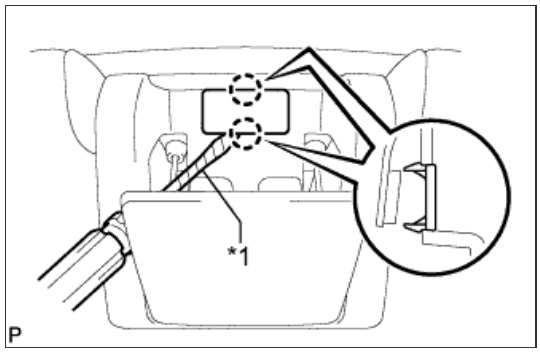
b. Detach the 4 claws and remove the cover.

13. REMOVE REAR SEAT LOCK COVER LH

a. Remove the 2 screws.

b. Detach the 2 clamps and remove the 2 covers.

14. REMOVE SEAT STAND FRAME CAP



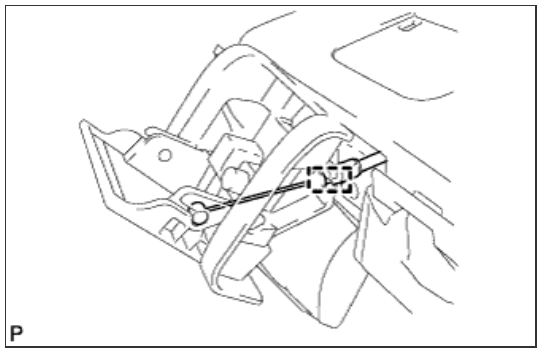
a. Using a screwdriver, detach the 2 claws and remove the stand frame cap.

HINT:

Tape the screwdriver tip before use.

Text in Illustration

	rotective Tape

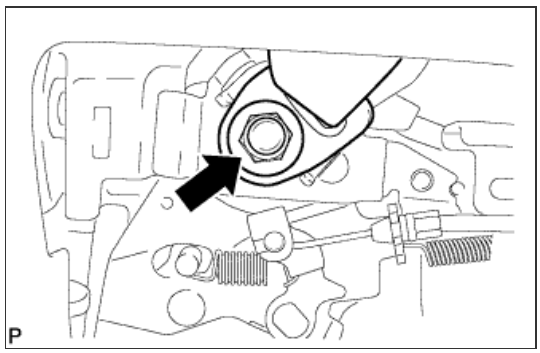


15. REMOVE SEAT CUSHION LOCK RELEASE LEVER ASSEMBLY LH

a. Remove the screw.

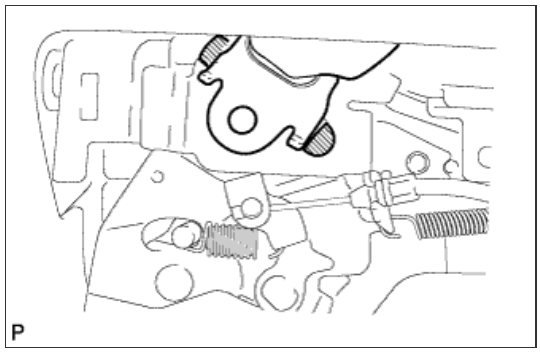
b. Detach the claw and remove the release lever.

c. Detach the cable clamp and disconnect the cable.



16. REMOVE REAR CENTER SEAT INNER BELT LH (w/ Rear Center Seat Headrest)

a. Remove the nut and belt.

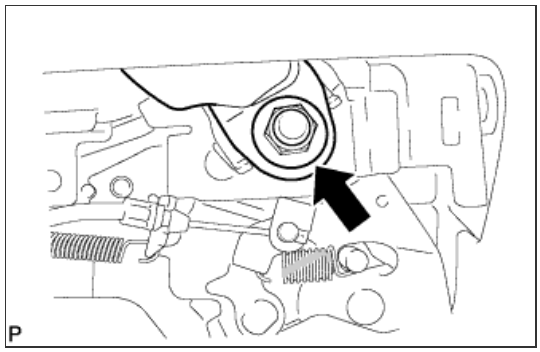


HINT:

The rear No. 2 seat inner belt is fixed with the same nut as the rear seat inner belt. Therefore, it becomes disconnected when the nut is removed.

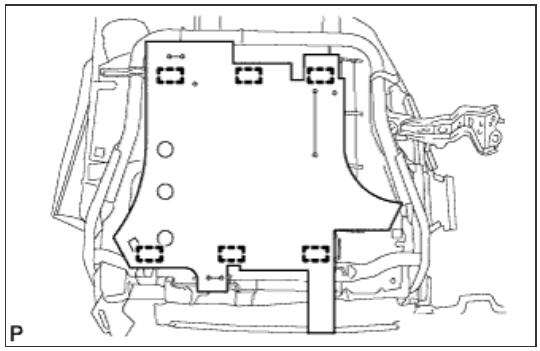
17. REMOVE REAR CENTER SEAT INNER BELT RH (w/ Rear Center Seat Headrest)

a. Remove the belt.



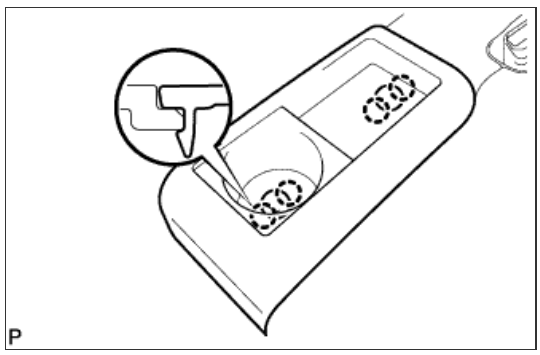
18. REMOVE REAR NO. 2 SEAT INNER BELT SUB-ASSEMBLY

a. Remove the nut and belt.



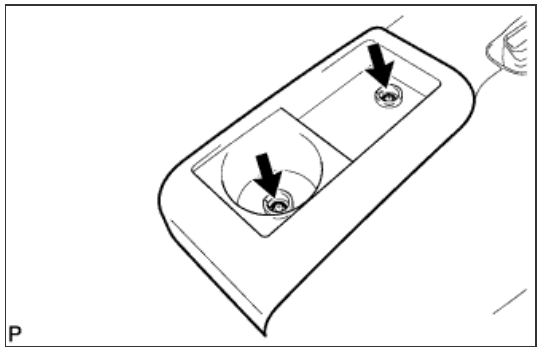
HINT:

The rear No. 2 seat inner belt is fixed with the same nut as the rear seat outer belt. Therefore, it becomes disconnected when the nut is removed.



19. REMOVE REAR SEAT CUSHION CARPET

a. Cut off the tack pins which fasten the seat cushion carpet to the seat cushion pad, and then remove the seat cushion carpet from the seat cushion pad.



20. REMOVE CAP

a. Detach the 4 claws and remove the 2 caps.

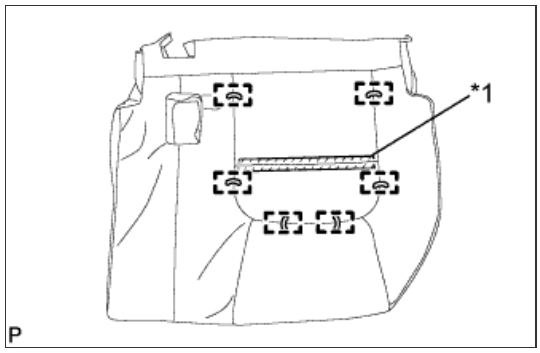
21. REMOVE NO. 2 BOTTLE HOLDER

a. Remove the 2 screws and No. 2 bottle holder.

22. REMOVE SEAT CUSHION COVER WITH PAD

23. REMOVE NO. 3 SEAT CUSHION PAD LH

24. REMOVE NO. 3 SEAT CUSHION COVER SUB-ASSEMBLY LH



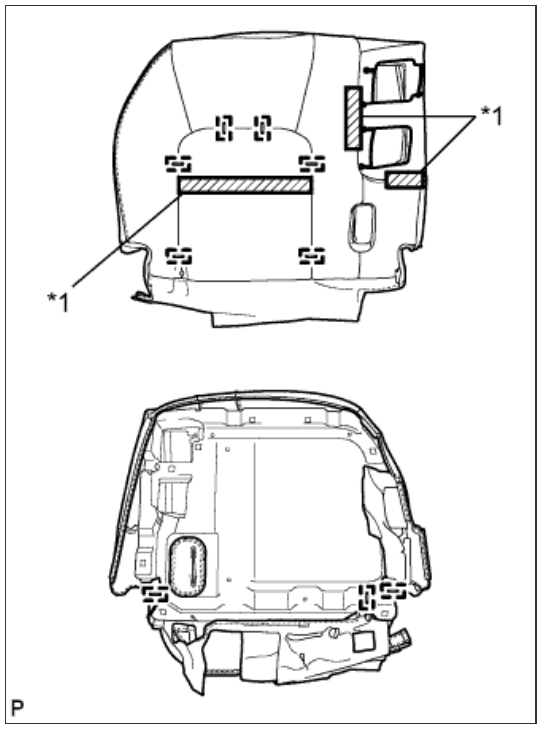
a. w/o Bottle Holder:

i. Remove the hog rings.

ii. Detach the fastening tape and remove the seat cushion cover.

Text in Illustration

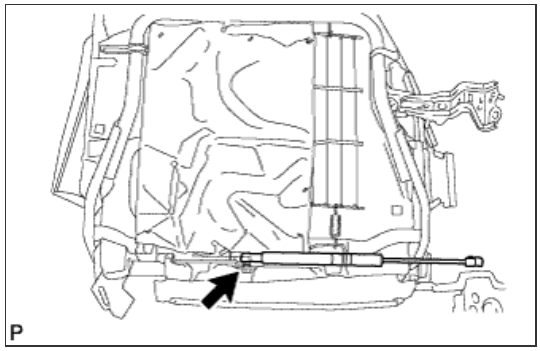
	astening Tape



b. w/ Bottle Holder:

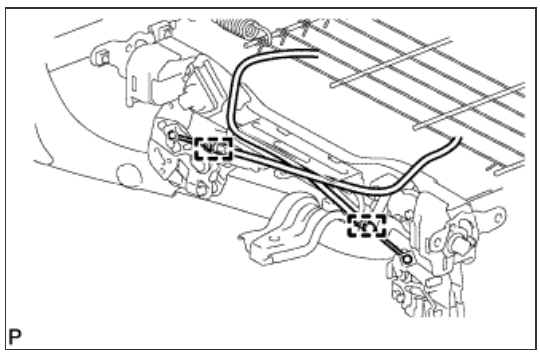
i. Remove the hog rings.

ii. Detach the 3 fastening tapes and remove the seat cushion cover.



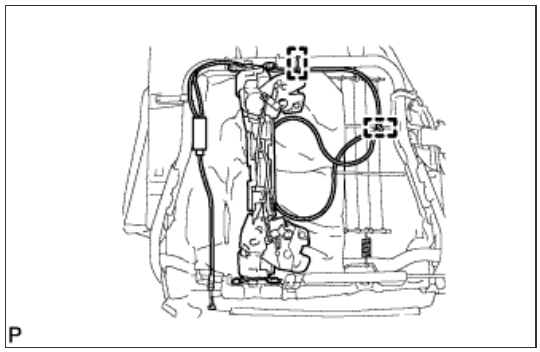
Text in Illustration

	astening Tape



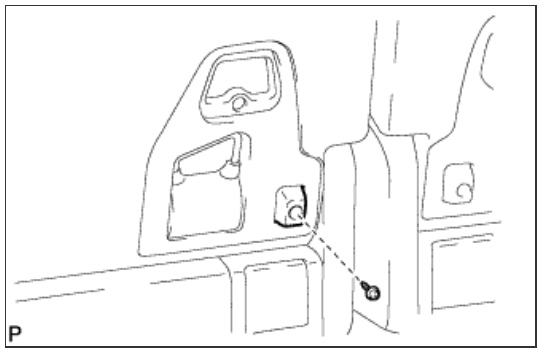
25. REMOVE NO. 2 SEAT STAY SUB-ASSEMBLY

a. Remove the bolt and seat stay.

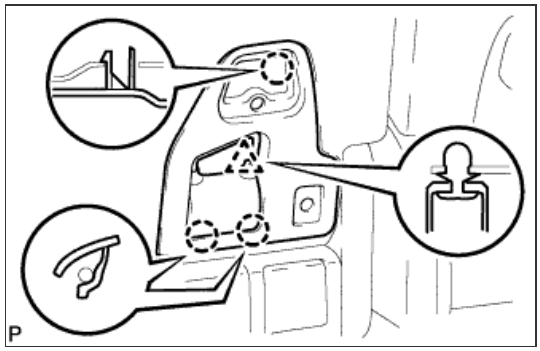


26. REMOVE NO. 3 FOLD SEAT LOCK CONTROL CABLE ASSEMBLY

a. Detach the 2 cable clamps and disconnect the 2 cables.

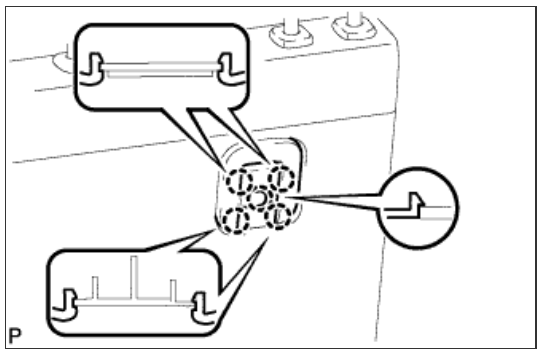


b. Detach the 2 clamps and remove the cable.



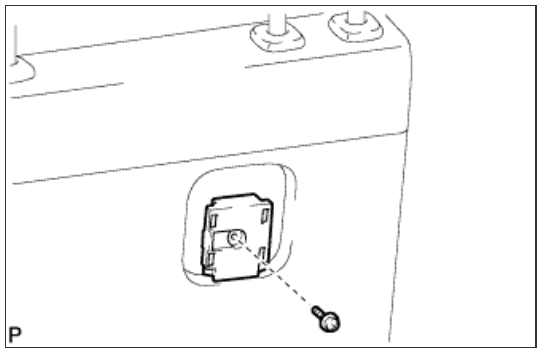
27. REMOVE REAR NO. 2 SEATBACK CUSHION

a. Remove the screw and seatback cushion.



28. REMOVE REAR LOWER SEATBACK LOCK BE EL

a. Detach the 3 claws and clip, and then remove the seatback lock bezel.



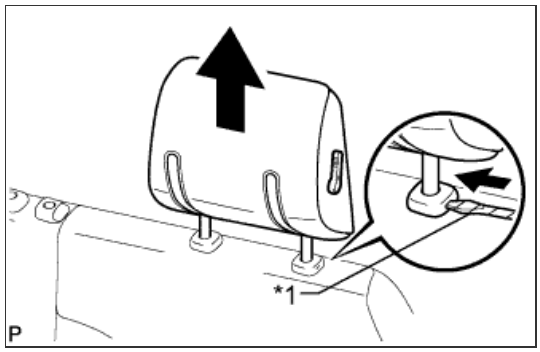
29. REMOVE REAR SEAT HINGE PAWL GUIDE

a. Detach the 5 claws and remove the guide.

30. REMOVE REAR SEAT HINGE PAWL GUIDE

a. Remove the screw and guide.

31. REMOVE REAR SEAT HEADREST ASSEMBLY (w/ Folding Headrest)



a. While releasing the lock inside the headrest support with a screwdriver, remove the headrest.

HINT:

Tape the screwdriver tip before use.

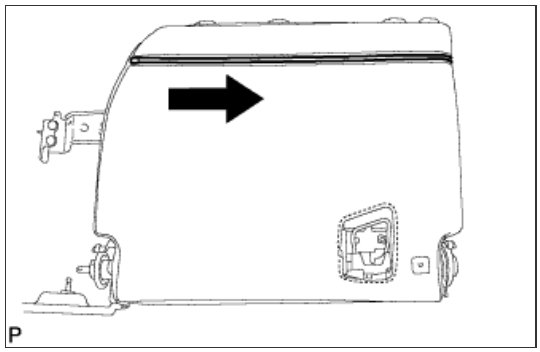
Text in Illustration

	rotective Tape

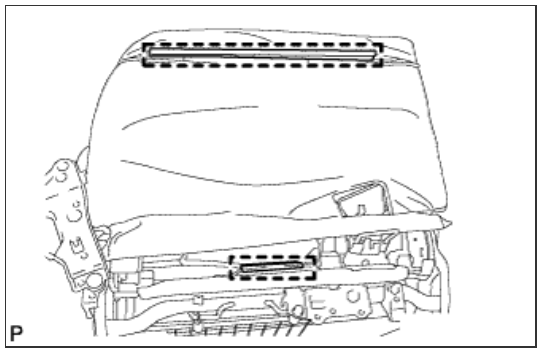
32. REMOVE REAR SEAT HEADREST ASSEMBLY (w/o Folding Headrest)

33. REMOVE REAR SEAT HEADREST HANDLE

a. Remove the snap ring and headrest handle.

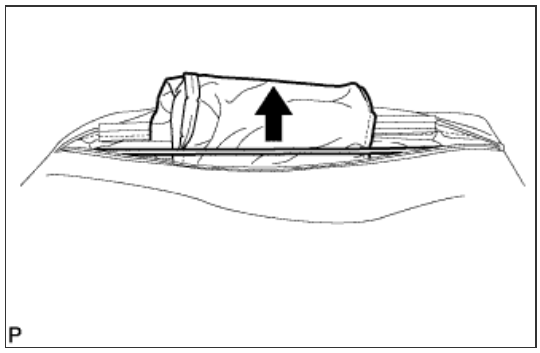


34. REMOVE SEATBACK COVER WITH PAD



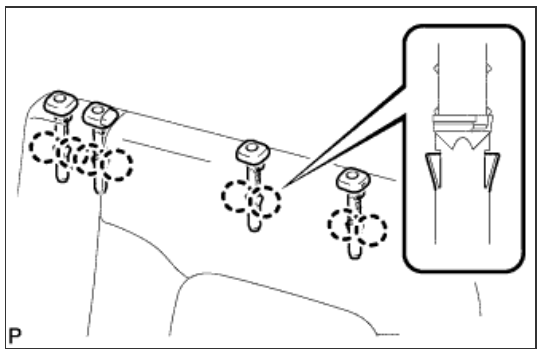
a. Side:

i. w/ Rear Center Headrest:

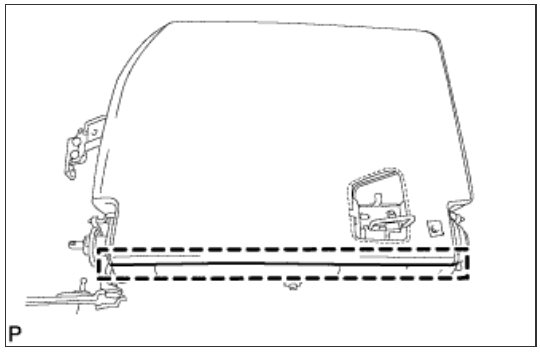


1. Open the fastener.

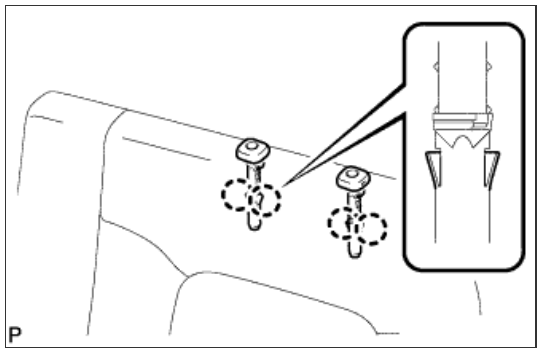
2. Detach the 2 hooks.



3. Pull out the center headrest storage bag.
4. Remove the rear seat protector.

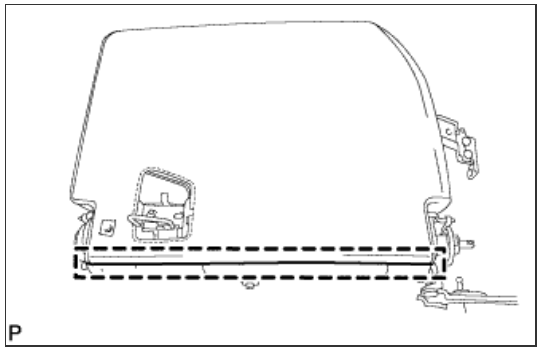


5. Detach the claws and remove the 4 headrest supports.

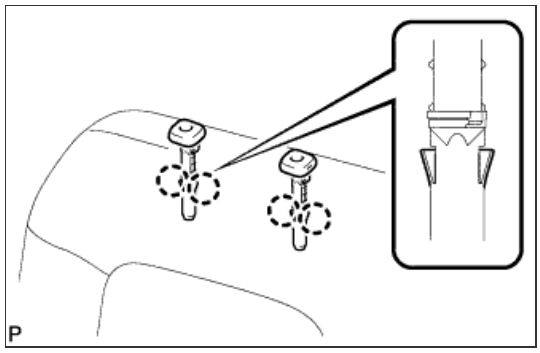


ii. w/o Rear Center Headrest:

1. Detach the hook.
2. Remove the rear seat protector.

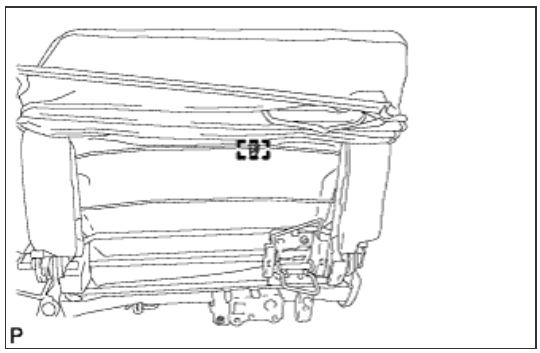


3. Detach the 4 claws and remove the 2 headrest supports.



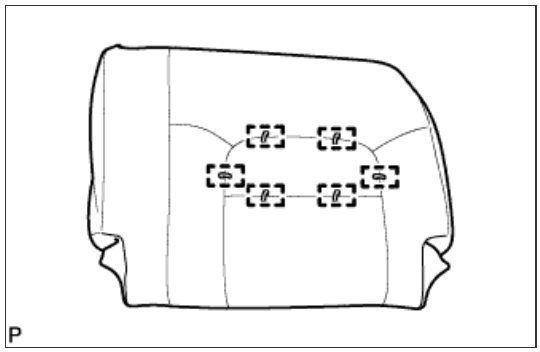
b. RH Side:

i. Detach the hook.



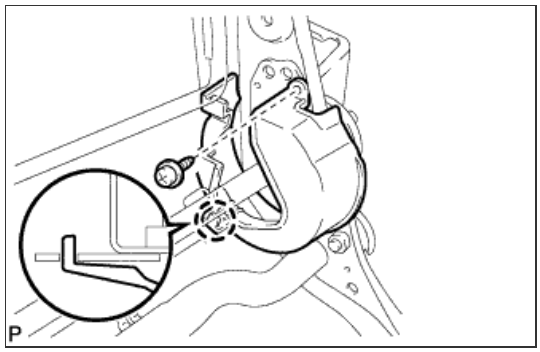
ii. Remove the rear seat protector.

iii. Detach the 4 claws and remove the 2 headrest supports.



c. Remove the hog ring and seatback cover with pad.

35. REMOVE NO. 3 SEATBACK COVER SUB-ASSEMBLY LH



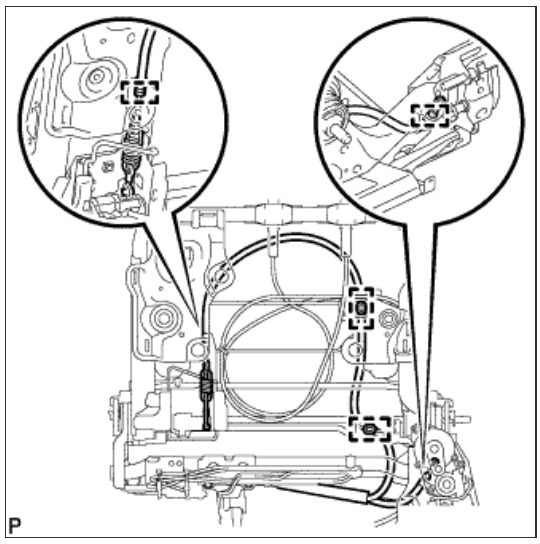
a. Remove the hog rings and seatback cover.

36. REMOVE REAR INNER SEAT RECLINING COVER LH

a. Remove the screw.

b. Detach the claw and remove the cover.

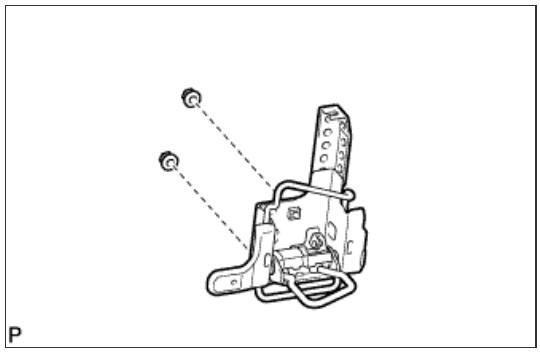
37. REMOVE REAR INNER SEAT RECLINING COVER RH



a. Remove the screw.

b. Detach the claw and remove the cover.

38. REMOVE REAR SEAT LOCK CONTROL CABLE



a. Detach the 2 cable clamps and disconnect the 2 cables.

b. Detach the 2 clamps and remove the lock control cable.

39. REMOVE REAR SEATBACK LOCK STRIKER ASSEMBLY LH

a. Remove the 2 nuts and lock striker.

40. REMOVE REAR NO. 2 SEATBACK COVER LH

a. Detach the 3 claws and remove the cover.

41. REMOVE REAR SEATBACK LOCK STRIKER COVER LH

a. Detach the 2 clamps and remove the cover.

42. REMOVE NO. 2 SEAT RECLINING RELEASE HANDLE SUB-ASSEMBLY

a. Remove the bolt and release handle.

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

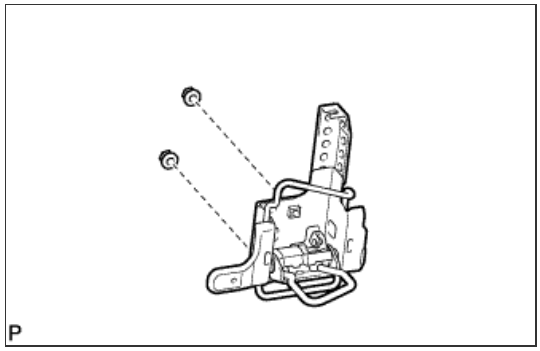
- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL NO. 2 SEAT RECLINING RELEASE HANDLE SUB-ASSEMBLY

a. Install the release handle with the bolt.

2. INSTALL REAR SEATBACK LOCK STRIKER COVER LH

a. Attach the 2 clamps to install the cover.

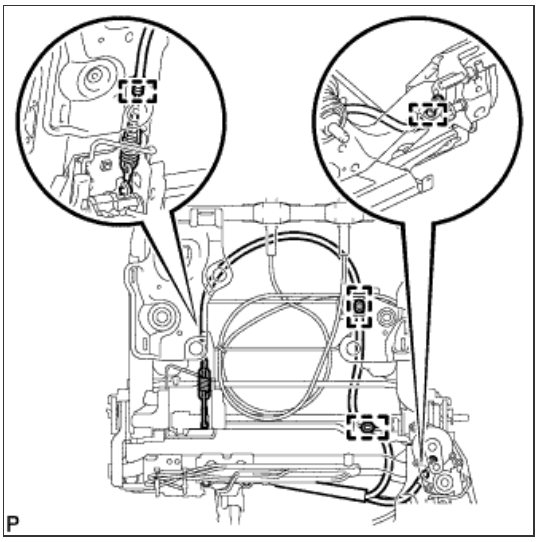


3. INSTALL REAR NO. 2 SEATBACK COVER LH

a. Attach the 3 claws to install the cover.

4. INSTALL REAR SEATBACK LOCK STRIKER ASSEMBLY LH

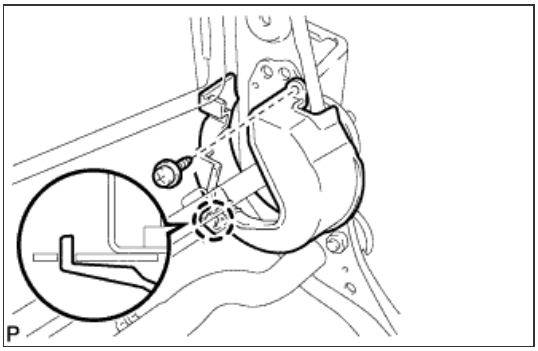
a. Install the lock striker with the 2 nuts.



Torque:
14 N*m{ 138 kgf*cm , 10 ft.*lbf }

5. INSTALL REAR SEAT LOCK CONTROL CABLE

a. Attach the 2 clamps to install the lock control cable.



b. Attach the 2 cable clamps to connect the 2 cables.

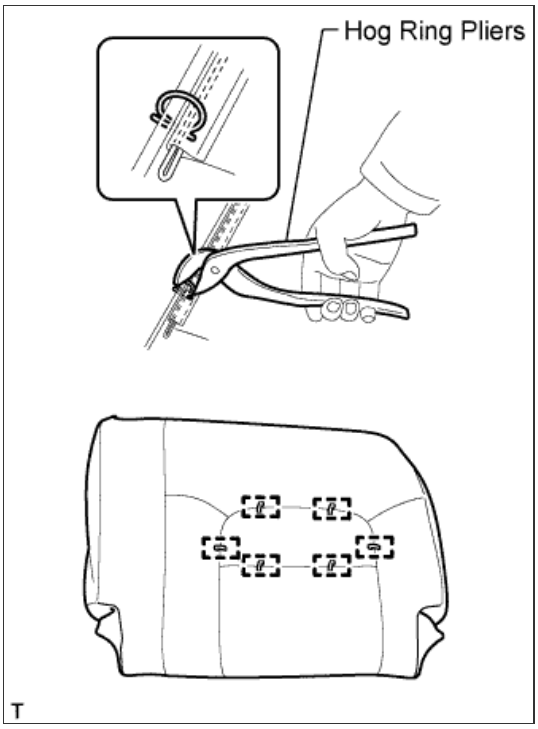
6. INSTALL REAR INNER SEAT RECLINING COVER RH

a. Attach the claw to install the cover.

b. Install the screw.

7. INSTALL REAR INNER SEAT RECLINING COVER LH

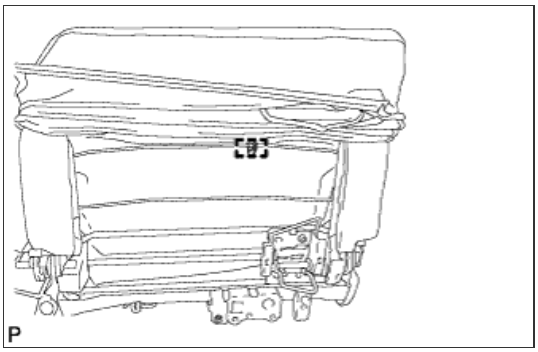
a. Attach the claw to install the cover.



b. Install the screw.

8. INSTALL NO. 3 SEATBACK COVER SUB-ASSEMBLY LH

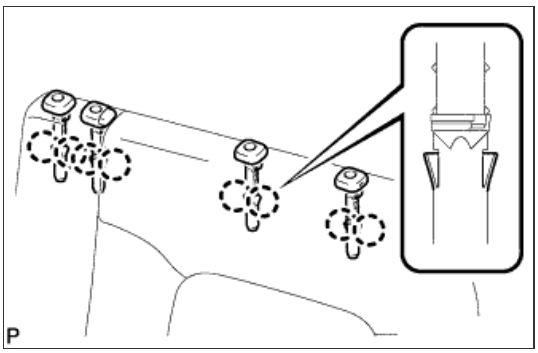
a. Using hog ring pliers, install the seatback cover to the seatback pad with new hog rings.



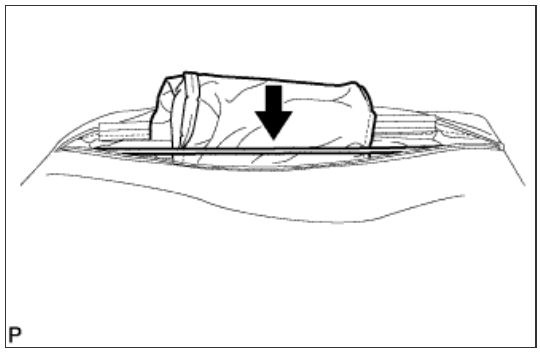
NOTICE:

- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**

9. INSTALL SEATBACK COVER WITH PAD

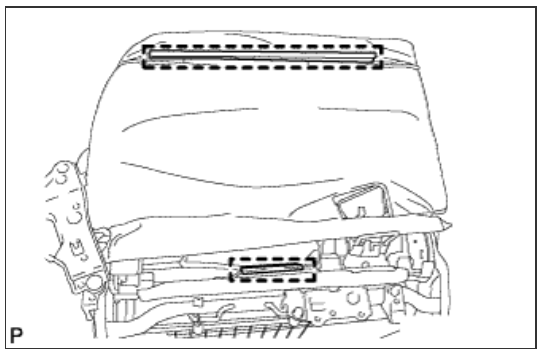


a. Using hog ring pliers, install the seatback cover with pad to the seatback frame with a new hog rings.

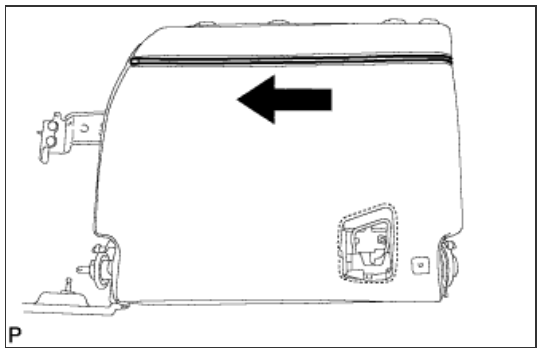


b. LH Side:

i. Attach the 8 claws to install the 4 headrest supports.

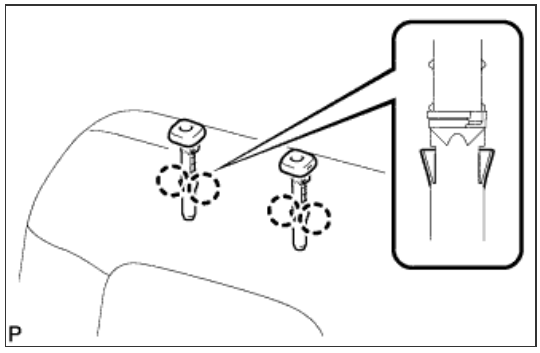


ii. Install the rear seat protector.

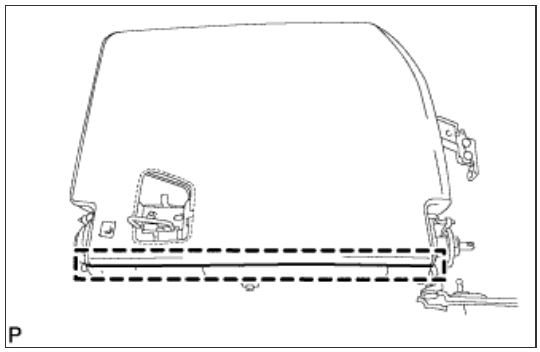


iii. Insert the center headrest storage bag.

iv. Attach the 2 hooks.



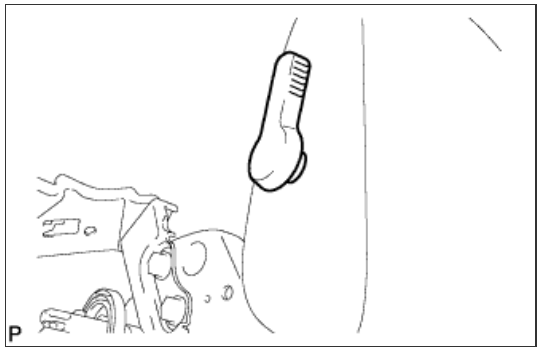
v. Close the fastener.



c. RH Side:

i. Attach the 4 claws to install the 2 headrest supports.

ii. Install the rear seat protector.

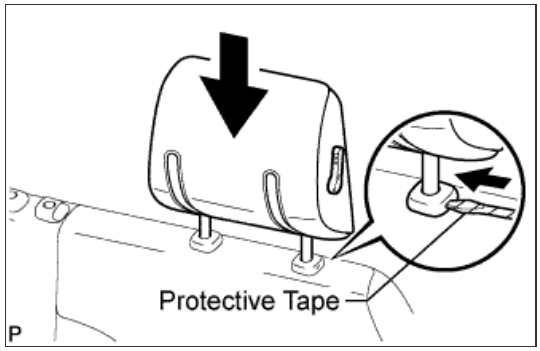


iii. Attach the hook.

10. INSTALL REAR SEAT HEADREST HANDLE

a. Install the snap ring to the headrest handle.

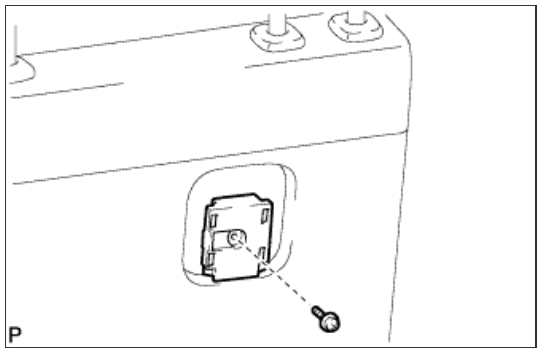
b. Install the headrest handle to the headrest.



11. INSTALL REAR SEAT HEADREST ASSEMBLY (w/ Folding Headrest)

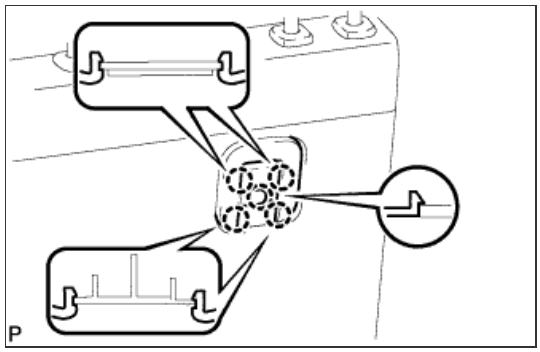
a. While releasing the lock inside the headrest support with a screwdriver, install the headrest.

HINT:



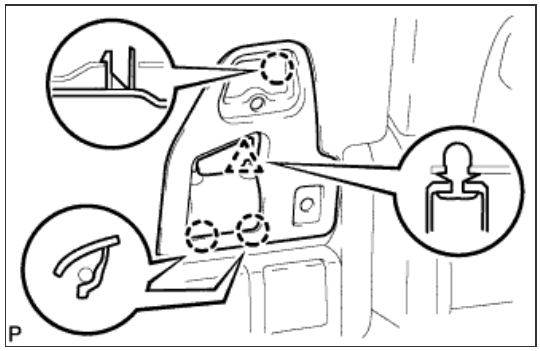
Tape the screwdriver tip before use.

12. INSTALL REAR SEAT HEADREST ASSEMBLY (w/o Folding Headrest)



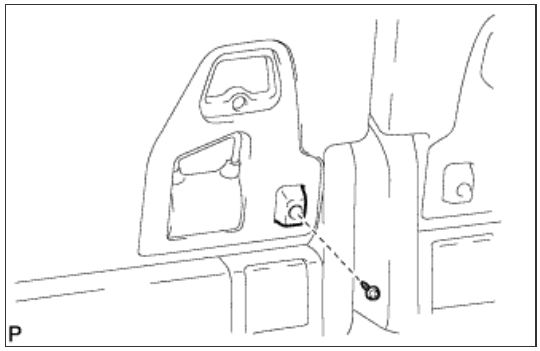
13. INSTALL REAR SEAT HINGE PAWL GUIDE

a. Install the guide with the screw.



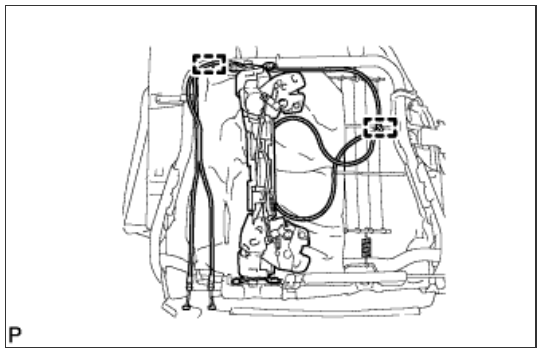
14. INSTALL REAR SEAT HINGE PAWL GUIDE

a. Attach the 5 claws to install the guide.



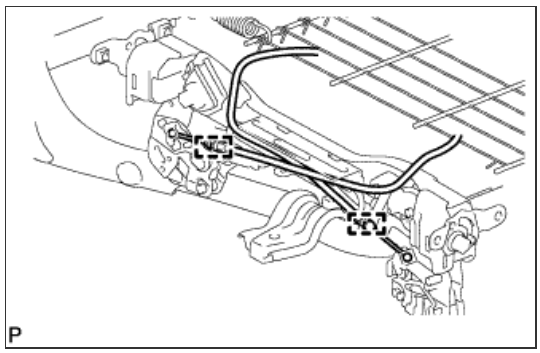
15. INSTALL REAR LOWER SEATBACK LOCK BEZEL

a. Attach the 3 claws and clip to install the seatback lock bezel.



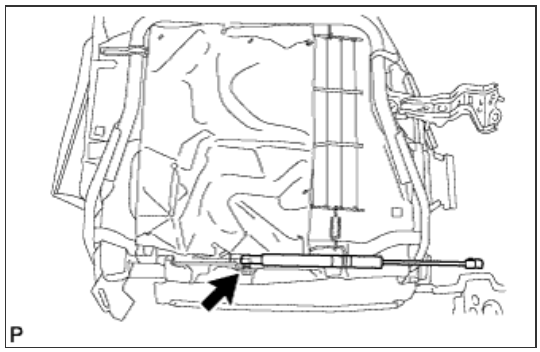
16. INSTALL REAR NO. 2 SEATBACK CUSHION

a. Install the seatback cushion with the screw.



17. INSTALL NO. 3 FOLD SEAT LOCK CONTROL CABLE ASSEMBLY

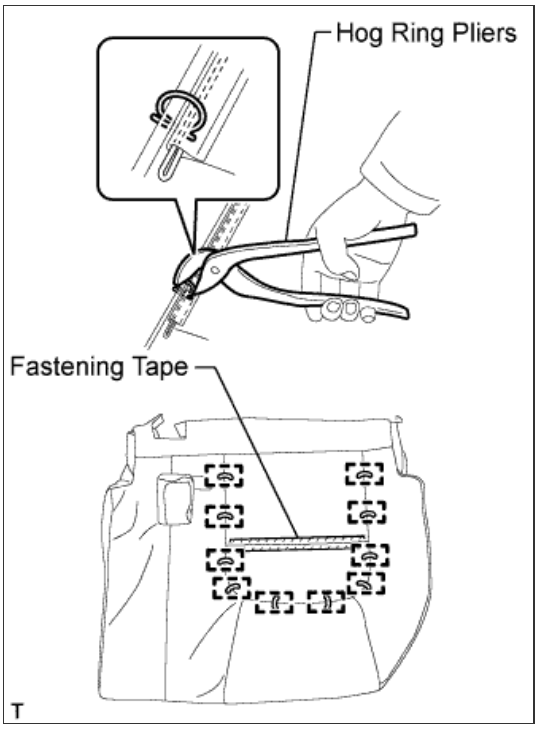
a. Attach the 2 clamps to install the 2 cables.



b. Attach the 2 cable clamps to connect the 2 cables.

18. INSTALL NO. 2 SEAT STAY SUB-ASSEMBLY

a. Install the seat stay with the bolt.



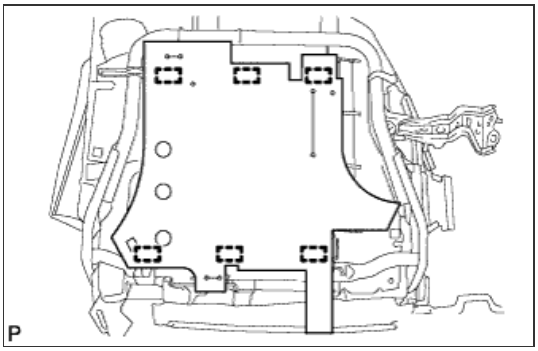
19. INSTALL NO. 3 SEAT CUSHION COVER SUB-ASSEMBLY LH

a. Attach the fastening tape to install the seatback cover.

b. Using hog ring pliers, install the seat cushion cover to the seat cushion pad with new hog rings.

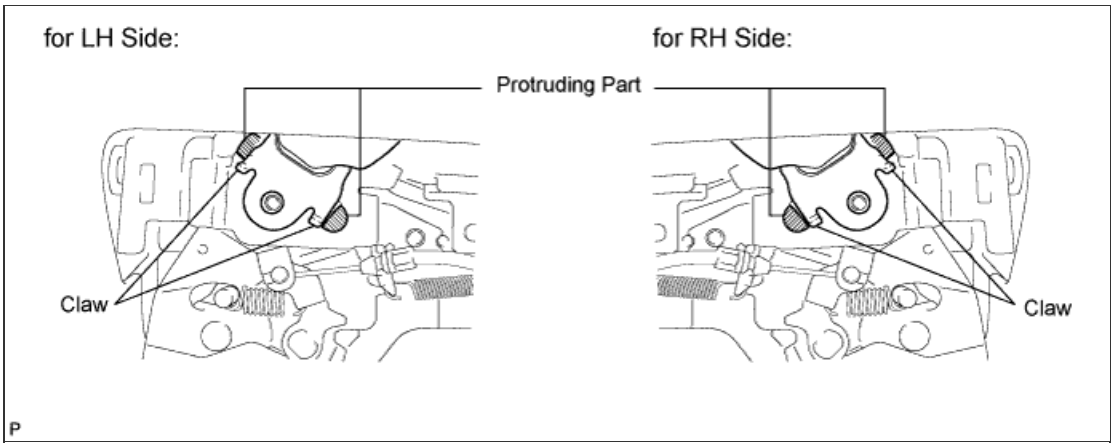
NOTICE:

- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**



20. INSTALL NO. 3 SEAT CUSHION PAD LH

21. INSTALL SEAT CUSHION COVER WITH PAD



22. INSTALL REAR SEAT CUSHION CARPET

a. Install the seat cushion carpet with new tack pins.

23. INSTALL REAR NO. 2 SEAT INNER BELT SUB-ASSEMBLY

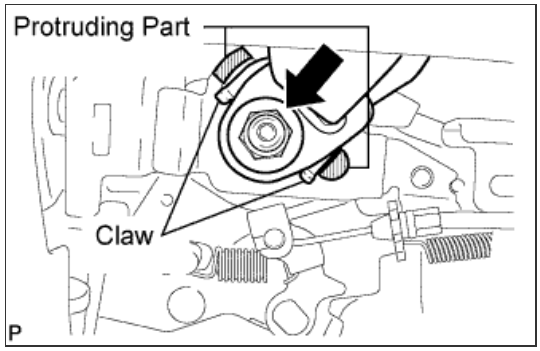
a. Install the 2 belts.

NOTICE:

- **Make sure the claws are facing away from the seat.**
- **Do not overlap the anchor part of the seat belt and protruding parts of the seat.**

24. INSTALL REAR SEAT INNER BELT SUB-ASSEMBLY (for LH Side)

a. Install the belt with the nut.



Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

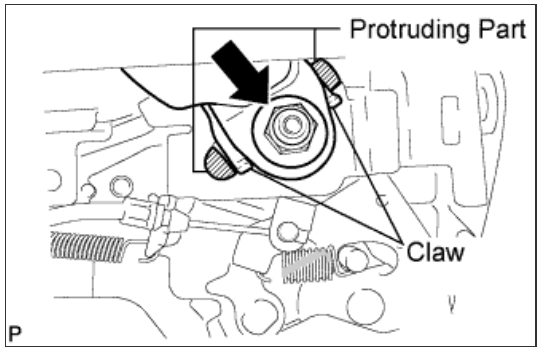
Do not overlap the anchor part of the seat belt and protruding parts of the seat.

HINT:

The rear No. 2 seat inner belt is fixed with the same nut as the rear seat inner belt. Therefore, connect it when installing the rear seat inner belt.

25. INSTALL REAR SEAT OUTER BELT SUB-ASSEMBLY (for RH Side)

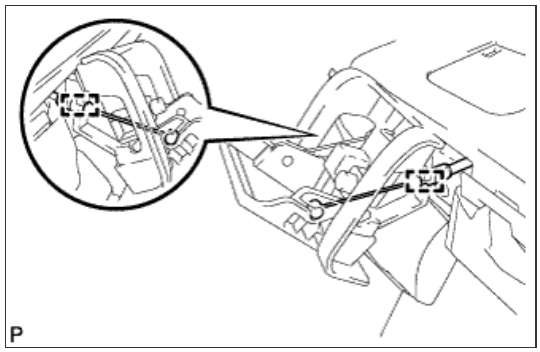
a. Install the belt with the nut.



Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

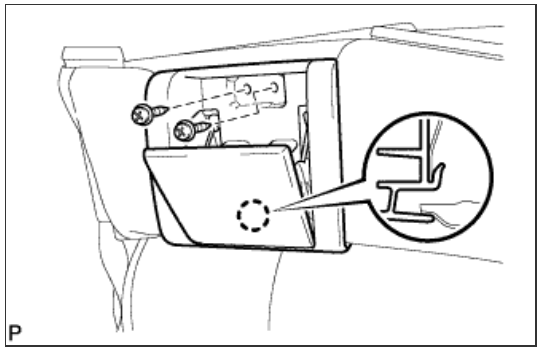
NOTICE:

Do not overlap the anchor part of the seat belt and protruding parts of the seat.



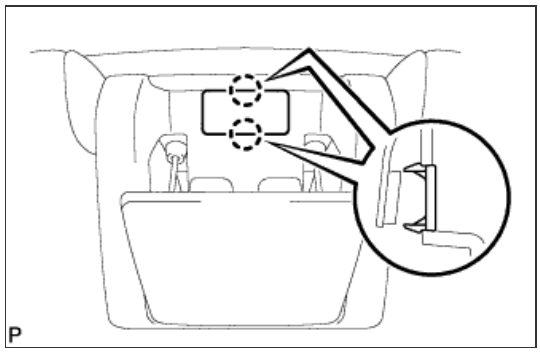
HINT:

The rear No. 2 seat inner belt is fixed with the same nut as the rear seat outer belt. Therefore, connect it when installing the rear seat outer belt.



26. INSTALL SEAT CUSHION LOCK RELEASE LEVER ASSEMBLY LH

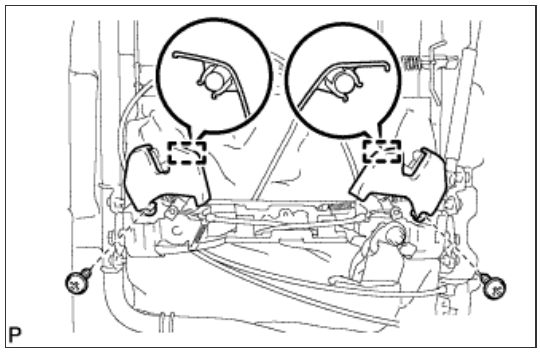
a. Attach the 2 cable clamps to connect the 2 cables.



b. Attach the claw to install the release lever.

c. Install the 2 screws.

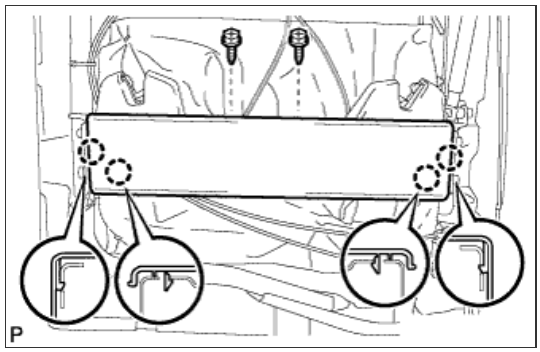
27. INSTALL SEAT STAND FRAME CAP



a. Attach the 2 claws to install the stand frame cap.

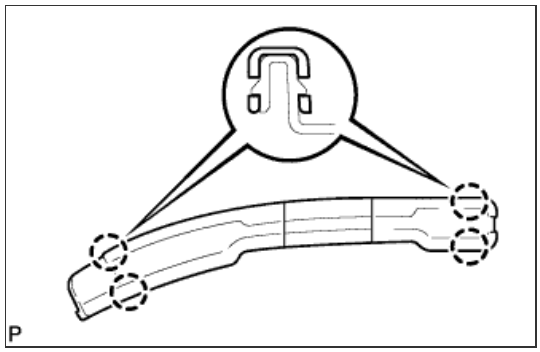
28. INSTALL REAR SEAT LOCK COVER LH

a. Attach the 2 clamps to install the cover.



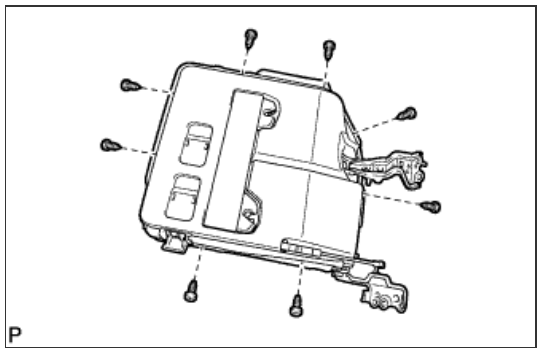
b. Install the 2 screws.

29. INSTALL NO. 3 SEAT LEG COVER NO. 2



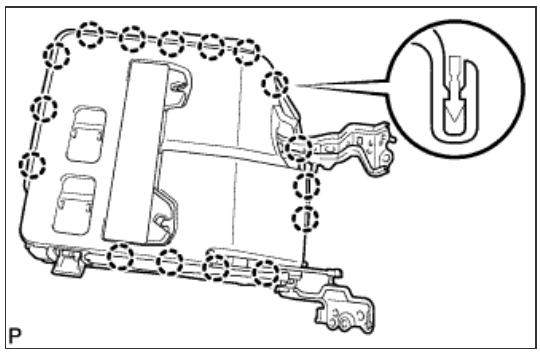
a. Attach the 4 claws to install the cover.

b. Install the 2 screws.



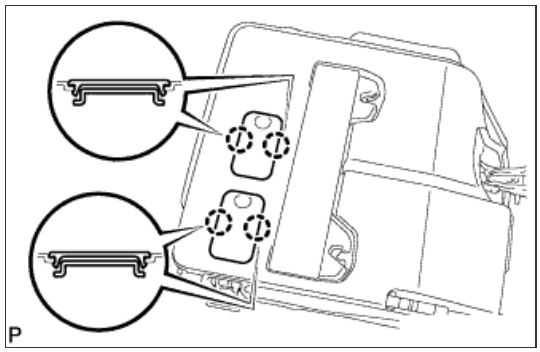
30. INSTALL NO. 3 SEAT FRONT BRACKET COVER LH

a. Attach the 4 claws to install the cover.



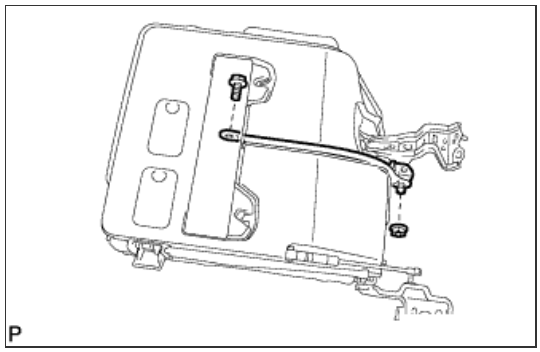
31. INSTALL REAR SEAT CUSHION UNDER COVER LH

a. Install the cover with the 8 screws.



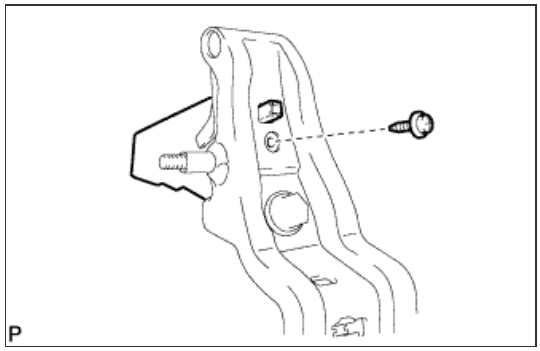
b. Attach the 16 claws.

32. INSTALL 3RD SEAT CUSHION LOCK COVER



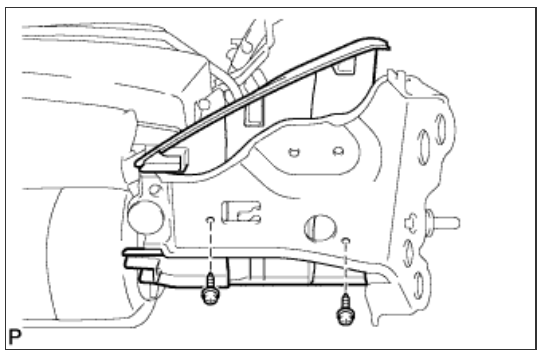
a. Attach the 4 claws to install the 2 covers.

33. INSTALL 3RD SEAT LINK SUB-ASSEMBLY LH



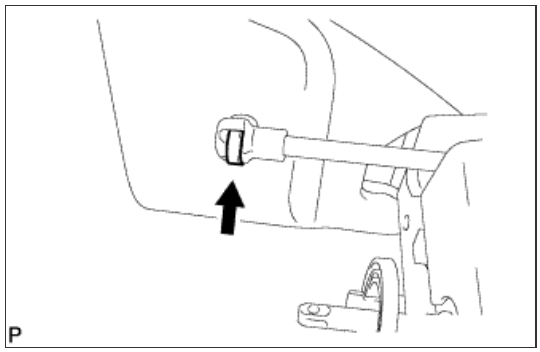
a. Install the seat link with the bolt and nut.

Torque:
8.5 N*m{ 87 kgf*cm , 75 in.*lbf }



34. INSTALL NO. 2 SEAT LEG COVER NO. 2

a. Install the seat leg cover with the screw.

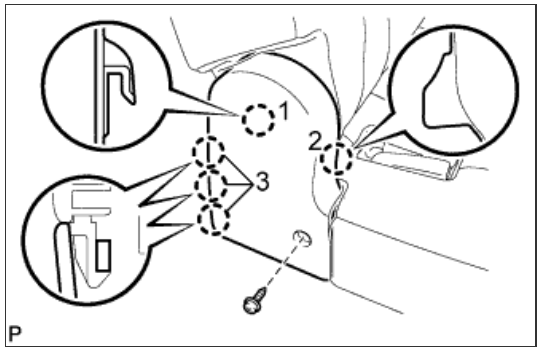


35. INSTALL REAR NO. 3 SEAT LEG COVER LH

a. Install the seat leg cover with the 2 screws.

b. Install the spring of the seat stay ball-joint.

c. Connect the seat stay to the seat frame.

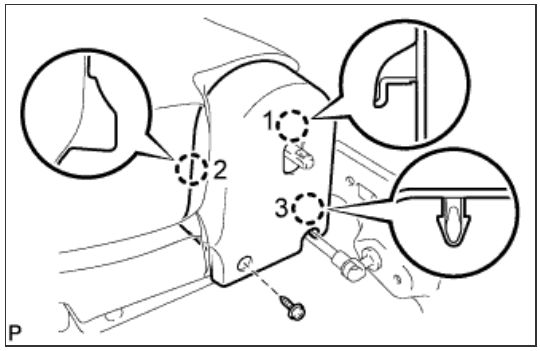


36. INSTALL REAR SEAT REAR BRACKET COVER REAR

a. Attach the 2 claws to install the cover.

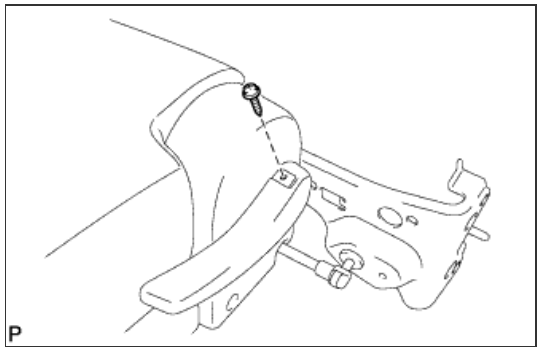
37. INSTALL RECLINING ADJUSTER COVER RH

a. Attach the 5 claws in the order shown in the illustration to install the cover.



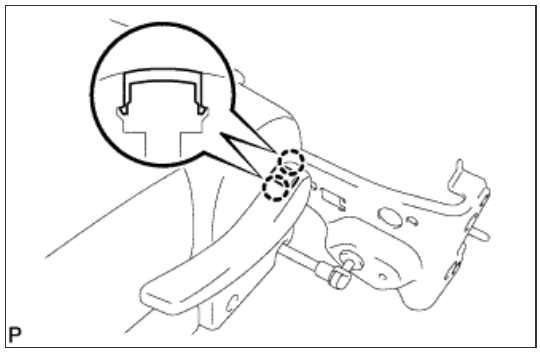
b. Install the screw.

38. INSTALL RECLINING ADJUSTER COVER LH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

b. Install the screw.



39. INSTALL NO. 2 RECLINING ADJUSTER RELEASE HANDLE LH

a. Install the release handle with the screw.

40. INSTALL SEAT ADJUSTER BOLT COVER

a. Attach the 2 claws to install the cover.

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

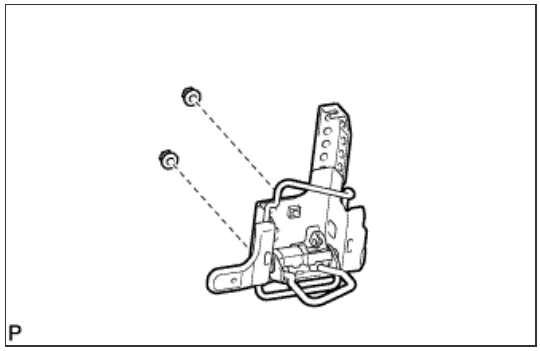
- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL NO. 2 SEAT RECLINING RELEASE HANDLE SUB-ASSEMBLY

a. Install the release handle with the bolt.

2. INSTALL REAR SEATBACK LOCK STRIKER COVER LH

a. Attach the 2 clamps to install the cover.

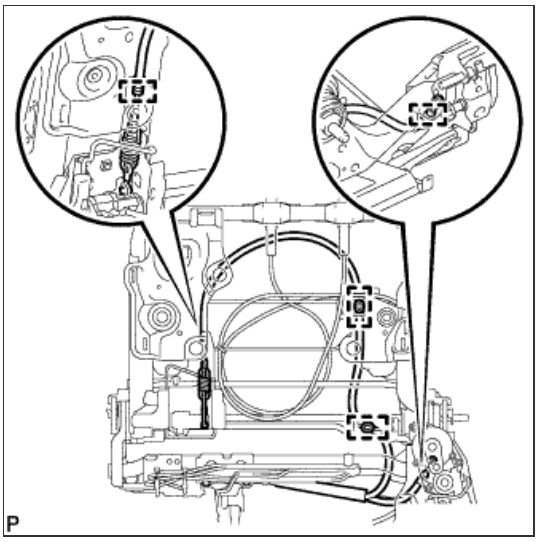


3. INSTALL REAR NO. 2 SEATBACK COVER LH

a. Attach the 3 claws to install the cover.

4. INSTALL REAR SEATBACK LOCK STRIKER ASSEMBLY LH

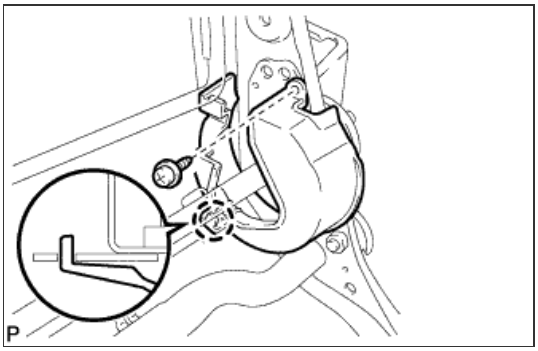
a. Install the lock striker with the 2 nuts.



Torque:
14 N*m{ 138 kgf*cm , 10 ft.*lbf }

5. INSTALL REAR SEAT LOCK CONTROL CABLE

a. Attach the 2 clamps to install the lock control cable.



b. Attach the 2 cable clamps to connect the 2 cables.

6. INSTALL REAR INNER SEAT RECLINING COVER RH

a. Attach the claw to install the cover.

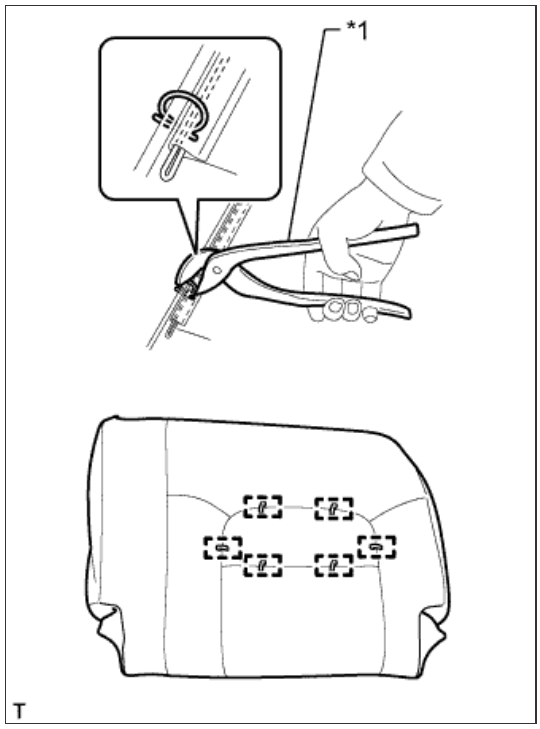
b. Install the screw.

7. INSTALL REAR INNER SEAT RECLINING COVER LH

a. Attach the claw to install the cover.

b. Install the screw.

8. INSTALL NO. 3 SEATBACK COVER SUB-ASSEMBLY LH



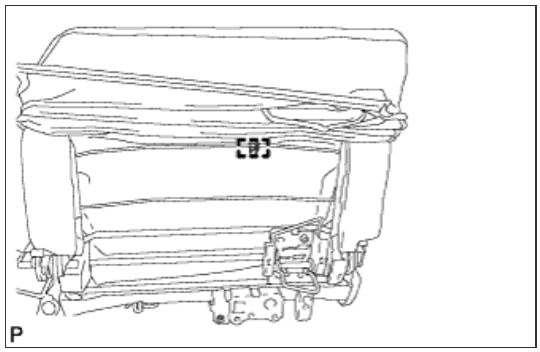
a. Using hog ring pliers, install the seatback cover to the seatback pad with new hog rings.

NOTICE:

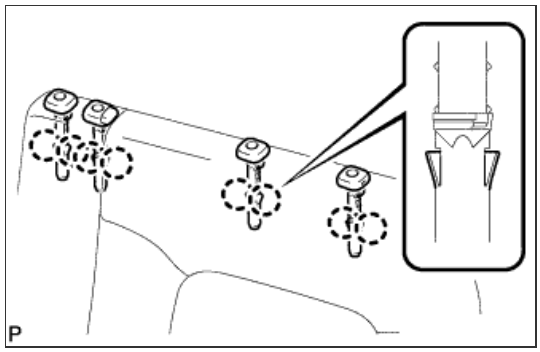
- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**

Text in Illustration

	og Ring Pliers

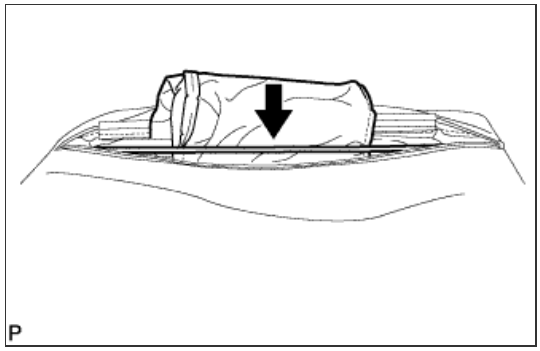


9. INSTALL SEATBACK COVER WITH PAD

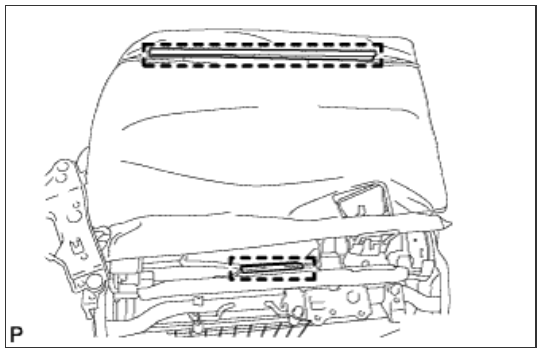


a. Using hog ring pliers, install the seatback cover with pad to the seatback frame with a new hog rings.

b. LH Side:

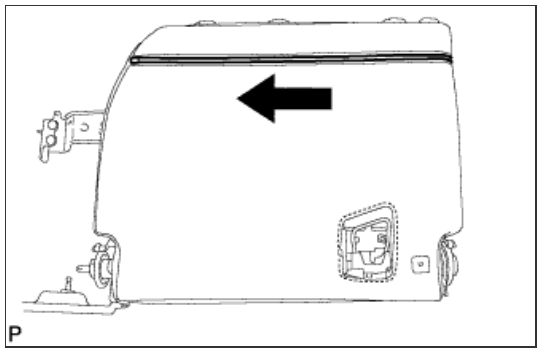


i. w/ Rear Center Seat Headrest:

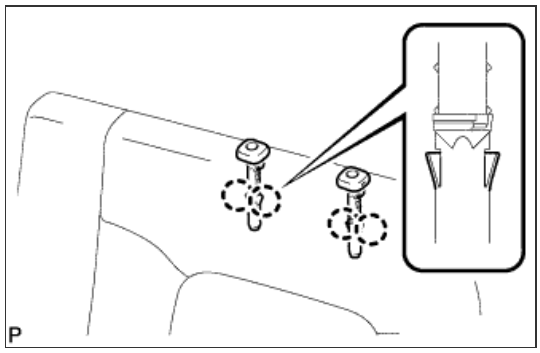


1. Attach the claws to install the 4 headrest supports.
2. Install the rear seat protector.

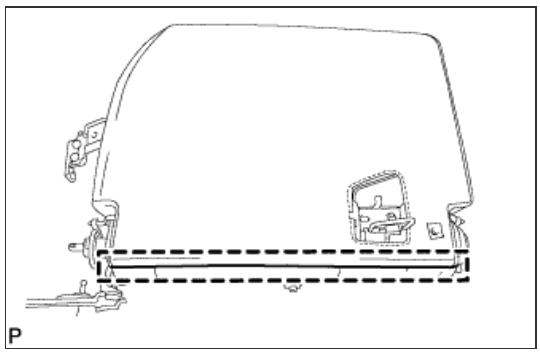
3. Insert the center headrest storage bag.



4. Attach the 2 hooks.

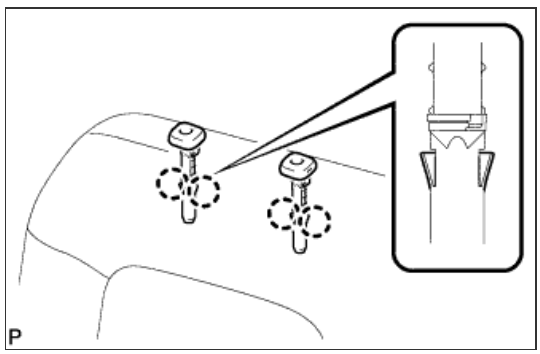


5. Close the fastener.

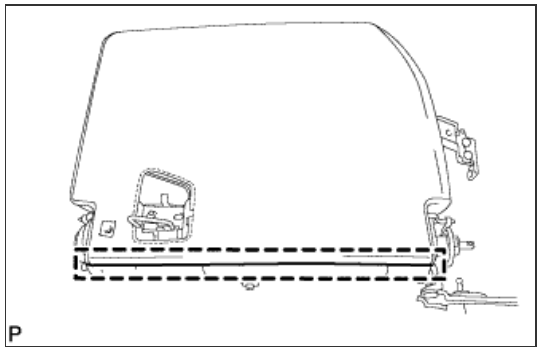


ii. w/o Rear Center Seat Headrest:

1. Attach the 4 claws to install the 2 headrest supports.
2. Install the rear seat protector.



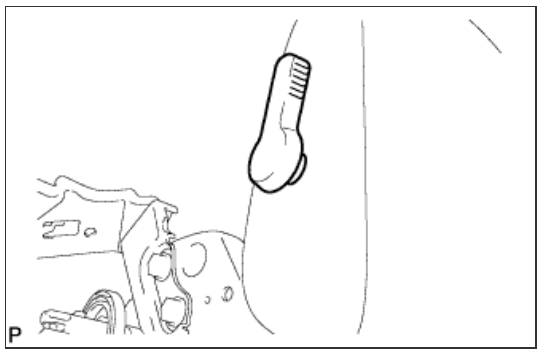
3. Attach the hook.



c. RH Side:

i. Attach the 4 claws to install the 2 headrest supports.

ii. Install the rear seat protector.



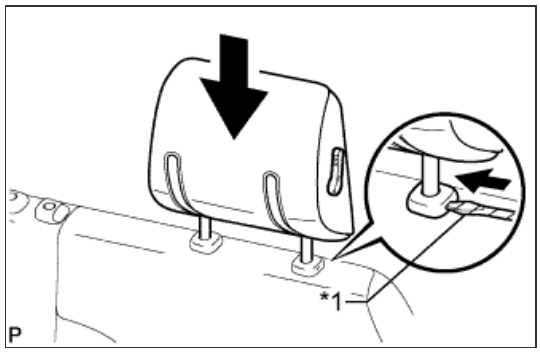
iii. Attach the hook.

10. INSTALL REAR SEAT HEADREST HANDLE

a. Install the snap ring to the headrest handle.

b. Install the headrest handle to the headrest.

11. INSTALL REAR SEAT HEADREST ASSEMBLY (w/ Folding Headrest)



a. While releasing the lock inside the headrest support with a screwdriver, install the headrest.

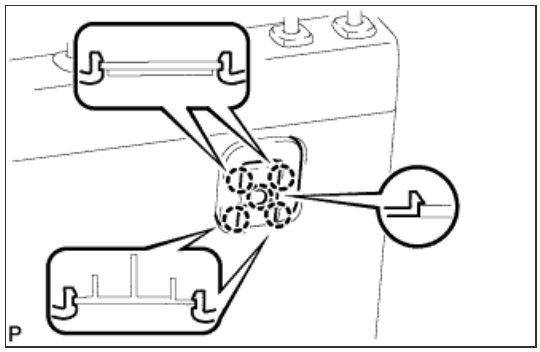
HINT:

Tape the screwdriver tip before use.

Text in Illustration

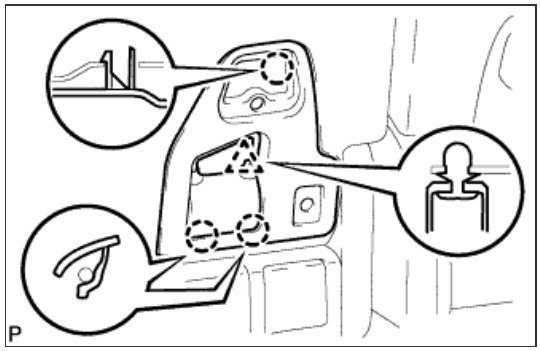
	rotective Tape

12. INSTALL REAR SEAT HEADREST ASSEMBLY (w/o Folding Headrest)



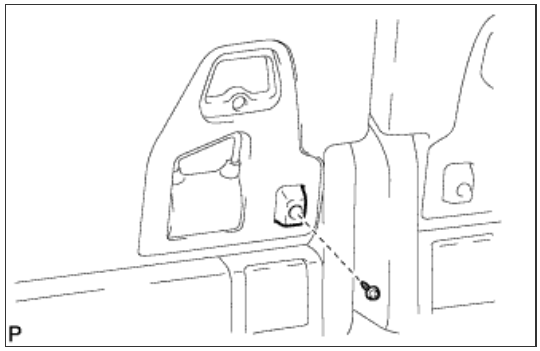
13. INSTALL REAR SEAT HINGE PAWL GUIDE

a. Install the guide with the screw.



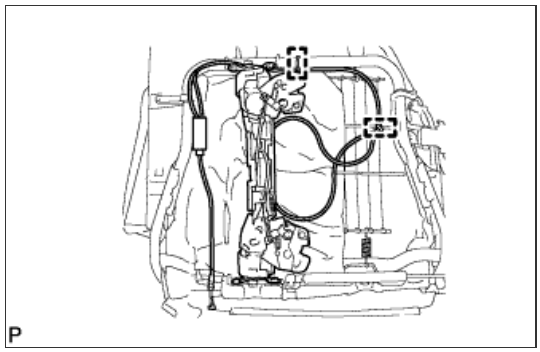
14. INSTALL REAR SEAT HINGE PAWL GUIDE

a. Attach the 5 claws to install the guide.



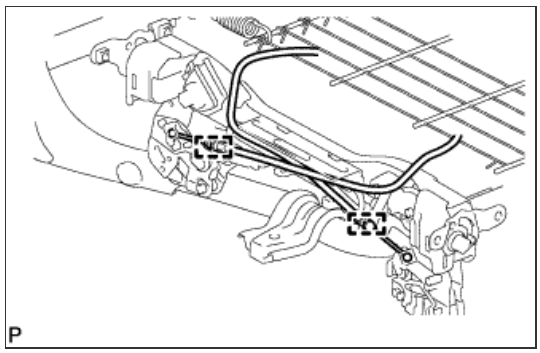
15. INSTALL REAR LOWER SEATBACK LOCK BEZEL

a. Attach the 3 claws and clip to install the seatback lock be el.



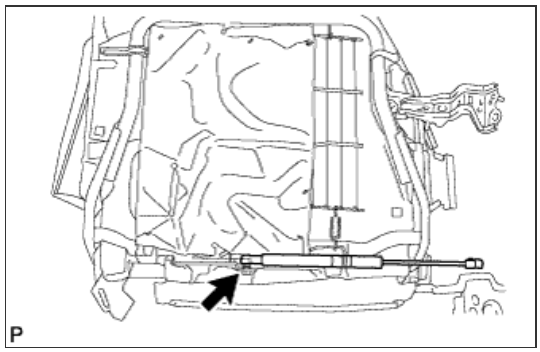
16. INSTALL REAR NO. 2 SEATBACK CUSHION

a. Install the seatback cushion with the screw.



17. INSTALL NO. 3 FOLD SEAT LOCK CONTROL CABLE ASSEMBLY

a. Attach the 2 clamps to install the 2 cables.



b. Attach the 2 cable clamps to connect the 2 cables.

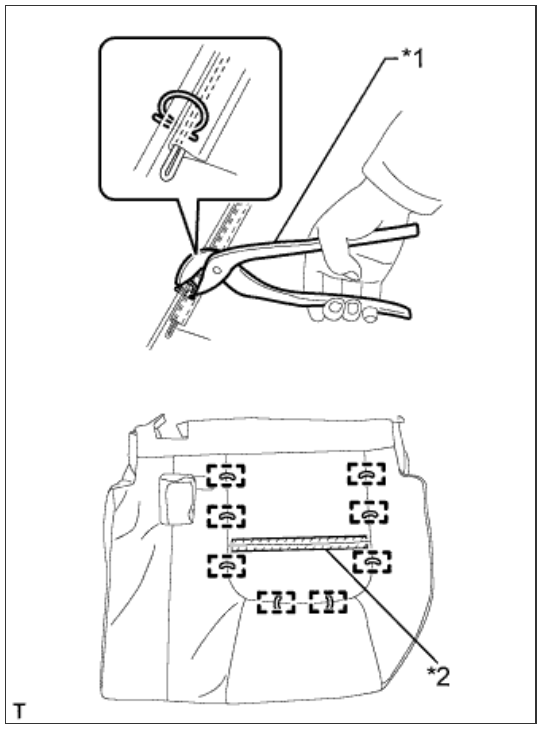
18. INSTALL NO. 2 SEAT STAY SUB-ASSEMBLY

a. Install the seat stay with the bolt.

19. INSTALL NO. 3 SEAT CUSHION COVER SUB-ASSEMBLY LH

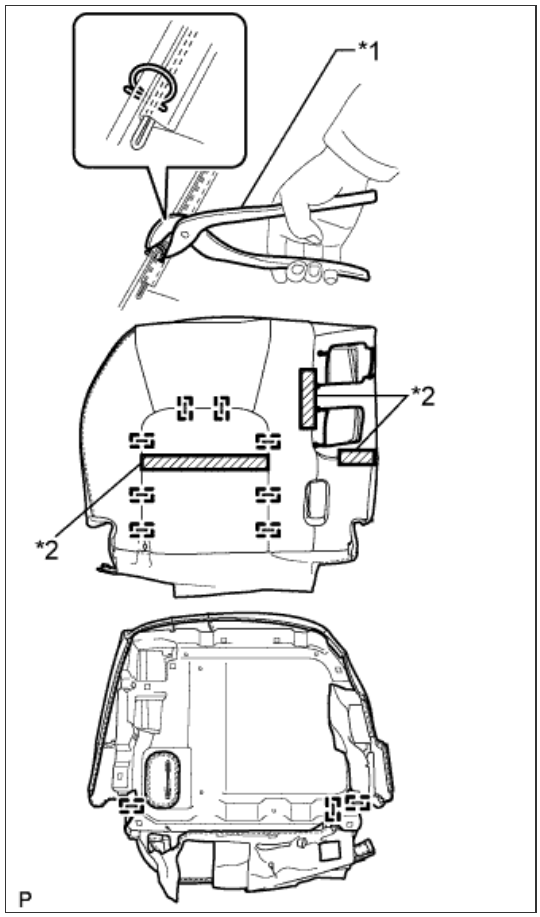
a. w/o Bottle Holder:

i. Attach the fastening tape to install the seatback cover.



ii. Using hog ring pliers, install the seat cushion cover to the seat cushion pad with new hog rings.

NOTICE:



- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**

Text in Illustration

	og Ring Pliers
	astening Tape

b. w/ Bottle Holder:

i. Attach the 3 fastening tapes to install the seatback cover.

ii. Using hog ring pliers, install the seat cushion cover to the seat cushion pad with new hog rings.

NOTICE:

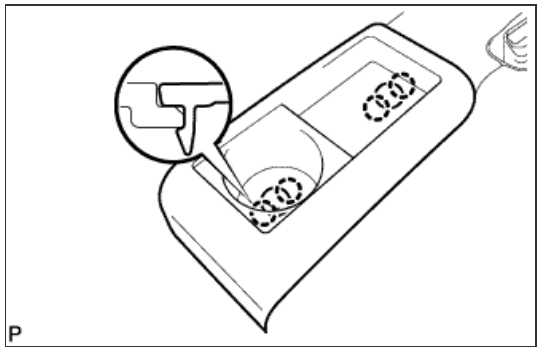
- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**

Text in Illustration

	og Ring Pliers
	astening Tape

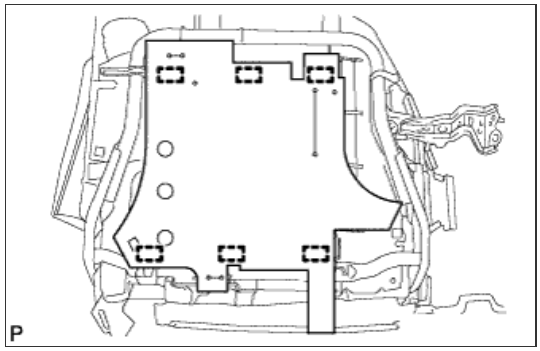
20. INSTALL NO. 3 SEAT CUSHION PAD LH

21. INSTALL SEAT CUSHION COVER WITH PAD



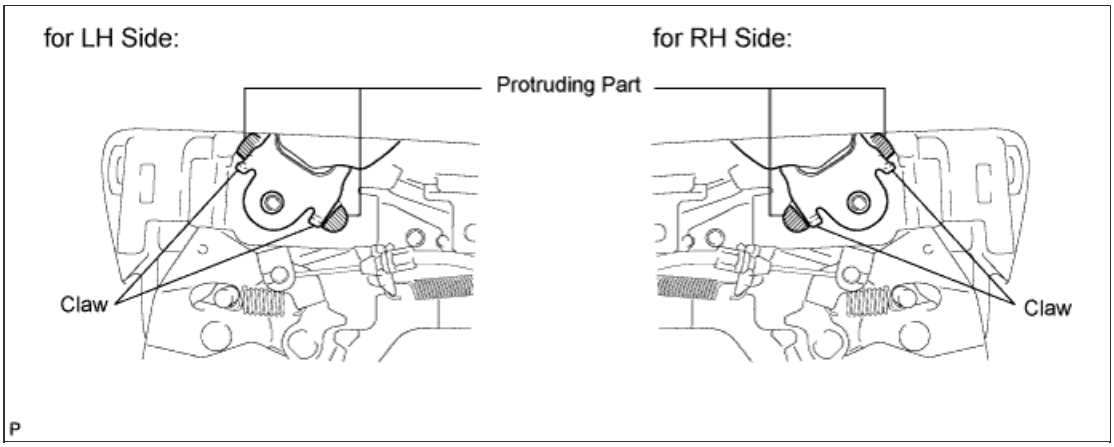
22. INSTALL NO. 2 BOTTLE HOLDER

a. Install the o. 2 bottle holder with the 2 screws.



23. INSTALL CAP

a. Attach the 4 claws to install the 2 caps.



24. INSTALL REAR SEAT CUSHION CARPET

a. Install the seat cushion carpet with new tack pins.

25. INSTALL REAR NO. 2 SEAT INNER BELT SUB-ASSEMBLY

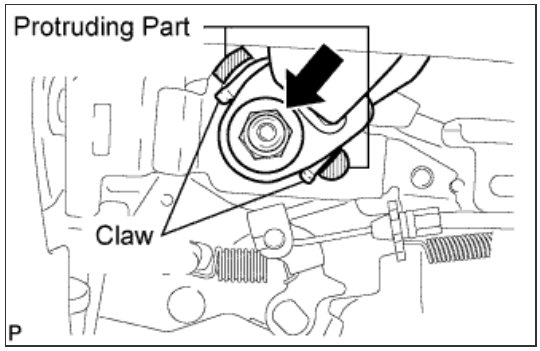
a. Install the 2 belts.

NOTICE:

- **Make sure the claws are facing away from the seat.**
- **Do not overlap the anchor part of the seat belt and protruding parts of the seat.**

26. INSTALL REAR CENTER SEAT INNER BELT LH (w/ Rear Center Seat Headrest)

a. Install the belt with the nut.



Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

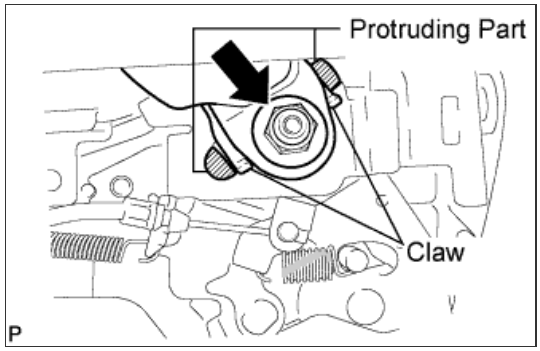
o not overlap the anchor part of the seat belt and protruding parts of the seat.

HINT:

The rear o. 2 seat inner belt is fixed with the same nut as the rear seat inner belt. Therefore, connect it when installing the rear seat inner belt.

27. INSTALL REAR CENTER SEAT INNER BELT RH (w/ Rear Center Seat Headrest)

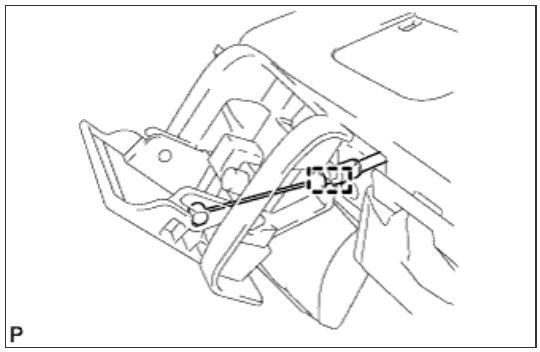
a. Install the belt with the nut.



Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

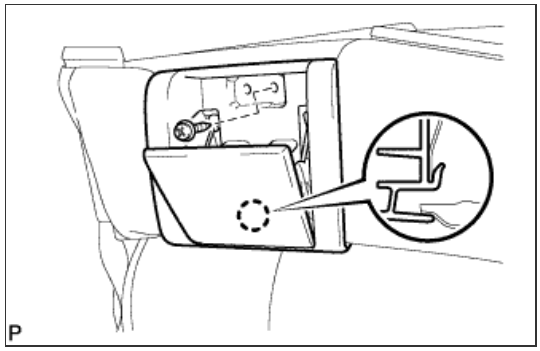
NOTICE:

o not overlap the anchor part of the seat belt and protruding parts of the seat.



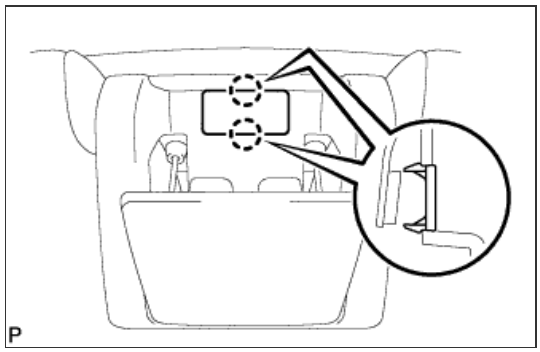
HINT:

The rear o. 2 seat inner belt is fixed with the same nut as the rear seat outer belt. Therefore, connect it when installing the rear seat outer belt.



28. INSTALL SEAT CUSHION LOCK RELEASE LEVER ASSEMBLY LH

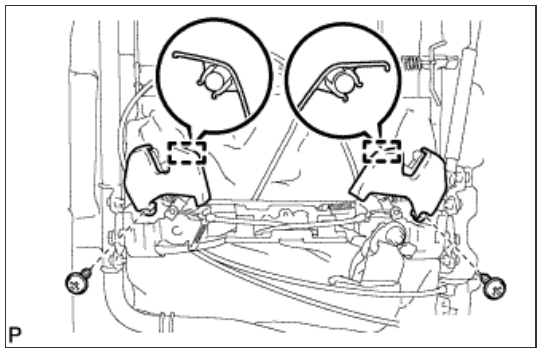
a. Attach the cable clamp to connect the cable.



b. Attach the claw to install the release lever.

c. Install the screw.

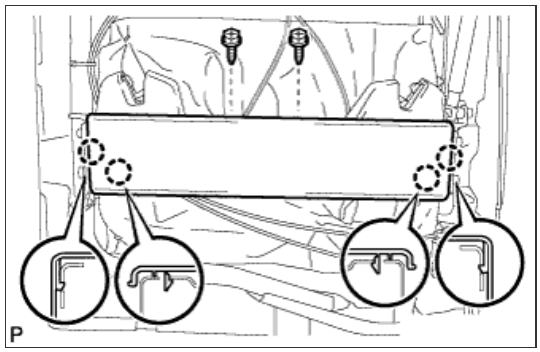
29. INSTALL SEAT STAND FRAME CAP



a. Attach the 2 claws to install the stand frame cap.

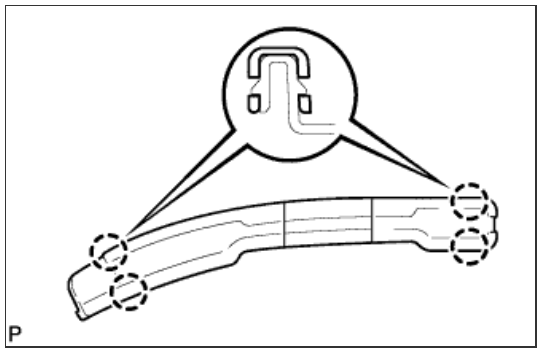
30. INSTALL REAR SEAT LOCK COVER LH

a. Attach the 2 clamps to install the cover.



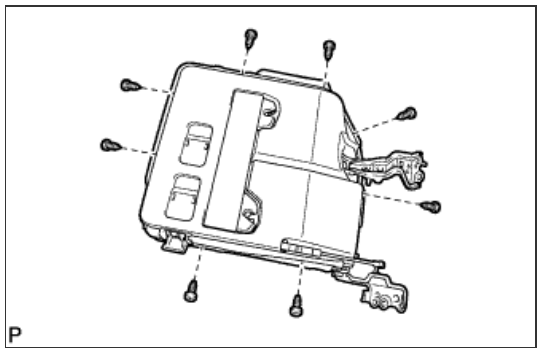
b. Install the 2 screws.

31. INSTALL NO. 3 SEAT LEG COVER NO. 2



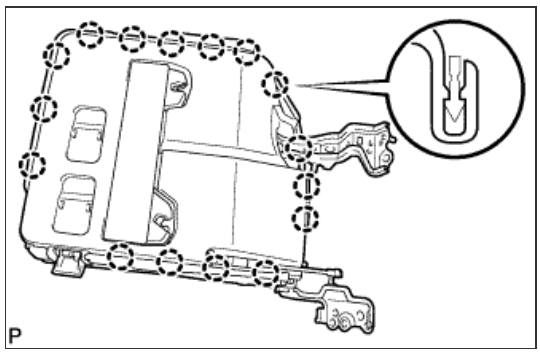
a. Attach the 4 claws to install the cover.

b. Install the 2 screws.



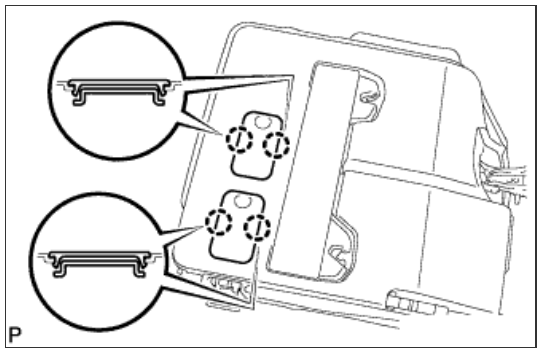
32. INSTALL NO. 3 SEAT FRONT BRACKET COVER LH

a. Attach the 4 claws to install the cover.



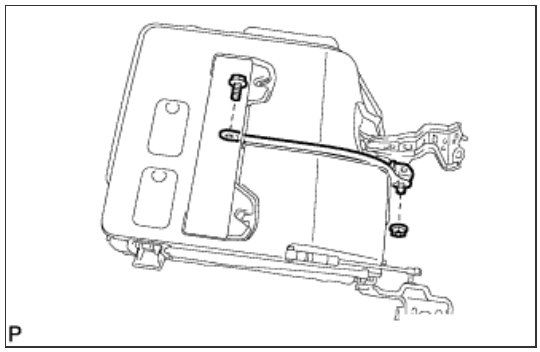
33. INSTALL REAR SEAT CUSHION UNDER COVER LH

a. Install the cover with the screws.



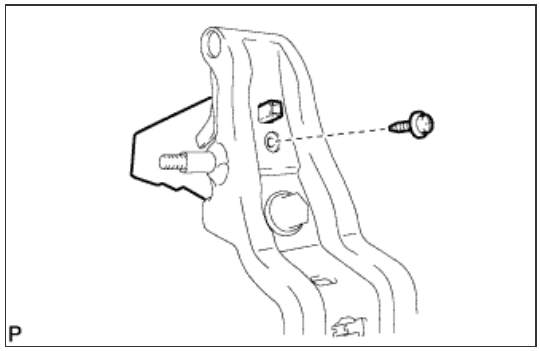
b. Attach the 16 claws.

34. INSTALL 3RD SEAT CUSHION LOCK COVER



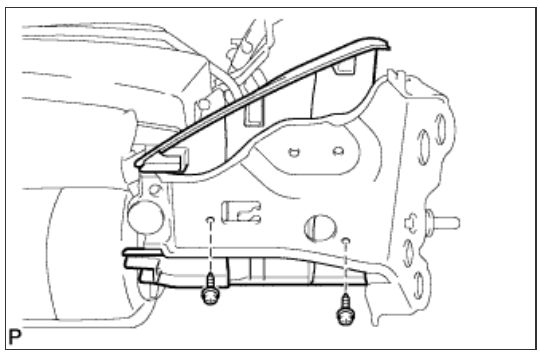
a. Attach the 4 claws to install the 2 covers.

35. INSTALL 3RD SEAT LINK SUB-ASSEMBLY LH



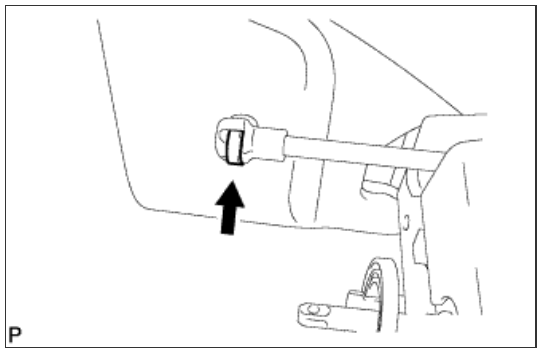
a. Install the seat link with the bolt and nut.

Torque:
8.5 N*m{ 87 kgf*cm , 75 in.*lbf }



36. INSTALL NO. 2 SEAT LEG COVER NO. 2

a. Install the seat leg cover with the screw.

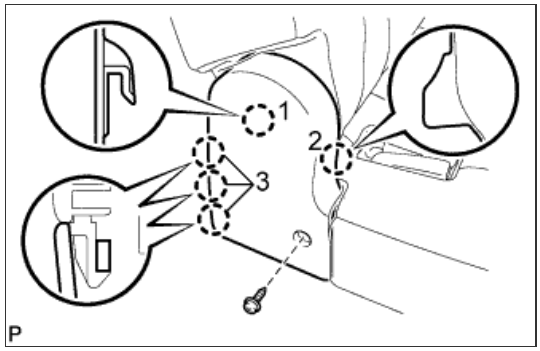


37. INSTALL REAR NO. 3 SEAT LEG COVER LH

a. Install the seat leg cover with the 2 screws.

b. Install the spring of the seat stay ball-joint.

c. Connect the seat stay to the seat frame.

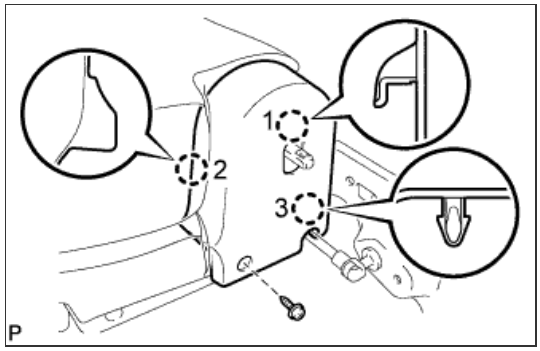


38. INSTALL REAR SEAT REAR BRACKET COVER REAR

a. Attach the 2 claws to install the cover.

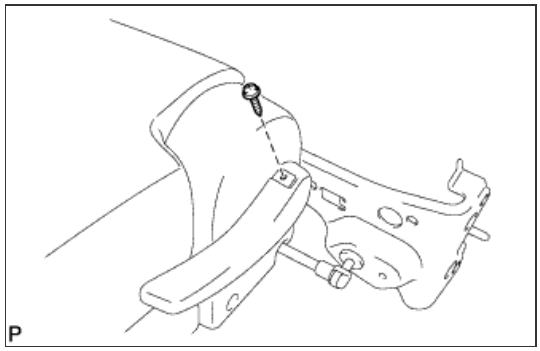
39. INSTALL RECLINING ADJUSTER COVER RH

a. Attach the 5 claws in the order shown in the illustration to install the cover.



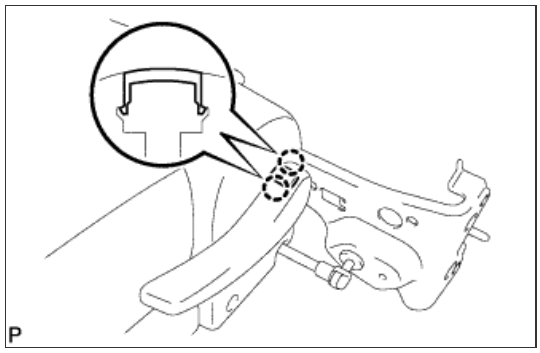
b. Install the screw.

40. INSTALL RECLINING ADJUSTER COVER LH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

b. Install the screw.



41. INSTALL NO. 2 RECLINING ADJUSTER RELEASE HANDLE LH

a. Install the release handle with the screw.

42. INSTALL SEAT ADJUSTER BOLT COVER

a. Attach the 2 claws to install the cover.

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

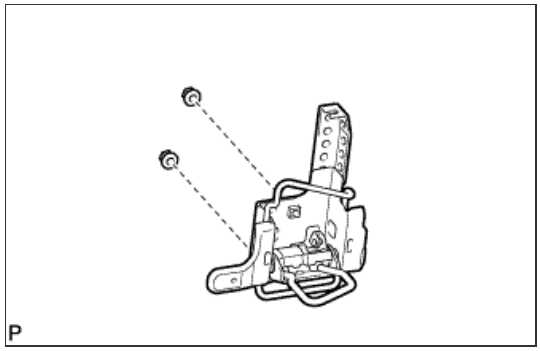
- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL NO. 2 SEAT RECLINING RELEASE HANDLE SUB-ASSEMBLY

a. Install the release handle with the bolt.

2. INSTALL REAR SEATBACK LOCK STRIKER COVER LH

a. Attach the 2 clamps to install the cover.

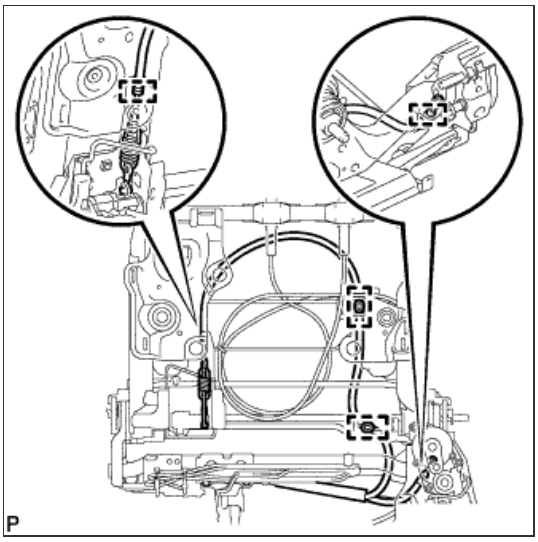


3. INSTALL REAR NO. 2 SEATBACK COVER LH

a. Attach the 3 claws to install the cover.

4. INSTALL REAR SEATBACK LOCK STRIKER ASSEMBLY LH

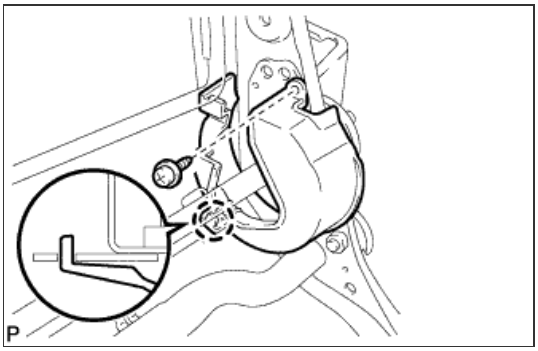
a. Install the lock striker with the 2 nuts.



Torque:
14 N*m{ 138 kgf*cm , 10 ft.*lbf }

5. INSTALL REAR SEAT LOCK CONTROL CABLE

a. Attach the 2 clamps to install the lock control cable.



b. Attach the 2 cable clamps to connect the 2 cables.

6. INSTALL REAR INNER SEAT RECLINING COVER RH

a. Attach the claw to install the cover.

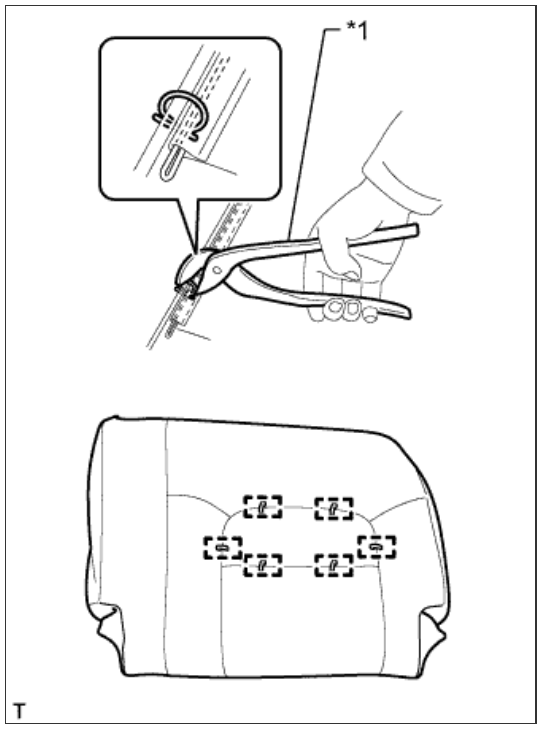
b. Install the screw.

7. INSTALL REAR INNER SEAT RECLINING COVER LH

a. Attach the claw to install the cover.

b. Install the screw.

8. INSTALL NO. 3 SEATBACK COVER SUB-ASSEMBLY LH



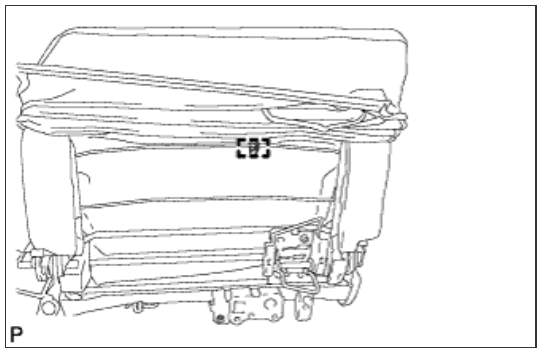
a. Using hog ring pliers, install the seatback cover to the seatback pad with new hog rings.

NOTICE:

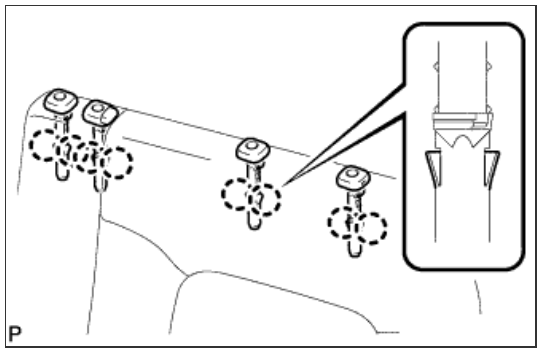
- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**

Text in Illustration

	og Ring Pliers

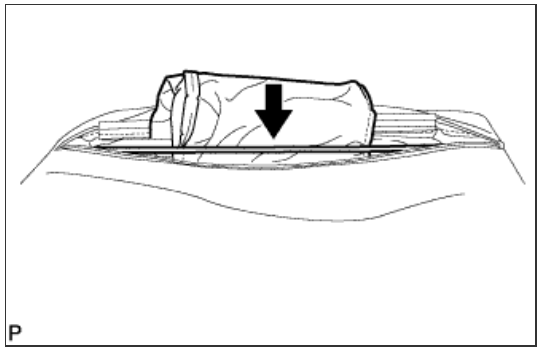


9. INSTALL SEATBACK COVER WITH PAD

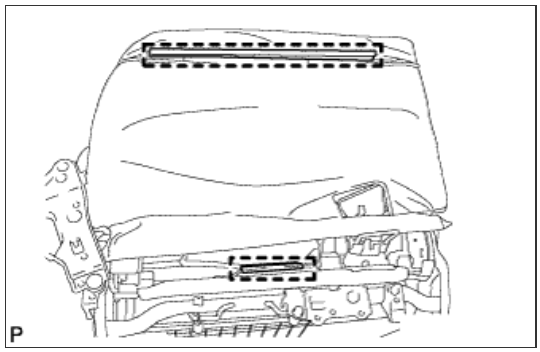


a. Using hog ring pliers, install the seatback cover with pad to the seatback frame with a new hog rings.

b. LH Side:

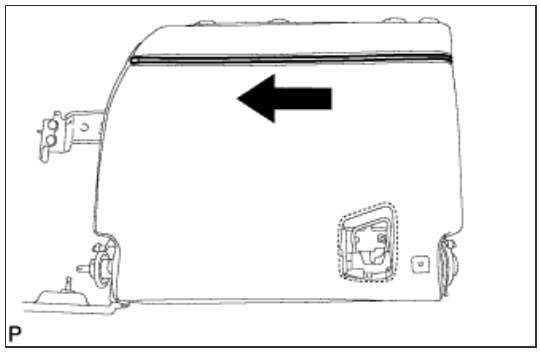


i. w/ Rear Center Seat Headrest:

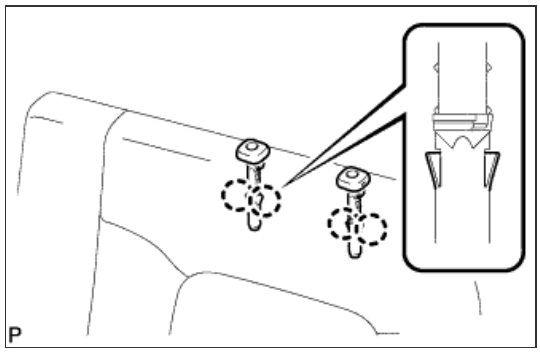


1. Attach the claws to install the 4 headrest supports.
2. Install the rear seat protector.

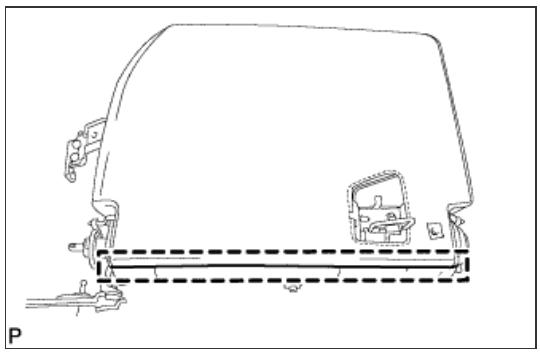
3. Insert the center headrest storage bag.



4. Attach the 2 hooks.

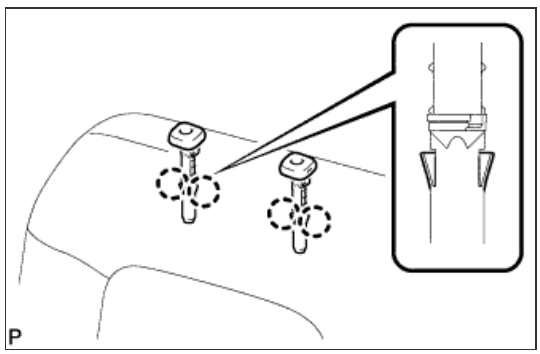


5. Close the fastener.

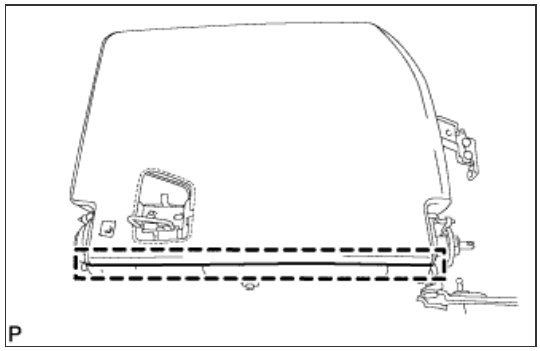


ii. w/o Rear Center Seat Headrest:

1. Attach the 4 claws to install the 2 headrest supports.
2. Install the rear seat protector.



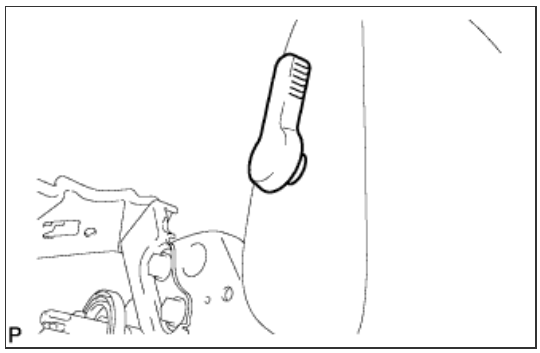
3. Attach the hook.



c. RH Side:

i. Attach the 4 claws to install the 2 headrest supports.

ii. Install the rear seat protector.



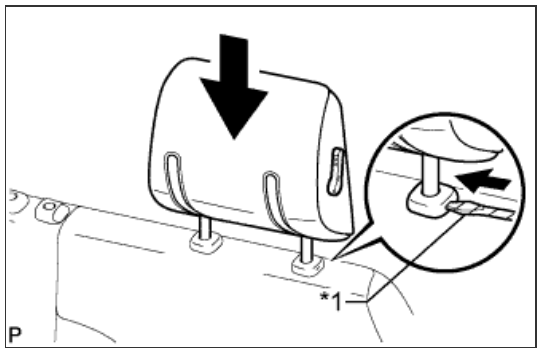
iii. Attach the hook.

10. INSTALL REAR SEAT HEADREST HANDLE

a. Install the snap ring to the headrest handle.

b. Install the headrest handle to the headrest.

11. INSTALL REAR SEAT HEADREST ASSEMBLY (w/ Folding Headrest)



a. While releasing the lock inside the headrest support with a screwdriver, install the headrest.

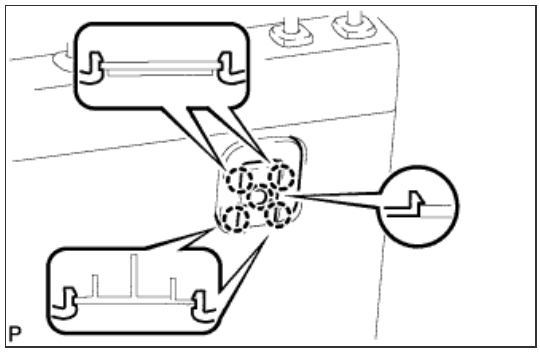
HINT:

Tape the screwdriver tip before use.

Text in Illustration

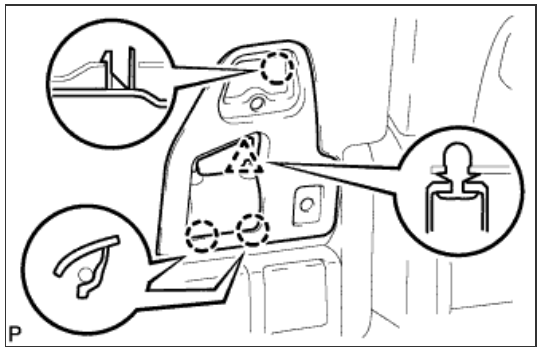
	rotective Tape

12. INSTALL REAR SEAT HEADREST ASSEMBLY (w/o Folding Headrest)



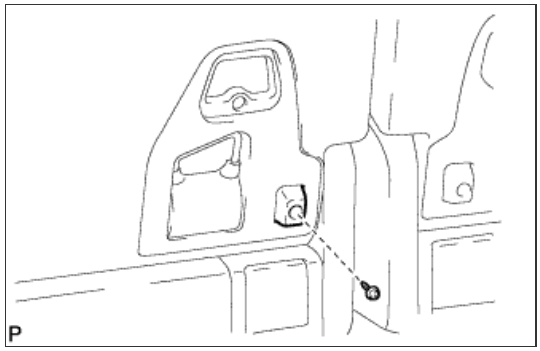
13. INSTALL REAR SEAT HINGE PAWL GUIDE

a. Install the guide with the screw.



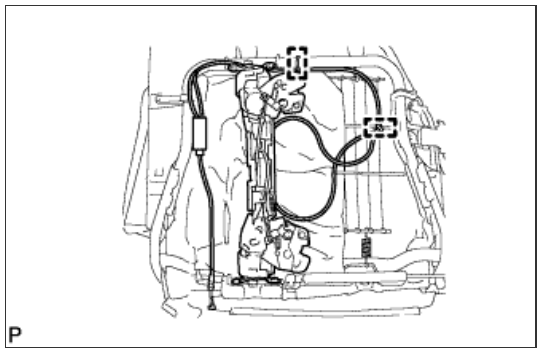
14. INSTALL REAR SEAT HINGE PAWL GUIDE

a. Attach the 5 claws to install the guide.



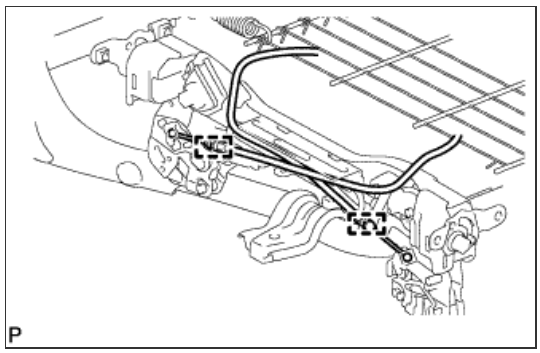
15. INSTALL REAR LOWER SEATBACK LOCK BEZEL

a. Attach the 3 claws and clip to install the seatback lock be el.



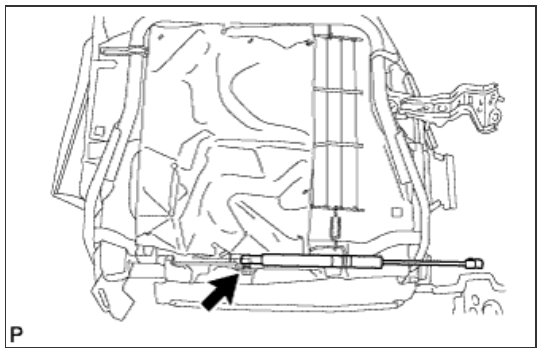
16. INSTALL REAR NO. 2 SEATBACK CUSHION

a. Install the seatback cushion with the screw.



17. INSTALL NO. 3 FOLD SEAT LOCK CONTROL CABLE ASSEMBLY

a. Attach the 2 clamps to install the 2 cables.



b. Attach the 2 cable clamps to connect the 2 cables.

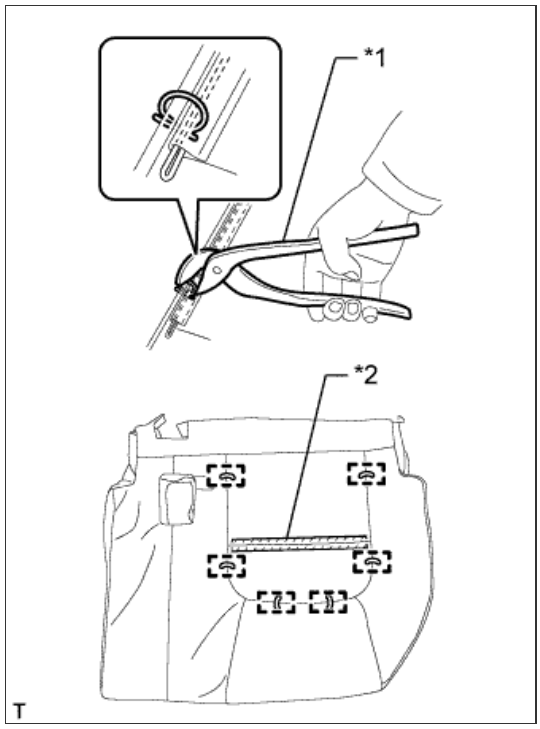
18. INSTALL NO. 2 SEAT STAY SUB-ASSEMBLY

a. Install the seat stay with the bolt.

19. INSTALL NO. 3 SEAT CUSHION COVER SUB-ASSEMBLY LH

a. w/o Bottle Holder:

i. Attach the fastening tape to install the seatback cover.



ii. Using hog ring pliers, install the seat cushion cover to the seat cushion pad with new hog rings.

NOTICE:

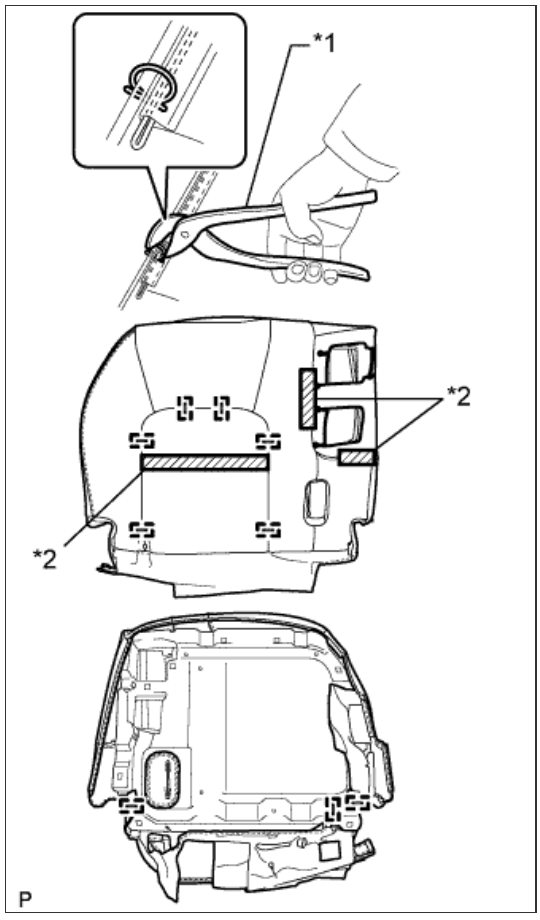
- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**

Text in Illustration

	og Ring Pliers
	astening Tape

b. w/ Bottle Holder:

i. Attach the 3 fastening tapes to install the seatback cover.



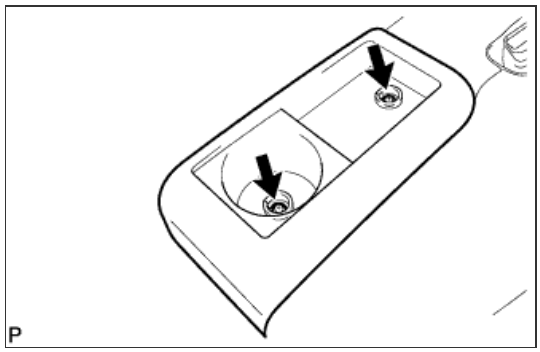
ii. Using hog ring pliers, install the seat cushion cover to the seat cushion pad with new hog rings.

NOTICE:

- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**

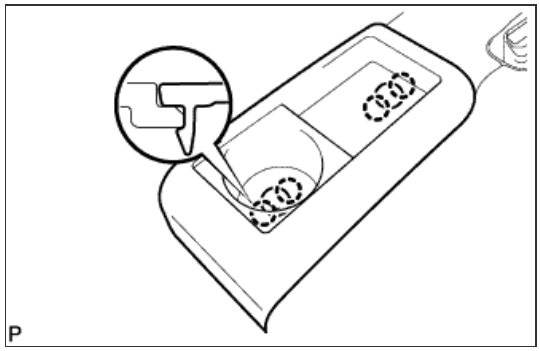
Text in Illustration

	og Ring Pliers
	astening Tape



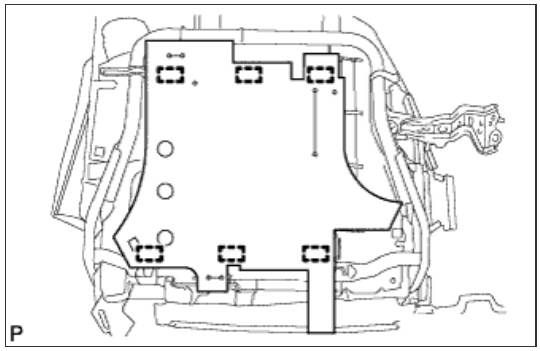
20. INSTALL NO. 3 SEAT CUSHION PAD LH

21. INSTALL SEAT CUSHION COVER WITH PAD



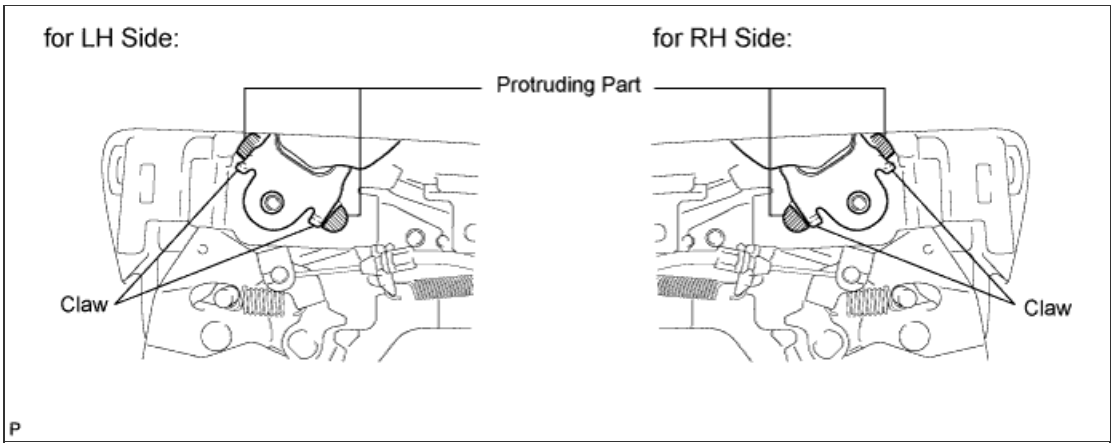
22. INSTALL NO. 2 BOTTLE HOLDER

a. Install the o. 2 bottle holder with the 2 screws.



23. INSTALL CAP

a. Attach the 4 claws to install the 2 caps.



24. INSTALL REAR SEAT CUSHION CARPET

a. Install the seat cushion carpet with new tack pins.

25. INSTALL REAR NO. 2 SEAT INNER BELT SUB-ASSEMBLY

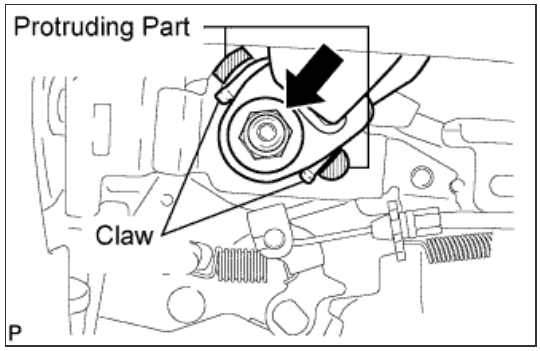
a. Install the 2 belts.

NOTICE:

- **Make sure the claws are facing away from the seat.**
- **Do not overlap the anchor part of the seat belt and protruding parts of the seat.**

26. INSTALL REAR CENTER SEAT INNER BELT LH (w/ Rear Center Seat Headrest)

a. Install the belt with the nut.



Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

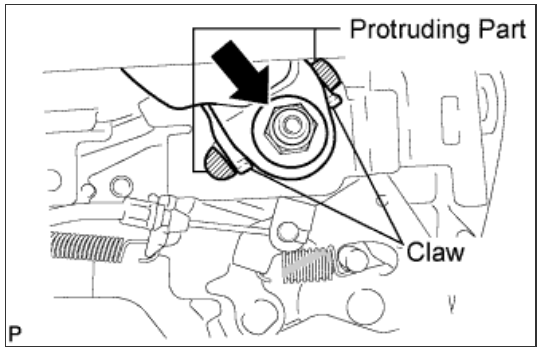
o not overlap the anchor part of the seat belt and protruding parts of the seat.

HINT:

The rear o. 2 seat inner belt is fixed with the same nut as the rear seat inner belt. Therefore, connect it when installing the rear seat inner belt.

27. INSTALL REAR CENTER SEAT INNER BELT RH (w/ Rear Center Seat Headrest)

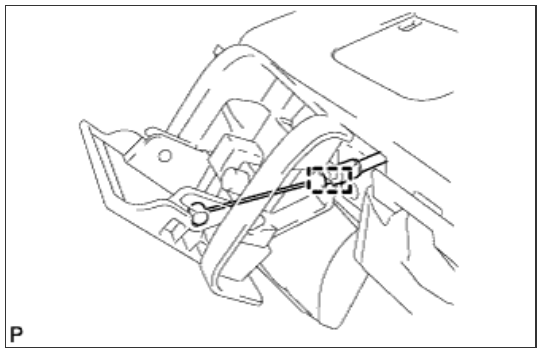
a. Install the belt with the nut.



Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

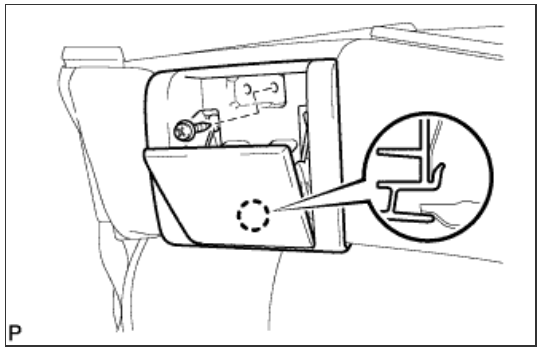
NOTICE:

o not overlap the anchor part of the seat belt and protruding parts of the seat.



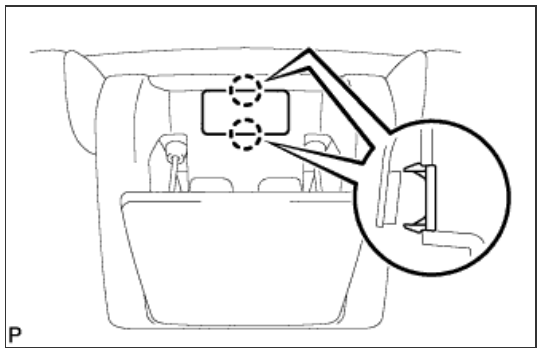
HINT:

The rear o. 2 seat inner belt is fixed with the same nut as the rear seat outer belt. Therefore, connect it when installing the rear seat outer belt.



28. INSTALL SEAT CUSHION LOCK RELEASE LEVER ASSEMBLY LH

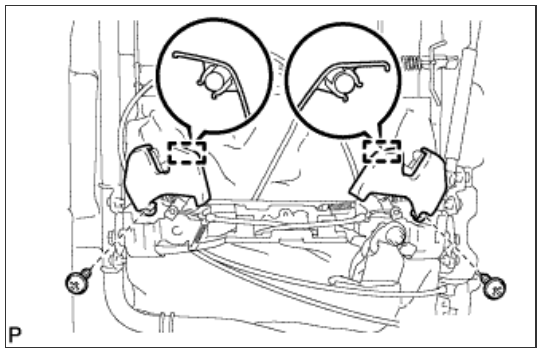
a. Attach the cable clamp to connect the cable.



b. Attach the claw to install the release lever.

c. Install the screw.

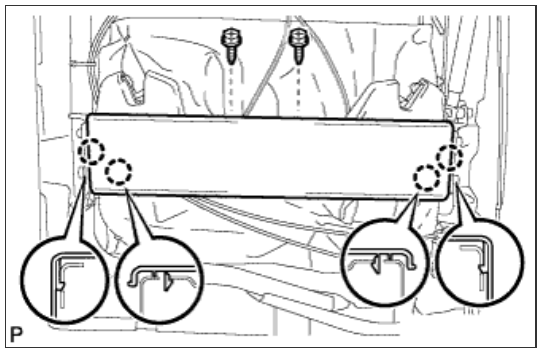
29. INSTALL SEAT STAND FRAME CAP



a. Attach the 2 claws to install the stand frame cap.

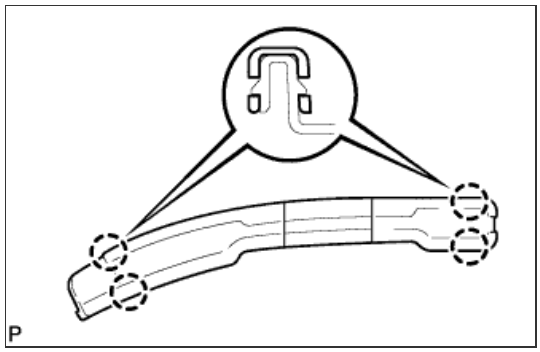
30. INSTALL REAR SEAT LOCK COVER LH

a. Attach the 2 clamps to install the cover.



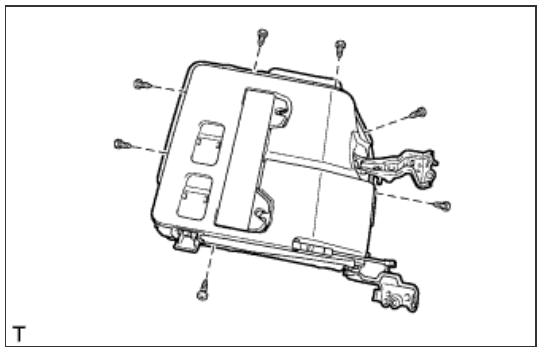
b. Install the 2 screws.

31. INSTALL NO. 3 SEAT LEG COVER NO. 2



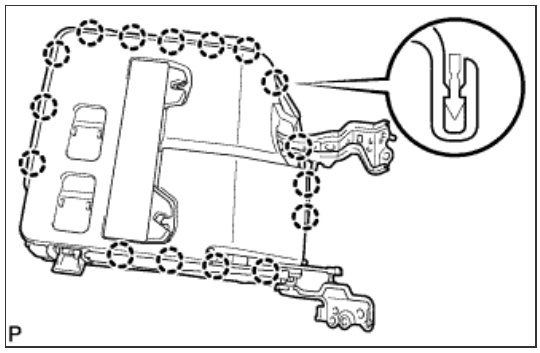
a. Attach the 4 claws to install the cover.

b. Install the 2 screws.



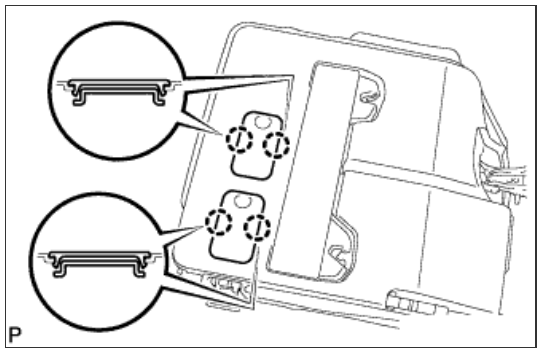
32. INSTALL NO. 3 SEAT FRONT BRACKET COVER LH

a. Attach the 4 claws to install the cover.



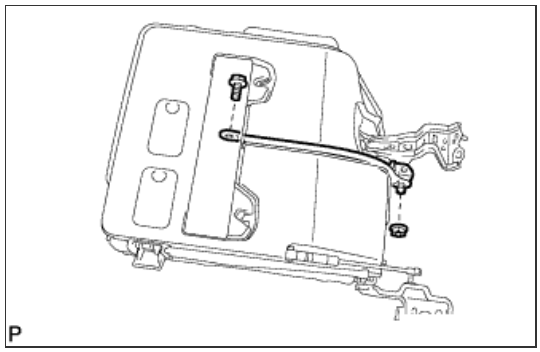
33. INSTALL REAR SEAT CUSHION UNDER COVER LH

a. Install the cover with the 7 screws.



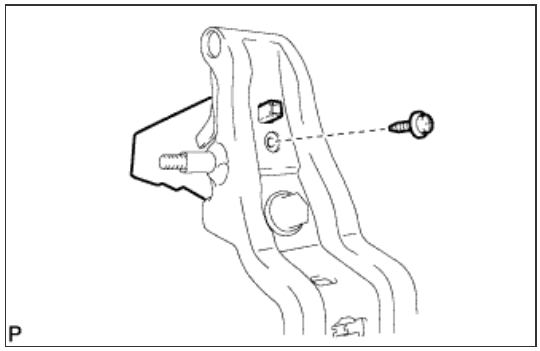
b. Attach the 16 claws.

34. INSTALL 3RD SEAT CUSHION LOCK COVER



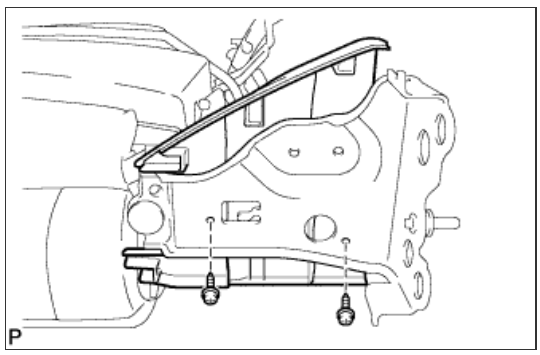
a. Attach the 4 claws to install the 2 covers.

35. INSTALL 3RD SEAT LINK SUB-ASSEMBLY LH



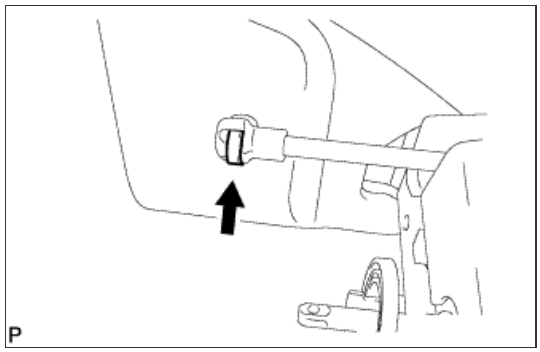
a. Install the seat link with the bolt and nut.

Torque:
8.5 N*m{ 87 kgf*cm , 75 in.*lbf }



36. INSTALL NO. 2 SEAT LEG COVER NO. 2

a. Install the seat leg cover with the screw.

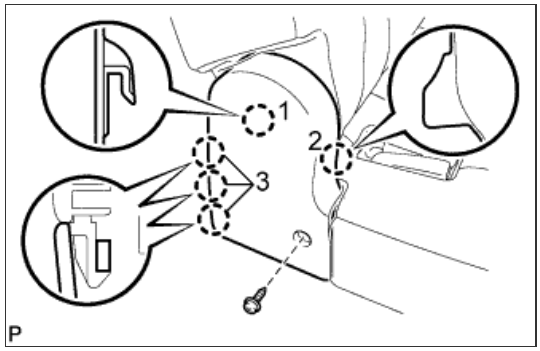


37. INSTALL REAR NO. 3 SEAT LEG COVER LH

a. Install the seat leg cover with the 2 screws.

b. Install the spring of the seat stay ball-joint.

c. Connect the seat stay to the seat frame.

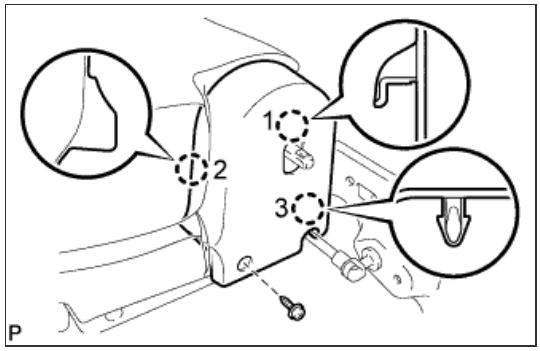


38. INSTALL REAR SEAT REAR BRACKET COVER REAR

a. Attach the 2 claws to install the cover.

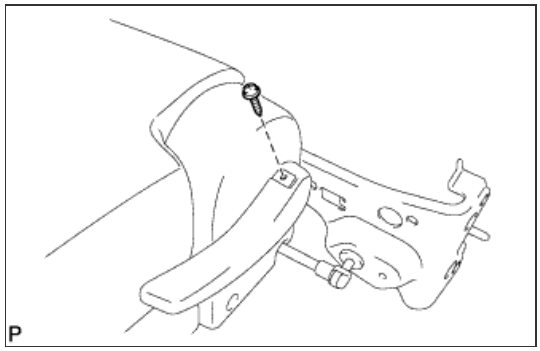
39. INSTALL RECLINING ADJUSTER COVER RH

a. Attach the 5 claws in the order shown in the illustration to install the cover.



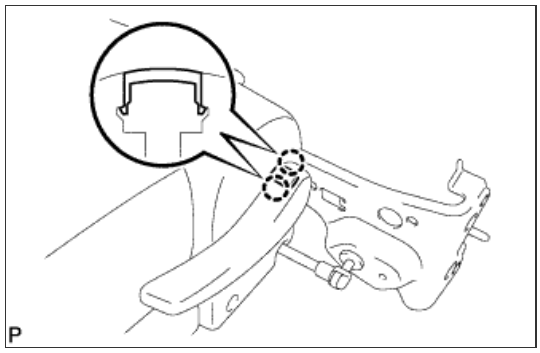
b. Install the screw.

40. INSTALL RECLINING ADJUSTER COVER LH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

b. Install the screw.



41. INSTALL NO. 2 RECLINING ADJUSTER RELEASE HANDLE LH

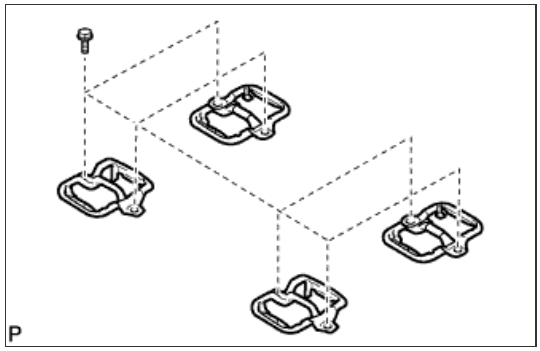
a. Install the release handle with the screw.

42. INSTALL SEAT ADJUSTER BOLT COVER

a. Attach the 2 claws to install the cover.

for Preparation Click here

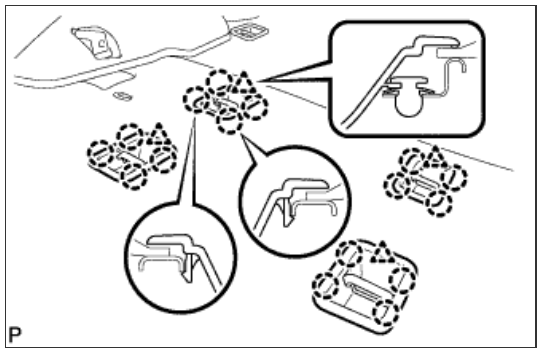
HINT:



- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL REAR SEAT LOCK STRIKER SUB-ASSEMBLY

a. Install the 4 seat lock strikers with bolts.

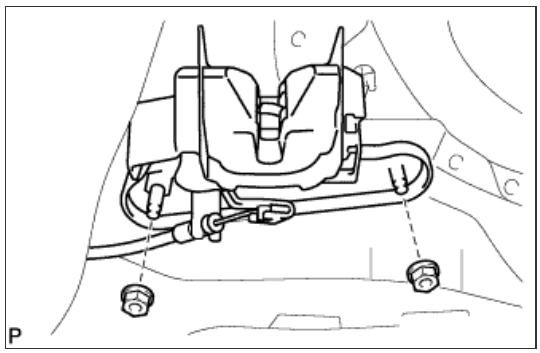


Torque:
37 N*m{ 377 kgf*cm , 27 ft.*lbf }

b. Return the floor carpet to its original position.

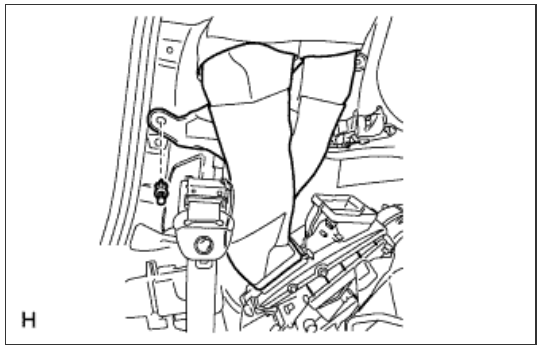
2. INSTALL NO. 3 SEAT CUSHION COVER

a. Attach the claws and 4 clips to install the 4 seat cushion covers.



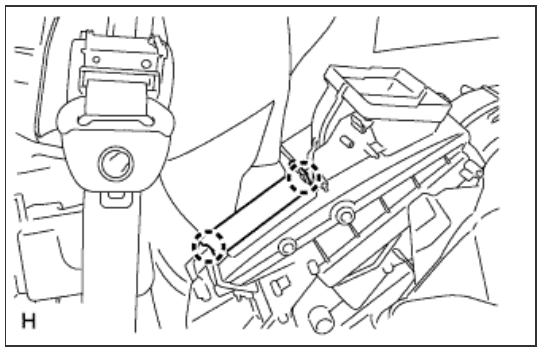
3. INSTALL FOLD SEAT LEG LOCK SUB-ASSEMBLY

a. Install the fold seat leg lock with the 2 nuts.



Torque:
12 N*m{ 122 kgf*cm , 9 ft.*lbf }

b. Attach the 2 cable clamps.



4. INSTALL REAR ROOF NO. 1 AIR DUCT (w/ Rear Air Conditioning System)

a. Install the duct with the clip.

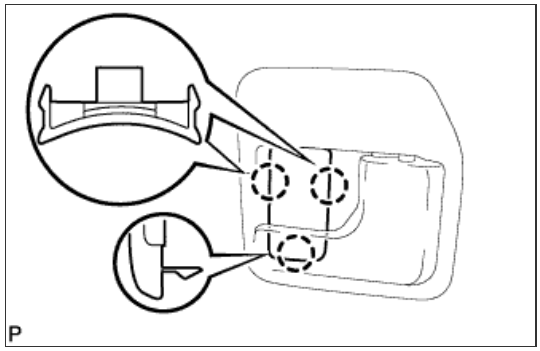
b. Attach the 2 claws to install the cooler plate.

INSTALL REAR SEAT LOCK CONTROL LEVER SUB-ASSEMBLY LH

a. Attach the 4 claws to install the seat lock control lever.

INSTALL FRONT UARTER TRIM PANEL ASSEMBLY LH

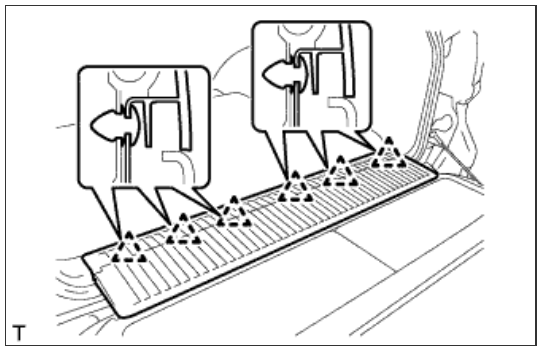
a. w/ Sliding Roof:
Install the front quarter trim panel assembly LH (Click here).



b. w/o Sliding Roof:
Install the front quarter trim panel assembly LH (Click here).

7. INSTALL REAR SEAT COVER CAP

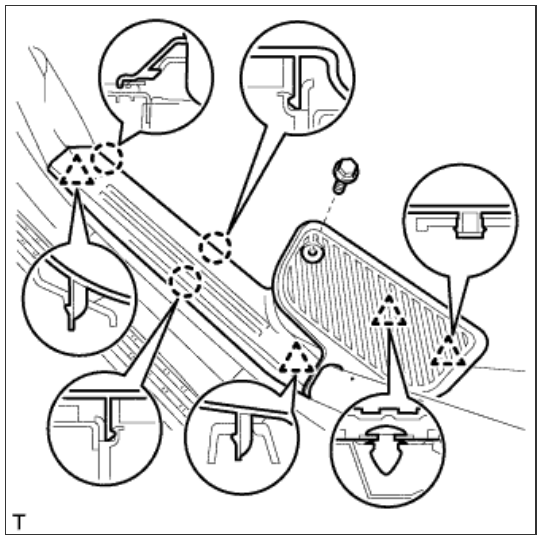
HINT:



Use the same procedure to install the rear seat cover cap on the other side.

a. Attach the 3 claws to install the rear seat cover cap.

8. INSTALL REAR FLOOR MAT REAR SUPPORT PLATE

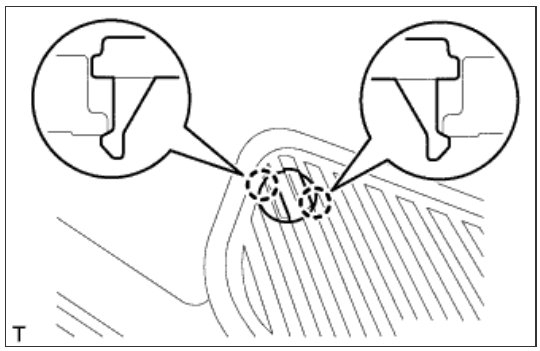


a. Attach the 6 clips to install the support plate.

9. INSTALL REAR DOOR SCUFF PLATE LH

a. Attach the 3 claws and 4 clips to install the scuff plate.

b. Install the screw.



10. INSTALL REAR STEP COVER

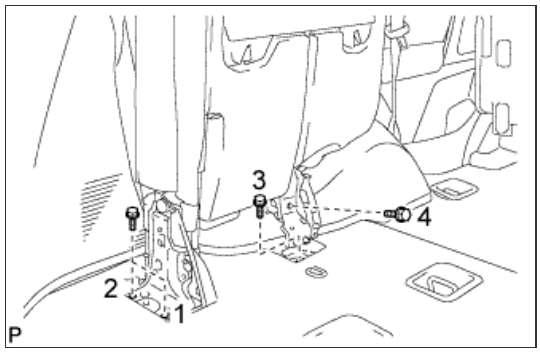
HINT:

Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.

11. INSTALL REAR NO. 2 SEAT ASSEMBLY

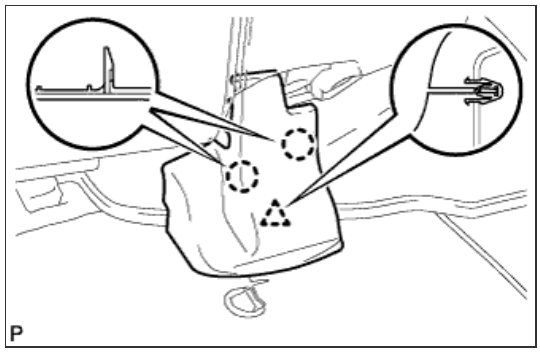
a. Temporarily install the seat assembly with the 4 bolts.



NOTICE:

Be careful not to damage the vehicle body.

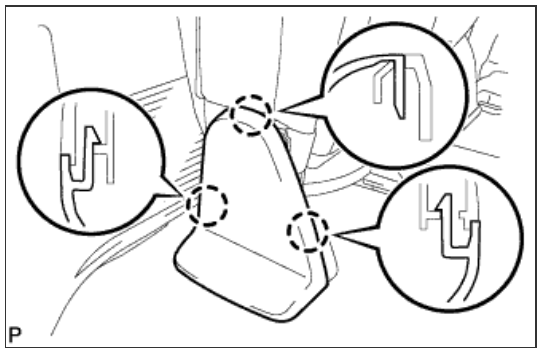
b. Tighten the bolts in the order shown in the illustration.



Torque:

37 N*m{ 377 kgf*cm , 27 ft.*lbf }

12. INSTALL REAR NO. 2 SEAT HINGE COVER LH



a. Attach the clip and 2 claws to install the cover.

13. INSTALL REAR SEAT CUSHION HINGE COVER LH

a. Attach the 3 claws to install the cover.

b. Return the seat to the upright position.

14. INSTALL REAR NO. 2 SEAT HEADREST ASSEMBLY LH

for Preparation Click here

HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL REAR SEAT LOCK STRIKER SUB-ASSEMBLY

a. Install the 4 seat lock strikers with bolts.

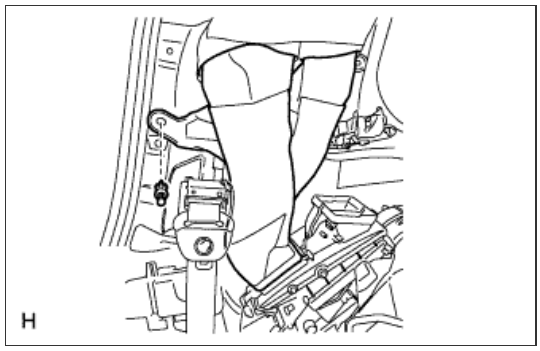
Torque:
37 N*m{ 377 kgf*cm , 27 ft.*lbf }

b. Return the floor carpet to its original position.

2. INSTALL NO. 3 SEAT CUSHION COVER

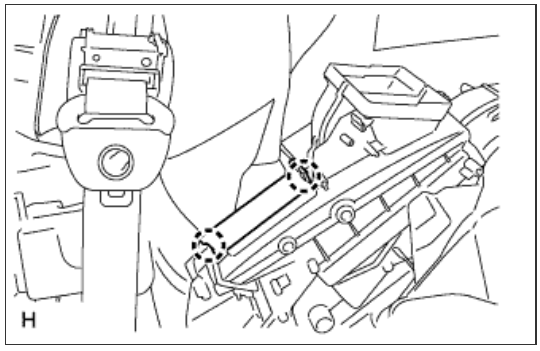
a. Attach the 16 claws and 4 clips to install the 4 seat cushion covers.

3. INSTALL FOLD SEAT LEG LOCK SUB-ASSEMBLY



a. Install the fold seat leg lock with the 2 nuts.

Torque:
12 N*m{ 122 kgf*cm , 9 ft.*lbf }



b. Attach the 2 cable clamps.

4. INSTALL REAR ROOF NO. 1 AIR DUCT (w/ Rear Air Conditioning System)

a. Install the duct with the clip.

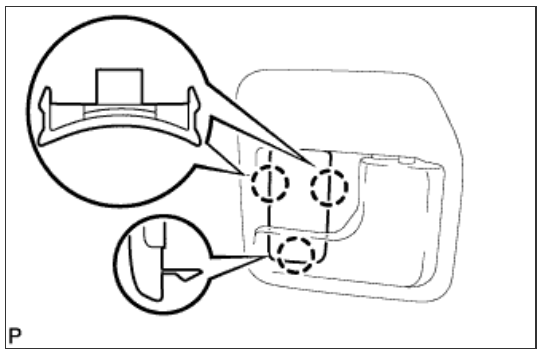
b. Attach the 2 claws to install the cooler plate.

INSTALL REAR SEAT LOCK CONTROL LEVER SUB-ASSEMBLY LH

a. Attach the 4 claws to install the seat lock control lever.

INSTALL FRONT UARTER TRIM PANEL ASSEMBLY LH

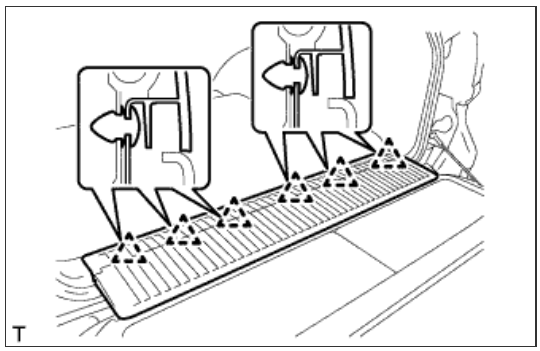
a. w/ Sliding Roof:
Install the front quarter trim panel assembly LH (lick here).



b. w/o Sliding Roof:
Install the front quarter trim panel assembly LH (lick here).

7. INSTALL REAR SEAT COVER CAP

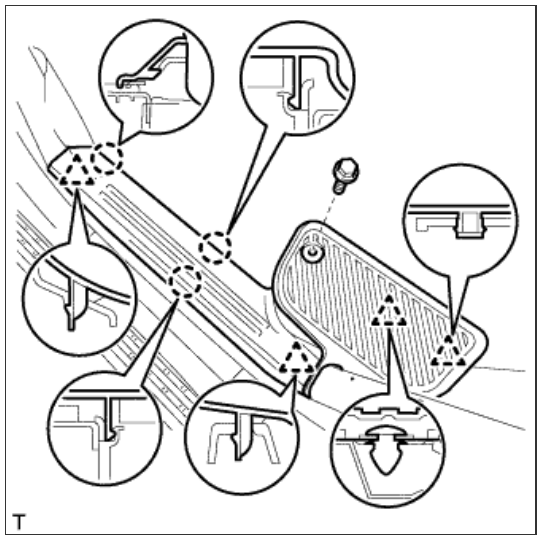
HINT:



Use the same procedure to install the rear seat cover cap on the other side.

a. Attach the 3 claws to install the rear seat cover cap.

8. INSTALL REAR FLOOR MAT REAR SUPPORT PLATE

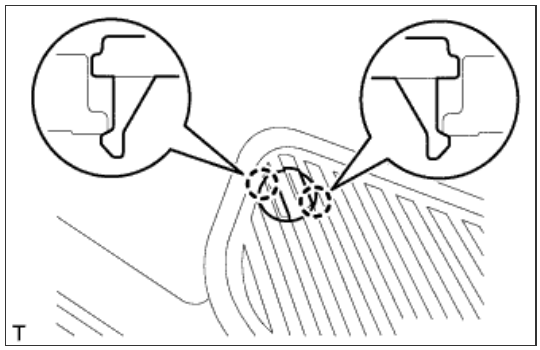


a. Attach the 6 clips to install the support plate.

9. INSTALL REAR DOOR SCUFF PLATE LH

a. Attach the 3 claws and 4 clips to install the scuff plate.

b. Install the screw.



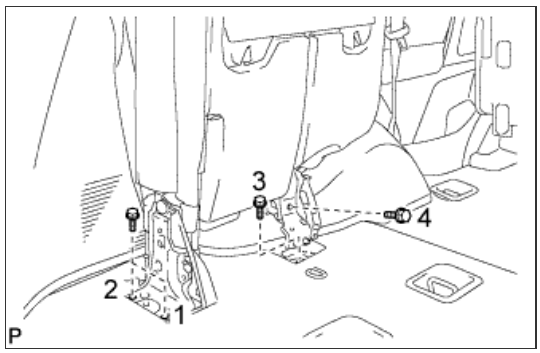
10. INSTALL REAR STEP COVER

HINT:

Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.

11. INSTALL REAR NO. 2 SEAT ASSEMBLY



a. emporarily install the seat assembly with the 4 bolts.

NOTICE:

Be careful not to damage the vehicle body.

b. ighten the bolts in the order shown in the illustration.

Torque:
37 N*m{ 377 kgf*cm , 27 ft.*lbf }

12. INSTALL REAR NO. 2 SEAT HINGE COVER LH

a. Attach the clip and 2 claws to install the cover.

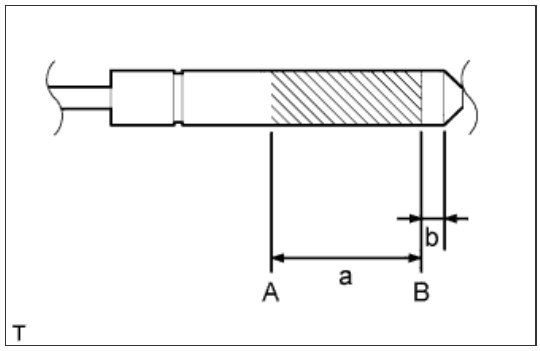
13. INSTALL REAR SEAT CUSHION HINGE COVER LH

a. Attach the 3 claws to install the cover.

b. Return the seat to the upright position.

14. INSTALL REAR NO. 2 SEAT HEADREST ASSEMBLY LH (w/ Rear Center Seat Headrest)

for Preparation Click here



HINT:

- **Use the same procedures for the LH side and RH side**
- **The procedures listed below are for the LH side.**

1. DISPOSE OF NO. 2 SEAT STAY SUB-ASSEMBLY

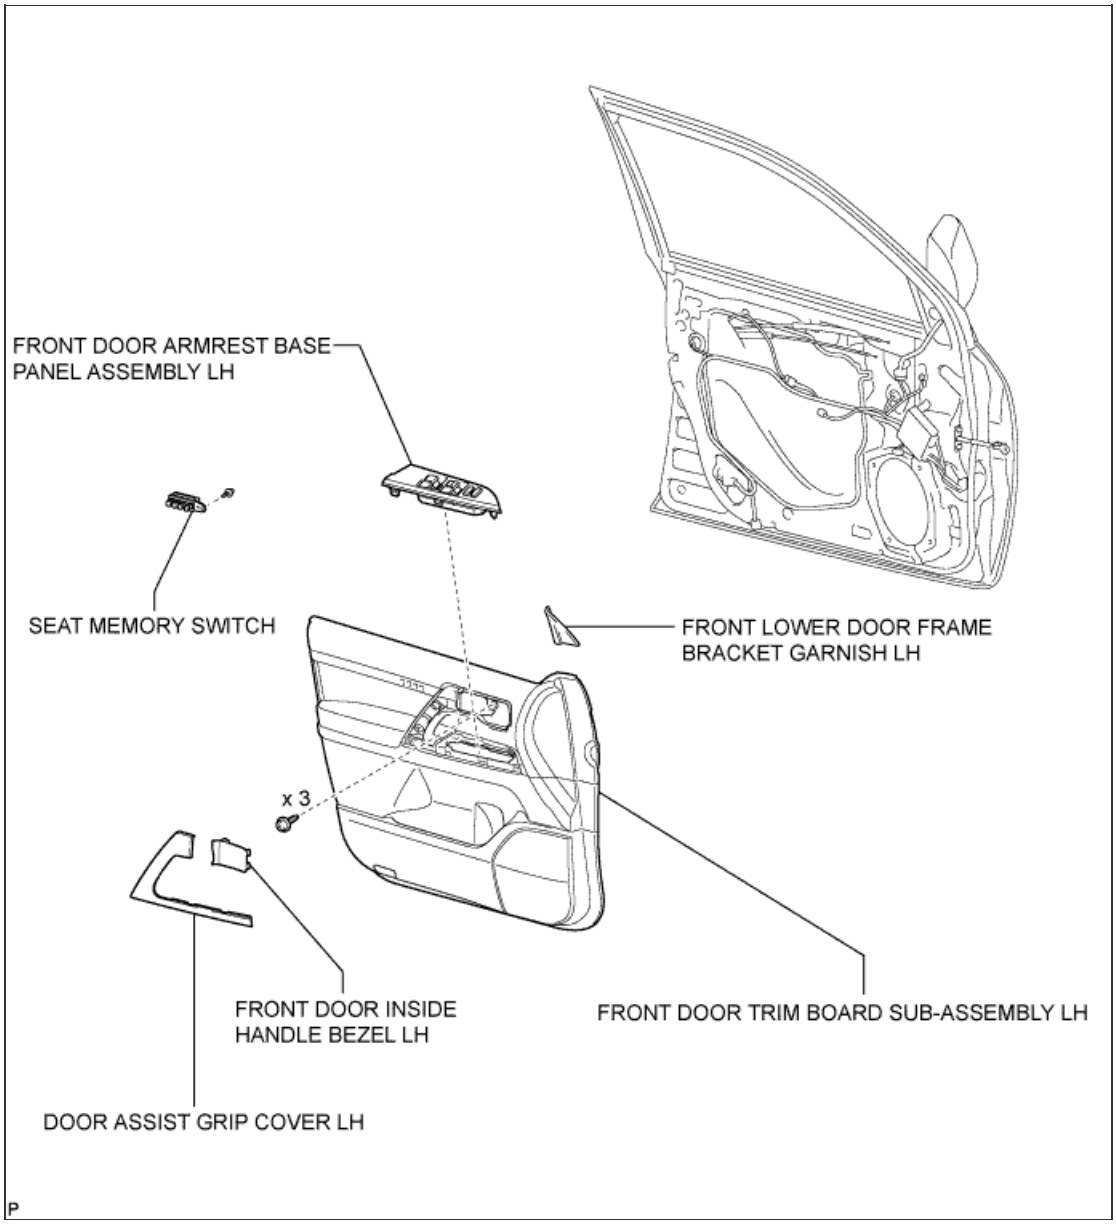
a. Horizontally fix the seat stay in a vise with the piston-rod pulled out.

b. Wear safety glasses. Gradually cut a part between A and B shown in the illustration using a metal saw and gradually release the gas.

Standard:

Area	Specified Condition
a	80 mm (3.15 in.)
b	10 mm (0.394 in.)

CAUTION:



As metal debris may be blown outward by the gas, you must:

- **Wear protective glasses.**
- **Cover the area being cut.**

NOTICE:

The gas inside the seat stay is colorless, odorless and harmless. There is a possibility that metal debris could scatter, so cover the part with a piece of cloth or other material.

1. INSPECT FRONT POWER SEAT SWITCH LH

a. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

Slide Switch:

Tester Connection	Switch Condition	Specified Condition
9 (S - 1 (	r t	Below 1 Ω
6 (S - 4 (GND)		
9 (S - 4 (GND)	Off	
6 (S - 4 (GND)		
9 (S - 4 (GND)	Rear	
6 (S - 1 (		

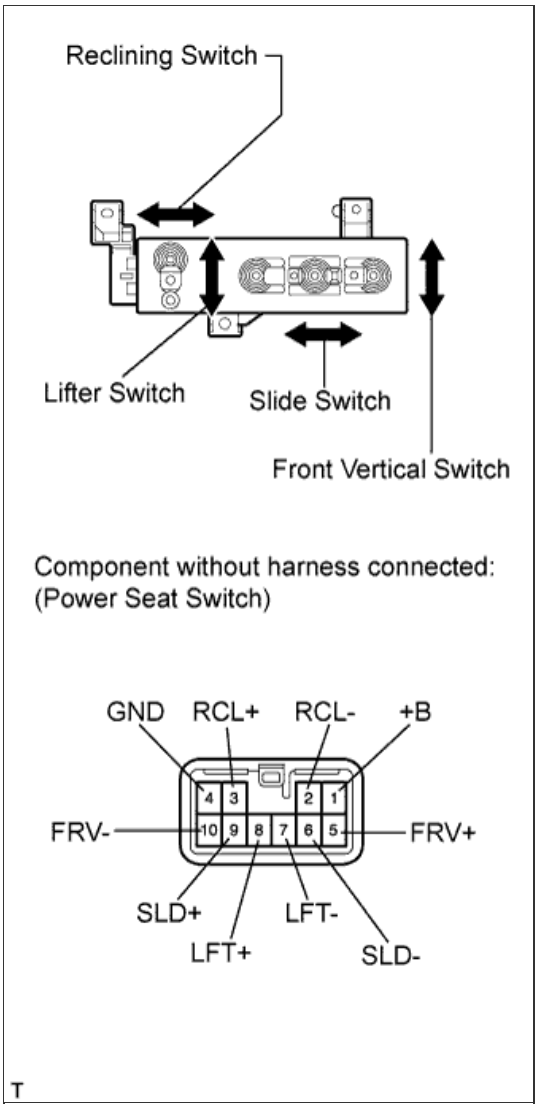
Front Vertical Switch:

ester Connection	Switch Condition	Specified Condition
10 (FRV - 1 (		
(FRV-) - 4 (GND)		
10 (FRV - 4 (GND)	Off	

5 (FRV-) - 4 (GND)		Below 1 Ω
10 (FRV - 4 (GND)	Down	
5 (FRV-) - 1 (		

Lifter Switch:

ester Connection	Switch Condition	Specified Condition
7 (- 1 (		elow 1 Ω
8 (- 4 (GND)		
7 (- 4 (GND)	Off	
8 (- 4 (GND)		
7 (- 4 (GND)	Down	
8 (- 1 (		



Reclining Switch:

ester Connection	Switch Condition	Specified Condition
3 (RC - 1 (	r t	Below 1 Ω
2 (RC - 4 (GND)		
3 (RC - 4 (GND)	Off	
2 (RC - 4 (GND)		
3 (RC - 4 (GND)	Rear	
2 (RC - 1 (		

the result is not as specified, replace the front power seat switch.

2. INSPECT FRONT POWER SEAT SWITCH RH

a. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

Slide Switch:

Tester Connection	Switch Condition	Specified Condition
9 (S - 1 (	r t	Below 1 Ω
6 (S - 4 (GND)		
9 (S - 4 (GND)	Off	
6 (S - 4 (GND)		
9 (S - 4 (GND)	Rear	
6 (S - 1 (		

Front Vertical Switch:

ester Connection	Switch Condition	Specified Condition
5 (FRV - 1 (		elow 1 Ω
10 (FRV-) - 4 (GND)		
5 (FRV - 4 (GND)	Off	
10 (FRV-) - 4 (GND)		
5 (FRV - 4 (GND)	Down	
10 (FRV-) - 1 (		

Lifter Switch:

ester Connection	Switch Condition	Specified Condition
8 (- 1 (		

7 (- 4 (GND)		Below 1 Ω
8 (- 4 (GND)	Off	
7 (- 4 (GND)		
8 (- 4 (GND)	Down	
7 (- 1 (		

Reclining Switch:

ester Connection	Switch Condition	Specified Condition
3 (RC - 1 (	r t	Below 1 Ω
2 (RC - 4 (GND)		
3 (RC - 4 (GND)	Off	
2 (RC - 4 (GND)		
3 (RC - 4 (GND)	Rear	
2 (RC - 1 (		

the result is not as specified, replace the front power seat switch.

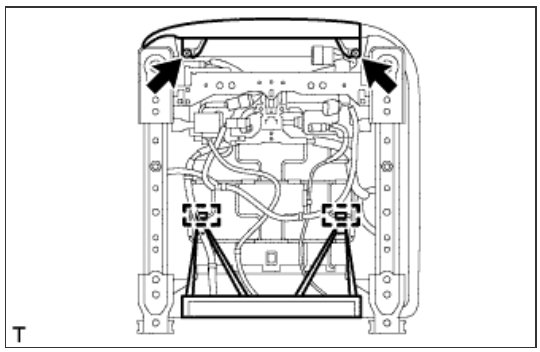
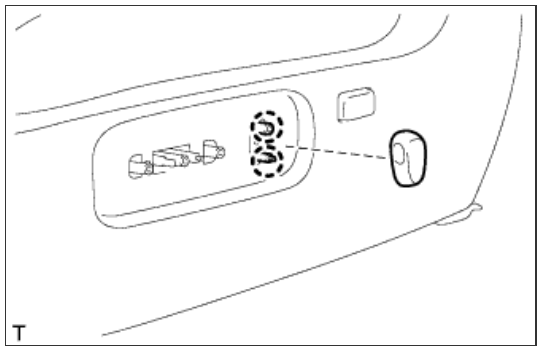
a. for Driver Side:
Connect the lumbar switch connectors.



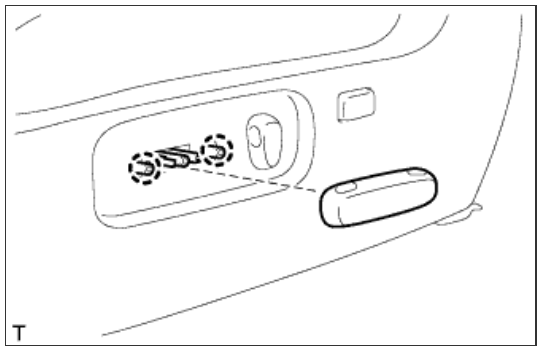
Attach the 2 claws to install the cushion shield.

c. Install the screws.



Install the 2 screws.

e. Attach the 2 rubber bands to the hooks.



INSTALL RECLININ POWER SEAT SWITCH KNO

a. Attach the 2 claws to install the knob.

INSTALL SLIDE AND ERTICAL POWER SEAT SWITCH KNO

a. Attach the 2 claws to install the knob.

INSTALL RONT SEAT ASSEM L LH

a. Install the front seat assembly (Click here).

for Preparation Cli ere

INSPECT POWER SEAT MOTOR ASSEMBLY

a Check the PTC operation inside the power seat motor.

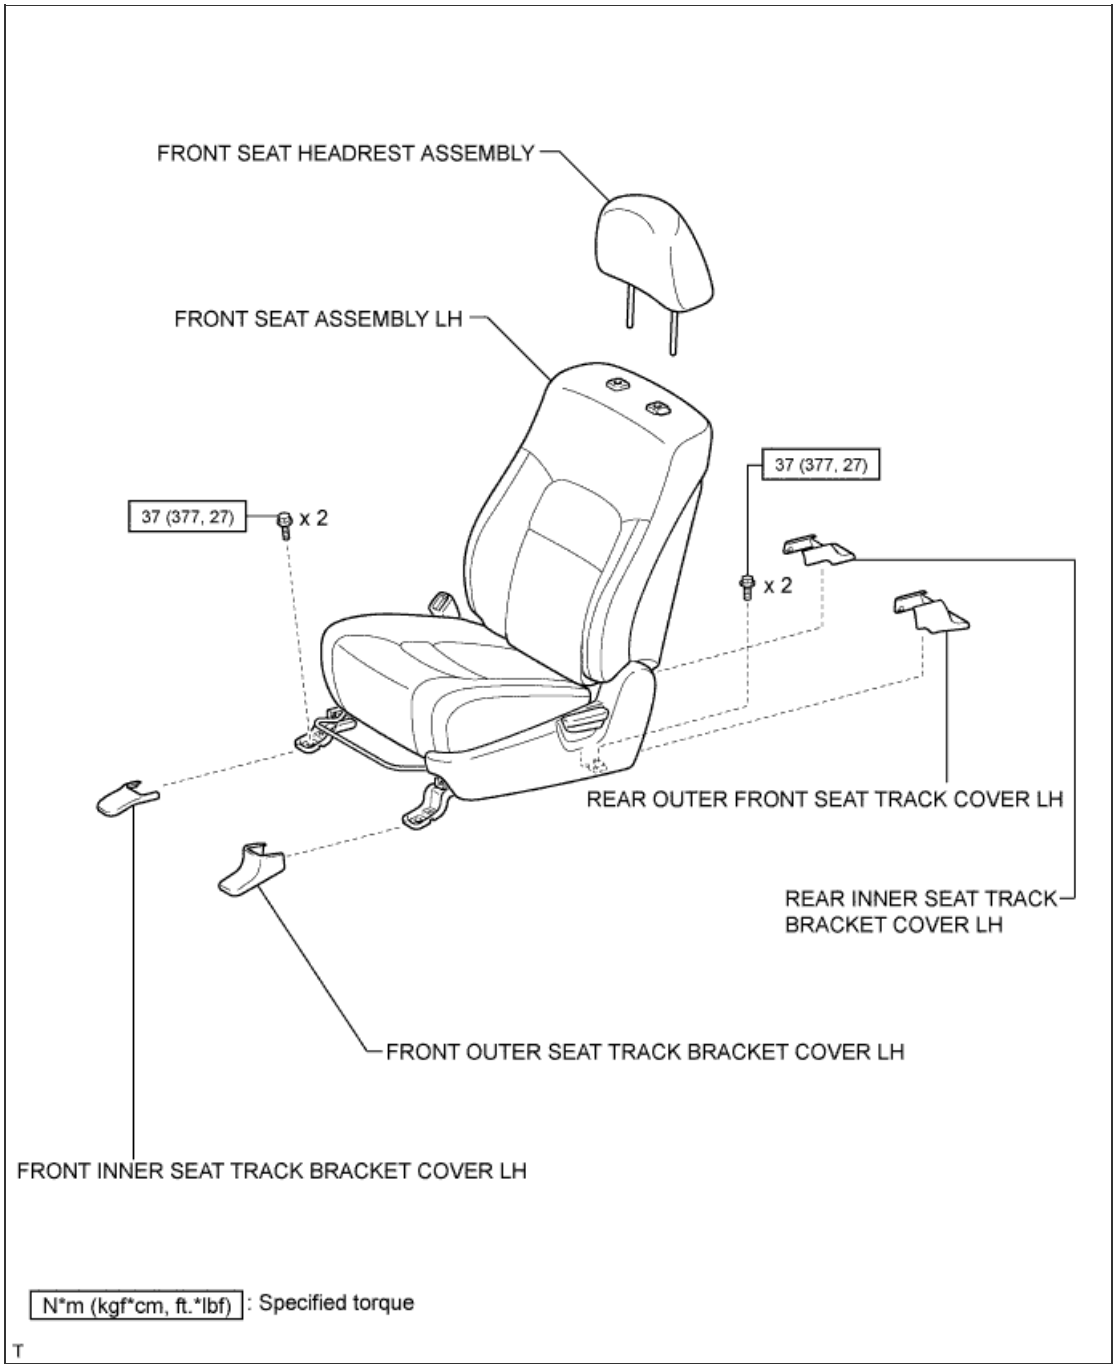
HINT

The resistance of the PTC thermistor increases when the power seat switch is held down even after the power seat has been moved to the maximum in one direction. If the resistance increases beyond a specified level, current is cut to prevent a short circuit.

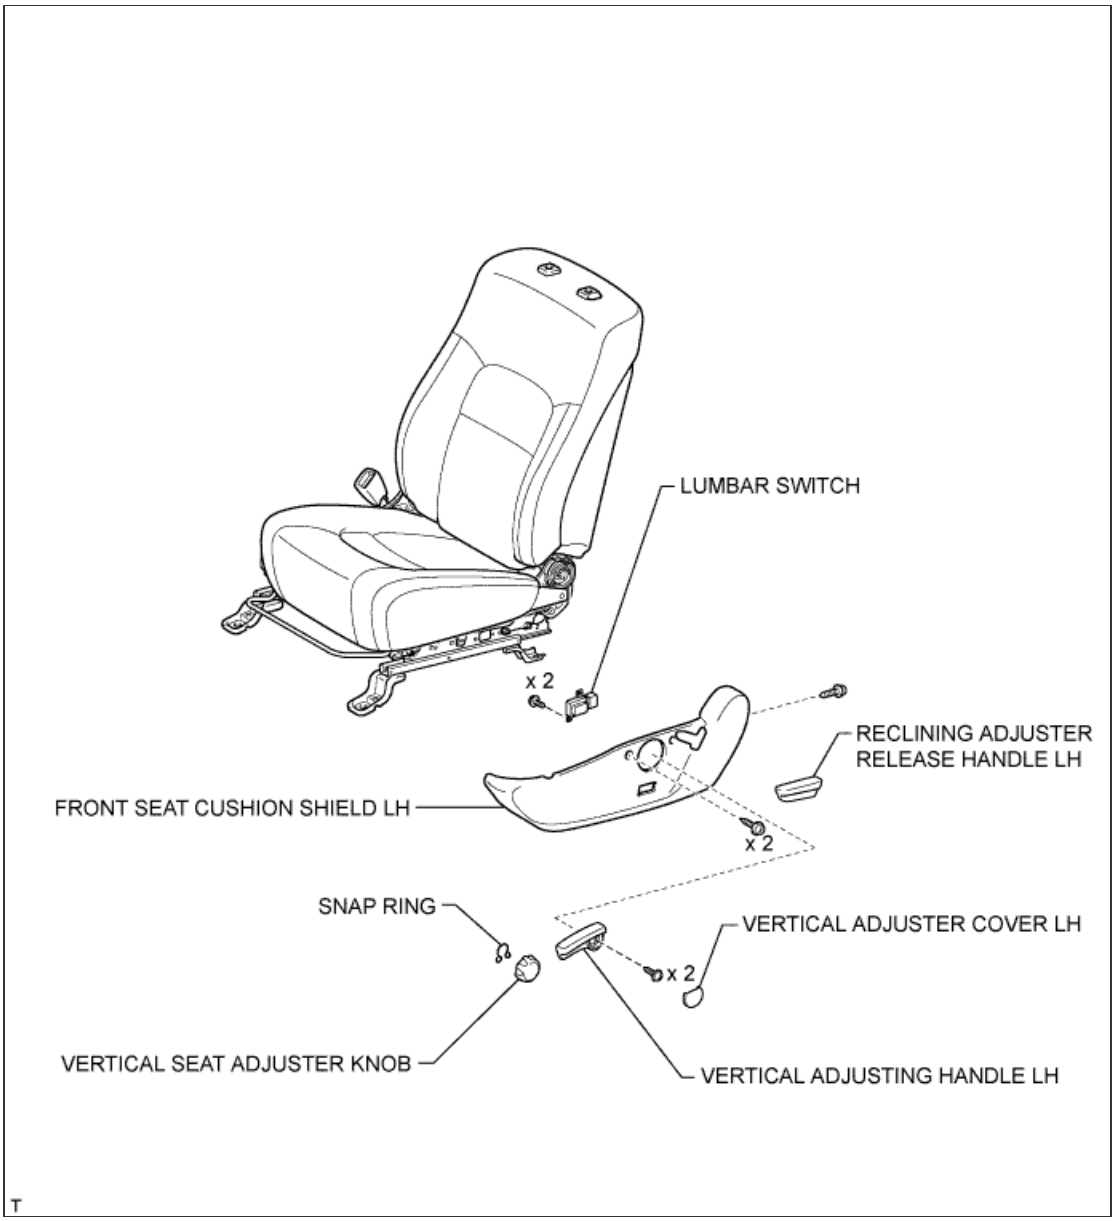
NOTICE

- T e inspe ibn s o ld be perfor ed wit te seat installed in t e e i le
- Perfor te 4 steps below for each power seat f n ibn

i Choose a power seat function. Operate the power seat switch and move the seat as much as possible in one direction. Keep the seat in that position for approximately 60 seconds.



ii Operate the power seat switch a and continue to try to move the seat in the same direction as in the previous step. easure the amount of time elapsed before current is automatically cut (the sound of the motor has stopped).



Standard
d 9 e onds

iii After current has been cut, release the power seat switch and wait for approximately 60 seconds.

i Operate the same power seat switch and move the seat in the opposite direction. Check that the motor operates.

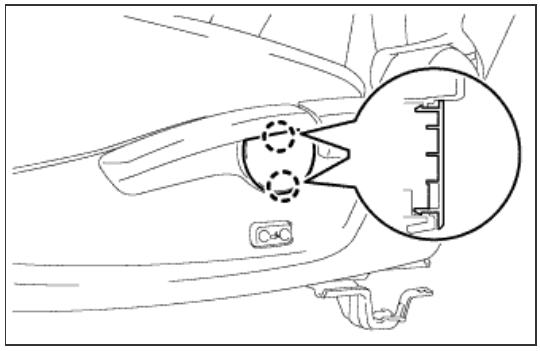
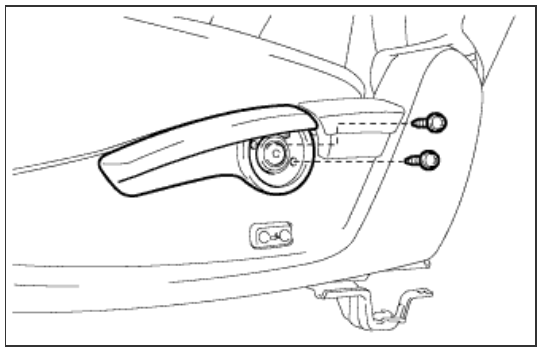
1. REMOVE FRONT SEAT ASSEMBLY LH



a. Remove the front seat assembly (Click here).

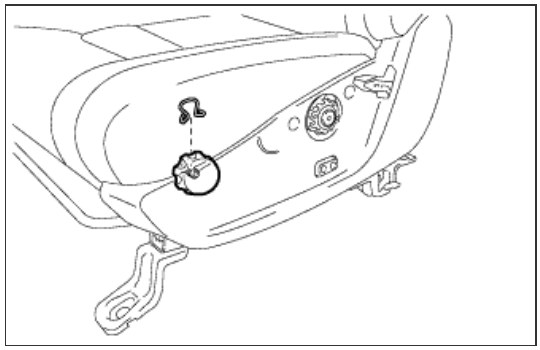
2. REMOVE VERTICAL ADJUSTER COVER LH (for 8 Way Seat Type)

a. Using a screwdriver, detach the 2 claws and remove the vertical ad ter cover.



HINT:

Tape the screwdriver tip before use.

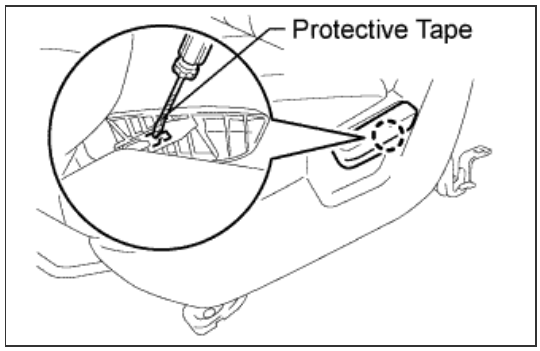


3. REMOVE VERTICAL ADJUSTING HANDLE LH (for 8 Way Seat Type)

a. Remove the 2 screws and vertical ad ting handle.

4. REMOVE VERTICAL SEAT ADJUSTER KNOB (for 8 Way Seat Type)

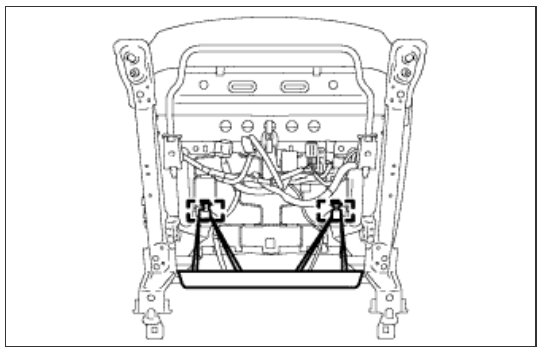
a. Remove the snap ring and vertical seat ad ter knob.



5. REMOVE RECLINING ADJUSTER RELEASE HANDLE LH

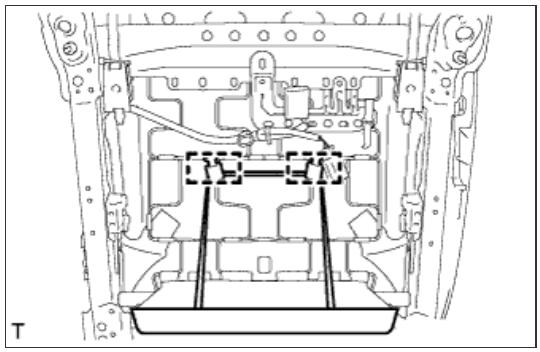
a. Lift the reclining ad ter release handle.

b. Using a screwdriver, detach the claw and remove the reclining ad ter release handle.



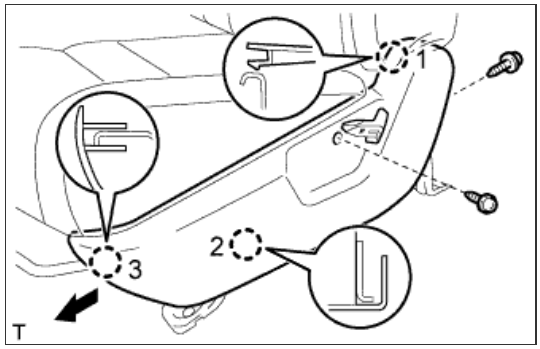
HINT:

Tape the screwdriver tip before use.



6. REMOVE FRONT SEAT CUSHION SHIELD LH

a. w/ Seatback Board:
Remove the 2 rubber bands from the hooks.

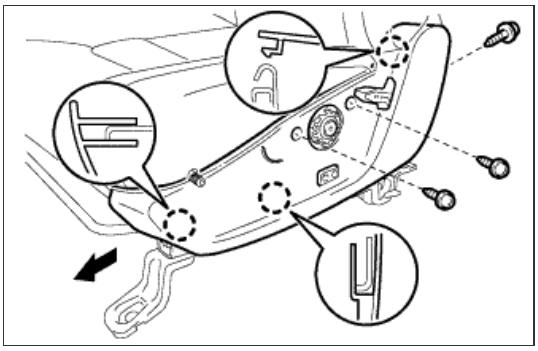


b. w/o Seatback Board:
Remove the 2 rubber bands from the hooks.

c. for 4 Way Seat Type:

i. Remove the 2 screws.

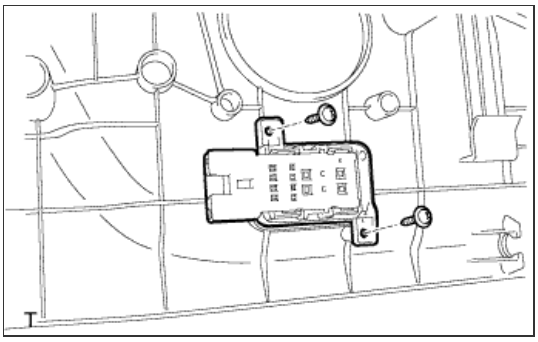
ii. Detach the 3 claws in the order shown in the illustration, and then remove the cushion shield.



d. for Way Seat Type:

i. Remove the 3 screws.

ii. Detach the 3 claws in the order shown in the illustration, and then



remove the cushion shield.

e. w/ Lumbar Support:
Disconnect the lumbar switch connector.

7. REMOVE LUMBAR SWITCH (w/ Lumbar Support)

a. Remove the 2 screws and switch.

for Preparation Click here

HINT:

- **Use the same procedures for LHD and RHD vehicles.**

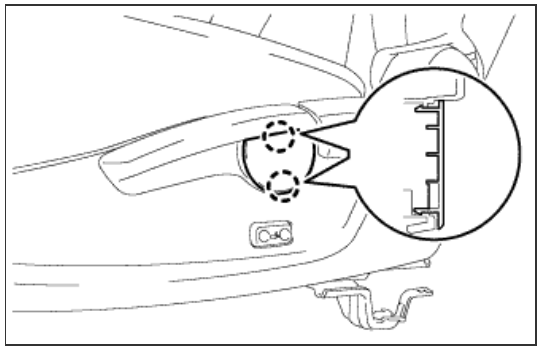
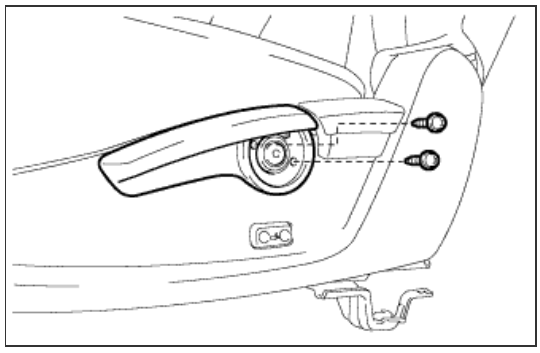
1. REMOVE FRONT SEAT ASSEMBLY LH



a. Remove the front seat assembly (Click here).

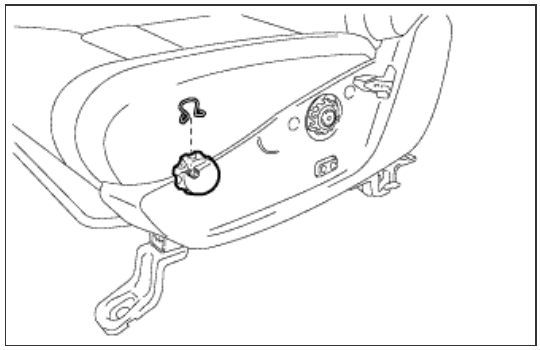
2. REMOVE VERTICAL ADJUSTER COVER LH (for 8 Way Seat Type)

a. Using a screwdriver, detach the 2 claws and remove the vertical ad ter cover.



HINT:

Tape the screwdriver tip before use.

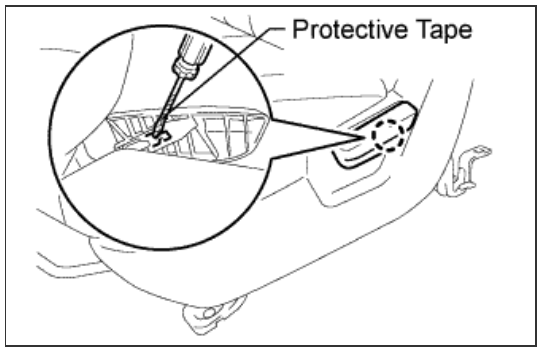


3. REMOVE VERTICAL ADJUSTING HANDLE LH (for 8 Way Seat Type)

a. Remove the 2 screws and vertical ad ting handle.

4. REMOVE VERTICAL SEAT ADJUSTER KNOB (for 8 Way Seat Type)

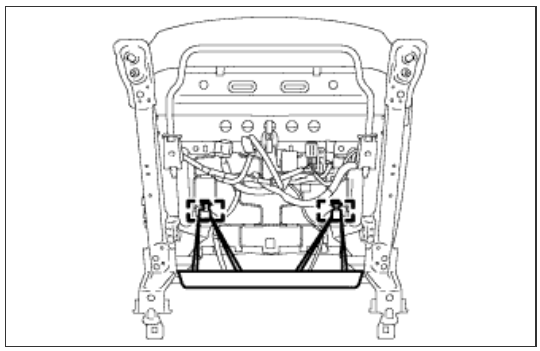
a. Remove the snap ring and vertical seat ad ter knob.



5. REMOVE RECLINING ADJUSTER RELEASE HANDLE LH

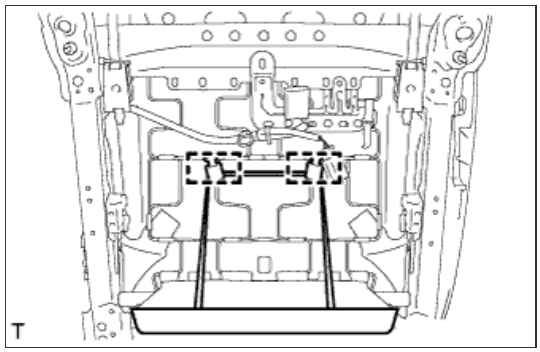
a. Lift the reclining ad ter release handle.

b. Using a screwdriver, detach the claw and remove the reclining ad ter release handle.



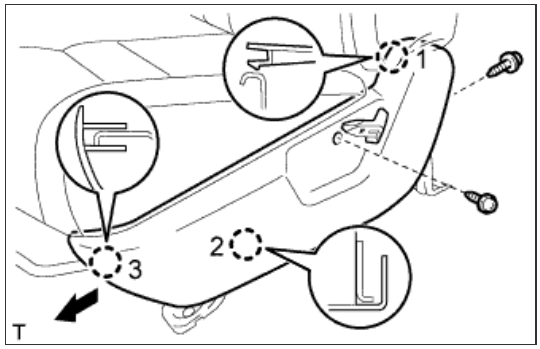
HINT:

Tape the screwdriver tip before use.



6. REMOVE FRONT SEAT CUSHION SHIELD LH

a. w/ Seatback Board:
Remove the 2 rubber bands from the hooks.

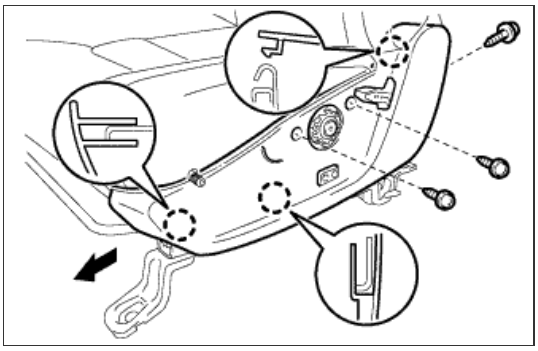


b. w/o Seatback Board:
Remove the 2 rubber bands from the hooks.

c. for 4 Way Seat Type:

i. Remove the 2 screws.

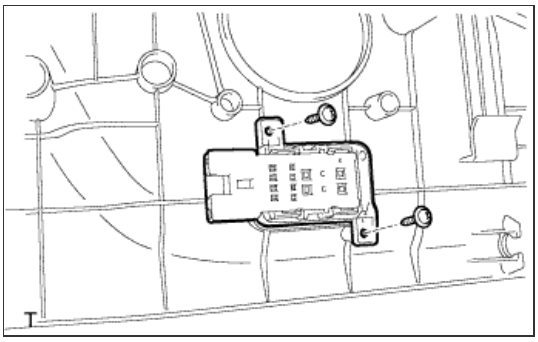
ii. Detach the 3 claws in the order shown in the illustration, and then remove the cushion shield.



d. for Way Seat Type:

i. Remove the 3 screws.

ii. Detach the 3 claws in the order shown in the illustration, and then



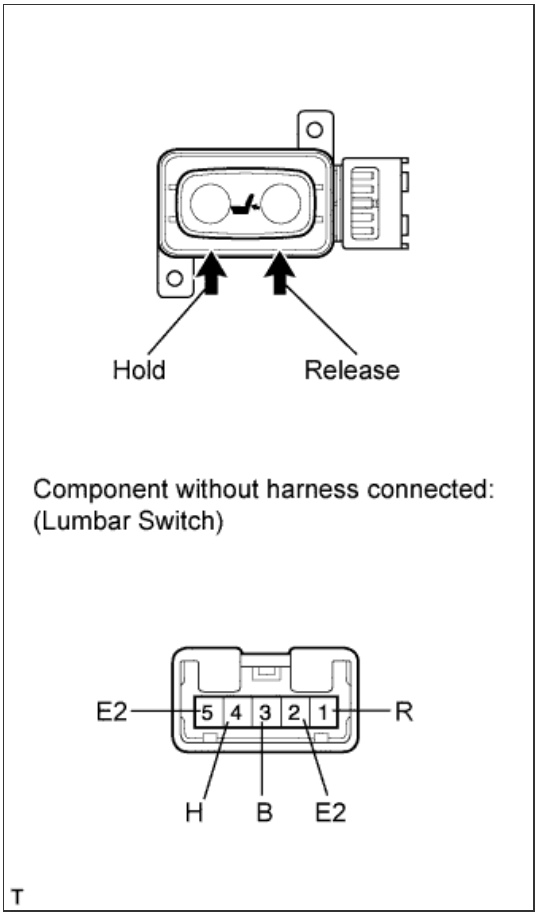
remove the cushion shield.

e. w/ Lumbar Support:
Disconnect the lumbar switch connector.

7. REMOVE LUMBAR SWITCH (w/ Lumbar Support)

a. Remove the 2 screws and switch.

for Preparation Click here



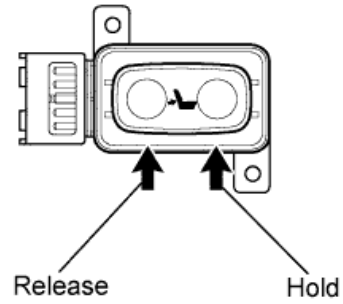
1. INSPECT LUMBAR SWITCH LH (for LH)

a. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

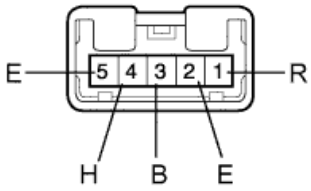
Tester Connection	Switch Condition	Specified Condition
3 (B) - 4 (H)	Hold	Below 1 Ω
1 (R) - 2 (E2)		
1 (R) - 2 (E2)	Off	
4 (H) - 5 (E2)		
1 (R) - 3 (B)	Release	
4 (H) - 5 (E2)		

If the result is not as specified, replace the lu bar switch.



2. INSPECT LUMBAR SWITCH RH (for RH)

a. Measure the resistance according to the value(s) in the table below.



Standard Resistance:

Tester Connection	Switch Condition	Specified Condition
3 (B) - 4 (H)	Hold	Below 1 Ω
1 (R) - 2 (E)		
1 (R) - 2 (E)	Off	
4 (H) - 5 (E)		
1 (R) - 3 (B)	Release	
4 (H) - 5 (E)		

If the result is not as specified, replace the lu bar switch.

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

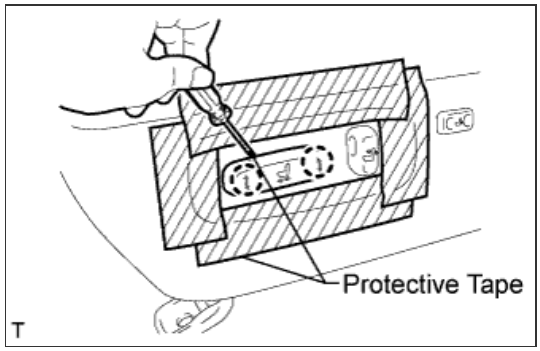
1. REMOVE FRONT SEAT ASSEMBLY LH

a. Remove the front seat assembly (Click here).



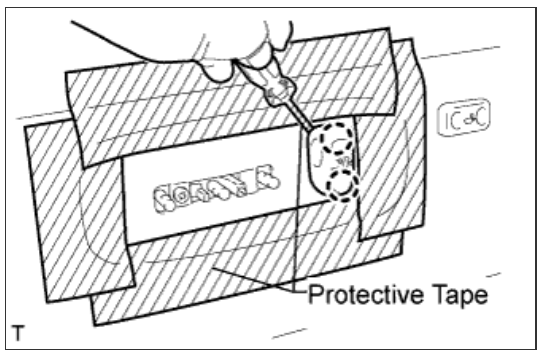
2. REMOVE SLIDE AND VERTICAL POWER SEAT SWITCH KNOB

a. Apply protective tape around the cushion shield.

b. Using a screwdriver, detach the 2 claws and remove the knob.

HINT:

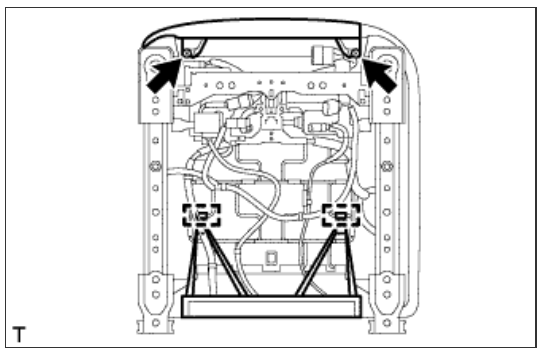
Tape the screwdriver tip before use.



3. REMOVE RECLINING POWER SEAT SWITCH KNOB

a. Using a screwdriver, detach the 2 claws and remove the knob.

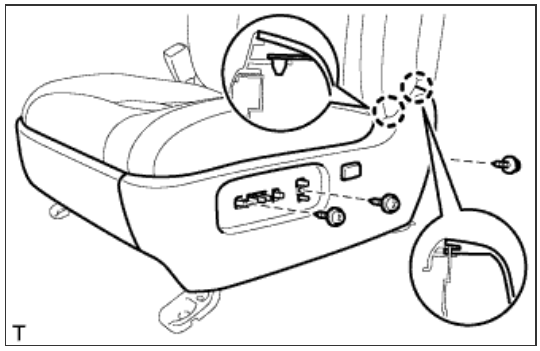
HINT:



Tape the screwdriver tip before use.

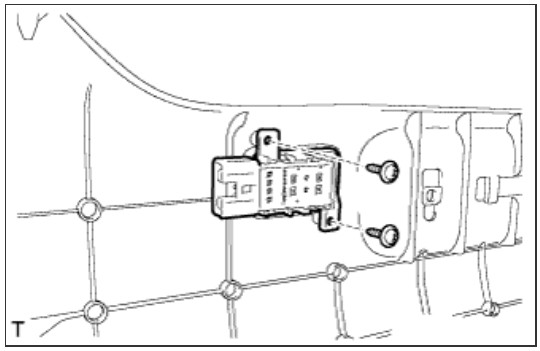
4. REMOVE FRONT SEAT CUSHION SHIELD LH

a. Remove the 2 rubber bands from the hooks.



b. Remove the 2 screws.

c. Remove the 3 screws.



d. Detach the 2 claws and remove the cushion shield.

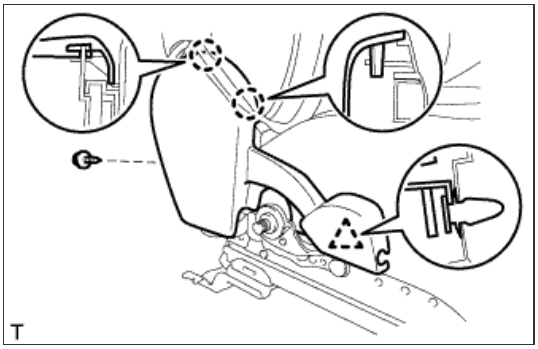
e. for Driver Side:
Disconnect the power seat lumbar switch connectors.

5. REMOVE FRONT SEAT INNER BELT ASSEMBLY LH

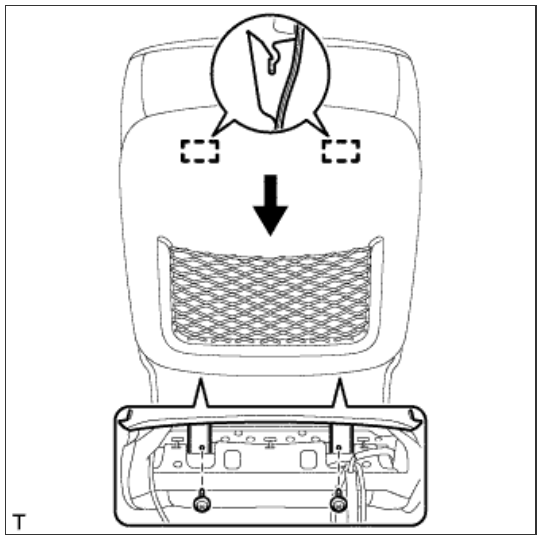
a. Disconnect the connectors and detach the clamps.



b. Remove the nut and front seat inner belt assembly.

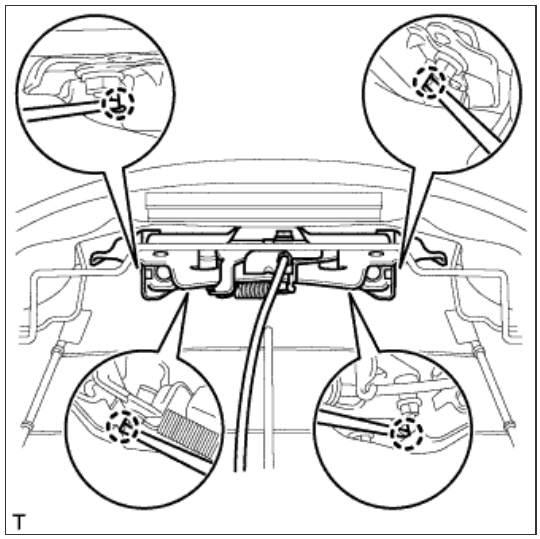
6. REMOVE FRONT INNER SEAT CUSHION SHIELD LH

a. Remove the screw.



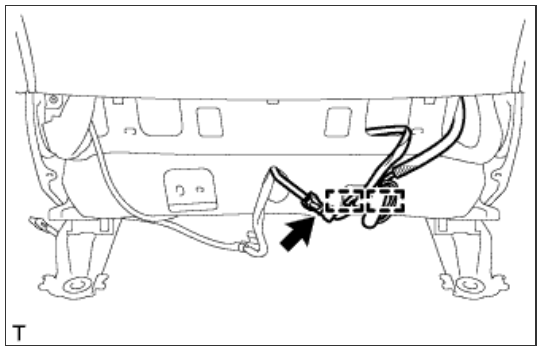
b. Detach the 2 claws and clip, and then remove the cushion shield.

7. REMOVE FRONT SEATBACK BOARD SUB-ASSEMBLY LH



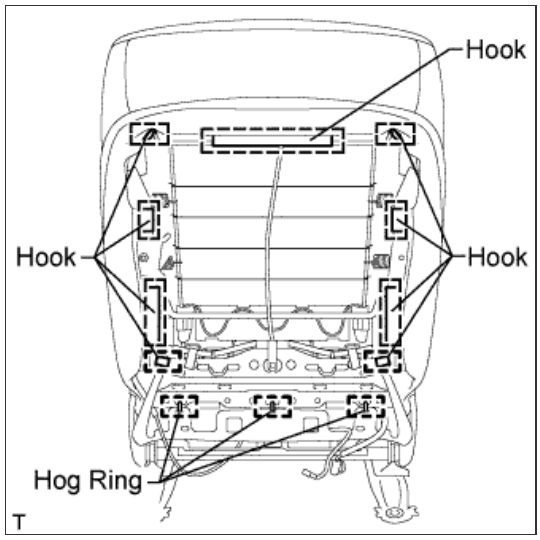
a. Remove the 2 screws.

b. Move the seatback board in the direction of the arrow to detach the 2 hooks and remove the seatback board.



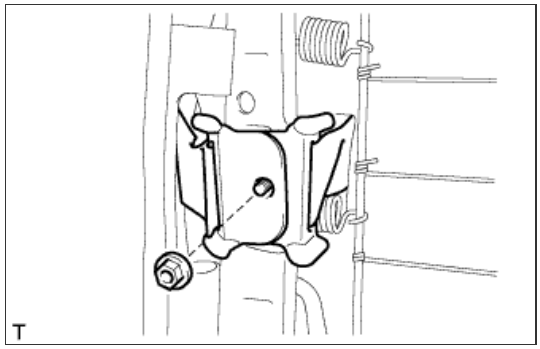
8. REMOVE FRONT SEAT HEADREST SUPPORT

a. Using a screwdriver, detach the 4 claws and remove the 2 headrest supports.



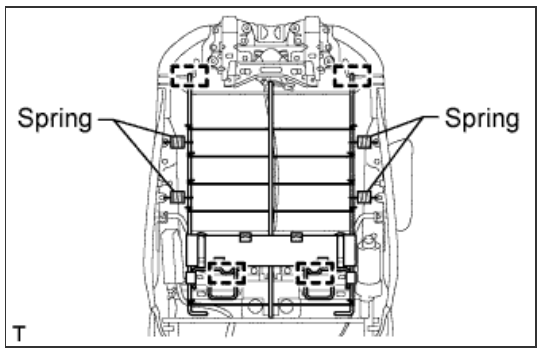
9. REMOVE SEATBACK COVER WITH PAD

a. Disconnect the seat heater connector and detach the 2 wire harness clamps.



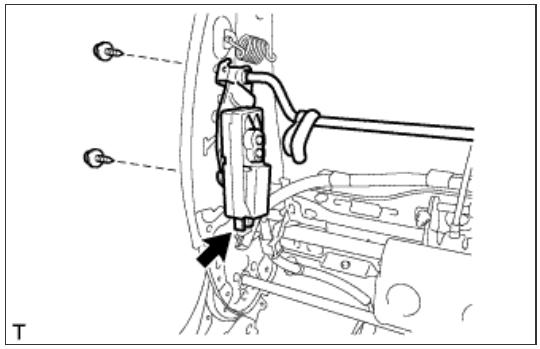
b. Remove the 3 hog rings and detach the 9 hooks.

c. Remove the nut and seatback cover bracket from the seat frame.



d. Remove the seatback cover with pad.

1 . REMOVE LUMBAR SUPPORT ADJUSTER ASSEMBLY LH (for Driver Side)



a. Remove the 4 springs.

b. Detach the 4 hooks and remove the seatback spring.

c. Disconnect the lumbar support adjuster connector.

d. Remove the 2 screws and lumbar support adjuster.

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

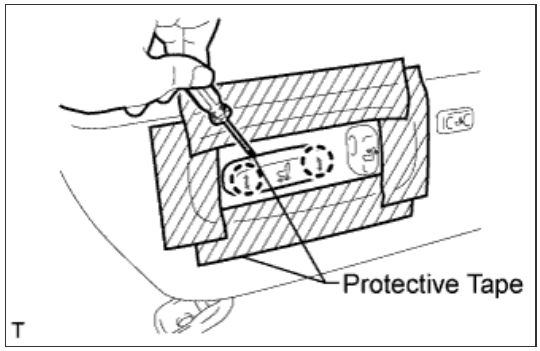
- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. REMOVE FRONT SEAT ASSEMBLY LH

a. Remove the front seat assembly (Click here).



2. REMOVE SLIDE AND VERTICAL POWER SEAT SWITCH KNOB

a. Apply protective tape around the cushion shield.

b. Using a screwdriver, detach the 2 claws and remove the knob.

HINT:

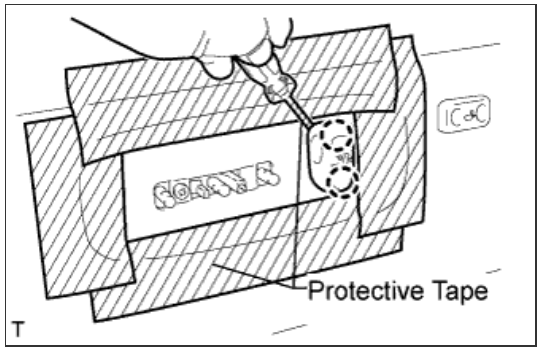
Tape the screwdriver tip before use.



3. REMOVE RECLINING POWER SEAT SWITCH KNOB

a. Using a screwdriver, detach the 2 claws and remove the knob.

HINT:

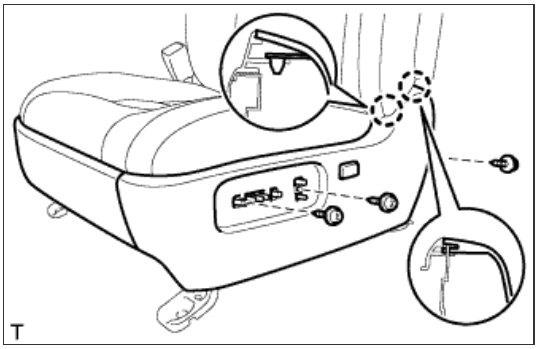
Tape the screwdriver tip before use.

4. REMOVE FRONT SEAT CUSHION SHIELD LH

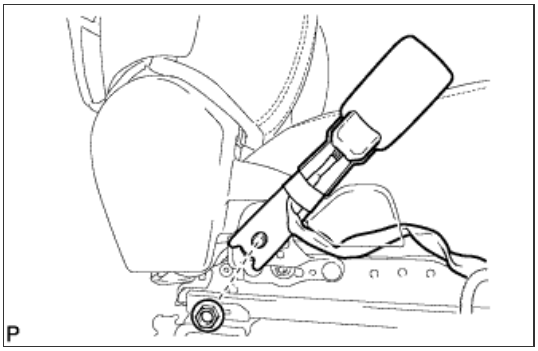
a. Remove the 2 rubber bands from the hooks.



b. Remove the 2 screws.

c. Remove the 3 screws.

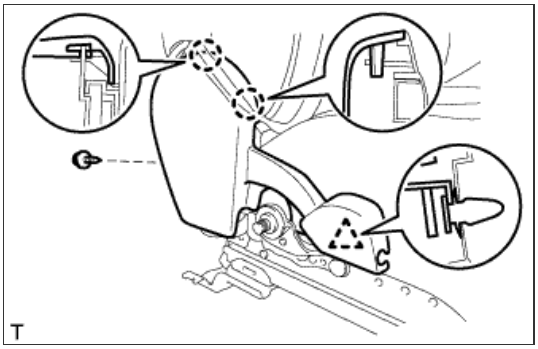
d. Detach the 2 claws and remove the cushion shield.



e. for Driver Side:
Disconnect the power seat lumbar switch connectors.

5. REMOVE FRONT SEAT INNER BELT ASSEMBLY LH

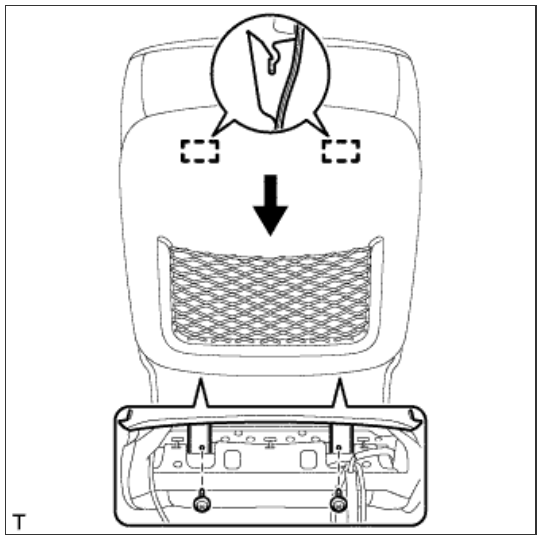
a. Disconnect the connectors and detach the clamps.



b. Remove the nut and front seat inner belt assembly.

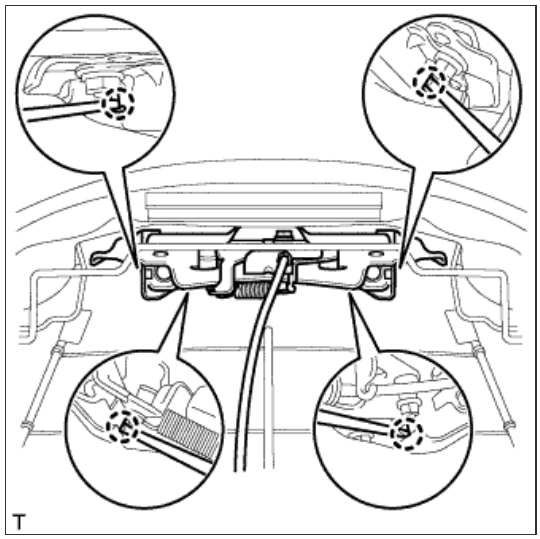
6. REMOVE FRONT INNER SEAT CUSHION SHIELD LH

a. Remove the screw.



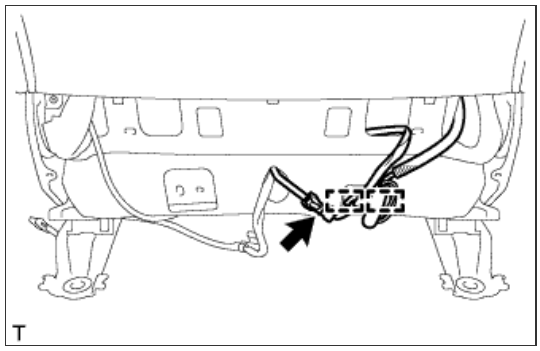
b. Detach the 2 claws and clip, and then remove the cushion shield.

7. REMOVE FRONT SEATBACK BOARD SUB-ASSEMBLY LH



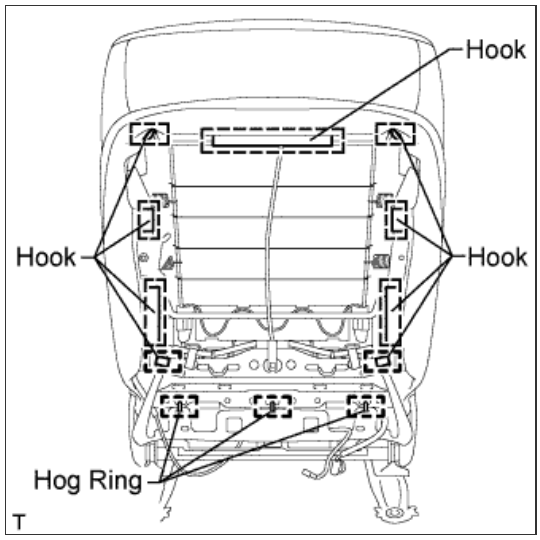
a. Remove the 2 screws.

b. Move the seatback board in the direction of the arrow to detach the 2 hooks and remove the seatback board.



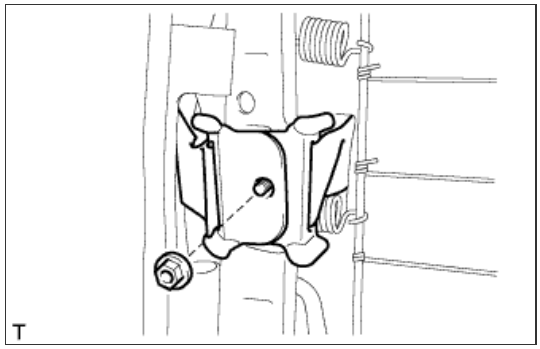
8. REMOVE FRONT SEAT HEADREST SUPPORT

a. Using a screwdriver, detach the 4 claws and remove the 2 headrest supports.



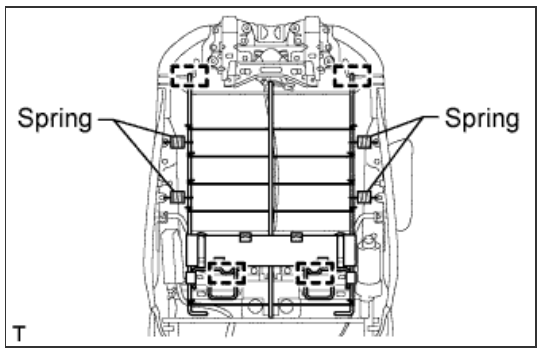
9. REMOVE SEATBACK COVER WITH PAD

a. Disconnect the seat heater connector and detach the 2 wire harness clamps.



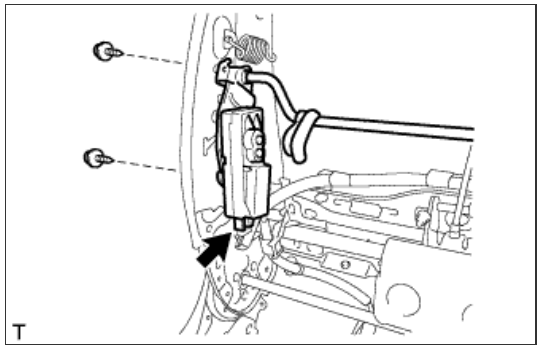
b. Remove the 3 hog rings and detach the 9 hooks.

c. Remove the nut and seatback cover bracket from the seat frame.



d. Remove the seatback cover with pad.

1 . REMOVE LUMBAR SUPPORT ADJUSTER ASSEMBLY LH (for Driver Side)



a. Remove the 4 springs.

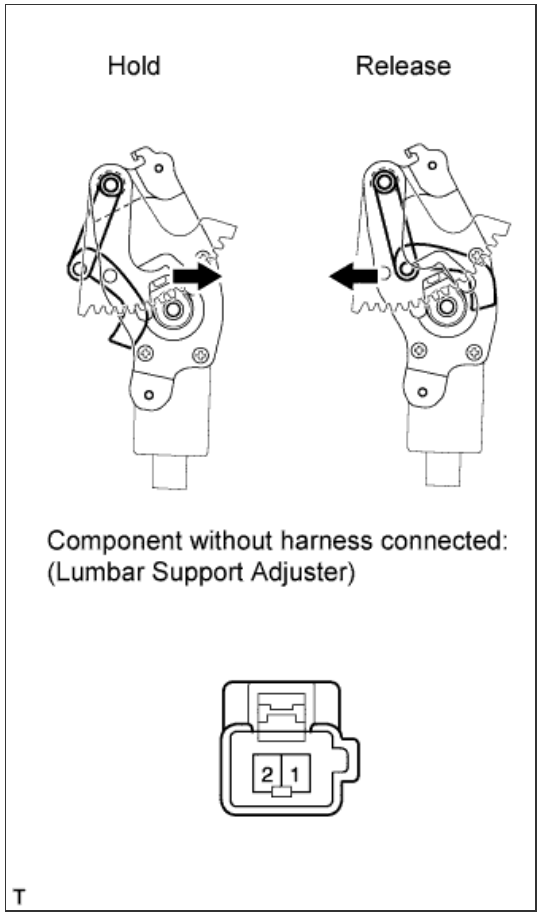
b. Detach the 4 hooks and remove the seatback spring.

c. Disconnect the lumbar support adjuster connector.

d. Remove the 2 screws and lumbar support adjuster.

for Preparation Click here

1. INSPECT LUMBAR SUPPORT ADJUSTER ASSEMBLY LH (for LHD)



a. Check the operation of the lumbar support adjuster.

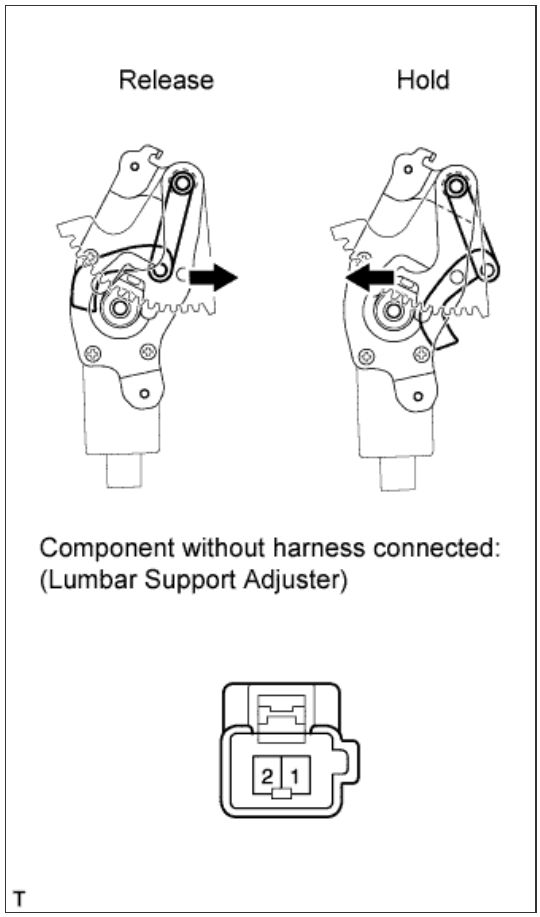
i. Check if the lumbar support adjuster moves smoothly when the battery is connected to the lumbar support adjuster motor connector terminals.

OK:

Measurement Condition	Specified Condition
Battery positive (+) → 1 Battery negative (-) → 2	Hold
Battery positive (+) → 2 Battery negative (-) → 1	Release

If the result is not as specified, replace the lumbar support adjuster assembly.

2. INSPECT LUMBAR SUPPORT ADJUSTER ASSEMBLY RH (for RHD)



a. Check the operation of the lumbar support adjuster.

i. Check if the lumbar support adjuster moves smoothly when the battery is connected to the lumbar support adjuster motor connector terminals.

OK:

Measurement Condition	Specified Condition
Battery positive (+) → 2 Battery negative (-) → 1	Hold
Battery positive (+) → 1 Battery negative (-) → 2	Release

If the result is not as specified, replace the lumbar support adjuster assembly.

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

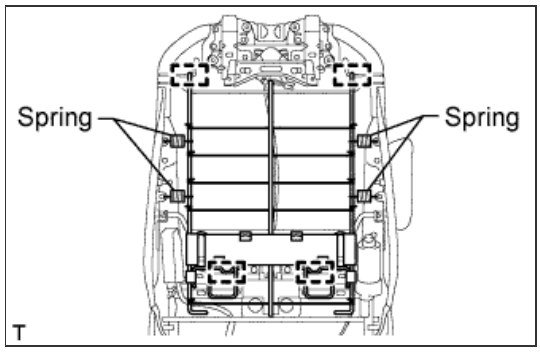
- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL LUMBAR SUPPORT ADJUSTER ASSEMBLY LH (for Driver Side)



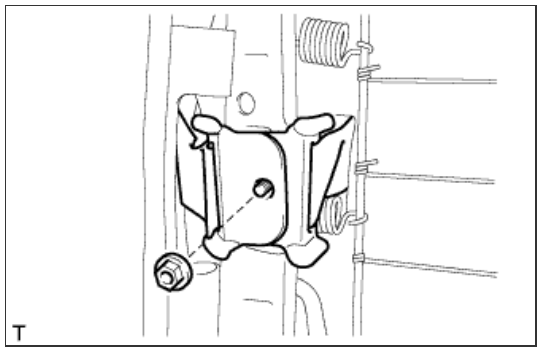
a. Install the lumbar support adjuster with the 2 screws.

b. Connect the lumbar support adjuster connector.

c. Attach the hooks to install the seatback spring.

d. Install the springs.

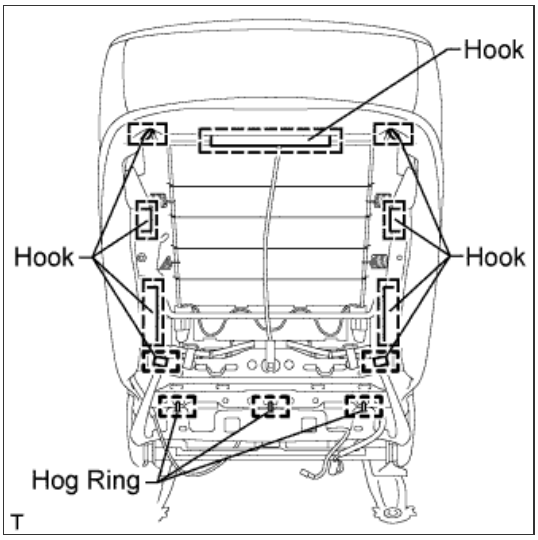
2. INSTALL SEATBACK COVER WITH PAD



a. Install the seatback cover with pad to the seatback frame.

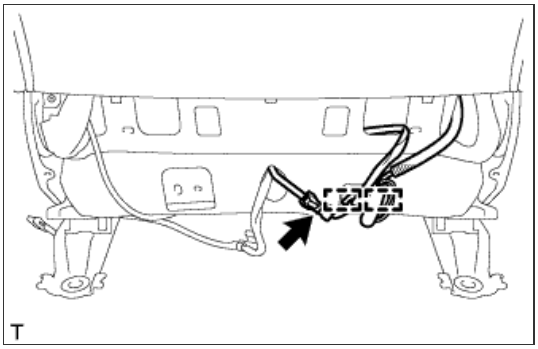
b. Install the seatback cover bracket to the seat frame with the nut.

Torque:
5.0 N*m{ 51 kgf*cm , 44 in.*lbf }



CAUTION:

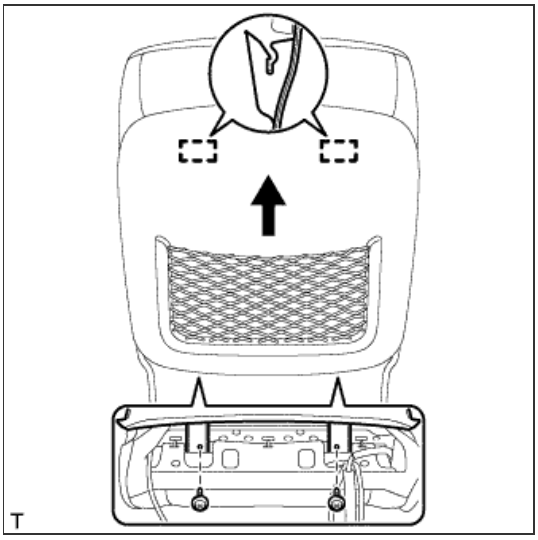
After the seatback trim cover is assembled, make sure the side airbag strap is not twisted.



c. Attach the 9 hooks.

d. Using hog ring pliers, install 3 new hog rings to the seat frame.

e. Connect the seat heater connector and attach the 2 wire harness clamps.

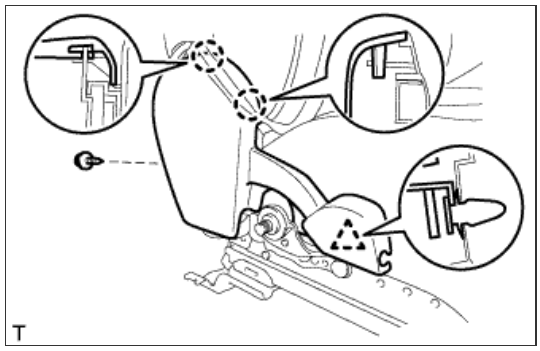


3. INSTALL FRONT SEAT HEADREST SUPPORT

a. Attach the claws to install the 2 headrest supports.

4. INSTALL FRONT SEATBACK BOARD SUB-ASSEMBLY LH

a. Move the seatback board in the direction of the arrow to attach the 2 hooks and install the seatback board.



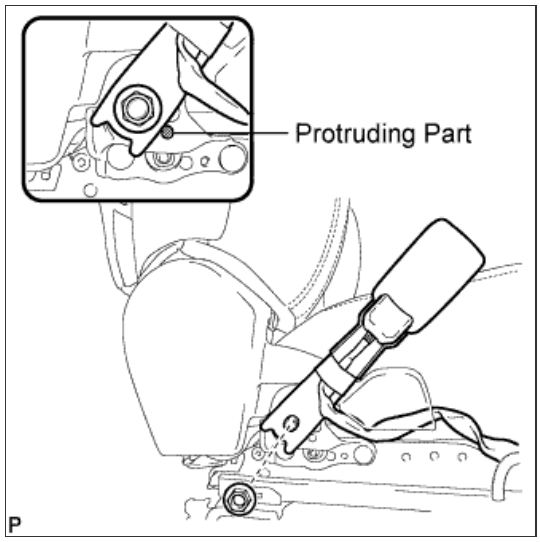
b. Install the 2 screws.

5. INSTALL FRONT INNER SEAT CUSHION SHIELD LH

a. Attach the 2 claws and clip to install the cushion shield.

b. Install the screw.

6. INSTALL FRONT SEAT INNER BELT ASSEMBLY LH



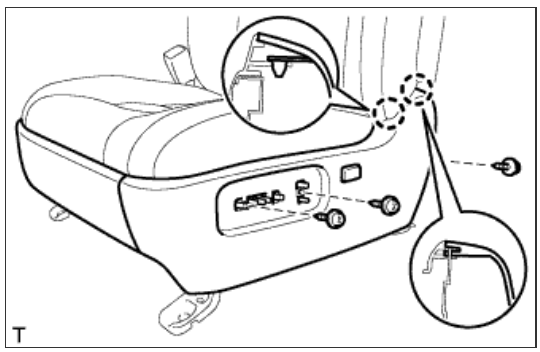
a. Install the front seat inner belt assembly with the nut.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

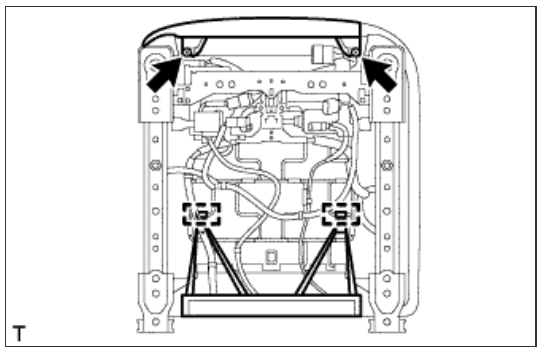
Do not allow the anchor part of the front seat inner belt assembly to overlap the protruding parts of the front seat adjuster.

b. Connect the connectors and attach the clamps.



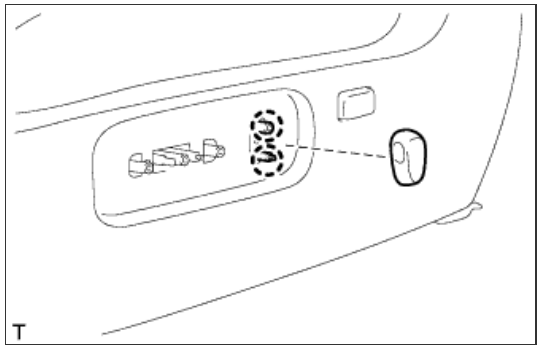
7. INSTALL FRONT SEAT CUSHION SHIELD LH

a. for Driver Side:
Connect the lumbar switch connectors.



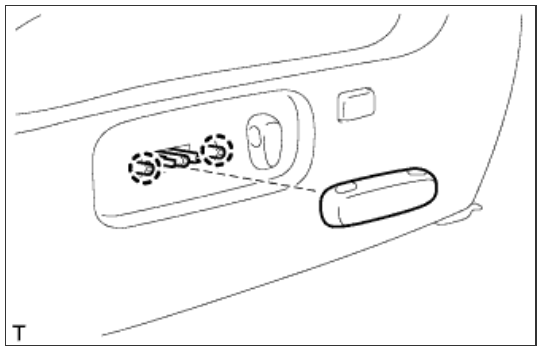
b. Attach the 2 claws to install the cushion shield.

c. Install the 3 screws.



d. Install the 2 screws.

e. Attach the 2 rubber bands to the hooks.



8. INSTALL RECLINING POWER SEAT SWITCH KNOB

a. Attach the 2 claws to install the knob.

9. INSTALL SLIDE AND VERTICAL POWER SEAT SWITCH KNOB

a. Attach the 2 claws to install the knob.

10. INSTALL FRONT SEAT ASSEMBLY LH

a. Install the front seat assembly (Click here).

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

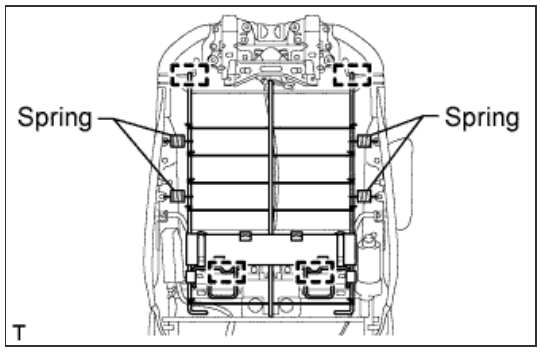
- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL LUMBAR SUPPORT ADJUSTER ASSEMBLY LH (for Driver Side)



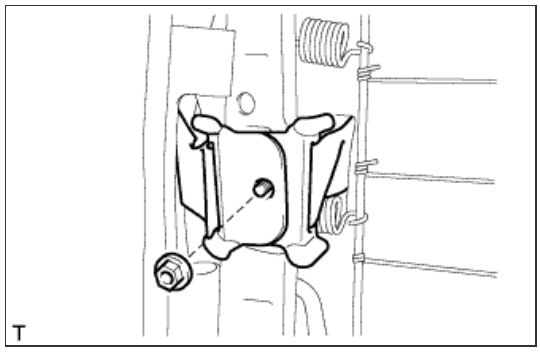
a. Install the lumbar support adjuster with the 2 screws.

b. Connect the lumbar support adjuster connector.

c. Attach the hooks to install the seatback spring.

d. Install the springs.

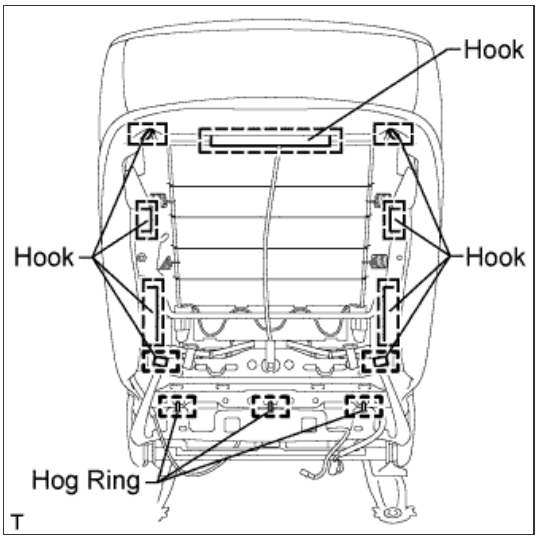
2. INSTALL SEATBACK COVER WITH PAD



a. Install the seatback cover with pad to the seatback frame.

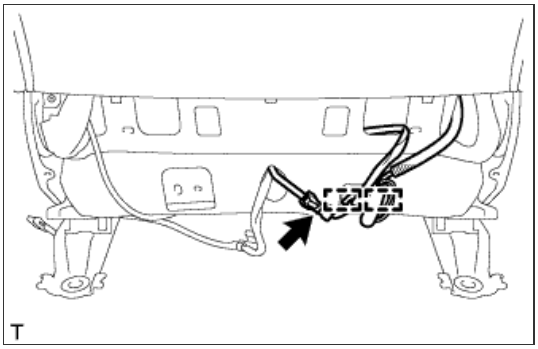
b. Install the seatback cover bracket to the seat frame with the nut.

Torque:
5.0 N*m{ 51 kgf*cm , 44 in.*lbf }



CAUTION:

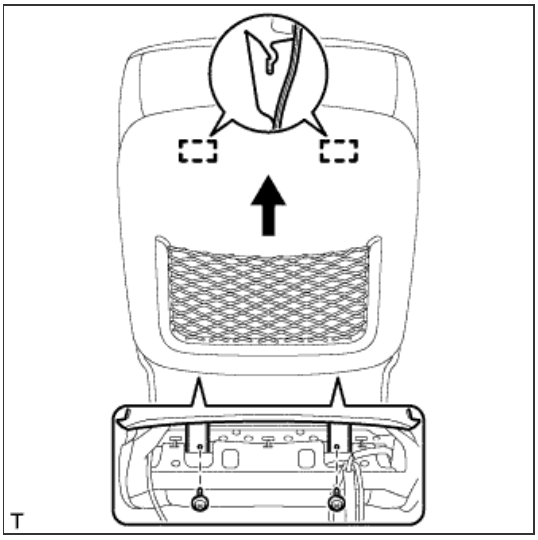
After the seatback trim cover is assembled, make sure the side airbag strap is not twisted.



c. Attach the 9 hooks.

d. Using hog ring pliers, install 3 new hog rings to the seat frame.

e. Connect the seat heater connector and attach the 2 wire harness clamps.

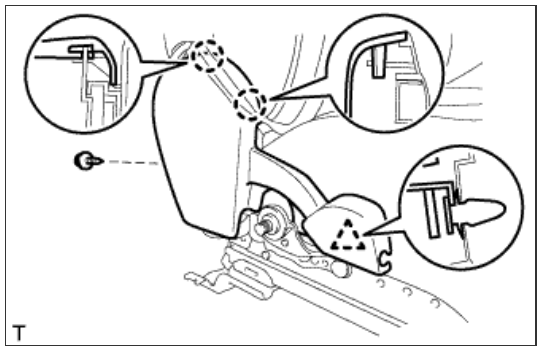


3. INSTALL FRONT SEAT HEADREST SUPPORT

a. Attach the claws to install the 2 headrest supports.

4. INSTALL FRONT SEATBACK BOARD SUB-ASSEMBLY LH

a. Move the seatback board in the direction of the arrow to attach the 2 hooks and install the seatback board.



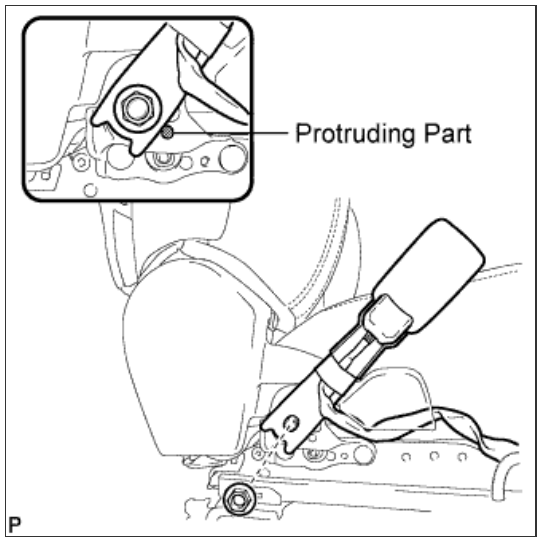
b. Install the 2 screws.

5. INSTALL FRONT INNER SEAT CUSHION SHIELD LH

a. Attach the 2 claws and clip to install the cushion shield.

b. Install the screw.

6. INSTALL FRONT SEAT INNER BELT ASSEMBLY LH



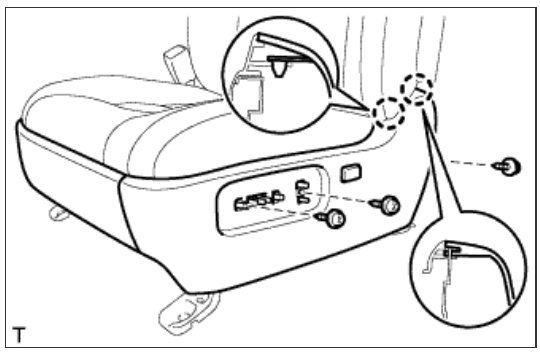
a. Install the front seat inner belt assembly with the nut.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

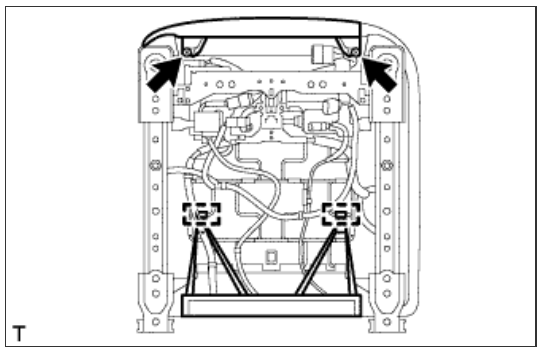
Do not allow the anchor part of the front seat inner belt assembly to overlap the protruding parts of the front seat adjuster.

b. Connect the connectors and attach the clamps.



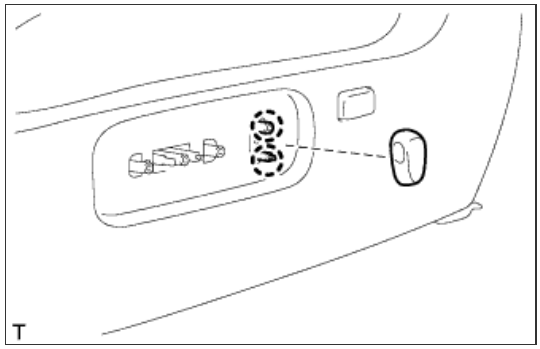
7. INSTALL FRONT SEAT CUSHION SHIELD LH

a. for Driver Side:
Connect the lumbar switch connectors.



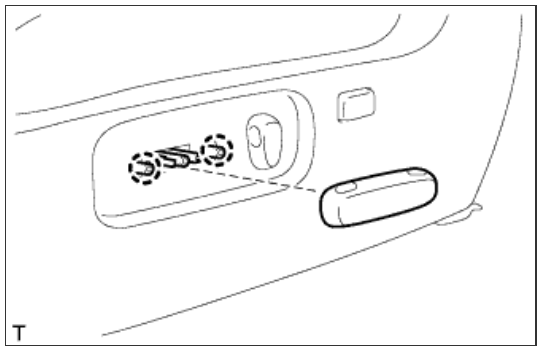
b. Attach the 2 claws to install the cushion shield.

c. Install the 3 screws.



d. Install the 2 screws.

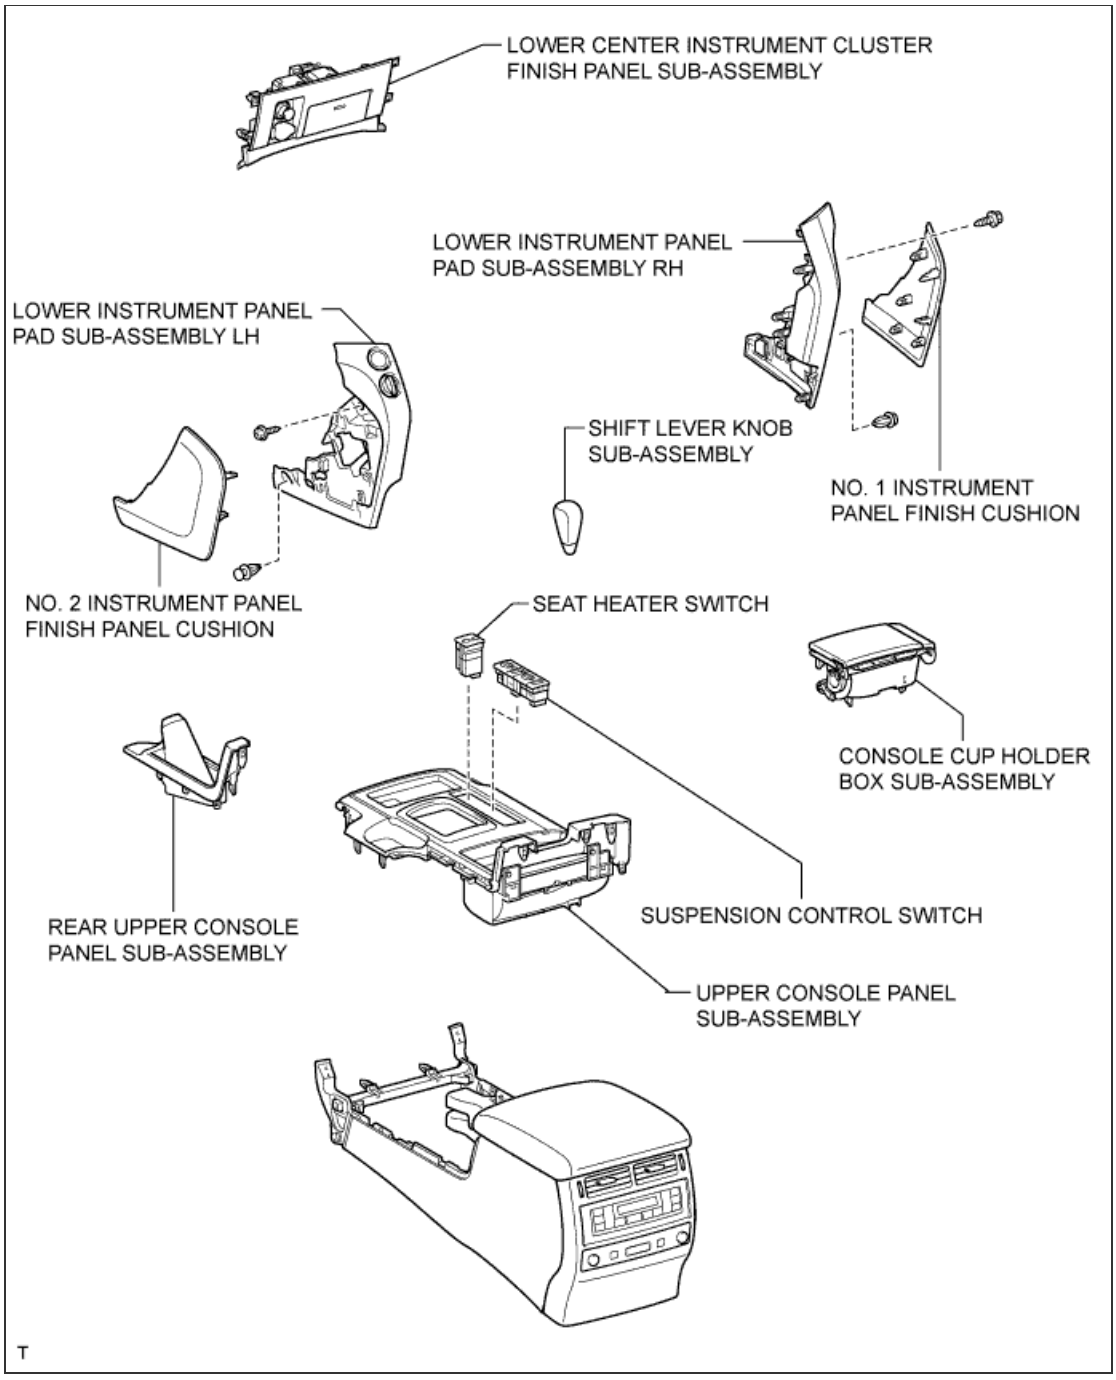
e. Attach the 2 rubber bands to the hooks.



8. INSTALL RECLINING POWER SEAT SWITCH KNOB

a. Attach the 2 claws to install the knob.

9. INSTALL SLIDE AND VERTICAL POWER SEAT SWITCH KNOB



a. Attach the 2 claws to install the knob.

10. INSTALL FRONT SEAT ASSEMBLY LH

a. Install the front seat assembly (Click here).

for Preparation Click here

HINT:

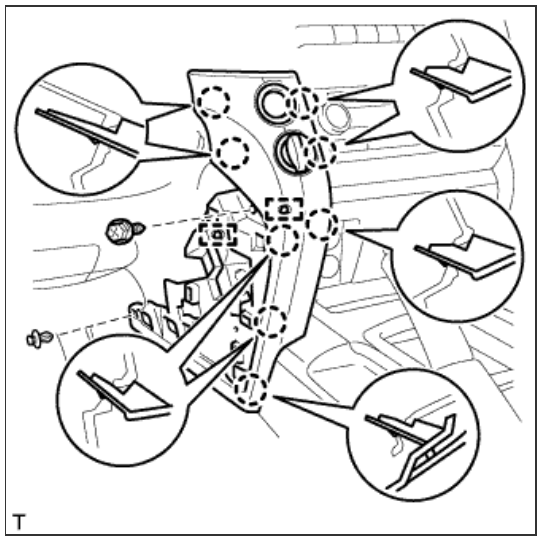
- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. REMOVE NO. 2 INSTRUMENT PANEL FINISH PANEL CUSHION

a. Place protective tape as shown in the illustration.

b. Using a moulding remover, detach the 7 claws and remove the panel cushion.



2. REMOVE LOWER INSTRUMENT PANEL PAD SUB-ASSEMBLY LH

a. Remove the clip.

b. Remove the screw.

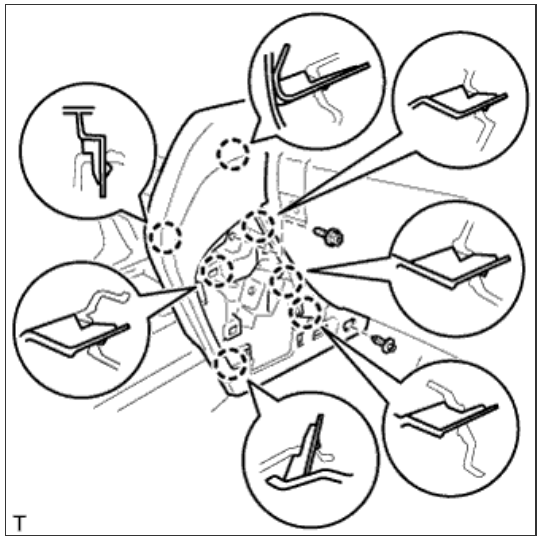
c. Detach the 8 claws.

d. Remove the panel pad and disconnect the connectors and 2 clamps.

3. REMOVE NO. 1 INSTRUMENT PANEL FINISH CUSHION

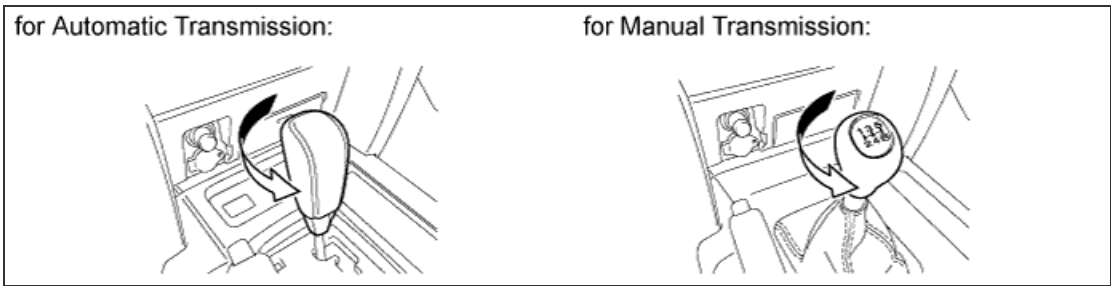
a. Place protective tape as shown in the illustration.

b. Using a moulding remover, detach the 7 claws and remove the panel cushion.



4. REMOVE LOWER INSTRUMENT PANEL PAD SUB-ASSEMBLY RH

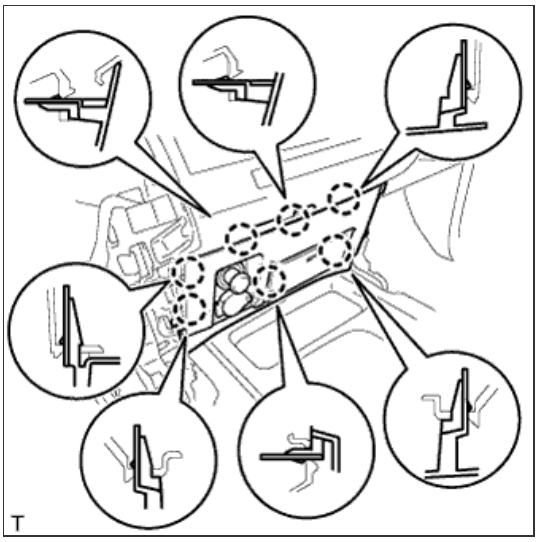
a. Remove the clip.



b. Remove the screw.

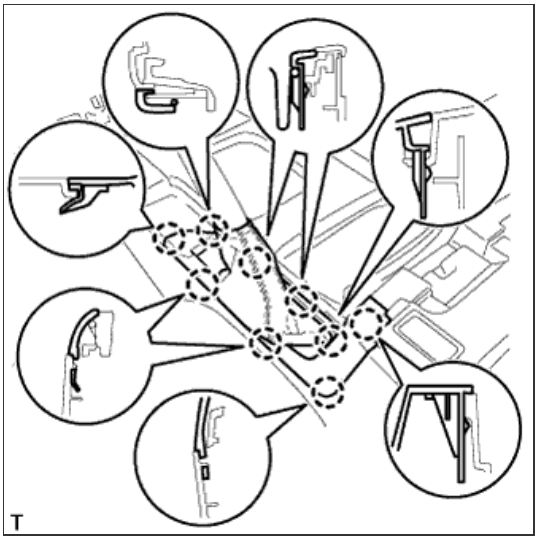
c. Detach the 7 claws and remove the panel.

5. REMOVE SHIFT LEVER KNOB SUB-ASSEMBLY



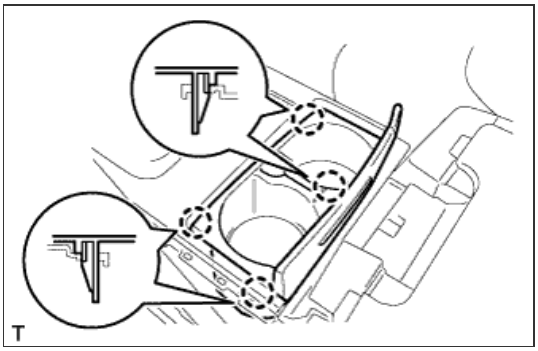
a. Twist the shift lever knob in the direction indicated by the arrow and remove it.

6. REMOVE LOWER CENTER INSTRUMENT CLUSTER FINISH PANEL SUB-ASSEMBLY



a. Detach the 7 claws.

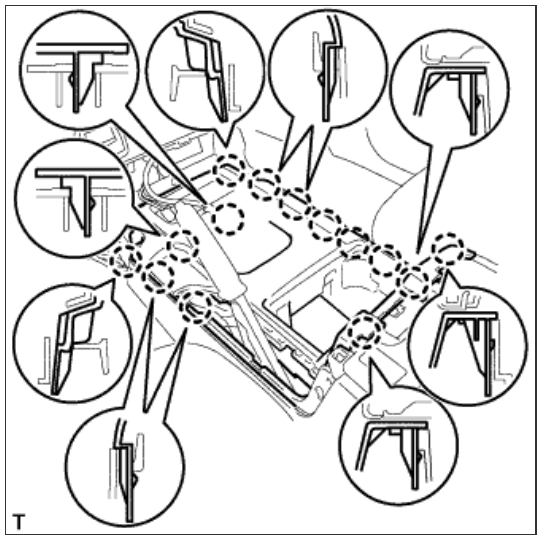
b. Disconnect the connectors and remove the panel.



7. REMOVE REAR UPPER CONSOLE PANEL SUB-ASSEMBLY

a. Detach the 9 claws and remove the panel.

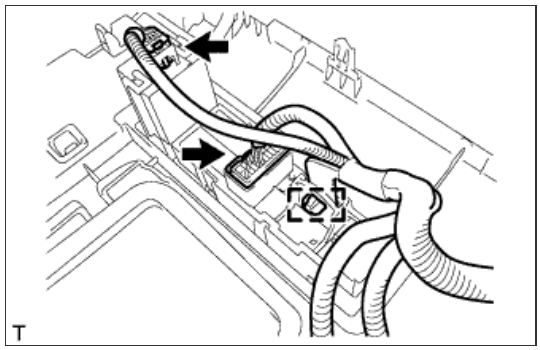
8. REMOVE CONSOLE CUP HOLDER BOX SUB-ASSEMBLY



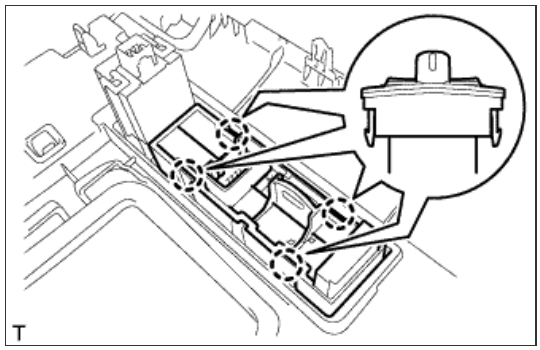
a. Detach the 4 claws and remove the box.

9. REMOVE UPPER CONSOLE PANEL SUB-ASSEMBLY

a. Detach the 14 claws.



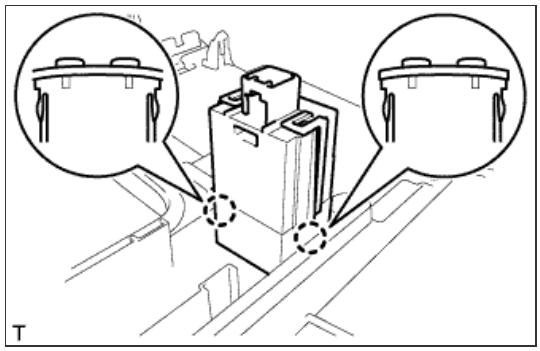
b. Disconnect the connectors and remove the console panel.



10. REMOVE SUSPENSION CONTROL SWITCH

a. Disconnect the 2 connectors.

b. Detach the wire harness clamp.



c. Detach the 4 claws and remove the control switch.

11. REMOVE SEAT HEATER SWITCH

a. Detach the 2 claws and remove the heater switch.

for Preparation Click here

1. INSPECT SEAT HEATER SWITCH

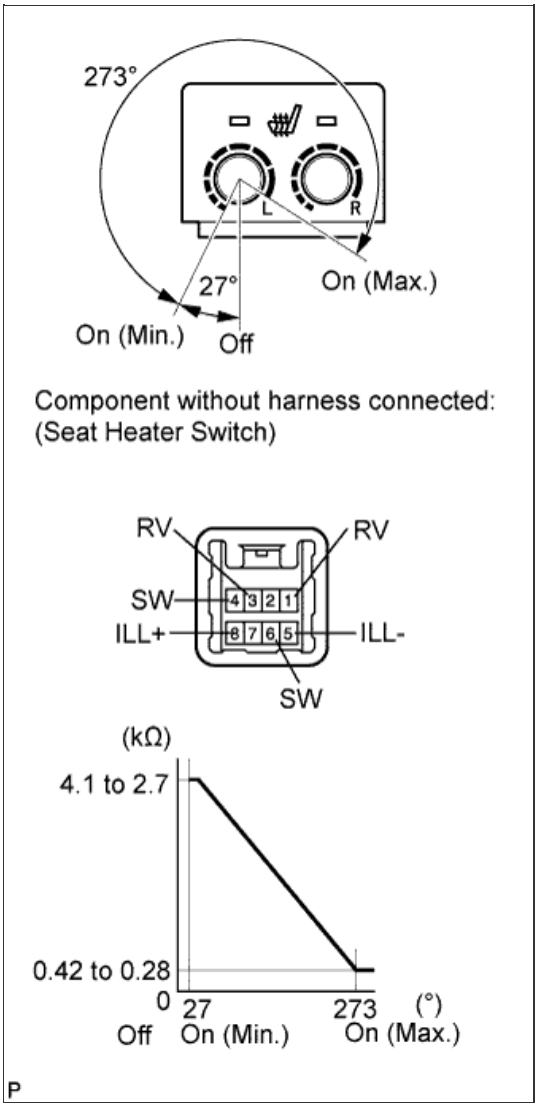
a. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

Tester Connection	Switch Condition	Specified Condition
1 (RV) - 6 (SW) 3 (RV) - 4 (SW)	Switch off	2.7 to 4.1 kΩ
	Switch on (Min)	
	Switch on (Max)	0.28 to 0.42 kΩ

HINT:

As the dial is being turned, the resistance changes gradually.



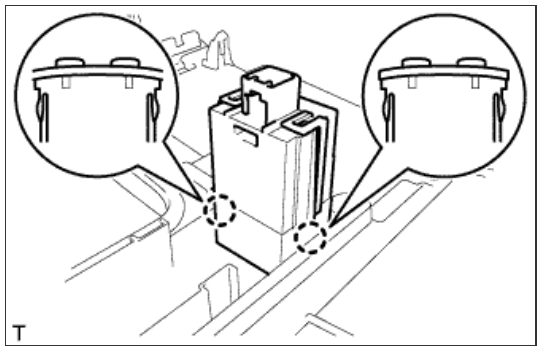
f the result is not as specified, replace the seat heater switch.

b. Apply battery voltage to the switch connector, and check that the seat heater switch illu inates.

OK:

Measure ent Condition	Specified Condition
Battery positive (+) → 8 ( ) Battery negative (-) → 5 (-)	llu inates

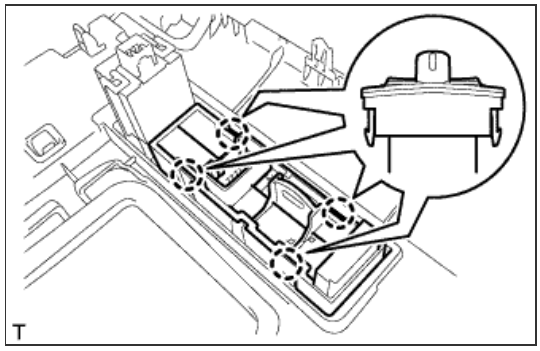
f the result is not as specified, replace the seat heater switch.



for Preparation Click here

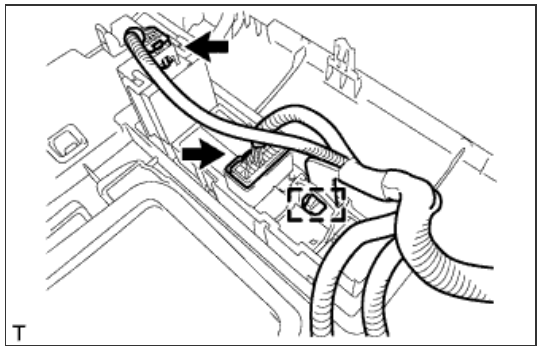
HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**



1. INSTALL SEAT HEATER SWITCH

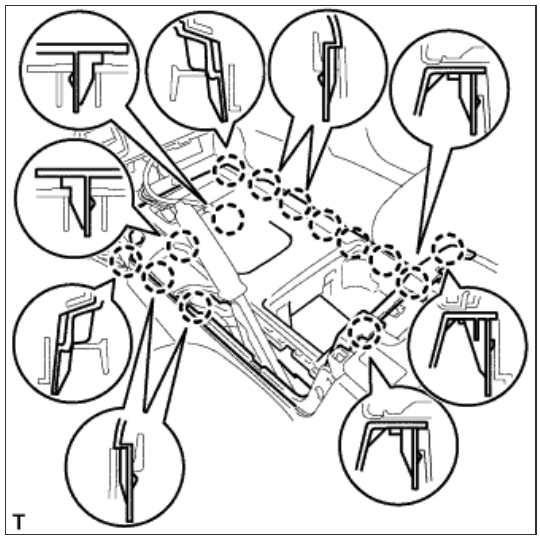
a. Attach the 2 claws to install the heater switch.



2. INSTALL SUSPENSION CONTROL SWITCH

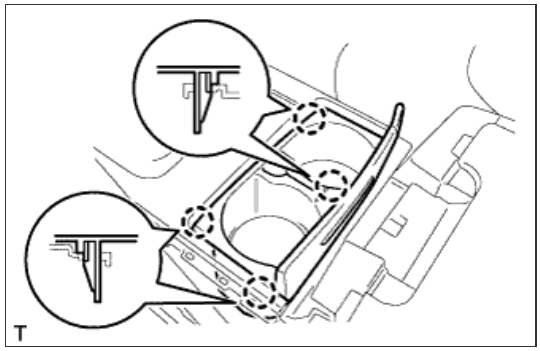
a. Attach the 4 claws to install the control switch.

b. Connect the 2 connectors.



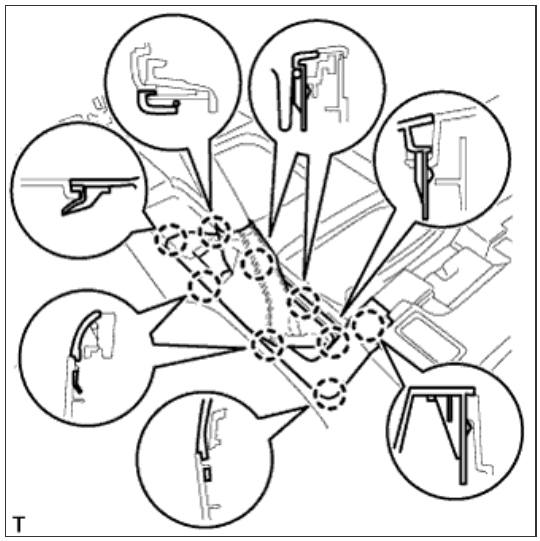
c. Attach the wire harness clamp.

3. INSTALL UPPER CONSOLE PANEL SUB-ASSEMBLY



a. Connect the connectors.

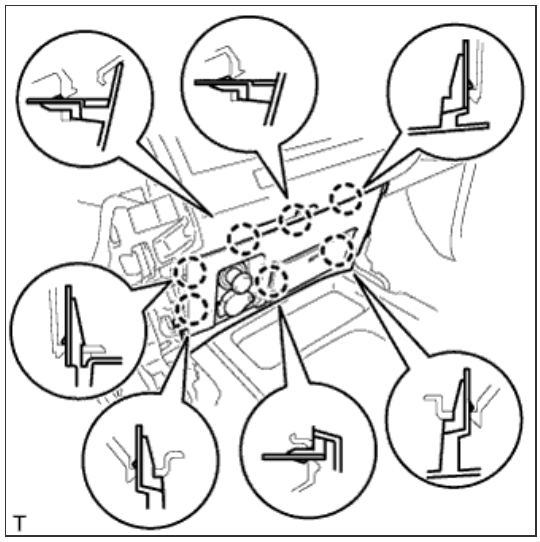
b. Attach the 14 claws to install the console panel.



4. INSTALL CONSOLE CUP HOLDER BOX SUB-ASSEMBLY

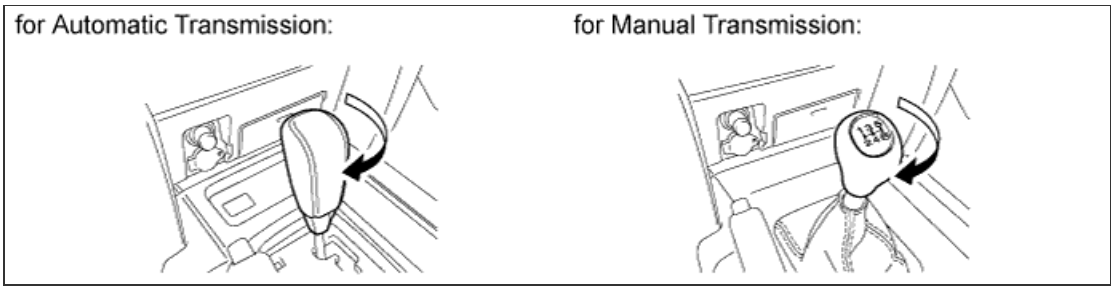
a. Attach the 4 claws to install the box.

5. INSTALL REAR UPPER CONSOLE PANEL SUB-ASSEMBLY



a. Attach the 9 claws to install the panel.

6. INSTALL LOWER CENTER INSTRUMENT CLUSTER FINISH PANEL SUB-ASSEMBLY

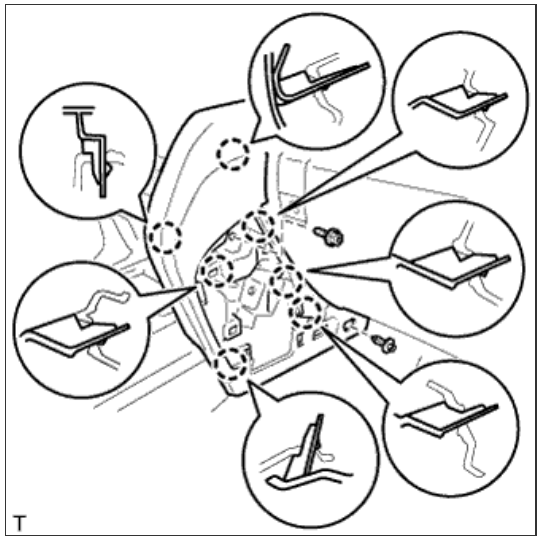


a. Connect the connectors.

b. Attach the 7 claws to install the panel.

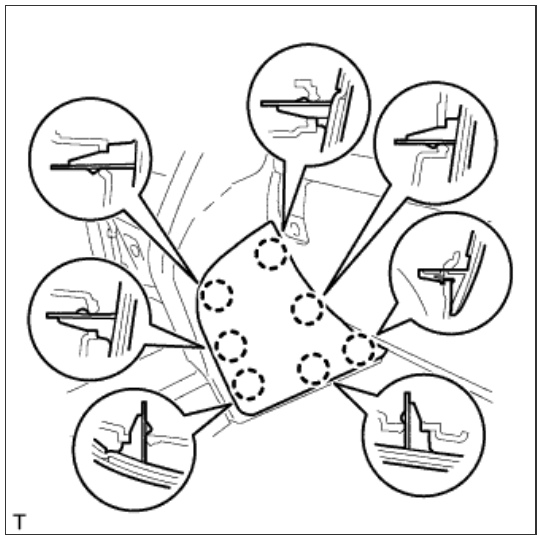
7. INSTALL SHIFT LEVER KNOB SUB-ASSEMBLY

a. Install the shift lever knob and twist it in the direction indicated by the arrow.



8. INSTALL LOWER INSTRUMENT PANEL PAD SUB-ASSEMBLY RH

a. Attach the 7 claws to install the panel pad.

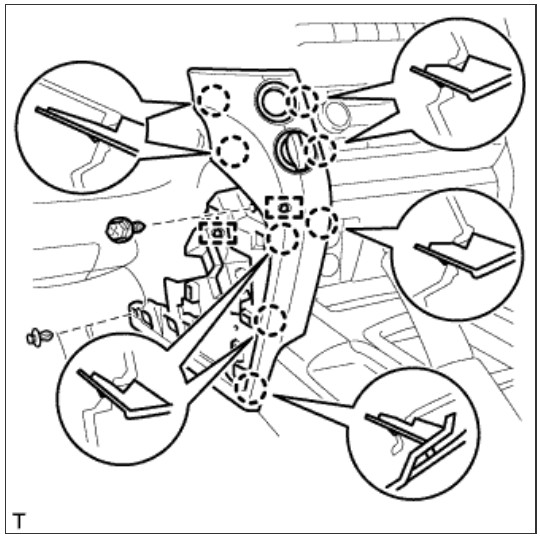


b. Install the screw.

c. Install the clip.

9. INSTALL NO. 1 INSTRUMENT PANEL FINISH CUSHION

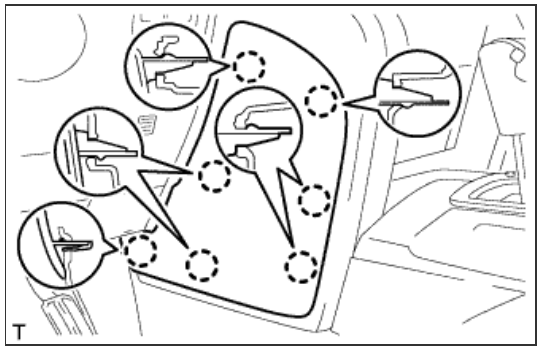
a. Attach the 7 claws to install the panel cushion.



10. INSTALL LOWER INSTRUMENT PANEL PAD SUB-ASSEMBLY LH

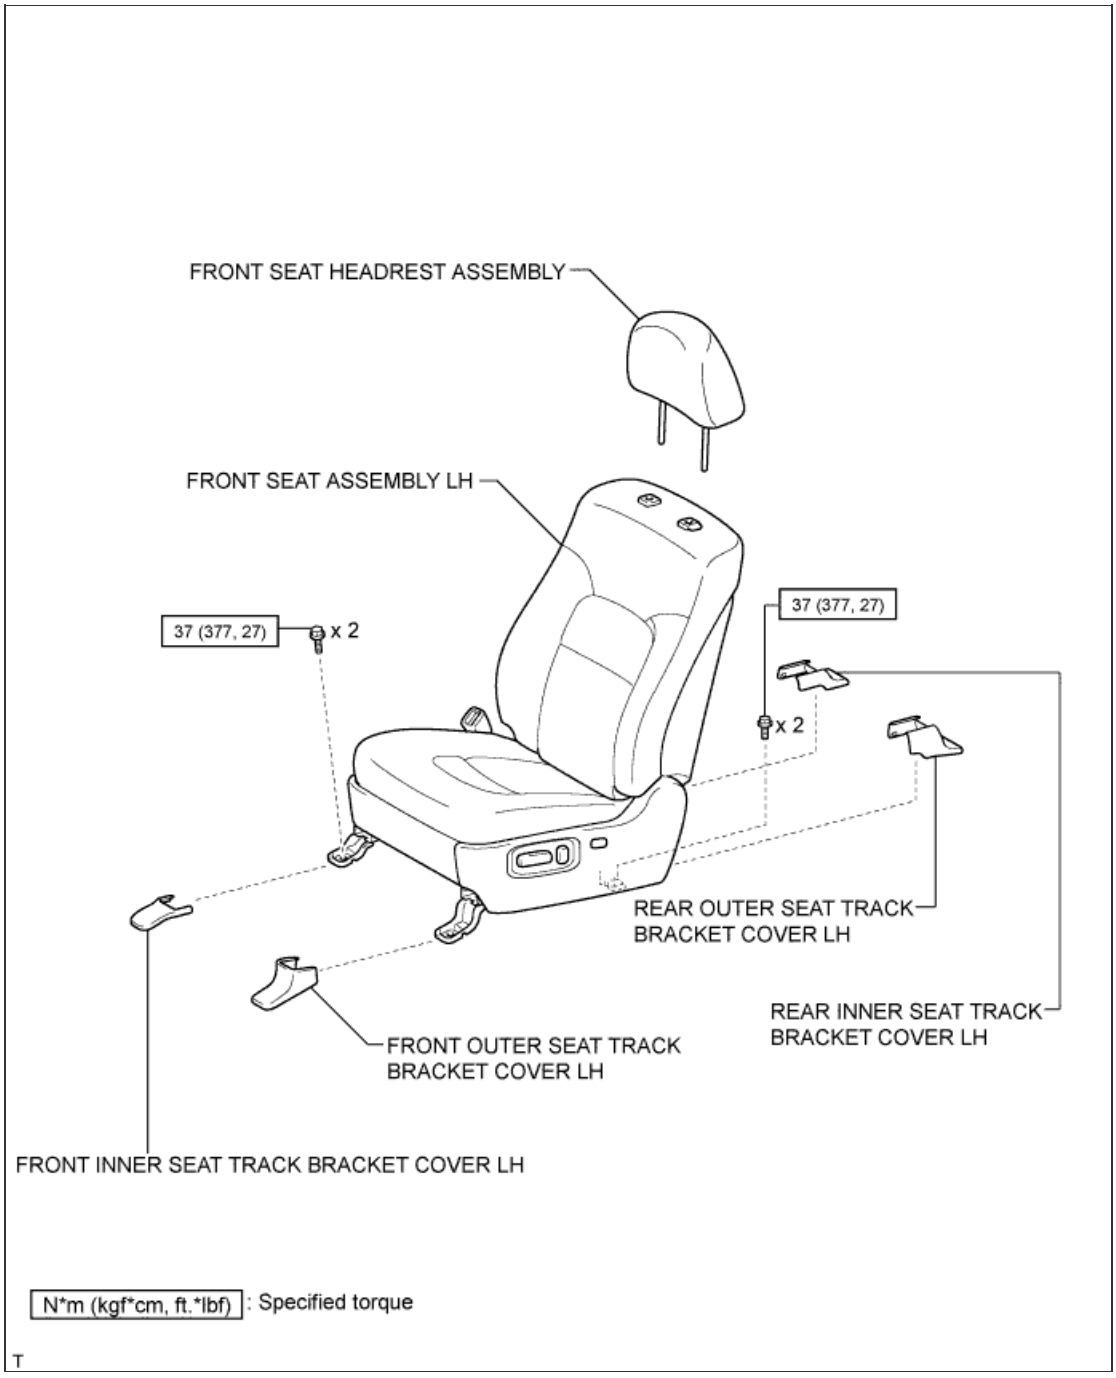
a. Connect the connectors and 2 clamps.

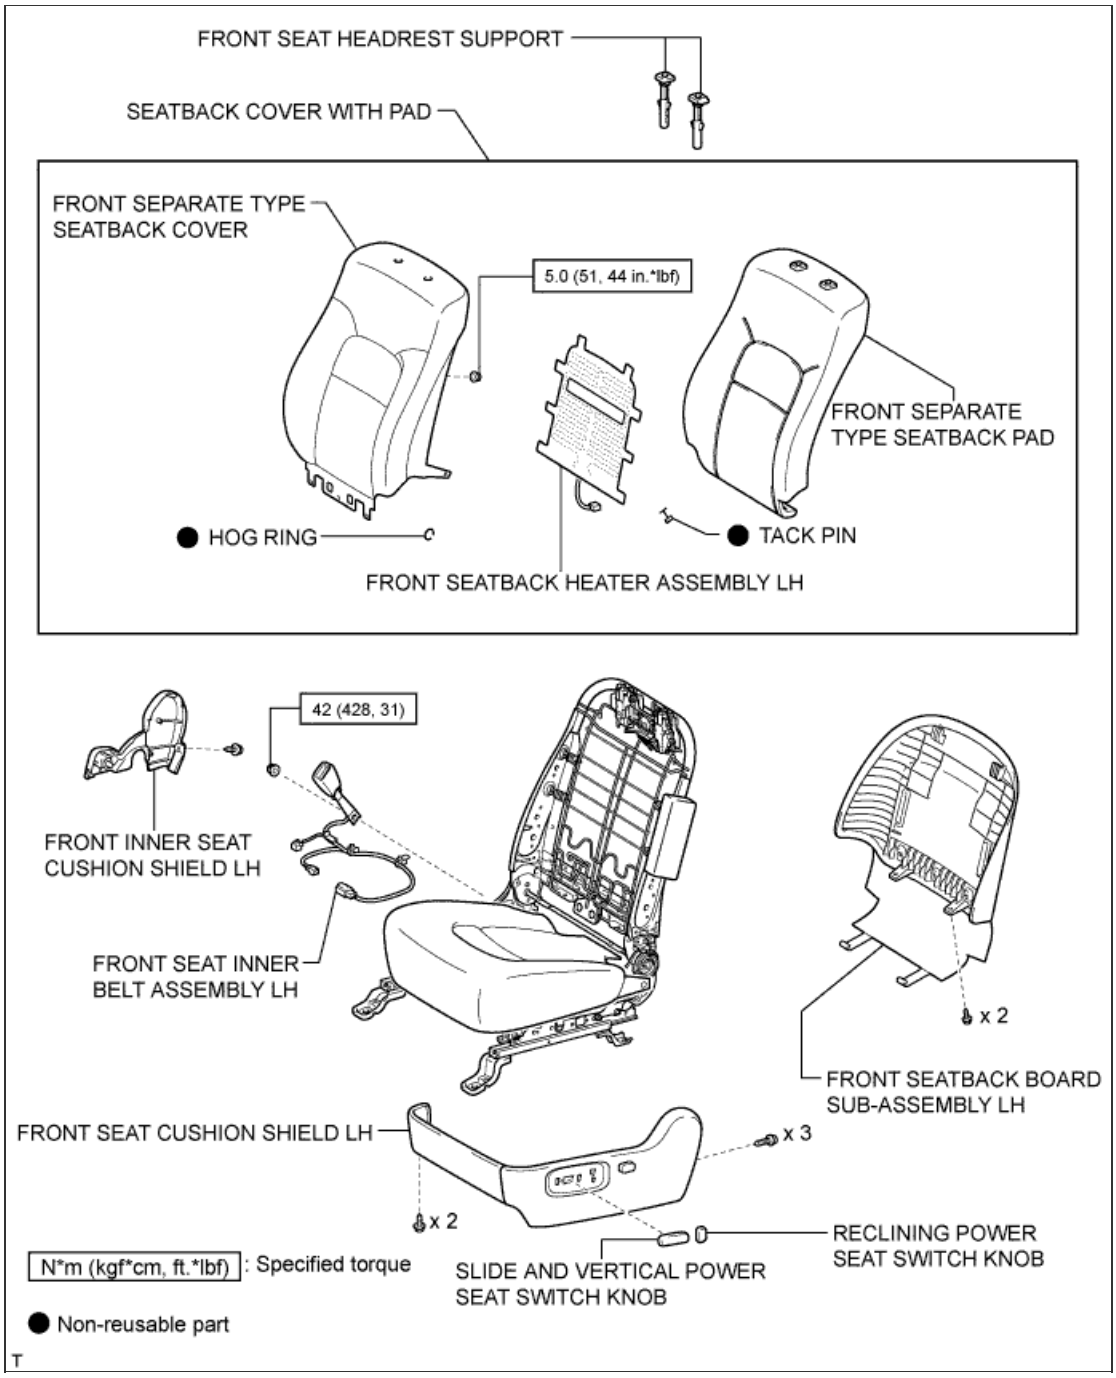
b. Attach the 8 claws to install the panel pad.



c. Install the screw.

d. Install the clip.





11. INSTALL NO. 2 INSTRUMENT PANEL FINISH PANEL CUSHION

a. Attach the 7 claws to install the panel cushion.

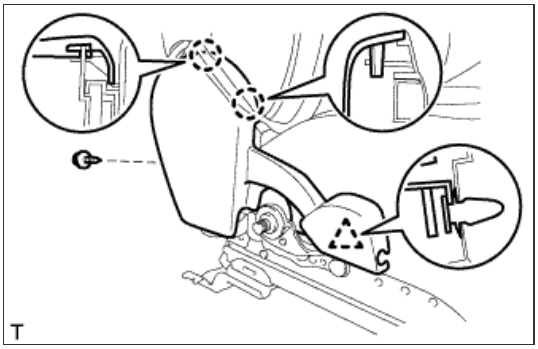
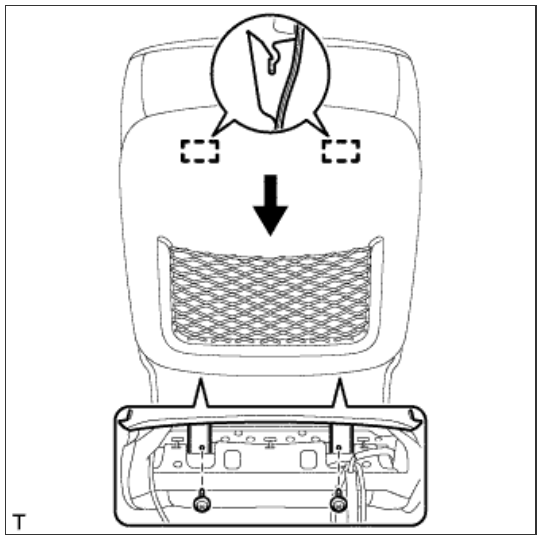
a. Disconnect the connectors and detach the clamps.



b. Remove the nut and front seat inner belt assembly.

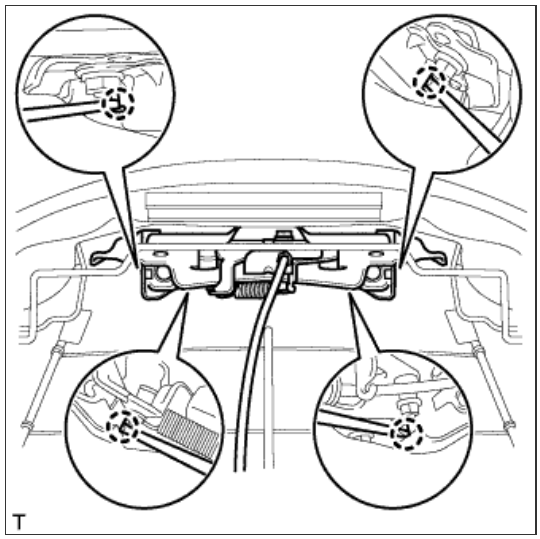
6. REMOVE FRONT INNER SEAT CUSHION SHIELD LH

a. Remove the screw.



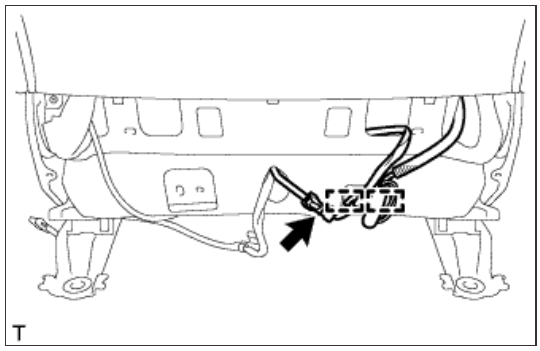
b. Detach the 2 claws and clip, and then remove the cushion shield.

7. REMOVE FRONT SEATBACK BOARD SUB-ASSEMBLY LH



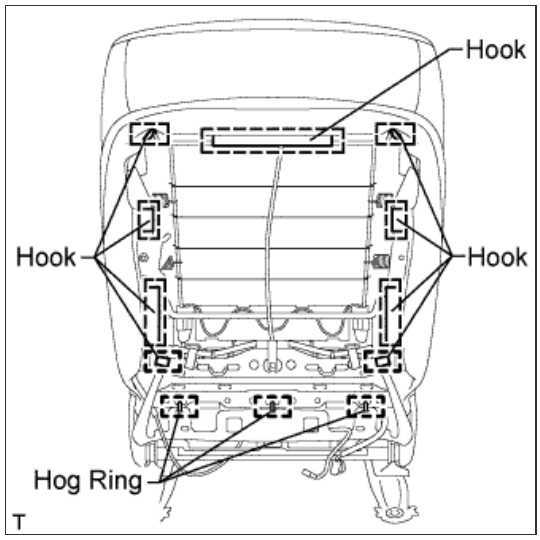
a. Remove the 2 screws.

b. Move the seatback board in the direction of the arrow to detach the 2 hooks and remove the seatback board.



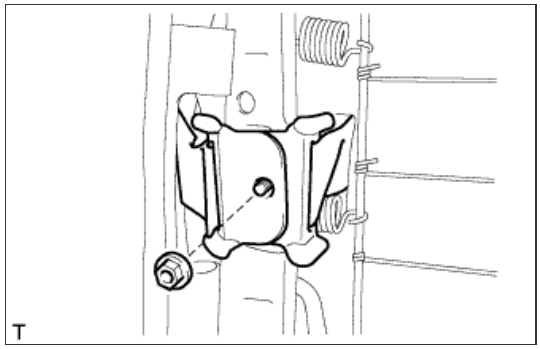
8. REMOVE FRONT SEAT HEADREST SUPPORT

a. Using a screwdriver, detach the 4 claws and remove the 2 headrest supports.

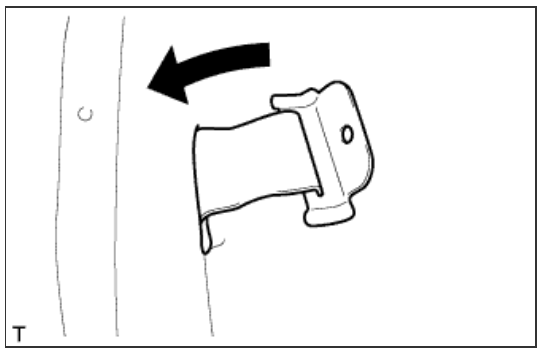


9. REMOVE SEATBACK COVER WITH PAD

a. Disconnect the seat heater connector and detach the 2 wire harness clamps.

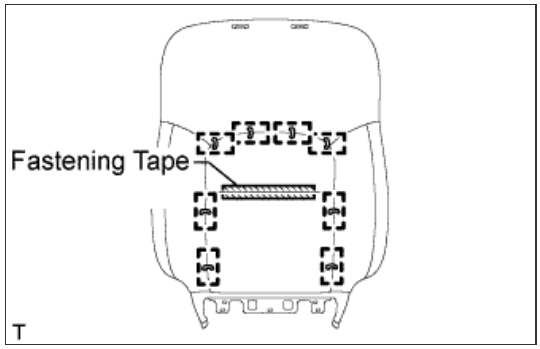


b. Remove the 3 hog rings and detach the 9 hooks.



c. Remove the nut and seatback cover bracket from the seat frame.

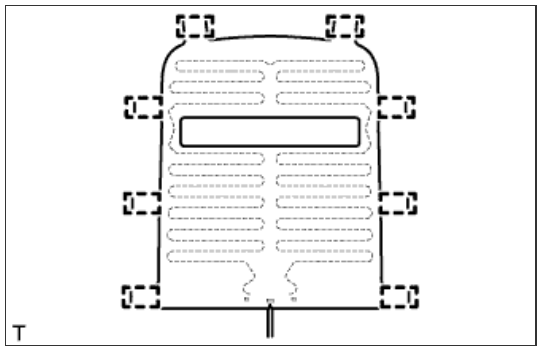
d. Remove the seatback cover with pad.



10. REMOVE FRONT SEPARATE TYPE SEATBACK COVER

a. Disconnect the seatback cover bracket from the seatback pad.

b. Remove the hog rings.



c. Detach the fastening tape and remove the seatback cover.

11. REMOVE FRONT SEATBACK HEATER ASSEMBLY LH

a. Cut off the tack pins which fasten the seatback heater to the seatback cover, and

a. Cut off the tack pins which fasten the seatback heater to the seatback cover, and then remove the seatback heater from the seatback cover.

for Preparation Click here

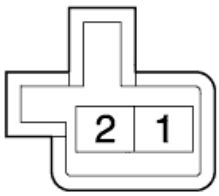
1. INSPECT FRONT SEATBACK HEATER ASSE BLY LH

a. Check the seatback heater.



i. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

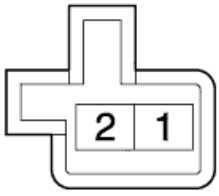
Tester Connection	Condition	Specified Condition
1 - 2	Seatback heater temperature 25 C ( )	6.6 to 8.0 Ω

If the result is not as specified, replace the seatback heater assembly.

Component without harness connected:
(Front Seatback Heater)

2. INSPECT FRONT SEATBACK HEATER ASSE BLY RH

a. Check the seatback heater.



i. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

Tester Connection	Condition	Specified Condition
1 - 2	Seatback heater temperature 25 C ( )	6.6 to 8.0 Ω

If the result is not as specified, replace the seatback heater assembly.

Component without harness connected:
(Front Seatback Heater)

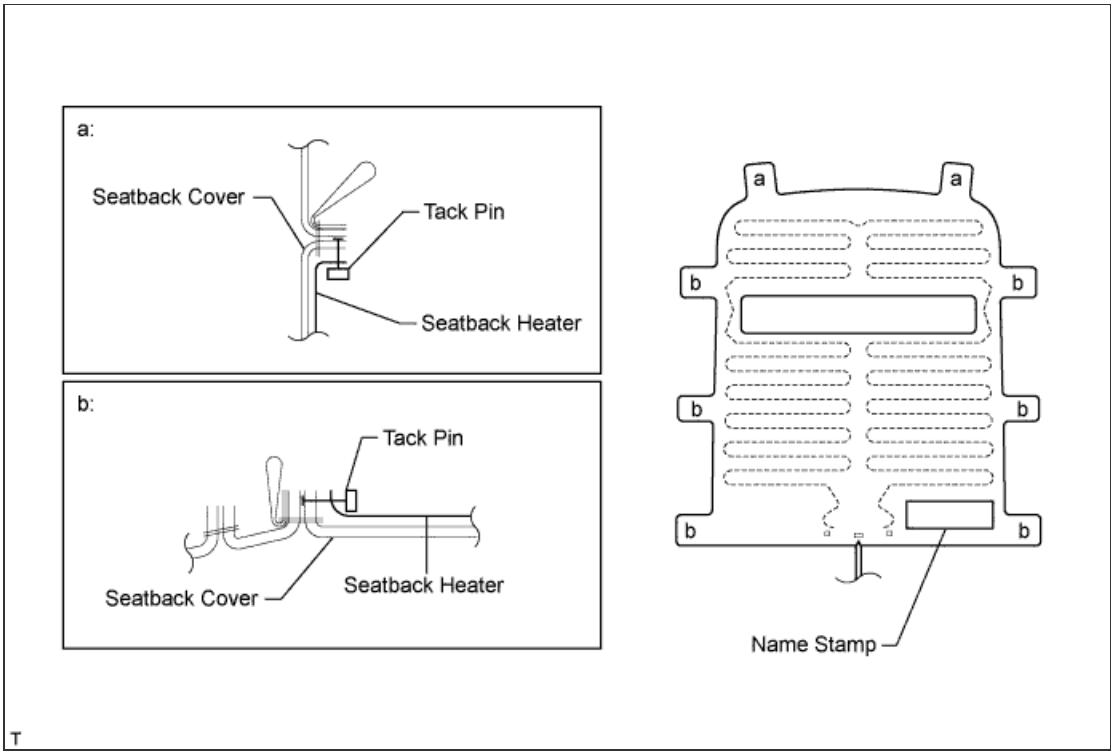
CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.



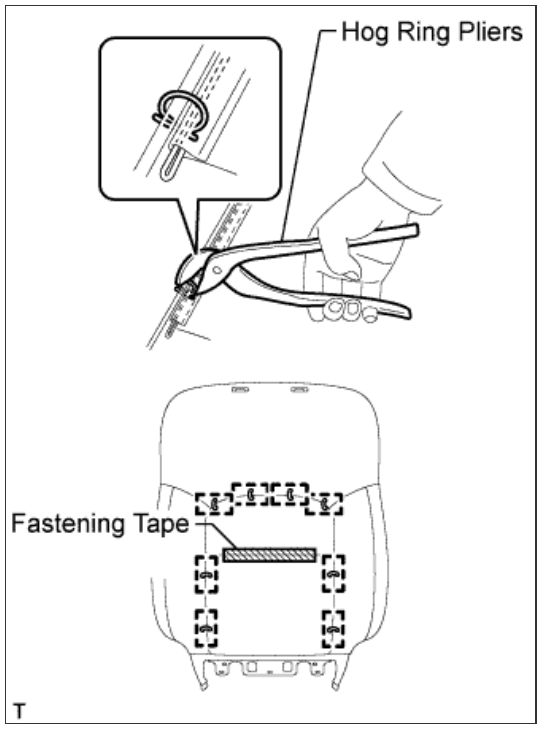
HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL FRONT SEATBACK HEATER ASSEMBLY LH

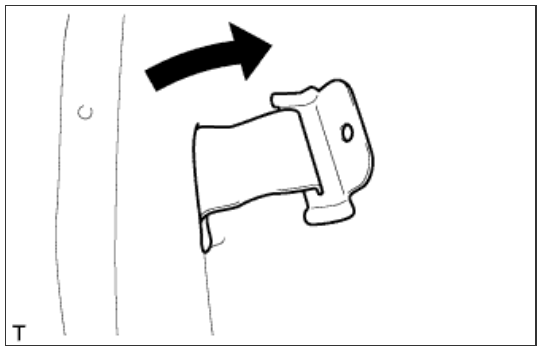
a. Set the seatback heater with the name stamp side facing the seatback cover.

b. Install the seatback heater with new tack pins.



2. INSTALL FRONT SEPARATE TYPE SEATBACK COVER

a. Attach the fastening tape to install the seatback cover with new hog rings.



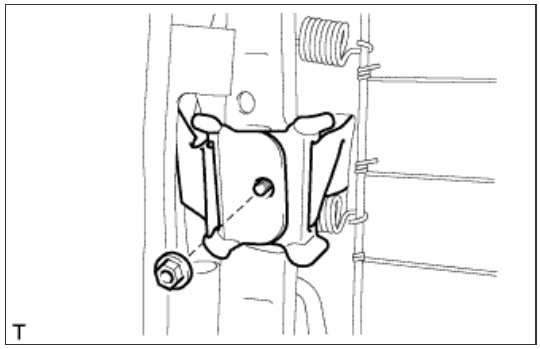
b. Using hog ring pliers, install the seatback cover

NOTICE:

- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**

c. Connect the seatback cover bracket to the seatback pad.

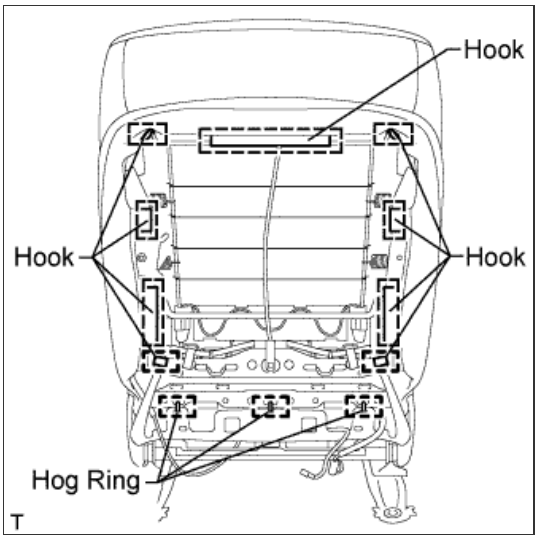
3. INSTALL SEATBACK COVER WITH PAD



a. Install the seatback cover with pad to the seatback frame.

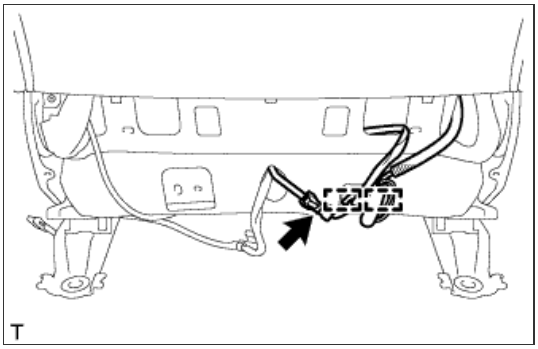
b. Install the seatback cover bracket to the seat frame with the nut.

Torque:
5.0 N m{ 51 kgf cm , 44 in. lbf



CAUTION:

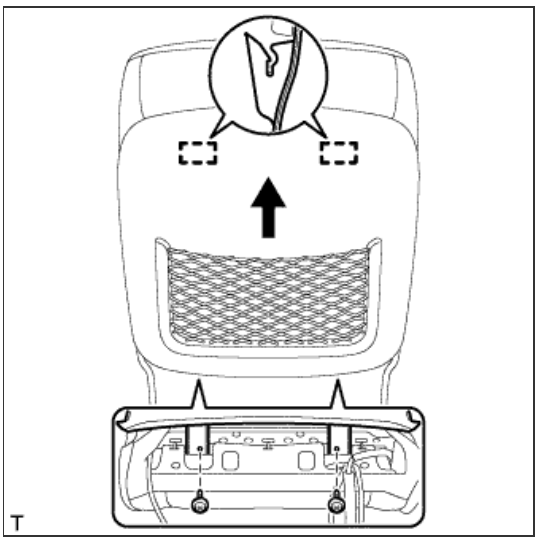
After the seatback trim cover is assembled, make sure the side airbag strap is not twisted.



c. Attach the 9 hooks.

d. Using hog ring pliers, install 3 new hog rings to the seat frame.

e. Connect the seat heater connector and attach the 2 wire harness clamps.

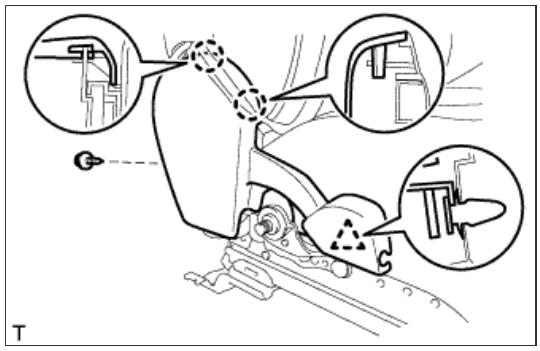


4. INSTALL FRONT SEAT HEADREST SUPPORT

a. Attach the 4 claws to install the 2 headrest supports.

5. INSTALL FRONT SEATBACK BOARD SUB ASSEMBLY LH

a. Move the seatback board in the direction of the arrow to attach the 2 hooks and install the seatback board.



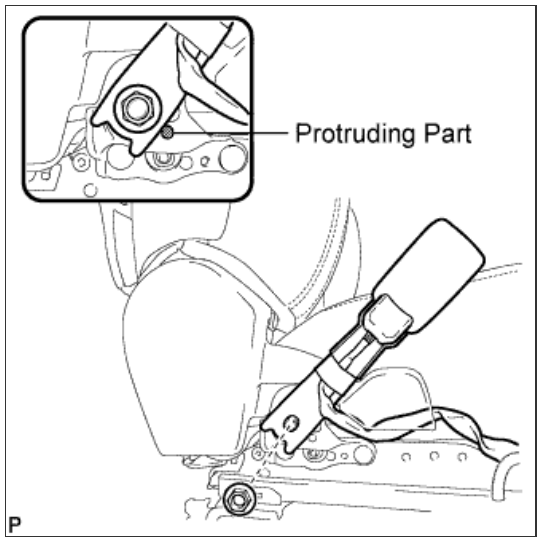
b. Install the 2 screws.

6. INSTALL FRONT INNER SEAT CUSHION SHIELD LH

a. Attach the 2 claws and clip to install the cushion shield.

b. Install the screw.

. INSTALL FRONT SEAT INNER BELT ASSEMBLY LH

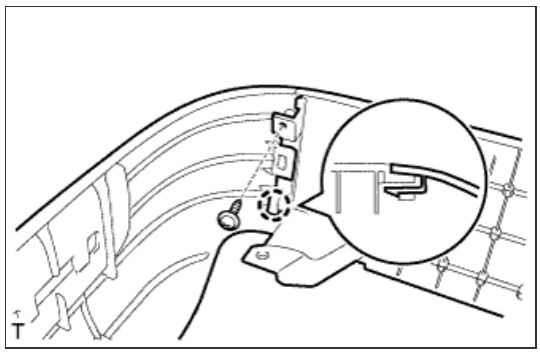


a. Install the front seat inner belt assembly with the nut.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

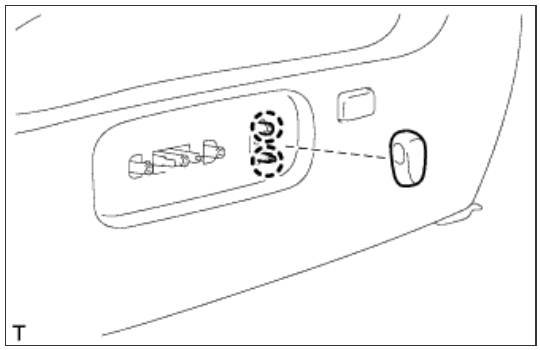
NOTICE:

Do not allow the anchor part of the front seat inner belt assembly to overlap the protruding parts of the front seat adjuster.



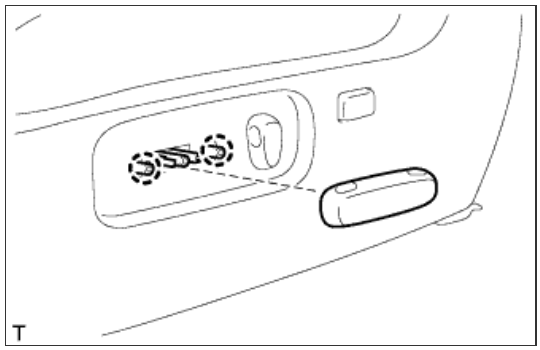
b. Connect the connectors and attach the clamps.

8. INSTALL FRONT SEAT CUSHION SHIELD LH



a. Attach the claw to install the cushion shield.

b. Install the screw.



9. INSTALL RECLINING POWER SEAT SWITCH KNOB

a. Attach the 2 claws to install the knob.

10. INSTALL SLIDE AND VERTICAL POWER SEAT SWITCH KNOB

a. Attach the 2 claws to install the knob.

11. INSTALL FRONT SEAT ASSEMBLY LH

a. Install the front seat assembly (Click here).

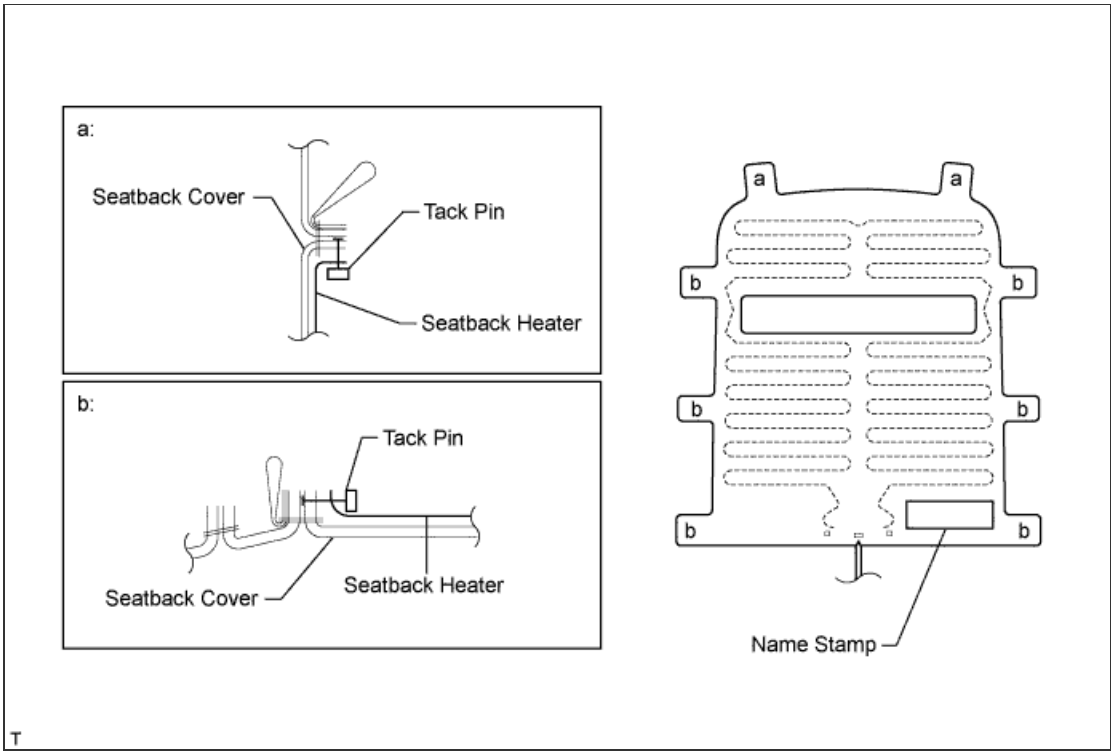
CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.



HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

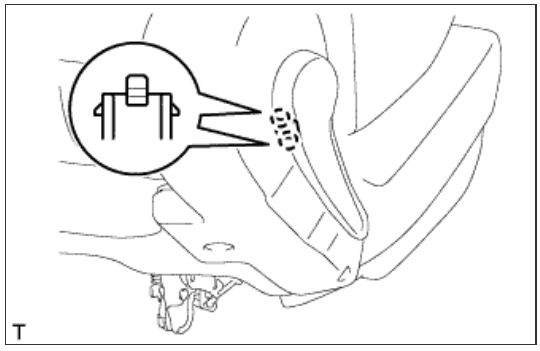
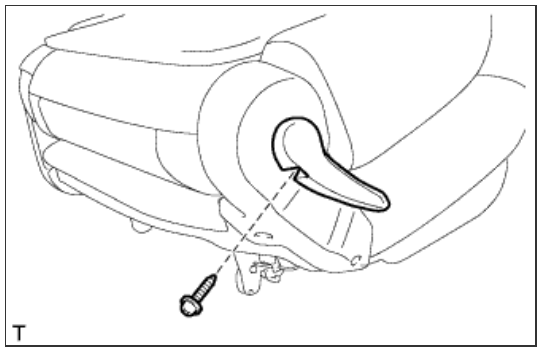
1. REMOVE REAR NO. 1 SEAT ASSEMBLY RH



a. Remove the rear No. 1 seat assembly (Click here).

2. REMOVE SEAT ADJUSTER BOLT COVER

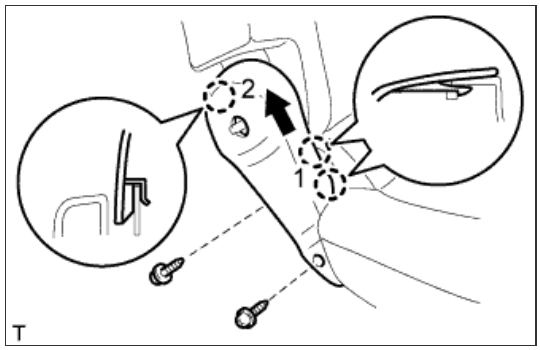
a. Using a screwdriver, detach the 2 claws and remove the cover.



HINT:

Tape the screwdriver tip before use.

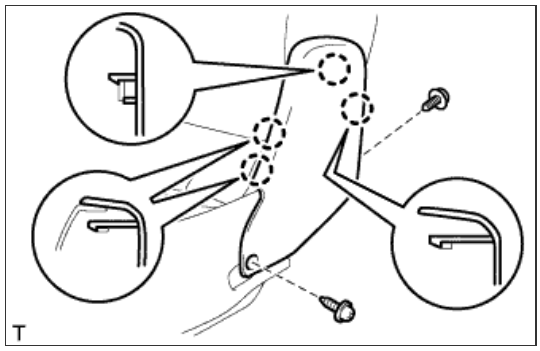
3. REMOVE RECLINING ADJUSTER RELEASE HANDLE RH



a. Remove the screw and release handle.

4. REMOVE REAR NO. 1 SEAT RECLINING COVER RH

a. Remove the 2 screws.

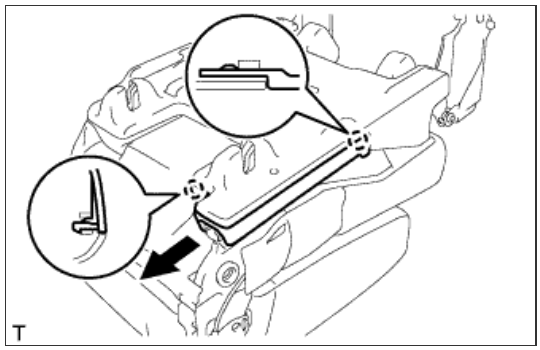


b. Detach the 3 claws in the order shown in the illustration, and then remove the cover.

5. REMOVE REAR NO. 1 SEAT RECLINING COVER LH

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.

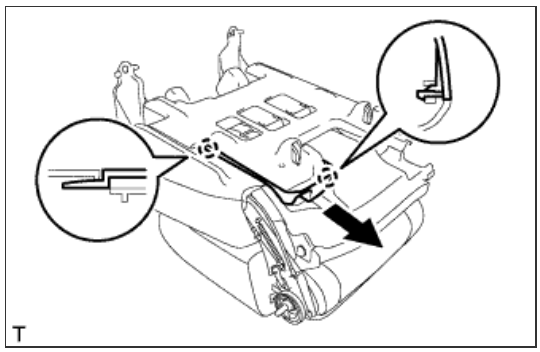


6. REMOVE UPPER SEAT TRACK RAIL COVER LH

a. Using a screwdriver, detach the 2 claws and remove the cover.

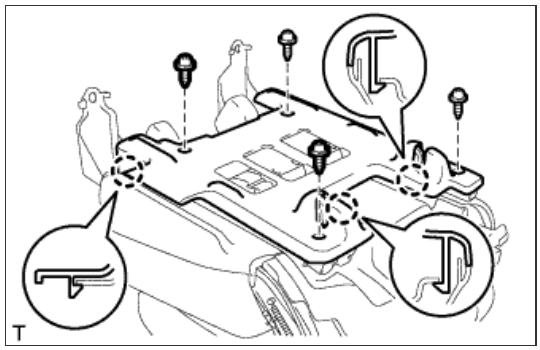
HINT:

Tape the screwdriver tip before use.



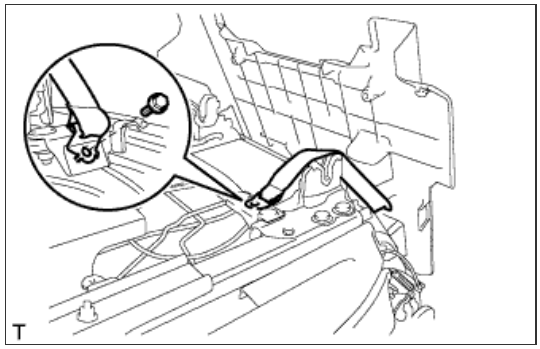
7. REMOVE UPPER SEAT TRACK RAIL COVER RH

a. Using a screwdriver, detach the 2 claws and remove the cover.



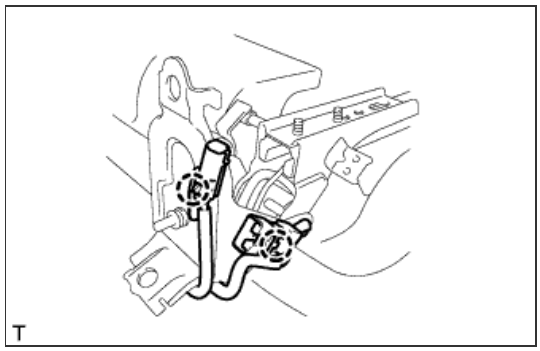
HINT:

Tape the screwdriver tip before use.



8. REMOVE REAR NO. 2 SEAT LEG SIDE COVER

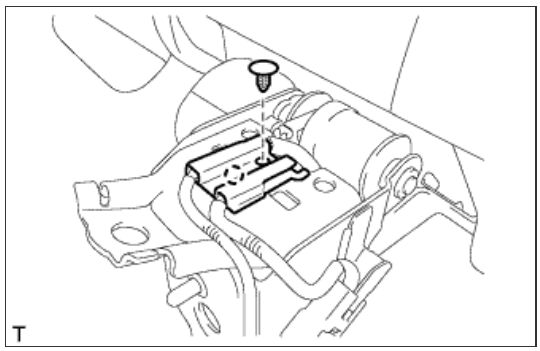
a. Remove the 4 screws and detach the 3 claws.



b. Remove the bolt that is securing the fold seat stopper band and remove the seat leg side cover together with the fold seat stopper band.

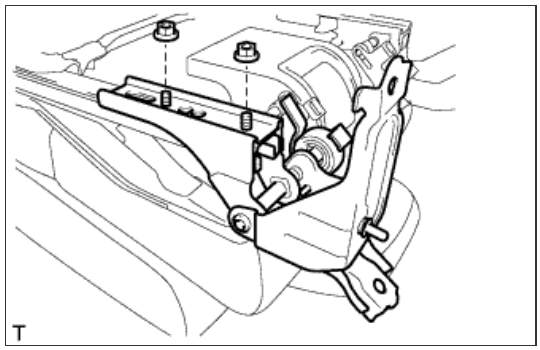
9. REMOVE REAR NO. 2 SEAT PROTECTOR

a. w/ Rear Seat Side Airbag:
Detach the claw and remove the wire harness connector.



b. w/ Seat Heater System:
Detach the claw and remove the wire harness connector.

c. Using a clip remover, remove the clip.

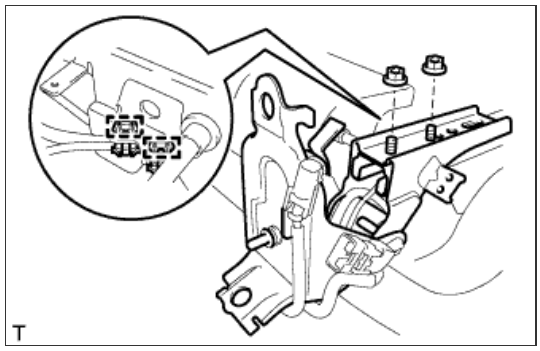


d. Detach the claw and remove the seat protector from the seat hinge.

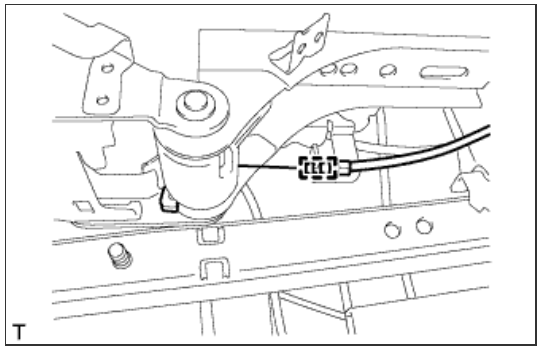
e. Detach the 2 claws, open the protector and remove the wire harness.

10. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH

a. Remove the 2 nuts and hinge.



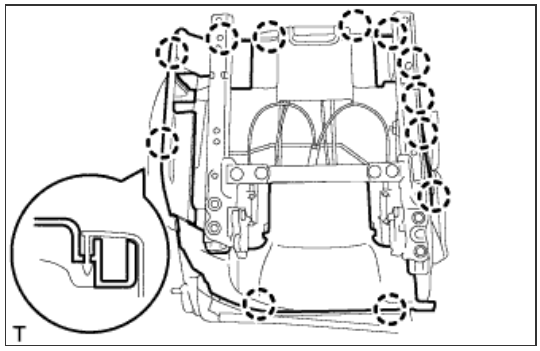
11. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH



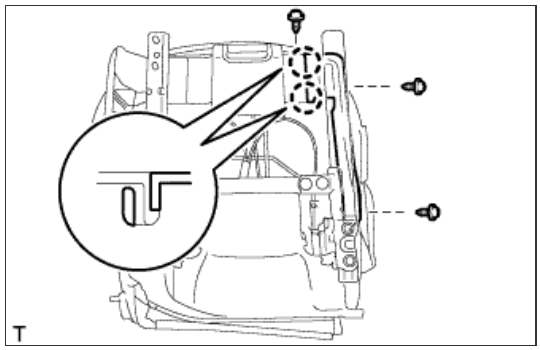
a. w/ Rear Seat Side Airbag:
Detach the wire harness clamp.

b. w/ Seat Heater System:
Detach the wire harness clamp.

c. Remove the 2 nuts and hinge.



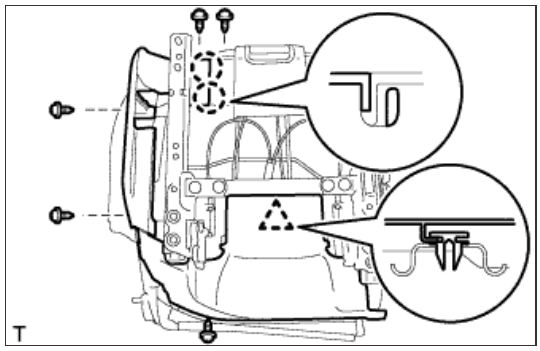
d. Detach the cable clamp and disconnect the cable.



12. REMOVE REAR SEAT COVER

a. Detach the 12 claws.

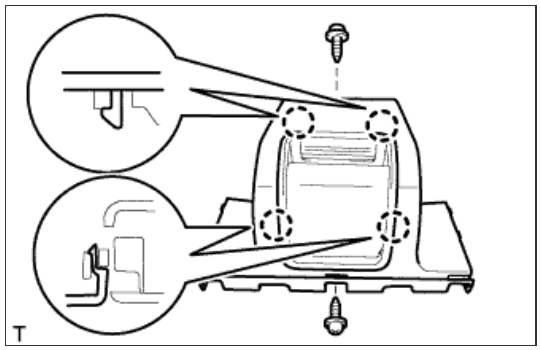
b. Remove the 3 screws.



c. Detach the 2 claws and remove the cover.

13. REMOVE REAR UNDER SIDE COVER LH

a. Remove the 5 screws.



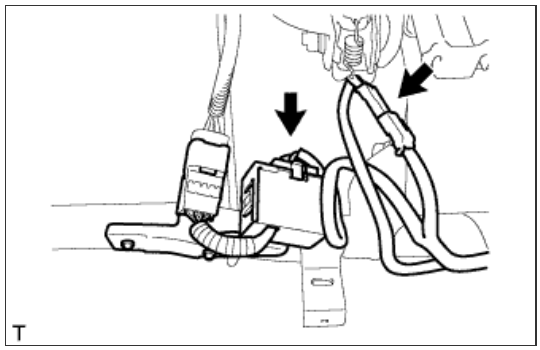
b. Detach the clip and 2 claws, and remove the cover.

14. REMOVE REAR SEAT UNDER TRAY COVER RH

a. Remove the 2 screws.

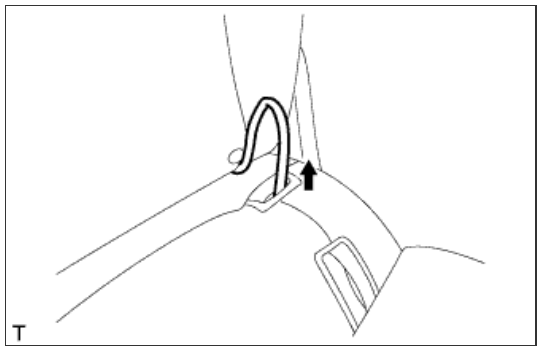
b. Detach the 4 claws and remove the cover.

15. REMOVE SEAT CUSHION COVER WITH PAD



a. w/ Rear Seat Side Airbag:

i. Detach the side airbag wire harness clamps.

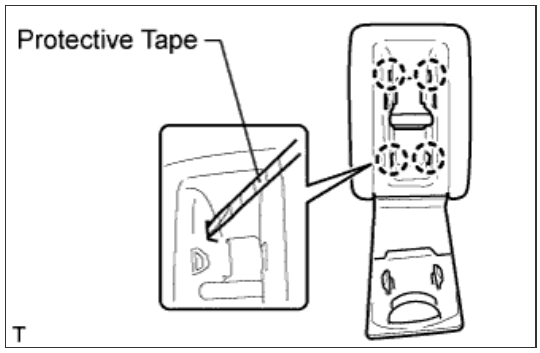


ii. Remove the side airbag wire harness through the hole in the seat cushion.

b. w/ Seat Heater System:

i. Disconnect the 2 seat heater connectors.

ii. Remove the seatback heater wire harness through the hole in the seat cushion.

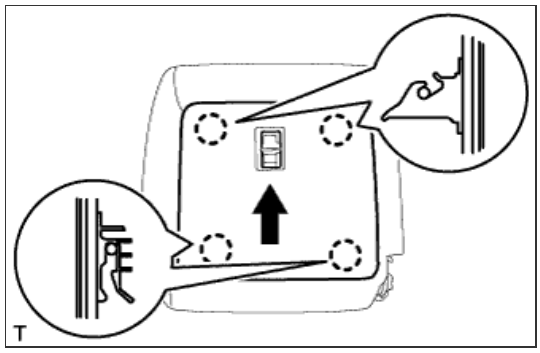


c. Remove the seat cushion cover with pad.

16. REMOVE REAR SEATBACK COVER

a. Using a screwdriver, detach the 4 claws and remove the cover.

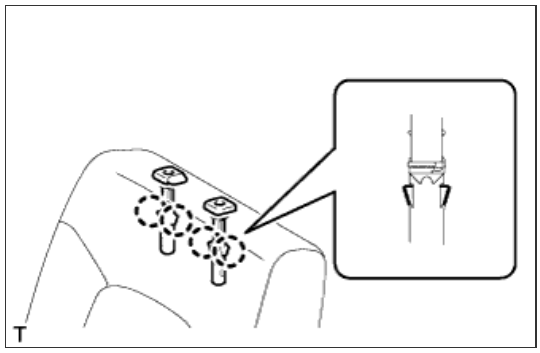
HINT:



Tape the screwdriver tip before use.

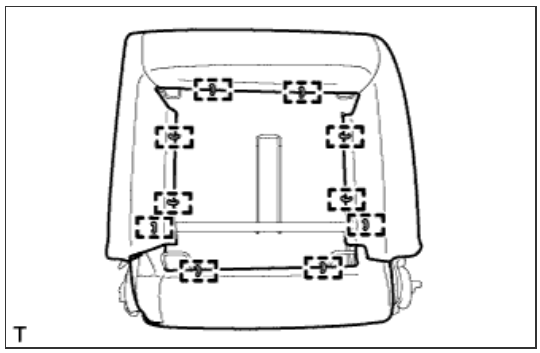
17. REMOVE REAR SEATBACK BOARD SUB-ASSEMBLY RH

a. Detach the 2 claws on the top of the board.



b. Pull up the board to detach the 2 claws on the bottom of the board and remove it.

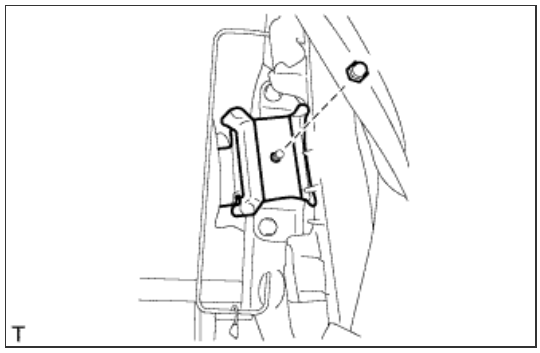
18. REMOVE REAR SEAT HEADREST ASSEMBLY



19. REMOVE REAR NO. 1 SEAT HEADREST SUPPORT ASSEMBLY

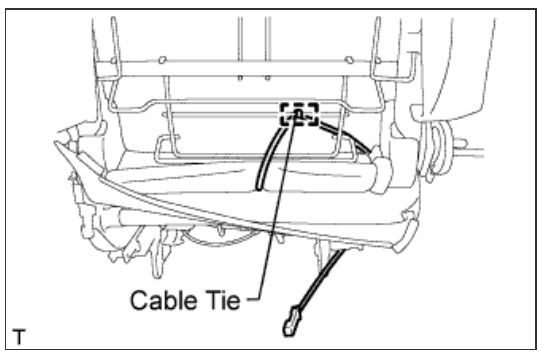
a. Detach the 4 claws and remove the 2 supports.

20. REMOVE SEATBACK COVER WITH PAD



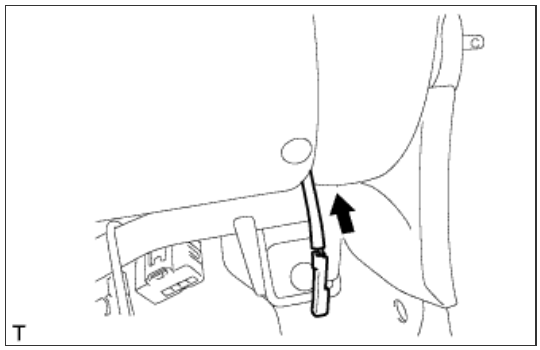
a. Remove the hog rings.

b. w/ Rear Seat Side Airbag:



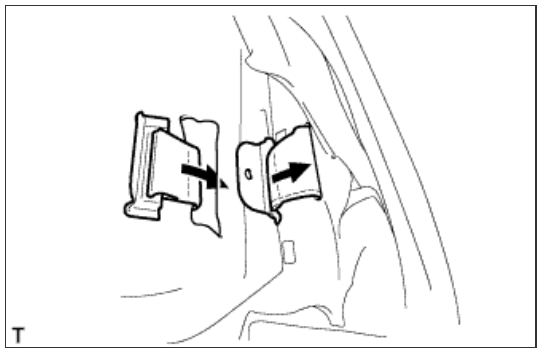
i. Remove the cap nut and seatback cover bracket from the seat frame.

ii. Remove the side airbag wire harness through the hole in the seatback.



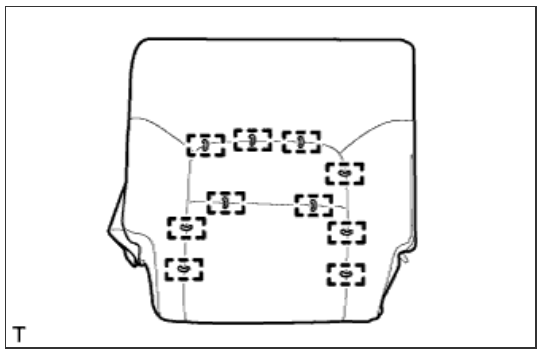
c. w/ Seat Heater System:

i. Cut the cable tie and disconnect the seatback heater wire harness.



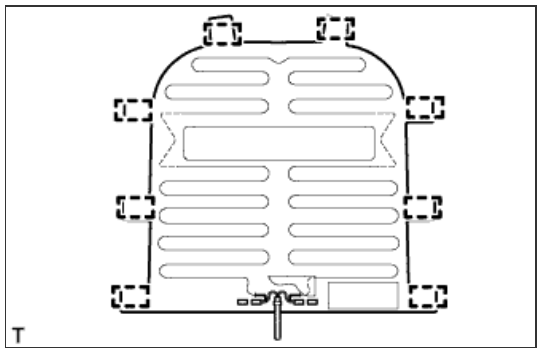
ii. Remove the seatback heater wire harness through the hole in the seatback.

d. Remove the seatback cover with pad.



21. REMOVE REAR SEPARATE TYPE SEATBACK COVER

a. w/ Rear Seat Side Airbag:
Disconnect the seatback cover bracket from the seatback pad.



b. Remove the hog rings and rear seatback cover.

22. REMOVE REAR SEATBACK HEATER ASSEMBLY

a. Cut off the tack pins which fasten the seatback heater to the seatback cover, and then remove the seatback heater from the seatback cover.

for Preparation Click here

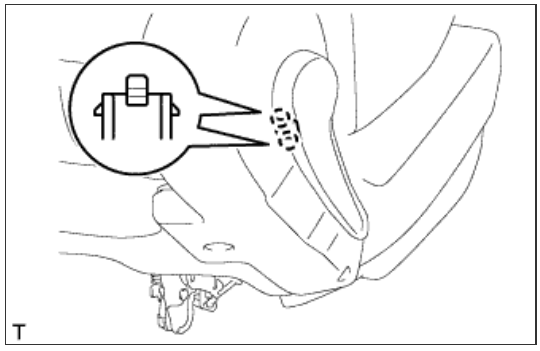
CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

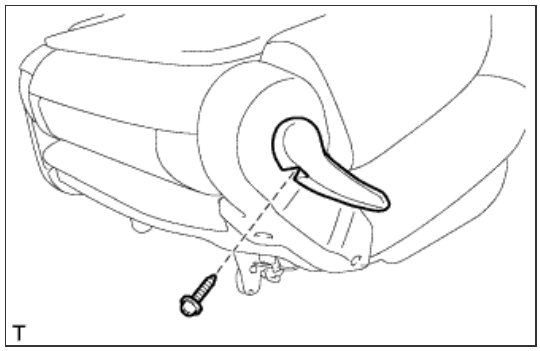
1. REMOVE REAR NO. 1 SEAT ASSEMBLY RH



a. Remove the rear No. 1 seat assembly (Click here).

2. REMOVE SEAT ADJUSTER BOLT COVER

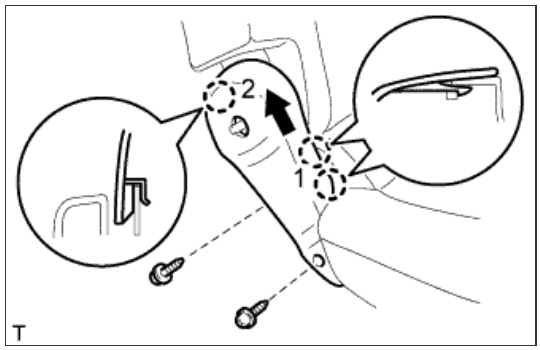
a. Using a screwdriver, detach the 2 claws and remove the cover.



HINT:

Tape the screwdriver tip before use.

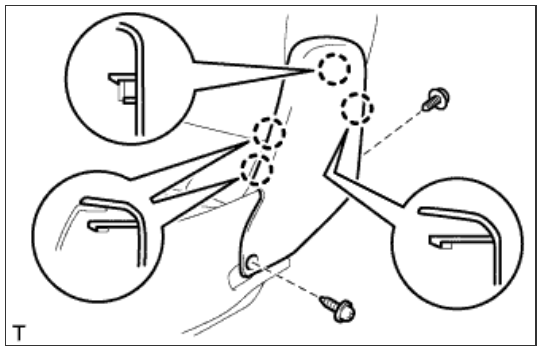
3. REMOVE RECLINING ADJUSTER RELEASE HANDLE RH



a. Remove the screw and release handle.

4. REMOVE REAR NO. 1 SEAT RECLINING COVER RH

a. Remove the 2 screws.

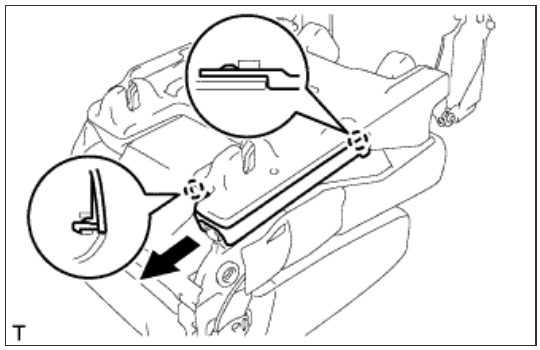


b. Detach the 3 claws in the order shown in the illustration, and then remove the cover.

5. REMOVE REAR NO. 1 SEAT RECLINING COVER LH

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.

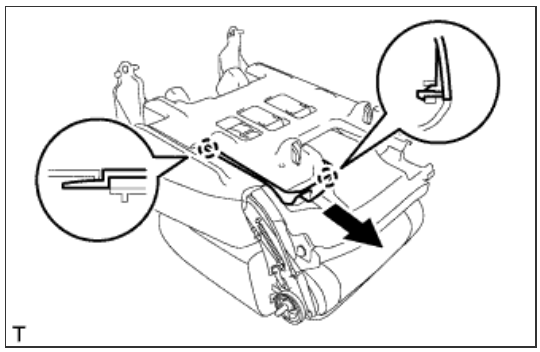


6. REMOVE UPPER SEAT TRACK RAIL COVER LH

a. Using a screwdriver, detach the 2 claws and remove the cover.

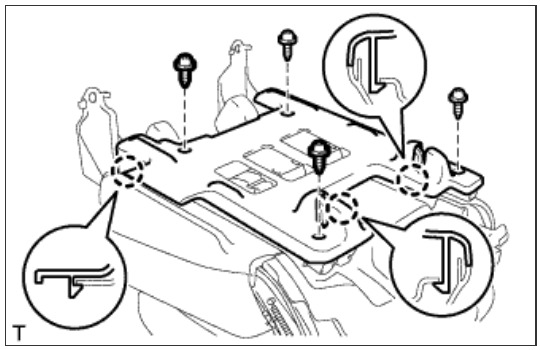
HINT:

Tape the screwdriver tip before use.



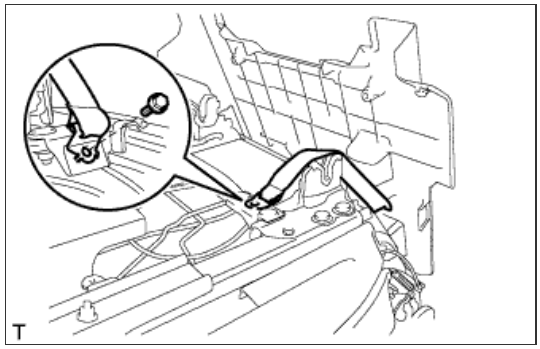
7. REMOVE UPPER SEAT TRACK RAIL COVER RH

a. Using a screwdriver, detach the 2 claws and remove the cover.



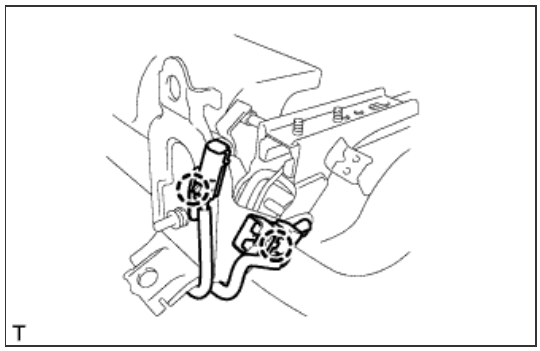
HINT:

Tape the screwdriver tip before use.



8. REMOVE REAR NO. 2 SEAT LEG SIDE COVER

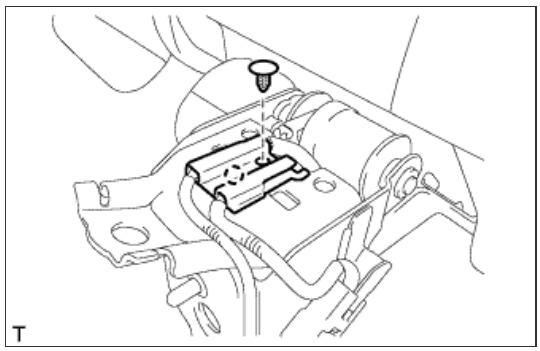
a. Remove the 4 screws and detach the 3 claws.



b. Remove the bolt that is securing the fold seat stopper band and remove the seat leg side cover together with the fold seat stopper band.

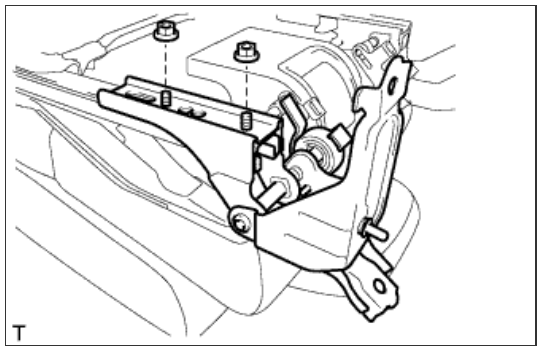
9. REMOVE REAR NO. 2 SEAT PROTECTOR

a. w/ Rear Seat Side Airbag:
Detach the claw and remove the wire harness connector.



b. w/ Seat Heater System:
Detach the claw and remove the wire harness connector.

c. Using a clip remover, remove the clip.

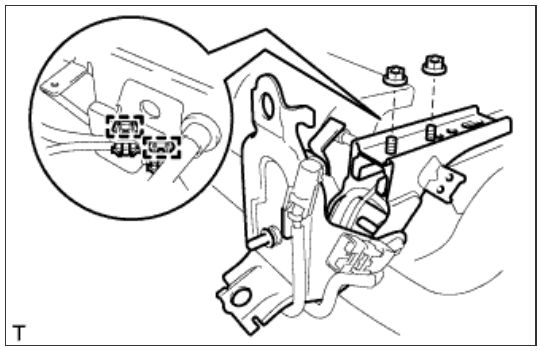


d. Detach the claw and remove the seat protector from the seat hinge.

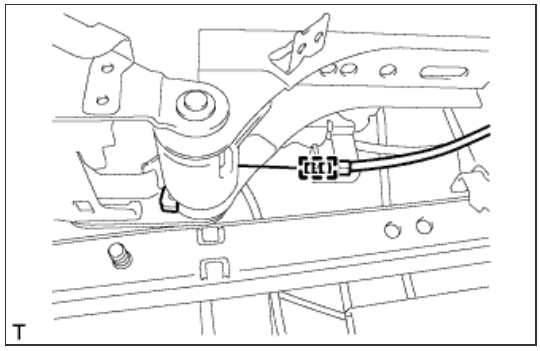
e. Detach the 2 claws, open the protector and remove the wire harness.

10. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH

a. Remove the 2 nuts and hinge.



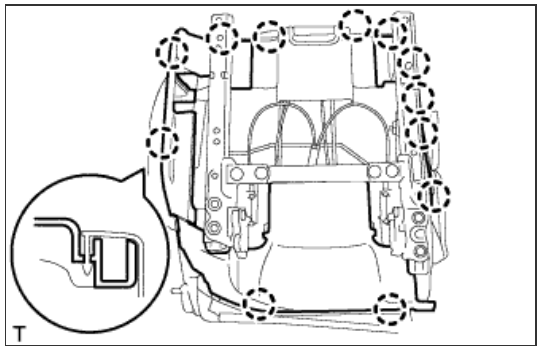
11. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH



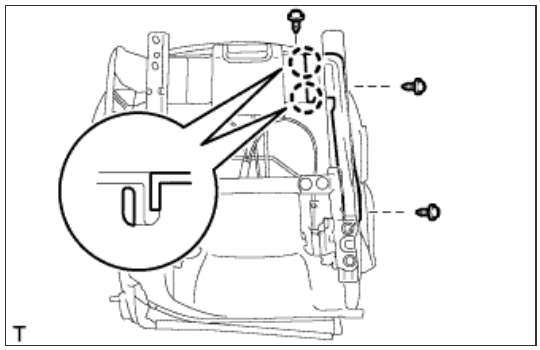
a. w/ Rear Seat Side Airbag:
Detach the wire harness clamp.

b. w/ Seat Heater System:
Detach the wire harness clamp.

c. Remove the 2 nuts and hinge.



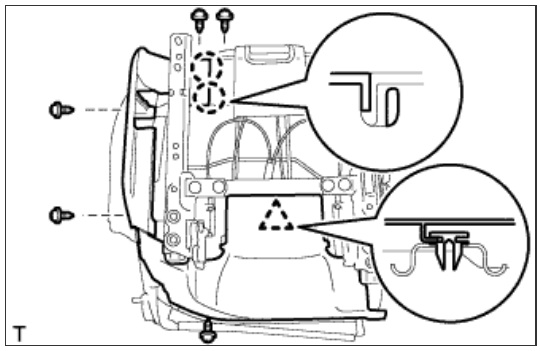
d. Detach the cable clamp and disconnect the cable.



12. REMOVE REAR SEAT COVER

a. Detach the 12 claws.

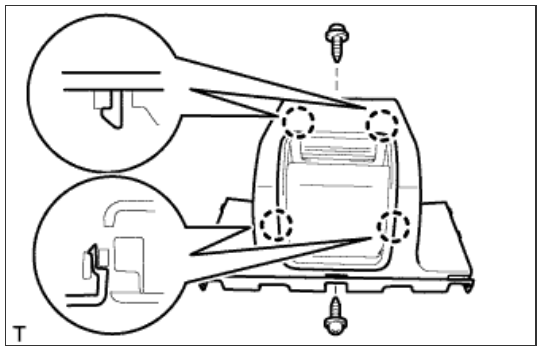
b. Remove the 3 screws.



c. Detach the 2 claws and remove the cover.

13. REMOVE REAR UNDER SIDE COVER LH

a. Remove the 5 screws.



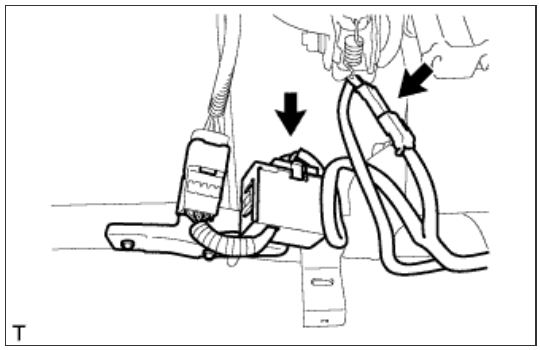
b. Detach the clip and 2 claws, and remove the cover.

14. REMOVE REAR SEAT UNDER TRAY COVER RH

a. Remove the 2 screws.

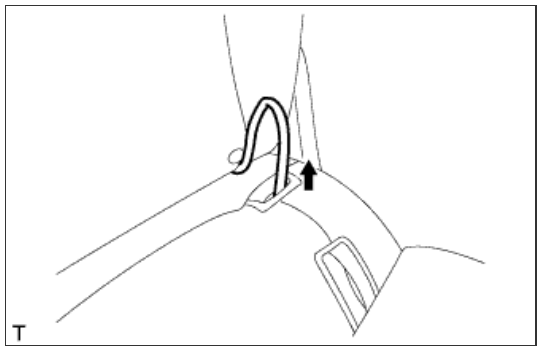
b. Detach the 4 claws and remove the cover.

15. REMOVE SEAT CUSHION COVER WITH PAD



a. w/ Rear Seat Side Airbag:

i. Detach the side airbag wire harness clamps.

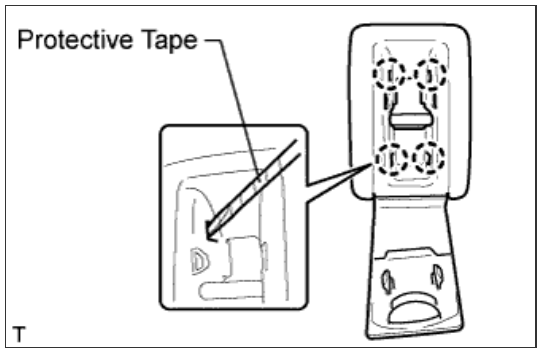


ii. Remove the side airbag wire harness through the hole in the seat cushion.

b. w/ Seat Heater System:

i. Disconnect the 2 seat heater connectors.

ii. Remove the seatback heater wire harness through the hole in the seat cushion.

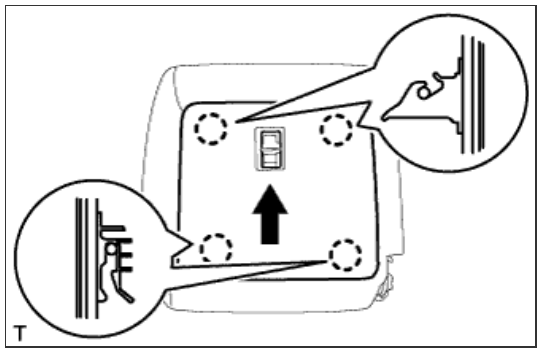


c. Remove the seat cushion cover with pad.

16. REMOVE REAR SEATBACK COVER

a. Using a screwdriver, detach the 4 claws and remove the cover.

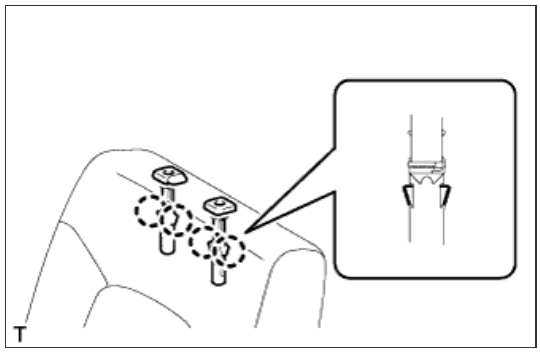
HINT:



Tape the screwdriver tip before use.

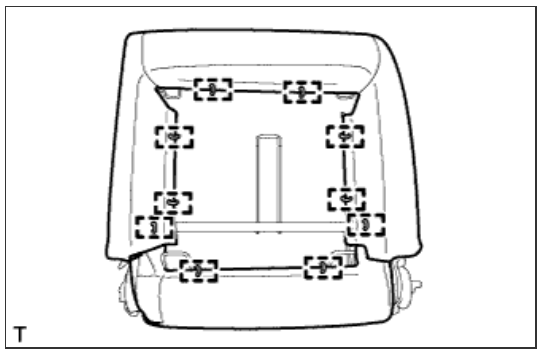
17. REMOVE REAR SEATBACK BOARD SUB-ASSEMBLY RH

a. Detach the 2 claws on the top of the board.



b. Pull up the board to detach the 2 claws on the bottom of the board and remove it.

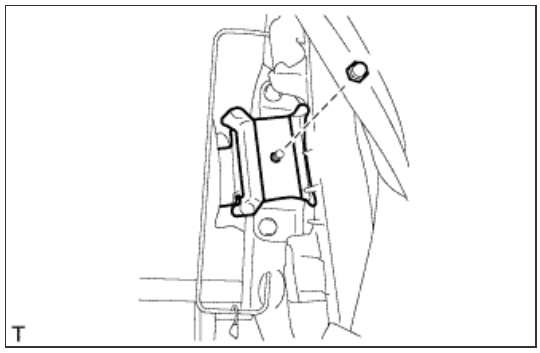
18. REMOVE REAR SEAT HEADREST ASSEMBLY



19. REMOVE REAR NO. 1 SEAT HEADREST SUPPORT ASSEMBLY

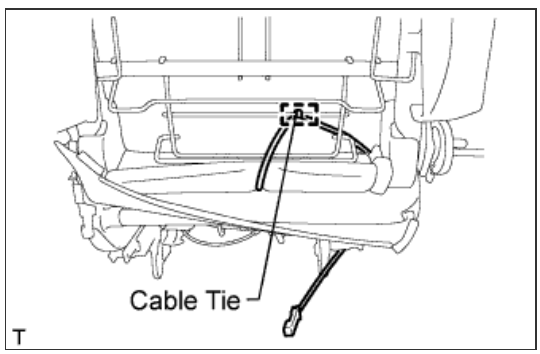
a. Detach the 4 claws and remove the 2 supports.

20. REMOVE SEATBACK COVER WITH PAD



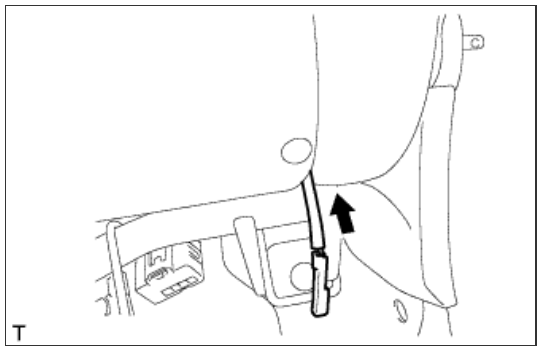
a. Remove the hog rings.

b. w/ Rear Seat Side Airbag:



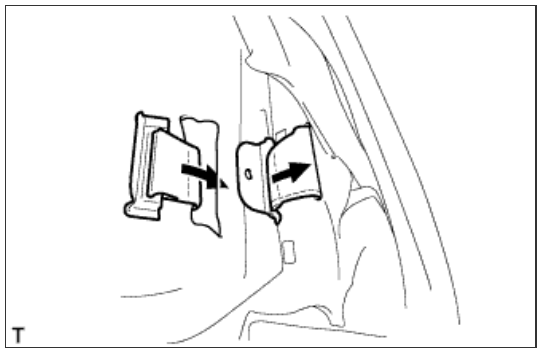
i. Remove the cap nut and seatback cover bracket from the seat frame.

ii. Remove the side airbag wire harness through the hole in the seatback.



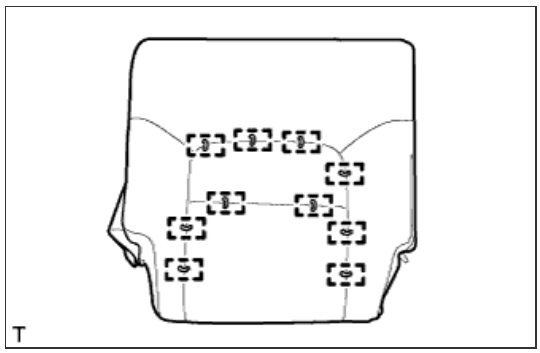
c. w/ Seat Heater System:

i. Cut the cable tie and disconnect the seatback heater wire harness.



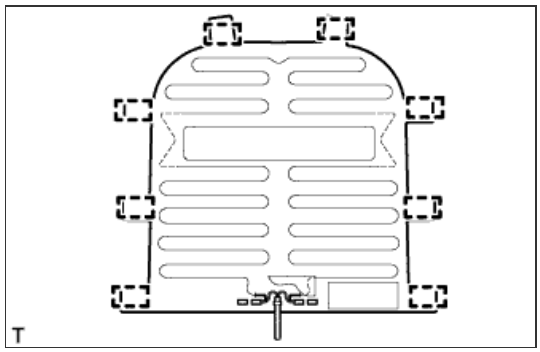
ii. Remove the seatback heater wire harness through the hole in the seatback.

d. Remove the seatback cover with pad.



21. REMOVE REAR SEPARATE TYPE SEATBACK COVER

a. w/ Rear Seat Side Airbag:
Disconnect the seatback cover bracket from the seatback pad.



b. Remove the hog rings and rear seatback cover.

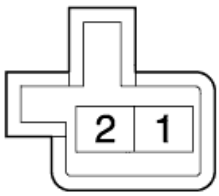
22. REMOVE REAR SEATBACK HEATER ASSEMBLY

a. Cut off the tack pins which fasten the seatback heater to the seatback cover, and then remove the seatback heater from the seatback cover.

for Preparation Click here

1. INSPECT REAR SEATBACK HEATER ASSE B

a Check the seatback heater.



i Measure the resistance according to the value(s) in the table below.

Standard Re i tance

Tester Connection	Condition	Specified Condition
1 - 2	Seatback heater temperature 25 C ( )	.3 to 8. Ω

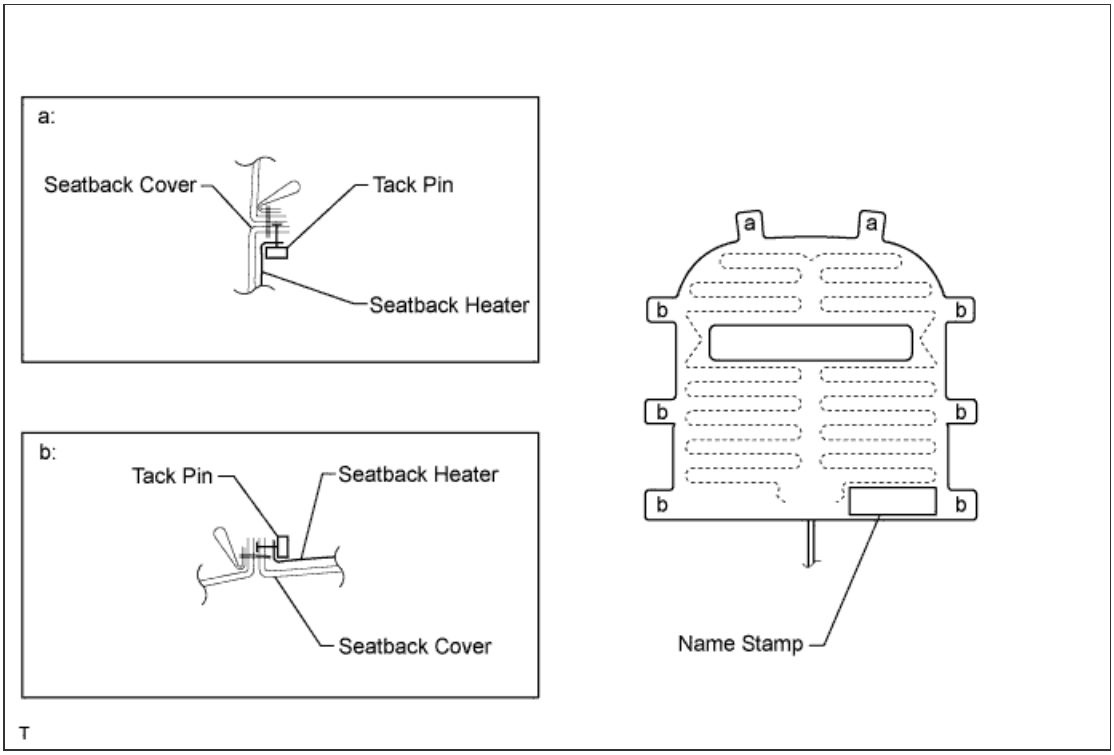
the result is not as specified, replace the seatback heater assembly.

Component without harness connected:
(Rear Seatback Heater)

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.



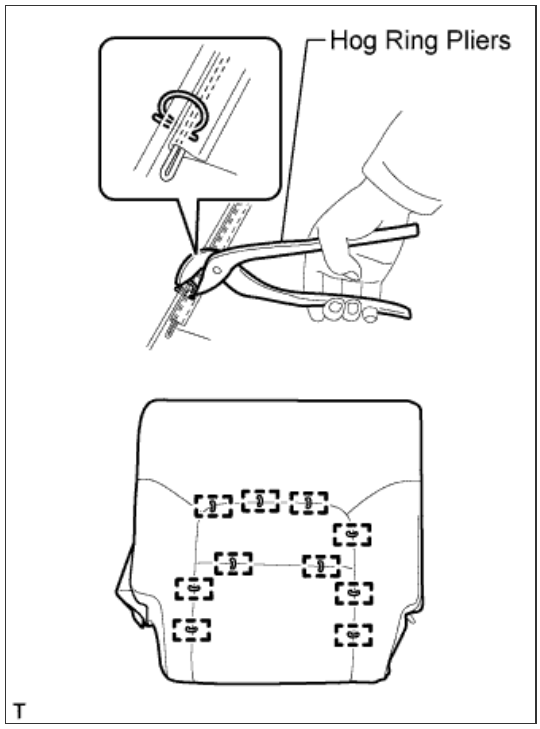
HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

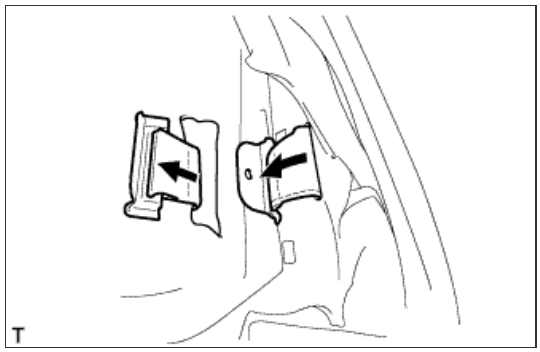
1. INSTALL REAR SEATBACK HEATER ASSEMBLY

a. Set the seatback heater with the name stamp side facing the seatback cover.

b. Install the seatback heater with new tack pins.



2. INSTALL REAR SEPARATE TYPE SEATBACK COVER

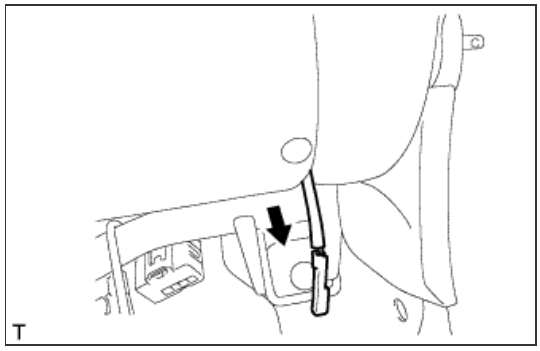


a. Using hog ring pliers, install the seatback cover with new hog rings.

NOTICE:

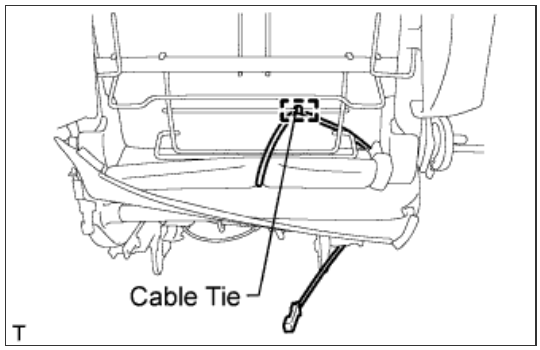
- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**

b. w/ Rear Seat Side Airbag:
Connect the seatback cover bracket to the seatback pad.



3. INSTALL SEATBACK COVER WITH PAD

a. Install the seatback cover with pad.

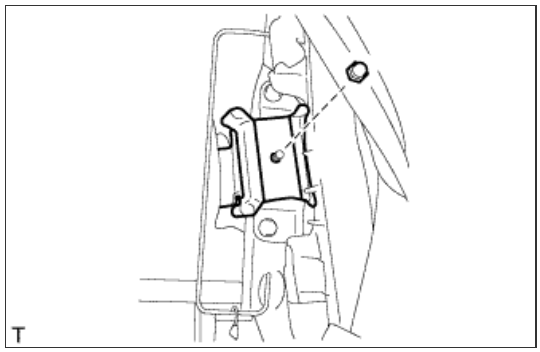


b. w/ Rear Seat Side Airbag:
Pass the side airbag wire harness through the hole in the seatback.

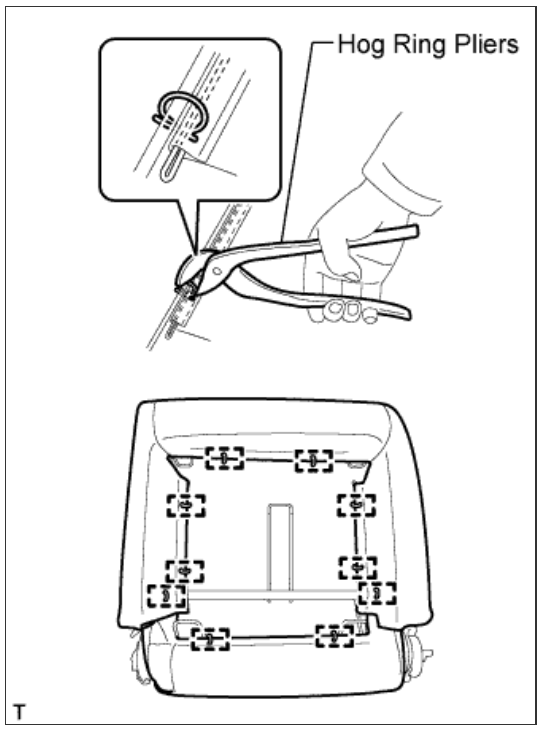
c. w/ Seat Heater System:

i. Pass the seatback heater wire harness through the hole in the seatback.

ii. Connect the seatback heater wire harness and install a new cable tie.



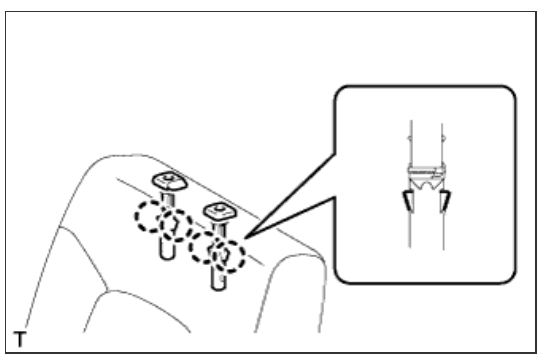
d. w/ Rear Seat Side Airbag:
Install the seatback cover bracket to the seat frame with the cap nut.



Torque:
5.5 N*m{ 56 kgf*cm , 49 in.*lbf }

CAUTION:

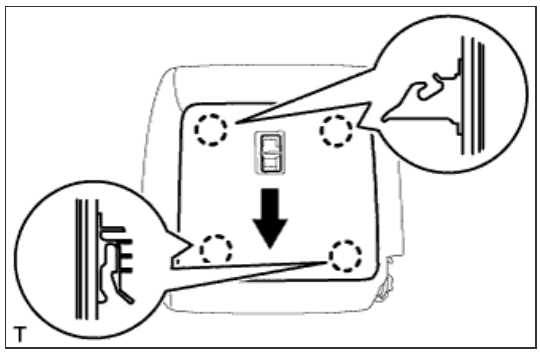
After the seatback trim cover is assembled, make sure the side airbag strap is not twisted.



e. Using hog ring pliers, install new hog rings to the seatback frame.

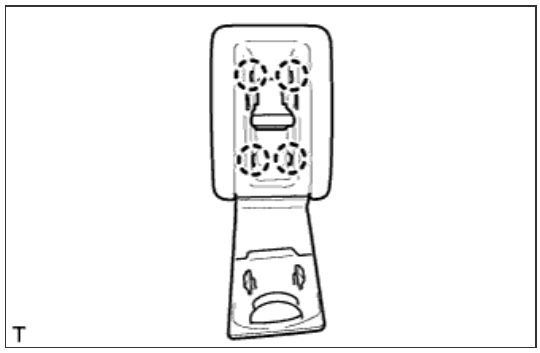
4. INSTALL REAR NO. 1 SEAT HEADREST SUPPORT ASSEMBLY

a. Attach the 4 claws to install the 2 supports.



5. INSTALL REAR SEAT HEADREST ASSEMBLY

6. INSTALL REAR SEATBACK BOARD SUB-ASSEMBLY RH

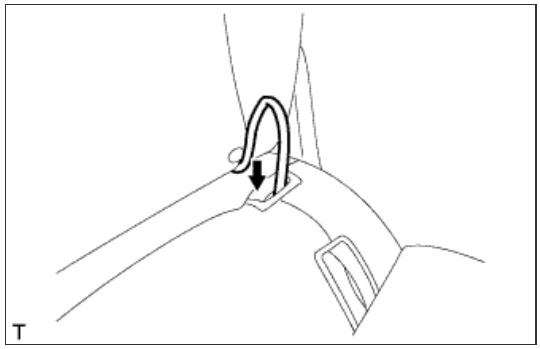


a. Push the board down to attach the 2 claws on the bottom.

b. Attach the 2 claws on the top of the board to install it.

7. INSTALL REAR SEATBACK COVER

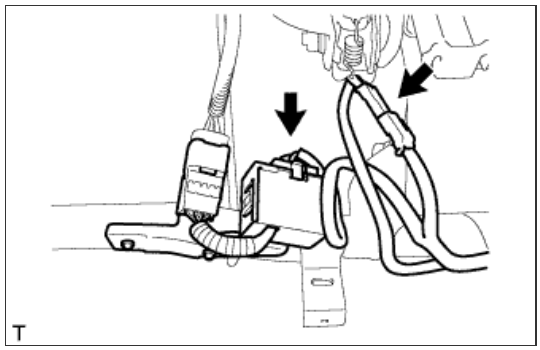
a. Attach the 4 claws to install the cover.



8. INSTALL SEAT CUSHION COVER WITH PAD

a. Install the seat cushion cover with pad.

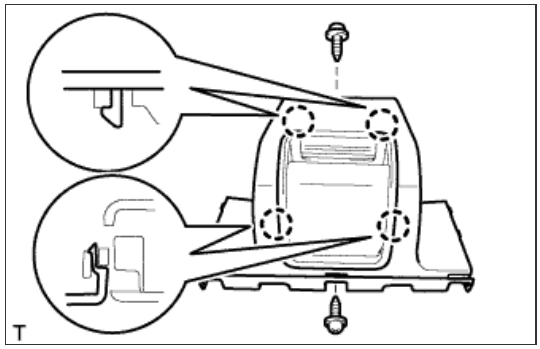
b. w/ Rear Seat Side Airbag:
Pass the side airbag wire harness through the hole in the seat cushion.



c. w/ Seat Heater System:

i. Pass the seatback heater wire harness through the hole in the seat cushion.

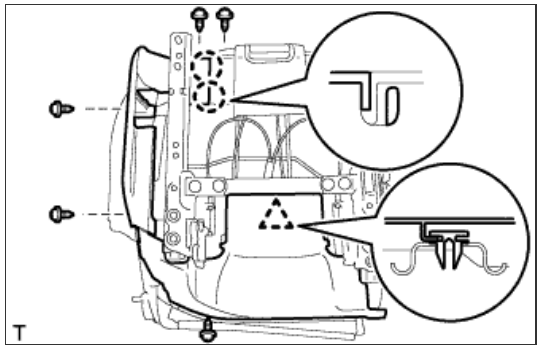
ii. Connect the 2 seat heater connectors.



d. w/ Rear Seat Side Airbag:
Attach the side airbag wire harness clamps.

9. INSTALL REAR SEAT UNDER TRAY COVER RH

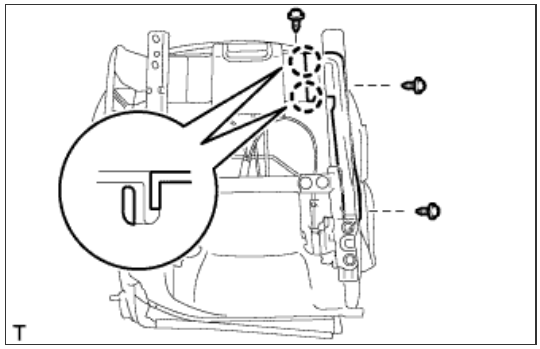
a. Attach the 4 claws to install the cover.



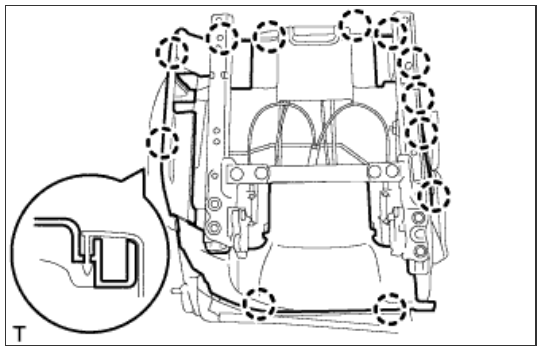
b. Install the 2 screws.

10. INSTALL REAR UNDER SIDE COVER LH

a. Attach the 2 claws and clip to install the cover.



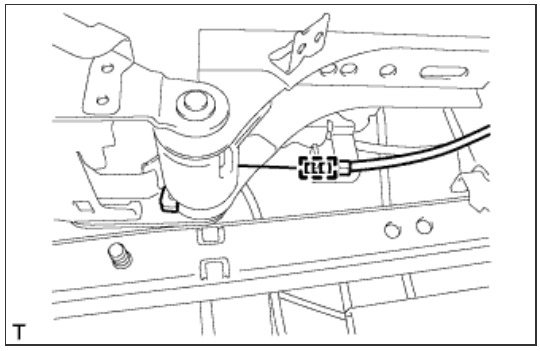
b. Install the 5 screws.



11. INSTALL REAR SEAT COVER

a. Attach the 2 claws to install the cover.

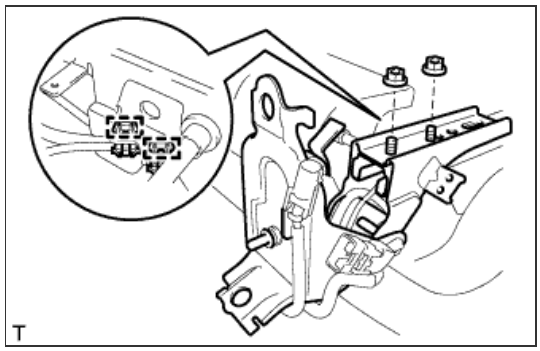
b. Install the 3 screws.



c. Attach the 12 claws.

12. INSTALL REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH

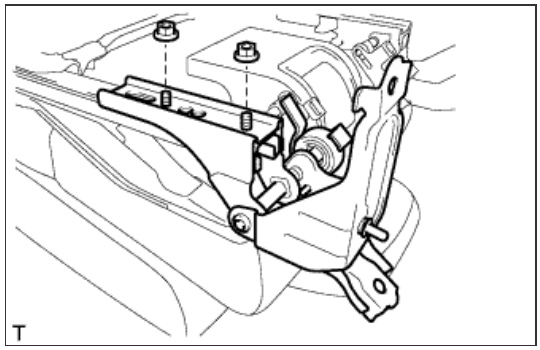
a. Attach the cable clamp to connect the cable.



b. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

c. w/ Rear Seat Side Airbag:
Attach the wire harness clamp.

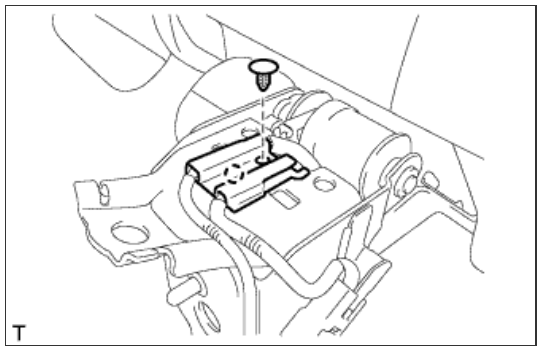


d. w/ Seat Heater System:
Attach the wire harness clamp.

13. INSTALL REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH

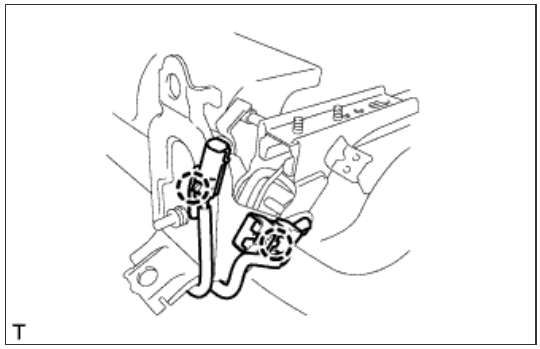
a. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }



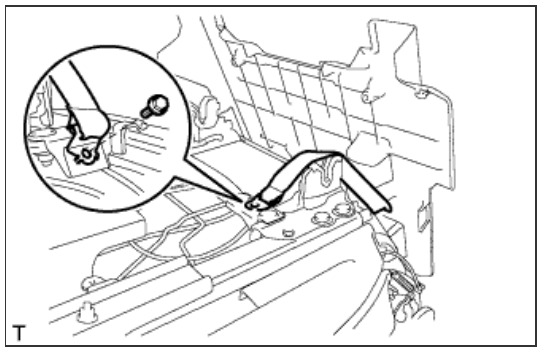
14. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Install the wire harness, and attach the 2 claws to close the protector.



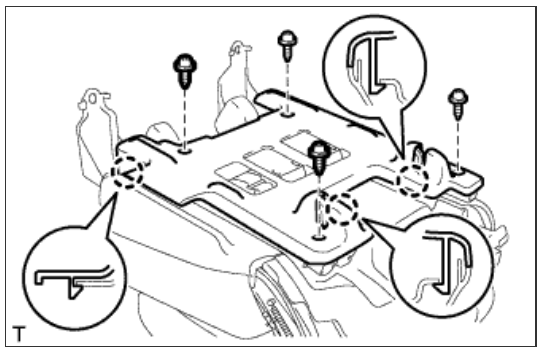
b. Attach the claw to install the protector to the seat hinge.

c. Install the clip.



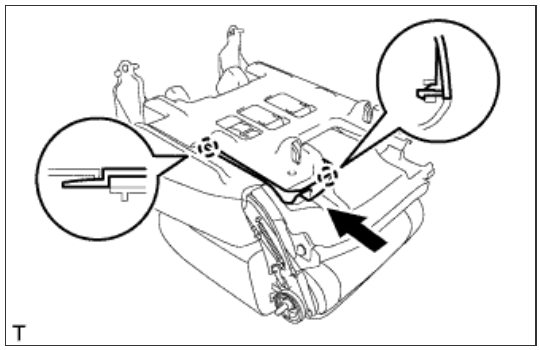
d. w/ Rear Seat Side Airbag:
Attach the claw to install the wire harness connector.

e. w/ Seat Heater System:
Attach the claw to install the wire harness connector.



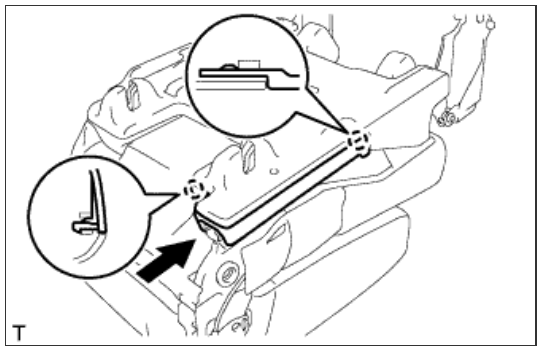
15. INSTALL REAR NO. 2 SEAT LEG SIDE COVER

a. Pass the fold seat stopper band through the seat leg side cover and attach it to the seat cushion frame with the bolt.



b. Attach the 3 claws to install the seat leg side cover.

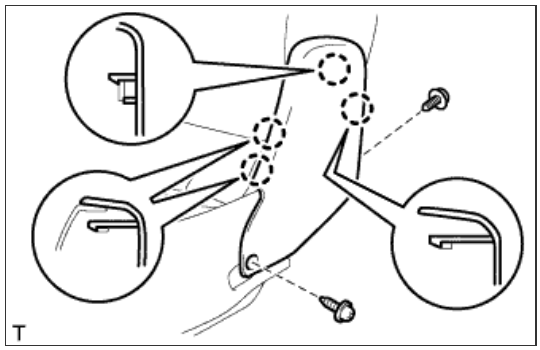
c. Install the 4 screws.



16. INSTALL UPPER SEAT TRACK RAIL COVER RH

a. Attach the 2 claws to install the cover.

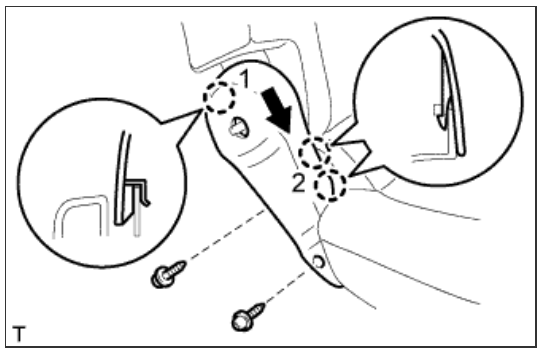
17. INSTALL UPPER SEAT TRACK RAIL COVER LH



a. Attach the 2 claws to install the cover.

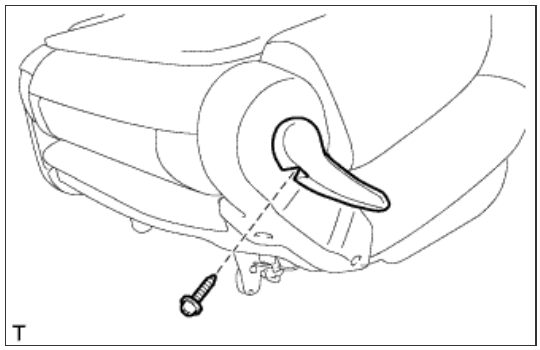
18. INSTALL REAR NO. 1 SEAT RECLINING COVER LH

a. Attach the 4 claws to install the cover.



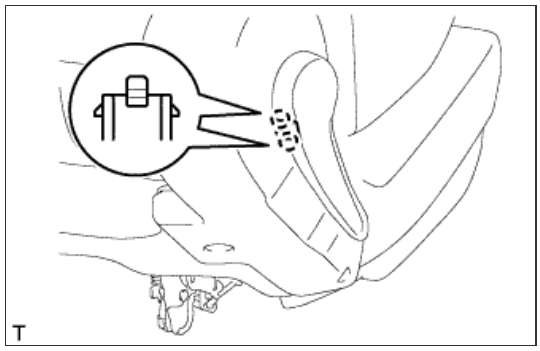
b. Install the 2 screws.

19. INSTALL REAR NO. 1 SEAT RECLINING COVER RH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

b. Install the 2 screws.



20. INSTALL RECLINING ADJUSTER RELEASE HANDLE RH

a. Install the release handle with the screw.

21. INSTALL SEAT ADJUSTER BOLT COVER

a. Attach the 2 claws to install the cover.

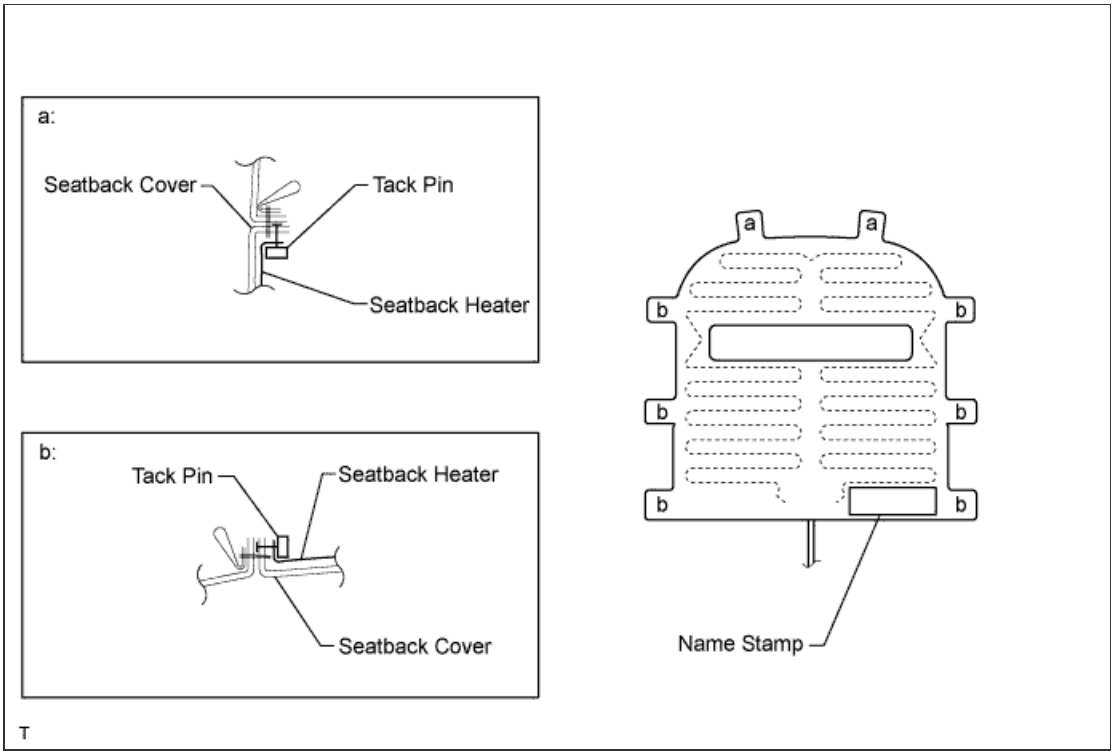
22. INSTALL REAR NO. 1 SEAT ASSEMBLY RH

a. Install the rear No. 1 seat assembly (Click here).

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.



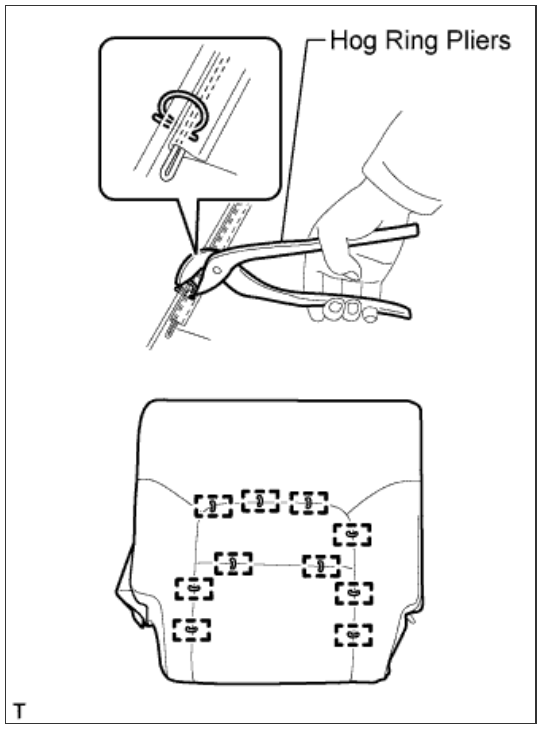
HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

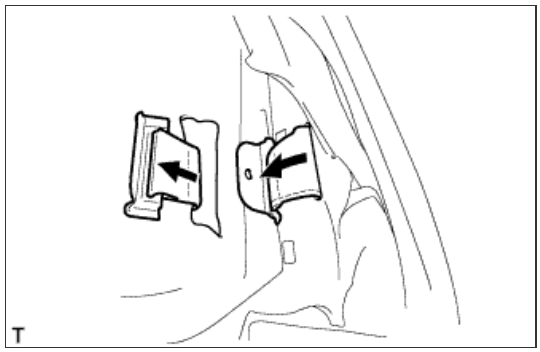
1. INSTALL REAR SEATBACK HEATER ASSEMBLY

a. Set the seatback heater with the name stamp side facing the seatback cover.

b. Install the seatback heater with new tack pins.



2. INSTALL REAR SEPARATE TYPE SEATBACK COVER

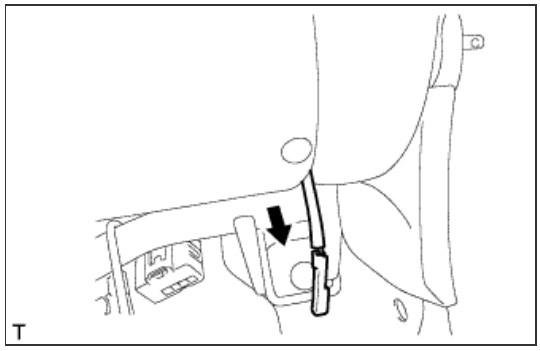


a. Using hog ring pliers, install the seatback cover with new hog rings.

NOTICE:

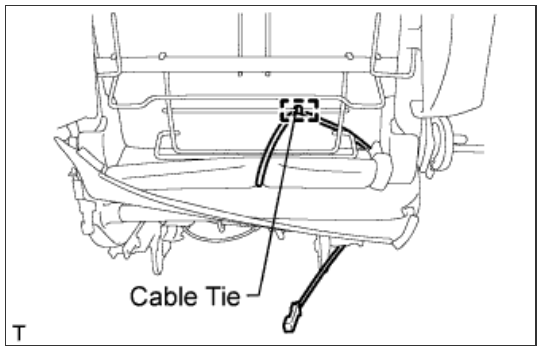
- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**

b. w/ Rear Seat Side Airbag:
Connect the seatback cover bracket to the seatback pad.



3. INSTALL SEATBACK COVER WITH PAD

a. Install the seatback cover with pad.

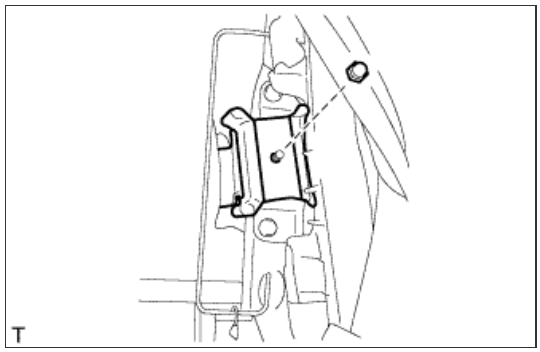


b. w/ Rear Seat Side Airbag:
Pass the side airbag wire harness through the hole in the seatback.

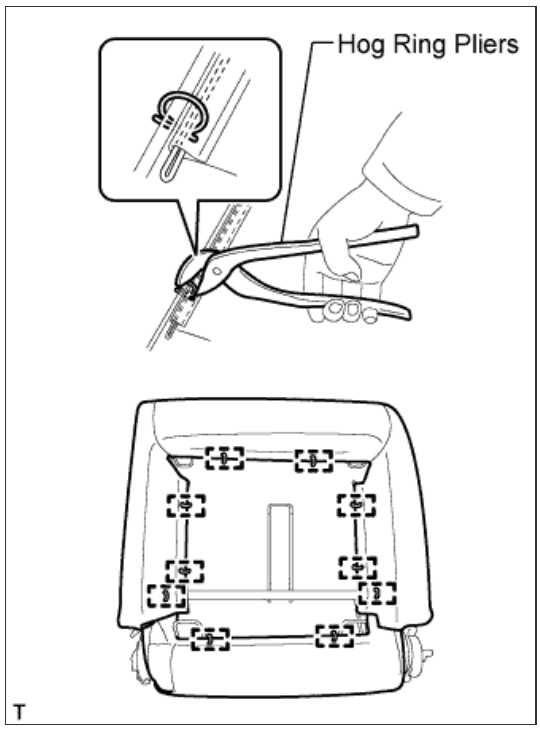
c. w/ Seat Heater System:

i. Pass the seatback heater wire harness through the hole in the seatback.

ii. Connect the seatback heater wire harness and install a new cable tie.



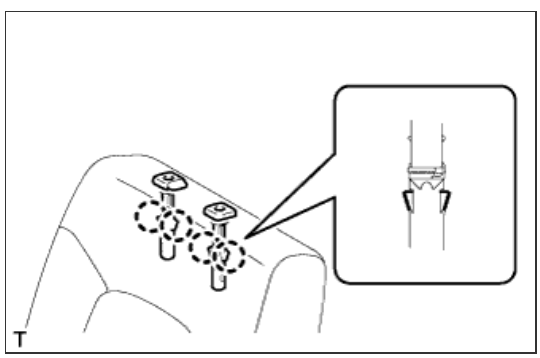
d. w/ Rear Seat Side Airbag:
Install the seatback cover bracket to the seat frame with the cap nut.



Torque:
5.5 N*m{ 56 kgf*cm , 49 in.*lbf }

CAUTION:

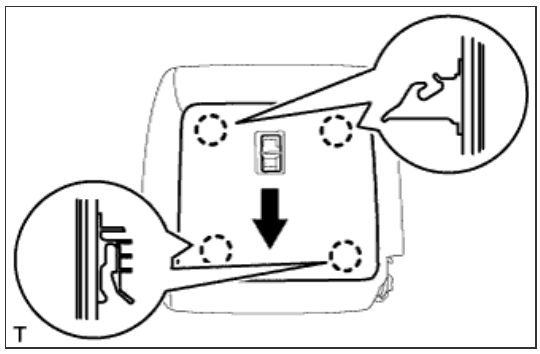
After the seatback trim cover is assembled, make sure the side airbag strap is not twisted.



e. Using hog ring pliers, install new hog rings to the seatback frame.

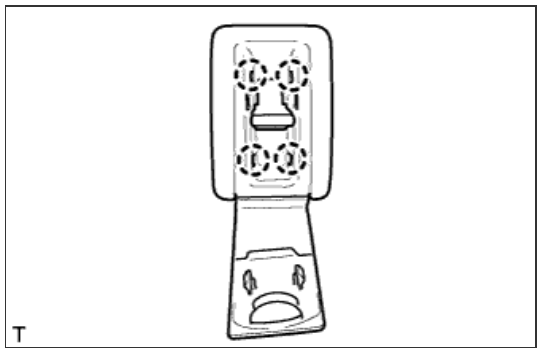
4. INSTALL REAR NO. 1 SEAT HEADREST SUPPORT ASSEMBLY

a. Attach the 4 claws to install the 2 supports.



5. INSTALL REAR SEAT HEADREST ASSEMBLY

6. INSTALL REAR SEATBACK BOARD SUB-ASSEMBLY RH

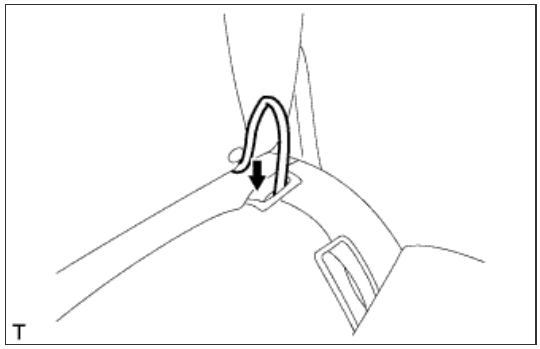


a. Push the board down to attach the 2 claws on the bottom.

b. Attach the 2 claws on the top of the board to install it.

7. INSTALL REAR SEATBACK COVER

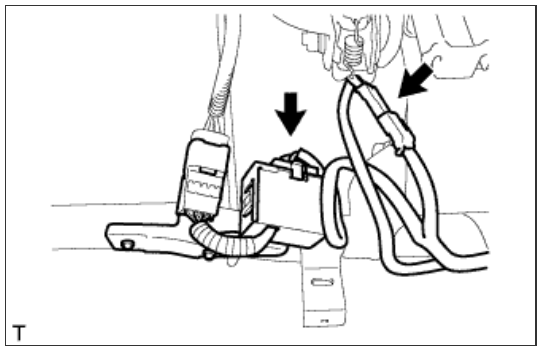
a. Attach the 4 claws to install the cover.



8. INSTALL SEAT CUSHION COVER WITH PAD

a. Install the seat cushion cover with pad.

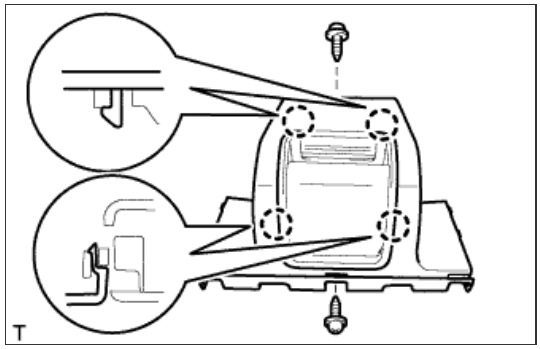
b. w/ Rear Seat Side Airbag:
Pass the side airbag wire harness through the hole in the seat cushion.



c. w/ Seat Heater System:

i. Pass the seatback heater wire harness through the hole in the seat cushion.

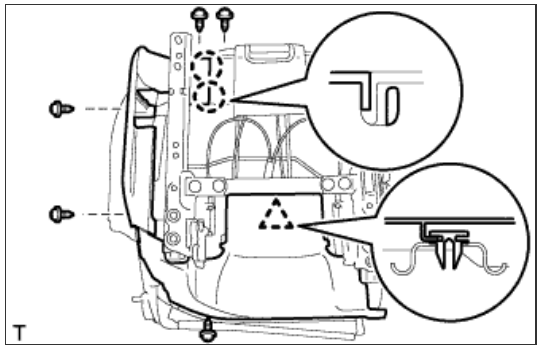
ii. Connect the 2 seat heater connectors.



d. w/ Rear Seat Side Airbag:
Attach the side airbag wire harness clamps.

9. INSTALL REAR SEAT UNDER TRAY COVER RH

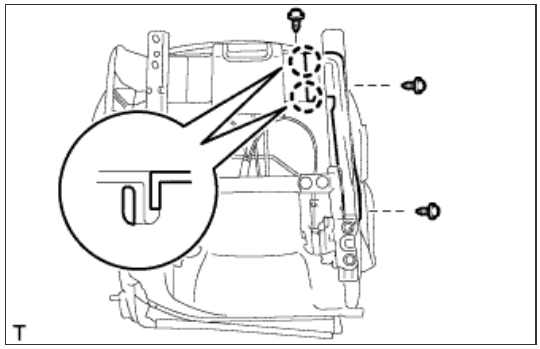
a. Attach the 4 claws to install the cover.



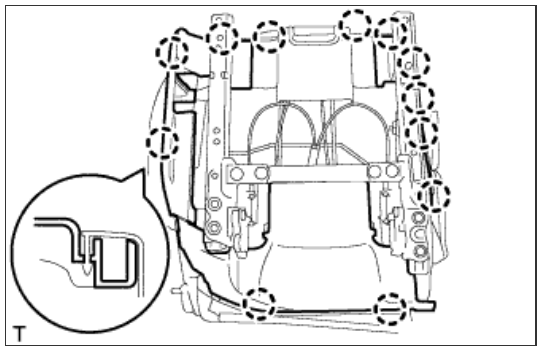
b. Install the 2 screws.

10. INSTALL REAR UNDER SIDE COVER LH

a. Attach the 2 claws and clip to install the cover.



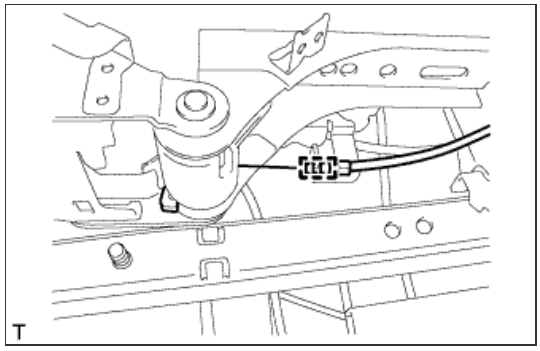
b. Install the 5 screws.



11. INSTALL REAR SEAT COVER

a. Attach the 2 claws to install the cover.

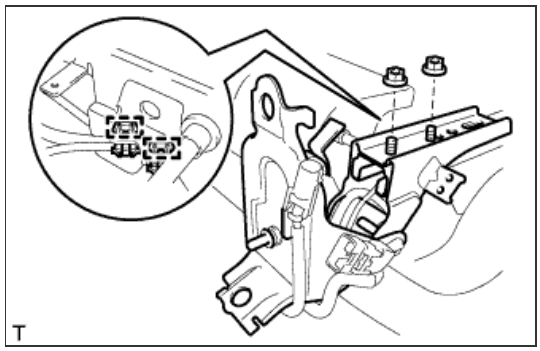
b. Install the 3 screws.



c. Attach the 12 claws.

12. INSTALL REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH

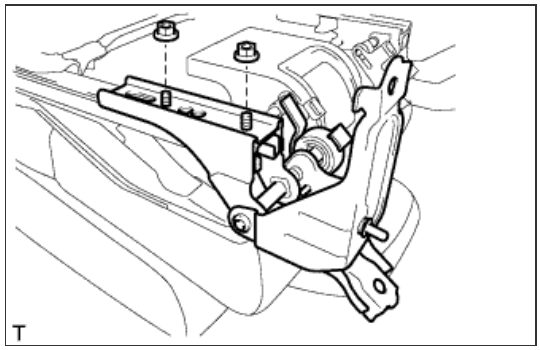
a. Attach the cable clamp to connect the cable.



b. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

c. w/ Rear Seat Side Airbag:
Attach the wire harness clamp.

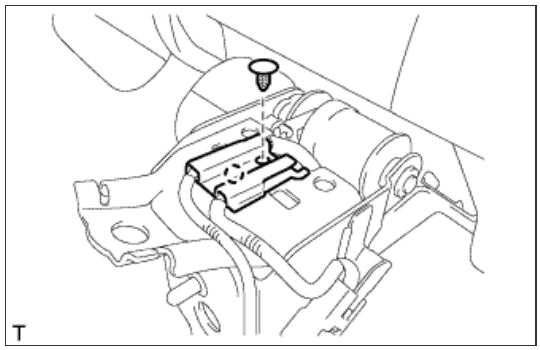


d. w/ Seat Heater System:
Attach the wire harness clamp.

13. INSTALL REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH

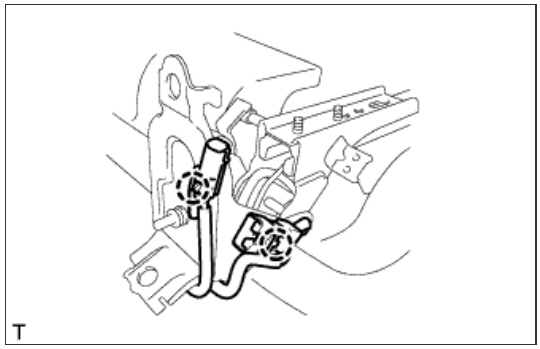
a. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }



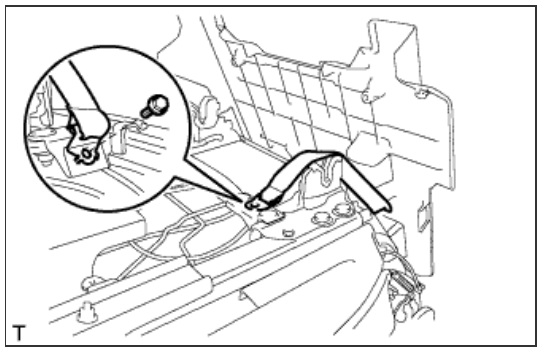
14. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Install the wire harness, and attach the 2 claws to close the protector.



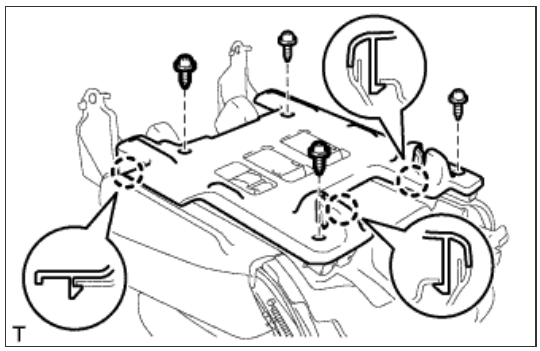
b. Attach the claw to install the protector to the seat hinge.

c. Install the clip.



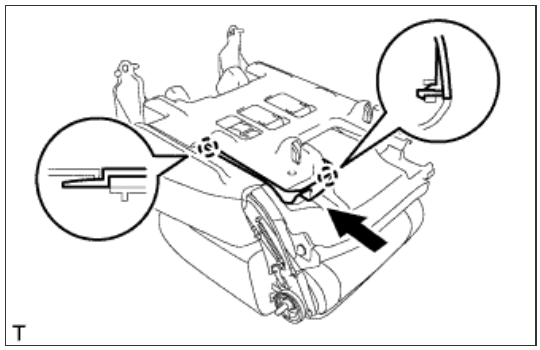
d. w/ Rear Seat Side Airbag:
Attach the claw to install the wire harness connector.

e. w/ Seat Heater System:
Attach the claw to install the wire harness connector.



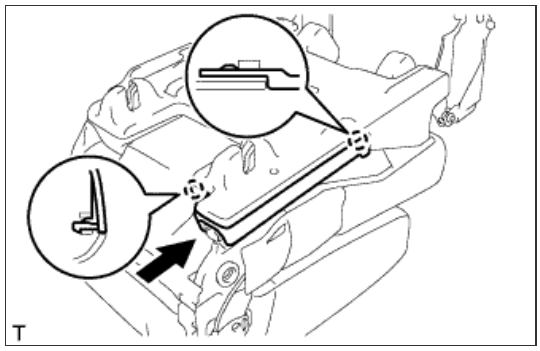
15. INSTALL REAR NO. 2 SEAT LEG SIDE COVER

a. Pass the fold seat stopper band through the seat leg side cover and attach it to the seat cushion frame with the bolt.



b. Attach the 3 claws to install the seat leg side cover.

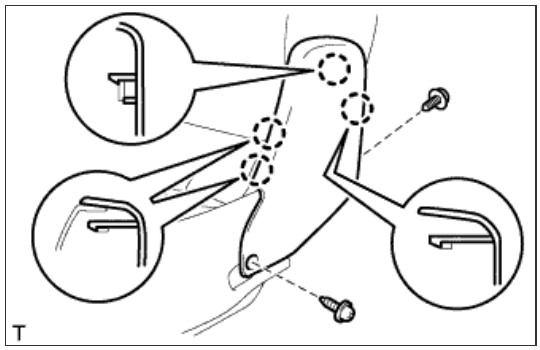
c. Install the 4 screws.



16. INSTALL UPPER SEAT TRACK RAIL COVER RH

a. Attach the 2 claws to install the cover.

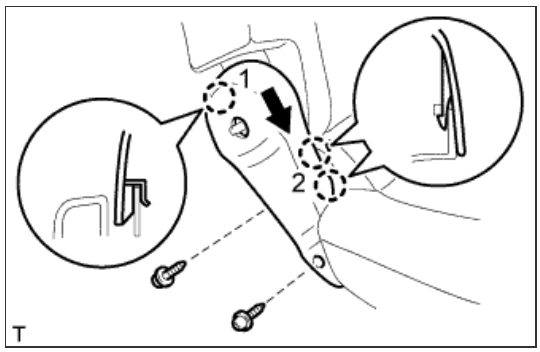
17. INSTALL UPPER SEAT TRACK RAIL COVER LH



a. Attach the 2 claws to install the cover.

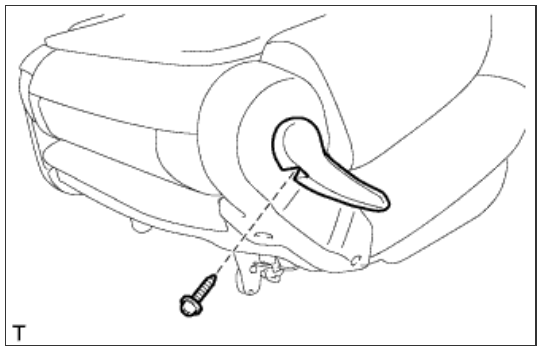
18. INSTALL REAR NO. 1 SEAT RECLINING COVER LH

a. Attach the 4 claws to install the cover.



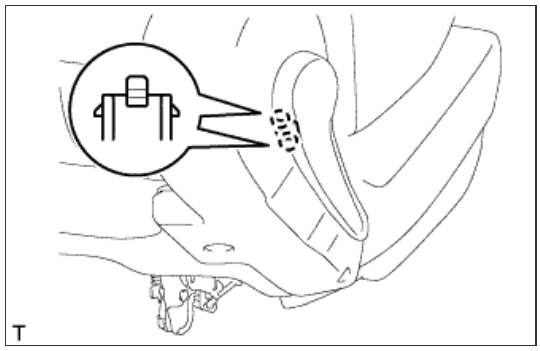
b. Install the 2 screws.

19. INSTALL REAR NO. 1 SEAT RECLINING COVER RH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

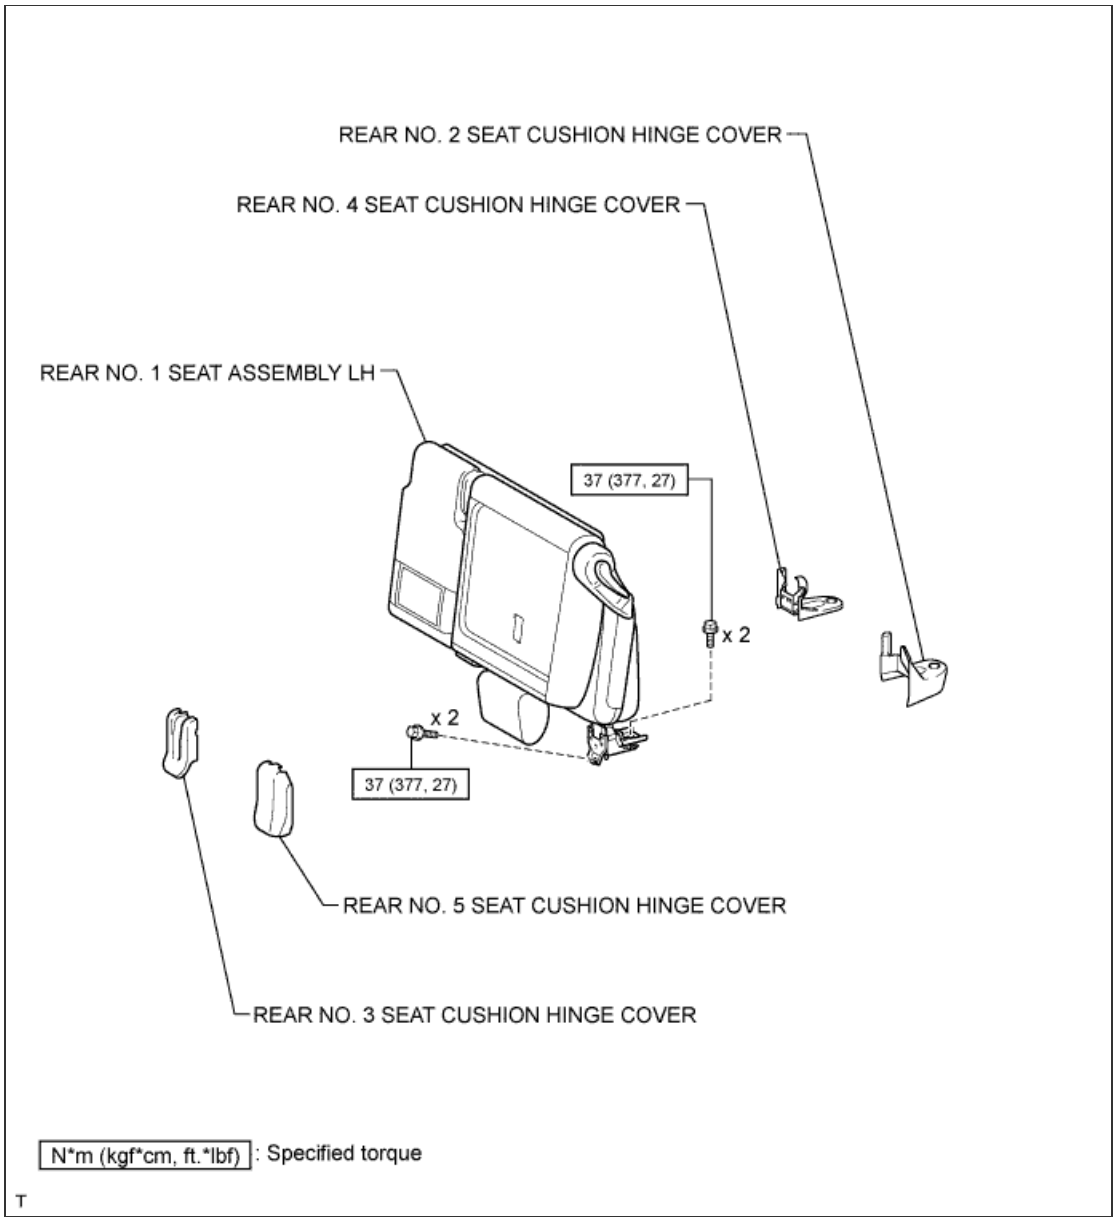
b. Install the 2 screws.



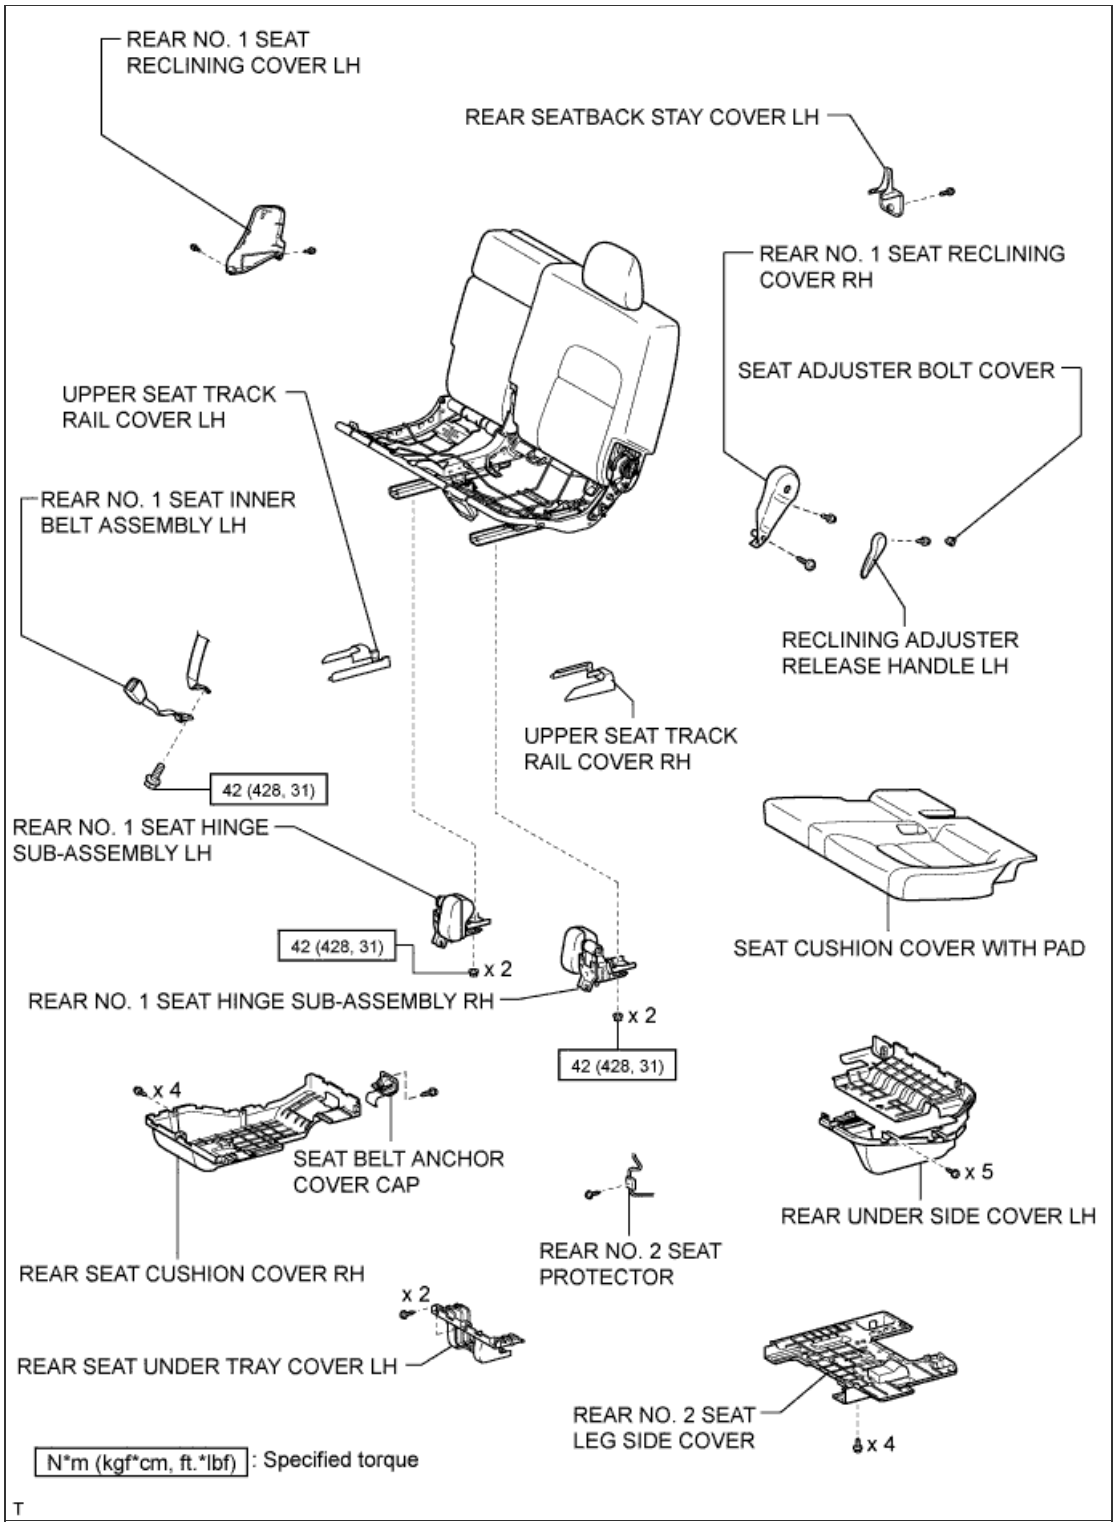
20. INSTALL RECLINING ADJUSTER RELEASE HANDLE RH

a. Install the release handle with the screw.

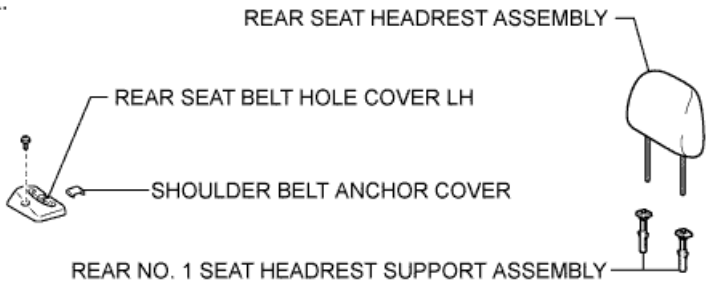
21. INSTALL SEAT ADJUSTER BOLT COVER



a. Attach the 2 claws to install the cover.



22. INSTALL REAR NO. 1 SEAT ASSEMBLY RH



a. Install the rear No. 1 seat assembly (Click here).

T

for Preparation Click here

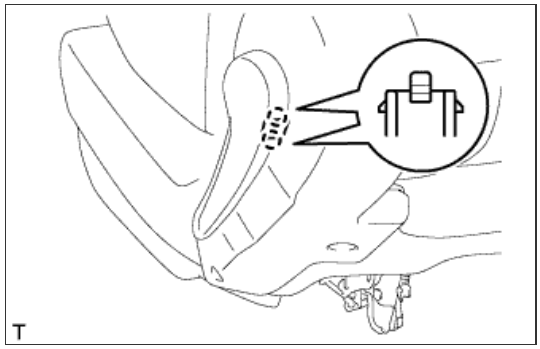
CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

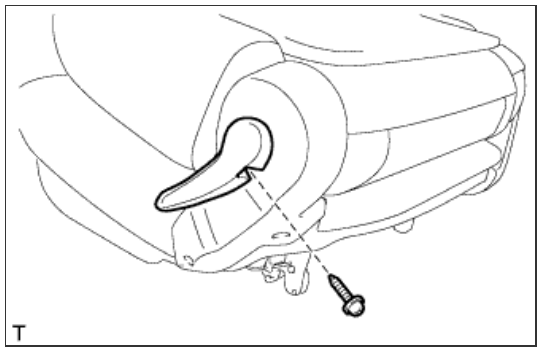
1. REMOVE REAR NO. 1 SEAT ASSEMBLY LH



a. Remove the rear No. 1 seat assembly (Click here).

2. REMOVE SEAT ADJUSTER BOLT COVER

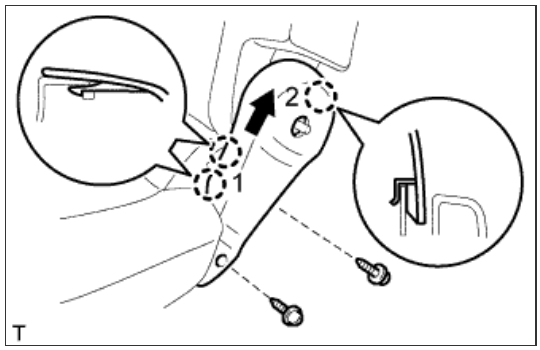
a. Using a screwdriver detach the 2 claws and remove the cover.



HINT:

Tape the screwdriver tip before use.

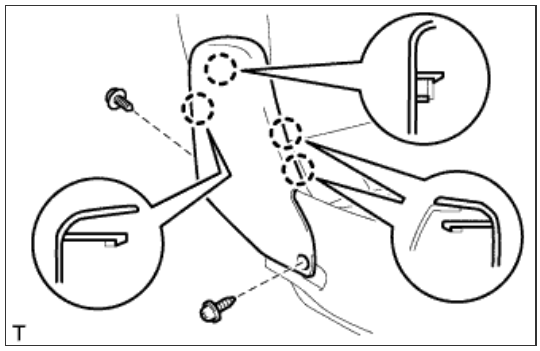
3. REMOVE RECLINING ADJUSTER RELEASE HANDLE LH



a. Remove the screw and release handle.

4. REMOVE REAR NO. 1 SEAT RECLINING COVER LH

a. Remove the 2 screws.

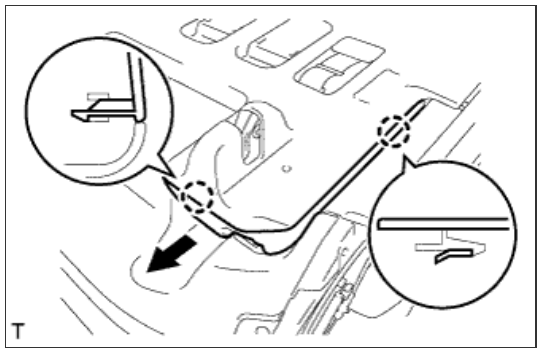


b. Detach the 3 claws in the order shown in the illustration and then remove the cover.

5. REMOVE REAR NO. 1 SEAT RECLINING COVER RH

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.

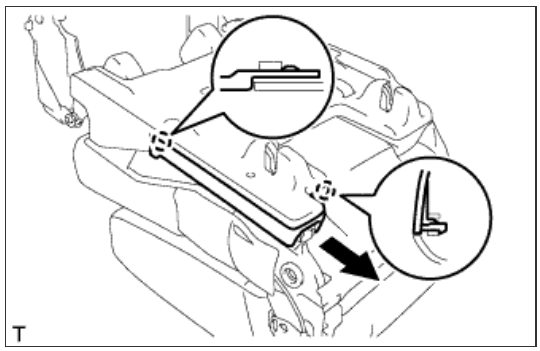


6. REMOVE UPPER SEAT TRACK RAIL COVER LH

a. Using a screwdriver detach the 2 claws and remove the cover.

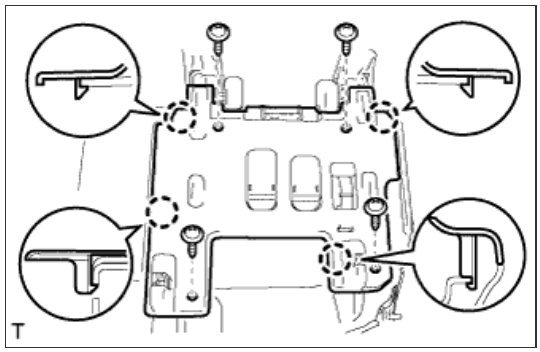
HINT:

Tape the screwdriver tip before use.



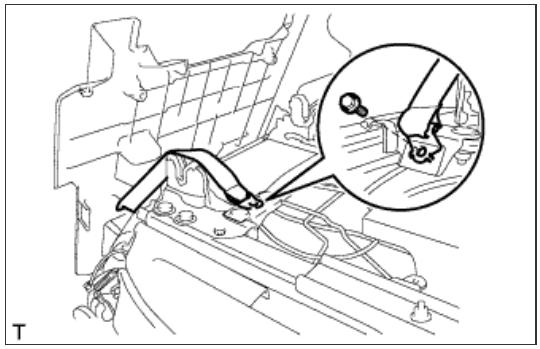
7. REMOVE UPPER SEAT TRACK RAIL COVER RH

a. Using a screwdriver detach the 2 claws and remove the cover.



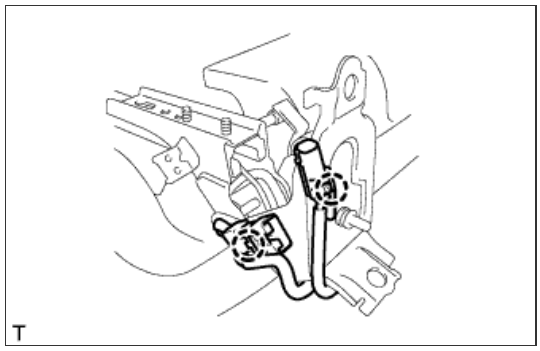
HINT:

Tape the screwdriver tip before use.



8. REMOVE REAR NO. 2 SEAT LEG SIDE COVER

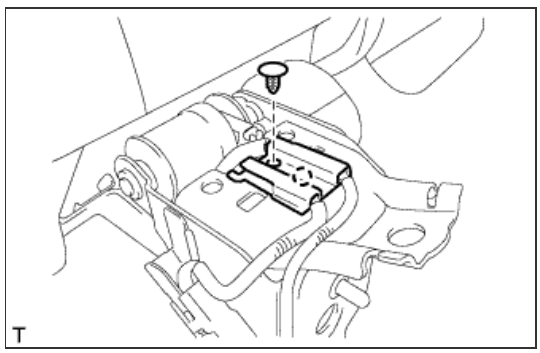
a. Remove the 4 screws and detach the 4 claws.



b. Remove the bolt that is securing the fold seat stopper band and remove the seat leg side cover together with the fold seat stopper band.

9. REMOVE REAR NO. 2 SEAT PROTECTOR

a. w/ Rear Seat Side Airbag:
Detach the claw and remove the wire harness connector.

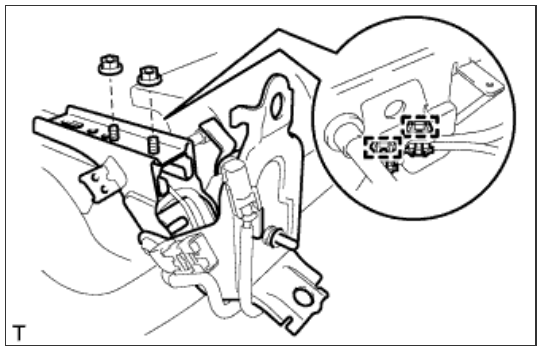


b. w/ Seat Heater System:
Detach the claw and remove the wire harness connector.

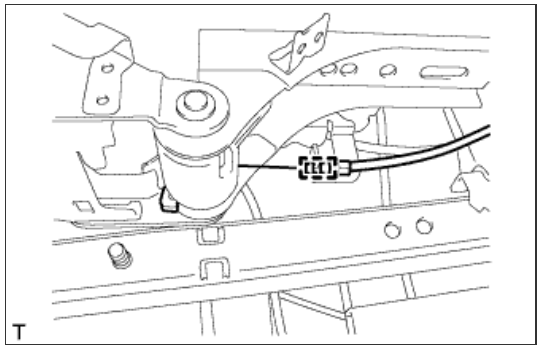
c. Using a clip remover remove the clip.

d. Detach the claw and remove the seat protector from the seat hinge.

e. Detach the 2 claws open the protector and remove wire harness.



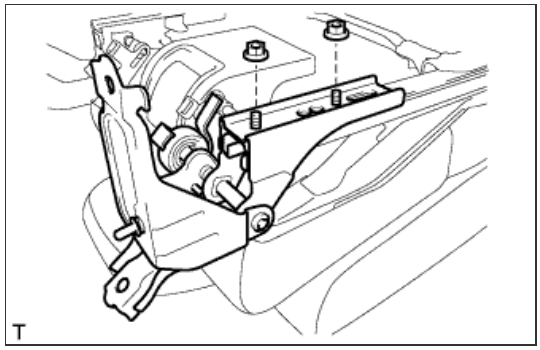
10. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH



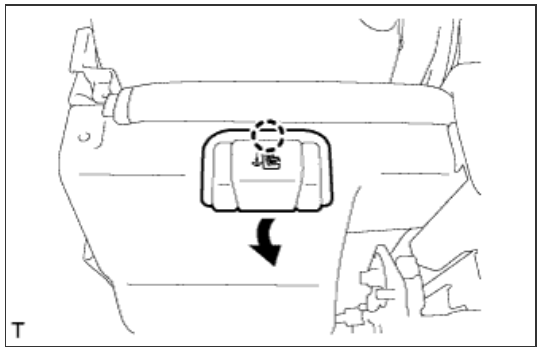
a. w/ Rear Seat Side Airbag:
Detach the wire harness clamp.

b. w/ Seat Heater System:
Detach the wire harness clamp.

c. Remove the 2 nuts and hinge.

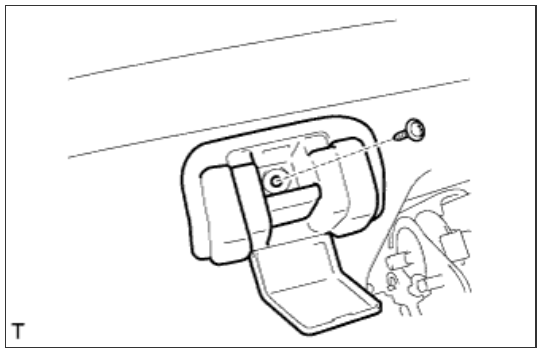


d. Detach the cable clamp and disconnect the cable.



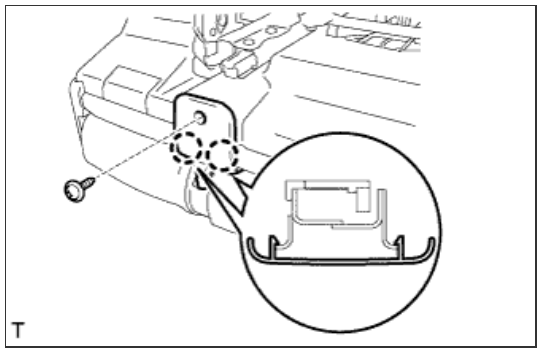
11. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH

a. Remove the 2 nuts and hinge.



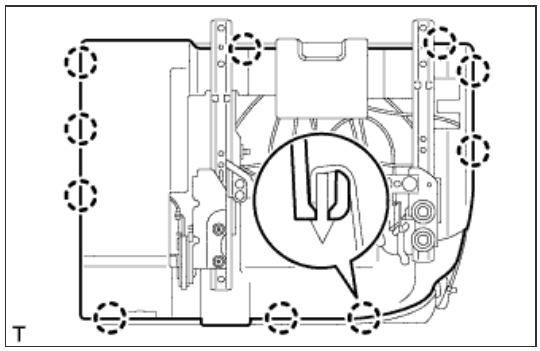
12. REMOVE SEAT BELT ANCHOR COVER CAP

a. Detach the claw and open the cap.



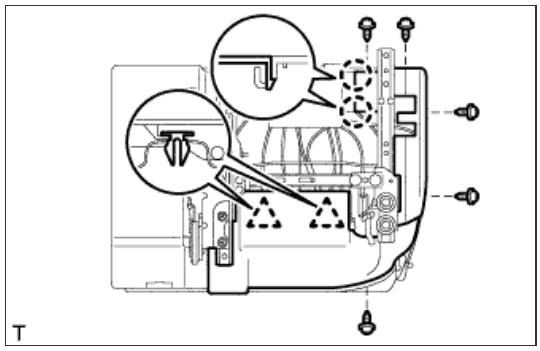
b. Remove the screw and anchor cover cap.

13. REMOVE REAR SEATBACK STAY COVER LH



a. Remove the screw.

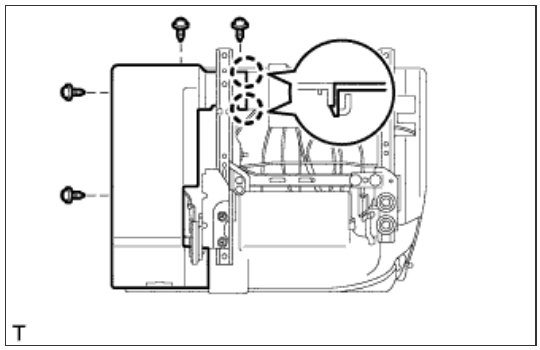
b. Detach the 2 claws and remove the cover.



14. REMOVE REAR UNDER SIDE COVER LH

a. Detach the 10 claws.

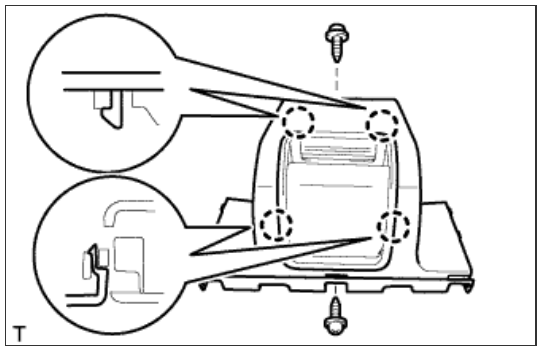
b. Remove the 5 screws.



c. Detach the 2 clips and 2 claws and remove the cover.

15. REMOVE REAR SEAT CUSHION COVER RH

a. Remove the 4 screws.

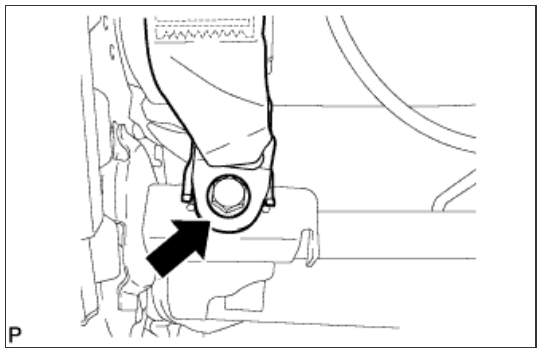


b. Detach the 2 claws and remove the cover.

16. REMOVE REAR SEAT UNDER TRAY COVER LH

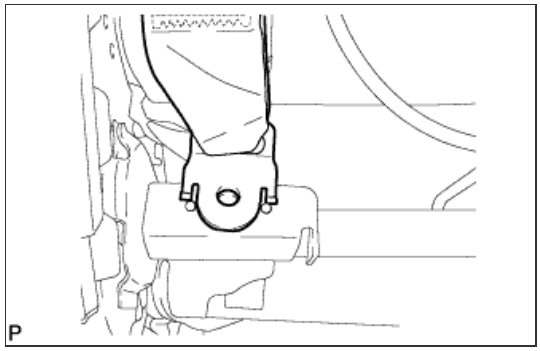
a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.



17. REMOVE REAR NO. 1 SEAT INNER BELT ASSEMBLY LH

a. Remove the bolt and belt.



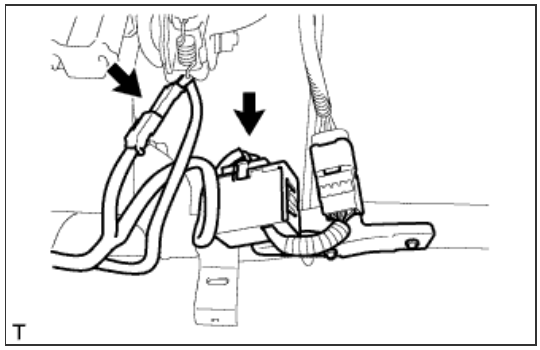
HINT:

The No. 1 seat 3 point type belt anchor is fixed with the same bolt as the rear No. 1 seat inner belt LH. Therefore it becomes disconnected when the bolt is removed.

18. DISCONNECT NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

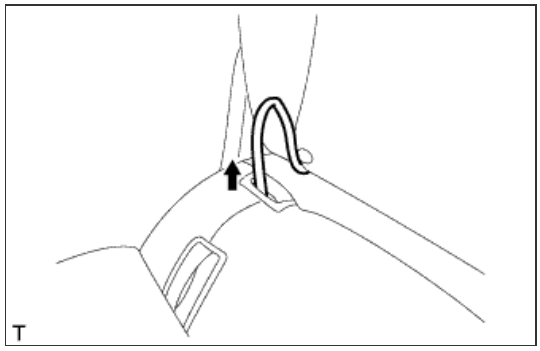
a. Disconnect the belt anchor.

19. REMOVE SEAT CUSHION COVER WITH PAD



a. w/ Rear Seat Side Airbag:

i. Detach the side airbag wire harness clamps.

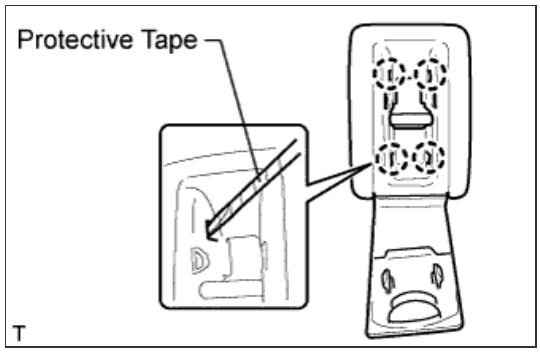


ii. Remove the side airbag wire harness through the hole in the seat cushion.

b. w/ Seat Heater System:

i. Disconnect the 2 seat heater connectors.

ii. Remove the seatback heater wire harness through the hole in the seat cushion.



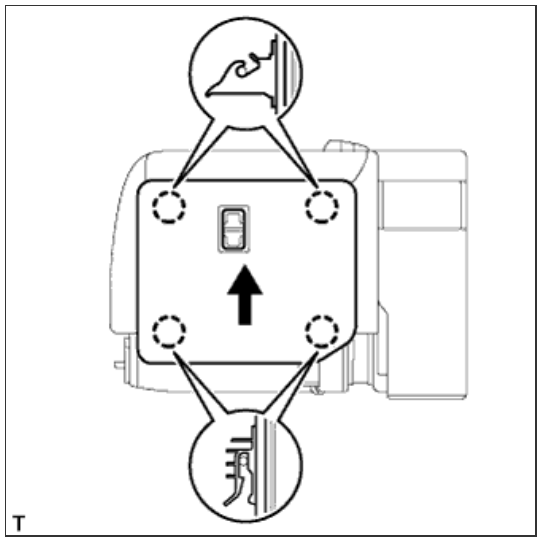
c. Remove the seat cushion cover with pad.

20. REMOVE REAR SEATBACK COVER

a. Using a screwdriver detach the 4 claws and remove the cover.

HINT:

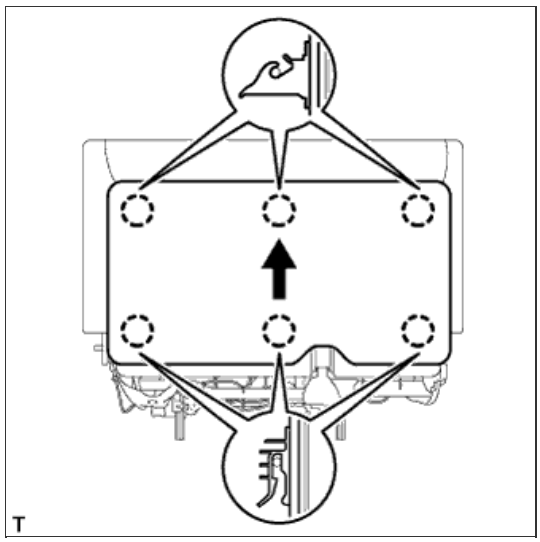
Tape the screwdriver tip before use.



21. REMOVE REAR SEATBACK BOARD SUB-ASSEMBLY LH

a. w/ Center Armrest:

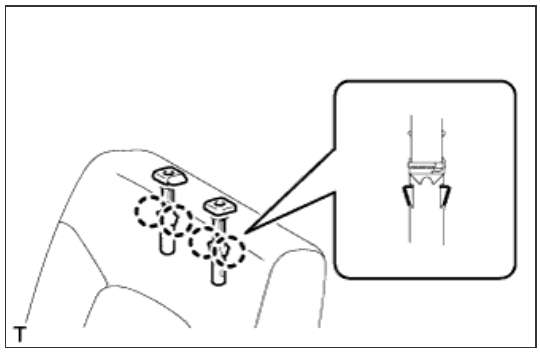
i. Detach the 2 claws on the top of the board.



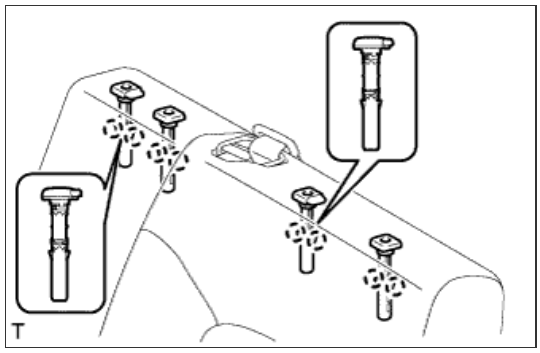
ii. Pull up the board to detach the 2 claws on the bottom of the board and remove it.

b. w/o Center Armrest:

i. Detach the 3 claws on the top of the board.



ii. Pull up the board to detach the 3 claws on the bottom of the board and remove it.

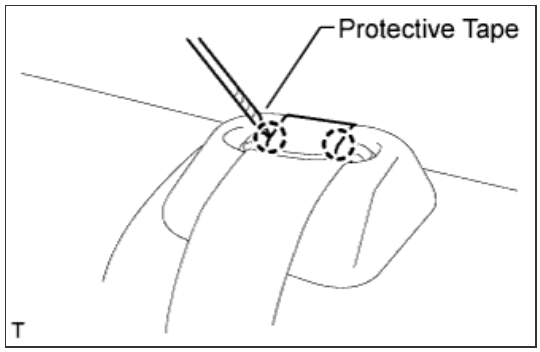


22. REMOVE REAR SEAT HEADREST ASSEMBLY

23. REMOVE REAR NO. 1 SEAT HEADREST SUPPORT ASSEMBLY

a. w/ Center Armrest:
Detach the 4 claws and remove the 2 supports.

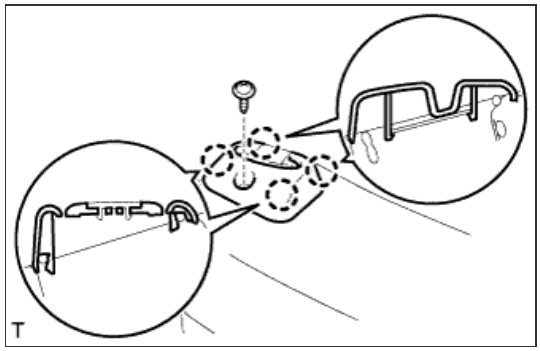
b. w/o Center Armrest:
Detach the 8 claws and remove the 4 supports.



24. REMOVE SHOULDER BELT ANCHOR COVER

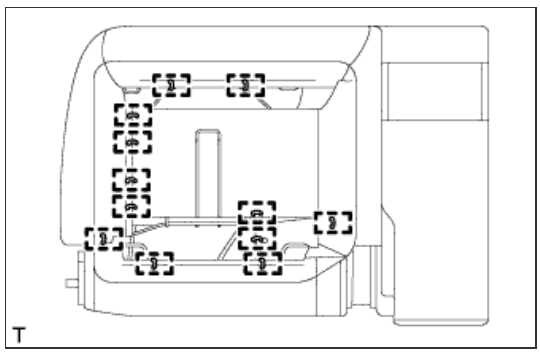
a. Using a screwdriver detach the 2 claws and remove the cover.

HINT:



Tape the screwdriver tip before use.

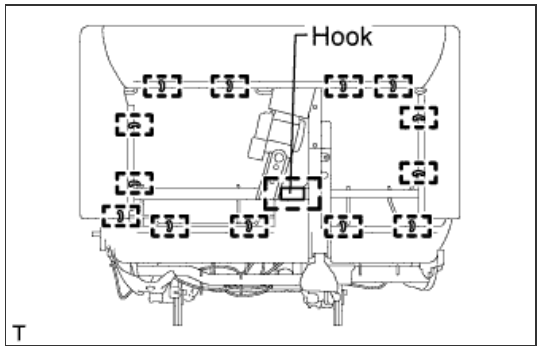
25. REMOVE REAR SEAT BELT HOLE COVER LH



a. Remove the screw.

b. Detach the 4 claws and remove the cover.

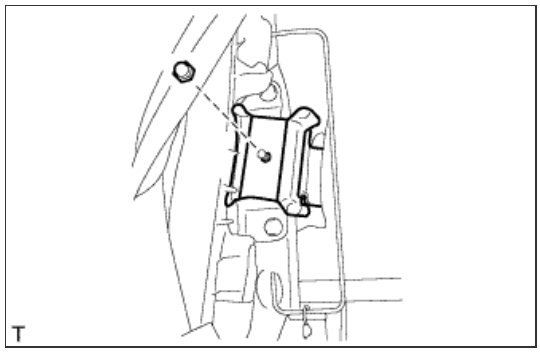
26. REMOVE SEATBACK COVER WITH PAD



a. w/ Center Armrest:
Remove the hog rings.

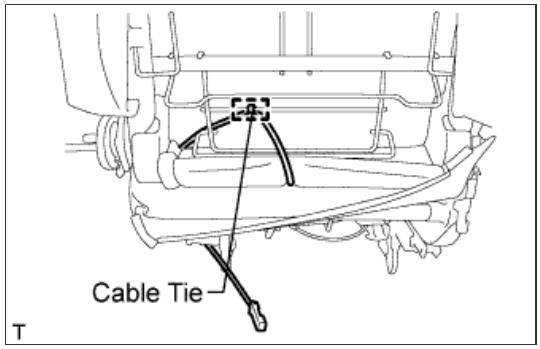
b. w/o Center Armrest:

i. Remove the hog rings.



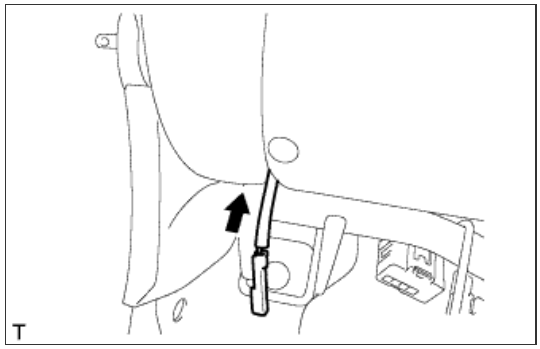
ii. Detach the hook.

c. w/ Rear Seat Side Airbag:

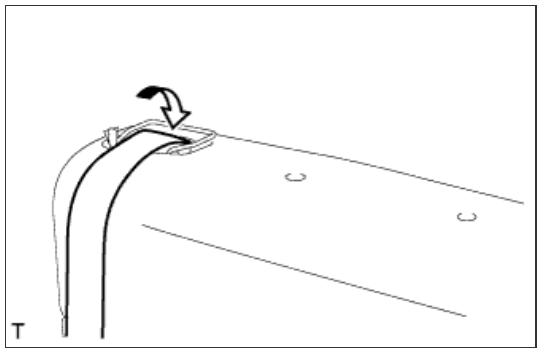


i. Remove the cap nut and seatback cover bracket from the seat frame.

ii. Remove the side airbag wire harness through the hole in the seatback.

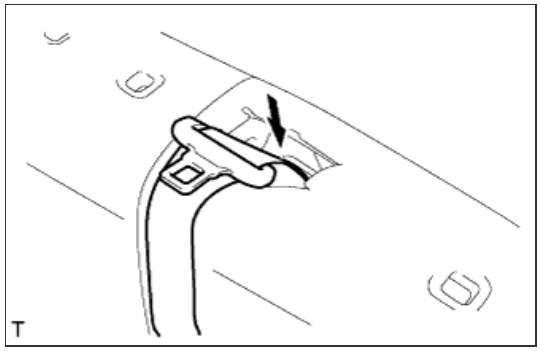


d. w/ Seat Heater System:

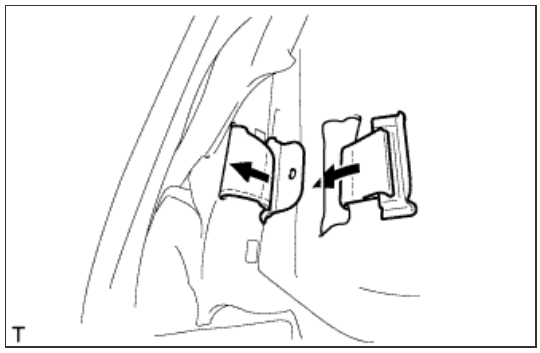


i. Cut the cable tie and disconnect the seatback heater wire harness.

ii. Remove the seatback heater wire harness through the hole in the seatback.

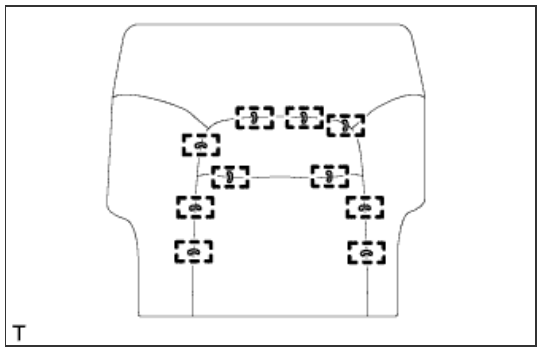


e. w/ Center Armrest:
Pull the seat belt into the inside of the seat.

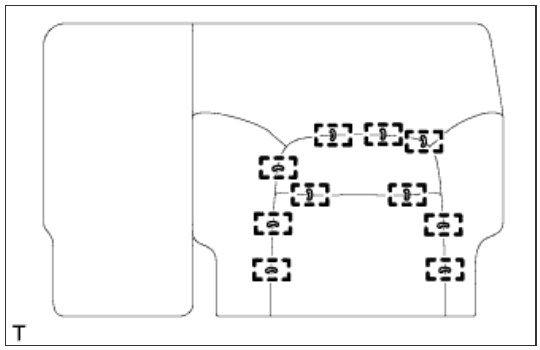


f. w/o Center Armrest:
Pull the seat belt into the inside of the seat.

g. Remove the seatback cover with pad.

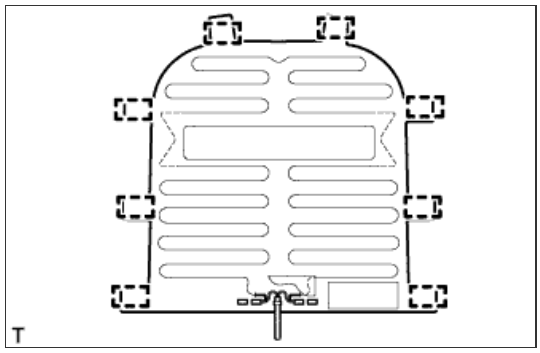


27. REMOVE REAR SEPARATE TYPE SEATBACK COVER



a. w/ Rear Seat Side Airbag:
Disconnect the seatback cover bracket from the seatback pad.

b. w/ Center Armrest:
Remove the hog rings and rear seatback cover.



c. w/o Center Armrest:
Remove the hog rings and rear seatback cover.

28. REMOVE REAR SEATBACK HEATER ASSEMBLY

a. Cut off the tack pins which fasten the seatback heater to the seatback cover and then remove the seatback heater from the seatback cover.

for Preparation Click here

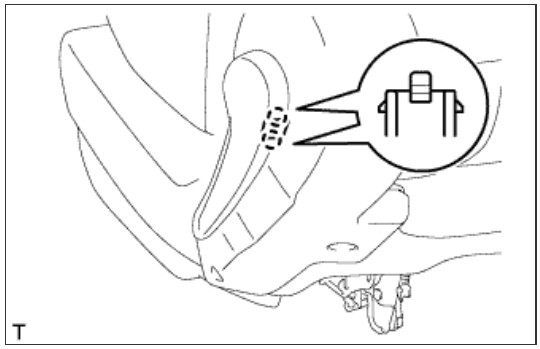
CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

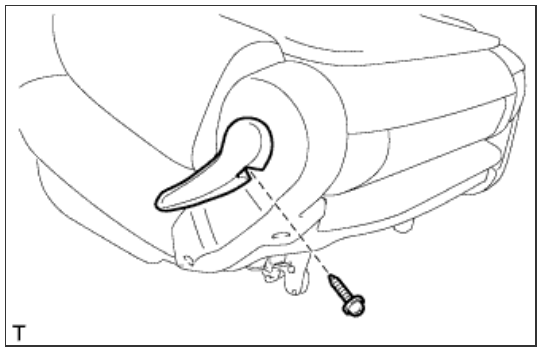
1. REMOVE REAR NO. 1 SEAT ASSEMBLY LH



a. Remove the rear No. 1 seat assembly (Click here).

2. REMOVE SEAT ADJUSTER BOLT COVER

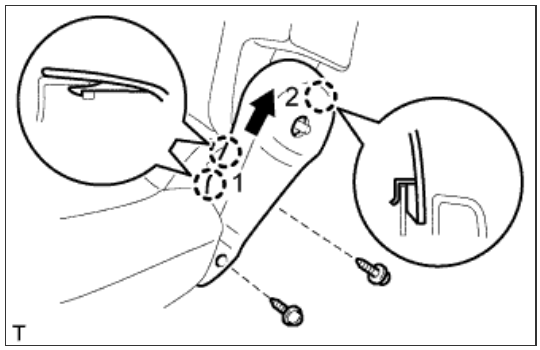
a. Using a screwdriver detach the 2 claws and remove the cover.



HINT:

Tape the screwdriver tip before use.

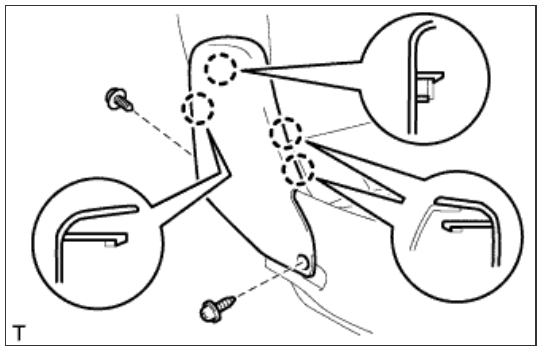
3. REMOVE RECLINING ADJUSTER RELEASE HANDLE LH



a. Remove the screw and release handle.

4. REMOVE REAR NO. 1 SEAT RECLINING COVER LH

a. Remove the 2 screws.

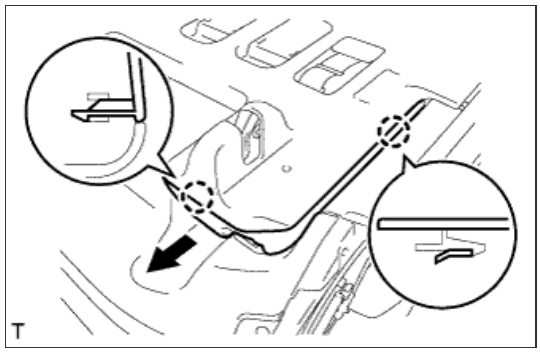


b. Detach the 3 claws in the order shown in the illustration and then remove the cover.

5. REMOVE REAR NO. 1 SEAT RECLINING COVER RH

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.

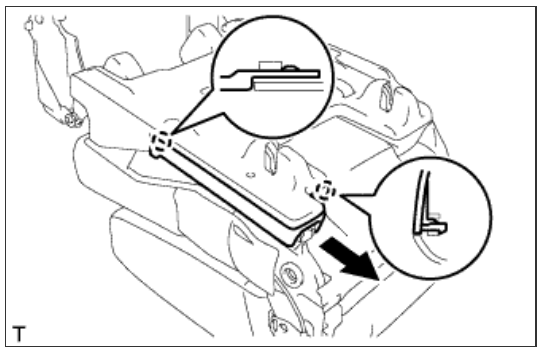


6. REMOVE UPPER SEAT TRACK RAIL COVER LH

a. Using a screwdriver detach the 2 claws and remove the cover.

HINT:

Tape the screwdriver tip before use.



7. REMOVE UPPER SEAT TRACK RAIL COVER RH

a. Using a screwdriver detach the 2 claws and remove the cover.

HINT:

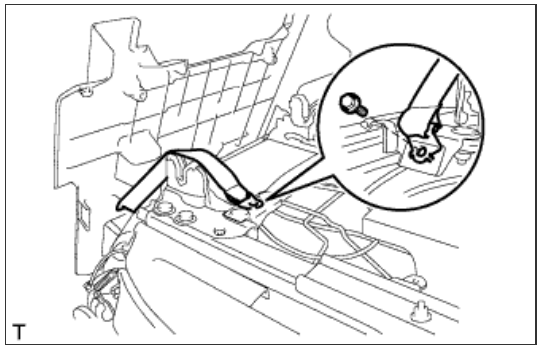
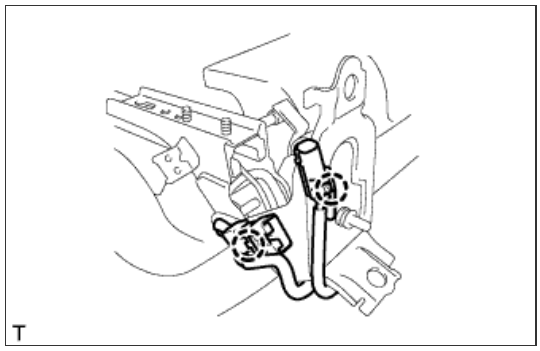
Tape the screwdriver tip before use.



8. REMOVE REAR NO. 2 SEAT LEG SIDE COVER

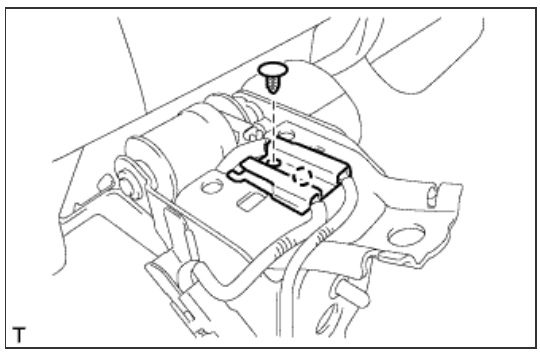
a. Remove the 4 screws and detach the 4 claws.



b. Remove the bolt that is securing the fold seat stopper band and remove the seat leg side cover together with the fold seat stopper band.

9. REMOVE REAR NO. 2 SEAT PROTECTOR

a. w/ Rear Seat Side Airbag:
Detach the claw and remove the wire harness connector.

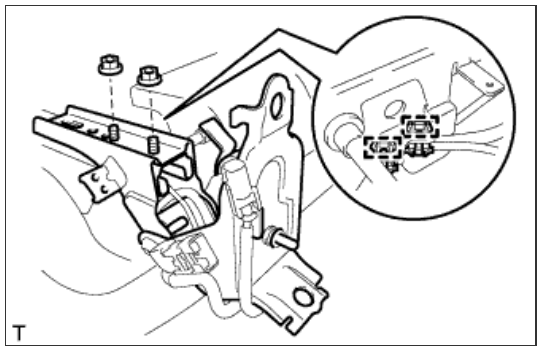


b. w/ Seat Heater System:
Detach the claw and remove the wire harness connector.

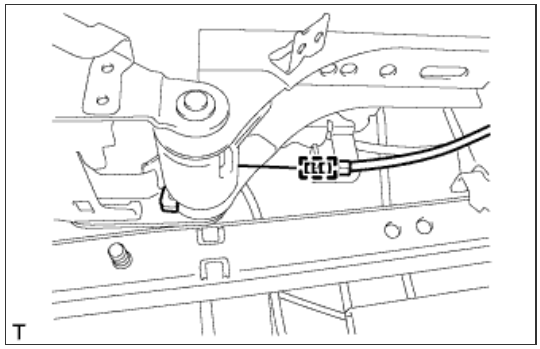
c. Using a clip remover remove the clip.

d. Detach the claw and remove the seat protector from the seat hinge.

e. Detach the 2 claws open the protector and remove wire harness.



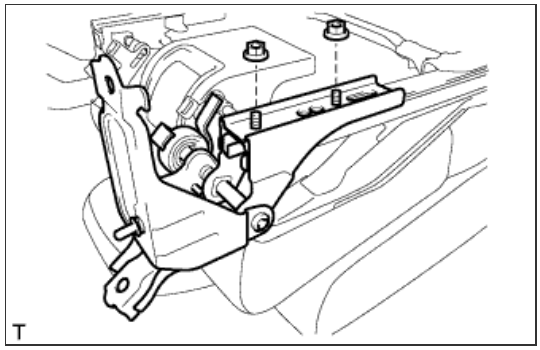
10. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH



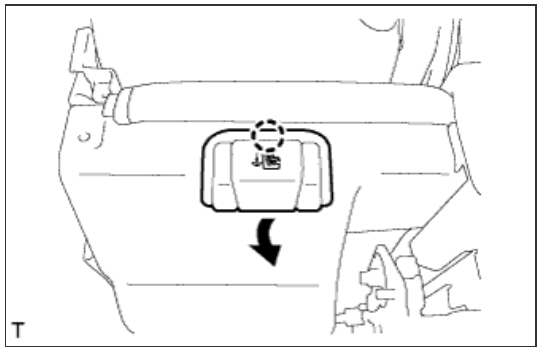
a. w/ Rear Seat Side Airbag:
Detach the wire harness clamp.

b. w/ Seat Heater System:
Detach the wire harness clamp.

c. Remove the 2 nuts and hinge.

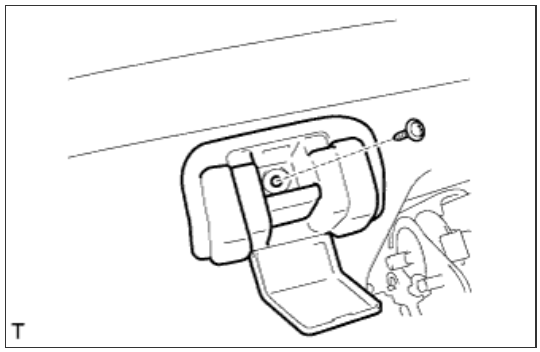


d. Detach the cable clamp and disconnect the cable.



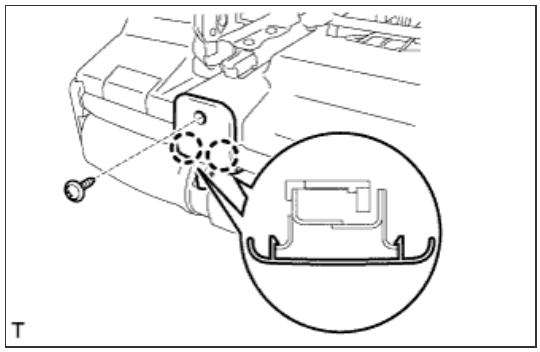
11. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH

a. Remove the 2 nuts and hinge.



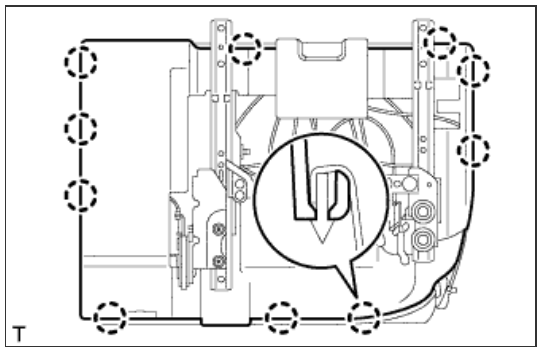
12. REMOVE SEAT BELT ANCHOR COVER CAP

a. Detach the claw and open the cap.



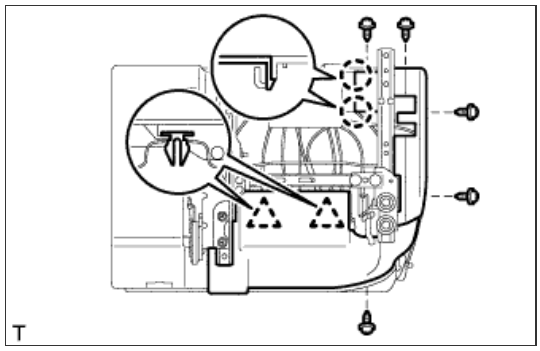
b. Remove the screw and anchor cover cap.

13. REMOVE REAR SEATBACK STAY COVER LH



a. Remove the screw.

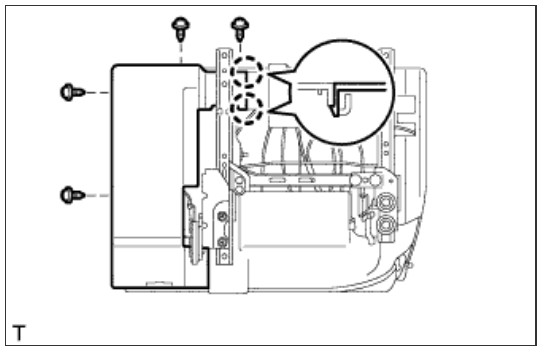
b. Detach the 2 claws and remove the cover.



14. REMOVE REAR UNDER SIDE COVER LH

a. Detach the 10 claws.

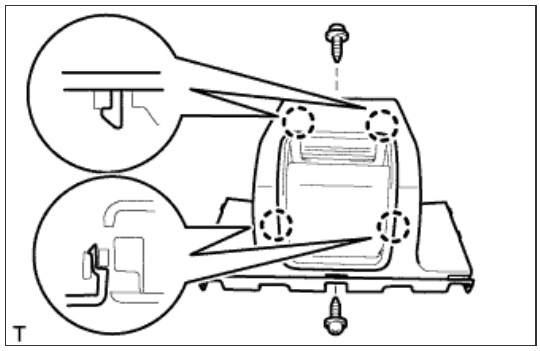
b. Remove the 5 screws.



c. Detach the 2 clips and 2 claws and remove the cover.

15. REMOVE REAR SEAT CUSHION COVER RH

a. Remove the 4 screws.

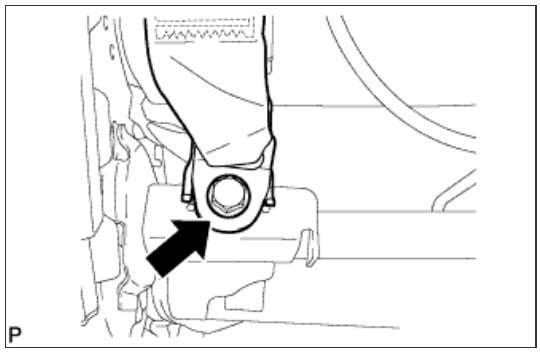


b. Detach the 2 claws and remove the cover.

16. REMOVE REAR SEAT UNDER TRAY COVER LH

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.



17. REMOVE REAR NO. 1 SEAT INNER BELT ASSEMBLY LH

a. Remove the bolt and belt.

HINT:

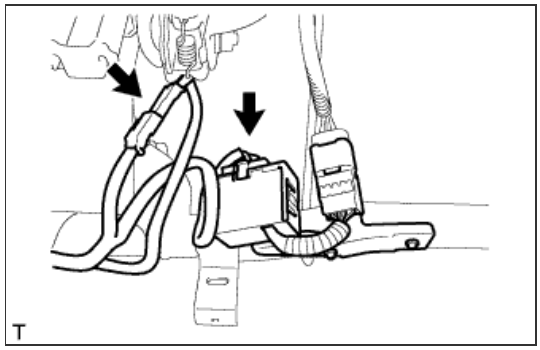
The No. 1 seat 3 point type belt anchor is fixed with the same bolt as the rear No. 1 seat inner belt LH. Therefore it becomes disconnected when the bolt is removed.

18. DISCONNECT NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

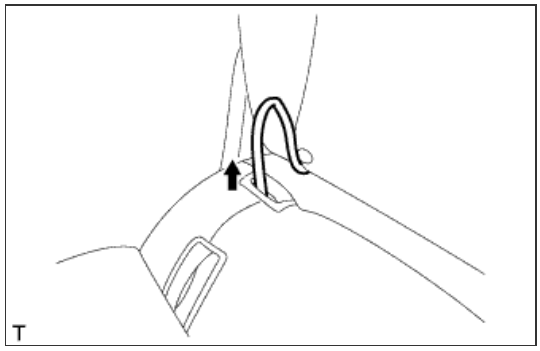
a. Disconnect the belt anchor.

19. REMOVE SEAT CUSHION COVER WITH PAD



a. w/ Rear Seat Side Airbag:

i. Detach the side airbag wire harness clamps.

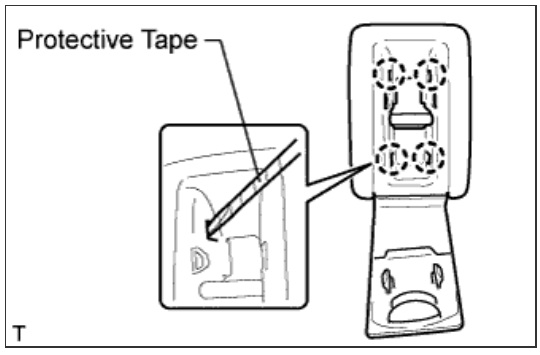


ii. Remove the side airbag wire harness through the hole in the seat cushion.

b. w/ Seat Heater System:

i. Disconnect the 2 seat heater connectors.

ii. Remove the seatback heater wire harness through the hole in the seat cushion.



c. Remove the seat cushion cover with pad.

20. REMOVE REAR SEATBACK COVER

a. Using a screwdriver detach the 4 claws and remove the cover.

HINT:

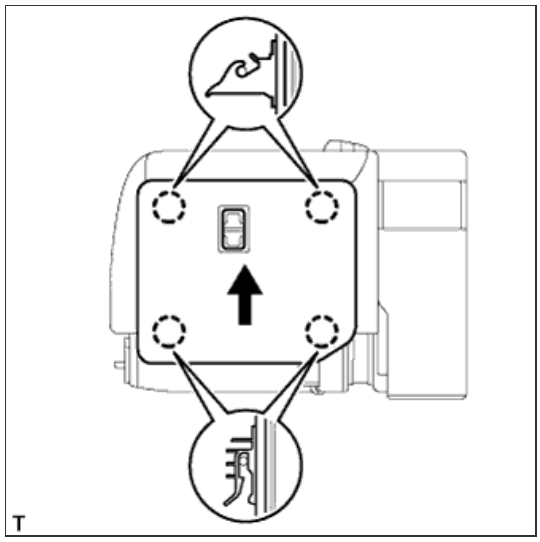
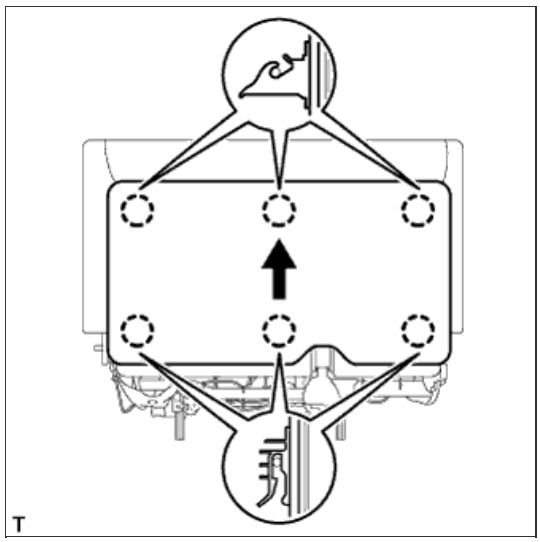
Tape the screwdriver tip before use.



21. REMOVE REAR SEATBACK BOARD SUB-ASSEMBLY LH

a. w/ Center Armrest:

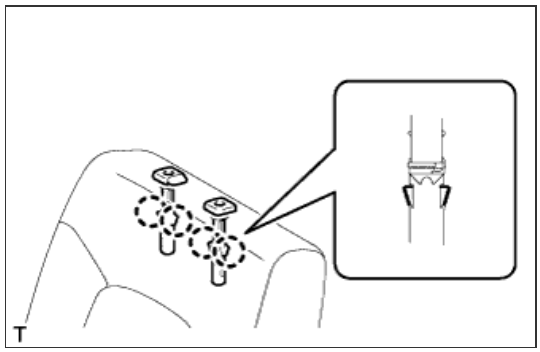
i. Detach the 2 claws on the top of the board.



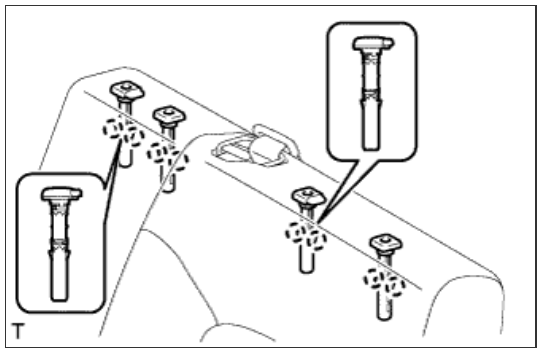
ii. Pull up the board to detach the 2 claws on the bottom of the board and remove it.

b. w/o Center Armrest:

i. Detach the 3 claws on the top of the board.



ii. Pull up the board to detach the 3 claws on the bottom of the board and remove it.

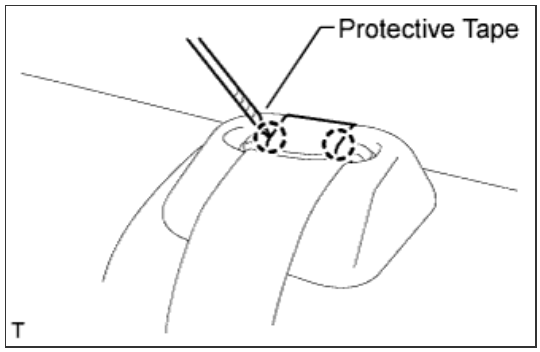


22. REMOVE REAR SEAT HEADREST ASSEMBLY

23. REMOVE REAR NO. 1 SEAT HEADREST SUPPORT ASSEMBLY

a. w/ Center Armrest:
Detach the 4 claws and remove the 2 supports.

b. w/o Center Armrest:
Detach the 8 claws and remove the 4 supports.



24. REMOVE SHOULDER BELT ANCHOR COVER

a. Using a screwdriver detach the 2 claws and remove the cover.

HINT:

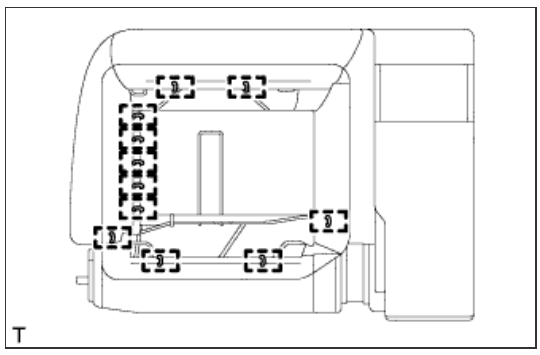
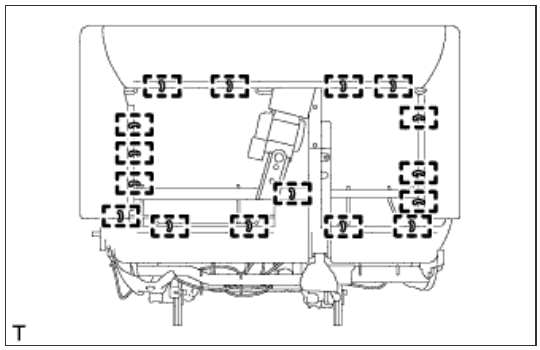
Tape the screwdriver tip before use.

25. REMOVE REAR SEAT BELT HOLE COVER LH



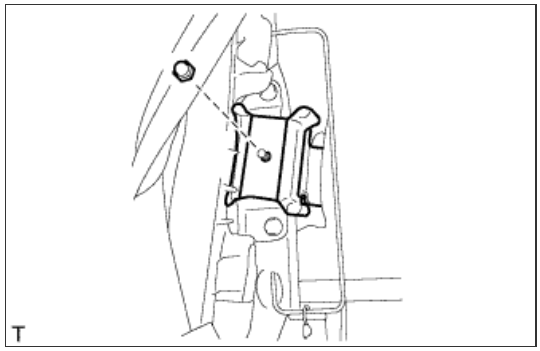
a. Remove the screw.

b. Detach the 4 claws and remove the cover.



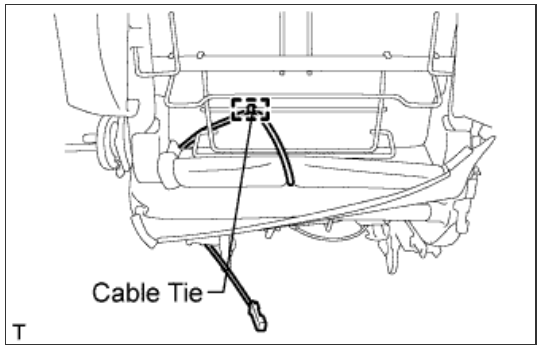
26. REMOVE SEATBACK COVER WITH PAD

a. w/ Center Armrest:
Remove the hog rings.



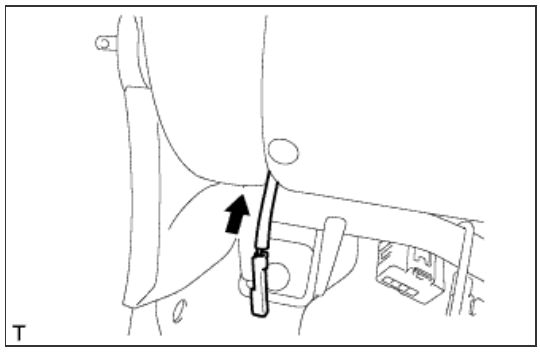
b. w/o Center Armrest:
Remove the hog rings.

c. w/ Rear Seat Side Airbag:

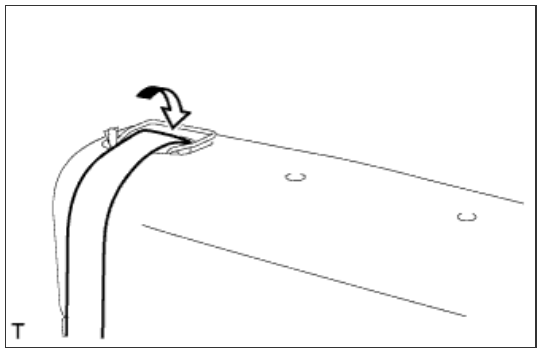


i. Remove the cap nut and seatback cover bracket from the seat frame.

ii. Remove the side airbag wire harness through the hole in the seatback.

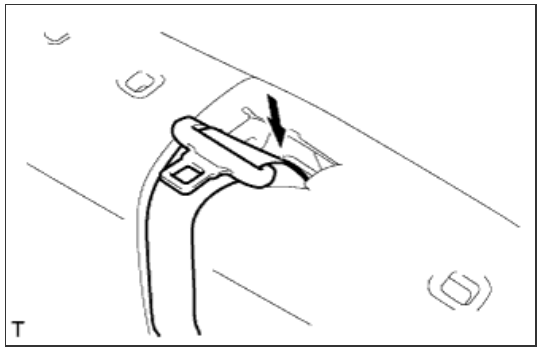


d. w/ Seat Heater System:

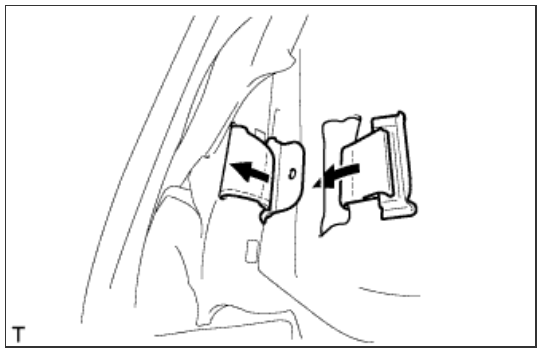


i. Cut the cable tie and disconnect the seatback heater wire harness.

ii. Remove the seatback heater wire harness through the hole in the seatback.

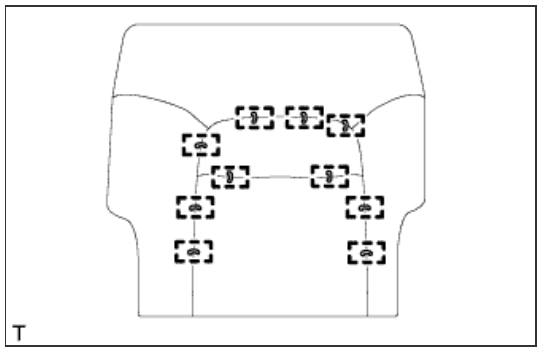


e. w/ Center Armrest:
Pull the seat belt into the inside of the seat.

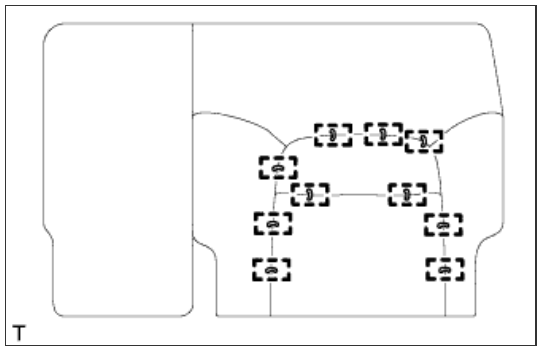


f. w/o Center Armrest:
Pull the seat belt into the inside of the seat.

g. Remove the seatback cover with pad.

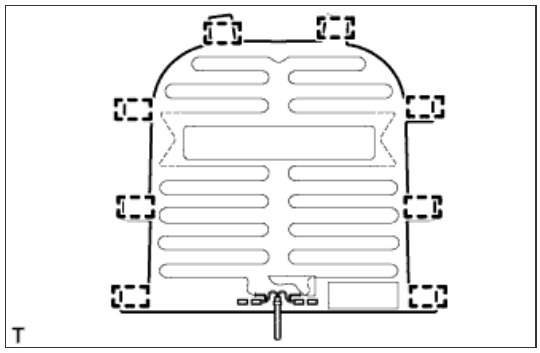


27. REMOVE REAR SEPARATE TYPE SEATBACK COVER



a. w/ Rear Seat Side Airbag:
Disconnect the seatback cover bracket from the seatback pad.

b. w/ Center Armrest:
Remove the hog rings and rear seatback cover.



c. w/o Center Armrest:
Remove the hog rings and rear seatback cover.

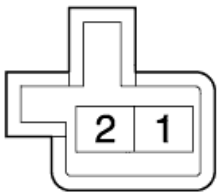
28. REMOVE REAR SEATBACK HEATER ASSEMBLY

a. Cut off the tack pins which fasten the seatback heater to the seatback cover and then remove the seatback heater from the seatback cover.

for Preparation Click here

1. INSPECT REAR SEATBACK HEATER ASSE B

a Check the seatback heater.



i Measure the resistance according to the value(s) in the table below.

Standard Re i tance

Tester Connection	Condition	Specified Condition
1 - 2	Seatback heater temperature 25 C ( )	.3 to 8. Ω

the result is not as specified, replace the seatback heater assembly.

Component without harness connected:
(Rear Seatback Heater)

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

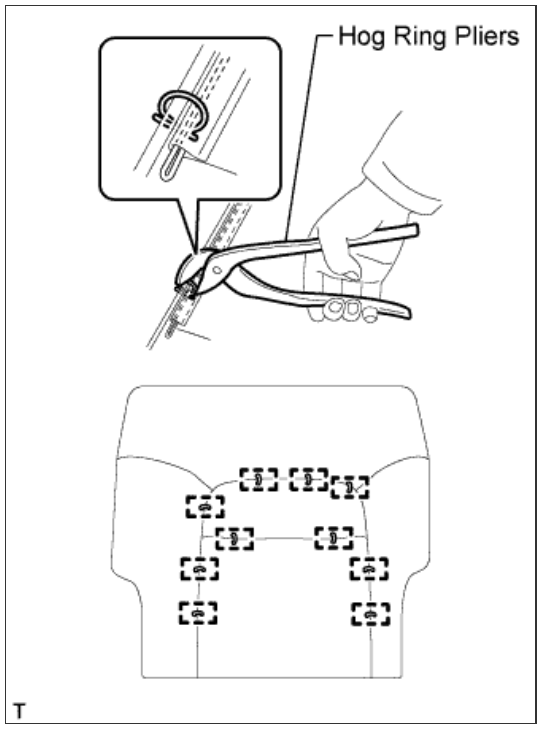
- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL REAR SEATBACK HEATER ASSEMBLY

a. Set the seatback heater with the name stamp side facing the seatback cover.

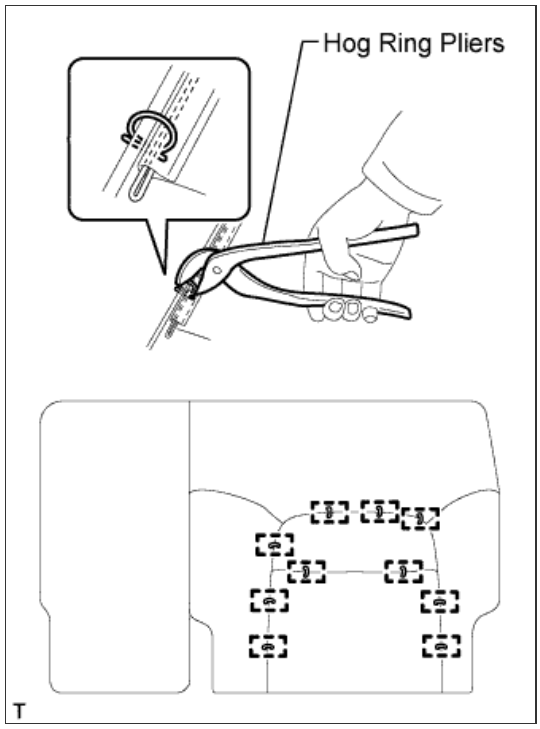
b. Install the seatback heater with new tack pins.



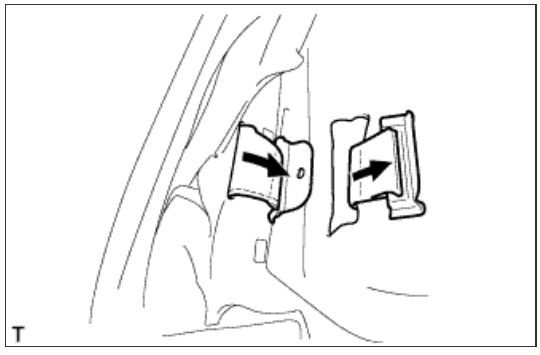
2. INSTALL REAR SEPARATE TYPE SEATBACK COVER

a. w/ Center Armrest:
Using hog ring pliers install the seatback cover with new hog rings.

NOTICE:



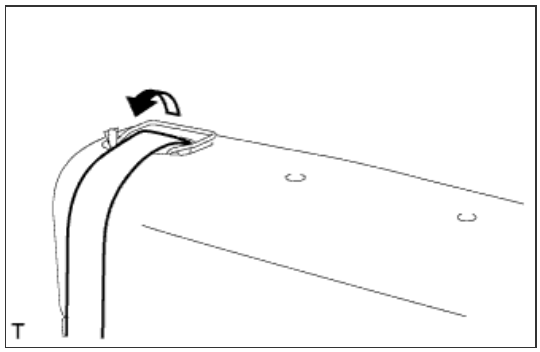
- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**



b. w/o Center Armrest:
Using hog ring pliers install the seatback cover with new hog rings.

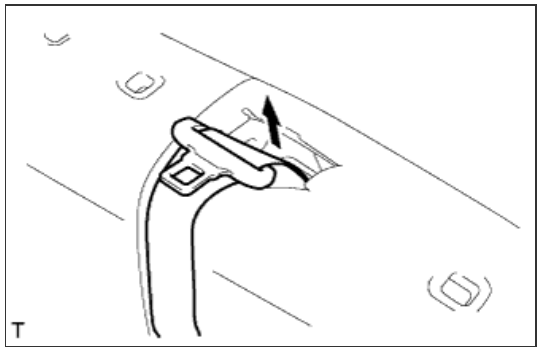
NOTICE:

- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**



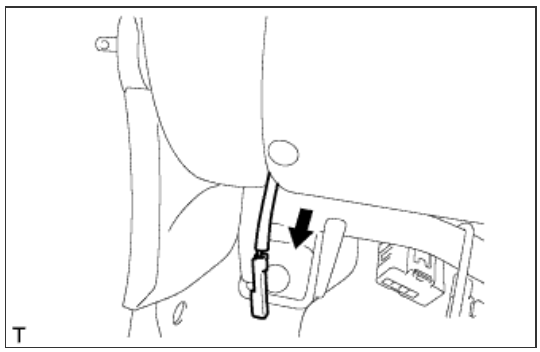
c. w/ Rear Seat Side Airbag:
Connect the seatback cover bracket to the seatback pad.

3. INSTALL SEATBACK COVER WITH PAD



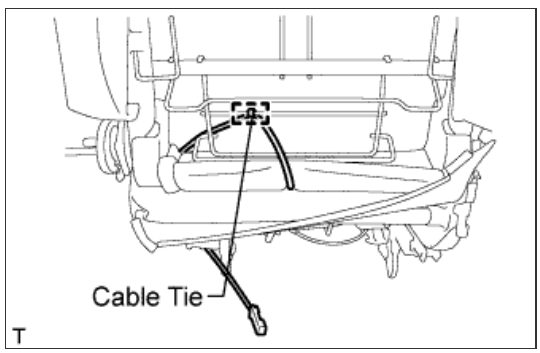
a. Install the seatback cover with pad.

b. w/ Center Armrest:
Pull out the seat belt.



c. w/o Center Armrest:
Pull out the seat belt.

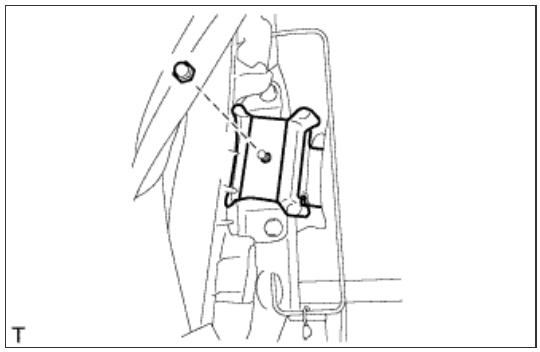
d. w/ Rear Seat Side Airbag:
Pass the side airbag wire harness through the hole in the seatback.



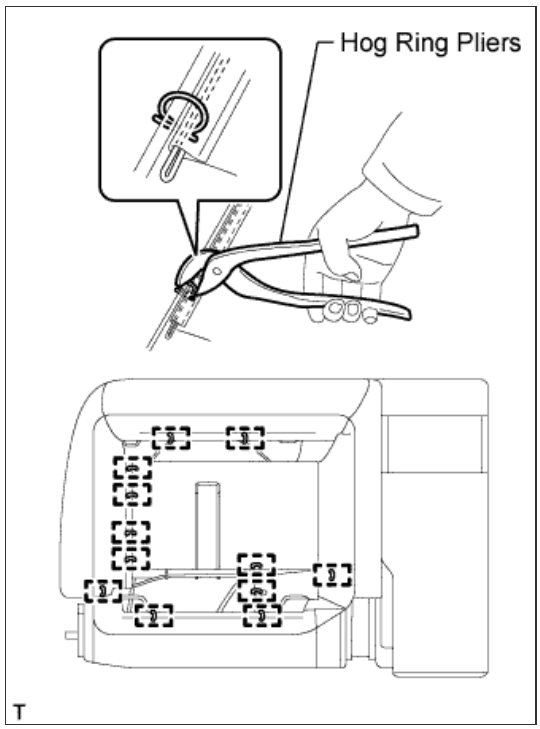
e. w/ Seat Heater System:
Pass the seatback heater wire harness through the hole in the seatback.

i.

ii. Connect the seatback heater wire harness and install a new cable tie.



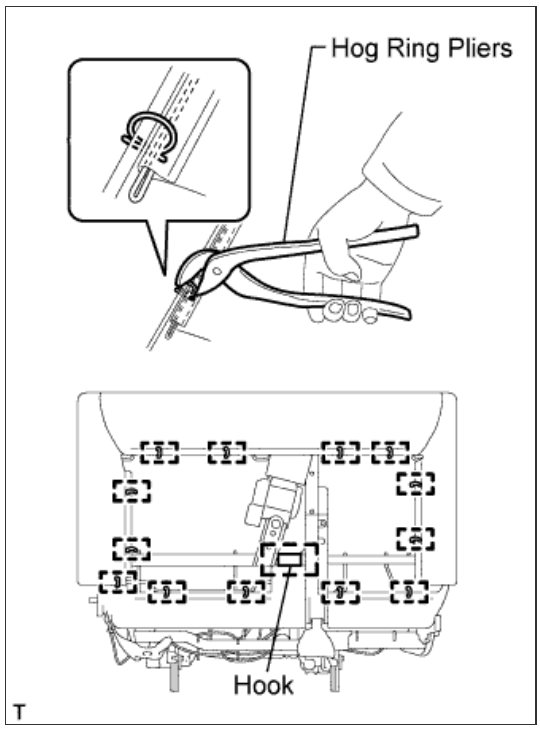
f. w/ Rear Seat Side Airbag:
Install the seatback cover bracket to the seat frame with the cap nut.



Torque:
5.5 N*m{ 56 kgf*cm , 49 in.*lbf }

NOTICE:

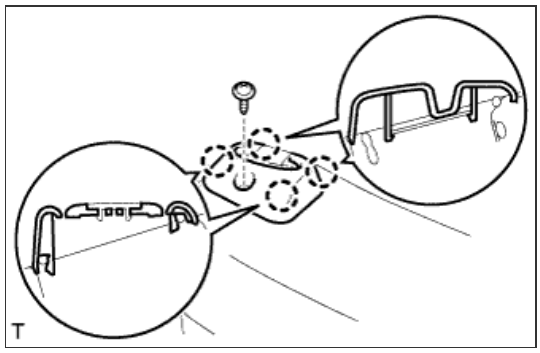
After the seatback trim cover is assembled make sure the side airbag strap is not twisted.



g. w/ Center Armrest:
Using hog ring pliers install new hog rings to the seatback frame.

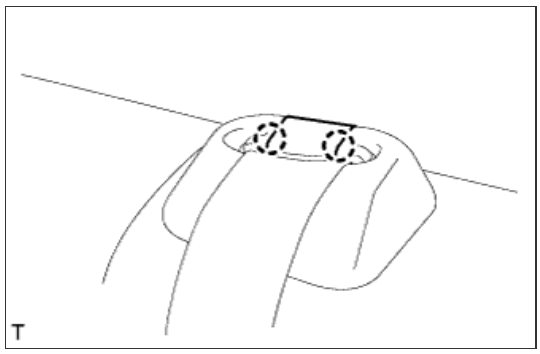
h. w/o Center Armrest:

i. Using hog ring pliers install new hog rings to the seatback frame.



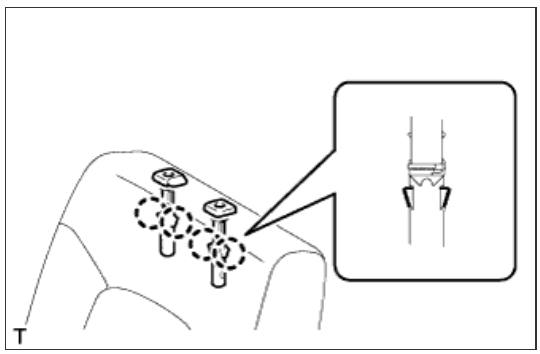
ii. Attach the hook.

4. INSTALL REAR SEAT BELT HOLE COVER LH



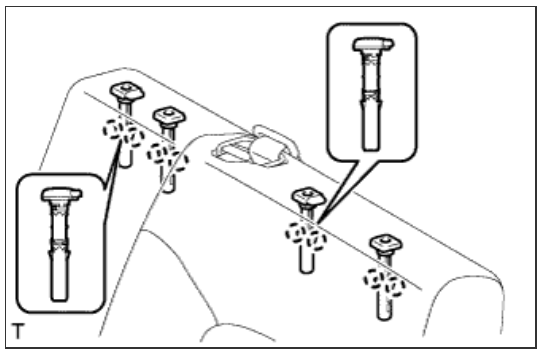
a. Attach the 4 claws to install the cover.

b. Install the screw.



5. INSTALL SHOULDER BELT ANCHOR COVER

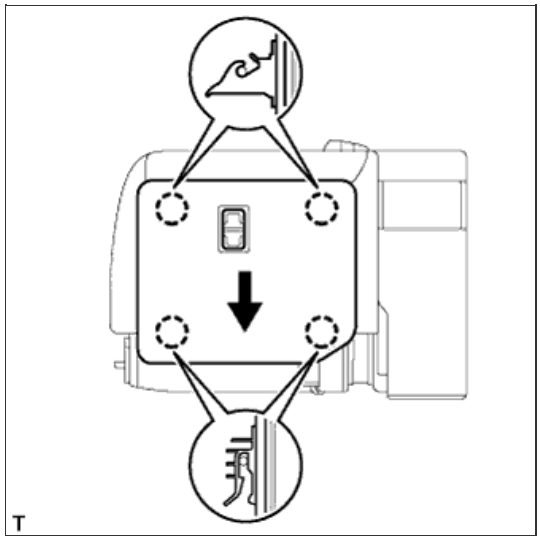
a. Attach the 2 claws to install the cover.



6. INSTALL REAR NO. 1 SEAT HEADREST SUPPORT ASSEMBLY

a. w/ Center Armrest:
Attach the 4 claws to install the 2 supports.

b. w/o Center Armrest:
Attach the claws to install the 4 supports.

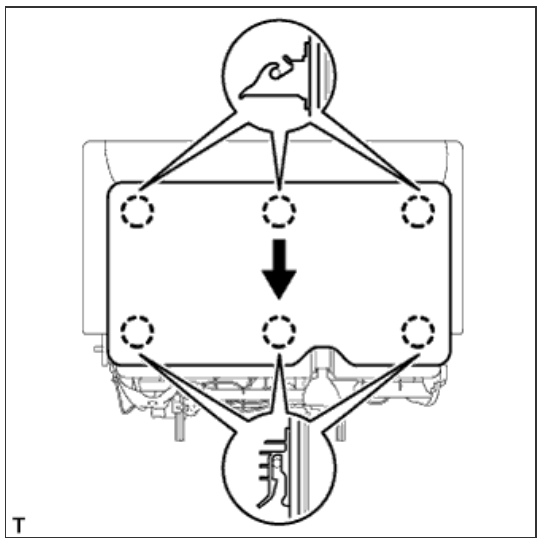


7. INSTALL REAR SEAT HEADREST ASSEMBLY

. INSTALL REAR SEATBACK BOARD SUB ASSEMBLY LH

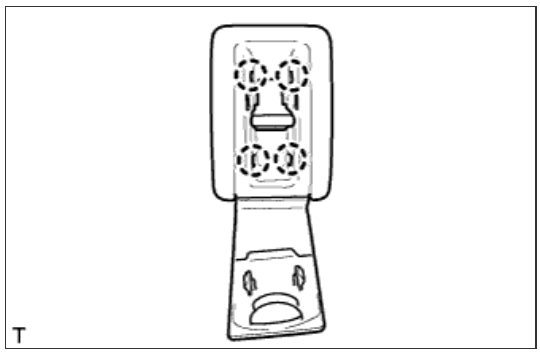
a. w/ Center Armrest:

i. Push the board down to attach the 2 claws on the bottom.



ii. Attach the 2 claws on the top of the board to install it.

b. w/o Center Armrest:

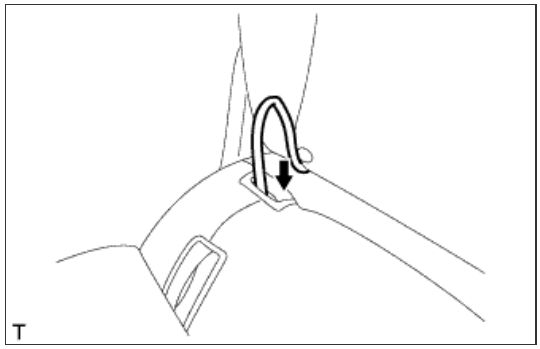


i. Push the board down to attach the 3 claws on the bottom.

ii. Attach the 3 claws on the top of the board to install it.

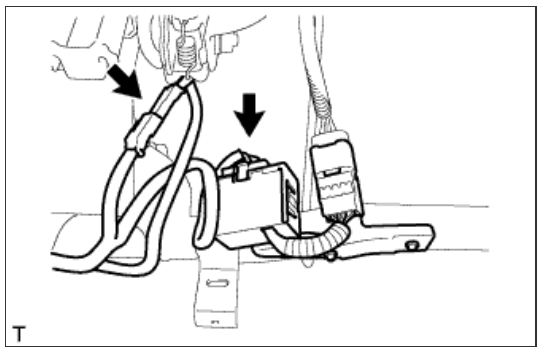
9. INSTALL REAR SEATBACK COVER

a. Attach the 4 claws to install the cover.



10. INSTALL SEAT CUSHION COVER WITH PAD

a. Install the seat cushion cover with pad.

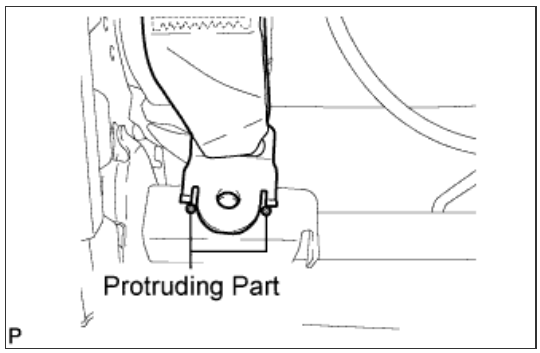


b. w/ Rear Seat Side Airbag:
Pass the side airbag wire harness through the hole in the seat cushion.

c. w/ Seat Heater System:

i. Pass the seatback heater wire harness through the hole in the seat cushion.

ii. Connect the 2 seat heater connectors.



d. w/ Rear Seat Side Airbag:
Attach the side airbag wire harness clamps.

11. CONNECT NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

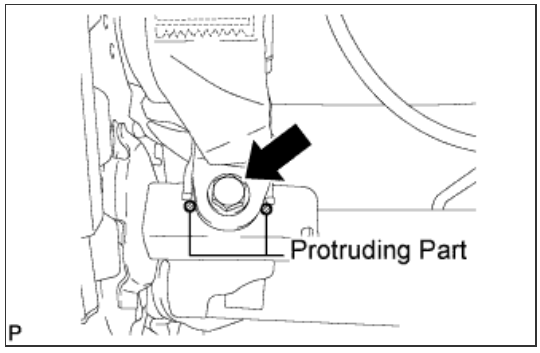
a. Connect the belt anchor.

NOTICE:

Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.

12. INSTALL REAR NO. 1 SEAT INNER BELT ASSEMBLY LH

a. Install the belt with the bolt.

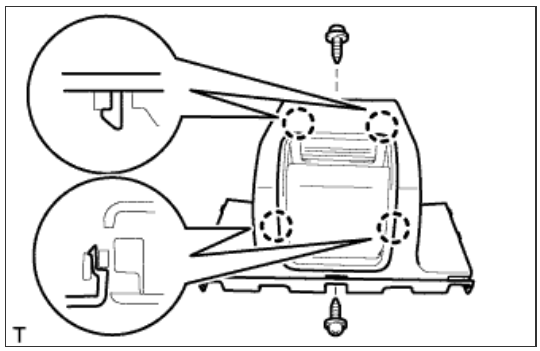


Torque:
42 N*m{ 42 kgf*cm , 31 ft.*lbf }

NOTICE:

Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.

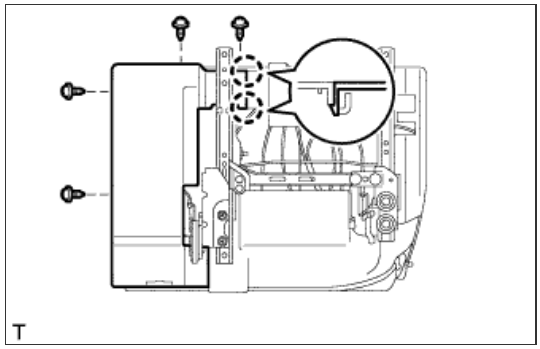
HINT:



The No. 1 seat 3 point type belt anchor is fixed with the same bolt as the rear No. 1 seat inner belt LH. Therefore connect it when installing the rear No. 1 seat inner belt LH.

13. INSTALL REAR SEAT UNDER TRAY COVER LH

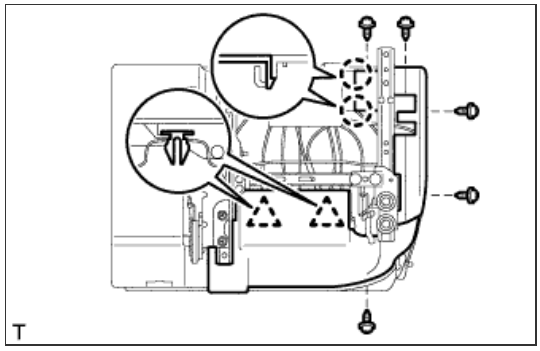
a. Attach the 4 claws to install the cover.



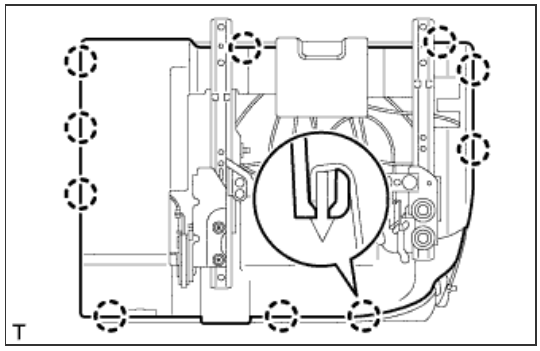
b. Install the 2 screws.

14. INSTALL REAR SEAT CUSHION COVER RH

a. Attach the 2 claws to install the cover.



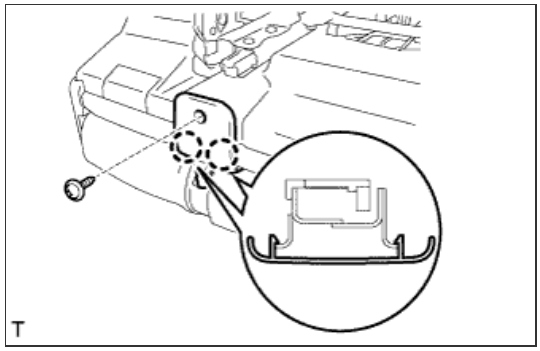
b. Install the 4 screws.



15. INSTALL REAR UNDER SIDE COVER LH

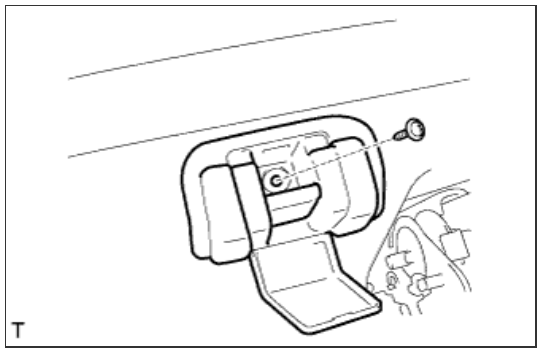
a. Attach the 2 claws and 2 clips to install the cover.

b. Install the 5 screws.



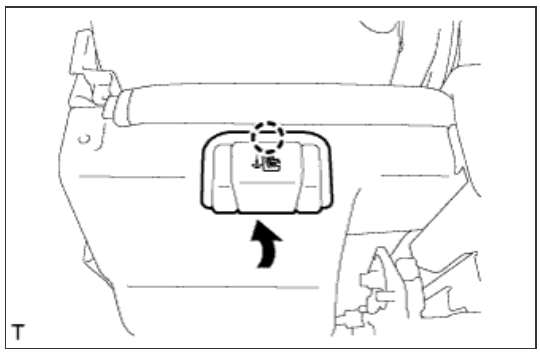
c. Attach the 10 claws.

16. INSTALL REAR SEATBACK STAY COVER LH



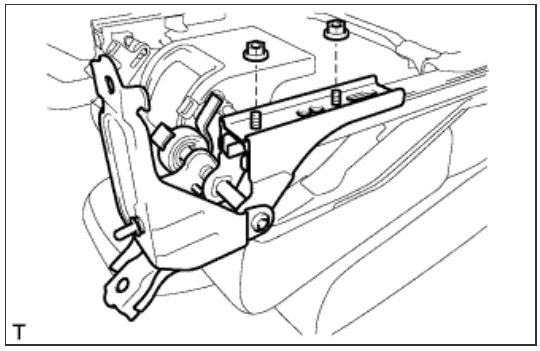
a. Attach the 2 claws to install the cover.

b. Install the screw.



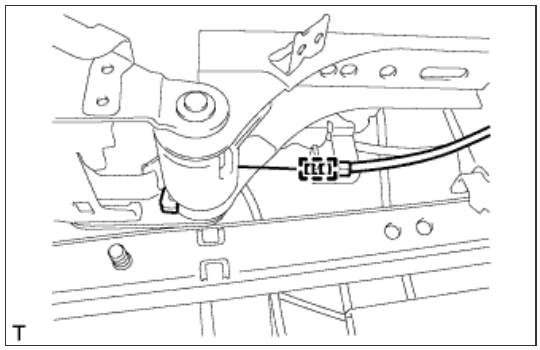
17. INSTALL SEAT BELT ANCHOR COVER CAP

a. Install the anchor cover cap with the screw.



b. Attach the claw to close the cap.

1 . INSTALL REAR NO. 1 SEAT HINGE SUB ASSEMBLY RH

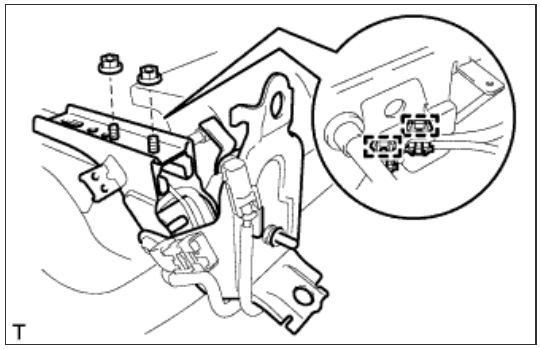


a. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 42 kgf*cm , 31 ft.*lbf }

19. INSTALL REAR NO. 1 SEAT HINGE SUB ASSEMBLY LH

a. Attach the cable clamp to connect the cable.

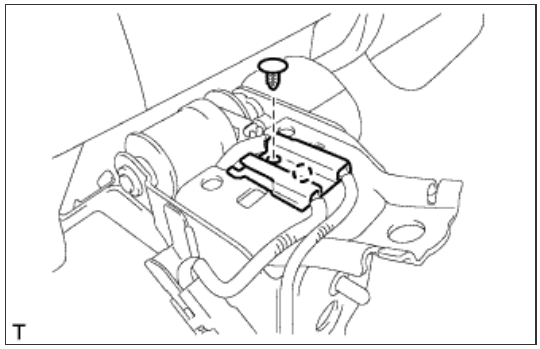


b. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 42 kgf*cm , 31 ft.*lbf }

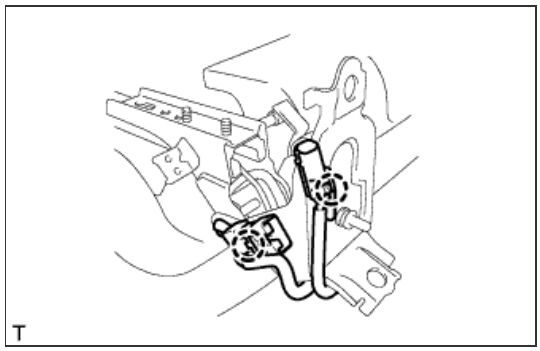
c. w/ Rear Seat Side Airbag:
Attach the wire harness clamp.

d. w/ Seat Heater System:
Attach the wire harness clamp.



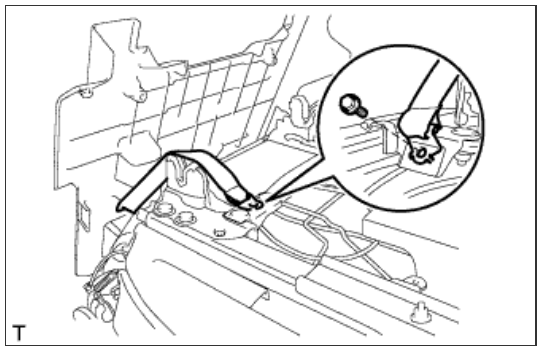
20. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Install the wire harness and attach 2 claws to close the protector.



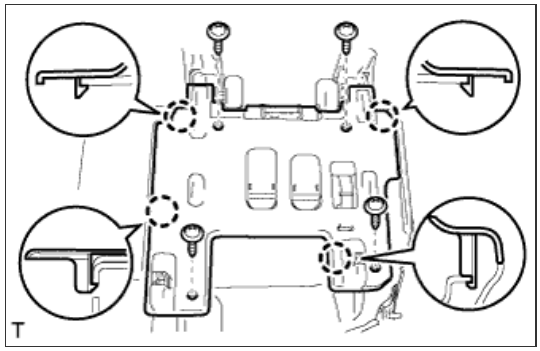
b. Attach the claw to install the protector to the seat hinge.

c. Install the clip.



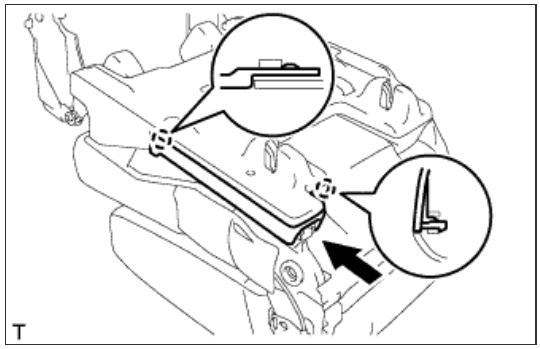
d. w/ Rear Seat Side Airbag:
Attach the claw to install the wire harness connector.

e. w/ Seat Heater System:
Attach the claw to install the wire harness connector.



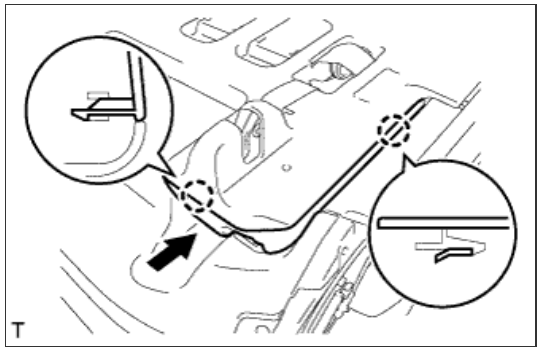
21. INSTALL REAR NO. 2 SEAT LEG SIDE COVER

a. Pass the fold seat stopper band through the seat leg side cover and attach it to the seat cushion frame with the bolt.



b. Attach the 4 claws to install the seat leg side cover.

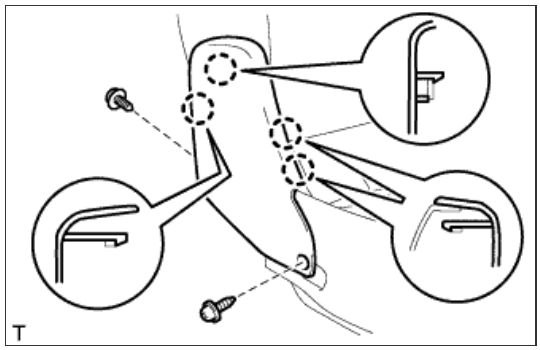
c. Install the 4 screws.



22. INSTALL UPPER SEAT TRACK RAIL COVER RH

a. Attach the 2 claws to install the cover.

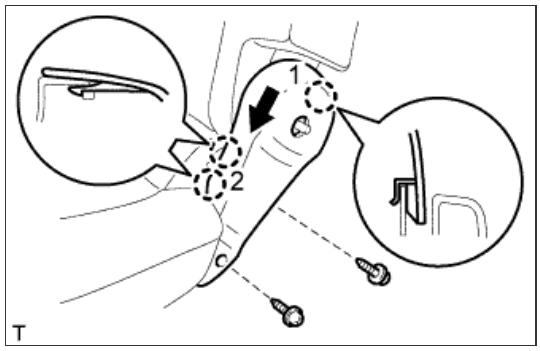
23. INSTALL UPPER SEAT TRACK RAIL COVER LH



a. Attach the 2 claws to install the cover.

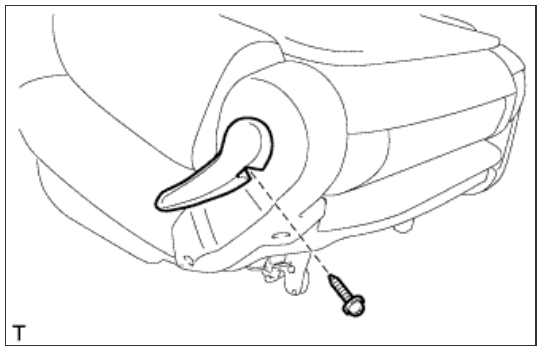
24. INSTALL REAR NO. 1 SEAT RECLINING COVER RH

a. Attach the 4 claws to install the cover.



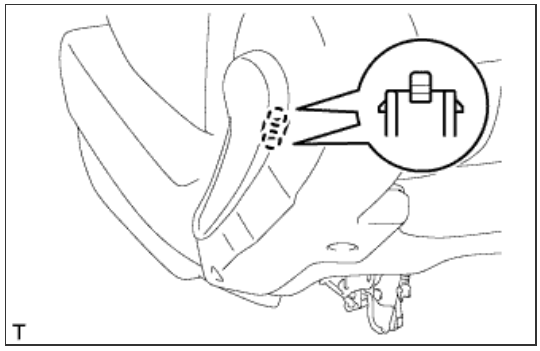
b. Install the 2 screws.

25. INSTALL REAR NO. 1 SEAT RECLINING COVER LH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

b. Install the 2 screws.



26. INSTALL RECLINING ADJUSTER RELEASE HANDLE LH

a. Install the release handle with the screw.

27. INSTALL SEAT ADJUSTER BOLT COVER

a. Attach the 2 claws to install the cover.

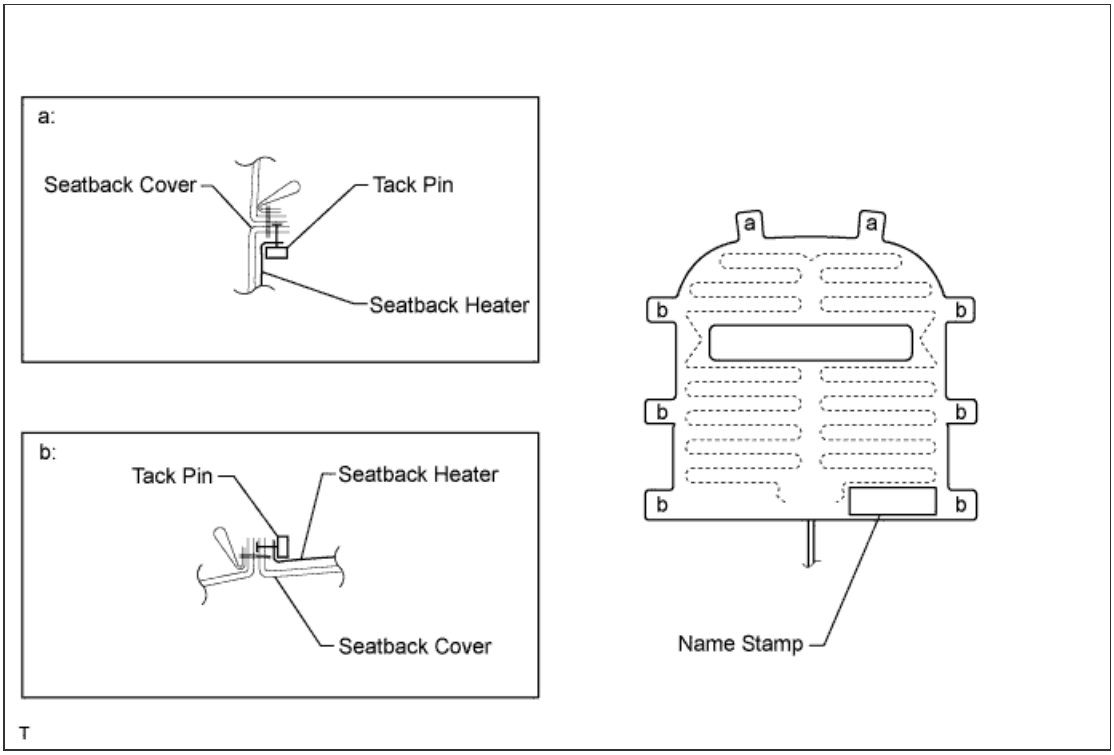
2 . INSTALL REAR NO. 1 SEAT ASSEMBLY LH

a. Install the rear No. 1 seat assembly Click here .

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.



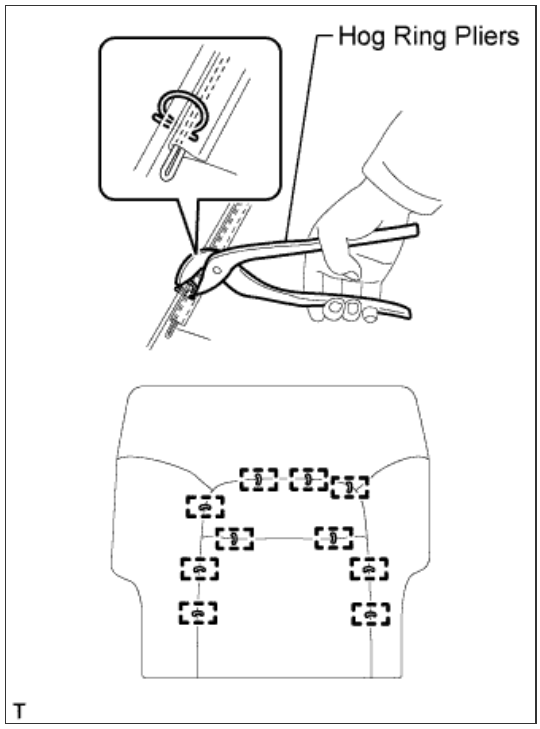
HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL REAR SEATBACK HEATER ASSEMBLY

a. Set the seatback heater with the name stamp side facing the seatback cover.

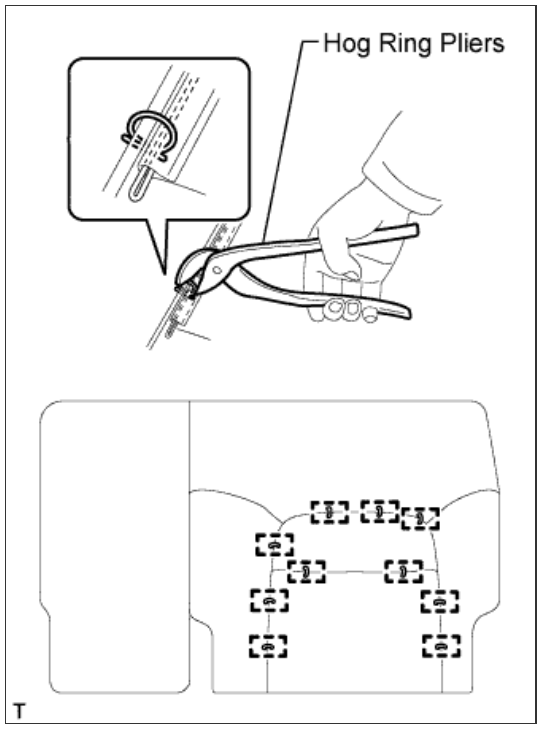
b. Install the seatback heater with new tack pins.



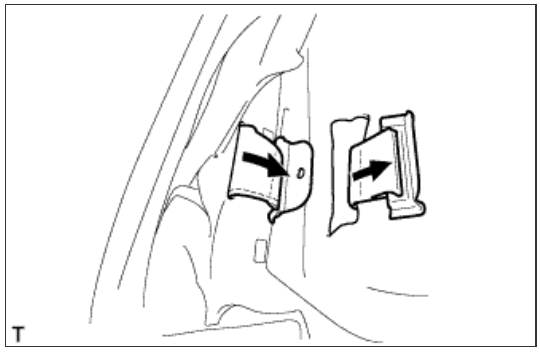
2. INSTALL REAR SEPARATE TYPE SEATBACK COVER

a. w/ Center Armrest:
Using hog ring pliers install the seatback cover with new hog rings.

NOTICE:



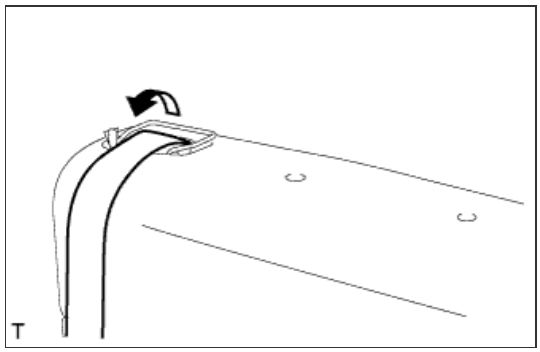
- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**



b. w/o Center Armrest:
Using hog ring pliers install the seatback cover with new hog rings.

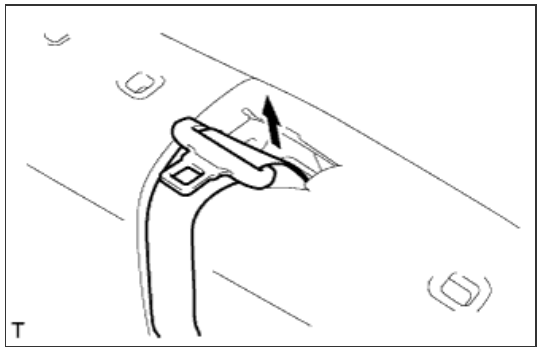
NOTICE:

- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**



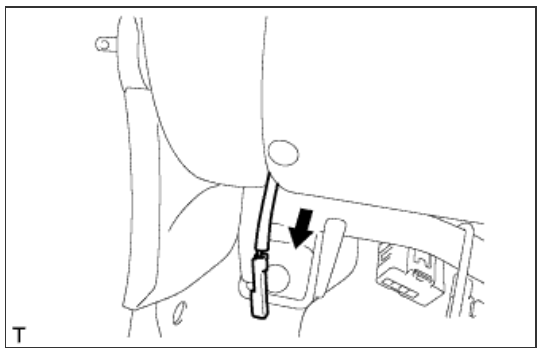
c. w/ Rear Seat Side Airbag:
Connect the seatback cover bracket to the seatback pad.

3. INSTALL SEATBACK COVER WITH PAD



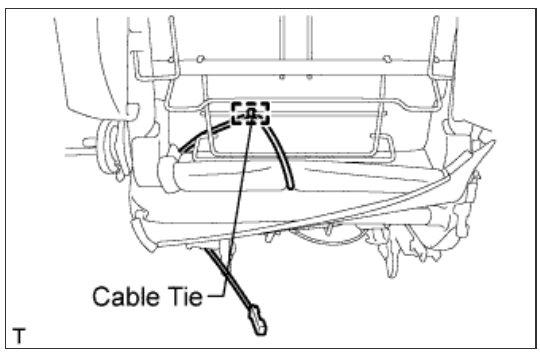
a. Install the seatback cover with pad.

b. w/ Center Armrest:
Pull out the seat belt.



c. w/o Center Armrest:
Pull out the seat belt.

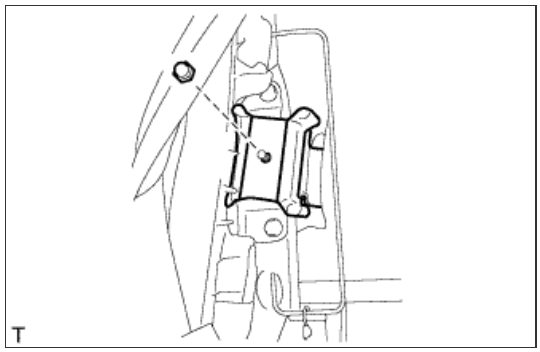
d. w/ Rear Seat Side Airbag:
Pass the side airbag wire harness through the hole in the seatback.



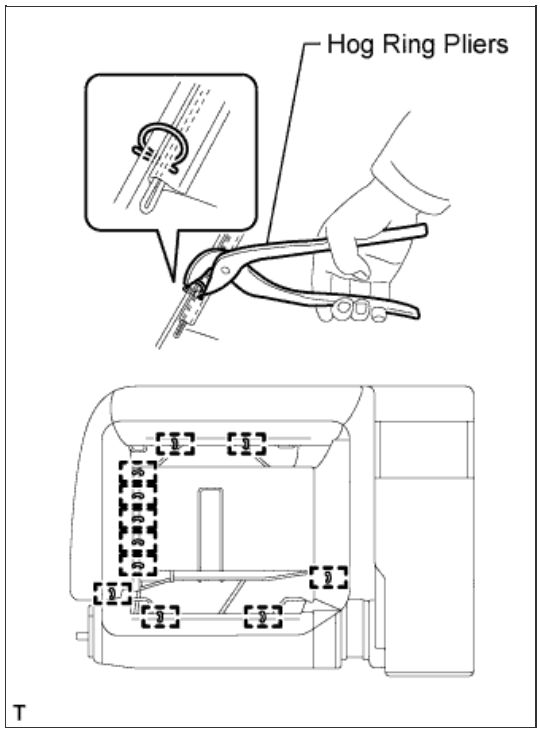
e. w/ Seat Heater System:
Pass the seatback heater wire harness through the hole in the seatback.

i.

ii. Connect the seatback heater wire harness and install a new cable tie.

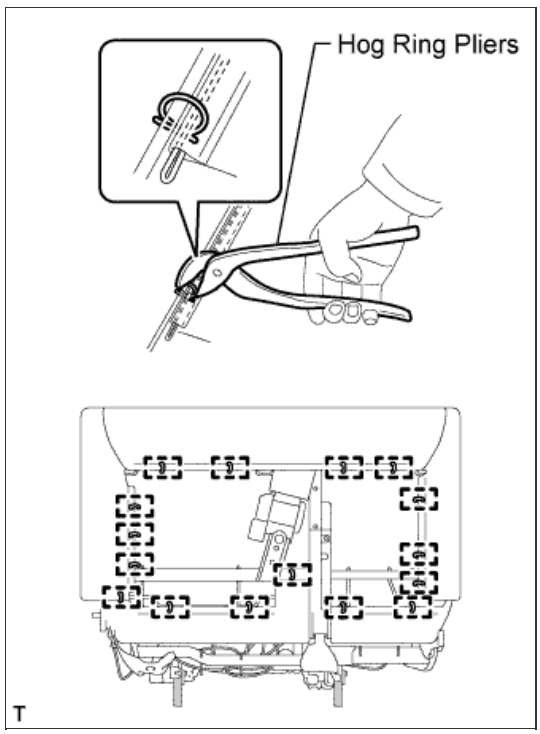


f. w/ Rear Seat Side Airbag:
Install the seatback cover bracket to the seat frame with the cap nut.



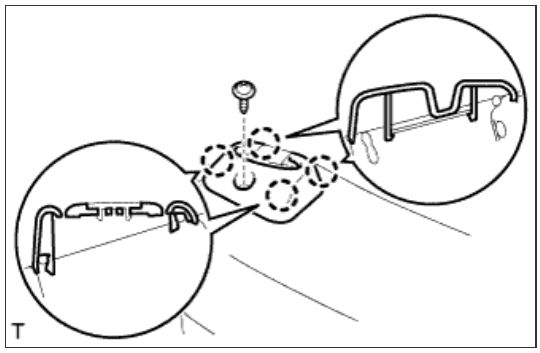
Torque:
5.5 N*m{ 56 kgf*cm , 49 in.*lbf }

NOTICE:



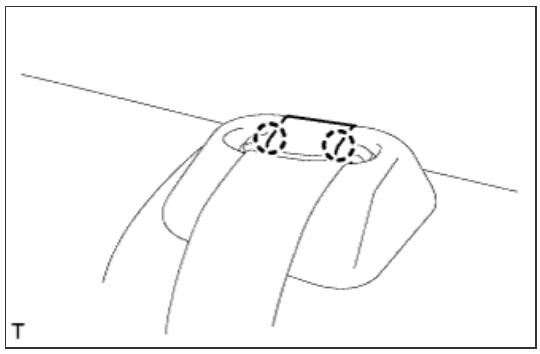
After the seatback trim cover is assembled make sure the side airbag strap is not twisted.

g. w/ Center Armrest:
Using hog ring pliers install new hog rings to the seatback frame.



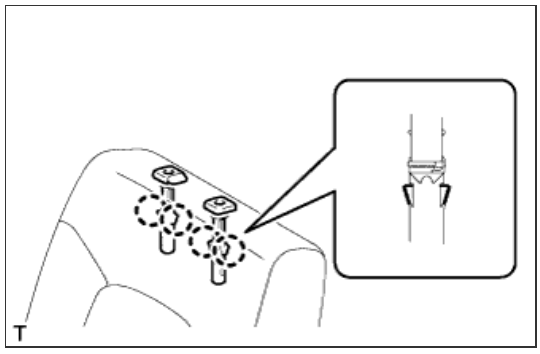
h. w/o Center Armrest:
Using hog ring pliers install new hog rings to the seatback frame.

4. INSTALL REAR SEAT BELT HOLE COVER LH



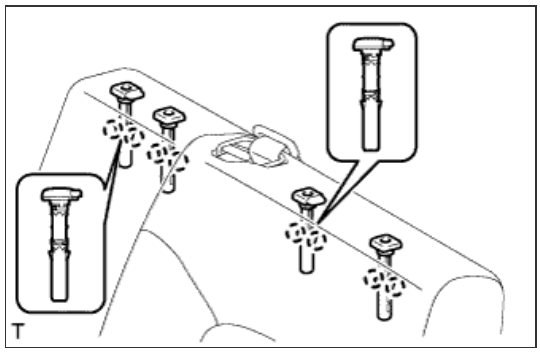
a. Attach the 4 claws to install the cover.

b. Install the screw.



5. INSTALL SHOULDER BELT ANCHOR COVER

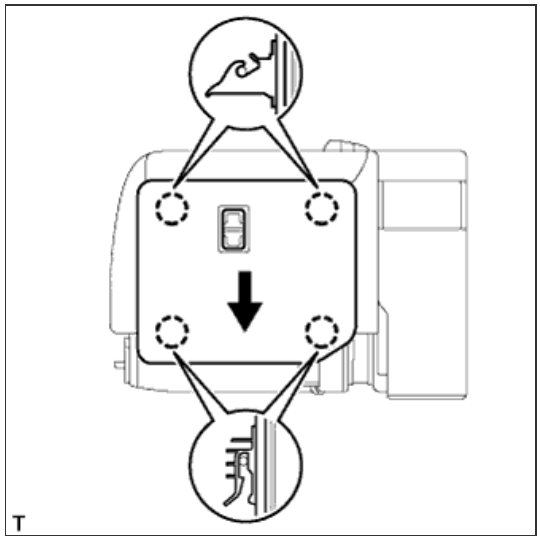
a. Attach the 2 claws to install the cover.



6. INSTALL REAR NO. 1 SEAT HEADREST SUPPORT ASSEMBLY

a. w/ Center Armrest:
Attach the 4 claws to install the 2 supports.

b. w/o Center Armrest:
Attach the claws to install the 4 supports.

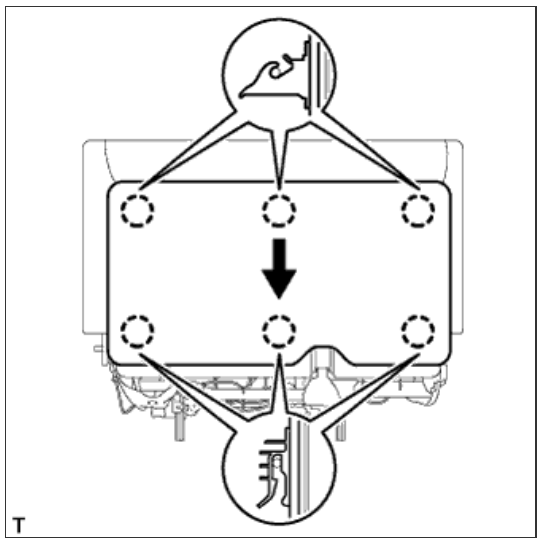


7. INSTALL REAR SEAT HEADREST ASSEMBLY

. INSTALL REAR SEATBACK BOARD SUB ASSEMBLY LH

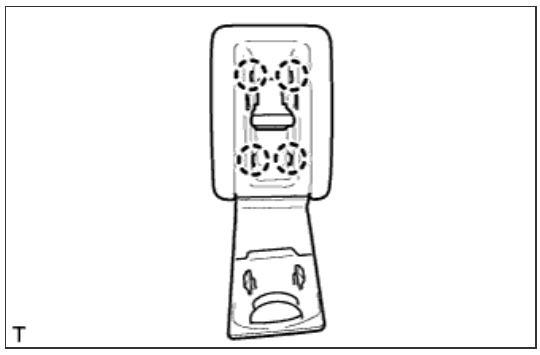
a. w/ Center Armrest:

i. Push the board down to attach the 2 claws on the bottom.



ii. Attach the 2 claws on the top of the board to install it.

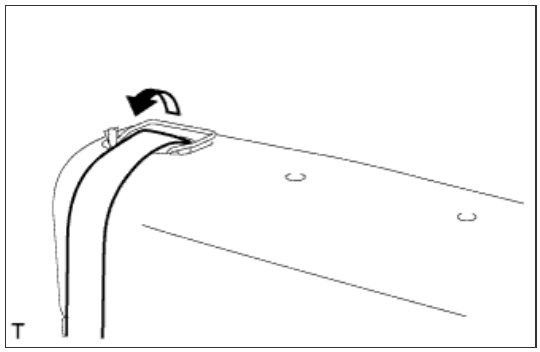
b. w/o Center Armrest:



i. Push the board down to attach the 3 claws on the bottom.

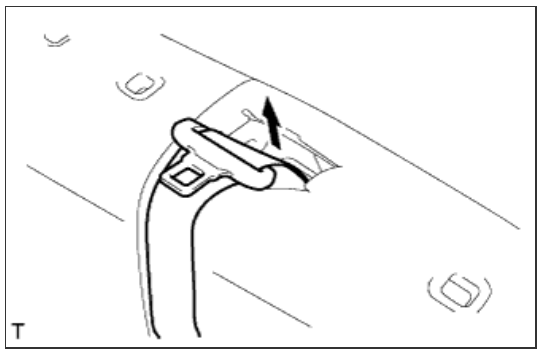
ii. Attach the 3 claws on the top of the board to install it.

9. INSTALL REAR SEATBACK COVER



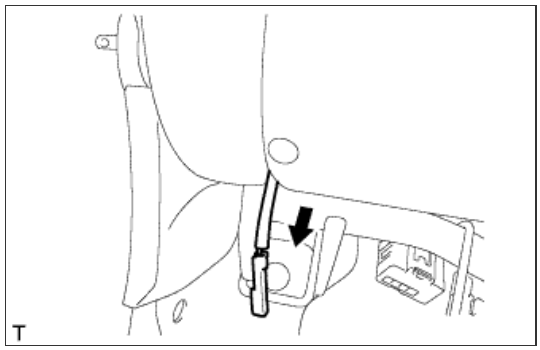
a. Attach the 4 claws to install the cover.

10. INSTALL SEAT CUSHION COVER WITH PAD



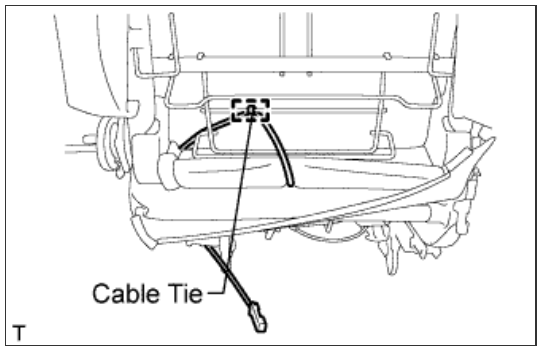
a. Install the seatback cover with pad.

b. w/ Center Armrest:
Pull out the seat belt.



c. w/o Center Armrest:
Pull out the seat belt.

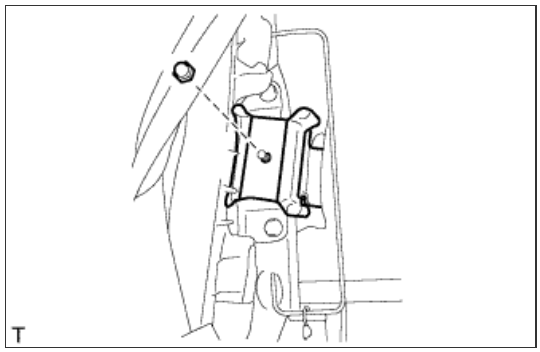
d. w/ Rear Seat Side Airbag:
Pass the side airbag wire harness through the hole in the seatback.



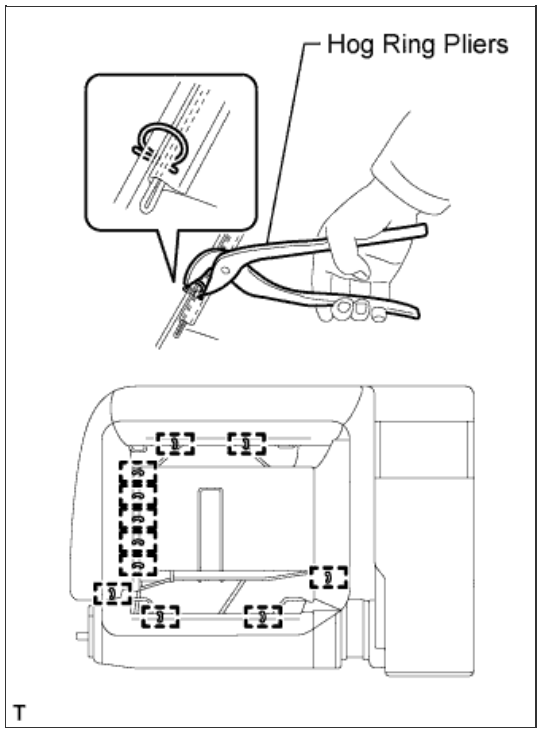
e. w/ Seat Heater System:
Pass the seatback heater wire harness through the hole in the seatback.

i.

ii. Connect the seatback heater wire harness and install a new cable tie.

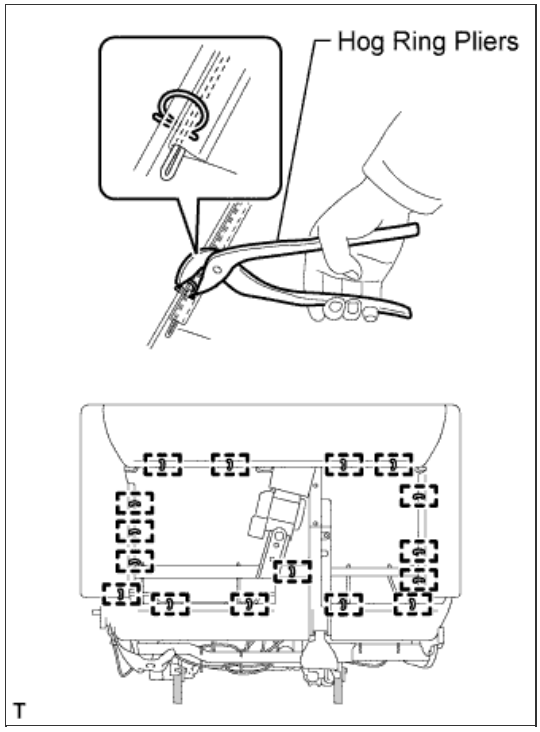


f. w/ Rear Seat Side Airbag:
Install the seatback cover bracket to the seat frame with the cap nut.



Torque:
5.5 N*m{ 56 kgf*cm , 49 in.*lbf }

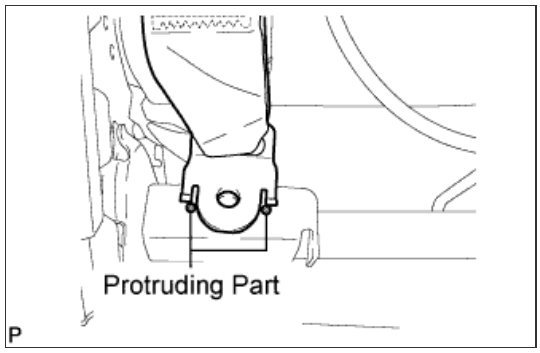
NOTICE:



After the seatback trim cover is assembled make sure the side airbag strap is not twisted.

g. w/ Center Armrest:
Using hog ring pliers install new hog rings to the seatback frame.

h. w/o Center Armrest:
Using hog ring pliers install new hog rings to the seatback frame.



11. CONNECT NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

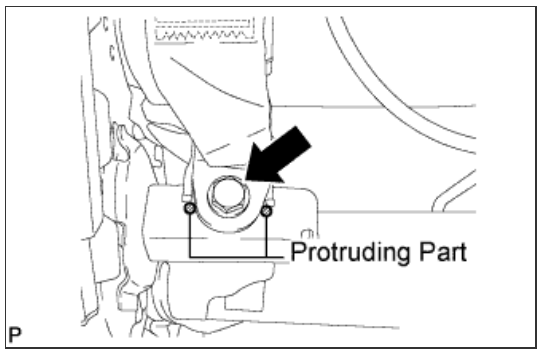
a. Connect the belt anchor.

NOTICE:

Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.

12. INSTALL REAR NO. 1 SEAT INNER BELT ASSEMBLY LH

a. Install the belt with the bolt.

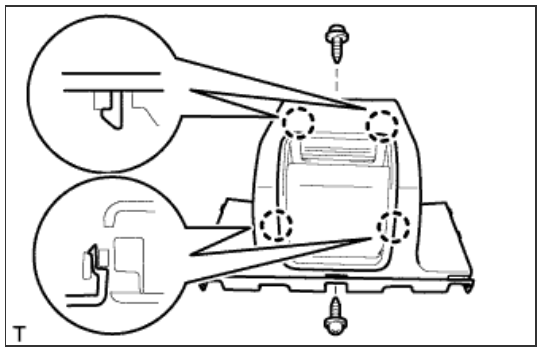


Torque:
42 N*m{ 42 kgf*cm , 31 ft.*lbf }

NOTICE:

Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.

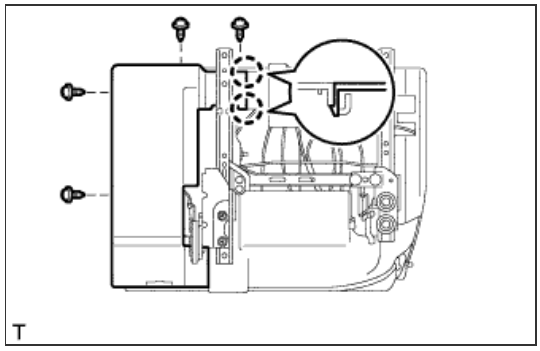
HINT:



The No. 1 seat 3 point type belt anchor is fixed with the same bolt as the rear No. 1 seat inner belt LH. Therefore connect it when installing the rear No. 1 seat inner belt LH.

13. INSTALL REAR SEAT UNDER TRAY COVER LH

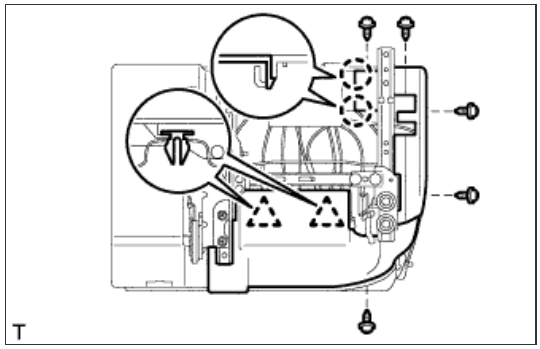
a. Attach the 4 claws to install the cover.



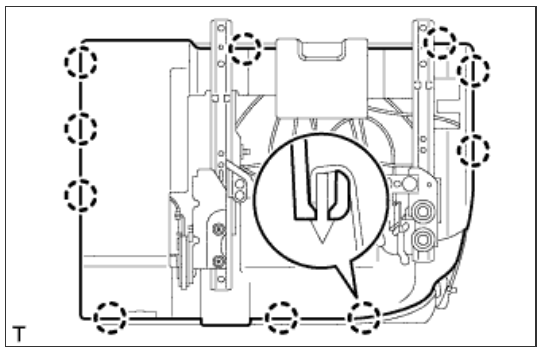
b. Install the 2 screws.

14. INSTALL REAR SEAT CUSHION COVER RH

a. Attach the 2 claws to install the cover.



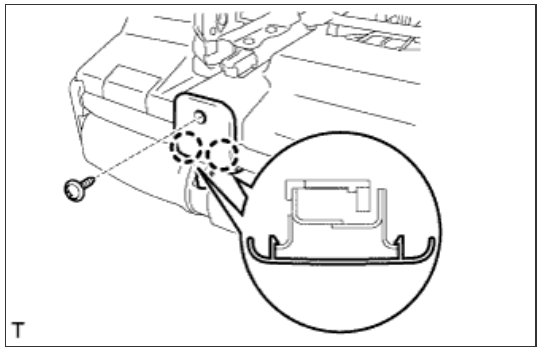
b. Install the 4 screws.



15. INSTALL REAR UNDER SIDE COVER LH

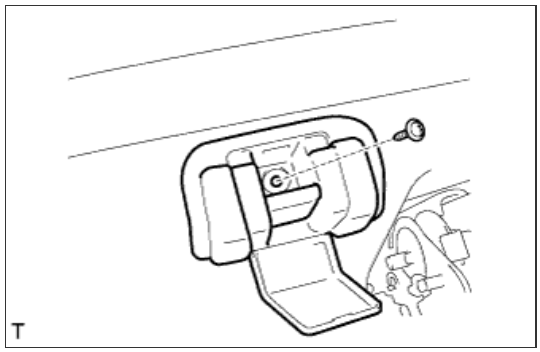
a. Attach the 2 claws and 2 clips to install the cover.

b. Install the 5 screws.



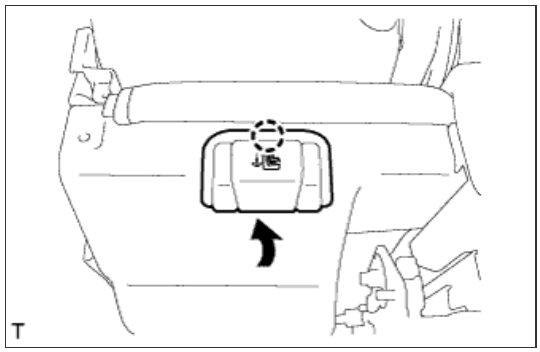
c. Attach the 10 claws.

16. INSTALL REAR SEATBACK STAY COVER LH



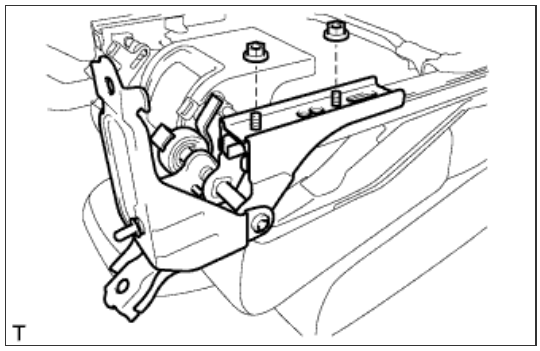
a. Attach the 2 claws to install the cover.

b. Install the screw.



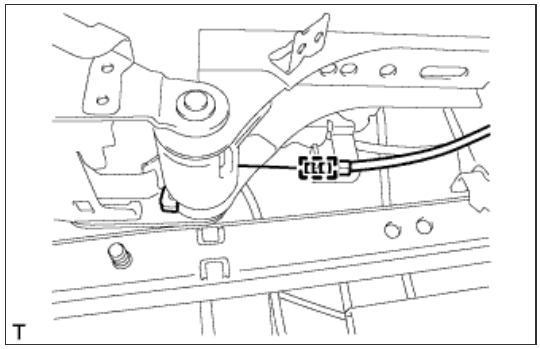
17. INSTALL SEAT BELT ANCHOR COVER CAP

a. Install the anchor cover cap with the screw.



b. Attach the claw to close the cap.

1 . INSTALL REAR NO. 1 SEAT HINGE SUB ASSEMBLY RH

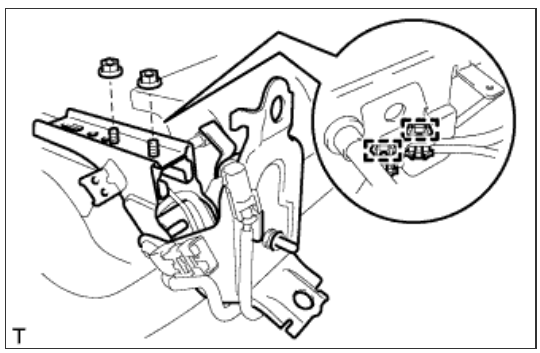


a. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 42 kgf*cm , 31 ft.*lbf }

19. INSTALL REAR NO. 1 SEAT HINGE SUB ASSEMBLY LH

a. Attach the cable clamp to connect the cable.

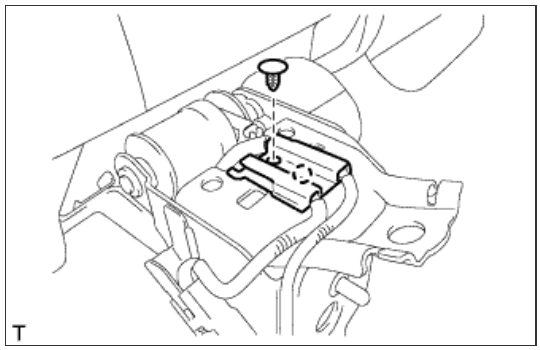


b. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 42 kgf*cm , 31 ft.*lbf }

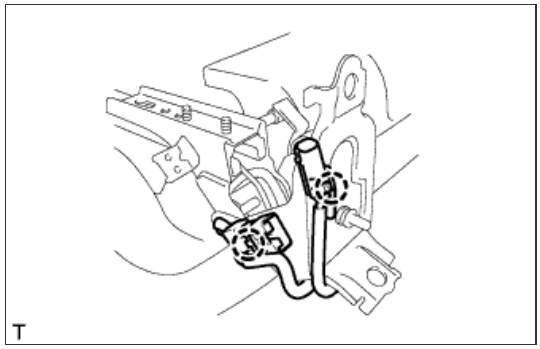
c. w/ Rear Seat Side Airbag:
Attach the wire harness clamp.

d. w/ Seat Heater System:
Attach the wire harness clamp.



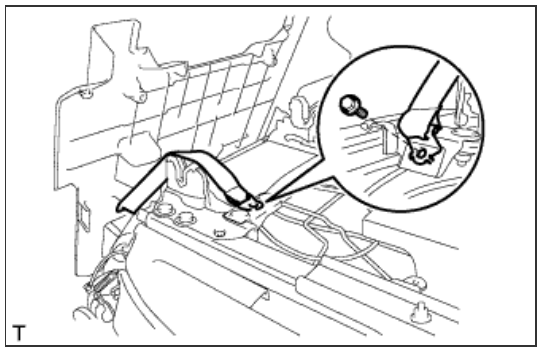
20. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Install the wire harness and attach 2 claws to close the protector.



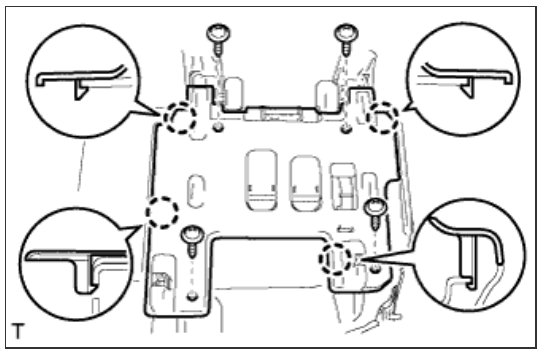
b. Attach the claw to install the protector to the seat hinge.

c. Install the clip.



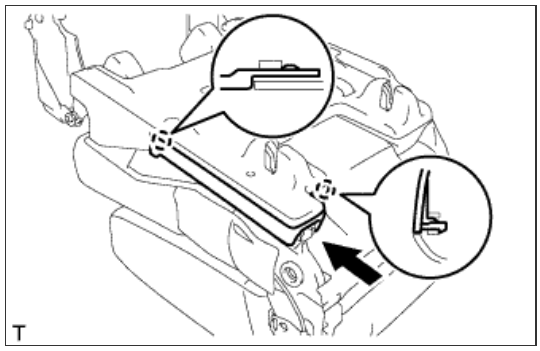
d. w/ Rear Seat Side Airbag:
Attach the claw to install the wire harness connector.

e. w/ Seat Heater System:
Attach the claw to install the wire harness connector.



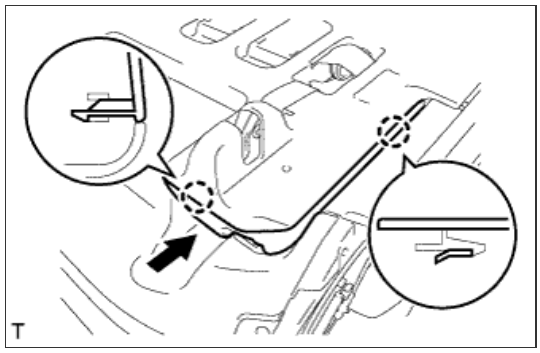
21. INSTALL REAR NO. 2 SEAT LEG SIDE COVER

a. Pass the fold seat stopper band through the seat leg side cover and attach it to the seat cushion frame with the bolt.



b. Attach the 4 claws to install the seat leg side cover.

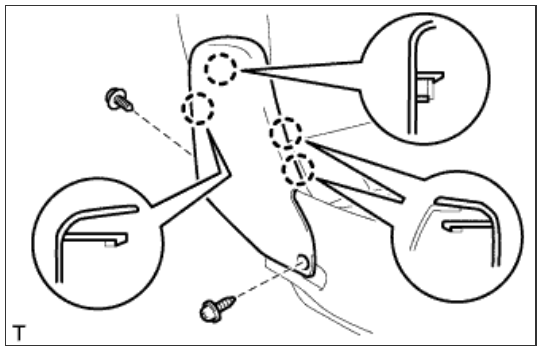
c. Install the 4 screws.



22. INSTALL UPPER SEAT TRACK RAIL COVER RH

a. Attach the 2 claws to install the cover.

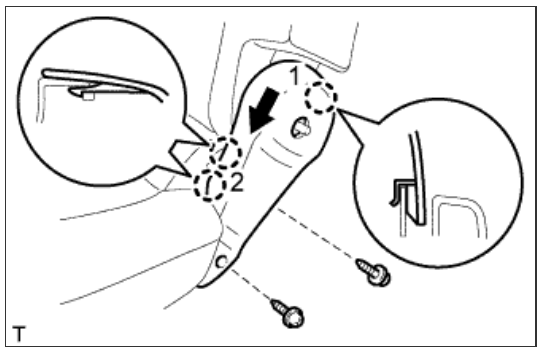
23. INSTALL UPPER SEAT TRACK RAIL COVER LH



a. Attach the 2 claws to install the cover.

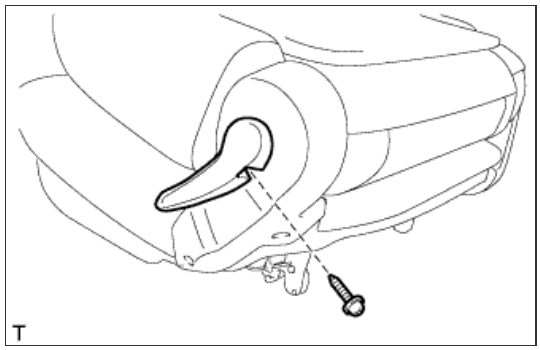
24. INSTALL REAR NO. 1 SEAT RECLINING COVER RH

a. Attach the 4 claws to install the cover.



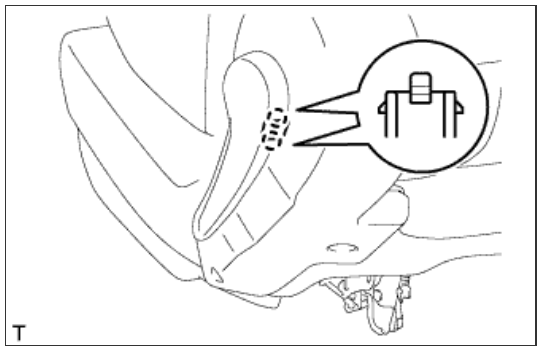
b. Install the 2 screws.

25. INSTALL REAR NO. 1 SEAT RECLINING COVER LH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

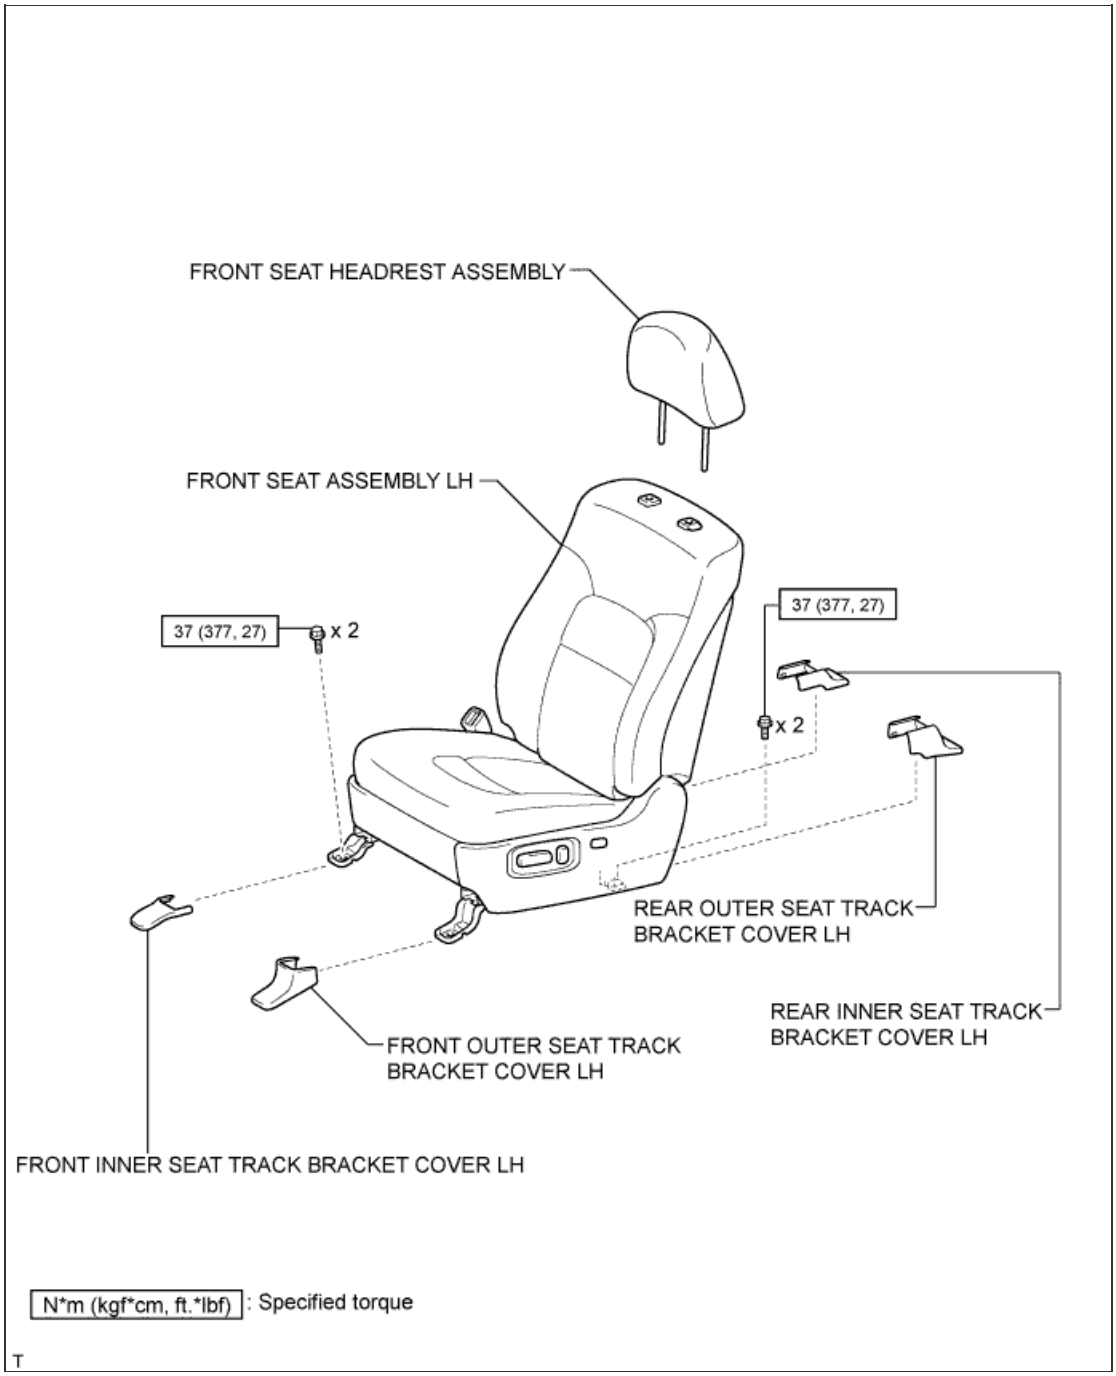
b. Install the 2 screws.



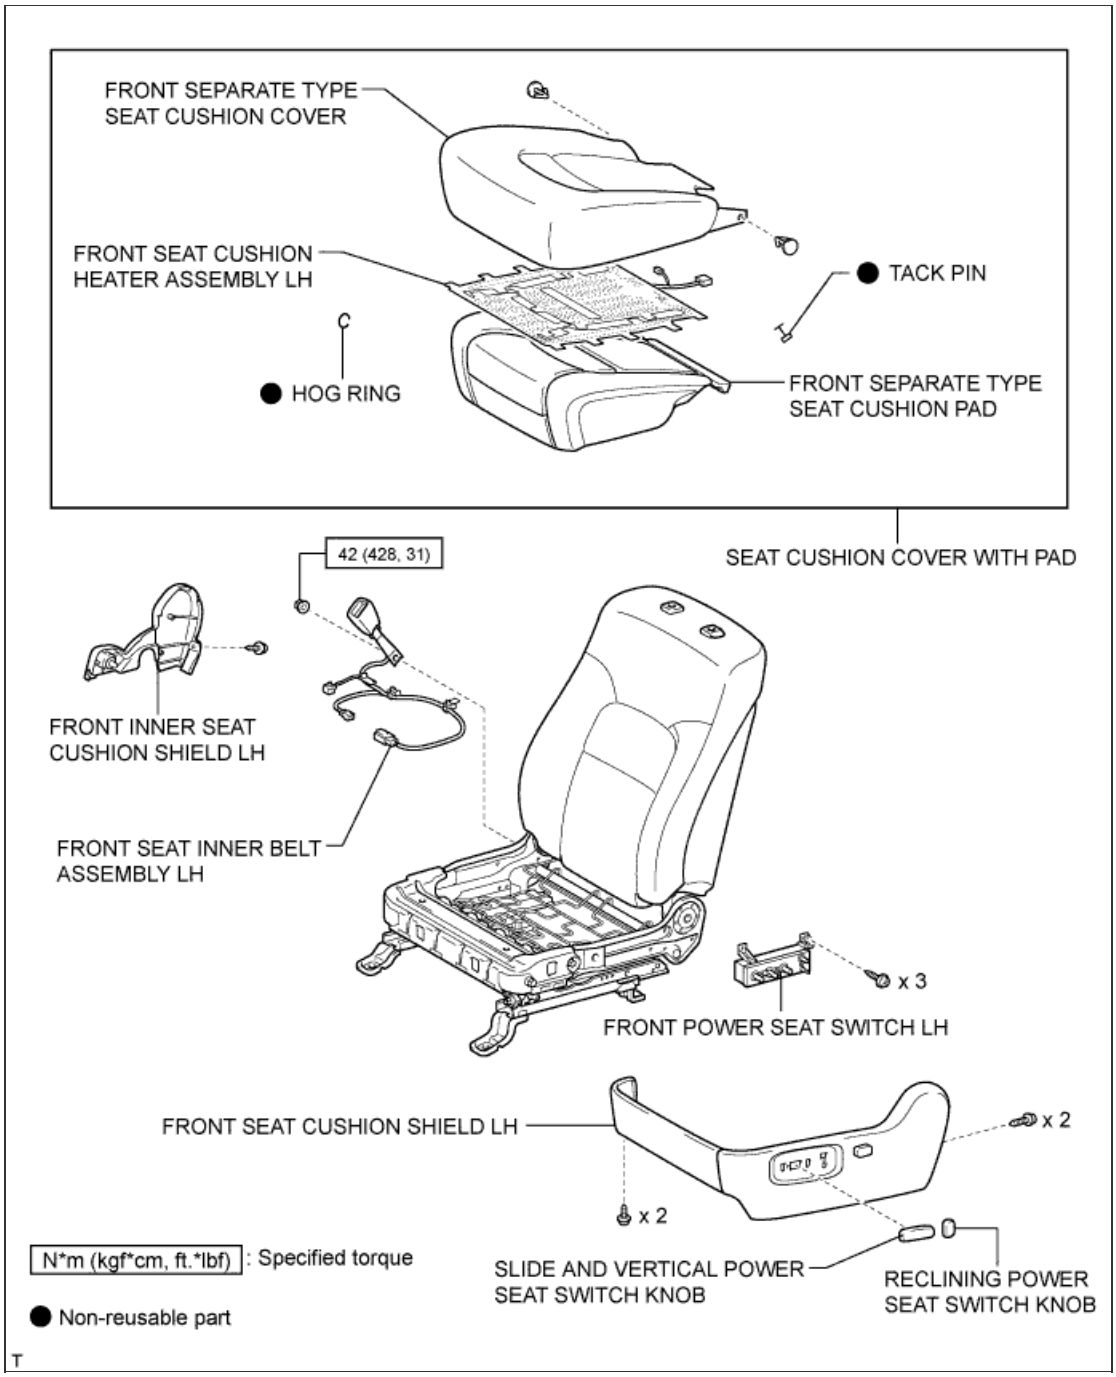
26. INSTALL RECLINING ADJUSTER RELEASE HANDLE LH

a. Install the release handle with the screw.

27. INSTALL SEAT ADJUSTER BOLT COVER



a. Attach the 2 claws to install the cover.



2 . INSTALL REAR NO. 1 SEAT ASSEMBLY LH

a. Install the rear No. 1 seat assembly Click here .

CAUTION:

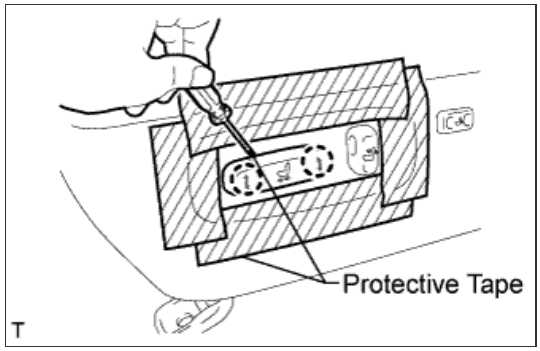
Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. REMOVE FRONT SEAT ASSEMBLY LH

a. Remove the front seat assembly (Click here).



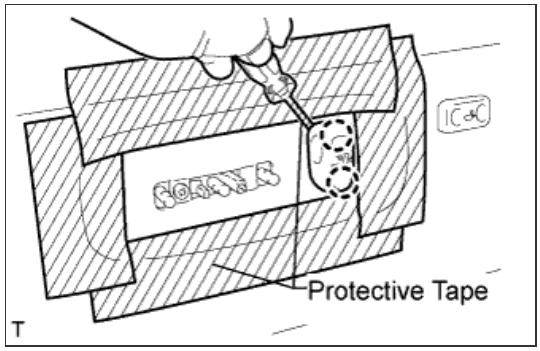
2. REMOVE SLIDE AND VERTICAL POWER SEAT SWITCH KNOB

a. Apply protective tape around the cushion shield.

b. Using a screwdriver, detach the 2 claws and remove the knob.

HINT:

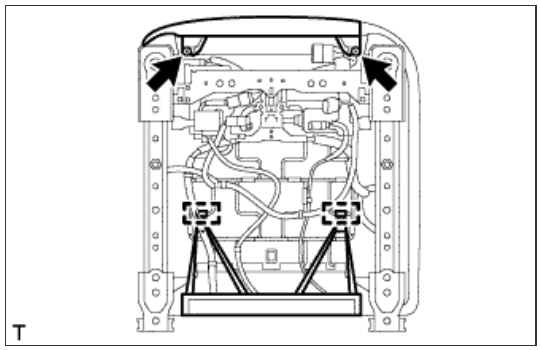
Tape the screwdriver tip before use.



3. REMOVE RECLINING POWER SEAT SWITCH KNOB

a. Using a screwdriver, detach the 2 claws and remove the knob.

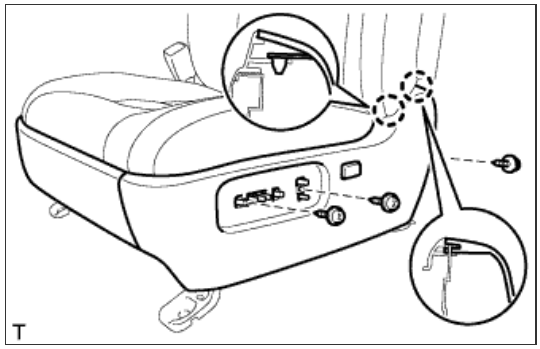
HINT:



Tape the screwdriver tip before use.

4. REMOVE FRONT SEAT CUSHION SHIELD LH

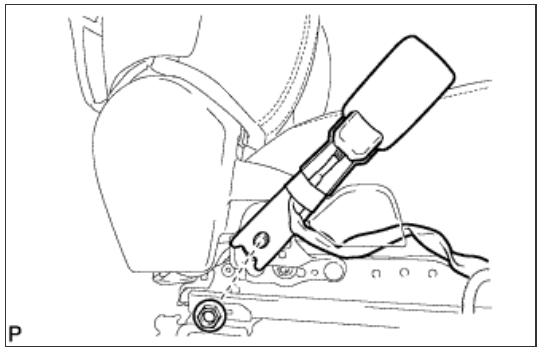
a. Remove the 2 rubber bands from the hooks.



b. Remove the 2 screws.

c. Remove the 3 screws.

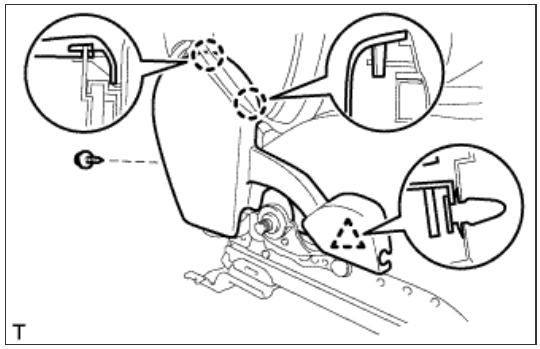
d. Detach the 2 claws and remove the cushion shield.



e. for Driver Side:
Disconnect the power seat lumbar switch connectors.

5. REMOVE FRONT SEAT INNER BELT ASSEMBLY LH

a. Disconnect the connectors and detach the clamps.

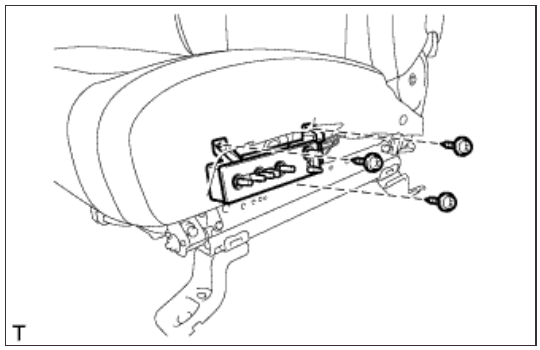


b. Remove the nut and front seat inner belt assembly.

6. REMOVE FRONT INNER SEAT CUSHION SHIELD LH

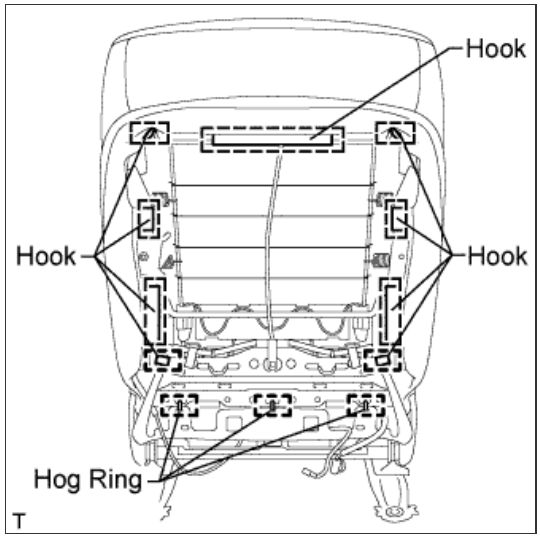
a. Remove the screw.

b. Detach the 2 claws and clip, and then remove the cushion shield.



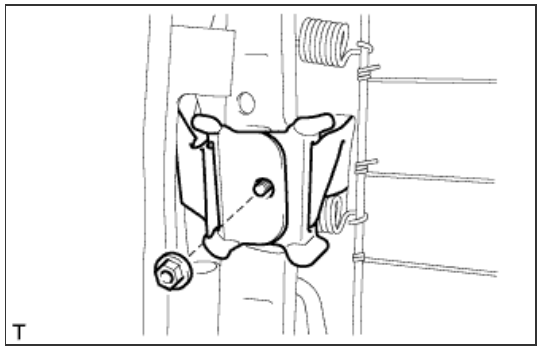
7. REMOVE FRONT POWER SEAT SWITCH LH

a. w/ Seat Position Memory System:
Disconnect the 2 connectors.



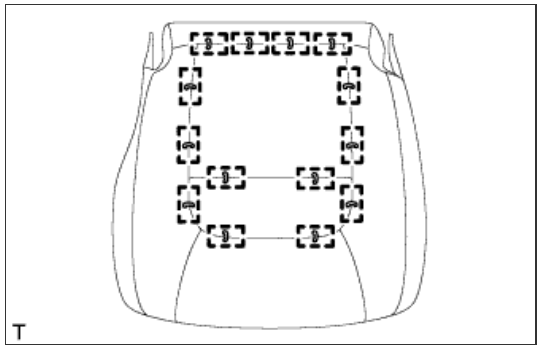
b. w/o Seat Position Memory System:
Disconnect the connector.

c. Remove the 3 screws and switch.



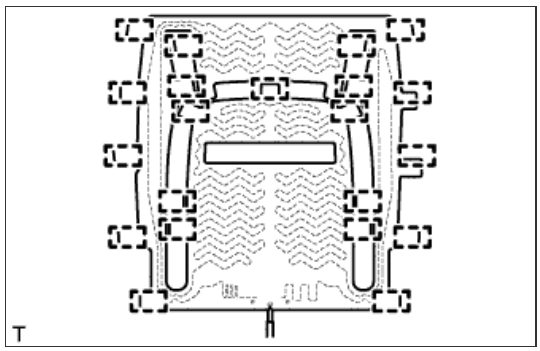
8. REMOVE SEAT CUSHION COVER WITH PAD

a. Remove the 3 hog rings and detach the 9 hooks.



b. Remove the nut and seatback cover bracket from the seat frame.

c. Remove the seatback cover with pad.



9. REMOVE FRONT SEPARATE TYPE SEAT CUSHION COVER

a. Remove the hog rings and front seat cushion cover.

10. REMOVE FRONT SEAT CUSHION HEATER ASSEMBLY LH

a. Cut off the tack pins which fasten the seat heater to the seat cushion cover, and then remove the seat cushion heater from the seat cushion cover.

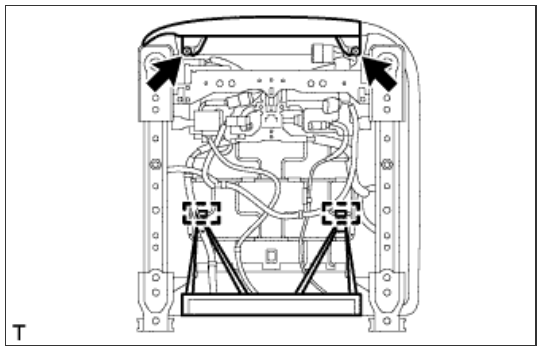
3. REMOVE RECLINING POWER SEAT SWITCH KNOB

a. Using a screwdriver detach the 2 claws and remove the knob.

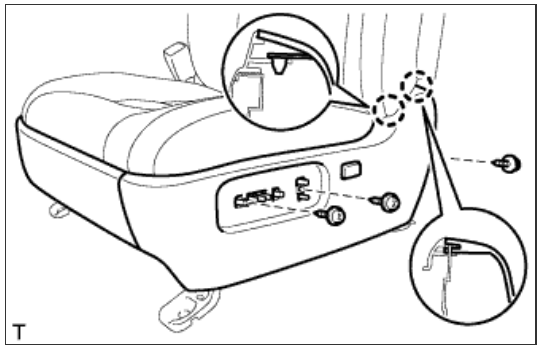
HINT:



Tape the screwdriver tip before use.

4. REMOVE FRONT SEAT CUSHION SHIELD LH

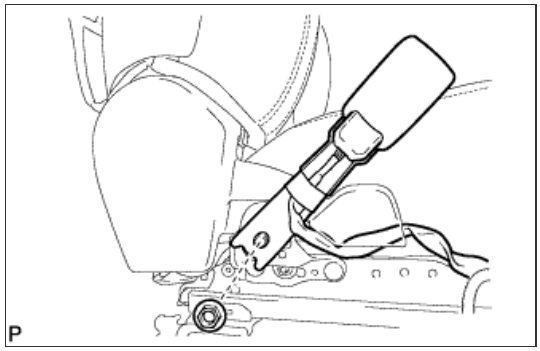
a. Remove the 2 rubber bands from the hooks.



b. Remove the 2 screws.

c. Remove the 3 screws.

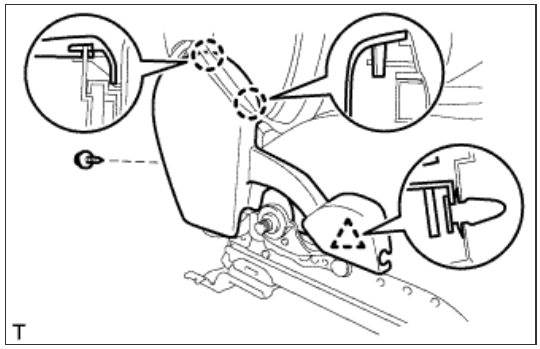
d. Detach the 2 claws and remove the cushion shield.



e. for Driver Side:
Disconnect the power seat lumbar switch connectors.

5. REMOVE FRONT SEAT INNER BELT ASSEMBLY LH

a. Disconnect the connectors and detach the clamps.

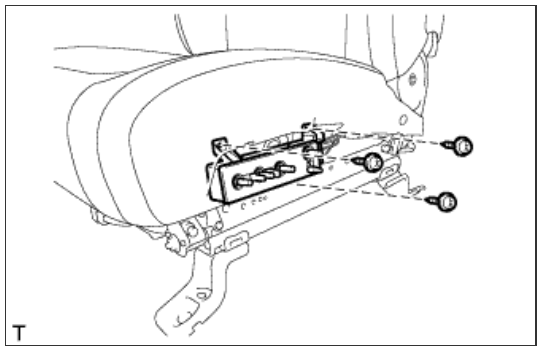


b. Remove the nut and front seat inner belt assembly.

6. REMOVE FRONT INNER SEAT CUSHION SHIELD LH

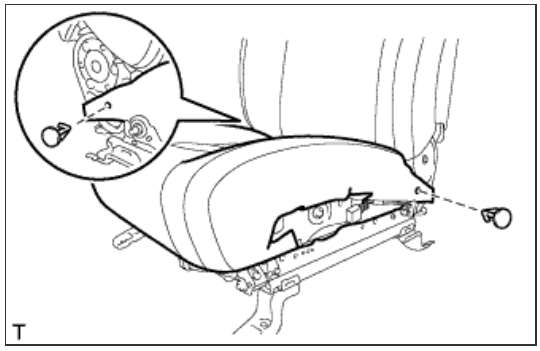
a. Remove the screw.

b. Detach the 2 claws and clip and then remove the cushion shield.



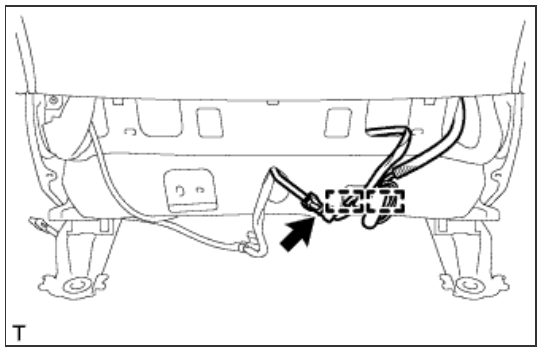
7. REMOVE FRONT POWER SEAT SWITCH LH

a. w/ Seat Position Memory System:
Disconnect the 2 connectors.

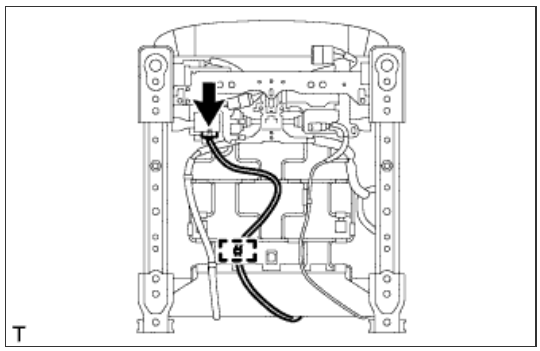


b. w/o Seat Position Memory System:
Disconnect the connector.

c. Remove the 3 screws and switch.

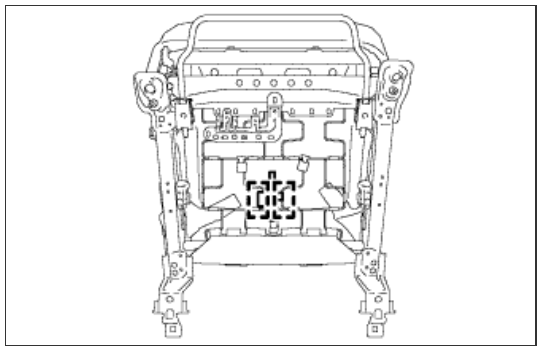


8. REMOVE SEAT CUSHION COVER WITH PAD



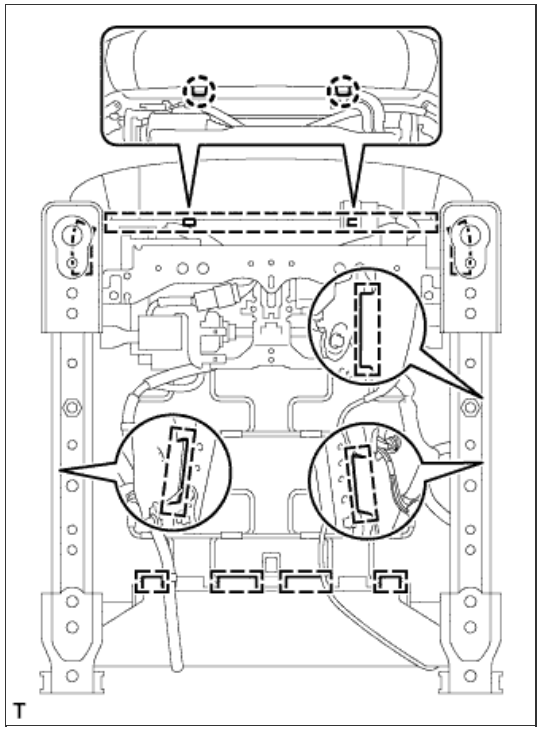
a. Using a clip remover remove the 2 clips.

b. Disconnect the seat heater connector and detach the 2 wire harness clamps.



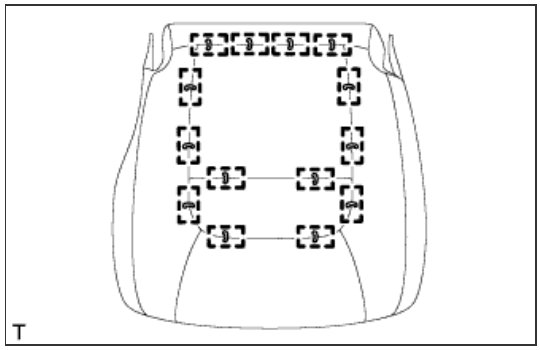
c. Disconnect the seat heater control connector and detach the wire harness clamp.

d. for Front Passenger Side:



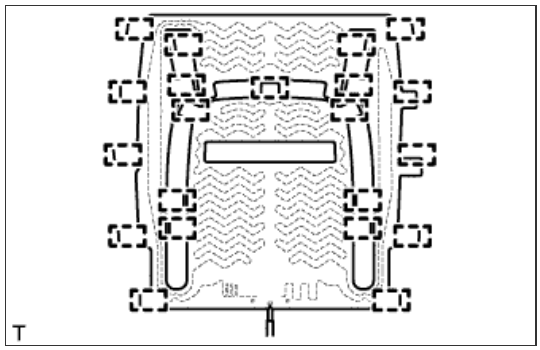
i. Disconnect the seat belt warning sensor connector.

ii. Detach the 2 clamps and remove the seat belt warning sensor connector.



e. Bend the 2 seat frame claws upward.

f. Detach the hooks and remove the seat cushion cover with pad.



9. REMOVE FRONT SEPARATE TYPE SEAT CUSHION COVER

a. Remove the hog rings and front seat cushion cover.

10. REMOVE FRONT SEAT CUSHION HEATER ASSEMBLY LH

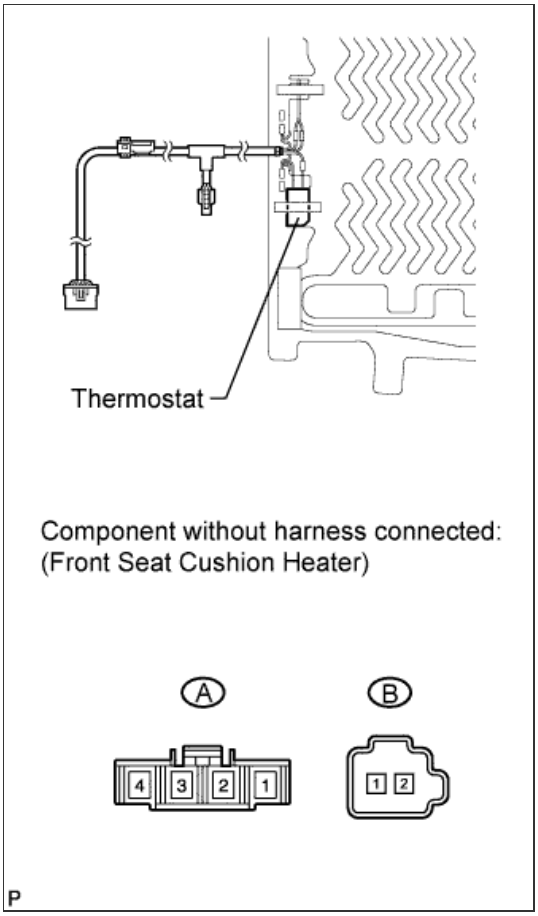
a. Cut off the tack pins which fasten the seat heater to the seat cushion cover and then remove the seat cushion heater from the seat cushion cover.

T

for Preparation Click here

1. INSPECT FRONT SEAT CUSHION HEATER ASSE LH

a. Heat the thermostat with a light.



b. Check the seat cushion heater.

i. Measure the resistance according to the value(s) in the table below.

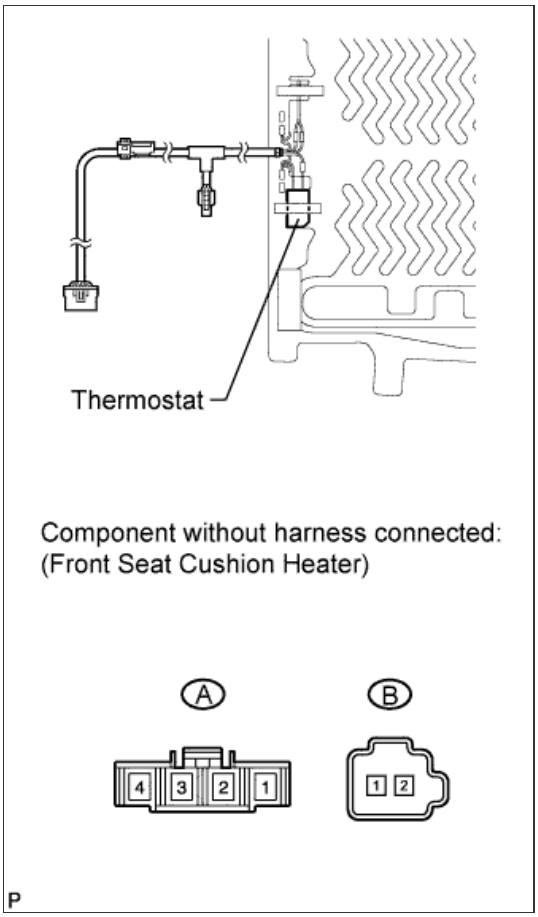
Standard Resistance:

Tester Connection	Condition	Specified Condition
A-1 - B-1	Seat cushion heater temperature 25 C (77)	3.05 to 3.65 Ω
A-4 - B-2		
A-1 - A-4		
A-2 - A-3		8 to 12 kΩ

f the result is not as specified, replace the seat cushion heater assembly.

2. INSPECT FRONT SEAT CUSHION HEATER ASSE RH

a. Heat the thermostat with a light.



b. Check the seat cushion heater.

i. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

Tester Connection	Condition	Specified Condition
A-1 - B-1	Seat cushion heater temperature 25 C (77)	3.05 to 3.65 Ω
A-4 - B-2		
A-1 - A-4		
A-2 - A-3		8 to 12 kΩ

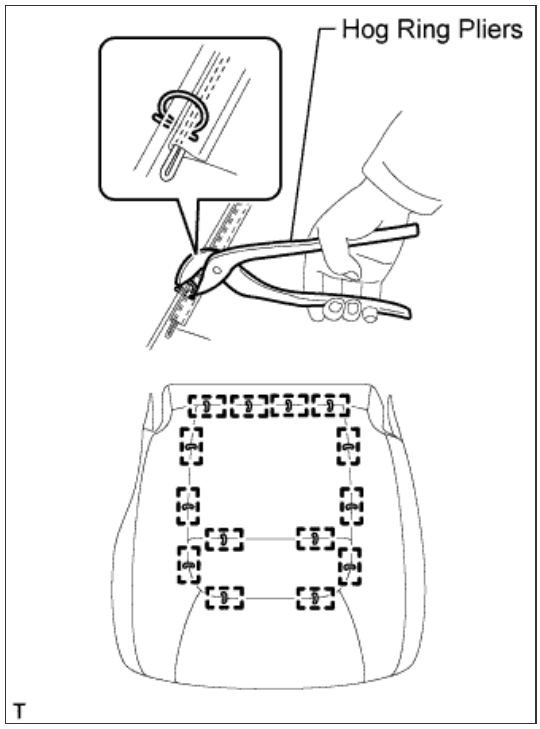
1. INSTALL FRONT SEAT CUSHION HEATER ASSEMBLY LH

a. Set the seat cushion heater with the name stamp side facing the seat cushion cover.

b. Install the seat cushion heater with new tack pins.

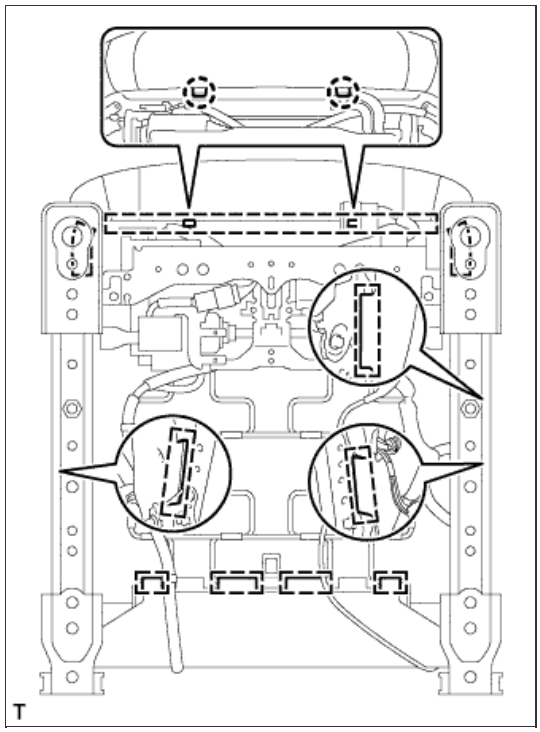


T

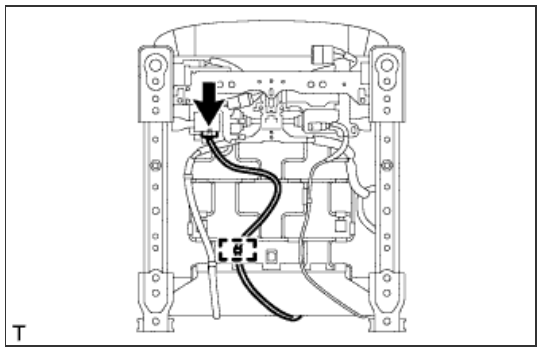
2. INSTALL FRONT SEPARATE TYPE SEAT CUSHION COVER

a. Using hog ring pliers, install the seat cushion cover to the seat cushion pad with new hog rings.

NOTICE:



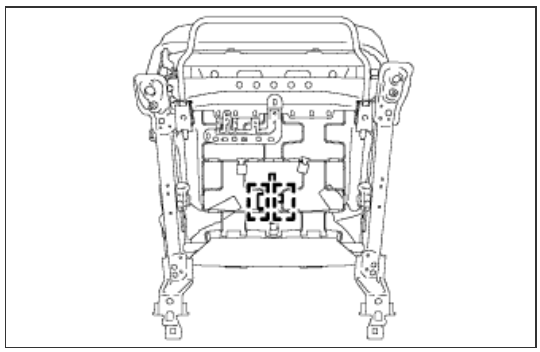
- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**



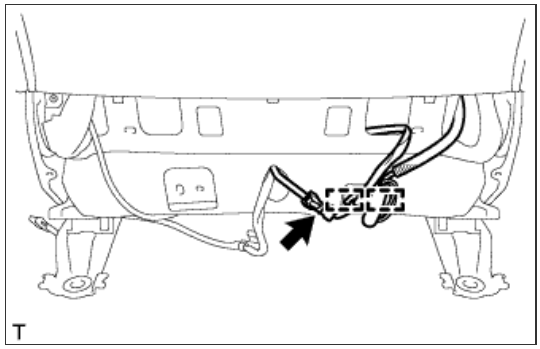
3. INSTALL SEAT CUSHION COVER WITH PAD

a. Attach the hooks to install the seat cushion cover with pad.

b. Bend the 2 seat frame claws downward.

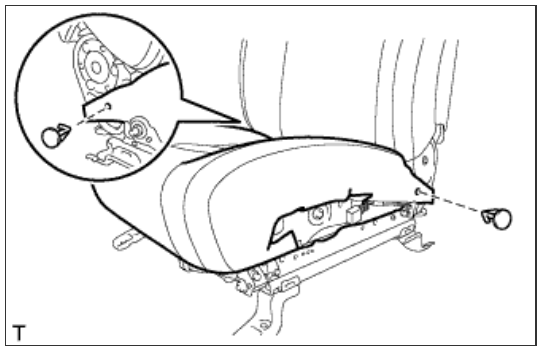


c. Connect the seat heater control connector and attach the wire harness clamp.



d. for Front asenger Side:

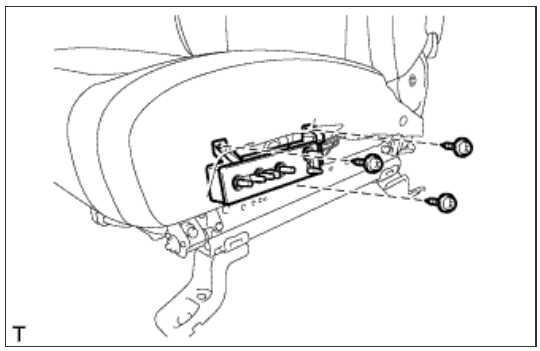
i. Attach the 2 clamps to install the seat belt warning sensor connector.



ii. Connect the seat belt warning sensor connector.

e. Connect the seat heater connector and attach the 2 wire harness clamps.

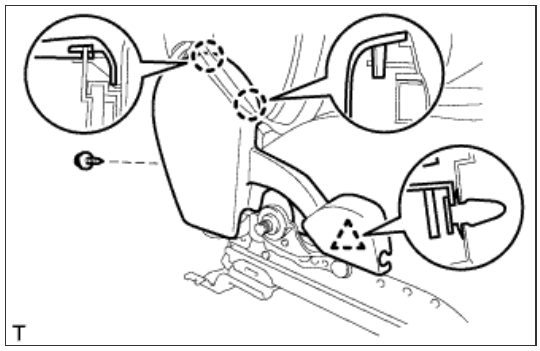
f. Install the 2 clips.



4. INSTALL FRONT POWER SEAT SWITCH LH

a. Install the switch with the 3 screws.

b. w/ Seat osition Memory System:
Connect the 2 connectors.



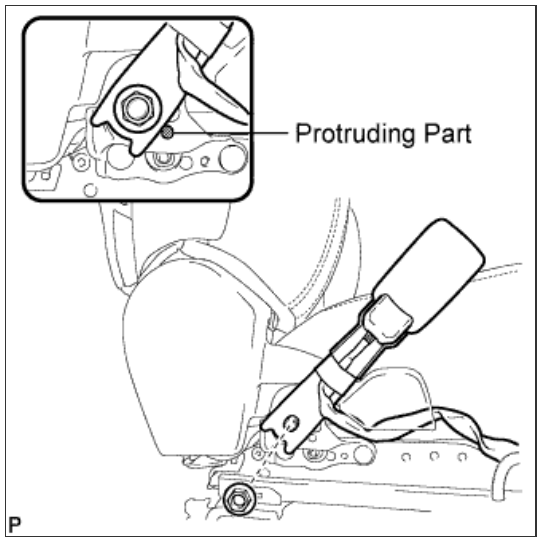
c. w/o Seat osition Memory System:
Connect the connector.

5. INSTALL FRONT INNER SEAT CUSHION SHIELD LH

a. Attach the 2 claws and clip to install the cushion shield.

b. Install the screw.

6. INSTALL FRONT SEAT INNER BELT ASSEMBLY LH



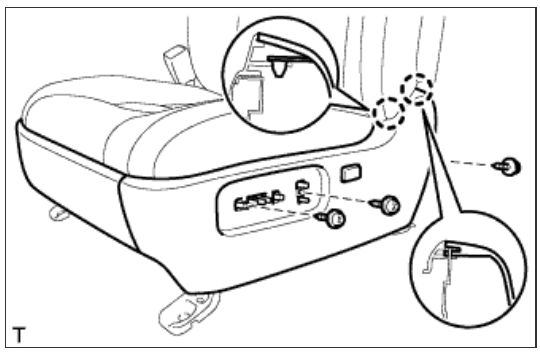
a. Install the front seat inner belt assembly with the nut.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf

NOTICE:

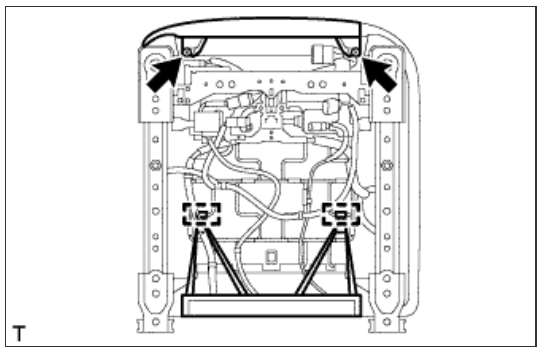
Do not allow the anchor part of the front seat inner belt assembly to overlap the protruding parts of the front seat adjuster.

b. Connect the connectors and attach the clamps.



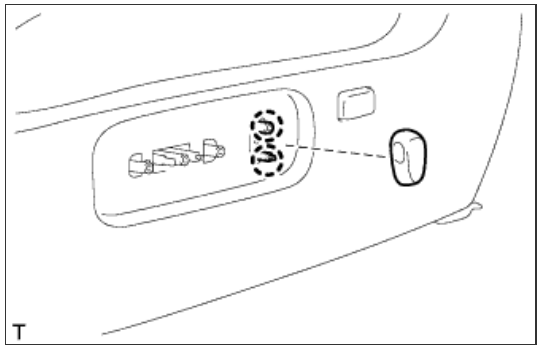
7. INSTALL FRONT SEAT CUSHION SHIELD LH

a. for Driver Side:
Connect the lumbar switch connectors.



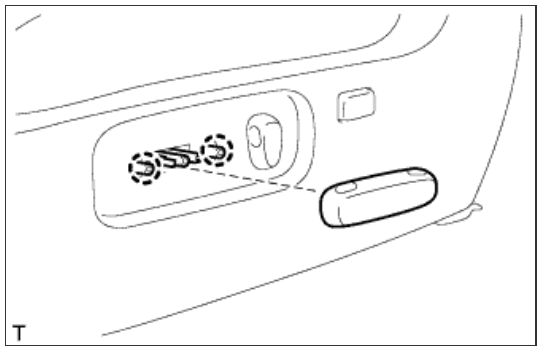
b. Attach the 2 claws to install the cushion shield.

c. Install the 3 screws.



d. Install the 2 screws.

e. Attach the 2 rubber bands to the hooks.



8. INSTALL RECLININ POWER SEAT SWITCH NC

a. Attach the 2 claws to install the knob.

. INSTALL SLIDE AND VERTICAL POWER SEAT SWITCH NO

a. Attach the 2 claws to install the knob.

10. INSTALL FRONT SEAT ASSEMBLY LH

a. Install the front seat assembly (Click here).

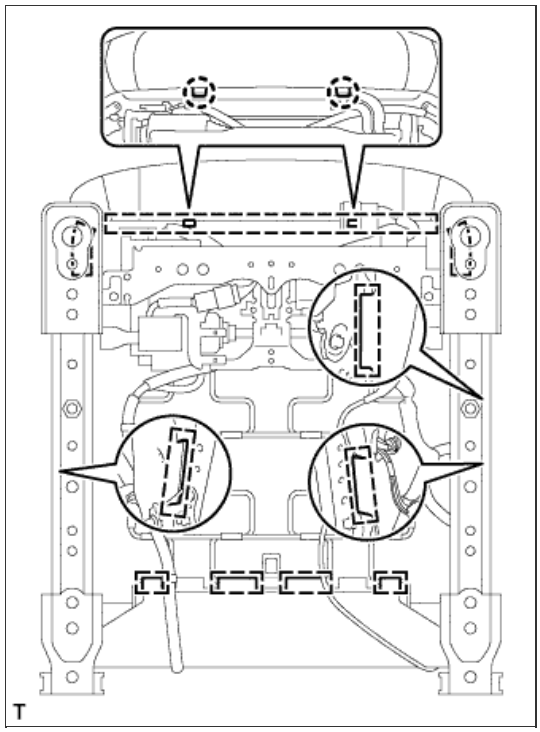
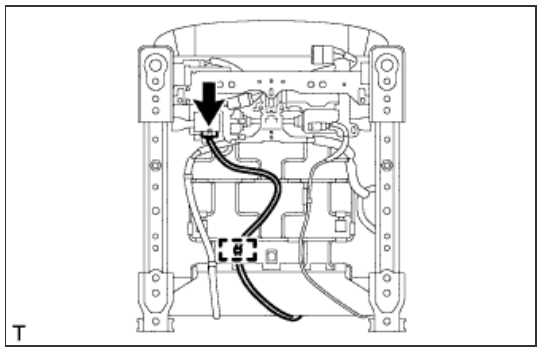
2. INSTALL FRONT SEPARATE TYPE SEAT CUSHION COVER

a. Using hog ring pliers, install the seat cushion cover to the seat cushion pad with new hog rings.

NOTICE:



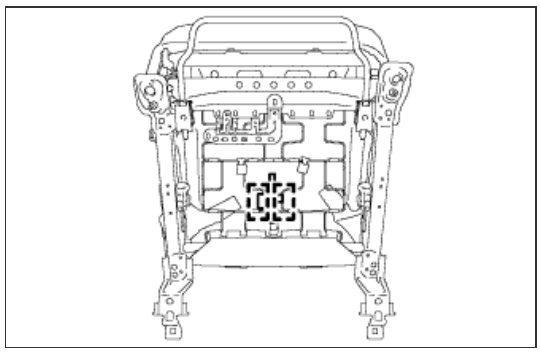
- **Be careful not to damage the cover.**
- **When installing the hog rings, avoid wrinkling the cover.**



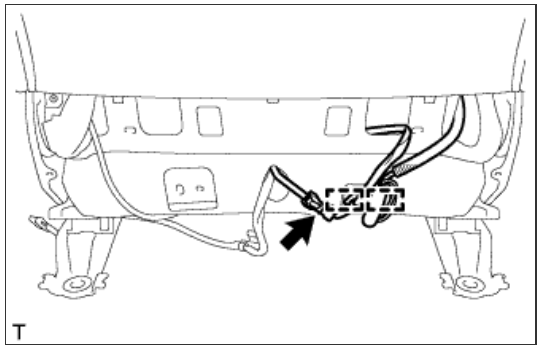
3. INSTALL SEAT CUSHION COVER WITH PAD

a. Attach the hooks to install the seat cushion cover with pad.

b. Bend the 2 seat frame claws downward.

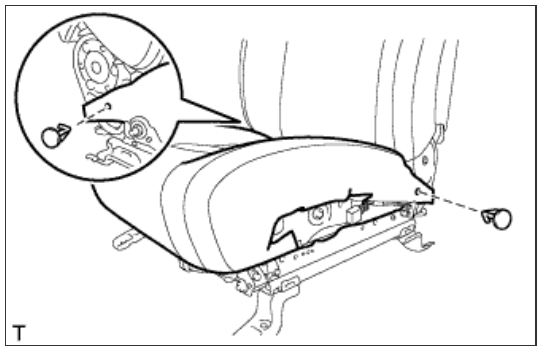


c. Connect the seat heater control connector and attach the wire harness clamp.



d. for Front asenger Side:

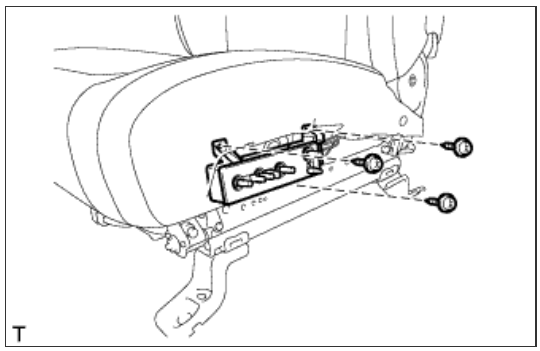
i. Attach the 2 clamps to install the seat belt warning sensor connector.



ii. Connect the seat belt warning sensor connector.

e. Connect the seat heater connector and attach the 2 wire harness clamps.

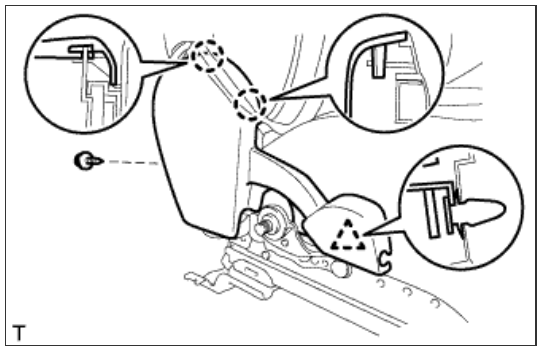
f. Install the 2 clips.



4. INSTALL FRONT POWER SEAT SWITCH LH

a. Install the switch with the 3 screws.

b. w/ Seat osition Memory System:
Connect the 2 connectors.



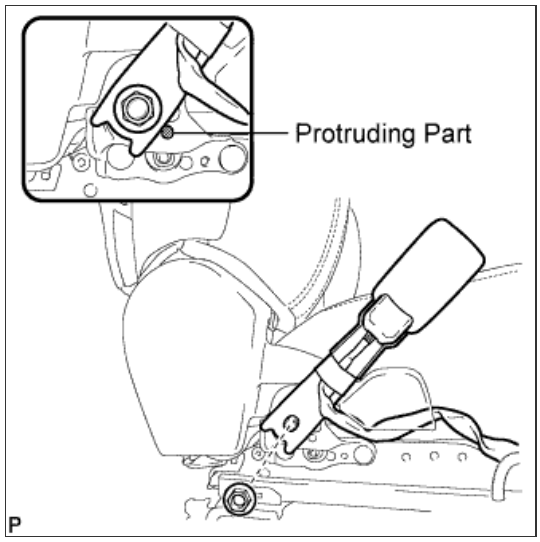
c. w/o Seat osition Memory System:
Connect the connector.

5. INSTALL FRONT INNER SEAT CUSHION SHIELD LH

a. Attach the 2 claws and clip to install the cushion shield.

b. Install the screw.

6. INSTALL FRONT SEAT INNER BELT ASSEMBLY LH



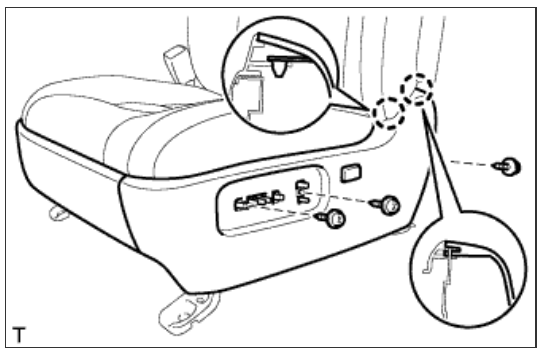
a. Install the front seat inner belt assembly with the nut.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf

NOTICE:

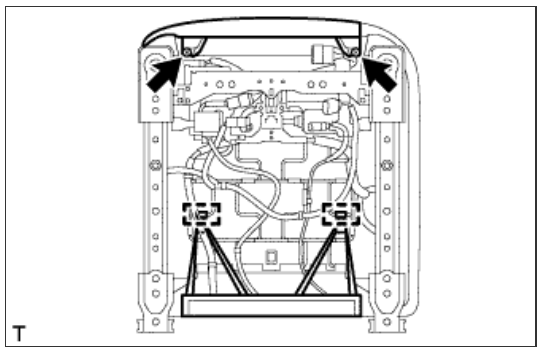
Do not allow the anchor part of the front seat inner belt assembly to overlap the protruding parts of the front seat adjuster.

b. Connect the connectors and attach the clamps.



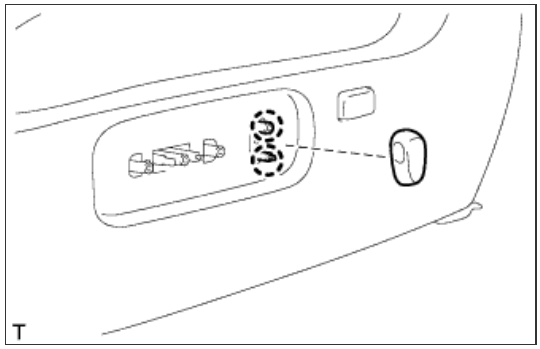
7. INSTALL FRONT SEAT CUSHION SHIELD LH

a. for Driver Side:
Connect the lumbar switch connectors.



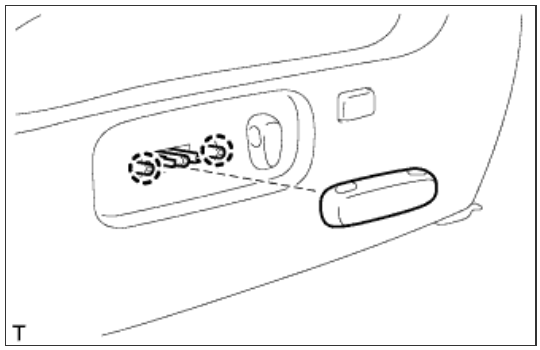
b. Attach the 2 claws to install the cushion shield.

c. Install the 3 screws.



d. Install the 2 screws.

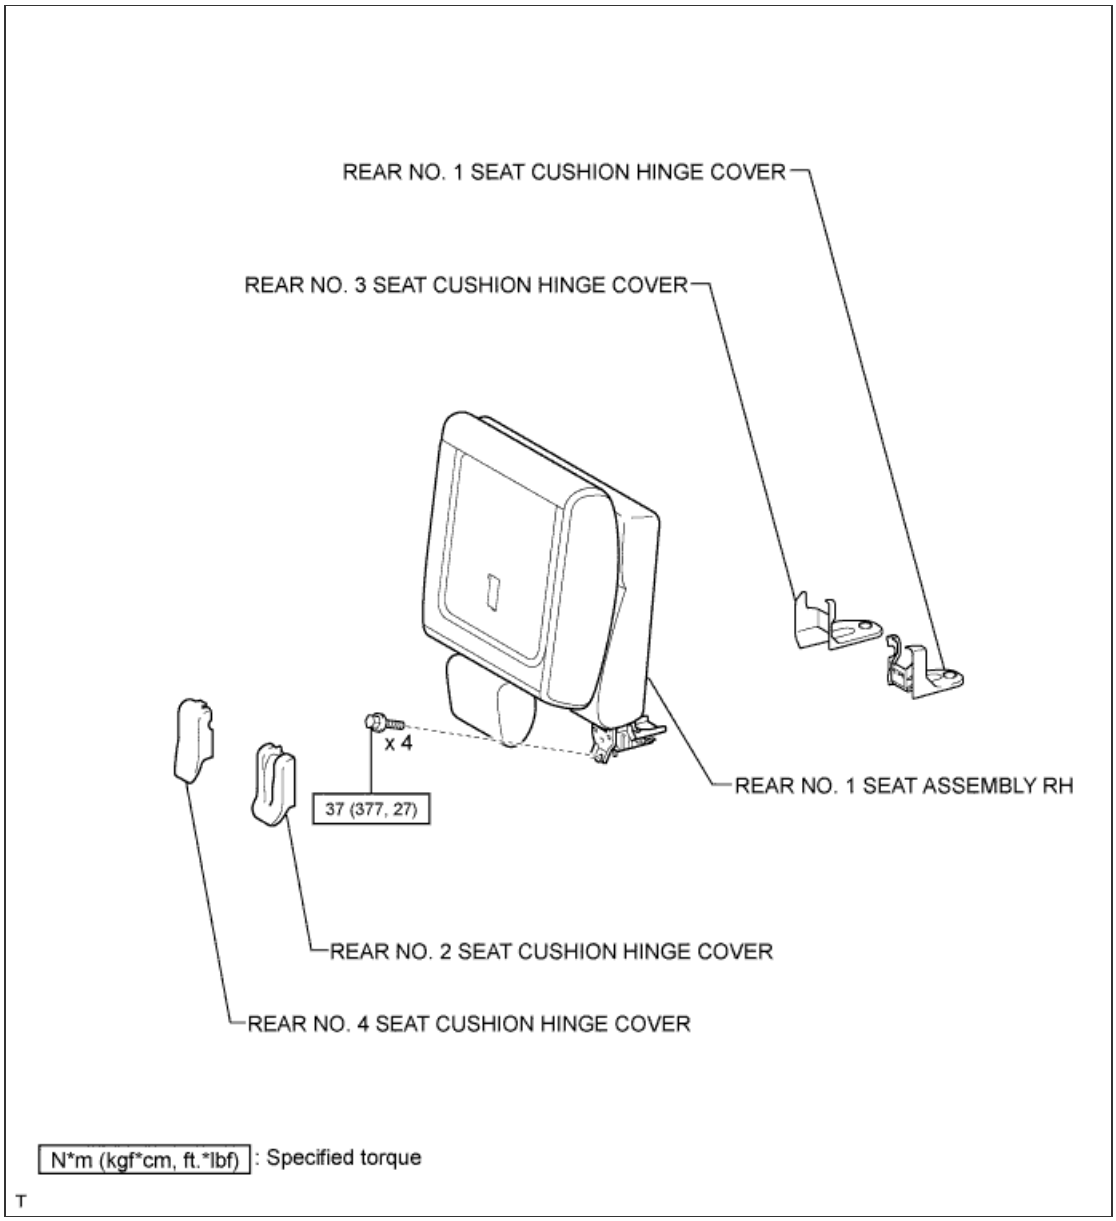
e. Attach the 2 rubber bands to the hooks.



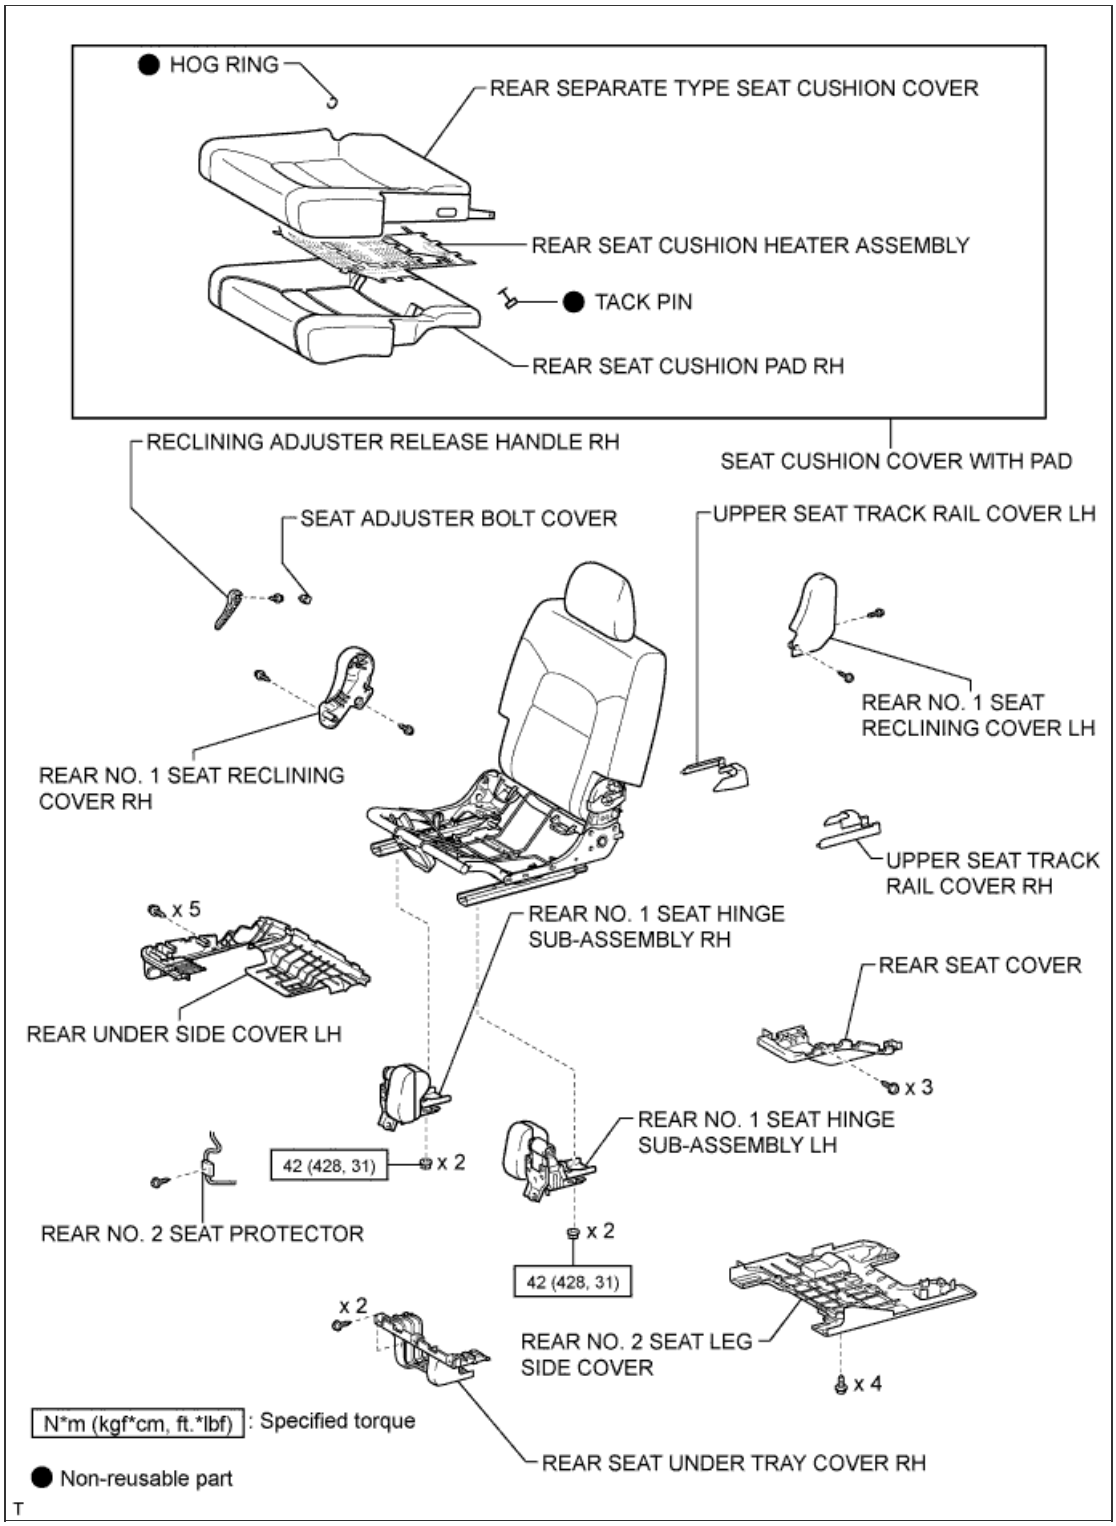
8. INSTALL RECLININ POWER SEAT SWITCH NC

a. Attach the 2 claws to install the knob.

. INSTALL SLIDE AND VERTICAL POWER SEAT SWITCH NO



a. Attach the 2 claws to install the knob.



10. INSTALL FRONT SEAT ASSEMBLY LH

a. Install the front seat assembly (Click here).

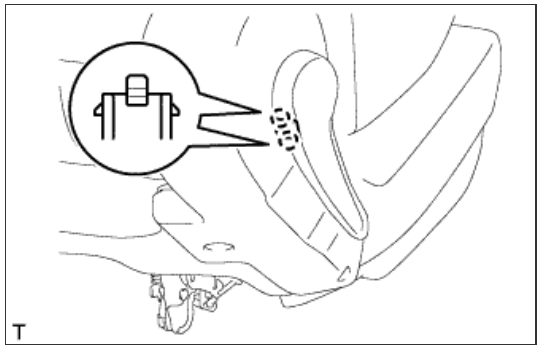
HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

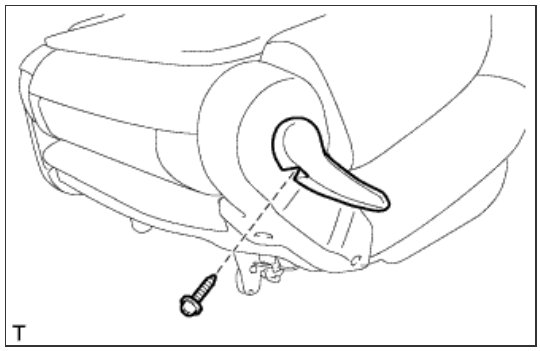
1. REMOVE REAR NO. 1 SEAT ASSEMBLY RH



a. Remove the rear No. 1 seat assembly (Click here).

2. REMOVE SEAT ADJUSTER BOLT COVER

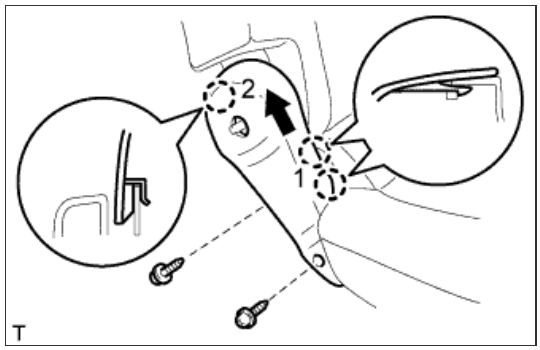
a. Using a screwdriver, detach the 2 claws and remove the cover.



HINT:

Tape the screwdriver tip before use.

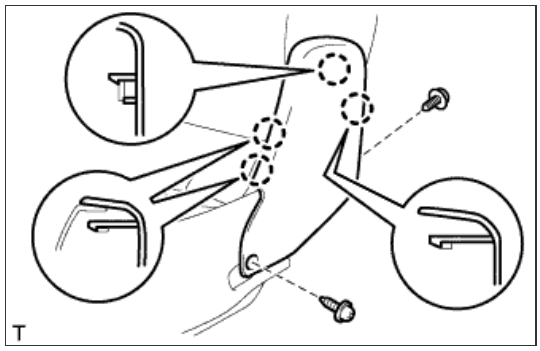
3. REMOVE RECLINING ADJUSTER RELEASE HANDLE RH



a. Remove the screw and release handle.

4. REMOVE REAR NO. 1 SEAT RECLINING COVER RH

a. Remove the 2 screws.

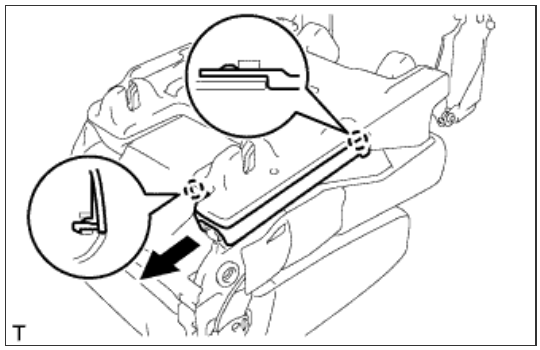


b. Detach the 3 claws in the order shown in the illustration, and then remove the cover.

5. REMOVE REAR NO. 1 SEAT RECLINING COVER LH

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.

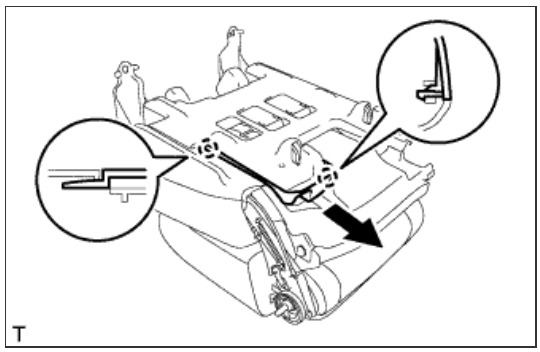


6. REMOVE UPPER SEAT TRACK RAIL COVER LH

a. Using a screwdriver, detach the 2 claws and remove the cover.

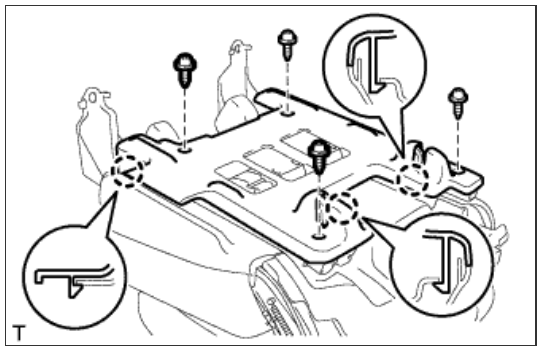
HINT:

Tape the screwdriver tip before use.



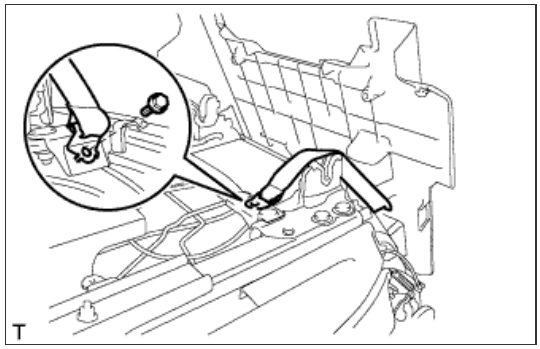
7. REMOVE UPPER SEAT TRACK RAIL COVER RH

a. Using a screwdriver, detach the 2 claws and remove the cover.



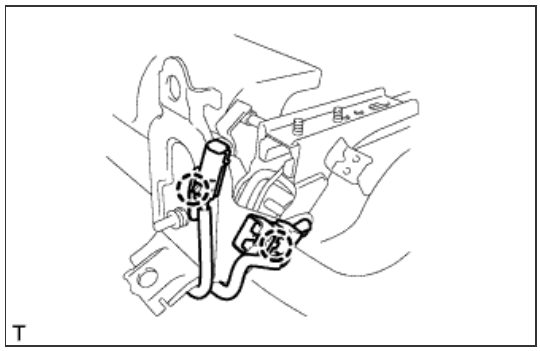
HINT:

Tape the screwdriver tip before use.



8. REMOVE REAR NO. 2 SEAT LEG SIDE COVER

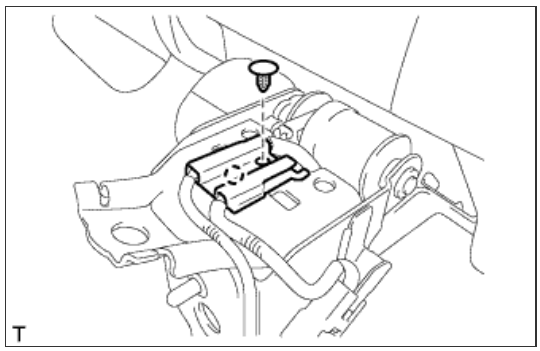
a. Remove the 4 screws and detach the 3 claws.



b. Remove the bolt that is securing the fold seat stopper band and remove the seat leg side cover together with the fold seat stopper band.

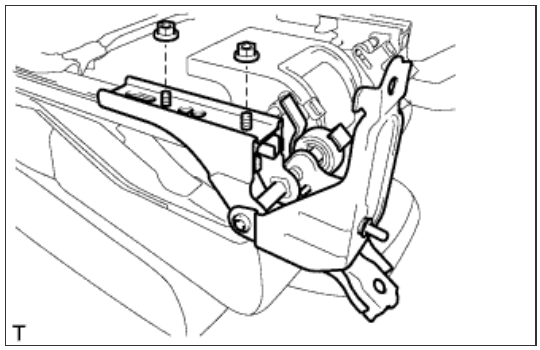
9. REMOVE REAR NO. 2 SEAT PROTECTOR

a. w/ Rear Seat Side Airbag:
Detach the claw and remove the wire harness connector.



b. w/ Seat Heater System:
Detach the claw and remove the wire harness connector.

c. Using a clip remover, remove the clip.

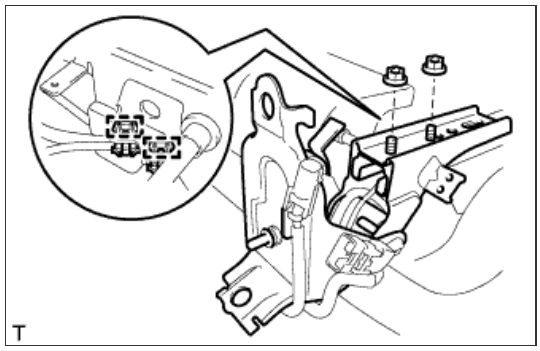


d. Detach the claw and remove the seat protector from the seat hinge.

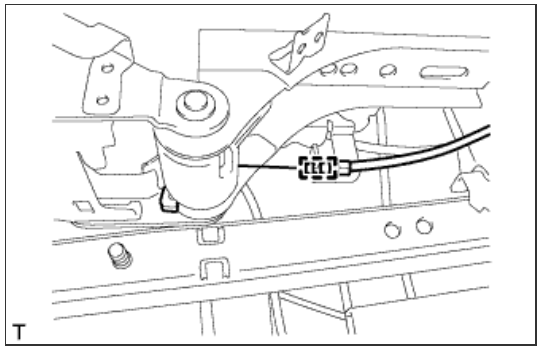
e. Detach the 2 claws, open the protector and remove the wire harness.

10. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH

a. Remove the 2 nuts and hinge.



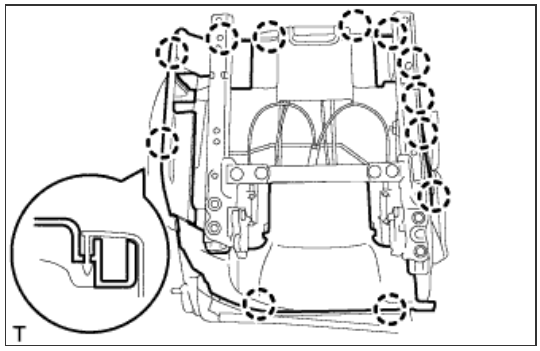
11. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH



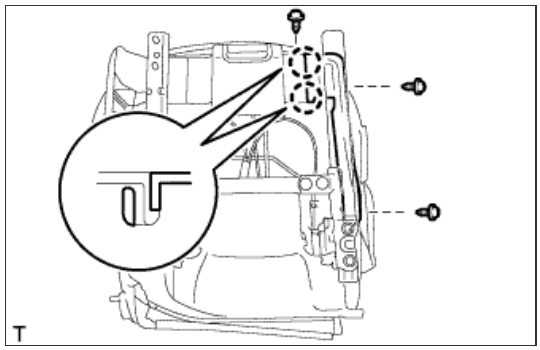
a. w/ Rear Seat Side Airbag:
Detach the wire harness clamp.

b. w/ Seat Heater System:
Detach the wire harness clamp.

c. Remove the 2 nuts and hinge.



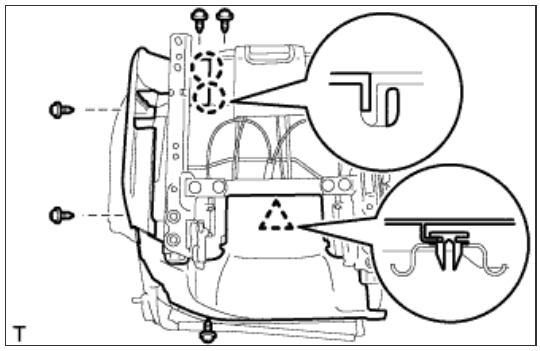
d. Detach the cable clamp and disconnect the cable.



12. REMOVE REAR SEAT COVER

a. Detach the 12 claws.

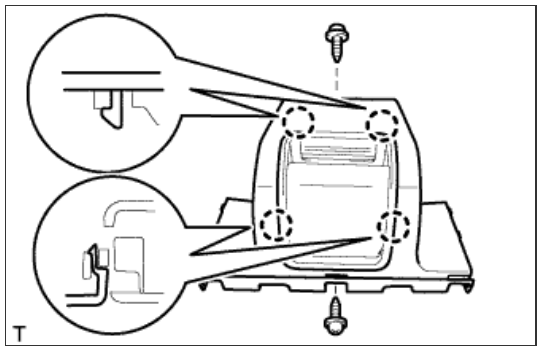
b. Remove the 3 screws.



c. Detach the 2 claws and remove the cover.

13. REMOVE REAR UNDER SIDE COVER LH

a. Remove the 5 screws.



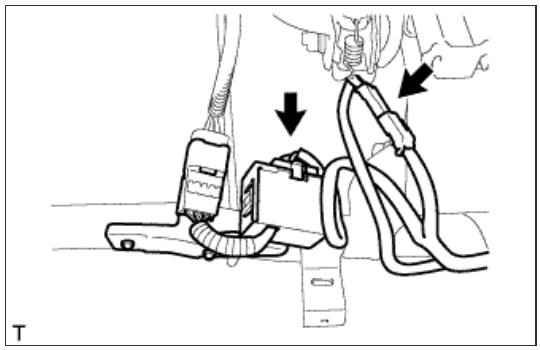
b. Detach the clip and 2 claws, and remove the cover.

14. REMOVE REAR SEAT UNDER TRAY COVER RH

a. Remove the 2 screws.

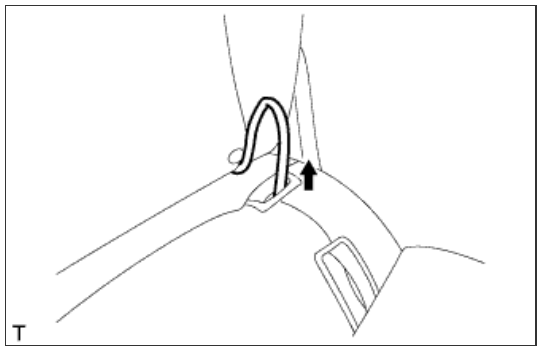
b. Detach the 4 claws and remove the cover.

15. REMOVE SEAT CUSHION COVER WITH PAD



a. w/ Rear Seat Side Airbag:

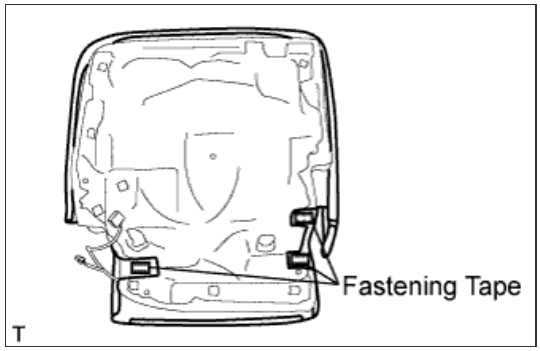
i. Detach the side airbag wire harness clamps.



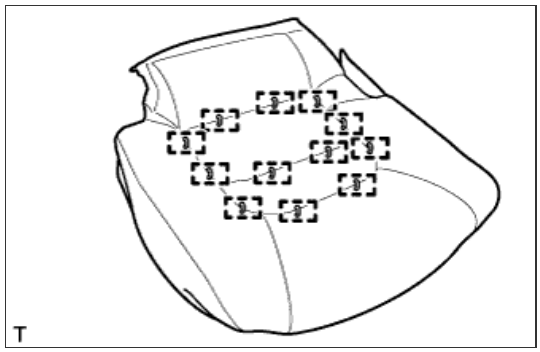
ii. Remove the side airbag wire harness through the hole in the seat cushion.

b. w/ Seat Heater System:

i. Disconnect the 2 seat heater connectors.



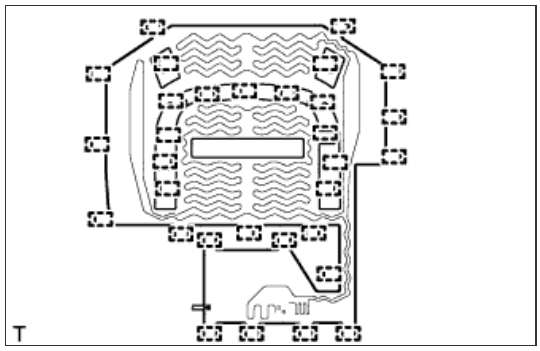
ii. Remove the seatback heater wire harness through the hole in the seat cushion.



c. Remove the seat cushion cover with pad.

16. REMOVE REAR SEPARATE TYPE SEAT CUSHION COVER

a. Detach the 3 pieces of fastening tape.



b. Remove the hog rings and cover.

17. REMOVE REAR SEAT CUSHION HEATER ASSEMBLY

a. Cut off the tack pins which fasten the seat heater to the seat cushion cover, and then remove the seat cushion heater from the seat cushion cover.

T

for Preparation Click here

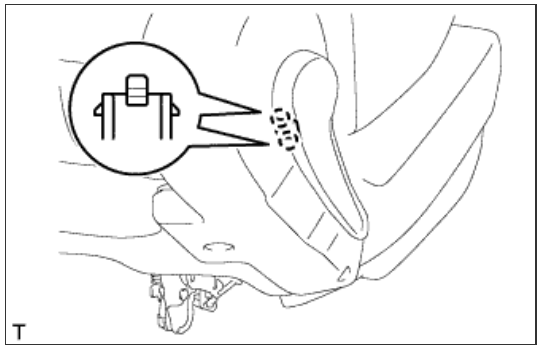
CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

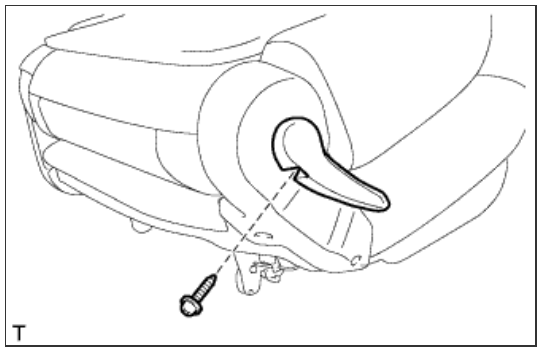
1. REMOVE REAR NO. 1 SEAT ASSEMBLY RH



a. Remove the rear No. 1 seat assembly (Click here).

2. REMOVE SEAT ADJUSTER BOLT COVER

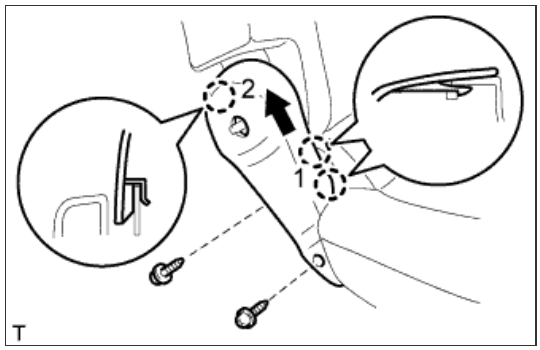
a. Using a screwdriver, detach the 2 claws and remove the cover.



HINT:

Tape the screwdriver tip before use.

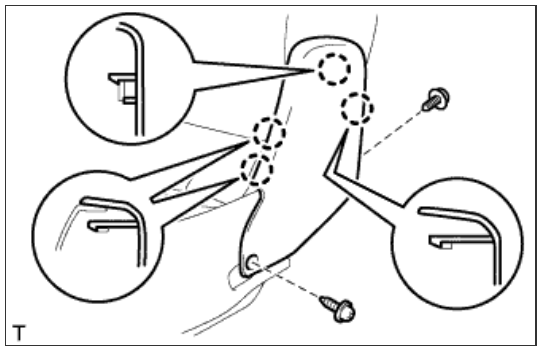
3. REMOVE RECLINING ADJUSTER RELEASE HANDLE RH



a. Remove the screw and release handle.

4. REMOVE REAR NO. 1 SEAT RECLINING COVER RH

a. Remove the 2 screws.

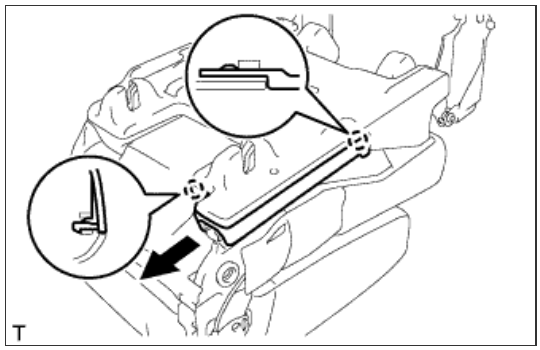


b. Detach the 3 claws in the order shown in the illustration, and then remove the cover.

5. REMOVE REAR NO. 1 SEAT RECLINING COVER LH

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.

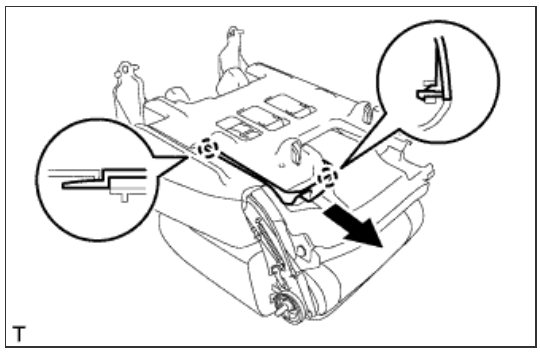


6. REMOVE UPPER SEAT TRACK RAIL COVER LH

a. Using a screwdriver, detach the 2 claws and remove the cover.

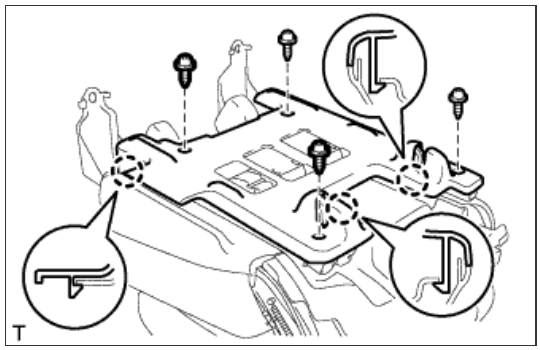
HINT:

Tape the screwdriver tip before use.



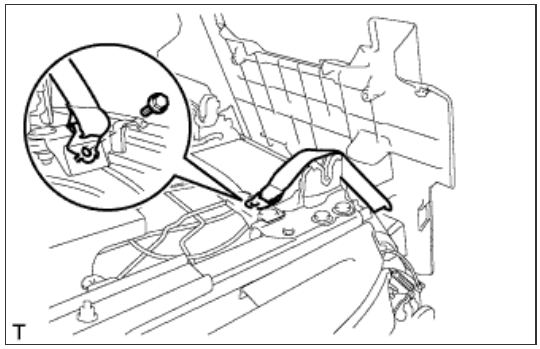
7. REMOVE UPPER SEAT TRACK RAIL COVER RH

a. Using a screwdriver, detach the 2 claws and remove the cover.



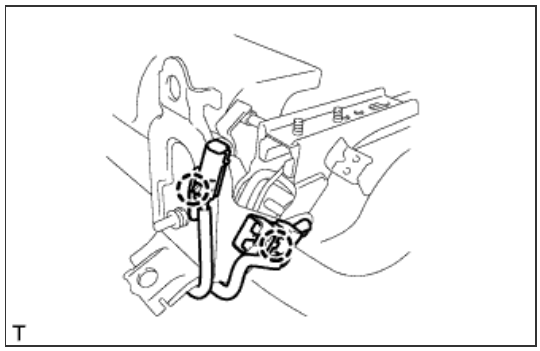
HINT:

Tape the screwdriver tip before use.



8. REMOVE REAR NO. 2 SEAT LEG SIDE COVER

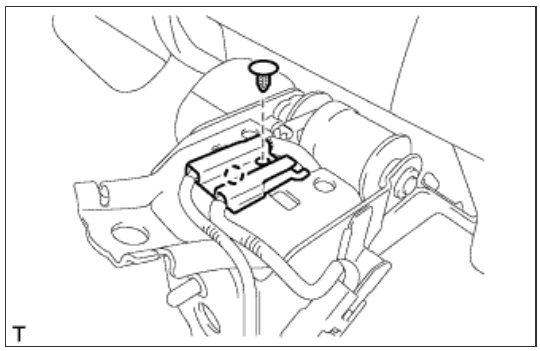
a. Remove the 4 screws and detach the 3 claws.



b. Remove the bolt that is securing the fold seat stopper band and remove the seat leg side cover together with the fold seat stopper band.

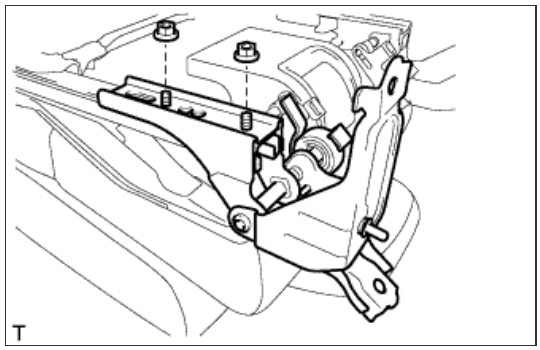
9. REMOVE REAR NO. 2 SEAT PROTECTOR

a. w/ Rear Seat Side Airbag:
Detach the claw and remove the wire harness connector.



b. w/ Seat Heater System:
Detach the claw and remove the wire harness connector.

c. Using a clip remover, remove the clip.

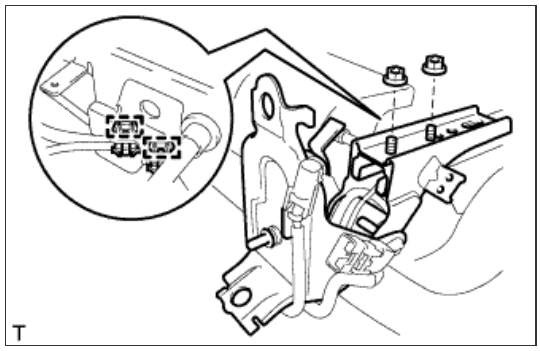


d. Detach the claw and remove the seat protector from the seat hinge.

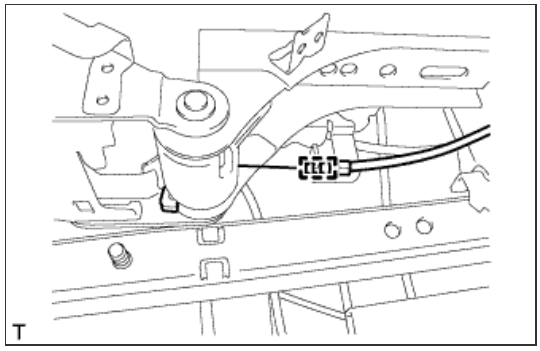
e. Detach the 2 claws, open the protector and remove the wire harness.

10. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH

a. Remove the 2 nuts and hinge.



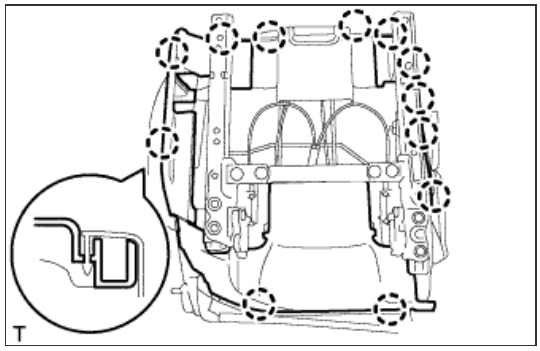
11. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH



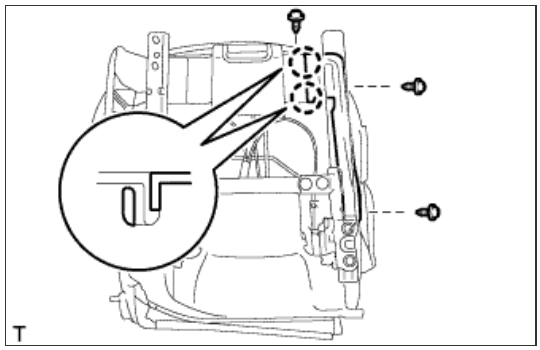
a. w/ Rear Seat Side Airbag:
Detach the wire harness clamp.

b. w/ Seat Heater System:
Detach the wire harness clamp.

c. Remove the 2 nuts and hinge.



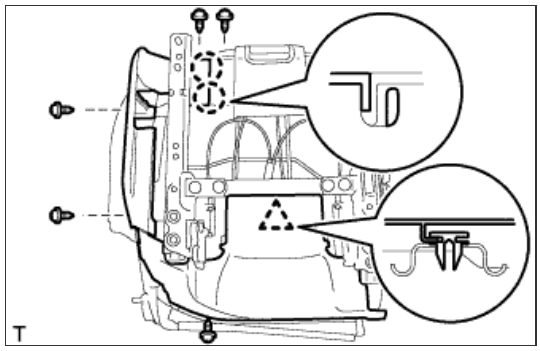
d. Detach the cable clamp and disconnect the cable.



12. REMOVE REAR SEAT COVER

a. Detach the 12 claws.

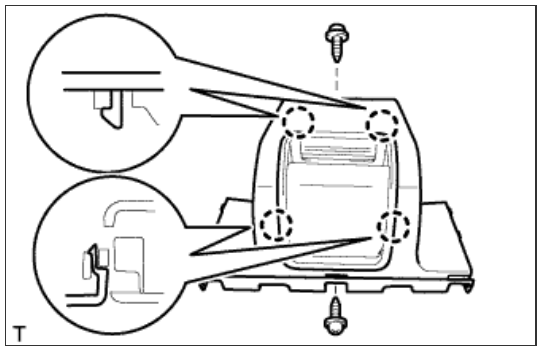
b. Remove the 3 screws.



c. Detach the 2 claws and remove the cover.

13. REMOVE REAR UNDER SIDE COVER LH

a. Remove the 5 screws.



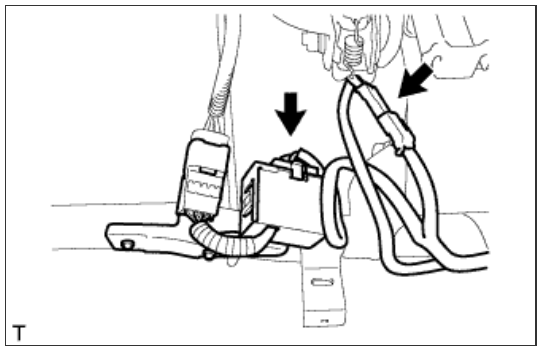
b. Detach the clip and 2 claws, and remove the cover.

14. REMOVE REAR SEAT UNDER TRAY COVER RH

a. Remove the 2 screws.

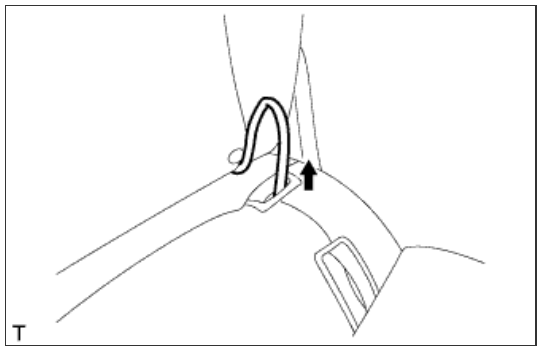
b. Detach the 4 claws and remove the cover.

15. REMOVE SEAT CUSHION COVER WITH PAD



a. w/ Rear Seat Side Airbag:

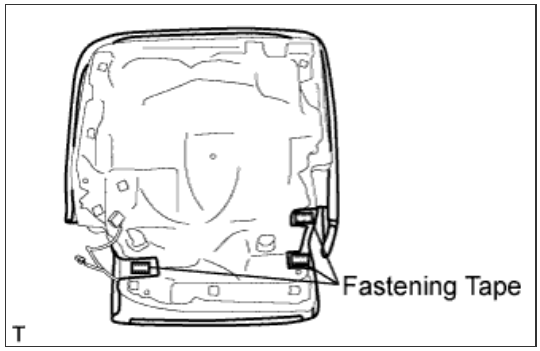
i. Detach the side airbag wire harness clamps.



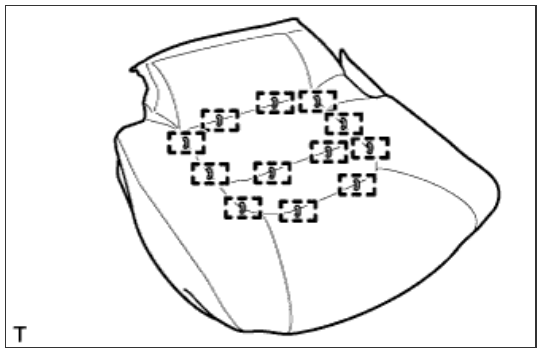
ii. Remove the side airbag wire harness through the hole in the seat cushion.

b. w/ Seat Heater System:

i. Disconnect the 2 seat heater connectors.



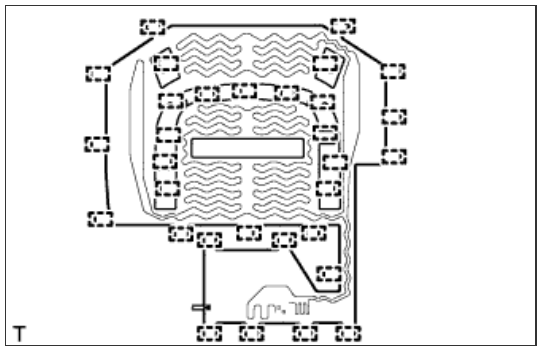
ii. Remove the seatback heater wire harness through the hole in the seat cushion.



c. Remove the seat cushion cover with pad.

16. REMOVE REAR SEPARATE TYPE SEAT CUSHION COVER

a. Detach the 3 pieces of fastening tape.



b. Remove the hog rings and cover.

17. REMOVE REAR SEAT CUSHION HEATER ASSEMBLY

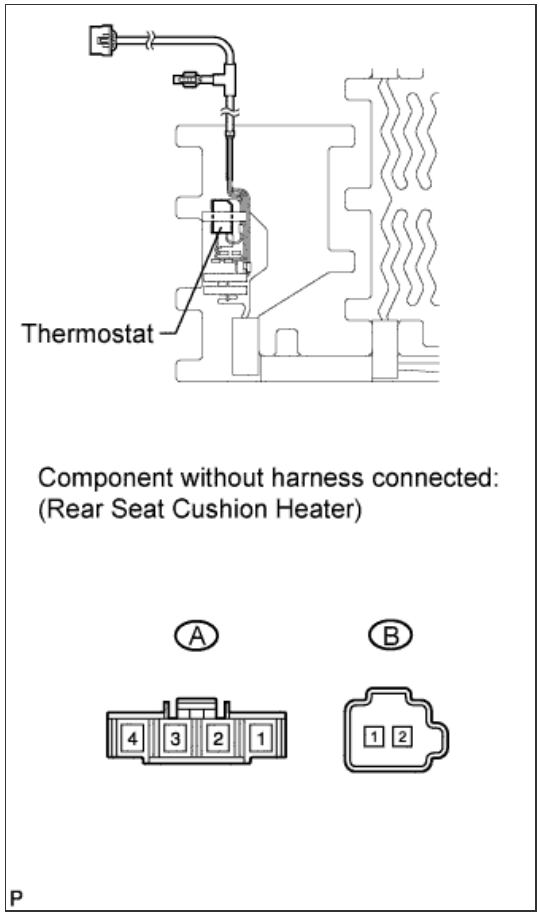
a. Cut off the tack pins which fasten the seat heater to the seat cushion cover, and then remove the seat cushion heater from the seat cushion cover.

T

for Preparation Click here

1. INSPECT REAR SEAT CUSHION HEATER ASSE

a. Heat the thermostat with a light.



b. Check the seat cushion heater.

i. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

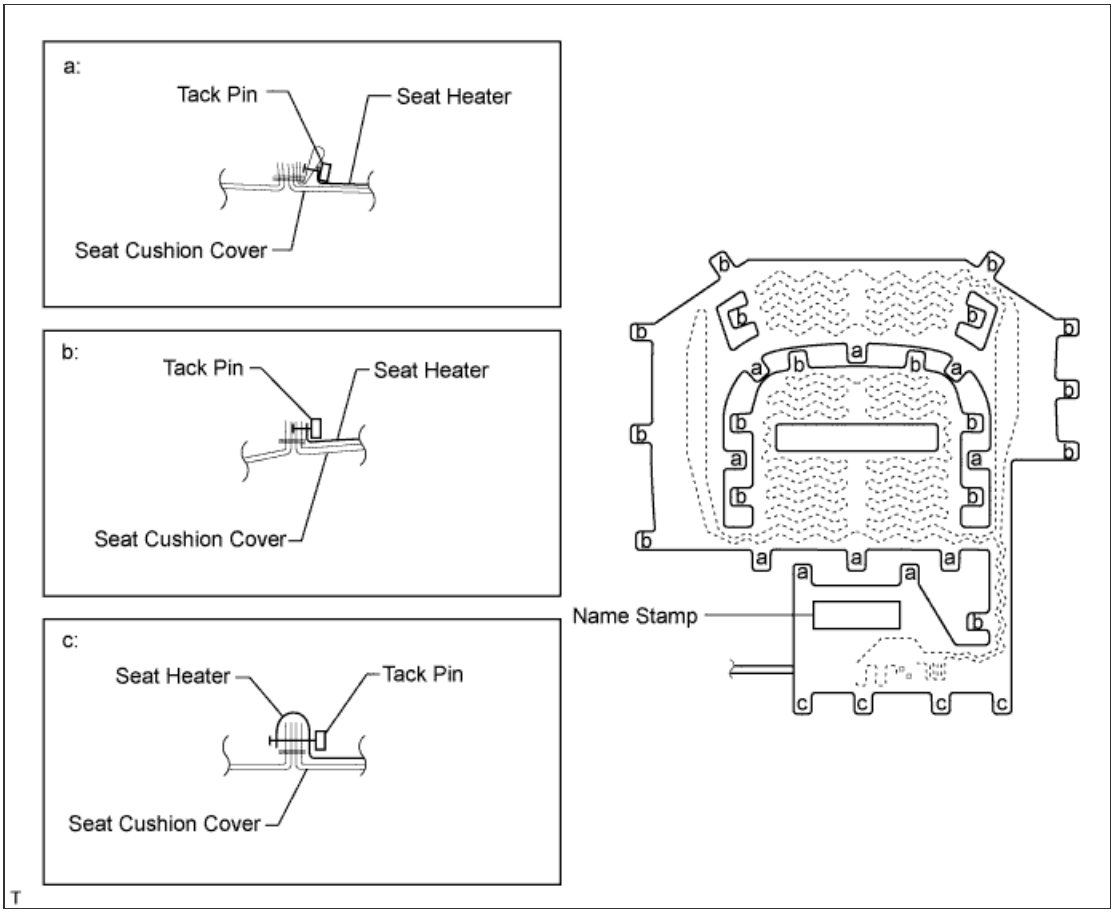
Tester Connection	Condition	Specified Condition
A-1 - B-1	Seat cushion heater temperature 25 C (77)	3.05 to 3.65 Ω
A-4 - B-2		
A-1 - A-4		
A-2 - A-3		8 to 12 kΩ

f the result is not as specified, replace the seat cushion heater assembly.

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.



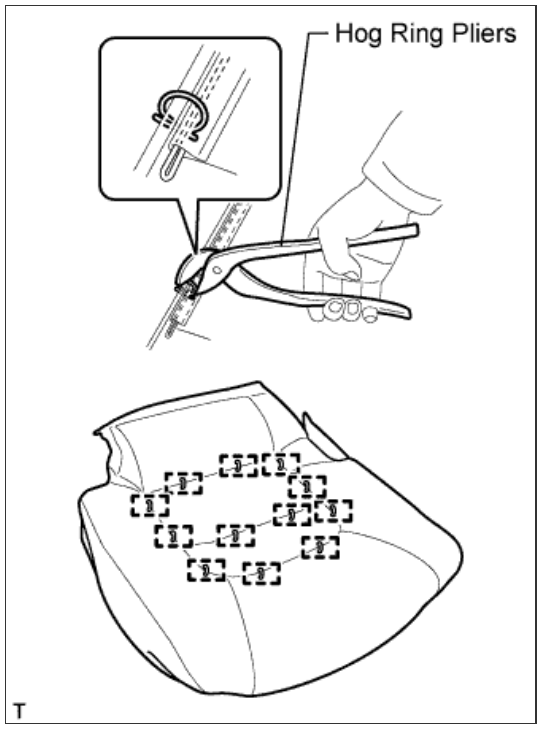
HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL REAR SEAT CUSHION HEATER ASSEMBLY

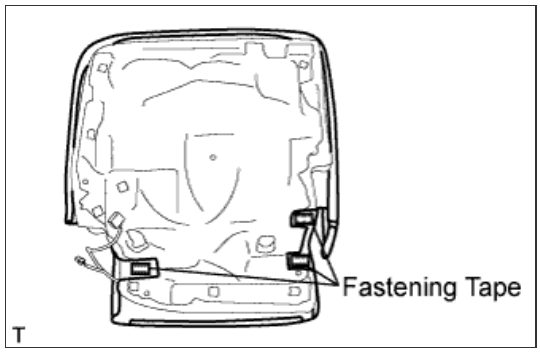
a. Set the seat cushion heater with the name stamp side facing the seat cushion cover.

b. Install the seat cushion heater with new tack pins.



2. INSTALL REAR SEPARATE TYPE SEAT CUSHION COVER

a. Using hog ring pliers, install the seat cushion cover to the seat cushion pad with new hog rings.

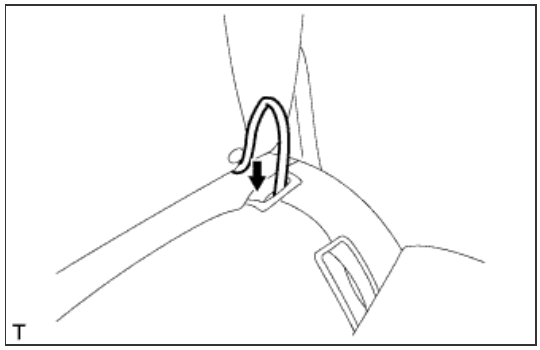


NOTICE:

- **Be careful not to damage the cover.**

- **When installing the hog rings, avoid wrinkling the cover.**

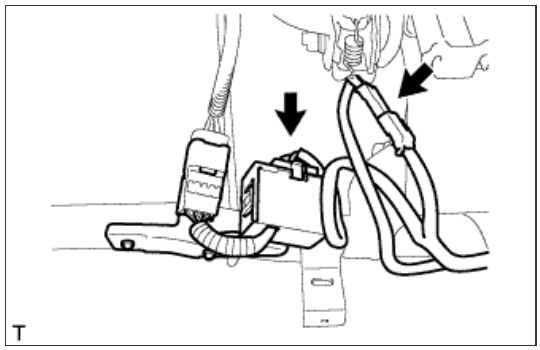
b. Attach the 3 pieces of fastening tape.



3. INSTALL SEAT CUSHION COVER WITH PAD

a. Install the seat cushion cover with pad.

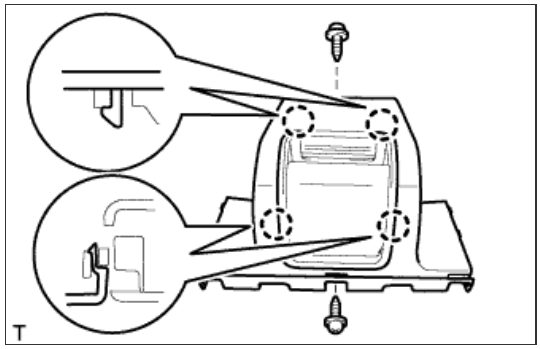
b. w/ Rear Seat Side Airbag:
Pass the side airbag wire harness through the hole in the seat cushion.



c. w/ Seat Heater System:

i. Pass the seatback heater wire harness through the hole in the seat cushion.

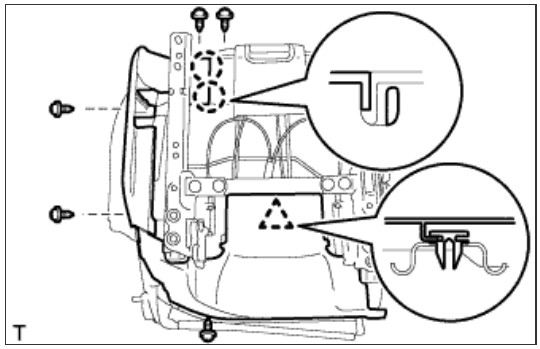
ii. Connect the 2 seat heater connectors.



d. w/ Rear Seat Side Airbag:
Attach the side airbag wire harness clamps.

4. INSTALL REAR SEAT UNDER TRAY COVER RH

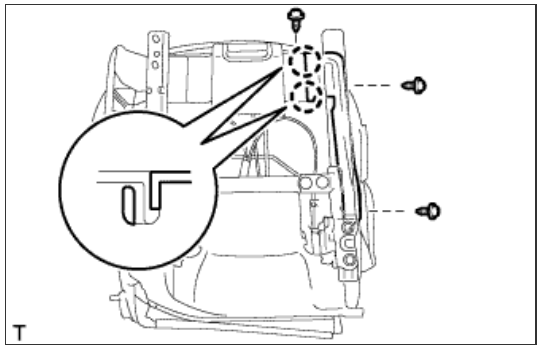
a. Attach the 4 claws to install the cover.



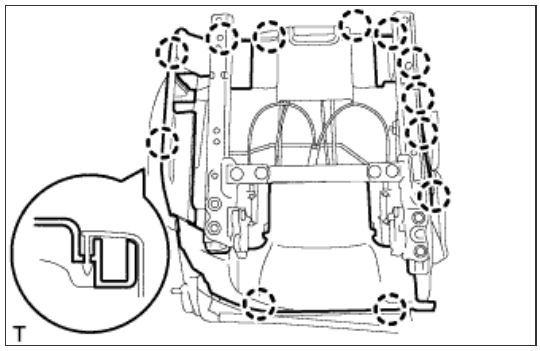
b. Install the 2 screws.

5. INSTALL REAR UNDER SIDE COVER LH

a. Attach the 2 claws and clip to install the cover.



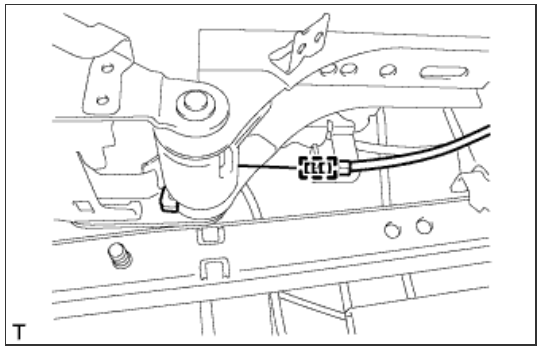
b. Install the 5 screws.



6. INSTALL REAR SEAT COVER

a. Attach the 2 claws to install the cover.

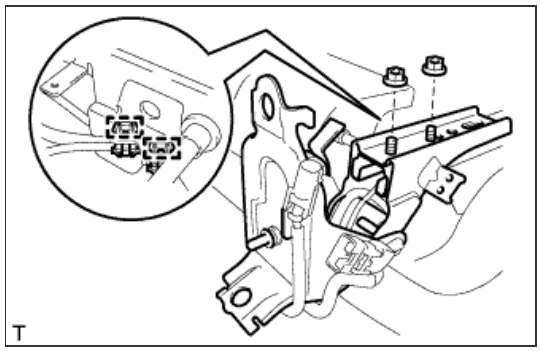
b. Install the 3 screws.



c. Attach the 12 claws.

7. INSTALL REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH

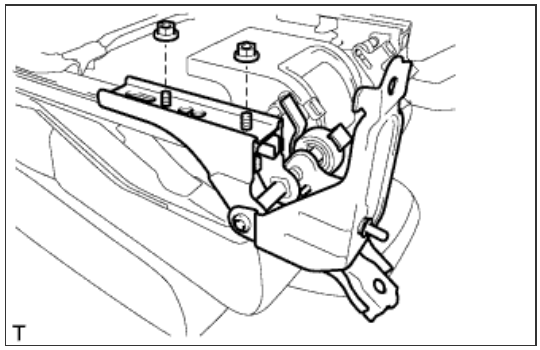
a. Attach the cable clamp to connect the cable.



b. Install the hinge with the 2 nuts.

Tor ue:
42 N m 42 kgf cm , 31 ft. lbf

c. w/ Rear Seat Side Airbag:
Attach the wire harness clamp.

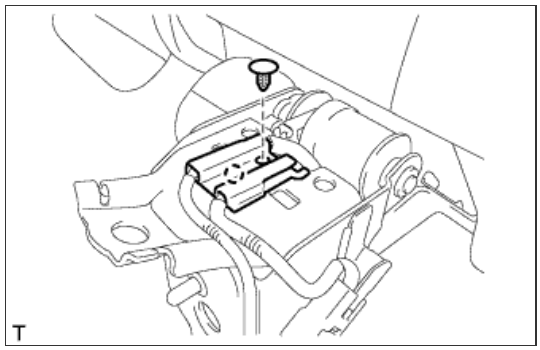


d. w/ Seat Heater System:
Attach the wire harness clamp.

8. INSTALL REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH

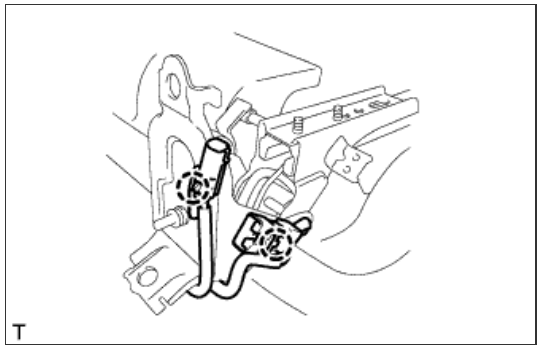
a. Install the hinge with the 2 nuts.

Tor ue:
42 N m 42 kgf cm , 31 ft. lbf



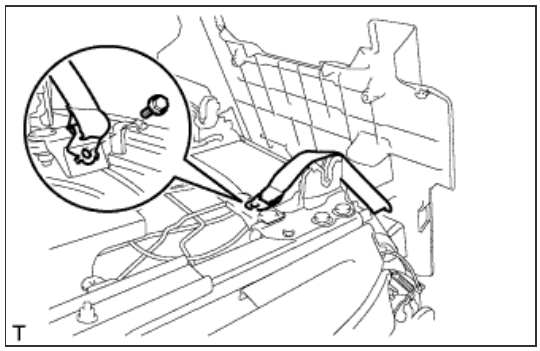
. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Install the wire harness, and attach the 2 claws to close the protector.



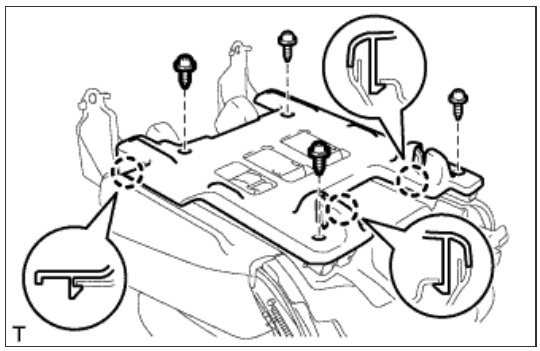
b. Attach the claw to install the protector to the seat hinge.

c. Install the clip.



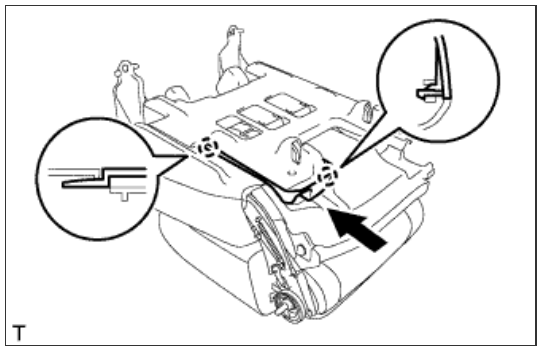
d. w/ Rear Seat Side Airbag:
Attach the claw to install the wire harness connector.

e. w/ Seat Heater System:
Attach the claw to install the wire harness connector.



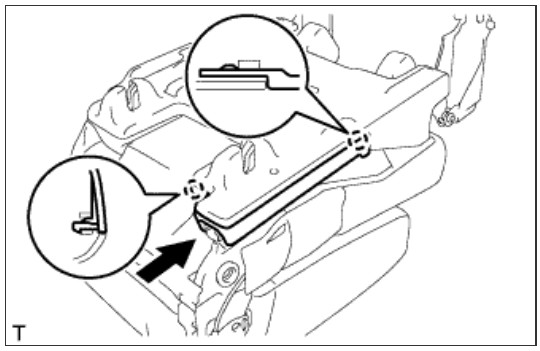
10. INSTALL REAR NO. 2 SEAT LEG SIDE COVER

a. Pass the fold seat stopper band through the seat leg side cover and attach it to the seat cushion frame with the bolt.



b. Attach the 3 claws to install the seat leg side cover.

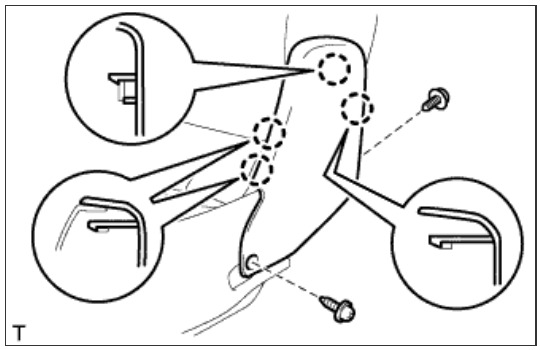
c. Install the 4 screws.



11. INSTALL UPPER SEAT TRAC RAIL COVER RH

a. Attach the 2 claws to install the cover.

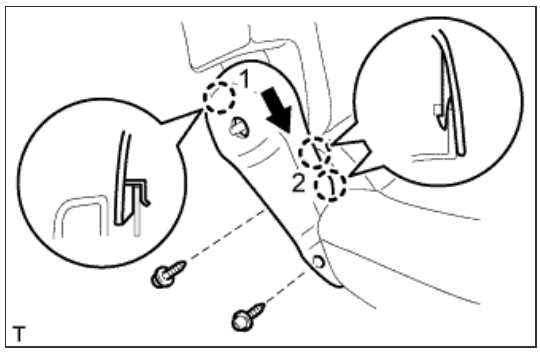
12. INSTALL UPPER SEAT TRAC RAIL COVER LH



a. Attach the 2 claws to install the cover.

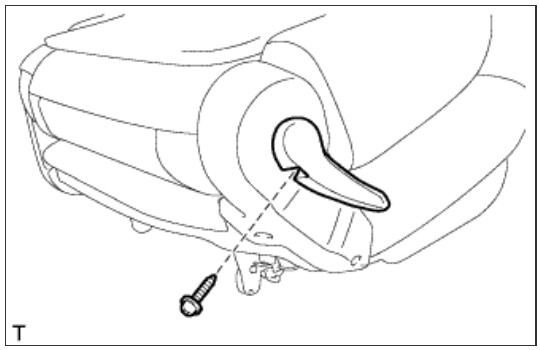
13. INSTALL REAR NO. 1 SEAT RECLINING COVER LH

a. Attach the 4 claws to install the cover.



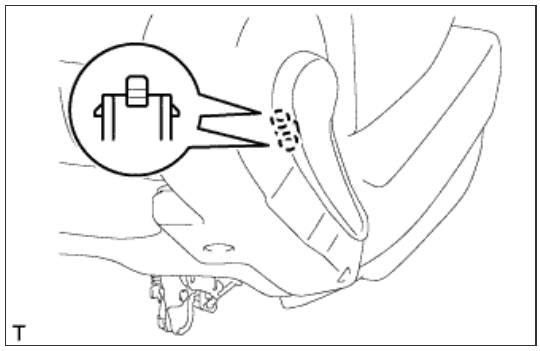
b. Install the 2 screws.

14. INSTALL REAR NO. 1 SEAT RECLINING COVER RH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

b. Install the 2 screws.



15. INSTALL RECLINING AD USTER RELEASE HANDLE RH

a. Install the release handle with the screw.

16. INSTALL SEAT AD USTER BOLT COVER

a. Attach the 2 claws to install the cover.

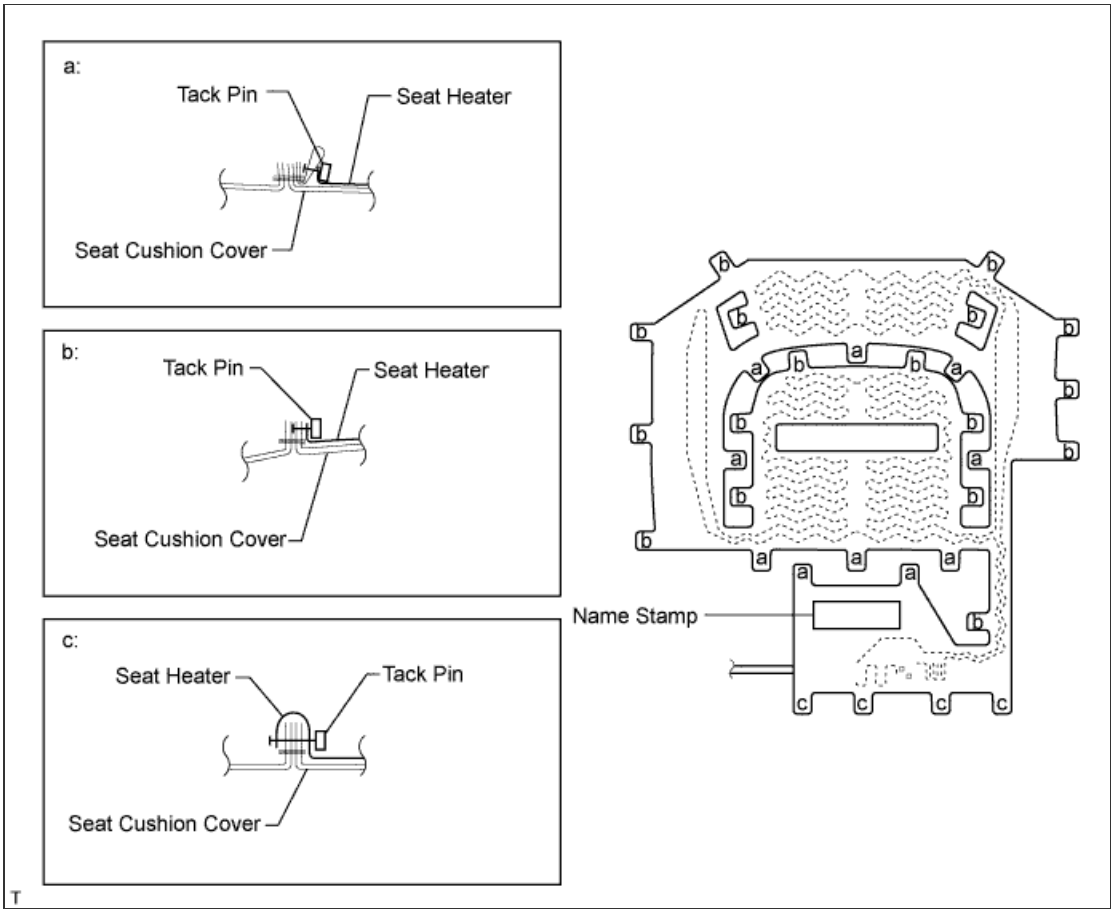
17. INSTALL REAR NO. 1 SEAT ASSEMBLY RH

a. Install the rear No. 1 seat assembly (Click here).

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.



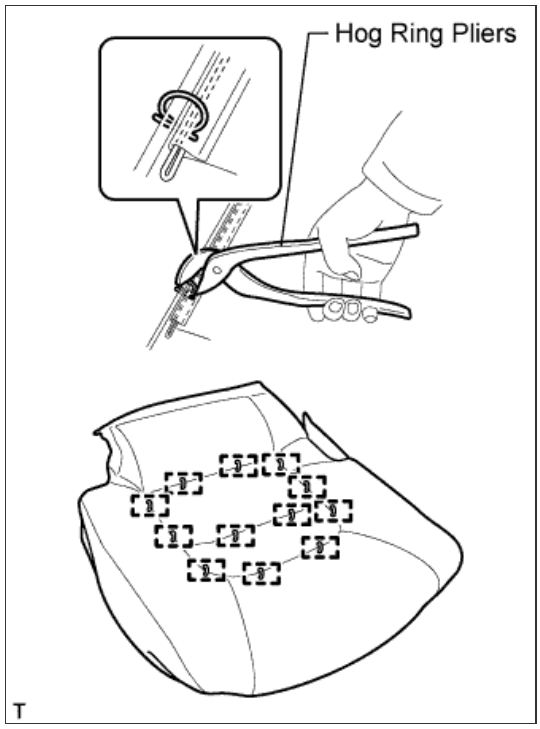
HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL REAR SEAT CUSHION HEATER ASSEMBLY

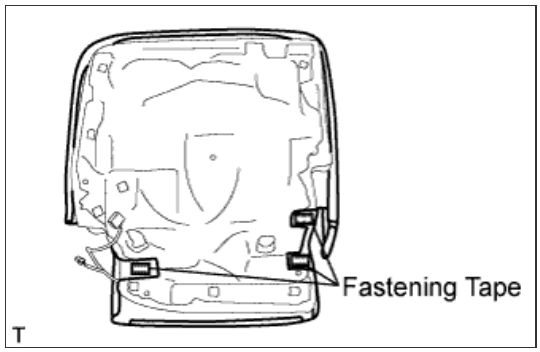
a. Set the seat cushion heater with the name stamp side facing the seat cushion cover.

b. Install the seat cushion heater with new tack pins.



2. INSTALL REAR SEPARATE TYPE SEAT CUSHION COVER

a. Using hog ring pliers, install the seat cushion cover to the seat cushion pad with new hog rings.

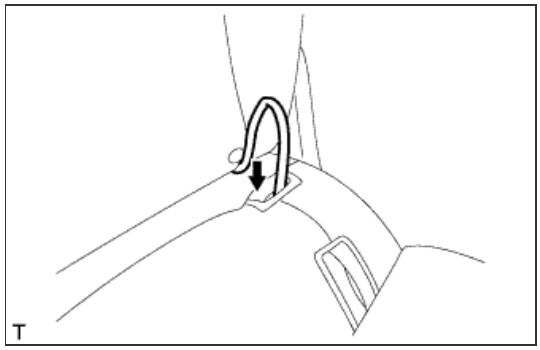


NOTICE:

- **Be careful not to damage the cover.**

- **When installing the hog rings, avoid wrinkling the cover.**

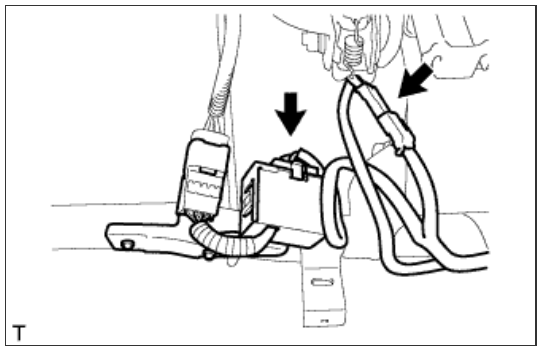
b. Attach the 3 pieces of fastening tape.



3. INSTALL SEAT CUSHION COVER WITH PAD

a. Install the seat cushion cover with pad.

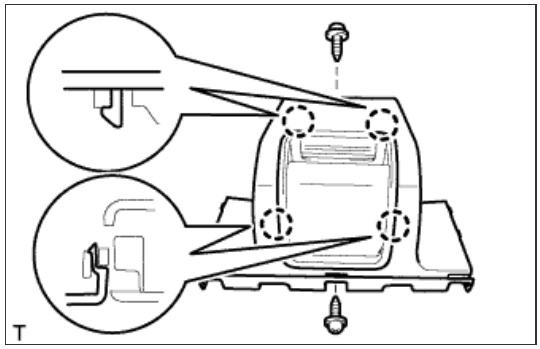
b. w/ Rear Seat Side Airbag:
Pass the side airbag wire harness through the hole in the seat cushion.



c. w/ Seat Heater System:

i. Pass the seatback heater wire harness through the hole in the seat cushion.

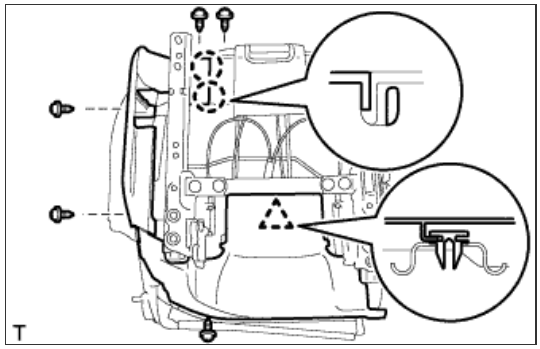
ii. Connect the 2 seat heater connectors.



d. w/ Rear Seat Side Airbag:
Attach the side airbag wire harness clamps.

4. INSTALL REAR SEAT UNDER TRAY COVER RH

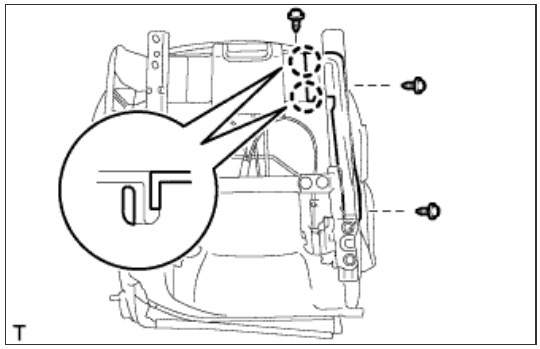
a. Attach the 4 claws to install the cover.



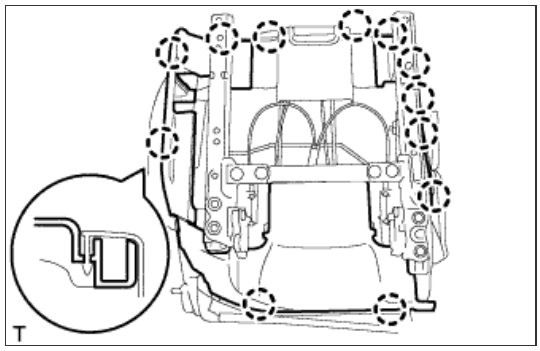
b. Install the 2 screws.

5. INSTALL REAR UNDER SIDE COVER LH

a. Attach the 2 claws and clip to install the cover.



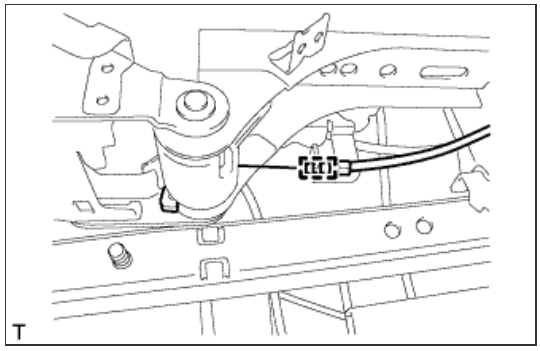
b. Install the 5 screws.



6. INSTALL REAR SEAT COVER

a. Attach the 2 claws to install the cover.

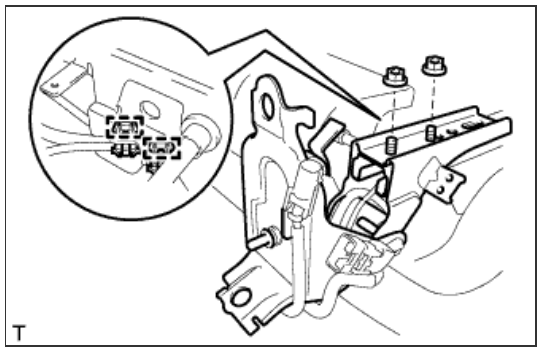
b. Install the 3 screws.



c. Attach the 12 claws.

7. INSTALL REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH

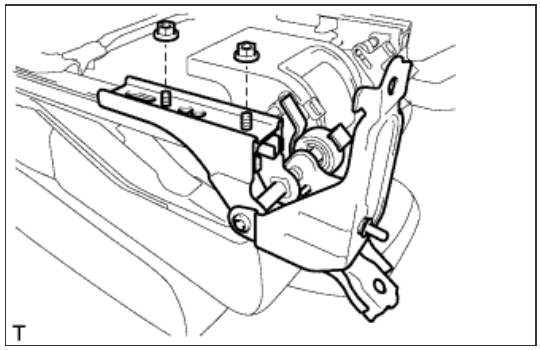
a. Attach the cable clamp to connect the cable.



b. Install the hinge with the 2 nuts.

Tor ue:
42 N m 42 kgf cm , 31 ft. lbf

c. w/ Rear Seat Side Airbag:
Attach the wire harness clamp.

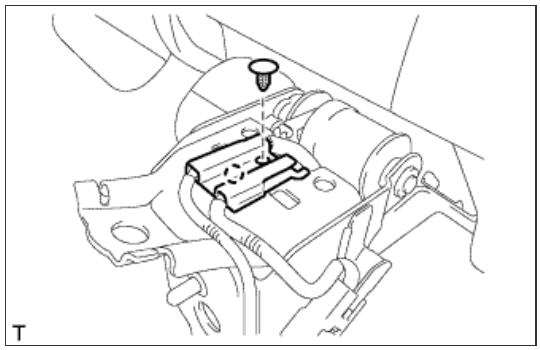


d. w/ Seat Heater System:
Attach the wire harness clamp.

8. INSTALL REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH

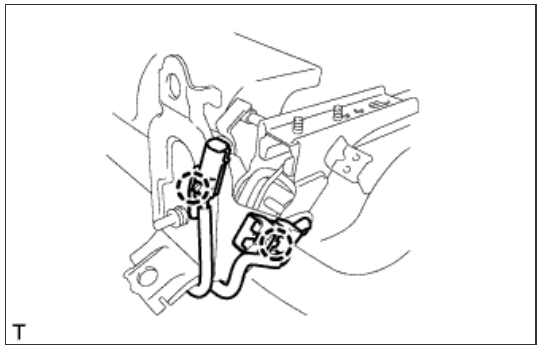
a. Install the hinge with the 2 nuts.

Tor ue:
42 N m 42 kgf cm , 31 ft. lbf



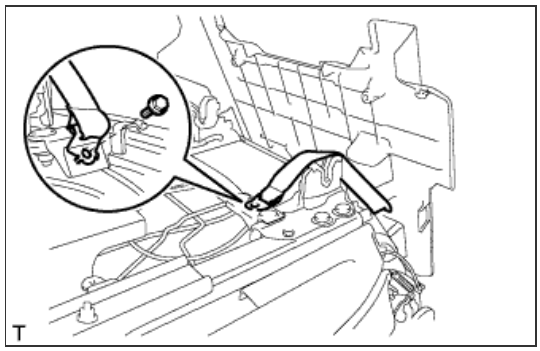
. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Install the wire harness, and attach the 2 claws to close the protector.



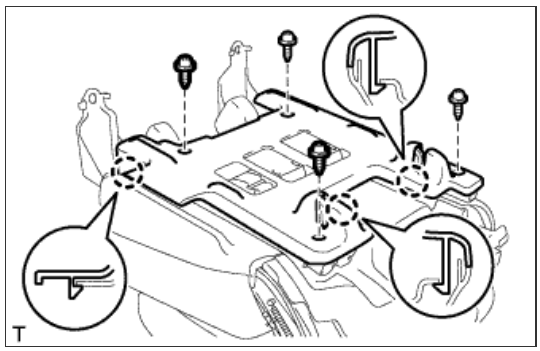
b. Attach the claw to install the protector to the seat hinge.

c. Install the clip.



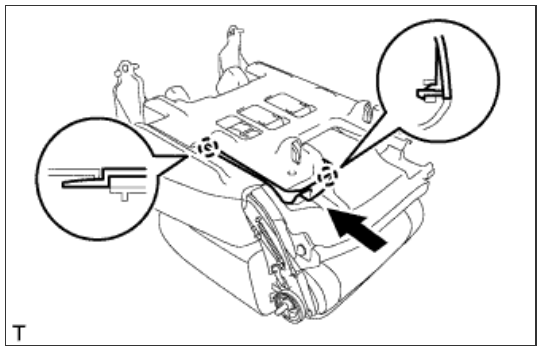
d. w/ Rear Seat Side Airbag:
Attach the claw to install the wire harness connector.

e. w/ Seat Heater System:
Attach the claw to install the wire harness connector.



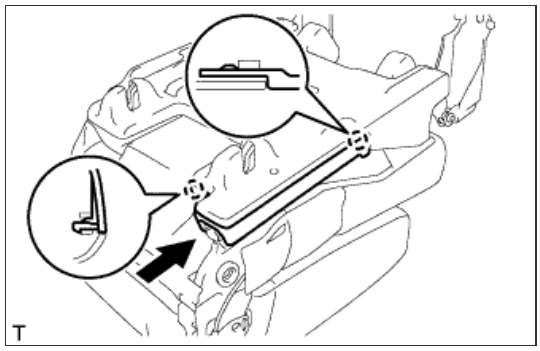
10. INSTALL REAR NO. 2 SEAT LEG SIDE COVER

a. Pass the fold seat stopper band through the seat leg side cover and attach it to the seat cushion frame with the bolt.



b. Attach the 3 claws to install the seat leg side cover.

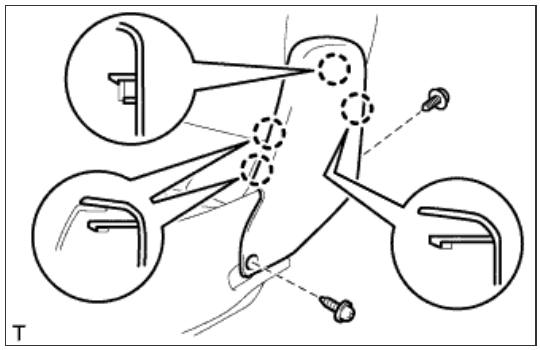
c. Install the 4 screws.



11. INSTALL UPPER SEAT TRAC RAIL COVER RH

a. Attach the 2 claws to install the cover.

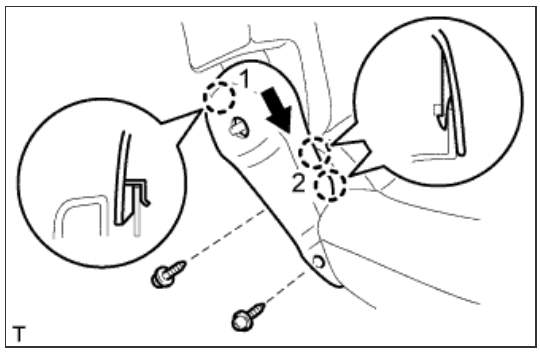
12. INSTALL UPPER SEAT TRAC RAIL COVER LH



a. Attach the 2 claws to install the cover.

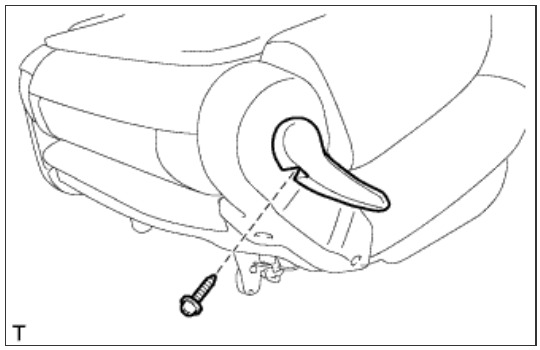
13. INSTALL REAR NO. 1 SEAT RECLINING COVER LH

a. Attach the 4 claws to install the cover.



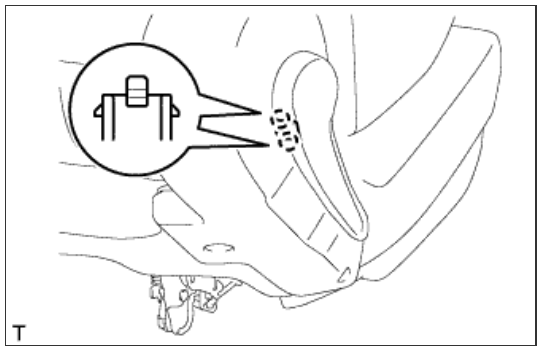
b. Install the 2 screws.

14. INSTALL REAR NO. 1 SEAT RECLINING COVER RH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

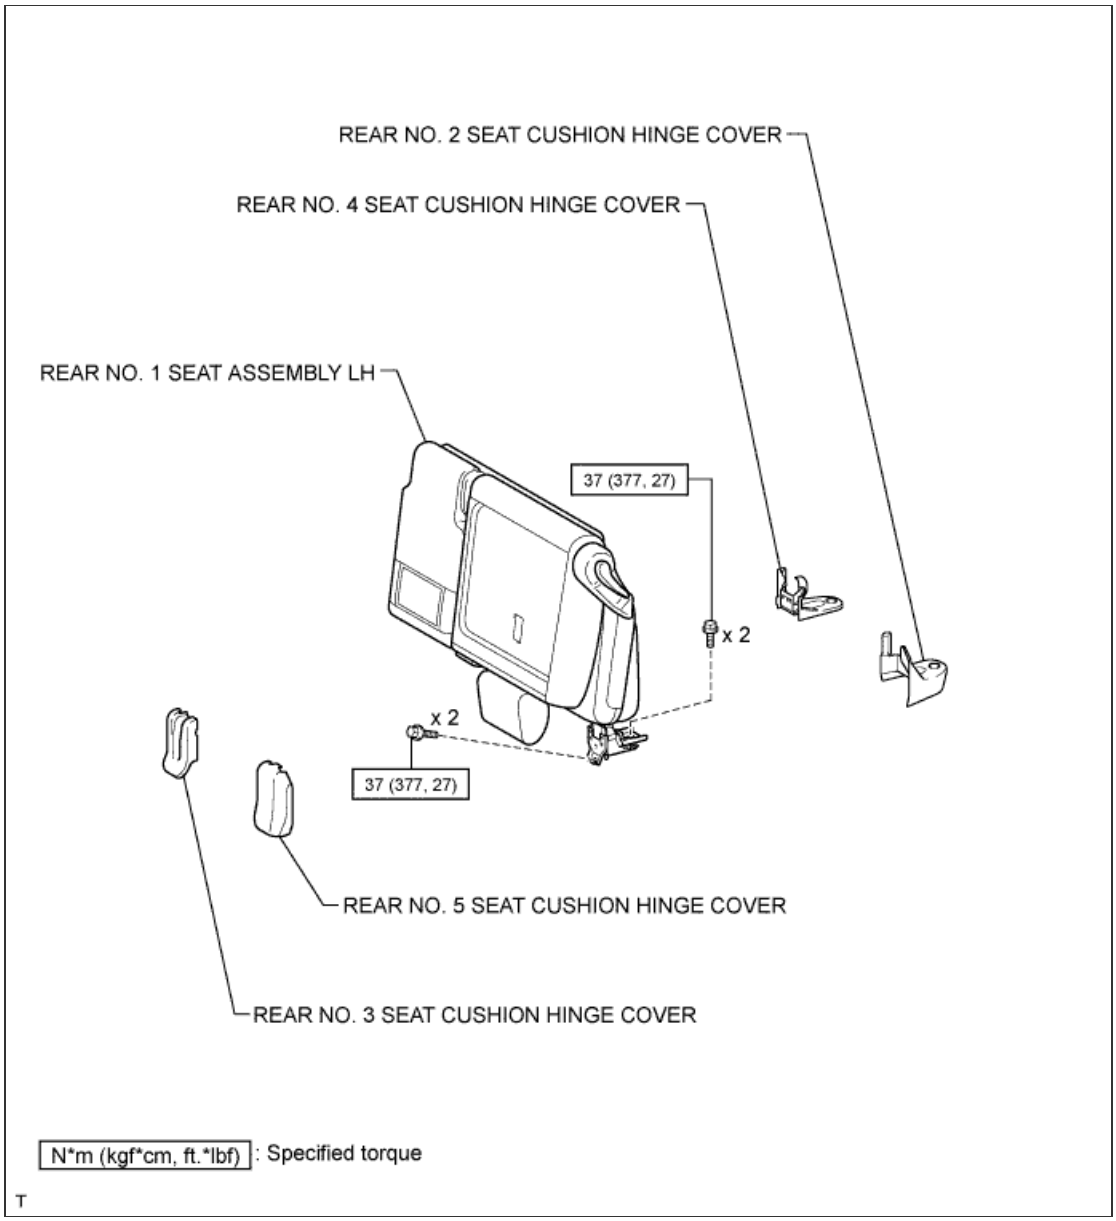
b. Install the 2 screws.



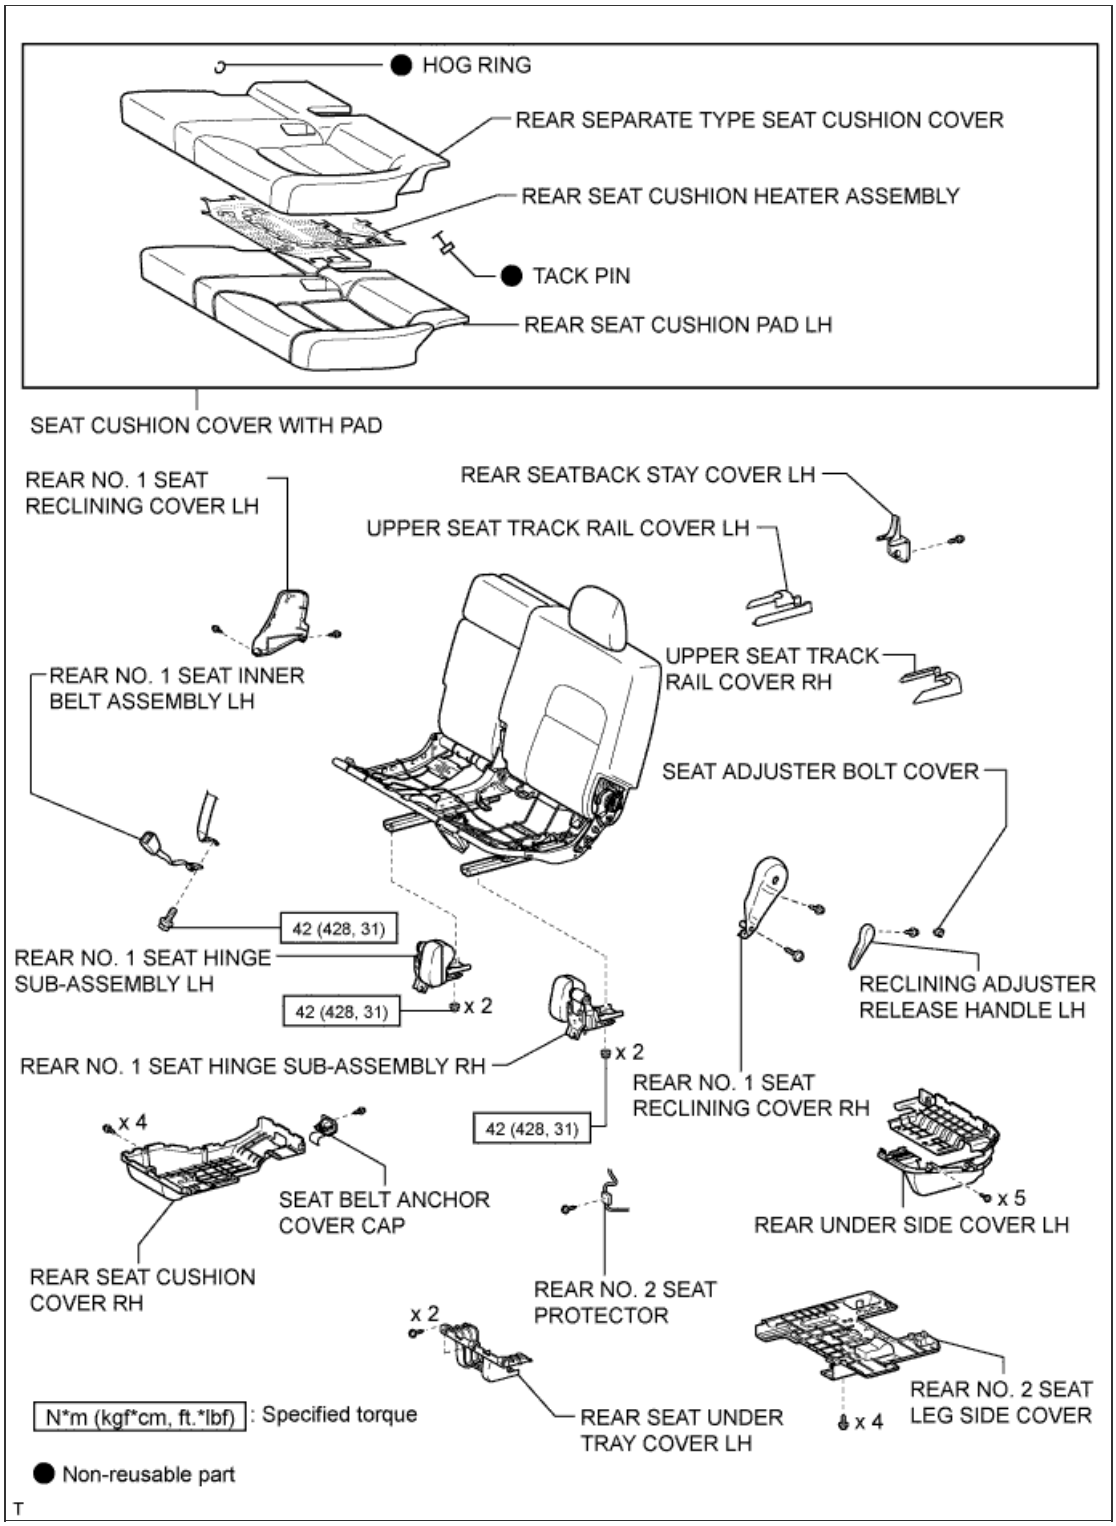
15. INSTALL RECLINING AD USTER RELEASE HANDLE RH

a. Install the release handle with the screw.

16. INSTALL SEAT AD USTER BOLT COVER



a. Attach the 2 claws to install the cover.



17. INSTALL REAR NO. 1 SEAT ASSEMBLY RH

a. Install the rear No. 1 seat assembly (Click here).

for Preparation Click here

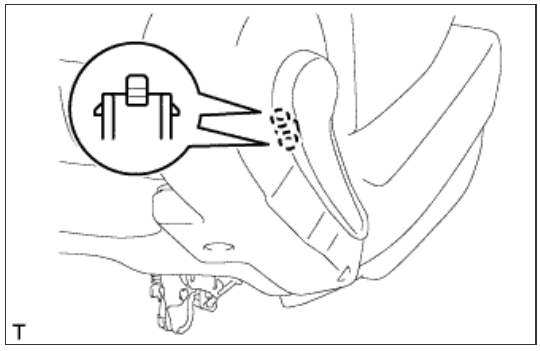
CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

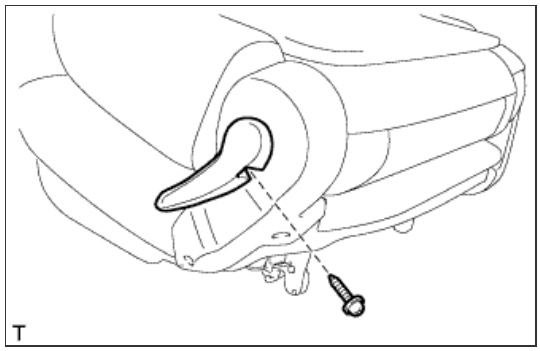
1. REMOVE REAR NO. 1 SEAT ASSEMBLY LH



a. Remove the rear No. 1 seat assembly (Click here).

2. REMOVE SEAT ADJUSTER BOLT COVER

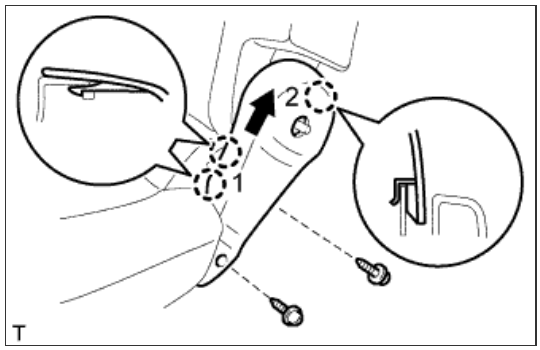
a. Using a screwdriver, detach the 2 claws and remove the cover.



HINT:

Tape the screwdriver tip before use.

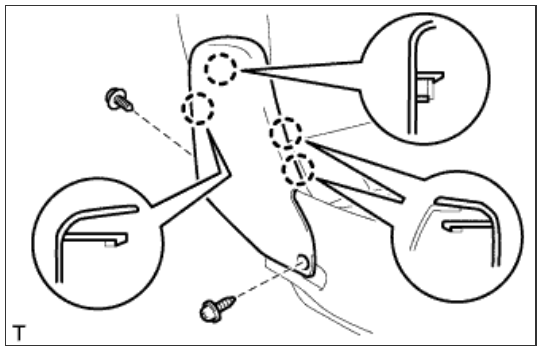
3. REMOVE RECLINING ADJUSTER RELEASE HANDLE LH



a. Remove the screw and release handle.

4. REMOVE REAR NO. 1 SEAT RECLINING COVER LH

a. Remove the 2 screws.

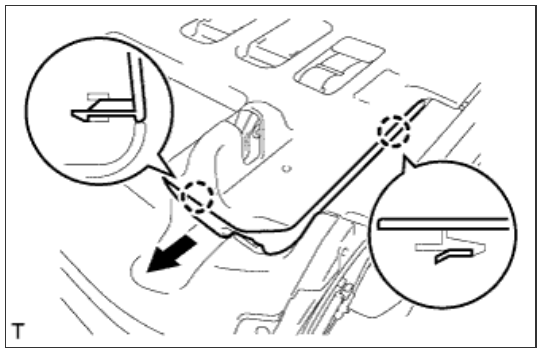


b. Detach the 3 claws in the order shown in the illustration, and then remove the cover.

5. REMOVE REAR NO. 1 SEAT RECLINING COVER RH

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.

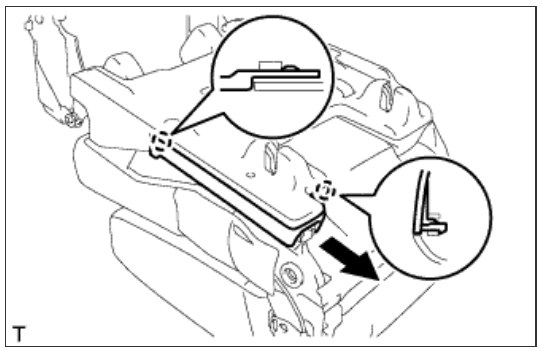


6. REMOVE UPPER SEAT TRACK RAIL COVER LH

a. Using a screwdriver, detach the 2 claws and remove the cover.

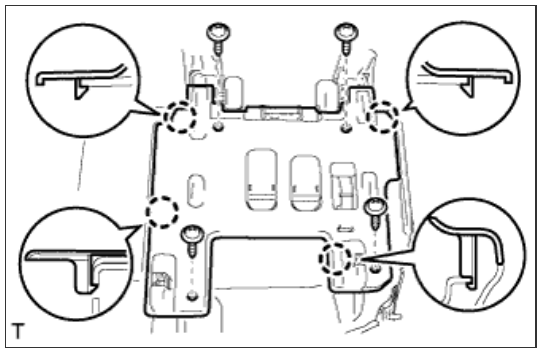
HINT:

Tape the screwdriver tip before use.



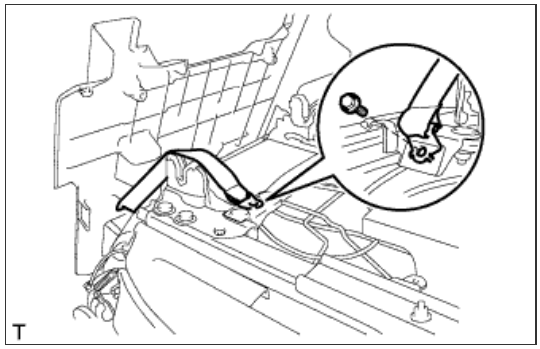
7. REMOVE UPPER SEAT TRACK RAIL COVER RH

a. Using a screwdriver, detach the 2 claws and remove the cover.



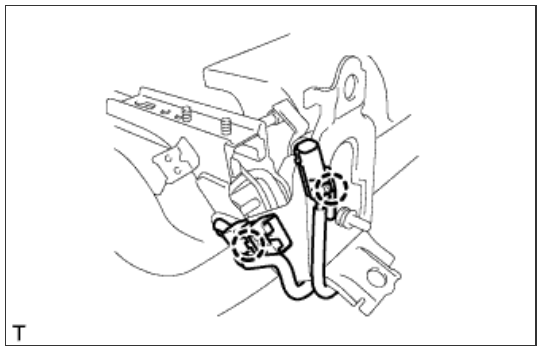
HINT:

Tape the screwdriver tip before use.



8. REMOVE REAR NO. 2 SEAT LEG SIDE COVER

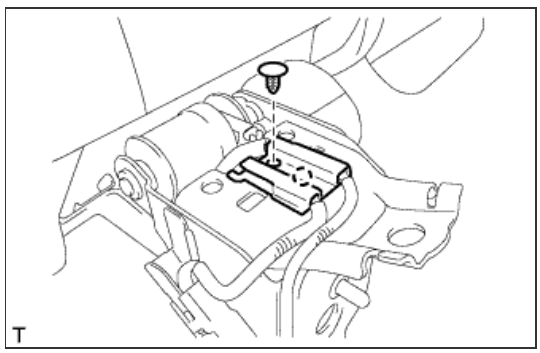
a. Remove the 4 screws and detach the 4 claws.



b. Remove the bolt that is securing the fold seat stopper band and remove the seat leg side cover together with the fold seat stopper band.

9. REMOVE REAR NO. 2 SEAT PROTECTOR

a. w/ Rear Seat Side Airbag:
Detach the claw and remove the wire harness connector.

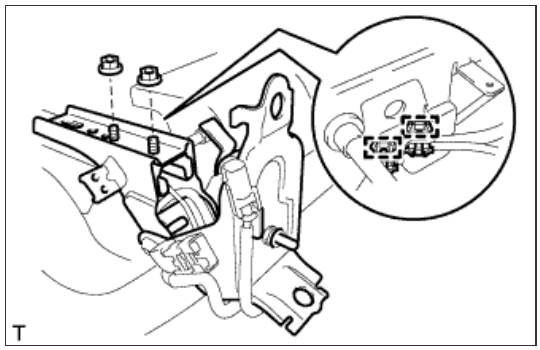


b. w/ Seat Heater System:
Detach the claw and remove the wire harness connector.

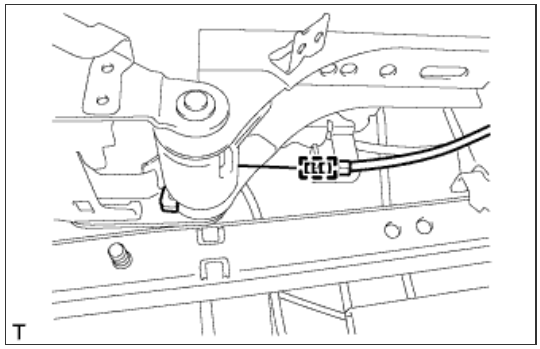
c. Using a clip remover, remove the clip.

d. Detach the claw and remove the seat protector from the seat hinge.

e. Detach the 2 claws, open the protector and remove wire harness.



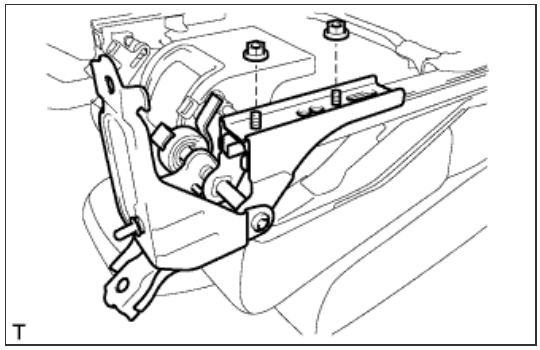
10. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH



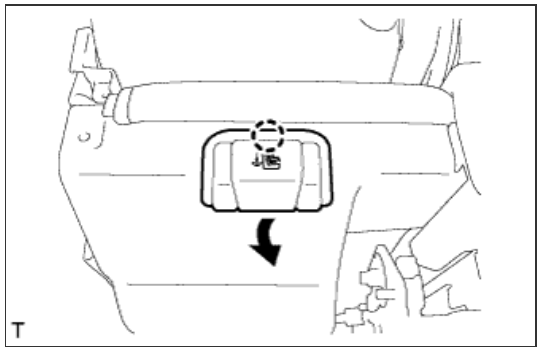
a. w/ Rear Seat Side Airbag:
Detach the wire harness clamp.

b. w/ Seat Heater System:
Detach the wire harness clamp.

c. Remove the 2 nuts and hinge.

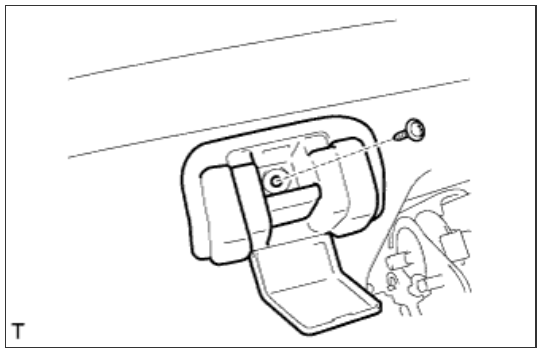


d. Detach the cable clamp and disconnect the cable.



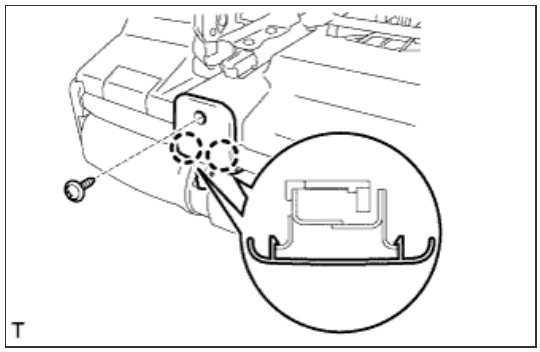
11. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH

a. Remove the 2 nuts and hinge.



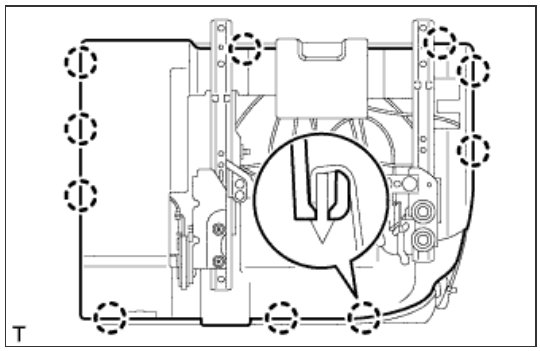
12. REMOVE SEAT BELT ANCHOR COVER CAP

a. Detach the claw and open the cap.



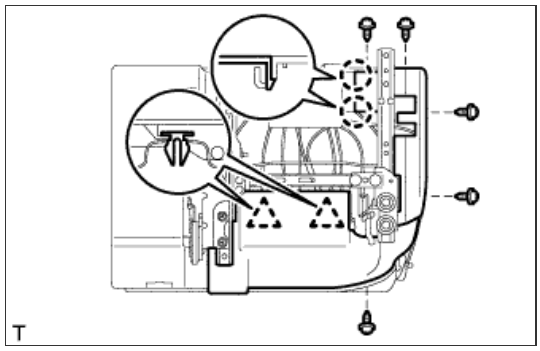
b. Remove the screw and anchor cover cap.

13. REMOVE REAR SEATBACK STAY COVER LH



a. Remove the screw.

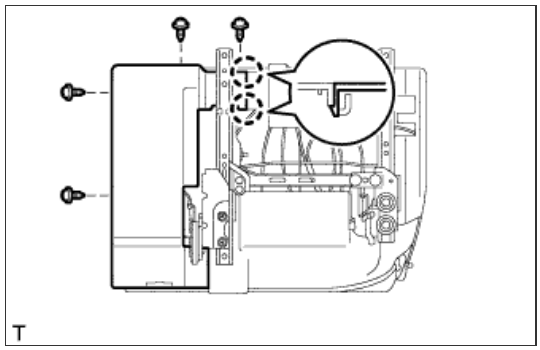
b. Detach the 2 claws and remove the cover.



14. REMOVE REAR UNDER SIDE COVER LH

a. Detach the 10 claws.

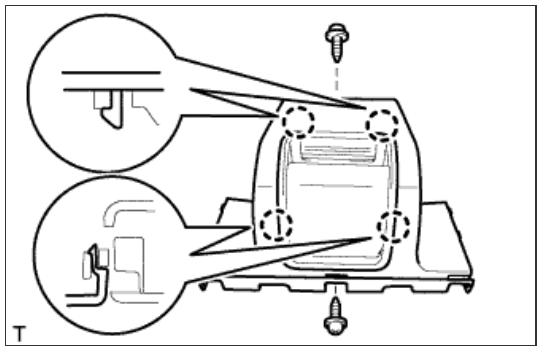
b. Remove the 5 screws.



c. Detach the 2 clips and 2 claws, and remove the cover.

15. REMOVE REAR SEAT CUSHION COVER RH

a. Remove the 4 screws.

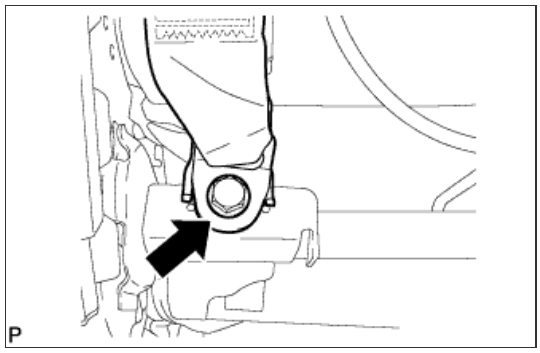


b. Detach the 2 claws and remove the cover.

16. REMOVE REAR SEAT UNDER TRAY COVER LH

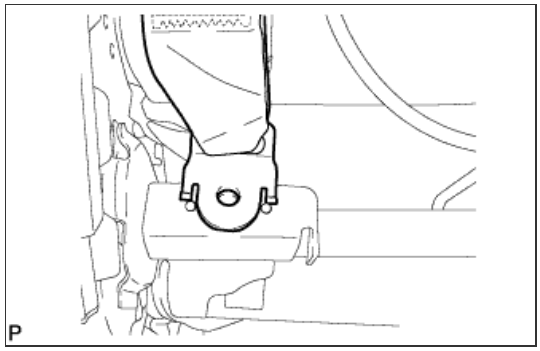
a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.



17. REMOVE REAR NO. 1 SEAT INNER BELT ASSEMBLY LH

a. Remove the bolt and belt.



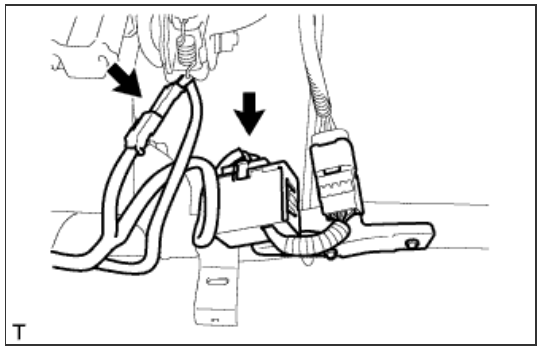
HINT:

The No. 1 seat 3 point type belt anchor is fixed with the same bolt as the rear No. 1 seat inner belt LH. Therefore, it becomes disconnected when the bolt is removed.

18. DISCONNECT NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

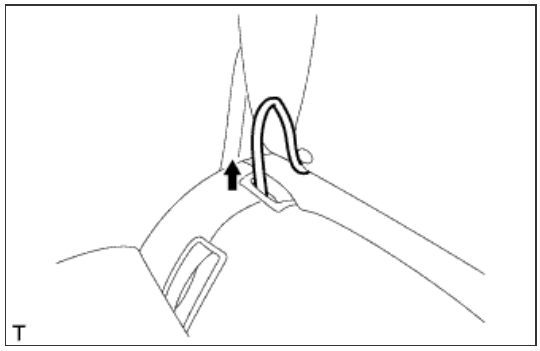
a. Disconnect the belt anchor.

19. REMOVE SEAT CUSHION COVER WITH PAD



a. w/ Rear Seat Side Airbag:

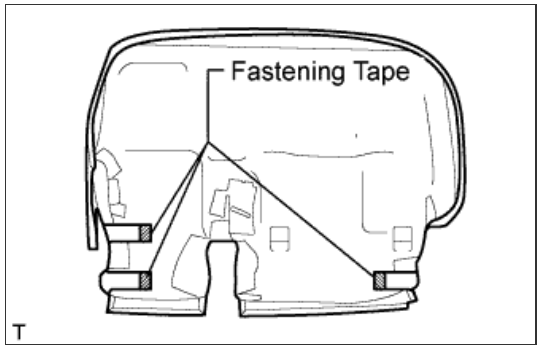
i. Detach the side airbag wire harness clamps.



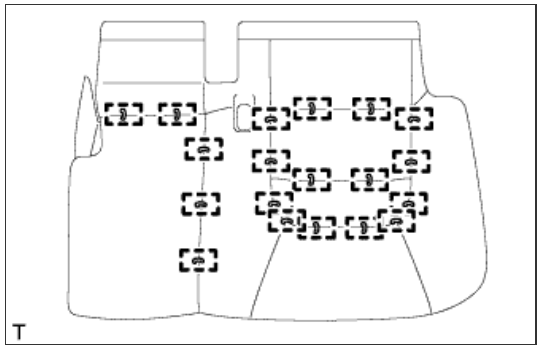
ii. Remove the side airbag wire harness through the hole in the seat cushion.

b. w/ Seat Heater System:

i. Disconnect the 2 seat heater connectors.



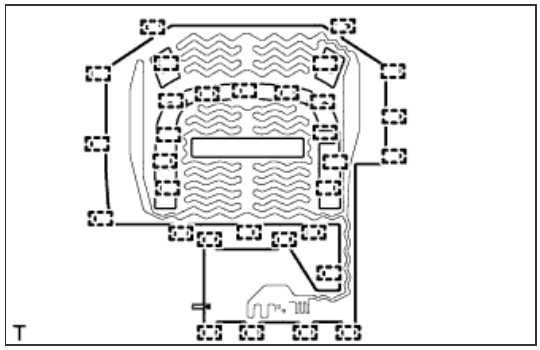
ii. Remove the seatback heater wire harness through the hole in the seat cushion.



c. Remove the seat cushion cover with pad.

20. REMOVE REAR SEPARATE TYPE SEAT CUSHION COVER

a. Detach the 3 pieces of fastening tape.



b. Remove the hog rings and cover.

21. REMOVE REAR SEAT CUSHION HEATER ASSEMBLY

a. Cut off the tack pins which fasten the seat heater to the seat cushion cover, and then remove the seat cushion heater from the seat cushion cover.

for Preparation Click here

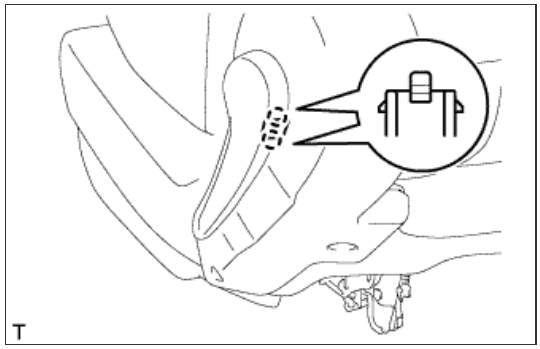
CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

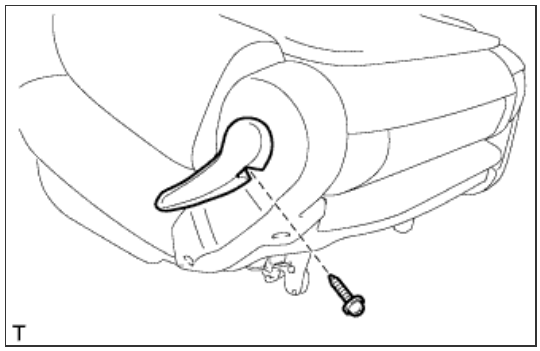
1. REMOVE REAR NO. 1 SEAT ASSEMBLY LH



a. Remove the rear No. 1 seat assembly (Click here).

2. REMOVE SEAT ADJUSTER BOLT COVER

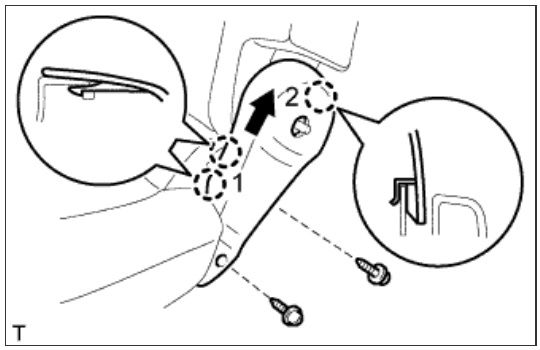
a. Using a screwdriver, detach the 2 claws and remove the cover.



HINT:

Tape the screwdriver tip before use.

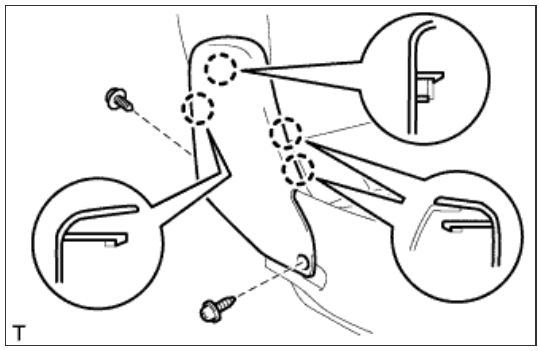
3. REMOVE RECLINING ADJUSTER RELEASE HANDLE LH



a. Remove the screw and release handle.

4. REMOVE REAR NO. 1 SEAT RECLINING COVER LH

a. Remove the 2 screws.

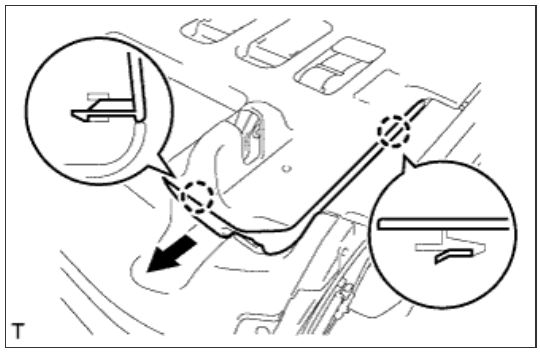


b. Detach the 3 claws in the order shown in the illustration, and then remove the cover.

5. REMOVE REAR NO. 1 SEAT RECLINING COVER RH

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.

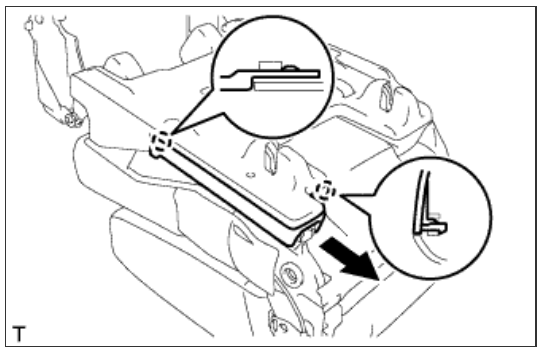


6. REMOVE UPPER SEAT TRACK RAIL COVER LH

a. Using a screwdriver, detach the 2 claws and remove the cover.

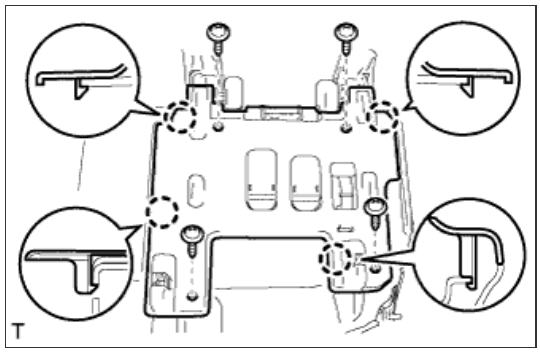
HINT:

Tape the screwdriver tip before use.



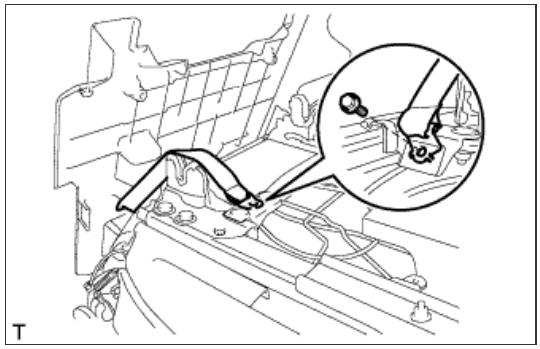
7. REMOVE UPPER SEAT TRACK RAIL COVER RH

a. Using a screwdriver, detach the 2 claws and remove the cover.



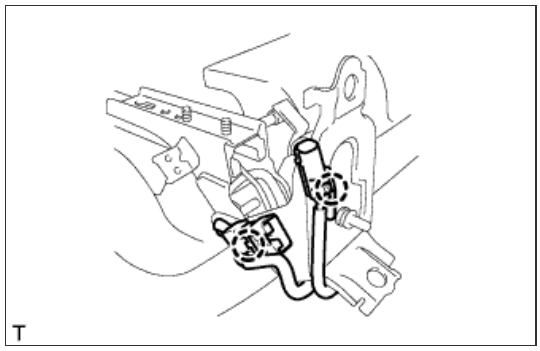
HINT:

Tape the screwdriver tip before use.



8. REMOVE REAR NO. 2 SEAT LEG SIDE COVER

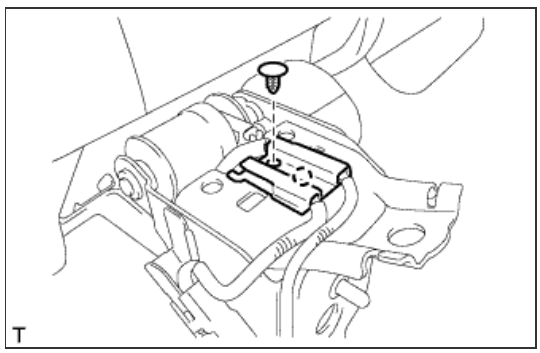
a. Remove the 4 screws and detach the 4 claws.



b. Remove the bolt that is securing the fold seat stopper band and remove the seat leg side cover together with the fold seat stopper band.

9. REMOVE REAR NO. 2 SEAT PROTECTOR

a. w/ Rear Seat Side Airbag:
Detach the claw and remove the wire harness connector.

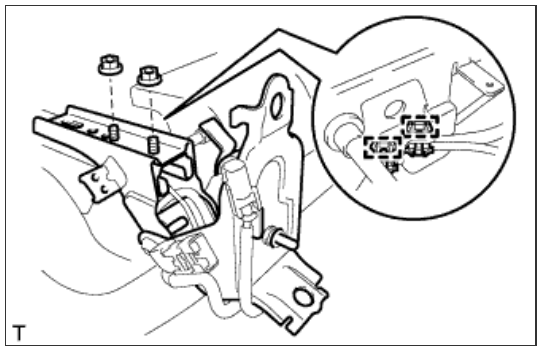


b. w/ Seat Heater System:
Detach the claw and remove the wire harness connector.

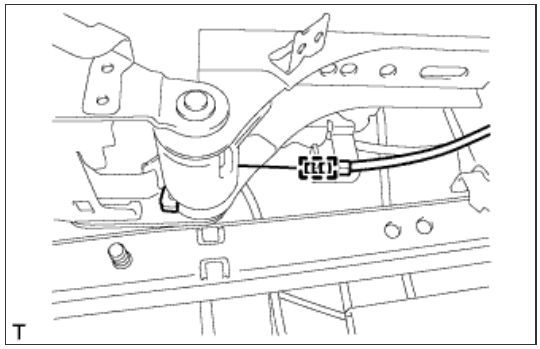
c. Using a clip remover, remove the clip.

d. Detach the claw and remove the seat protector from the seat hinge.

e. Detach the 2 claws, open the protector and remove wire harness.



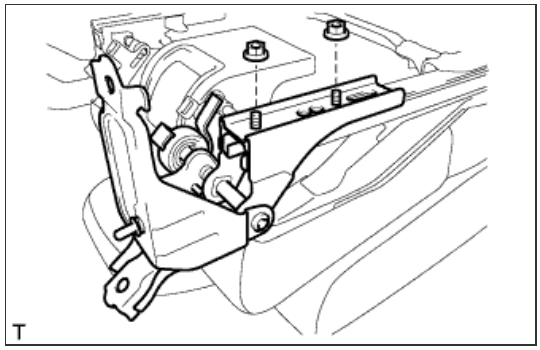
10. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH



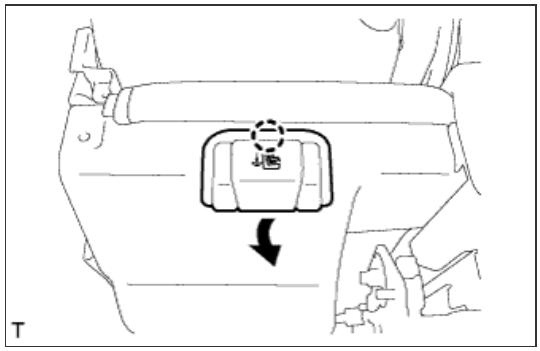
a. w/ Rear Seat Side Airbag:
Detach the wire harness clamp.

b. w/ Seat Heater System:
Detach the wire harness clamp.

c. Remove the 2 nuts and hinge.

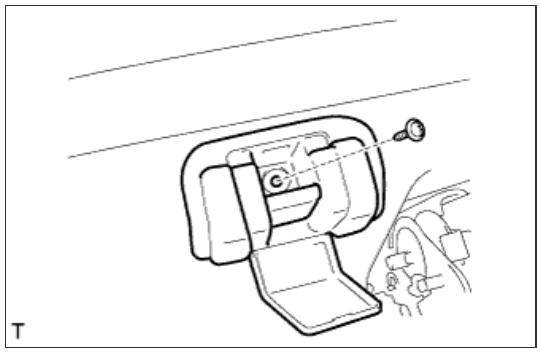


d. Detach the cable clamp and disconnect the cable.



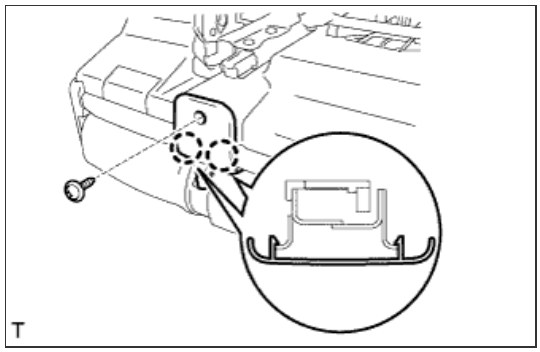
11. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH

a. Remove the 2 nuts and hinge.



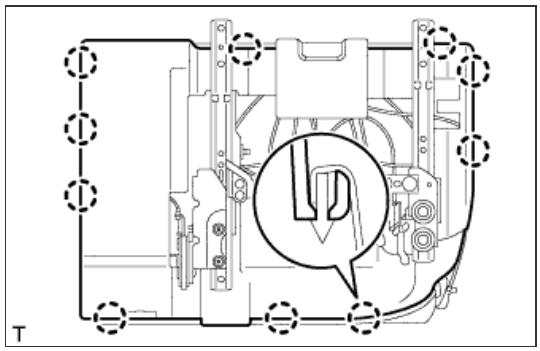
12. REMOVE SEAT BELT ANCHOR COVER CAP

a. Detach the claw and open the cap.



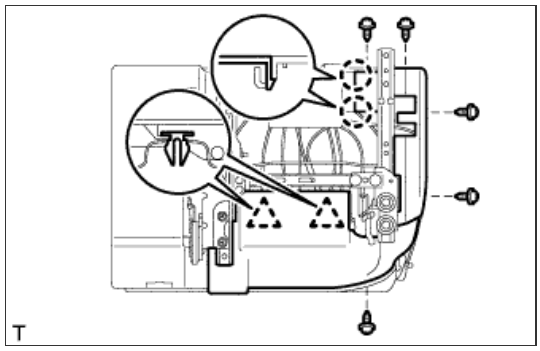
b. Remove the screw and anchor cover cap.

13. REMOVE REAR SEATBACK STAY COVER LH



a. Remove the screw.

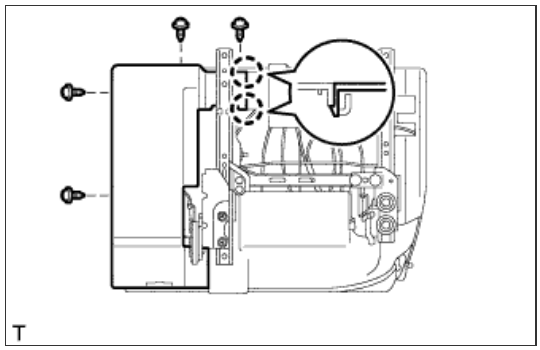
b. Detach the 2 claws and remove the cover.



14. REMOVE REAR UNDER SIDE COVER LH

a. Detach the 10 claws.

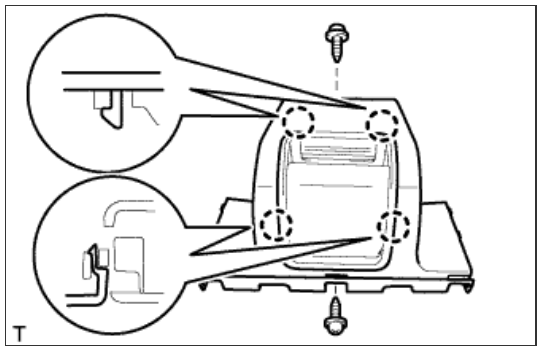
b. Remove the 5 screws.



c. Detach the 2 clips and 2 claws, and remove the cover.

15. REMOVE REAR SEAT CUSHION COVER RH

a. Remove the 4 screws.

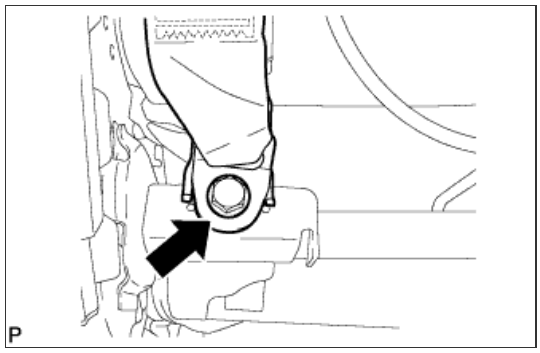


b. Detach the 2 claws and remove the cover.

16. REMOVE REAR SEAT UNDER TRAY COVER LH

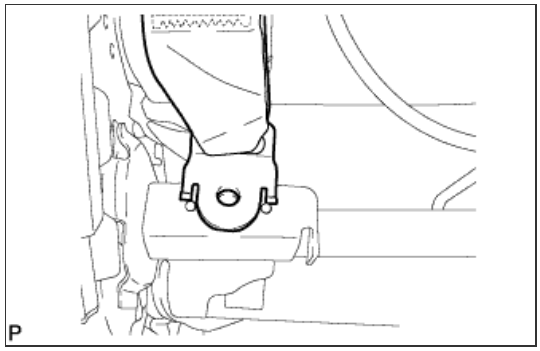
a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.



17. REMOVE REAR NO. 1 SEAT INNER BELT ASSEMBLY LH

a. Remove the bolt and belt.



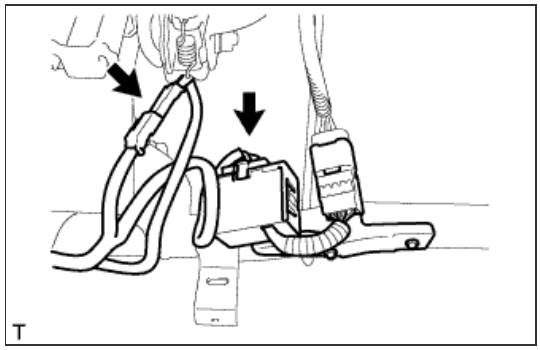
HINT:

The No. 1 seat 3 point type belt anchor is fixed with the same bolt as the rear No. 1 seat inner belt LH. Therefore, it becomes disconnected when the bolt is removed.

18. DISCONNECT NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

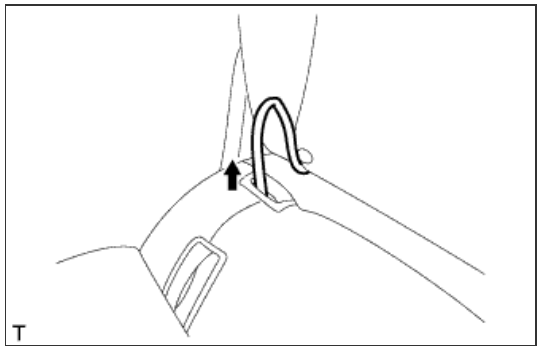
a. Disconnect the belt anchor.

19. REMOVE SEAT CUSHION COVER WITH PAD



a. w/ Rear Seat Side Airbag:

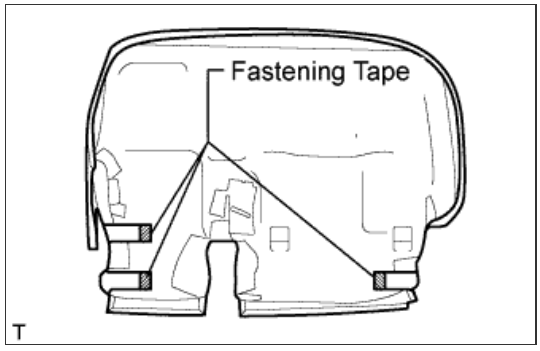
i. Detach the side airbag wire harness clamps.



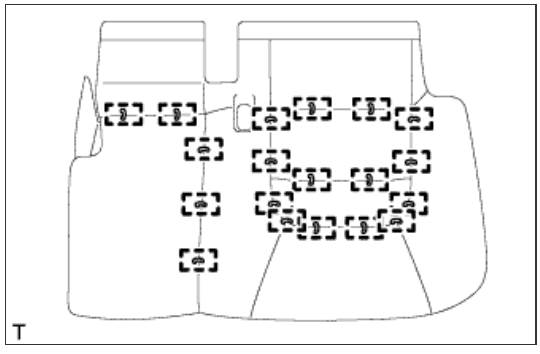
ii. Remove the side airbag wire harness through the hole in the seat cushion.

b. w/ Seat Heater System:

i. Disconnect the 2 seat heater connectors.



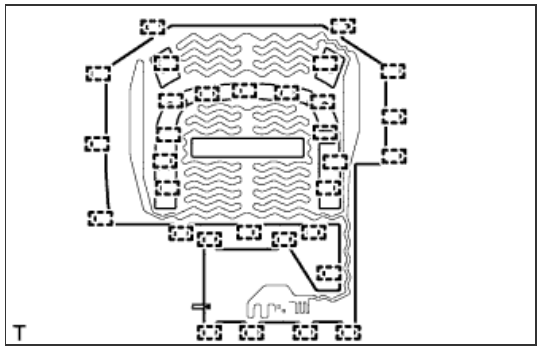
ii. Remove the seatback heater wire harness through the hole in the seat cushion.



c. Remove the seat cushion cover with pad.

20. REMOVE REAR SEPARATE TYPE SEAT CUSHION COVER

a. Detach the 3 pieces of fastening tape.



b. Remove the hog rings and cover.

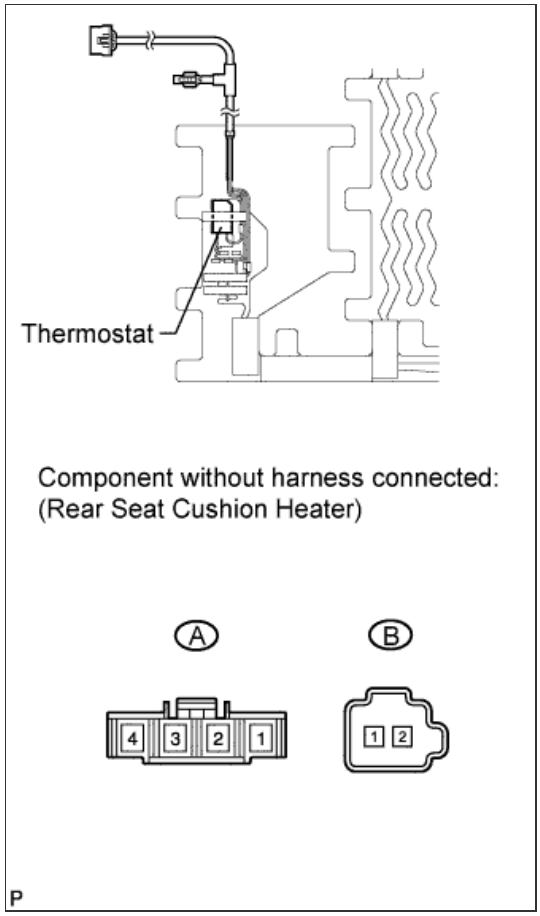
21. REMOVE REAR SEAT CUSHION HEATER ASSEMBLY

a. Cut off the tack pins which fasten the seat heater to the seat cushion cover, and then remove the seat cushion heater from the seat cushion cover.

for Preparation Click here

1. INSPECT REAR SEAT CUSHION HEATER ASSE

a. Heat the thermostat with a light.



b. Check the seat cushion heater.

i. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

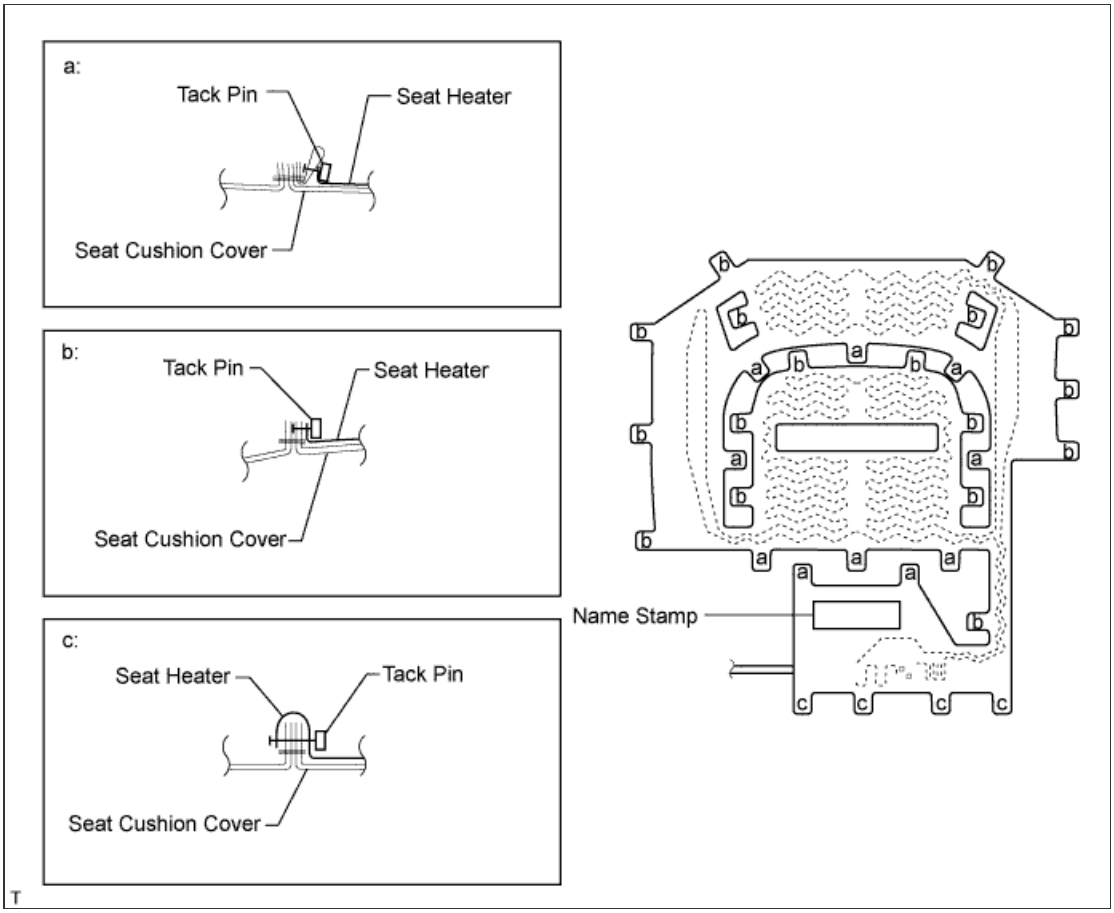
Tester Connection	Condition	Specified Condition
A-1 - B-1	Seat cushion heater temperature 25 C (77)	3.05 to 3.65 Ω
A-4 - B-2		
A-1 - A-4		
A-2 - A-3		8 to 12 kΩ

f the result is not as specified, replace the seat cushion heater assembly.

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.



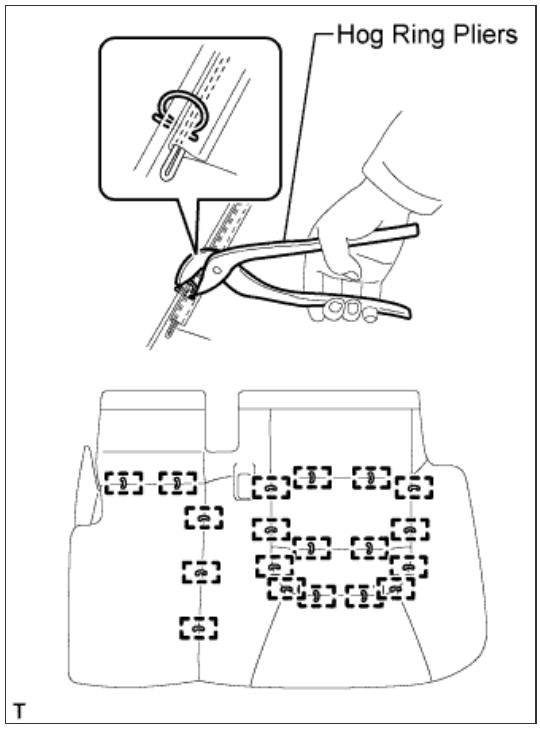
HINT:

- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL REAR SEAT CUSHION HEATER ASSEMBLY

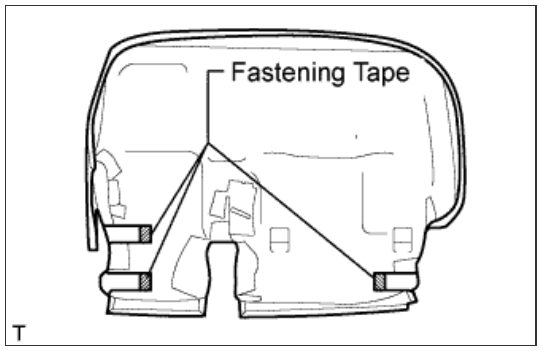
a. Set the seat cushion heater with the name stamp side facing the seat cushion cover.

b. Install the seat cushion heater with new tack pins.



2. INSTALL REAR SEPARATE TYPE SEAT CUSHION COVER

a. Using hog ring pliers, install the seat cushion cover to the seat cushion pad with new hog rings.

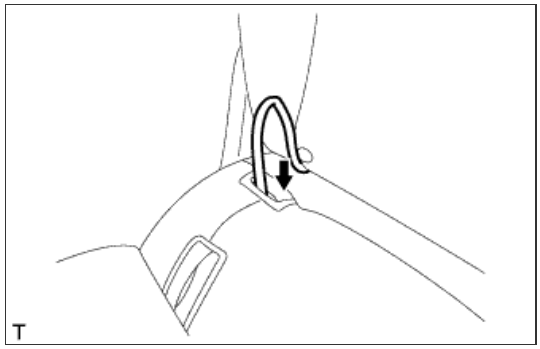


NOTICE:

- **Be careful not to damage the cover.**

- **When installing the hog rings, avoid wrinkling the cover.**

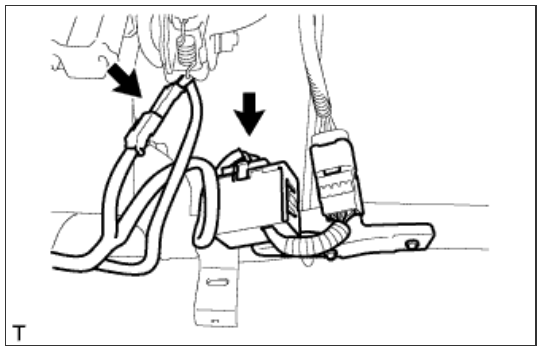
b. Attach the 3 pieces of fastening tape.



3. INSTALL SEAT CUSHION COVER WITH PAD

a. Install the seat cushion cover with pad.

b. w/ Rear Seat Side Airbag:
Pass the side airbag wire harness through the hole in the seat cushion.

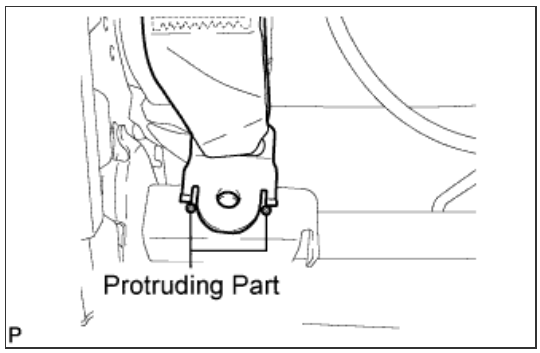


c. w/ Seat Heater System:

i. Pass the seatback heater wire harness through the hole in the seat cushion.

ii. Connect the 2 seat heater connectors.

d. w/ Rear Seat Side Airbag:
Attach the side airbag wire harness clamps.



4. CONNECT NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

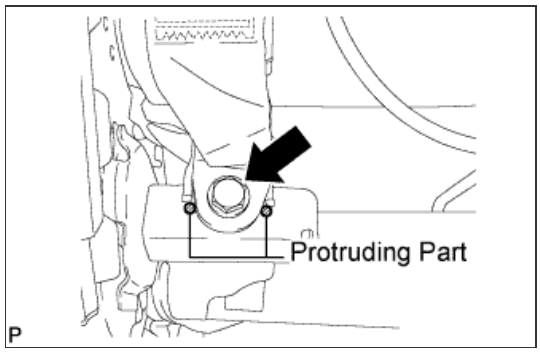
a. Connect the belt anchor.

NOTICE:

Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.

5. INSTALL REAR NO. 1 SEAT INNER BELT ASSEMBLY LH

a. Install the belt with the bolt.

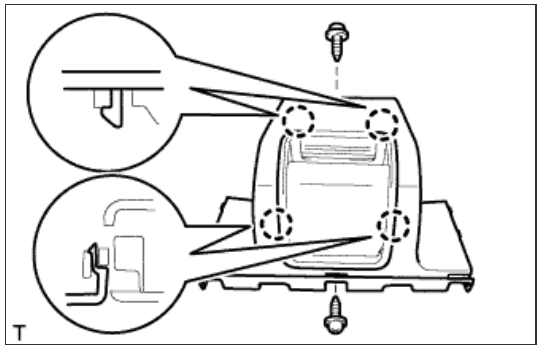


Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf

NOTICE:

Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.

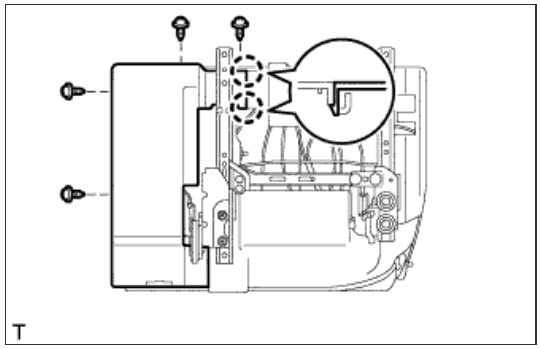
HINT:



The No. 1 seat 3 point type belt anchor is fixed with the same bolt as the rear No. 1 seat inner belt . Therefore, connect it when installing the rear No. 1 seat inner belt .

6. INSTALL REAR SEAT UNDER TRAY COVER LH

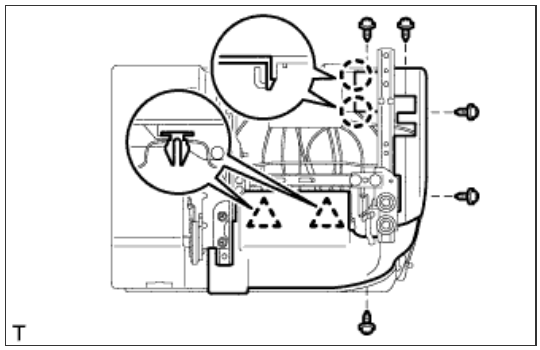
a. Attach the 4 claws to install the cover.



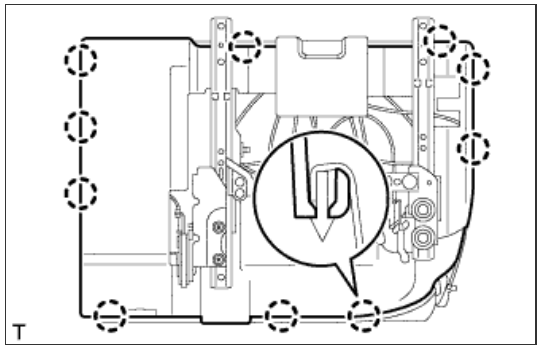
b. Install the 2 screws.

7. INSTALL REAR SEAT CUSHION COVER RH

a. Attach the 2 claws to install the cover.



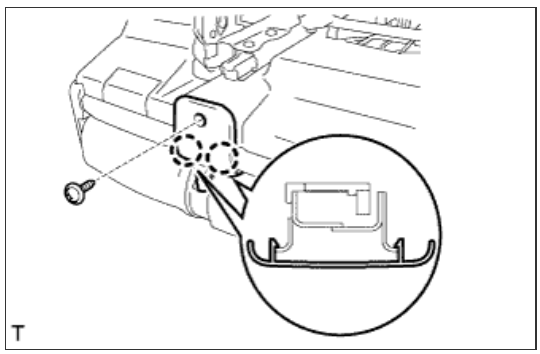
b. Install the 4 screws.



8. INSTALL REAR UNDER SIDE COVER LH

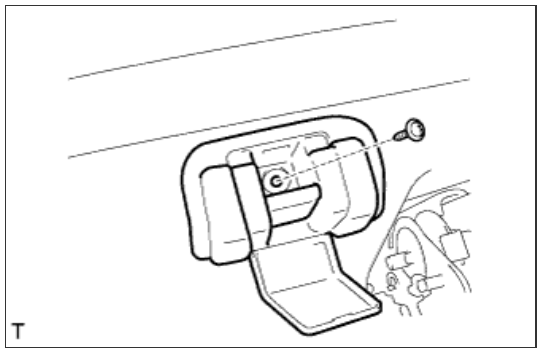
a. Attach the 2 claws and 2 clips to install the cover.

b. Install the 5 screws.



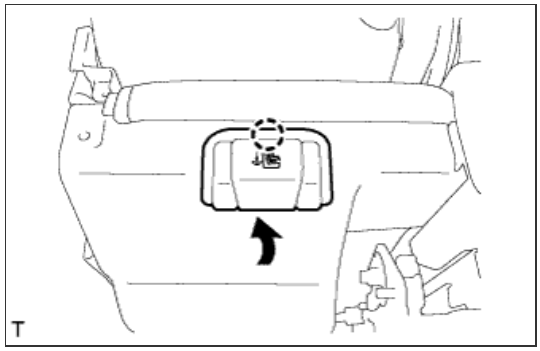
c. Attach the 10 claws.

. INSTALL REAR SEATBAC STAY COVER LH



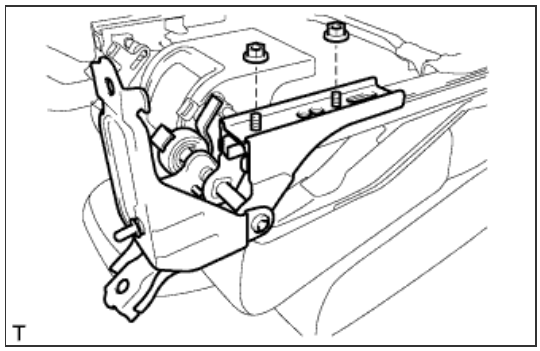
a. Attach the 2 claws to install the cover.

b. Install the screw.



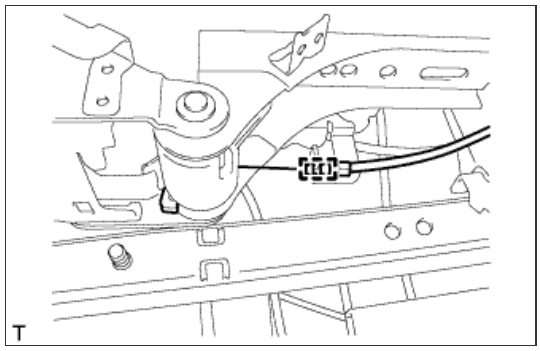
10. INSTALL SEAT BELT ANCHOR COVER CAP

a. Install the anchor cover cap with the screw.



b. Attach the claw to close the cap.

11. INSTALL REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH

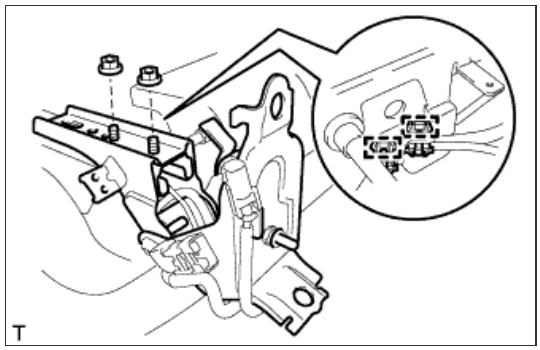


a. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf

12. INSTALL REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH

a. Attach the cable clamp to connect the cable.

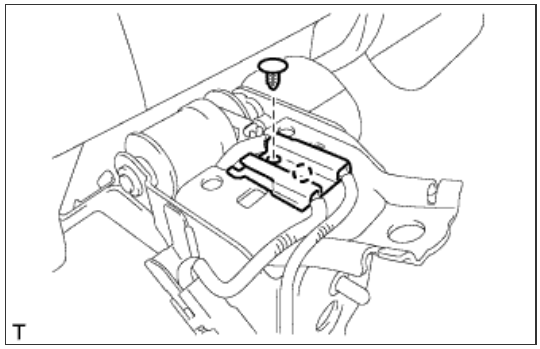


b. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf

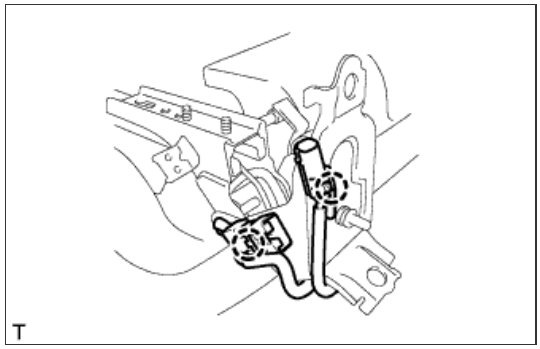
c. w/ Rear Seat Side Airbag:
Attach the wire harness clamp.

d. w/ Seat Heater System:
Attach the wire harness clamp.



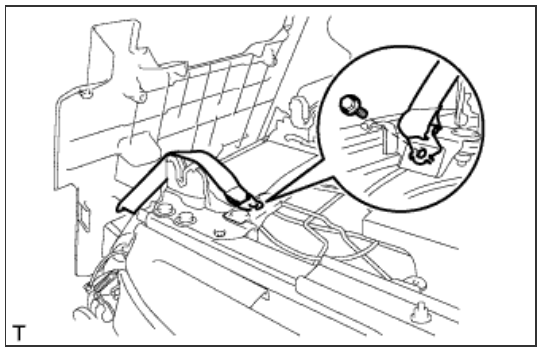
13. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Install the wire harness, and attach 2 claws to close the protector.



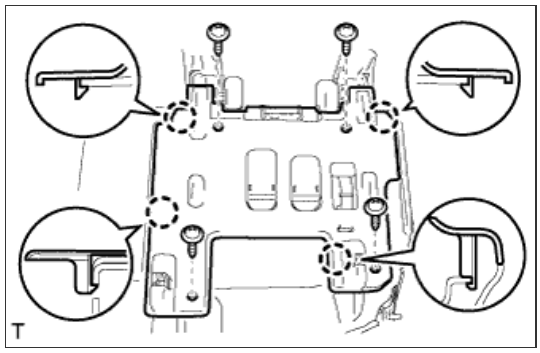
b. Attach the claw to install the protector to the seat hinge.

c. Install the clip.



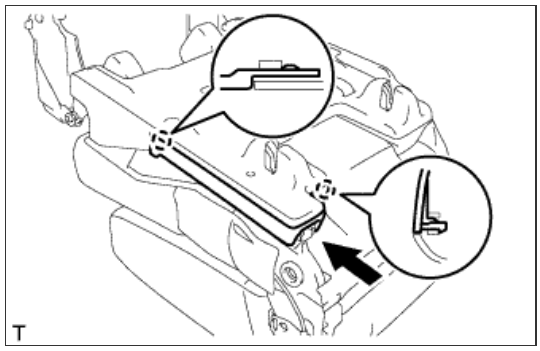
d. w/ Rear Seat Side Airbag:
Attach the claw to install the wire harness connector.

e. w/ Seat Heater System:
Attach the claw to install the wire harness connector.



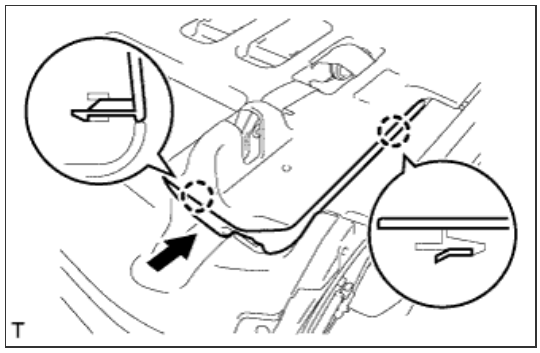
14. INSTALL REAR NO. 2 SEAT LEG SIDE COVER

a. Pass the fold seat stopper band through the seat leg side cover and attach it to the seat cushion frame with the bolt.



b. Attach the 4 claws to install the seat leg side cover.

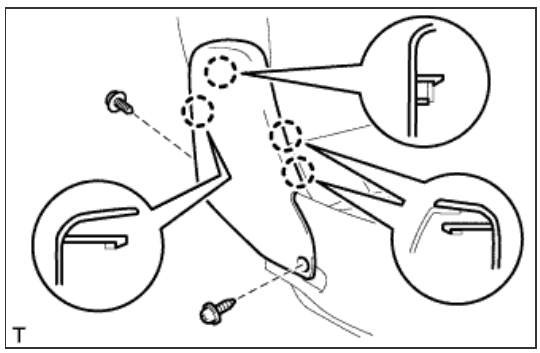
c. Install the 4 screws.



15. INSTALL UPPER SEAT TRAC RAIL COVER RH

a. Attach the 2 claws to install the cover.

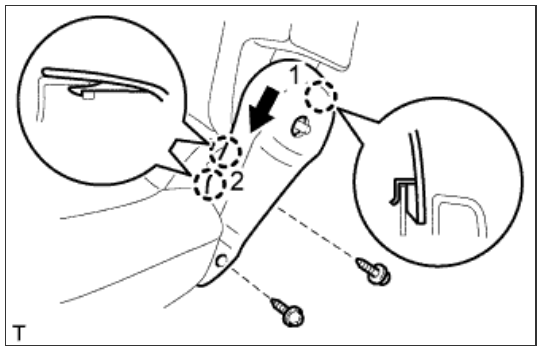
16. INSTALL UPPER SEAT TRAC RAIL COVER LH



a. Attach the 2 claws to install the cover.

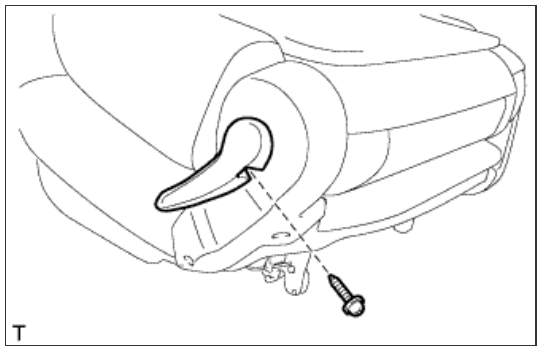
17. INSTALL REAR NO. 1 SEAT RECLINING COVER RH

a. Attach the 4 claws to install the cover.



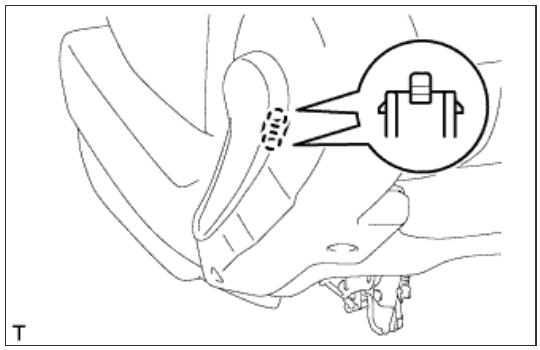
b. Install the 2 screws.

18. INSTALL REAR NO. 1 SEAT RECLINING COVER LH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

b. Install the 2 screws.



1 . INSTALL RECLINING AD USTER RELEASE HANDLE LH

a. Install the release handle with the screw.

20. INSTALL SEAT AD USTER BOLT COVER

a. Attach the 2 claws to install the cover.

21. INSTALL REAR NO. 1 SEAT ASSEMBLY LH

a. Install the rear No. 1 seat assembly (Click here).

for Preparation Click here

CAUTION:

Wear protective gloves. Sharp areas on the parts may injure your hands.

HINT:

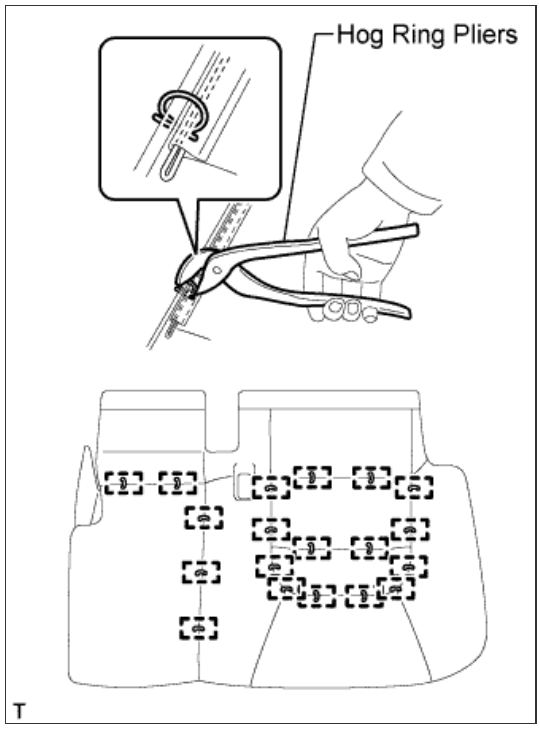
- **Use the same procedures for LHD and RHD vehicles.**
- **The procedures listed below are for LHD vehicles.**

1. INSTALL REAR SEAT CUSHION HEATER ASSEMBLY

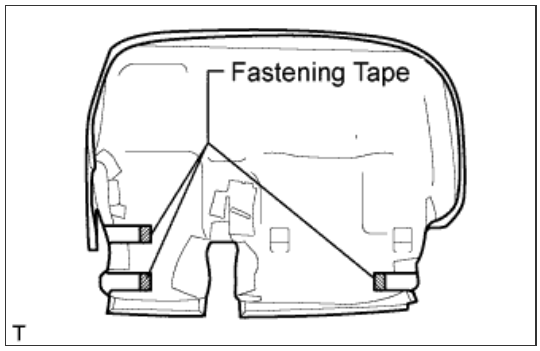
a. Set the seat cushion heater with the name stamp side facing the seat cushion cover.

b. Install the seat cushion heater with new tack pins.



2. INSTALL REAR SEPARATE TYPE SEAT CUSHION COVER

a. Using hog ring pliers, install the seat cushion cover to the seat cushion pad with new hog rings.

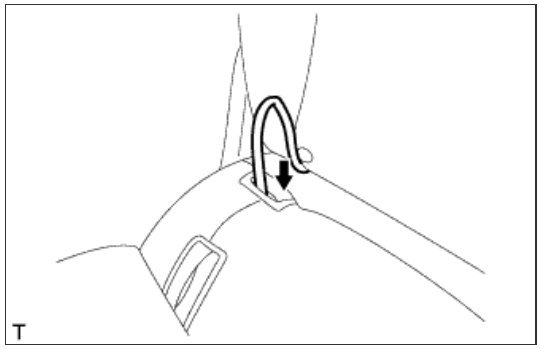


NOTICE:

- **Be careful not to damage the cover.**

- **When installing the hog rings, avoid wrinkling the cover.**

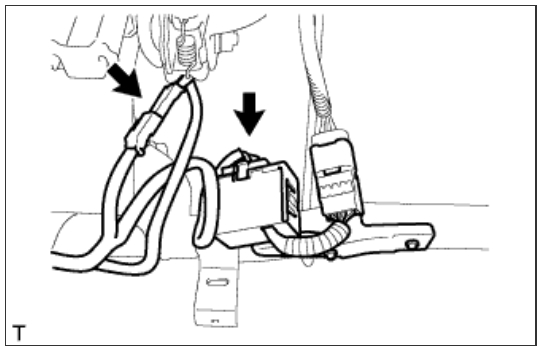
b. Attach the 3 pieces of fastening tape.



3. INSTALL SEAT CUSHION COVER WITH PAD

a. Install the seat cushion cover with pad.

b. w/ Rear Seat Side Airbag:
Pass the side airbag wire harness through the hole in the seat cushion.

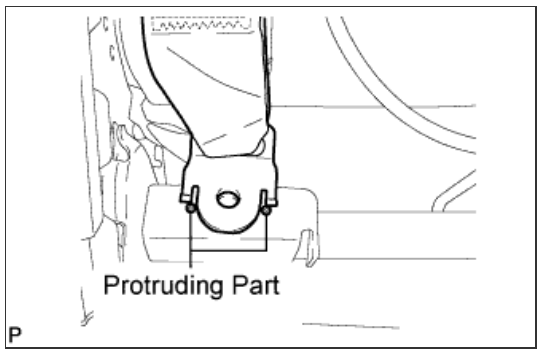


c. w/ Seat Heater System:

i. Pass the seatback heater wire harness through the hole in the seat cushion.

ii. Connect the 2 seat heater connectors.

d. w/ Rear Seat Side Airbag:
Attach the side airbag wire harness clamps.



4. CONNECT NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

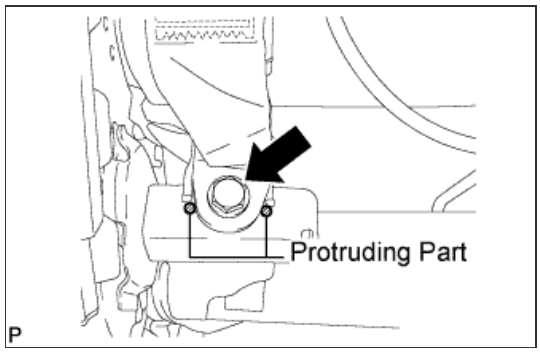
a. Connect the belt anchor.

NOTICE:

Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.

5. INSTALL REAR NO. 1 SEAT INNER BELT ASSEMBLY LH

a. Install the belt with the bolt.



Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf

NOTICE:

Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.

HINT:

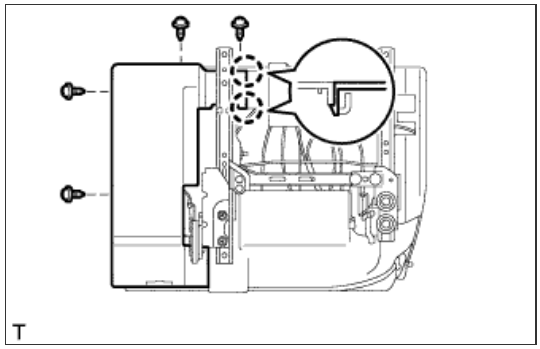
The No. 1 seat 3 point type belt anchor is fixed with the same bolt as the rear No. 1 seat inner belt . Therefore, connect it when installing the rear No. 1 seat inner belt .

6. INSTALL REAR SEAT UNDER TRAY COVER LH

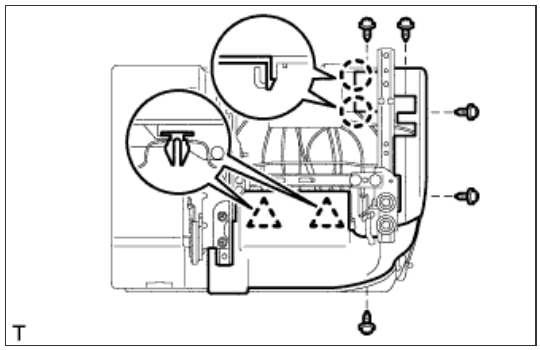
a. Attach the 4 claws to install the cover.



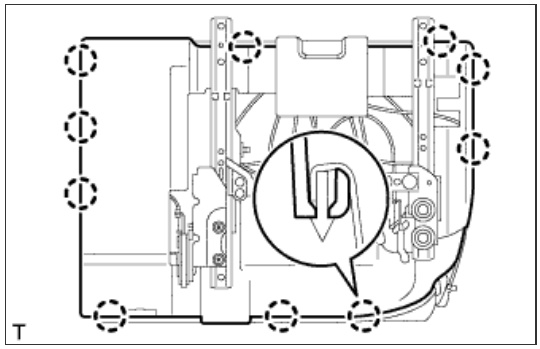
b. Install the 2 screws.

7. INSTALL REAR SEAT CUSHION COVER RH

a. Attach the 2 claws to install the cover.



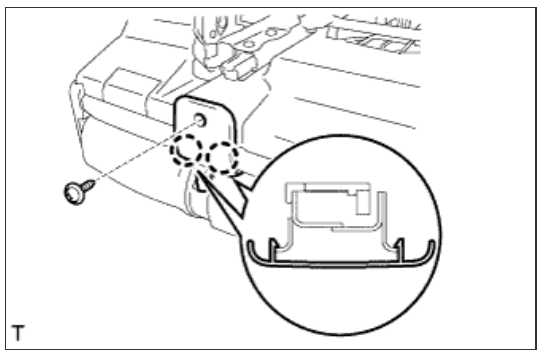
b. Install the 4 screws.



8. INSTALL REAR UNDER SIDE COVER LH

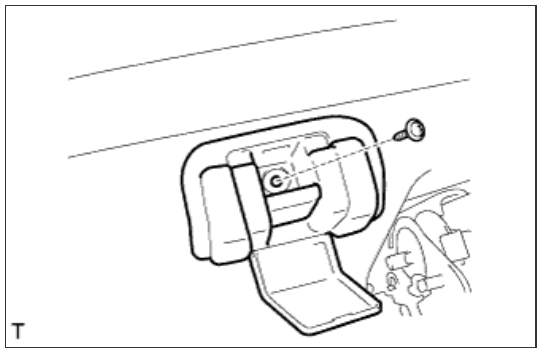
a. Attach the 2 claws and 2 clips to install the cover.

b. Install the 5 screws.



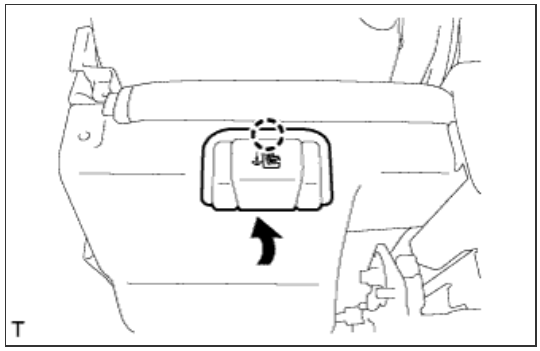
c. Attach the 10 claws.

. INSTALL REAR SEATBAC STAY COVER LH



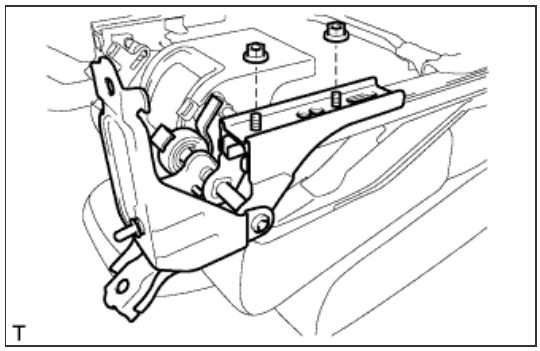
a. Attach the 2 claws to install the cover.

b. Install the screw.



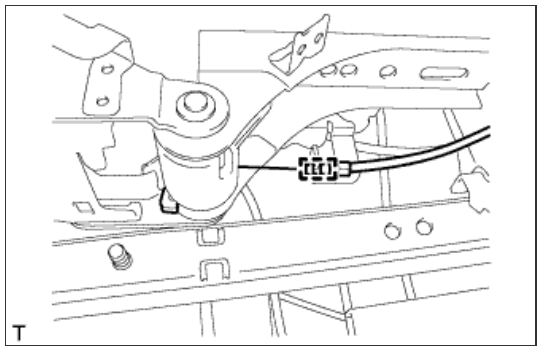
10. INSTALL SEAT BELT ANCHOR COVER CAP

a. Install the anchor cover cap with the screw.



b. Attach the claw to close the cap.

11. INSTALL REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH

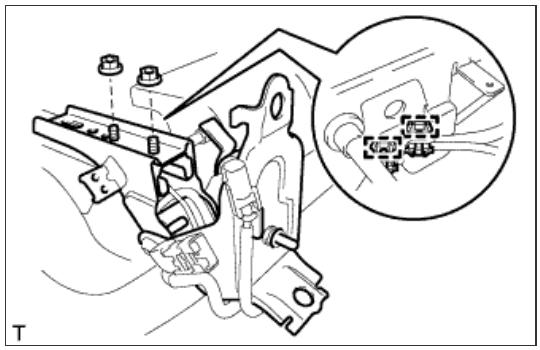


a. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf

12. INSTALL REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH

a. Attach the cable clamp to connect the cable.

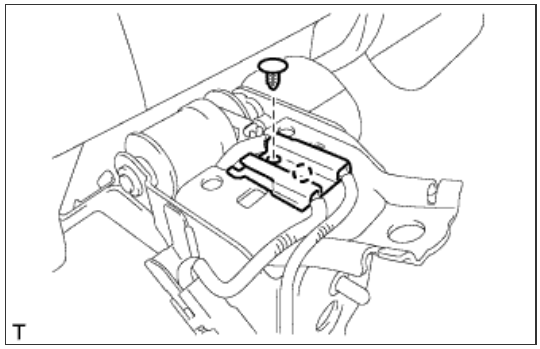


b. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf

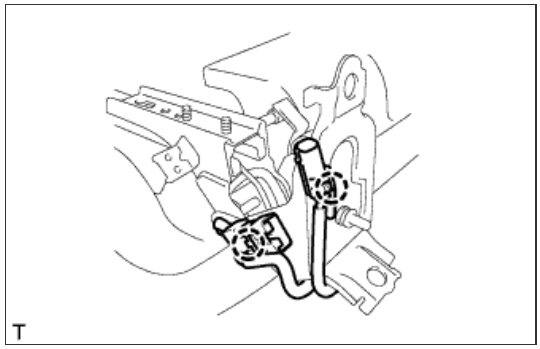
c. w/ Rear Seat Side Airbag:
Attach the wire harness clamp.

d. w/ Seat Heater System:
Attach the wire harness clamp.



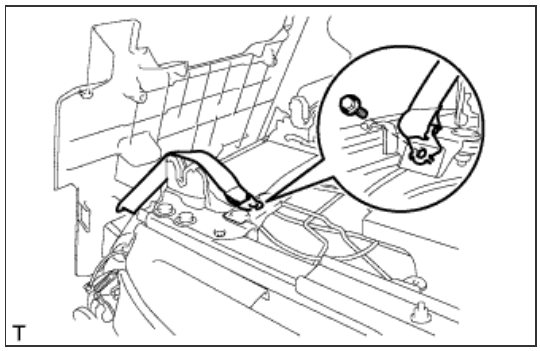
13. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Install the wire harness, and attach 2 claws to close the protector.



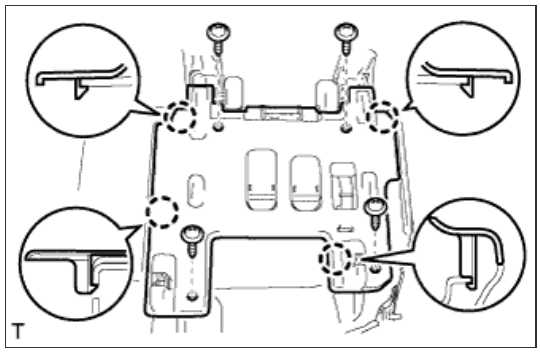
b. Attach the claw to install the protector to the seat hinge.

c. Install the clip.



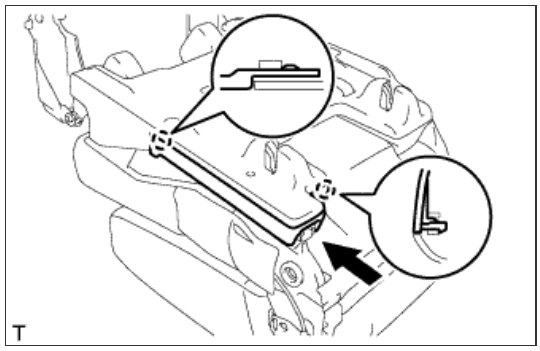
d. w/ Rear Seat Side Airbag:
Attach the claw to install the wire harness connector.

e. w/ Seat Heater System:
Attach the claw to install the wire harness connector.



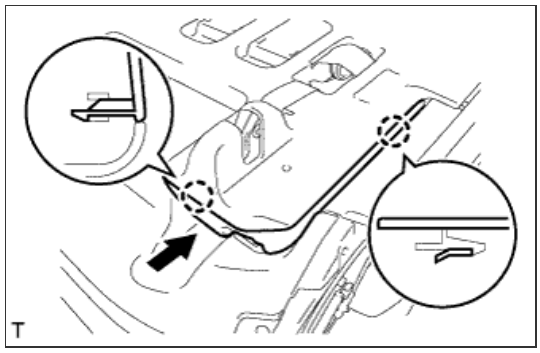
14. INSTALL REAR NO. 2 SEAT LEG SIDE COVER

a. Pass the fold seat stopper band through the seat leg side cover and attach it to the seat cushion frame with the bolt.



b. Attach the 4 claws to install the seat leg side cover.

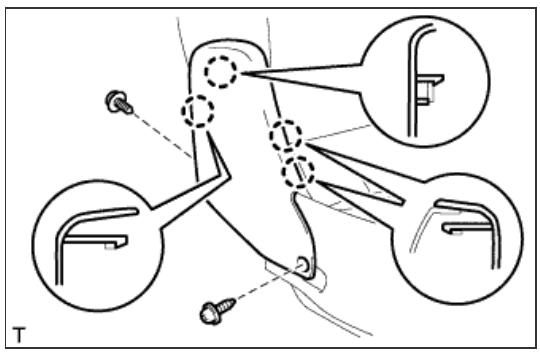
c. Install the 4 screws.



15. INSTALL UPPER SEAT TRAC RAIL COVER RH

a. Attach the 2 claws to install the cover.

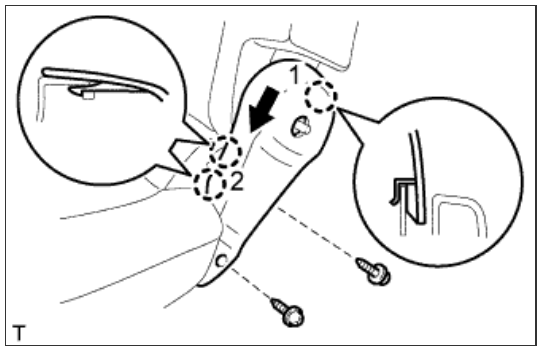
16. INSTALL UPPER SEAT TRAC RAIL COVER LH



a. Attach the 2 claws to install the cover.

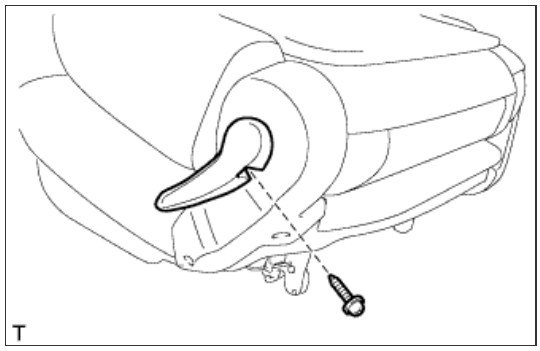
17. INSTALL REAR NO. 1 SEAT RECLINING COVER RH

a. Attach the 4 claws to install the cover.



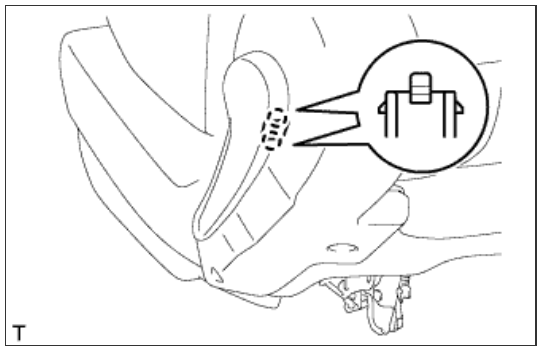
b. Install the 2 screws.

18. INSTALL REAR NO. 1 SEAT RECLINING COVER LH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

b. Install the 2 screws.

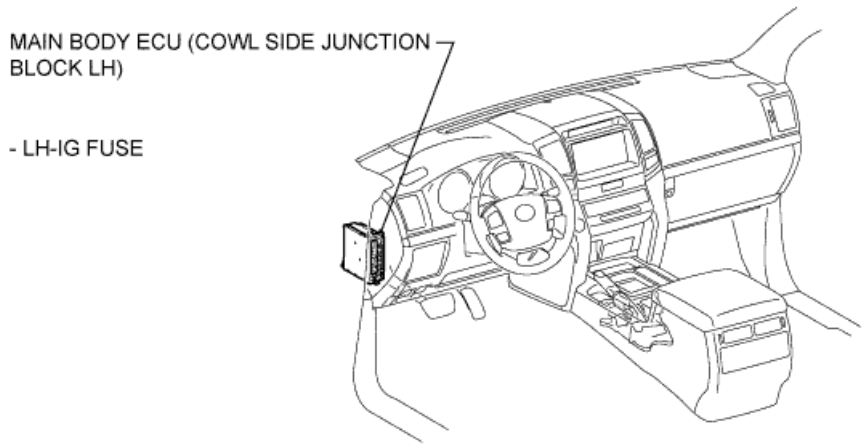


1 . INSTALL RECLINING AD USTER RELEASE HANDLE LH

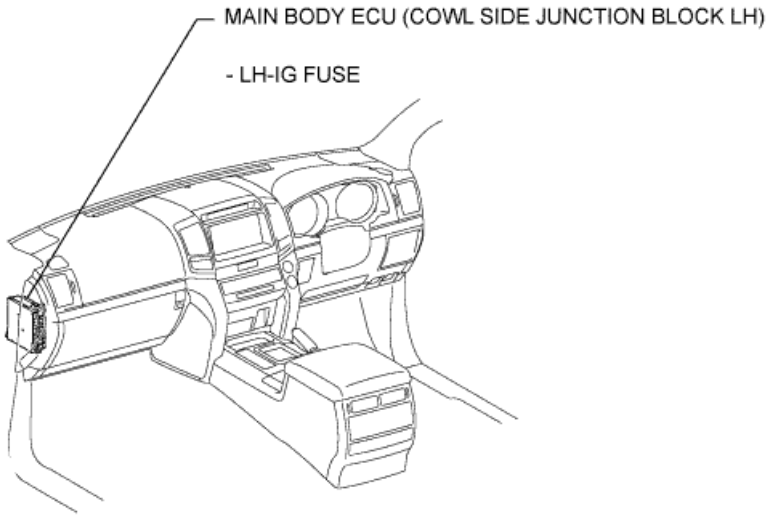
a. Install the release handle with the screw.

20. INSTALL SEAT AD USTER BOLT COVER

a. Attach the 2 claws to install the cover.



21. INSTALL REAR NO. 1 SEAT ASSEMBLY LH



a. Install the rear No. 1 seat assembly (Click here).

SEAT BELT WARNING SYSTEM DESCRIPTION

If a seat belt is not fastened, this system flashes the seat belt warning light or sounds the seat belt warning buzzer as a reminder.

a. Driver side seat belt warning light:
When the driver seat belt is not fastened with the engine switch on (IG), the driver side seat belt warning light on the combination meter comes on to inform the driver. The center airbag sensor detects the driver seat belt status and sends signals to the combination meter.

b. Front passenger side seat belt warning light:
When the passenger seat belt is not fastened with the engine switch on (IG) and the passenger seat occupied, the passenger side seat belt warning light on the multi-display*1 (low blinks. The multi-display displays the passenger seat belt status and whether the passenger seat is occupied.

HINT:

*1: w/ Navigation System

*2: w/o Navigation System

c. Seat belt warning buzzer:
When the vehicle is driven at approximately 20 km/h (12.5 mph) or more while the driver or front passenger seat belt is not being fastened, the seat belt warning buzzer in the combination meter sounds at an interval of 1.2 seconds for 30 seconds.

FUNCTION OF MAIN COMPONENT

The following functions are available.

omponents	Function
Front seat inner belt LH*1,RH*2 (driver side buckle switch)	Informs center airbag sensor of driver seat belt condition (fastened or unfastened)
Front seat inner belt RH*1, LH*2 (passenger side buckle switch)	Informs center airbag sensor of front passenger seat belt condition (fastened or unfastened)
Occupant detection sensor	Informs combination meter of front passenger seat condition (occupied or unoccupied)
Driver side seat belt warning light	If driver seat belt is unfastened and engine switch is on (IG), combination meter flashes seat belt warning light of combination meter as reminder
Front passenger side seat belt warning light	When front passenger seat is occupied and engine switch is on (IG), if passenger seat belt is unfastened, combination meter flashes seat belt warning light of multi-display*3, (low as reminder
Seat belt warning buzzer	If driver or passenger seat belt is unfastened and engine switch is on (IG), combination meter sounds buzzer as reminder

SYSTEM OPERATION

a. Driver side seat belt warning light

i. When the driver seat belt is not fastened with the engine switch on (IG), the driver side seat belt warning light on the combination meter comes on to inform the driver. The center airbag sensor detects the driver seat belt status and sends signals to the combination meter using .

b. Front passenger side seat belt warning light

i. When the passenger seat belt is not fastened with the engine switch on (IG) and the passenger seat occupied, the that the front passenger side seat belt warning light on the multi-display*1 (low blinks. The combination meter displays the passenger seat belt status and whether the passenger seat is occupied.

INSPECT DRIVER SIDE SEAT BELT WARNING LIGHT

a. Turn the engine switch on (IG).

b. When the driver seat belt is not fastened, check that the driver side seat belt warning light on the combination meter blinks.

c. When the driver seat belt is fastened, check that the driver side seat belt warning light on the combination meter is off.

INSPECT FRONT PASSENGER SIDE SEAT BELT WARNING LIGHT

a. Turn the engine switch on (IG).

b. When the front passenger side seat belt is not fastened with the passenger seat occupied, check that the front passenger side seat belt warning light on the multi-display*1 (clock*2) blinks.

HINT:

*1: w/ Navigation System

*2: w/o Navigation System

c. When the front passenger seat belt is fastened with the passenger seat occupied, check that the front passenger side seat belt warning light on the multi-display*1 (clock*2) is off.

HINT:

*1: w/ Navigation System

*2: w/o Navigation System

INSPECT SEAT BELT WARNING BUZZER

HINT:

If the buzzer does not sound, the buzzer cancel setting may be set to ON (Click here).

a. Turn the engine switch on (IG).

b. Place a weight of 20 kg (44.0 lb) on the front passenger seat.

c. **NOTICE:**

- **Do not allow the weight to come into contact with the seatback when placing it on the seat cushion.**
- **Place the weight on the seat cushion.**

When the vehicle is driven at approximately 20 km/h (12.5 mph) or more while the driver or front passenger seat belt is not fastened, check that the buzzer in the combination meter sounds at an interval of 1.2 seconds for 30 seconds.

d. Check that the buzzer sounds at an interval of 0.4 seconds for 90 seconds.

e. Check that the buzzer stops 2 minutes after the buzzer starts sounding.

f. After the buzzer has stopped, turn the engine switch off and then start the engine again. Drive the vehicle at approximately 20 km/h (12.5 mph) or more while the driver or front passenger seat belt is not being fastened, and then check that the buzzer sounds again.

g. After the buzzer has stopped, fasten the driver and front passenger seat belts. Drive the vehicle at approximately 20 km/h (12.5 mph) or more and unfasten the driver or front passenger seat belt, and then check that the buzzer sounds again.

h. After the buzzer has stopped, move the shift lever to R, and then move it to D. Drive the vehicle at approximately 20 km/h (12.5 mph) or more, and then check that the buzzer sounds again.

READ DATA LIST

HINT:

Using the intelligent tester to read the Data List allows values or states of switches, sensors, actuators and other items to be read without removing any parts. This non-intrusive inspection can be very useful because intermittent conditions or signals may be discovered before parts or wiring is disturbed. Reading the Data List information early in troubleshooting is one way to save diagnostic time.

NOTICE:

In the table below, the values listed under "Normal Condition" are reference values. Do not depend solely on these reference values when deciding whether a part is faulty or not.

a. Connect the intelligent tester to the DLC3.

b. Turn the engine switch on (IG).

c. Turn the intelligent tester on.

d. Enter the following menus: Body / (desired system) / Data List.

e. According to the display on the intelligent tester, read the "Data List".

Combination Meter

Tester Display	Measurement Item/Range	Normal Condition	Diagnostic Note
P-Seatbelt Buckle SW	Front passenger side seat belt buckle signal / ON or OFF	ON: Front passenger side seat belt is fastened OFF: Front passenger side seat belt is unfastened	-
D - Seatbelt Warning Buzzer	Driver side seat belt warning signal / ON or OFF	ON: Driver side seat belt warning buzzer is sound OFF: Driver side seat belt warning buzzer is not sound	-
P - Seatbelt Warning Buzzer	Front passenger side seat belt warning signal / ON or OFF	ON: Front passenger side seat belt warning buzzer is sound OFF: Front passenger side seat belt warning buzzer is not sound	-

SRS Airbag

Tester Display	Measurement Item/Range	Normal Condition	Diagnostic Note
Driver side Buckle SW	Driver side seat belt / set or unset	Set: Driver side seat belt is fastened Unset: Driver side seat belt is unfastened	-
Passenger side Buckle SW	Front passenger side seat belt / set or unset	Set: Front passenger side seat belt is fastened Unset: Front passenger side seat belt is unfastened	-

PERFORM ACTIVE TEST

HINT:

Using the intelligent tester to perform Active Tests allows relays, VSVs, actuators and other items to be operated without removing any parts. This non-intrusive functional inspection can be very useful because intermittent operation may be discovered before parts or wiring is disturbed. Performing Active Tests early in troubleshooting is one way to save diagnostic time. Data List information can be displayed while performing Active Tests.

a. Connect the intelligent tester to the DLC3.

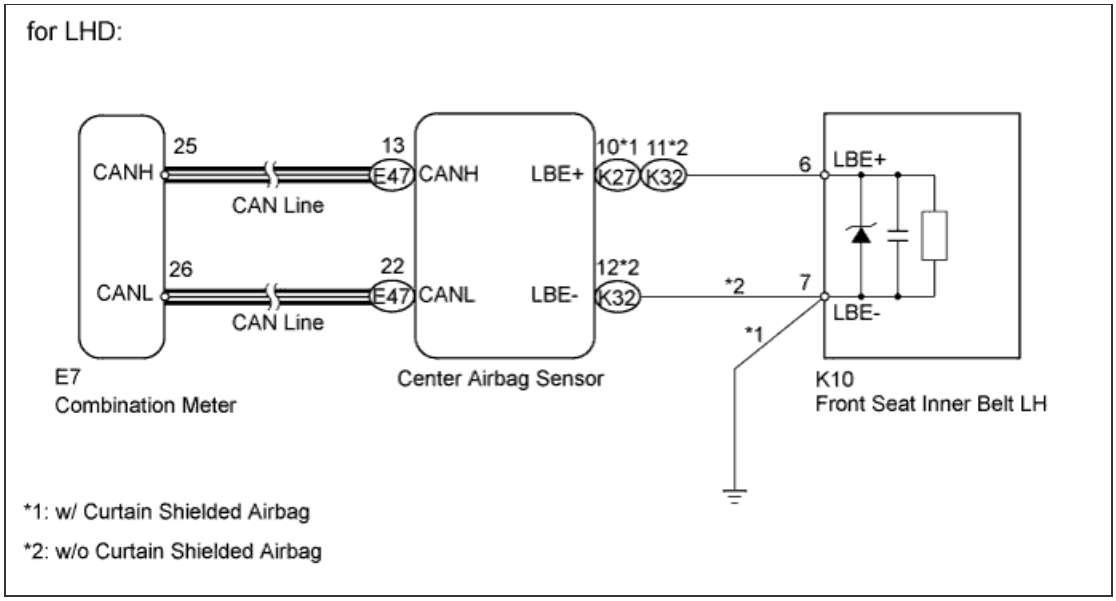
b. Turn the engine switch on (IG).

c. Turn the intelligent tester on.

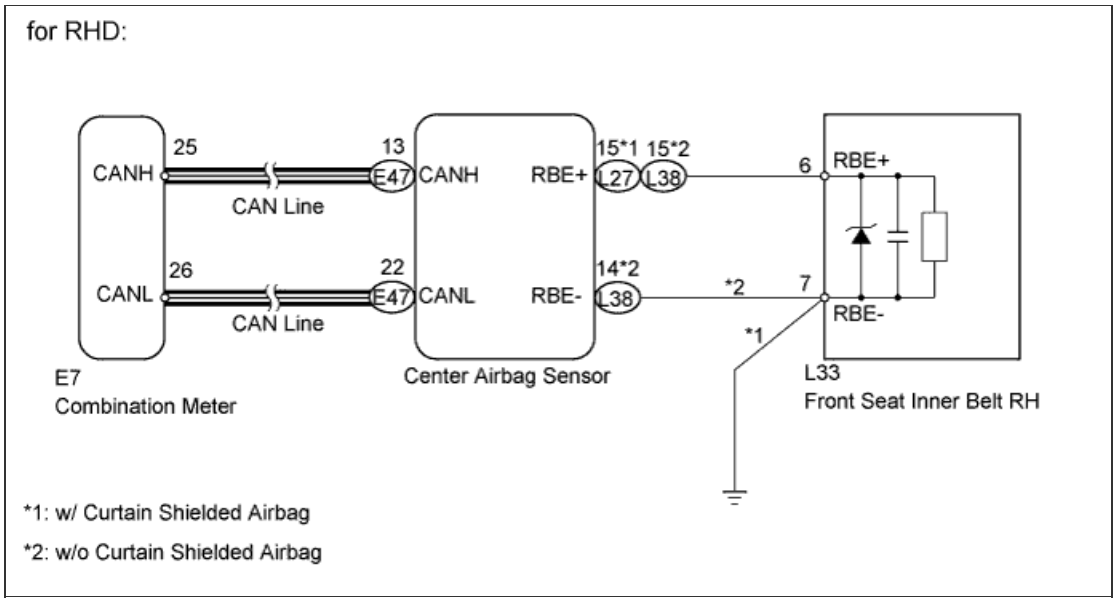
d. Enter the following menus: Body / Combination Meter / Active Test.

e. According to display on the intelligent tester, perform the "Active Test".

Combination Meter



Tester Display	Test Part	Control Range	Diagnostic Note
Driver Side Seat Belt	Driver side seat belt warning light	ON or OFF	-
Front Passenger Side Seat Belt	Front passenger side seat belt warning light	ON or OFF	-



for Preparation Click here

DESCRIPTION

When the engine switch is on (IG), the center airbag sensor transmits front seat inner belt state signals to the combination meter through the CAN. If the driver seat belt is not fastened, the combination meter blinks the driver side seat belt warning light. If the seat belt is fastened, the warning light goes off.

Result

Result	Proceed to
w/ Navigation System	A
w/o Navigation System	B

B → Go to step 7

A

4.INSPECT FUSE (ECU-IG NO. 1)

a. Disconnect the ECU-IG NO. 1 fuse from the cowl side junction block RH.

b. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

Tester Connection	Condition	Specified Condition
ECU-IG NO. 1 fuse	Always	Below 1 Ω

NG → REPLACE FUSE

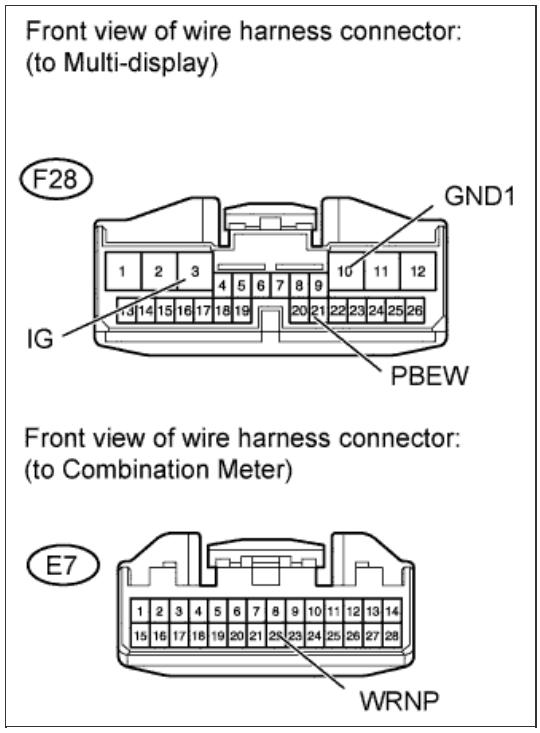
OK

5.CHECK HARNESS AND CONNECTOR (MULTI-DISPLAY - COMBINATION METER, BATTERY AND BODY GROUND)

a. Disconnect the F28 display connector.

b. Disconnect the E7 ECU connector.

c. Measure the resistance and voltage according to the value(s) in the table below.



Standard Resistance:

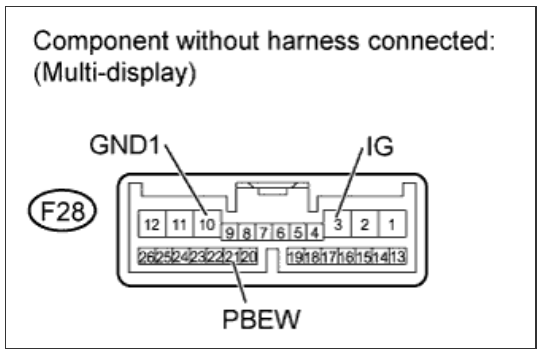
Tester Connection	Condition	Specified Condition
F28-21 (PBEW) -		

-22 (RNP)	Always	Below 1 Ω
F28-10 (GND1) - Body ground		
F28-21 (PBEW) or E7-22 (WRNP) - Body ground	Always	10 kΩ or higher

Standard Voltage:

Tester Connection	Switch Condition	Specified Condition
F28-3 (IG) - Body ground	Engine switch on (IG)	11 to 14 V

NG → REPAIR OR REPLACE HARNESS OR CONNECTOR



OK

6.CHECK DISPLAY AND NAVIGATION ASSEMBLY (MULTI-DISPLAY)

a. Disconnect the F28 display connector.

b. Connect the positive (+) battery lead to terminal 3 (IG), and the negative battery lead to terminals 21 (PBEW) and 10 (GND1).

c. Check that the front passenger side seat belt warning light comes on.

OK:

Measurement Connection	Specified Condition
Battery positive (+) → F28-3 (IG) Battery negative (-) → F28-21 (PBEW) Battery negative (-) → F28-10 (GND1)	Front passenger side seat belt warning light on

Result

7.INSPECT FUSE (ECU-IG NO. 2)

a. Disconnect the ECU-IG NO. 2 fuse from the cowl side junction block LH.

b. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

Tester Connection	Condition	Specified Condition
ECU-IG2 fuse	Always	Below 1 Ω

NG → REPLACE FUSE

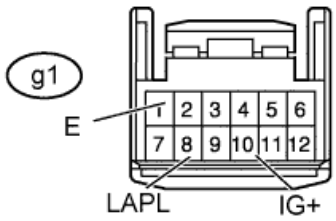
OK

8.CHECK HARNESS AND CONNECTOR (CLOCK - COMBINATION METER, BATTERY AND BODY GROUND)

a. Disconnect the g1 clock connector.

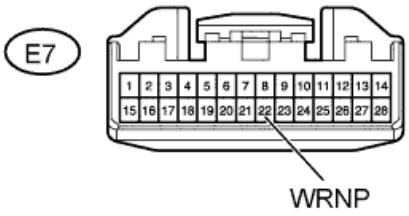
b. Disconnect the E7 ECU connector.

c. Measure the resistance and voltage according to the value(s) in the table below.



Standard Resistance:

Tester Connection	Condition	Specified Condition
g1-1 (E) - Body ground	Always	Below 1 Ω
g1-8 (LAPL) - E7-22 (WRNP)	Always	Below 1 Ω
g1-8 (LAPL) - Body ground	Always	10 kΩ or higher



Standard Voltage:

Tester Connection	Switch Condition	Specified Condition
g1-10 (IG+) - Body ground	Engine switch on (IG)	11 to 14 V

Front view of wire harness connector: (to Clock)

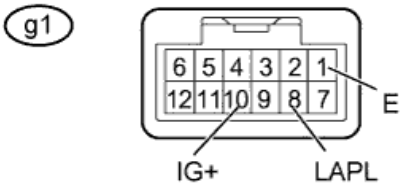
Front view of wire harness connector: (to Combination Meter)

NG → REPAIR OR REPLACE HARNESS OR CONNECTOR

OK

9.CHECK CLOCK

a. Disconnect the g1 clock connector.



b. Connect the positive (+) battery lead to terminal 10 (IG+), and the negative (-) battery lead to terminals 1 (E) and 8 (LAPL).

c. Check that the front passenger side seat belt warning light comes on.

OK:

Measurement Connection	Specified Condition
Battery positive (+) → g1-10 (IG+) Battery negative (-) → g1-8 (LAPL) Battery negative (-) → g1-1 (E)	Front passenger side seat belt warning light on

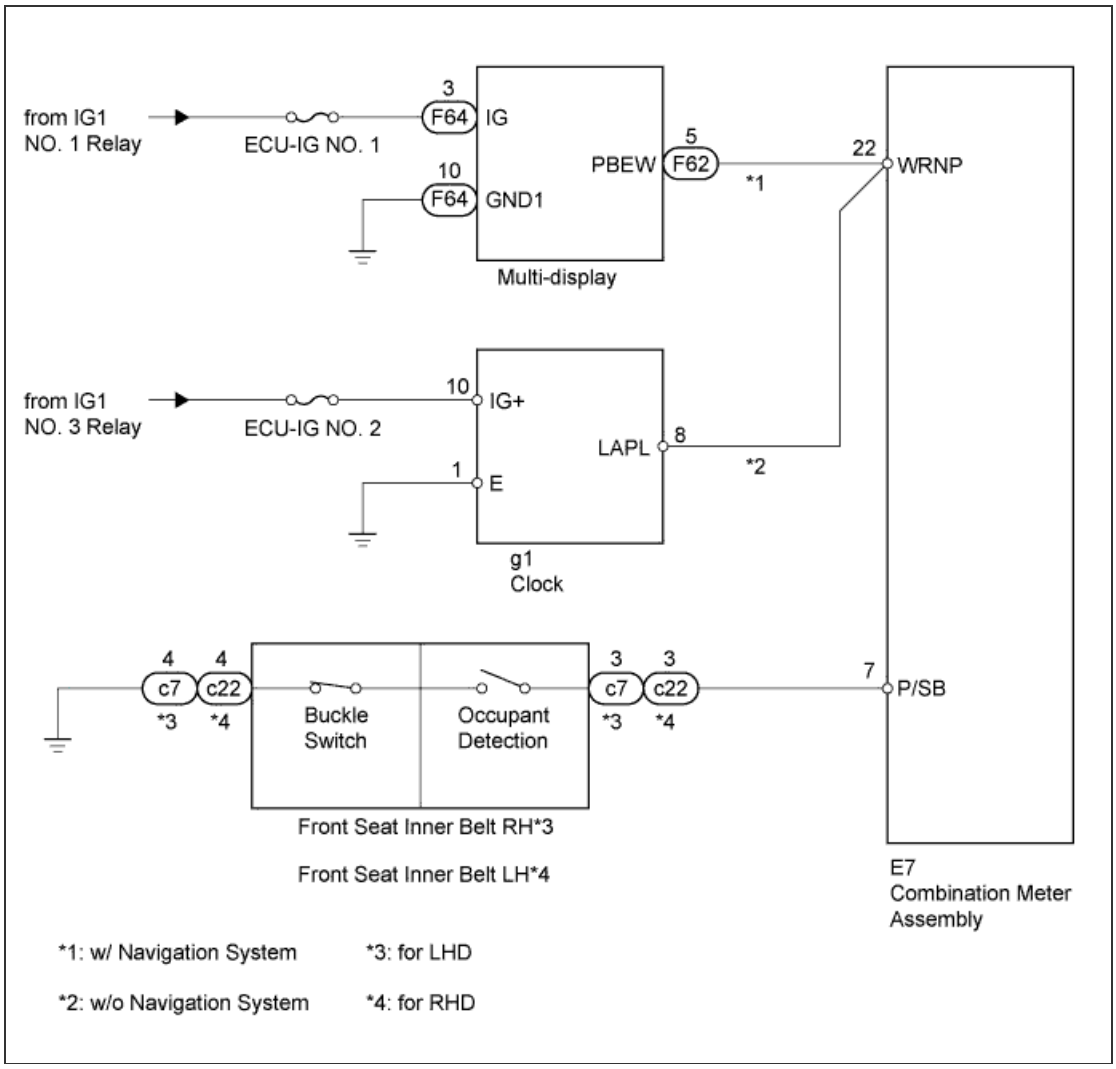
for Preparation Click here

DESCRIPTION



The combination meter detects the state of the front seat inner belt RH when the front passenger seat is occupied with the engine switch on (IG). If the front passenger seat belt is not fastened, the front passenger side seat belt warning light on the multi-display*1 or clock*2 blinks. If the seat belt is fastened, the warning light goes off.

5. REMOVE FRONT SEAT INNER BELT ASSEMBLY (for Power Seat)

a. Disconnect the connectors and detach the clamps.

b. Remove the nut and front seat inner belt assembly.

P

for Preparation Click here

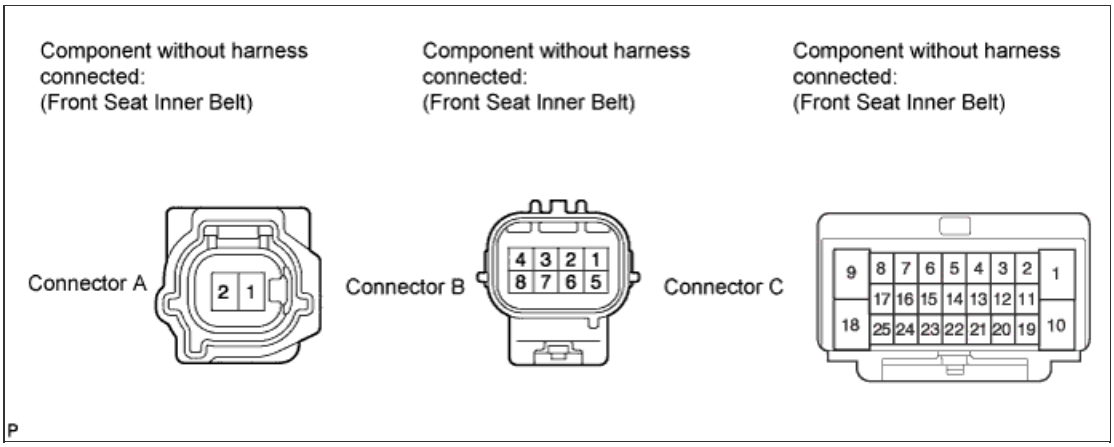
1. INSPECT FRONT SEAT INNER BELT ASSEMBLY (for Driver Side)

a. for Power Seat, for 4 Way Seat Type:
Check the buckle switch.



i. Measure the resistance according to the value(s) in the table below.

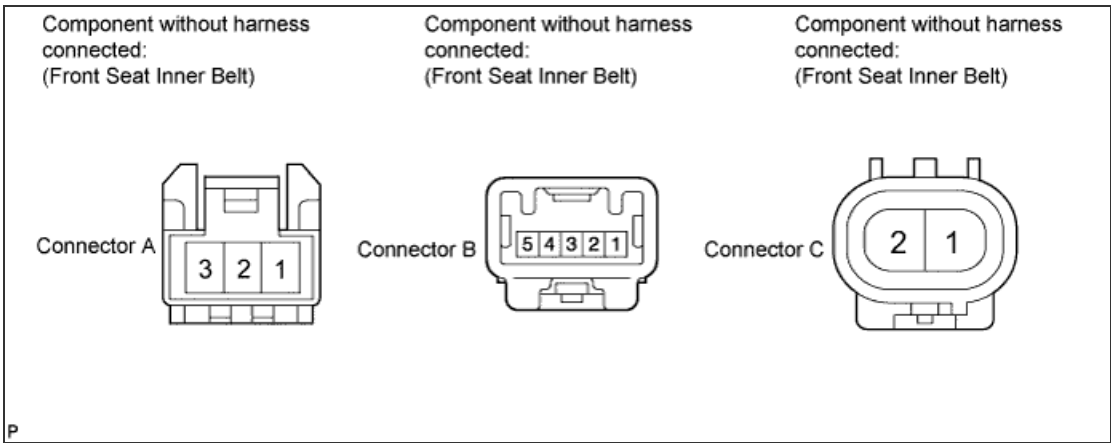
Standard Resistance:

Tester Connection	Condition	Specified Condition
B-4 - B-5	Seat belt fastened (Buckle switch is on)	Below 1 Ω
	Seat belt unfastened (Buckle switch is off)	1 MΩ or higher
A-1 - C-4	Always	Below 1 Ω
A-2 - C-8	Always	Below 1 Ω

If the result is not as specified, replace the inner belt assembly.

b. for 8 Way Seat Type:
Check the buckle switch.

i. Measure the resistance according to the value(s) in the table below.



Standard Resistance:

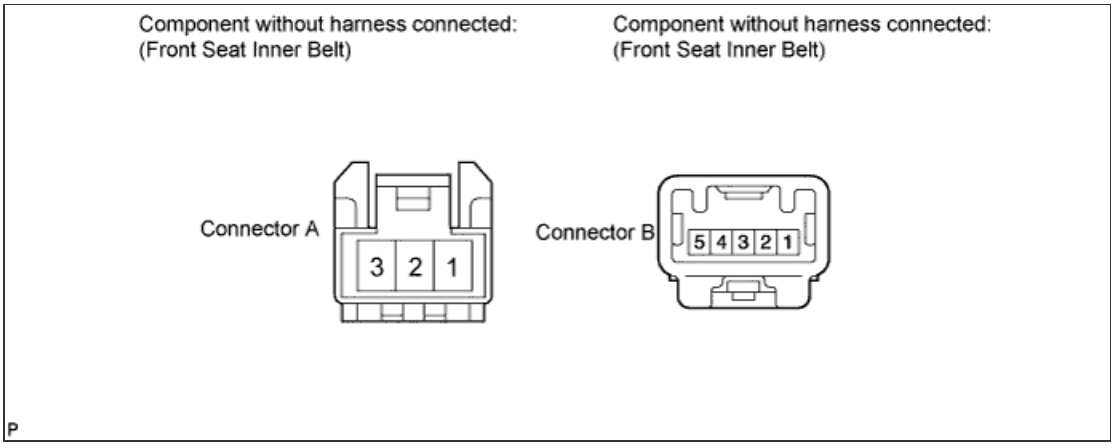
Tester Connection	Condition	Specified Condition
C-9 - C-13	Seat belt fastened (Buckle switch is on)	Below 1 Ω
	Seat belt unfastened (Buckle switch is off)	1 MΩ or higher
A-1 - B-4	Always	Below 1 Ω
A-2 - B-8	Always	Below 1 Ω

If the result is not as specified, replace the inner belt assembly.

2. INSPECT FRONT SEAT INNER BELT ASSEMBLY (for Front Passenger Side)

a. for Power Seat, w/ Front Seat Side Airbag and Curtain Shield Airbag:
Check the buckle switch.

i. Measure the resistance according to the value(s) in the table below.



Standard Resistance:

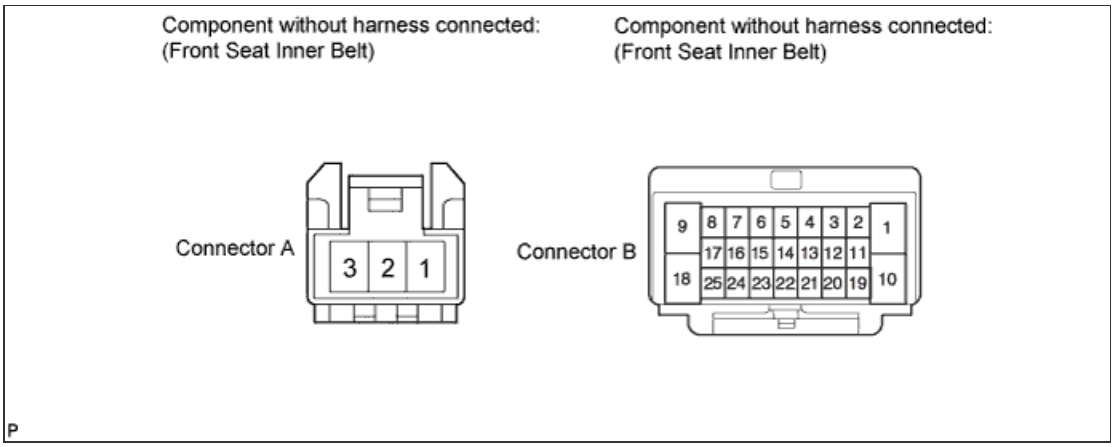
Tester Connection	Condition	Specified Condition
	Seat belt fastened (Buckle switch	Below 1 Ω

B-4 - B-5	is on)	
	Seat belt unfastened (Buckle switch is off)	1 MΩ or higher
A-1 - B-4	Seat belt fastened (Buckle switch is on)	1 MΩ or higher
	Seat belt unfastened (Buckle switch is off)	Below 1 Ω
A-1 - B-4	Always	Below 1 Ω
A-3 - B-3	Always	Below 1 Ω

If the result is not as specified, replace the inner belt assembly.

b. for Power Seat, w/o Front Seat Side Airbag and Curtain Shield Airbag:
Check the buckle switch.

i. Measure the resistance according to the value(s) in the table below.



Standard Resistance:

Tester Connection	Condition	Specified Condition
B-4 - B-5	Seat belt fastened (Buckle switch is on)	Below 1 Ω
	Seat belt unfastened (Buckle switch is off)	1 MΩ or higher
A-1 - B-4	Seat belt fastened (Buckle switch is on)	1 MΩ or higher
	Seat belt unfastened (Buckle switch is off)	Below 1 Ω
A-3 - B-3	Always	Below 1 Ω

If the result is not as specified, replace the inner belt assembly.

c. for Manual Seat:

Check the buckle switch.

i. Measure the resistance according to the value(s) in the table below.

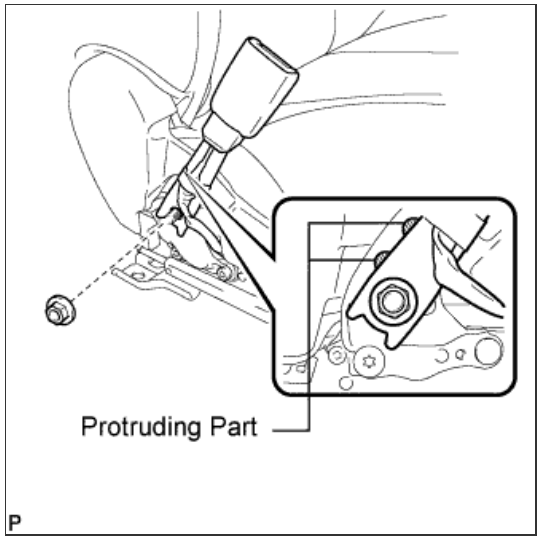
Standard Resistance:

Tester Connection	Condition	Specified Condition
B-9 - B-13	Seat belt fastened (Buckle switch is on)	Below 1 Ω
	Seat belt unfastened (Buckle switch is off)	1 MΩ or higher
A-1 - B-9	Seat belt fastened (Buckle switch is on)	1 MΩ or higher
	Seat belt unfastened (Buckle switch is off)	Below 1 Ω
A-3 - B-14	Always	Below 1 Ω

If the result is not as specified, replace the inner belt assembly.

for Preparation Click here

1. INSTALL FRONT SEAT INNER BELT ASSEMBLY (for Manual Seat)



a. Install the front seat inner belt assembly with the nut.

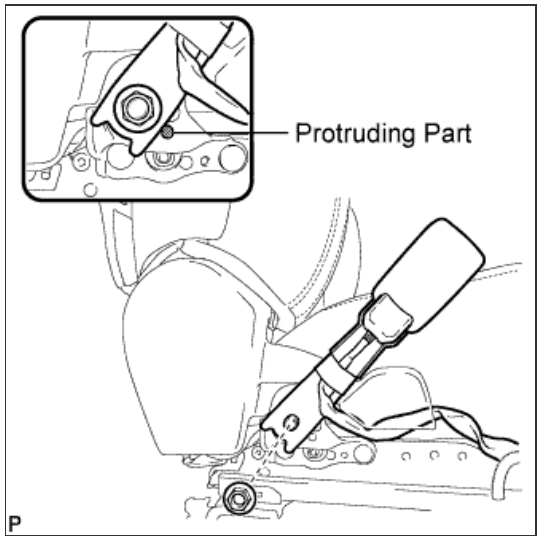
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

Do not allow the anchor part of the front seat inner belt assembly to overlap the protruding part of the front seat adjuster.

b. Connect the connectors and attach the clamps.

2. INSTALL FRONT SEAT INNER BELT ASSEMBLY (for Power Seat)



a. Install the front seat inner belt assembly with the nut.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

Do not allow the anchor part of the front seat inner belt assembly to overlap the protruding parts of the front seat adjuster.

b. Connect the connectors and attach the clamps.

3. INSTALL FRONT SEAT ASSEMBLY (for Manual Seat)

a. Install the front seat assembly (Click here).

4. INSTALL FRONT SEAT ASSEMBLY (for Power Seat)

a. Install the front seat assembly (Click here).

5. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL

6. CHECK SRS WARNING LIGHT

a. Check the SRS warning light (Click here).

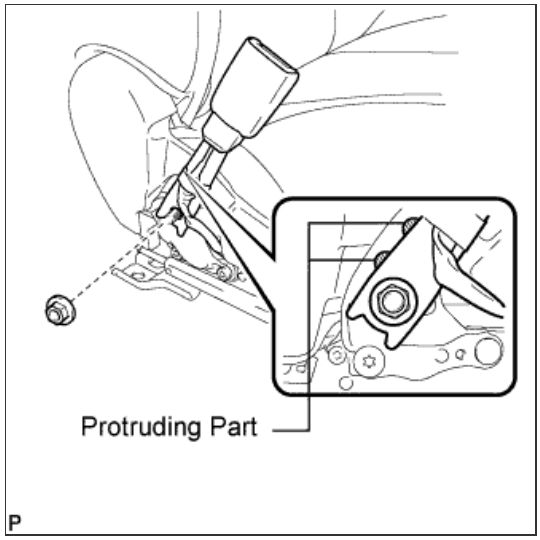
7. INSPECT FRONT SEAT ASSEMBLY

a. for Manual Seat:
Inspect Front Seat (Click here).

b. for Power Seat:
Inspect Front Seat (Click here).

for Preparation Click here

1. INSTALL FRONT SEAT INNER BELT ASSEMBLY (for Manual Seat)



a. Install the front seat inner belt assembly with the nut.

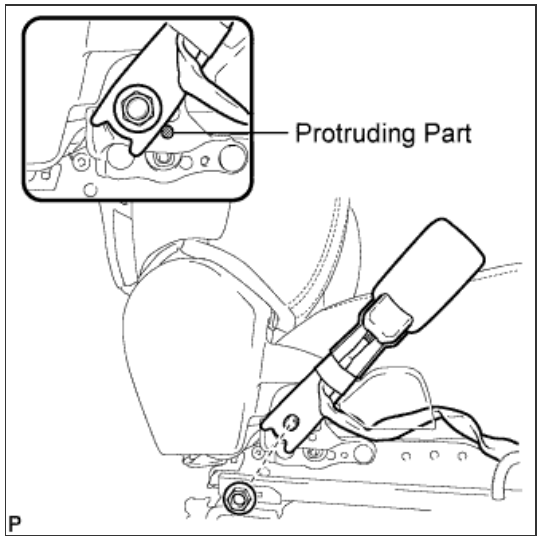
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

Do not allow the anchor part of the front seat inner belt assembly to overlap the protruding part of the front seat adjuster.

b. Connect the connectors and attach the clamps.

2. INSTALL FRONT SEAT INNER BELT ASSEMBLY (for Power Seat)



a. Install the front seat inner belt assembly with the nut.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

Do not allow the anchor part of the front seat inner belt assembly to overlap the protruding parts of the front seat adjuster.

b. Connect the connectors and attach the clamps.

3. INSTALL FRONT SEAT ASSEMBLY (for Manual Seat)

a. Install the front seat assembly (Click here).

4. INSTALL FRONT SEAT ASSEMBLY (for Power Seat)

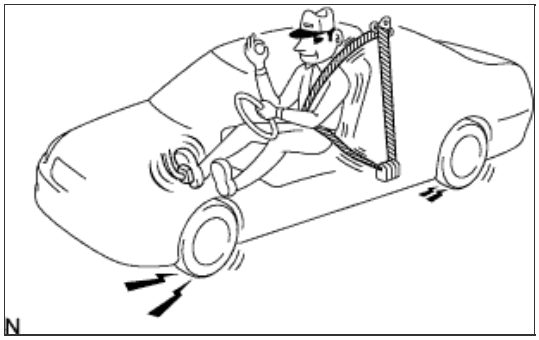
a. Install the front seat assembly (Click here).

5. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL

6. CHECK SRS WARNING LIGHT

a. Check the SRS warning light (Click here).

7. INSPECT FRONT SEAT ASSEMBLY



a. for Manual Seat:
Inspect Front Seat (Click here).

b. for Power Seat:
Inspect Front Seat (Click here).

for Preparation Click here

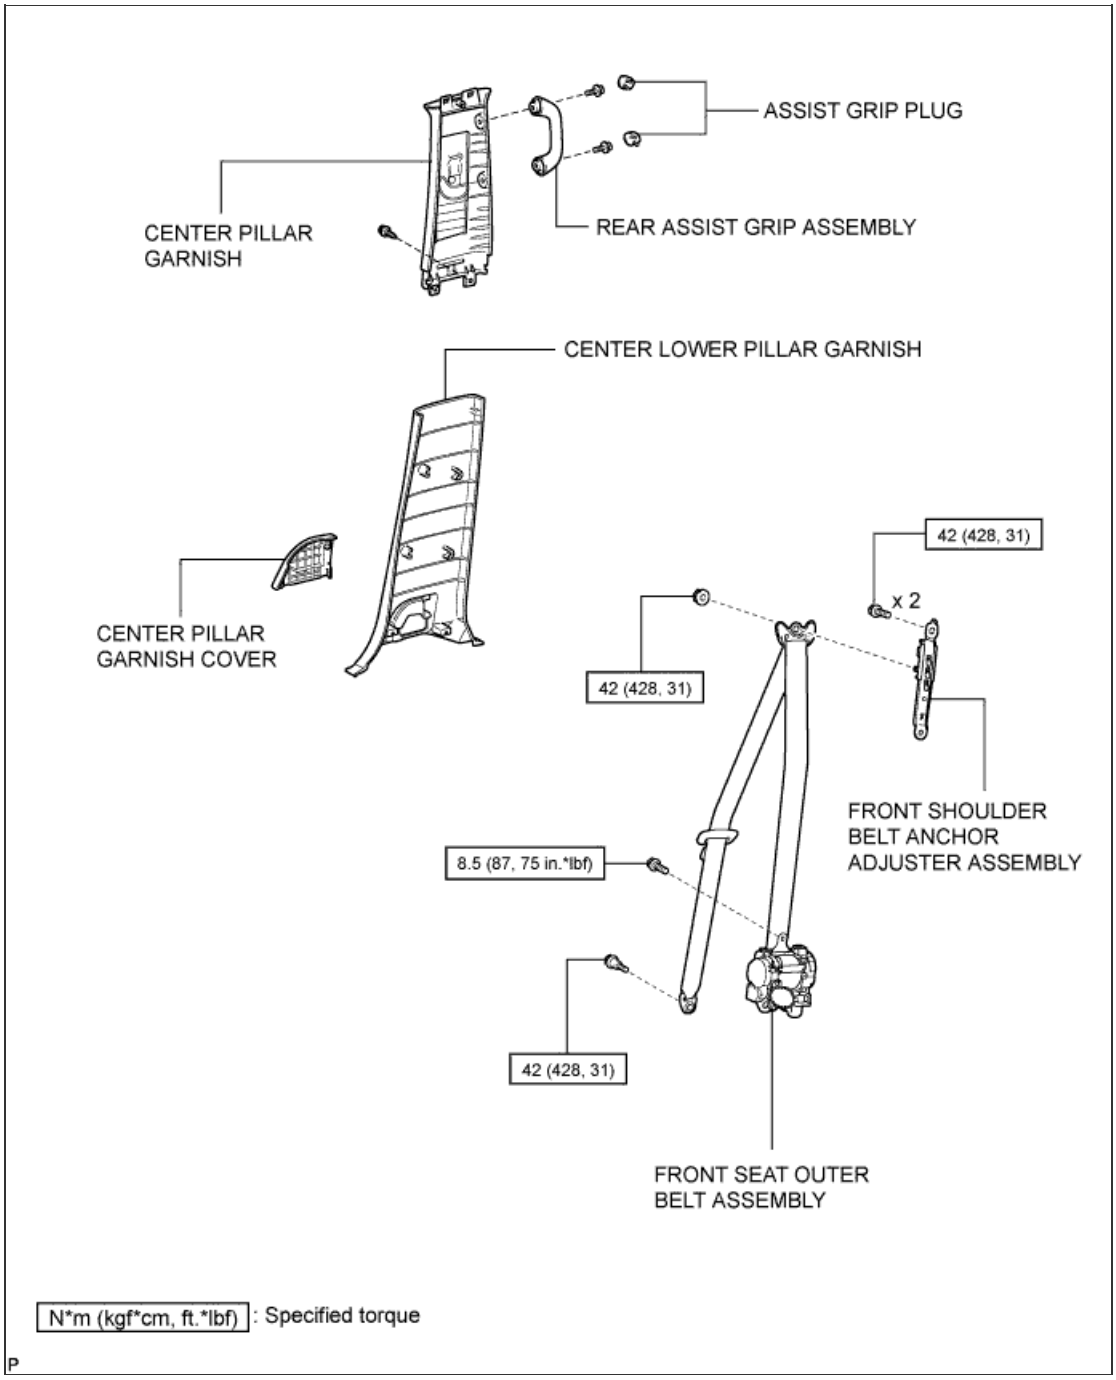
CAUTION:

Replace the faulty parts of the seat belt systems (outer belt, inner belt, bolts, nuts, adjustable shoulder anchor, tether anchor hardware and other related parts). When inspecting a vehicle that was in a collision, be sure to check all of the seat belt systems regardless of whether or not the system was activated in the collision. Replace any damaged or malfunctioning systems.

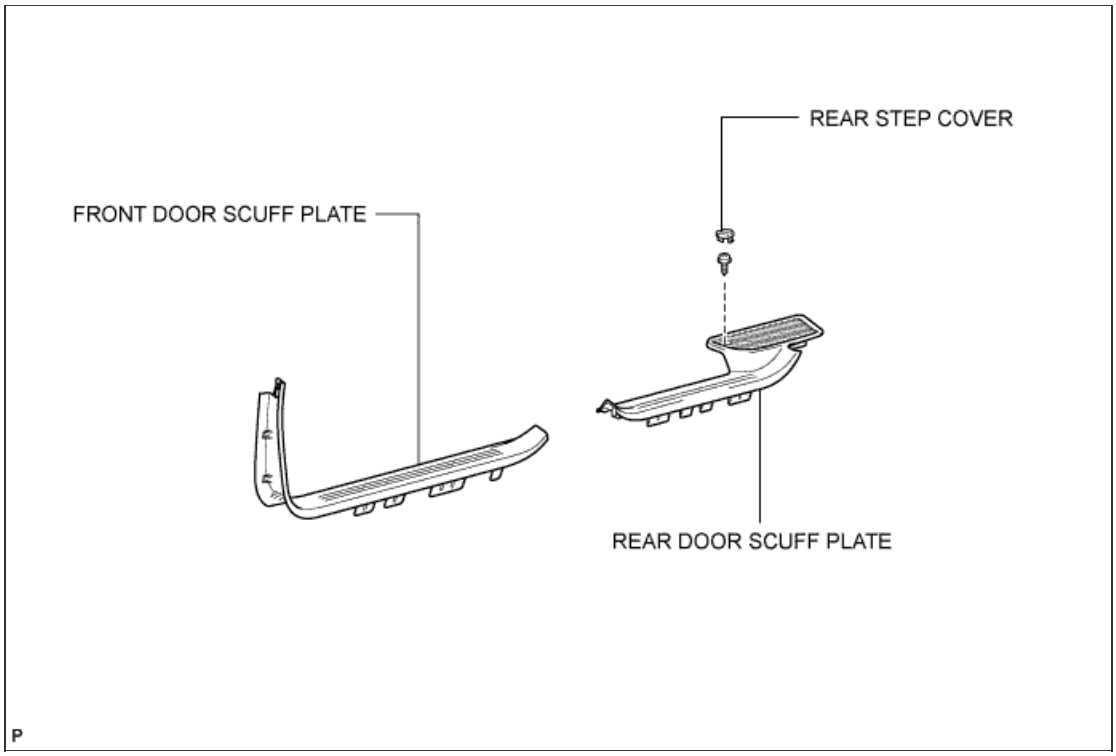
1.RUNNING TEST (IN SAFE AREA)

CAUTION:

Conduct this test in a safe area.



a. Fasten the front seat belt.



b. Drive the vehicle at 16 km/h (10 mph) and firmly depress the brakes. Check that the belts lock and cannot be extended at this time. If a belt does not lock, replace the seat belt assembly (Click here).

HINT:

Inspect a seat belt assembly before installing it (Click here).

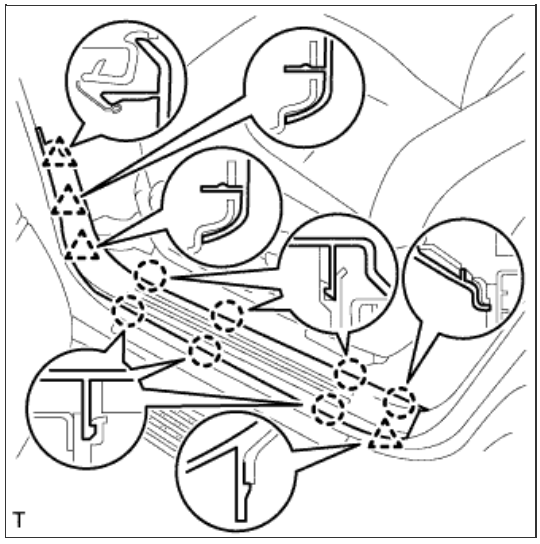
for Preparation Click here

REAR STEP COVER
FRONT DOOR SCUFF PLATE
REAR DOOR SCUFF PLATE
P

for Preparation Click here

HINT:

- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**



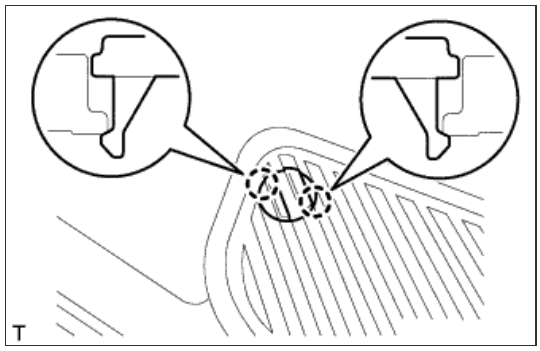
1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

2. REMOVE FRONT DOOR SCUFF PLATE

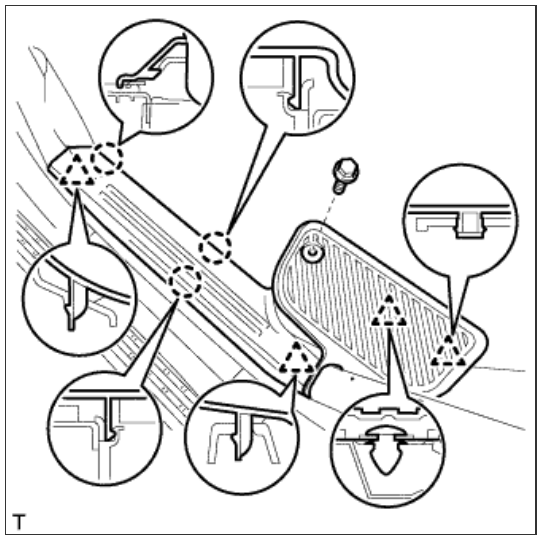
a. Detach the 7 claws and 4 clips and remove the scuff plate.



3. REMOVE REAR STEP COVER

HINT:

Use the same procedure to remove the step cover on the other side.

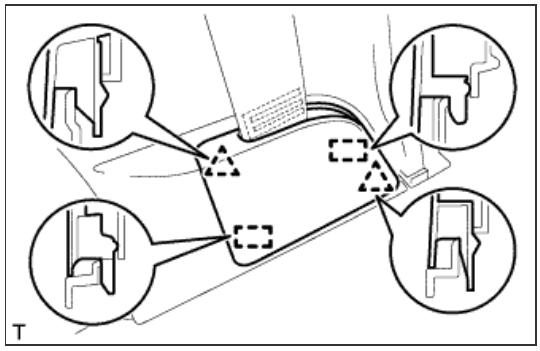


a. Detach the 2 claws and remove the step cover.

4. REMOVE REAR DOOR SCUFF PLATE

a. Remove the screw.

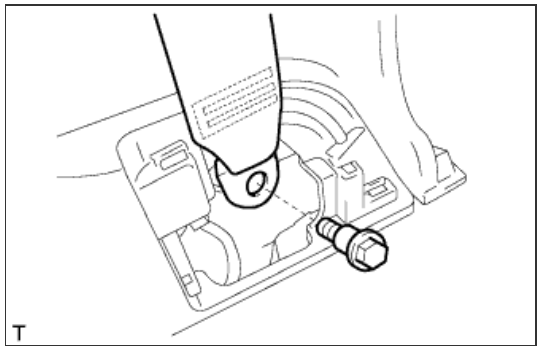
b. Detach the 3 claws and 4 clips and remove the scuff plate.



5. REMOVE CENTER PILLAR GARNISH COVER

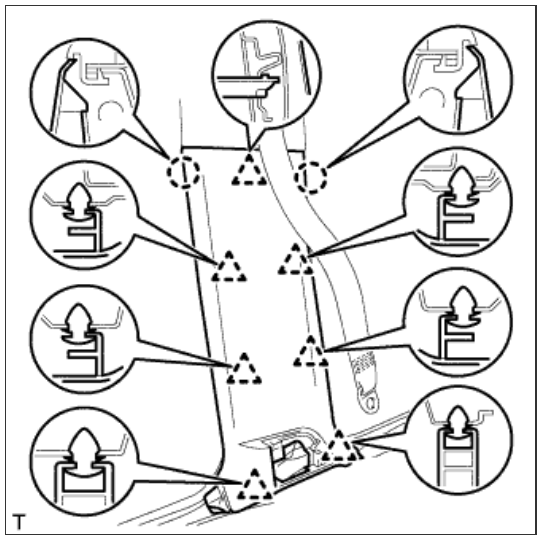
HINT:

- **for Manual Seat:**
  When removing the center pillar garnish cover, move the front seat and seatback to the foremost upright position.
- **for Power Seat:**
  When removing the center pillar garnish cover, connect the cable to the negative (-) battery terminal and operate the power seat switch to move the front seat and seatback to the foremost upright position.
- **for Power Seat:**
  After moving the front seat, disconnect the cable from the negative (-) battery terminal.



a. Detach the 2 clips and 2 guides and remove the cover.

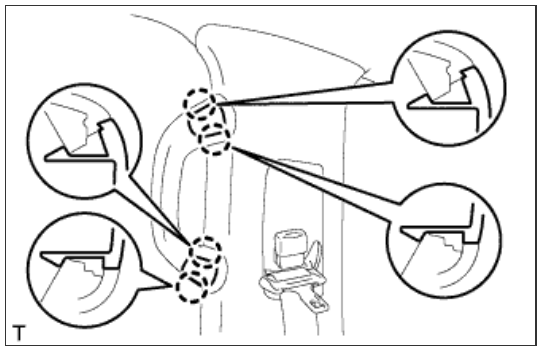
6. REMOVE CENTER LOWER PILLAR GARNISH



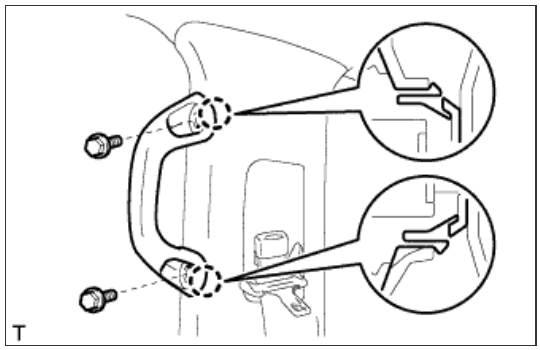
HINT:

- **for Manual Seat:**
  When removing the center pillar garnish cover, move the front seat and seatback to the foremost upright position.
- **for Power Seat:**
  When removing the center pillar garnish cover, connect the cable to the negative (-) battery terminal and operate the power seat switch to move the front seat and seatback to the foremost upright position.
- **for Power Seat:**
  After moving the front seat, disconnect the cable from the negative (-) battery terminal.

a. Remove the bolt and seat belt's anchor.



b. Detach the 2 claws and 7 clips and remove the center lower pillar garnish.



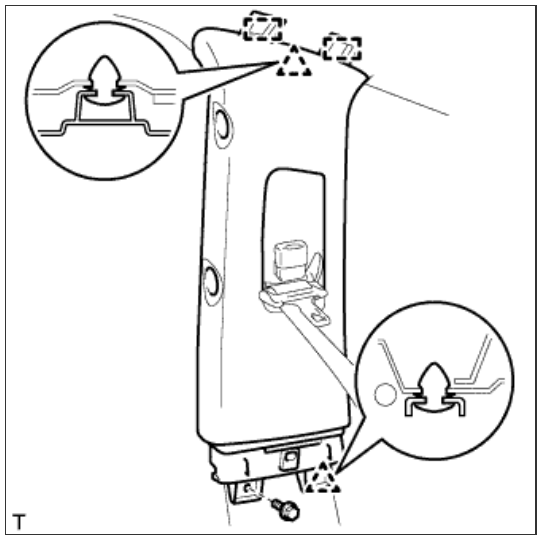
7. REMOVE REAR ASSIST GRIP ASSEMBLY

HINT:

Use the same procedure to remove the rear assist grip on the other side.

a. Detach the 4 claws and remove the 2 assist grip plugs.

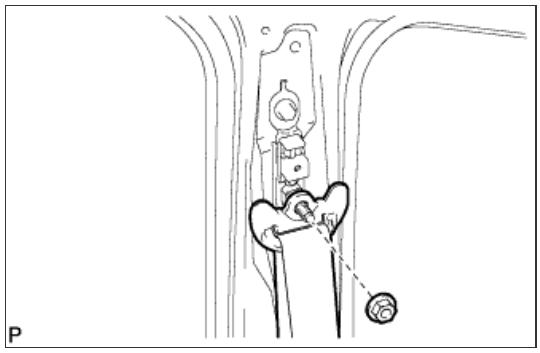
b. Remove the 2 bolts.



c. Detach the 2 claws and remove the rear assist grip.

8. REMOVE CENTER PILLAR GARNISH

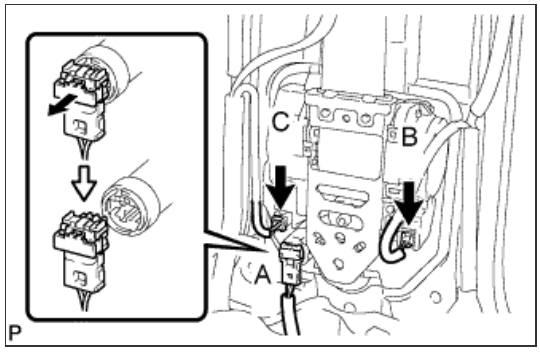
a. Remove the bolt.



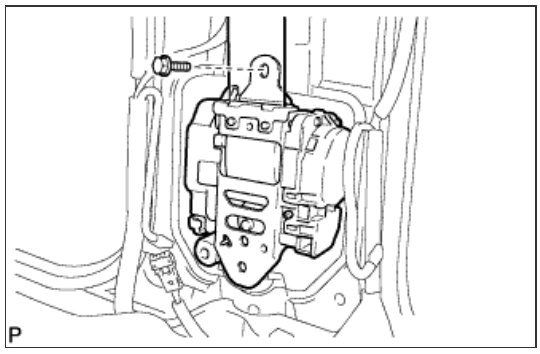
b. Detach the 2 clips and 2 guides.

c. Pass the seat belt anchor through the center pillar garnish and remove the center pillar garnish.

9. REMOVE FRONT SEAT OUTER BELT ASSEMBLY



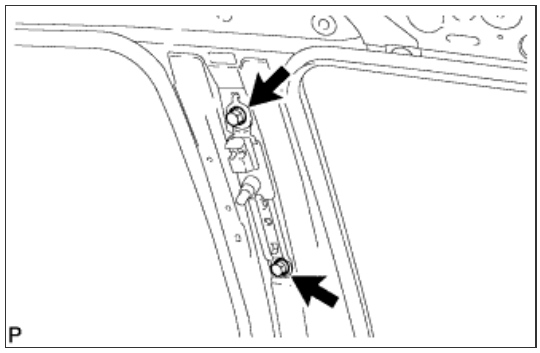
a. Remove the nut and shoulder anchor.



b. Disconnect the pretensioner connector labeled A as shown in the illustration.

c. Disconnect the tension reducer connector labeled B.

d. w/ Pre-Crash Safety System:
Disconnect the pre-crash safety connector labeled C.



e. Remove the bolt and seat belt.

10. REMOVE FRONT SHOULDER BELT ANCHOR ADJUSTER ASSEMBLY

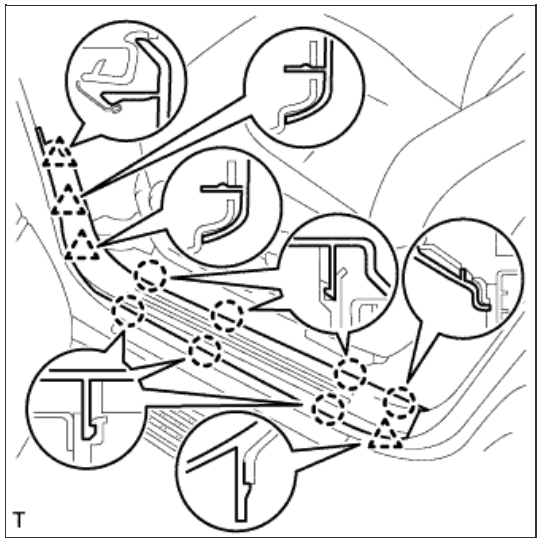
a. Remove the 2 bolts and ad ster.

P

for Preparation Click here

HINT:

- **Use the same procedure for the LH and RH side.**
- **The procedure listed below is for the LH side.**



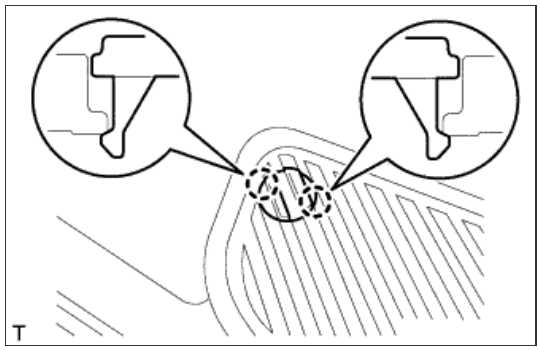
1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

2. REMOVE FRONT DOOR SCUFF PLATE

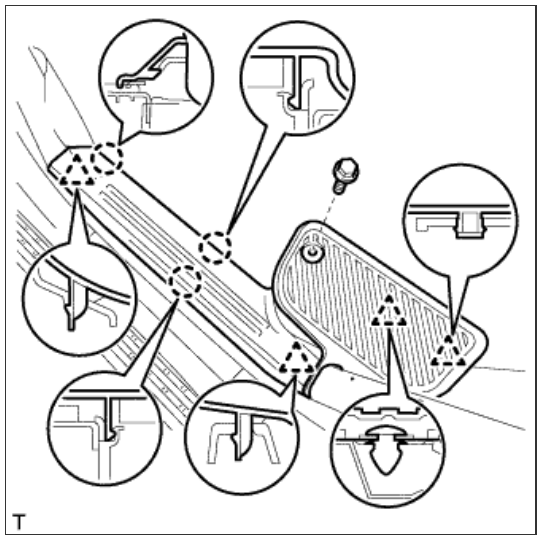
a. Detach the 7 claws and 4 clips and remove the scuff plate.



3. REMOVE REAR STEP COVER

HINT:

Use the same procedure to remove the step cover on the other side.

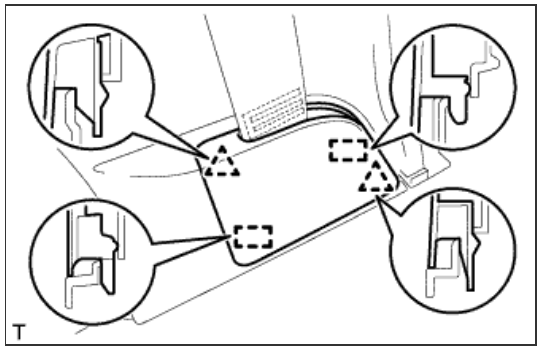


a. Detach the 2 claws and remove the step cover.

4. REMOVE REAR DOOR SCUFF PLATE

a. Remove the screw.

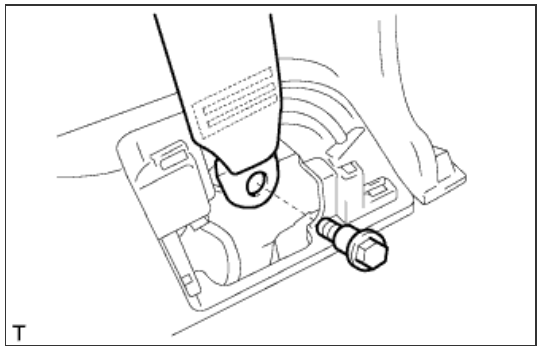
b. Detach the 3 claws and 4 clips and remove the scuff plate.



5. REMOVE CENTER PILLAR GARNISH COVER

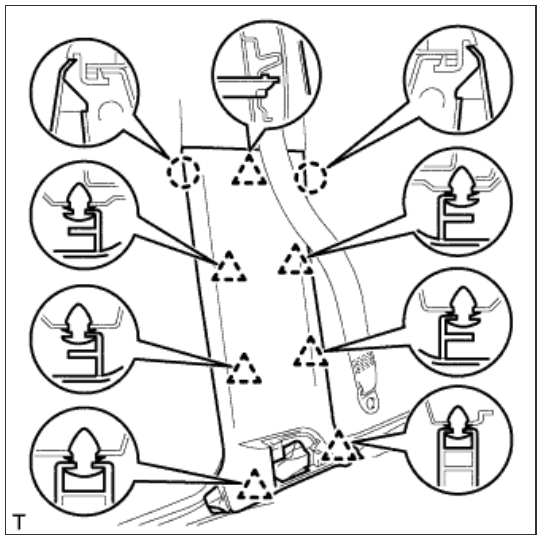
HINT:

- **for Manual Seat:**
  When removing the center pillar garnish cover, move the front seat and seatback to the foremost upright position.
- **for Power Seat:**
  When removing the center pillar garnish cover, connect the cable to the negative (-) battery terminal and operate the power seat switch to move the front seat and seatback to the foremost upright position.
- **for Power Seat:**
  After moving the front seat, disconnect the cable from the negative (-) battery terminal.



a. Detach the 2 clips and 2 guides and remove the cover.

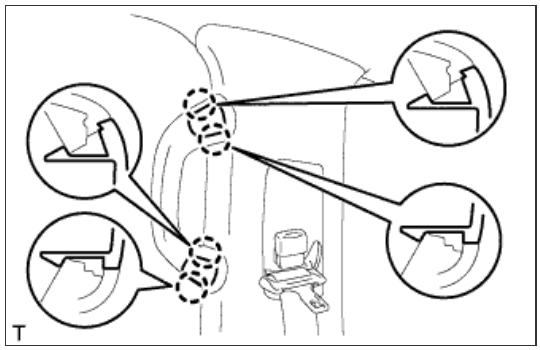
6. REMOVE CENTER LOWER PILLAR GARNISH



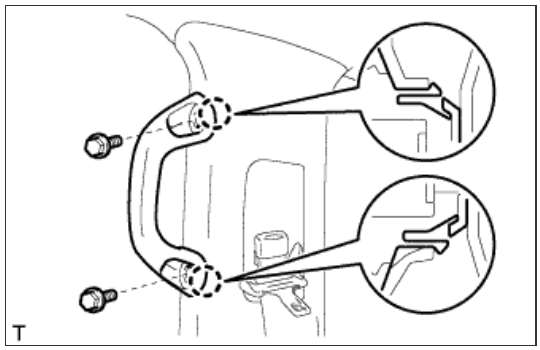
HINT:

- **for Manual Seat:**
  When removing the center pillar garnish cover, move the front seat and seatback to the foremost upright position.
- **for Power Seat:**
  When removing the center pillar garnish cover, connect the cable to the negative (-) battery terminal and operate the power seat switch to move the front seat and seatback to the foremost upright position.
- **for Power Seat:**
  After moving the front seat, disconnect the cable from the negative (-) battery terminal.

a. Remove the bolt and seat belt's anchor.



b. Detach the 2 claws and 7 clips and remove the center lower pillar garnish.



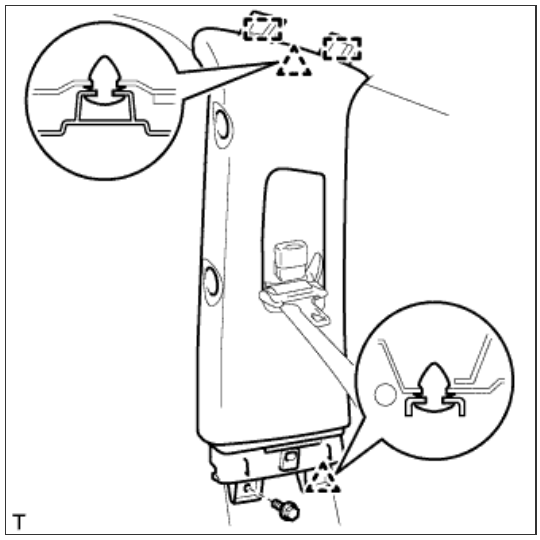
7. REMOVE REAR ASSIST GRIP ASSEMBLY

HINT:

Use the same procedure to remove the rear assist grip on the other side.

a. Detach the 4 claws and remove the 2 assist grip plugs.

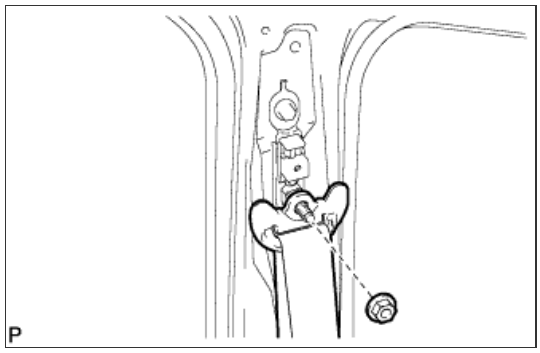
b. Remove the 2 bolts.



c. Detach the 2 claws and remove the rear assist grip.

8. REMOVE CENTER PILLAR GARNISH

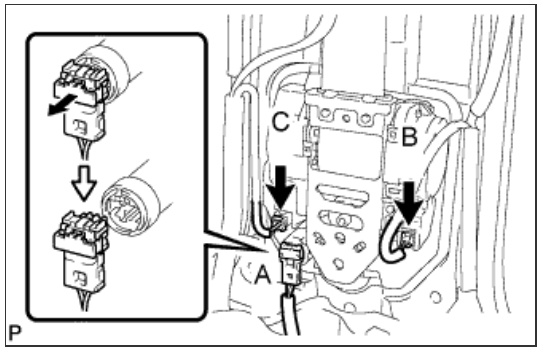
a. Remove the bolt.



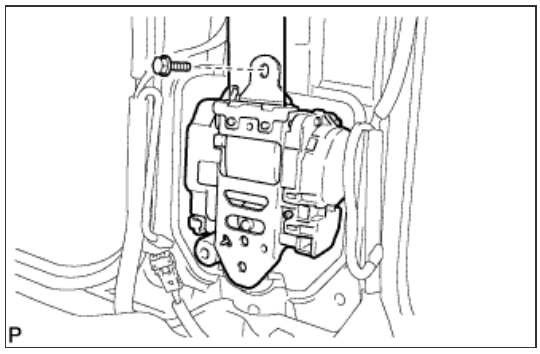
b. Detach the 2 clips and 2 guides.

c. Pass the seat belt anchor through the center pillar garnish and remove the center pillar garnish.

9. REMOVE FRONT SEAT OUTER BELT ASSEMBLY



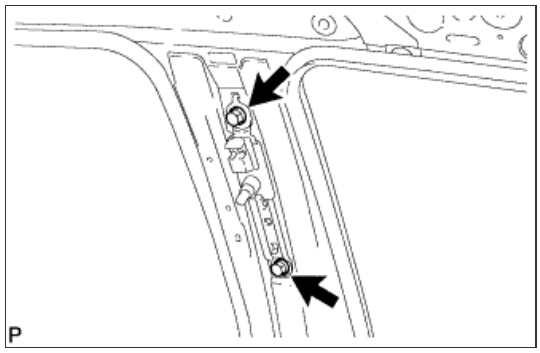
a. Remove the nut and shoulder anchor.



b. Disconnect the pretensioner connector labeled A as shown in the illustration.

c. Disconnect the tension reducer connector labeled B.

d. w/ Pre-Crash Safety System:
Disconnect the pre-crash safety connector labeled C.



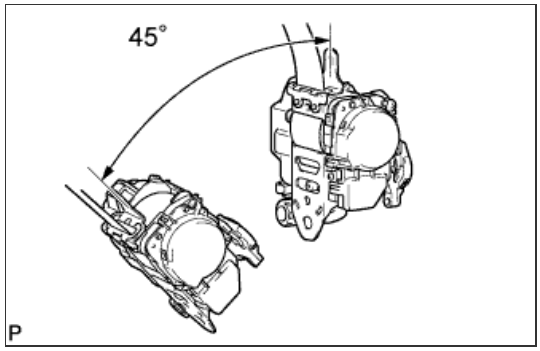
e. Remove the bolt and seat belt.

10. REMOVE FRONT SHOULDER BELT ANCHOR ADJUSTER ASSEMBLY

a. Remove the 2 bolts and ad ster.

P

for Preparation Click here



1. INSPECT FRONT SEAT OUTER BELT ASSEMBLY

CAUTION:

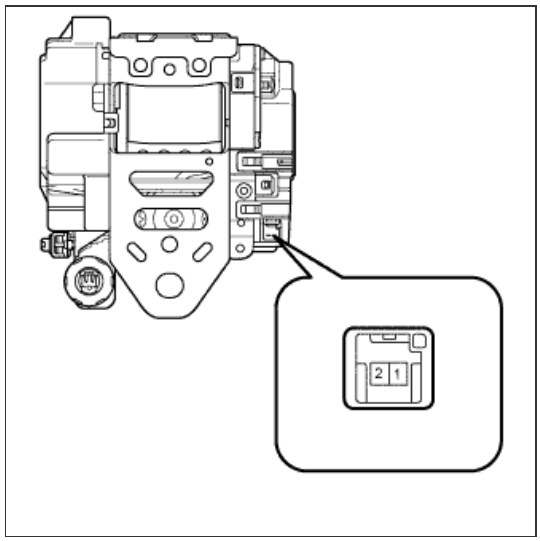
Do not disassemble the retractor.

a. Before installing the seat belt, check the ELR.

i. When the inclination of the retractor is 15° or less, check that the belt can be pulled from the retractor. When the inclination of the retractor is over 45°, check that the belt locks. If the operation is not as specified, replace the seat belt assembly.

b. Check the tension reducer operation.

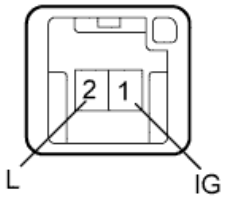
NOTICE:



Do not apply battery voltage to the pretensioner connector.

i. Connect the battery positive (+) lead to terminal 1 (IG) of the tension reducer connector and the negative (-) lead to terminal 2 (L).

ii. Check that an operating sound is heard when the magnetized solenoid is attracting the plunger.



iii. Pull out the seat belt and let it retract. Listen to the operating sound.

i . Pull out the seat belt again, disconnect the battery negative (-) lead and let it retract. Listen to the operating sound again and check that the operating sound volume has increased.
If the result is not as specified, replace the outer belt assembly.

Component without harness connected:
(Front Seat Outer Belt)

Tension Reducer Connector

Pretensioner Connector*

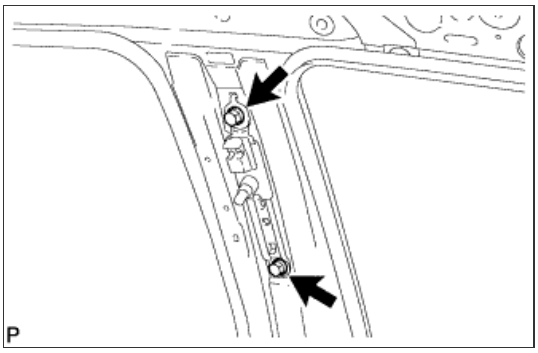
*: Do not apply battery voltage

o

for Preparation Click here

HINT:

- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**
- **A bolt without a torque specification is shown in the standard bolt chart (Click here).**



1. INSTALL FRONT SHOULDER BELT ANCHOR ADJUSTER ASSEMBLY

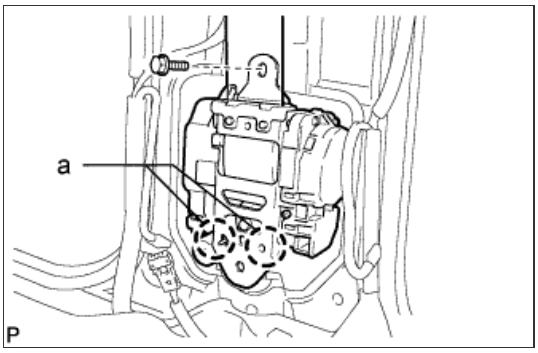
a. Align the adjuster positioning hole with the claw, and install the adjuster with the 2 bolts.

HINT:

First install the lower bolt, and then install the upper bolt.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

2. INSTALL FRONT SEAT OUTER BELT ASSEMBLY

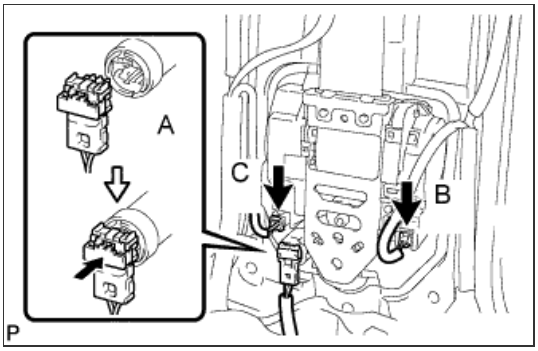


NOTICE:

When installing the retractor, make sure the claws of the vehicle (labeled "a" in the illustration) only contact the installation areas of the retractor.

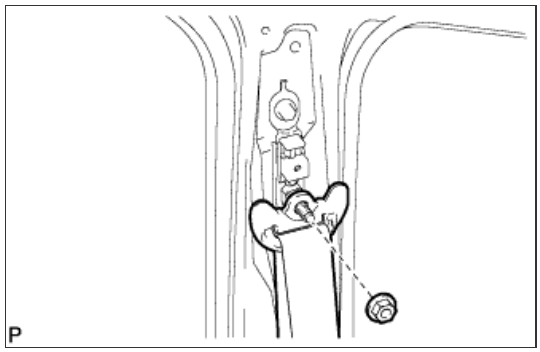
a. Align the claws of the vehicle with the seat belt retractor positioning holes.

b. Install the seat belt with the bolt.



Torque:
8.5 N*m{ 87 kgf*cm , 75 in.*lbf }

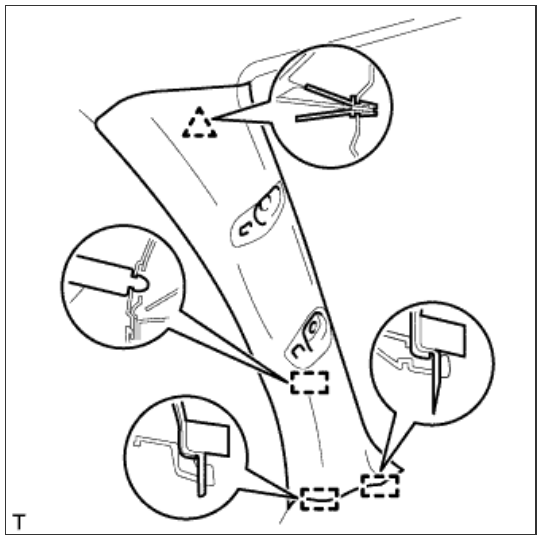
c. Connect the pretensioner connector labeled A as shown in the illustration.



d. Connect the tension reducer connector labeled B.

e. w/ Pre-Crash Safety System:
Connect the pre-crash safety connector labeled C.

f. Install the shoulder anchor to the shoulder belt anchor adjuster with the nut.

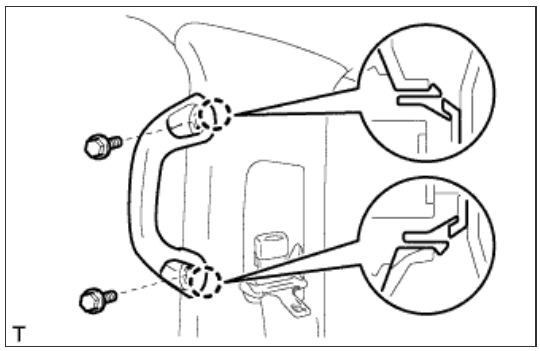


Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

3. INSTALL CENTER PILLAR GARNISH LH

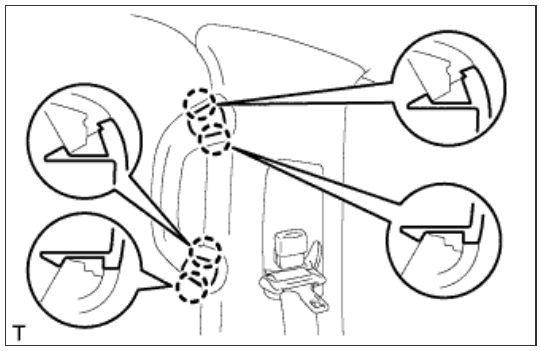
a. for 9 Speakers:
Connect the speaker connector.

b. Attach the clip and 3 guides to install the front pillar garnish.



4. INSTALL REAR ASSIST GRIP ASSEMBLY

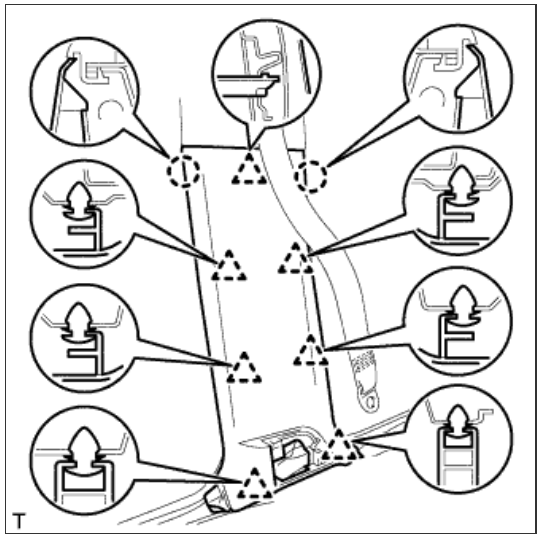
HINT:



Use the same procedure to install the rear assist grip on the other side.

a. Attach the 2 claws to install the rear assist grip.

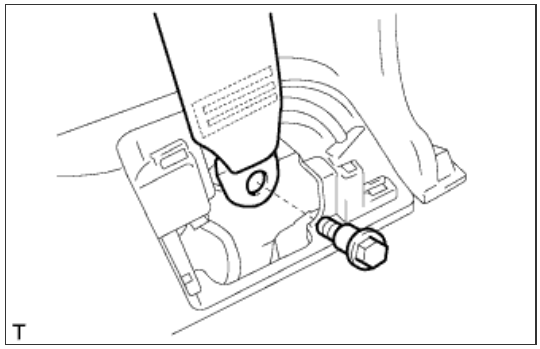
b. Install the 2 bolts.



c. Attach the 4 claws to install the 2 assist grip plugs.

5. INSTALL CENTER LO ER PILLAR GARNISH

HINT:

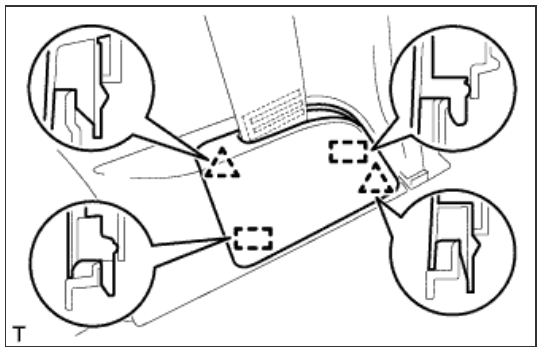


- **for Manual Seat:**
  When installing the center lower pillar garnish, move the front seat and seatback to the foremost upright position.
- **for Power Seat:**
  When installing the center pillar garnish cover, connect the cable to the negative (-) battery terminal and operate the power seat switch to move the front seat and seatback to the foremost upright position.
- **for Manual Seat:**
  After moving the front seat, disconnect the cable from the negative (-) battery terminal.

a. Attach the 2 claws and 7 clips to install the center lower pillar garnish.

b. Install the seat belt anchor with the bolt.

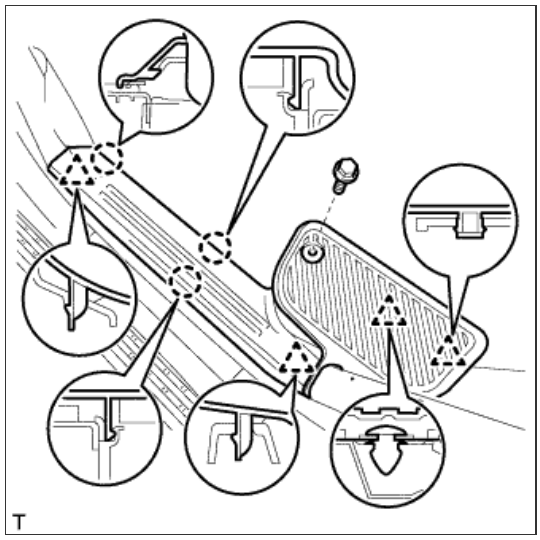
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }



6. INSTALL CENTER PILLAR GARNISH COVER

HINT:

- **for Manual Seat:**
  When installing the center pillar garnish cover, move the front seat and seatback to the foremost upright position.
- **for Power Seat:**
  When installing the center pillar garnish cover, connect the cable to the negative (-) battery terminal and operate the power seat switch to move the front seat and seatback to the foremost upright position.
- **for Power Seat:**
  After moving the front seat, disconnect the cable from the negative (-) battery terminal.

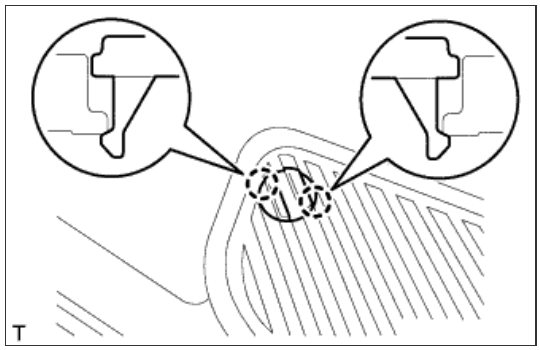


a. Attach the 2 clips and 2 guides to install the cover.

7. INSTALL REAR DOOR SCUFF PLATE

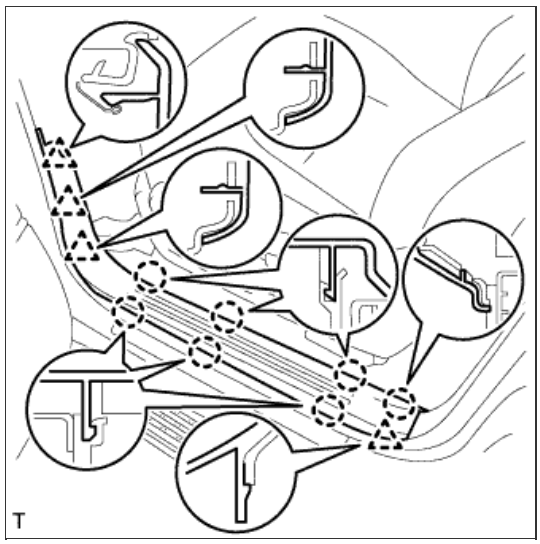
a. Attach the 3 claws and 4 clips to install the scuff plate.

b. Install the screw.



8. INSTALL REAR STEP COVER

HINT:



Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.

. INSTALL FRONT DOOR SCUFF PLATE

a. Attach the 7 claws and 4 clips to install the scuff plate.

10. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL

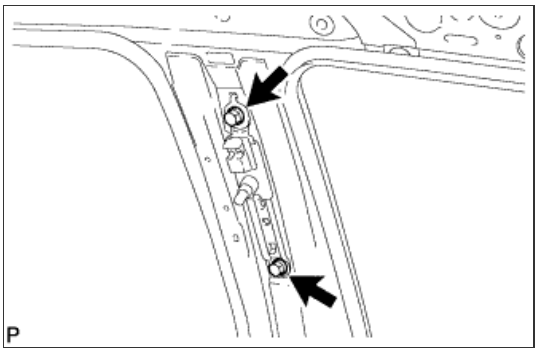
11. CHEC SRS ARNING LIGHT

a. Check the SRS warning light (Click here).

for Preparation Click here

HINT:

- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**
- **A bolt without a torque specification is shown in the standard bolt chart (Click here).**



1. INSTALL FRONT SHOULDER BELT ANCHOR ADJUSTER ASSEMBLY

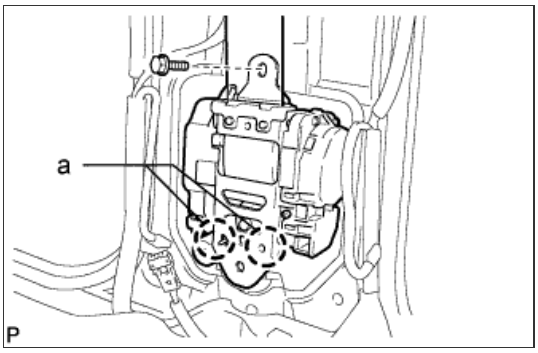
a. Align the adjuster positioning hole with the claw, and install the adjuster with the 2 bolts.

HINT:

First install the lower bolt, and then install the upper bolt.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

2. INSTALL FRONT SEAT OUTER BELT ASSEMBLY

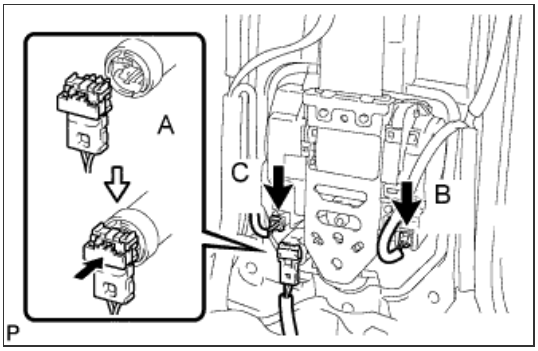


NOTICE:

When installing the retractor, make sure the claws of the vehicle (labeled "a" in the illustration) only contact the installation areas of the retractor.

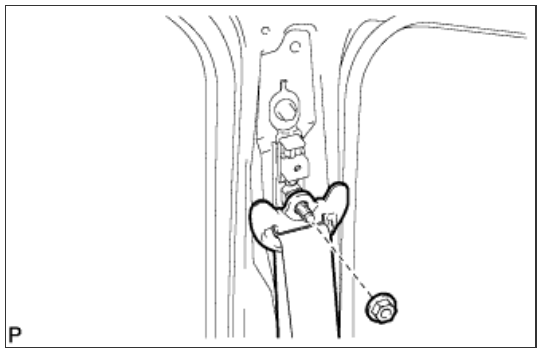
a. Align the claws of the vehicle with the seat belt retractor positioning holes.

b. Install the seat belt with the bolt.



Torque:
8.5 N*m{ 87 kgf*cm , 75 in.*lbf }

c. Connect the pretensioner connector labeled A as shown in the illustration.

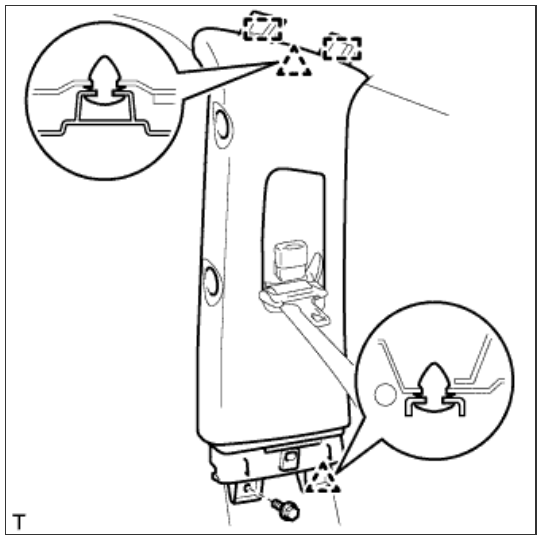


d. Connect the tension reducer connector labeled B.

e. w/ Pre-Crash Safety System:
Connect the pre-crash safety connector labeled C.

f. Install the shoulder anchor to the shoulder belt anchor adjuster with the nut.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

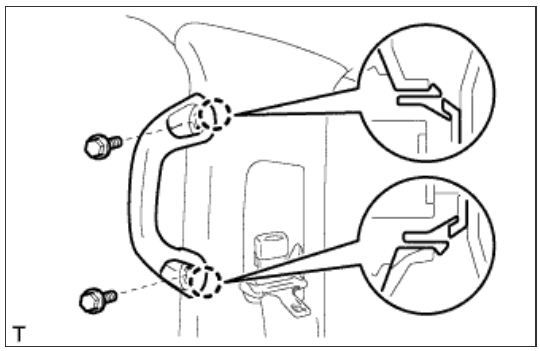


3. INSTALL CENTER PILLAR GARNISH LH

a. Pass the seat belt anchor through the center pillar garnish.

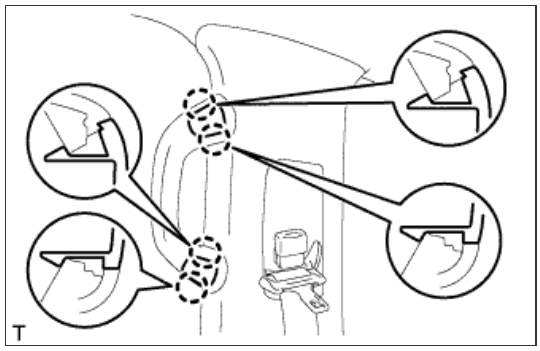
b. Attach the 2 clips and 2 guides to install the center pillar garnish.

c. Install the bolt.



4. INSTALL REAR ASSIST GRIP ASSEMBLY

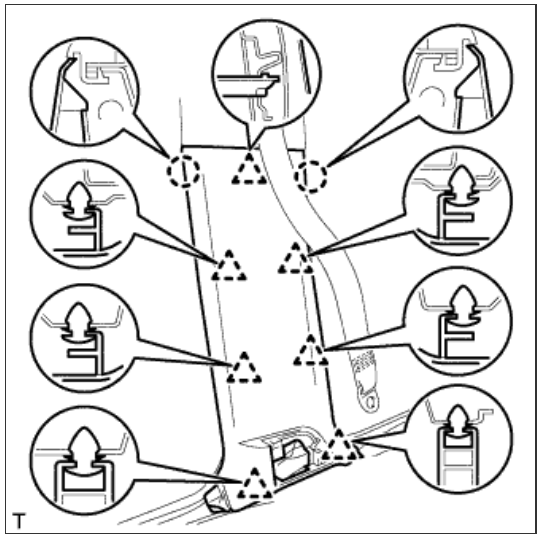
HINT:



Use the same procedure to install the rear assist grip on the other side.

a. Attach the 2 claws to install the rear assist grip.

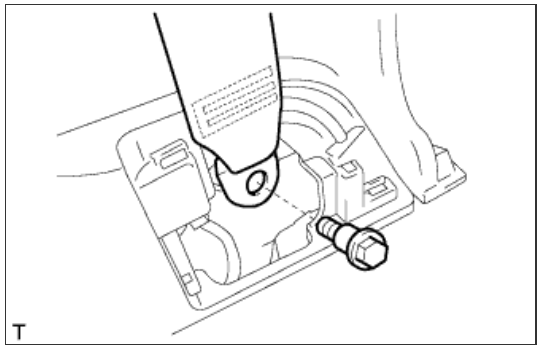
b. Install the 2 bolts.



c. Attach the 4 claws to install the 2 assist grip plugs.

5. INSTALL CENTER LO ER PILLAR GARNISH

HINT:

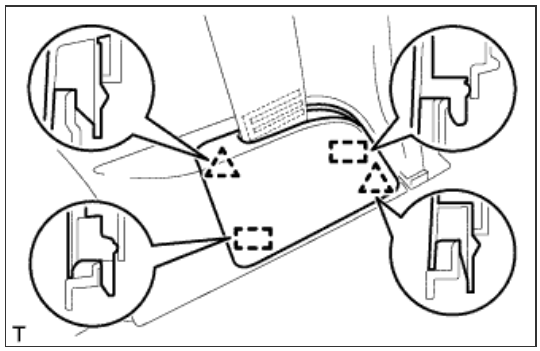


- **for Manual Seat:**
  When installing the center lower pillar garnish, move the front seat and seatback to the foremost upright position.
- **for Power Seat:**
  When installing the center pillar garnish cover, connect the cable to the negative (-) battery terminal and operate the power seat switch to move the front seat and seatback to the foremost upright position.
- **for Manual Seat:**
  After moving the front seat, disconnect the cable from the negative (-) battery terminal.

a. Attach the 2 claws and 7 clips to install the center lower pillar garnish.

b. Install the seat belt anchor with the bolt.

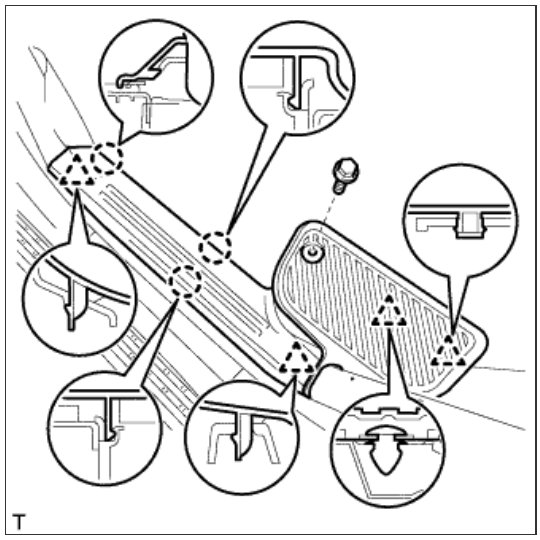
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }



6. INSTALL CENTER PILLAR GARNISH COVER

HINT:

- **for Manual Seat:**
  When installing the center pillar garnish cover, move the front seat and seatback to the foremost upright position.
- **for Power Seat:**
  When installing the center pillar garnish cover, connect the cable to the negative (-) battery terminal and operate the power seat switch to move the front seat and seatback to the foremost upright position.
- **for Power Seat:**
  After moving the front seat, disconnect the cable from the negative (-) battery terminal.

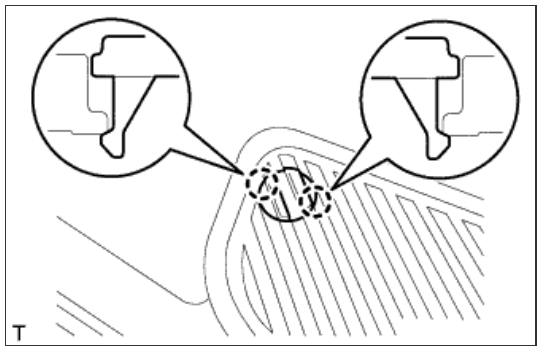


a. Attach the 2 clips and 2 guides to install the cover.

7. INSTALL REAR DOOR SCUFF PLATE

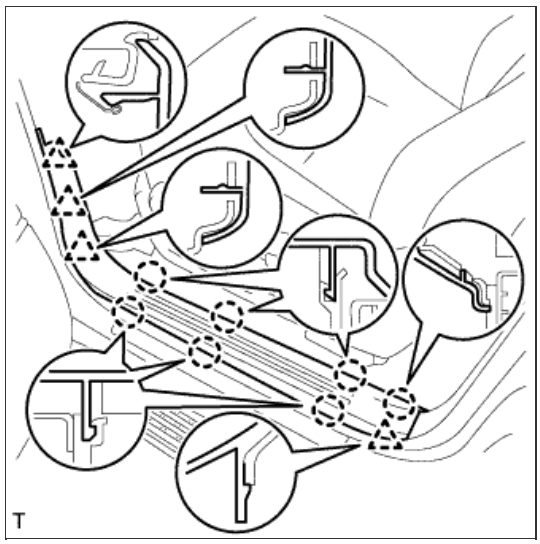
a. Attach the 3 claws and 4 clips to install the scuff plate.

b. Install the screw.



8. INSTALL REAR STEP COVER

HINT:



Use the same procedure to install the step cover on the other side.

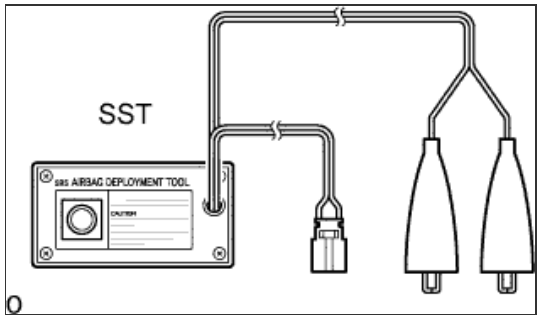
a. Attach the 2 claws to install the step cover.

. INSTALL FRONT DOOR SCUFF PLATE

a. Attach the 7 claws and 4 clips to install the scuff plate.

10. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL

11. CHEC SRS ARNING LIGHT



a. Check the SRS warning light (Click here).

for Preparation Click here

HINT:

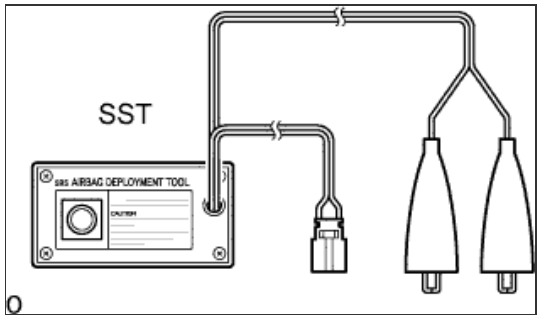
When scrapping vehicles equipped with a seat belt pretensioner or disposing of a front seat outer belt (with seat belt pretensioner), always first activate the seat belt pretensioner in accordance with the procedures described below. If any abnormality occurs during activation of the seat belt pretensioner, contact the SERVICE DEPART ENT of DISTRIBUTOR.

CAUTION:

- **Never dispose of a front seat outer belt that has an un-activated pretensioner.**
- **The seat belt pretensioner produces a loud, exploding sound when it activates. Perform the operation where it will not be a nuisance to nearby people.**
- **When activating a front seat outer belt (with seat belt pretensioner), stand at least 10 m (32.8 ft.) away from the front seat outer belt.**
- **Use gloves and safety glasses when handling a front seat outer belt with an activated pretensioner.**
- **Always wash your hands with water after completing the disposal.**
- **Do not apply water to a front seat outer belt that has an activated pretensioner.**
- **Perform procedures in a place away from electrical interference.**
- **When activating the seat belt pretensioner, always use the specified SST (SRS airbag deployment tool).**

1. DISPOSE OF FRONT SEAT OUTER BELT ASSEMBLY (WHEN INSTALLED IN VEHICLE)

HINT:

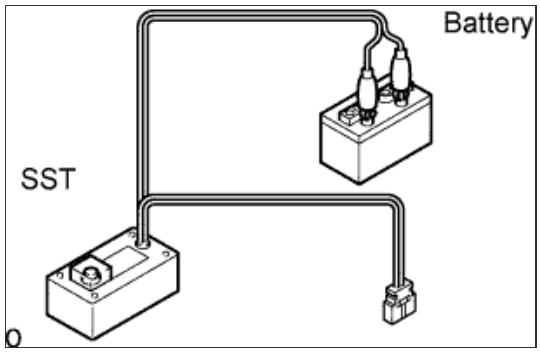


Prepare a battery to activate the seat belt pretensioner.

a. Check if SST is functioning properly.

SST
09082-00700

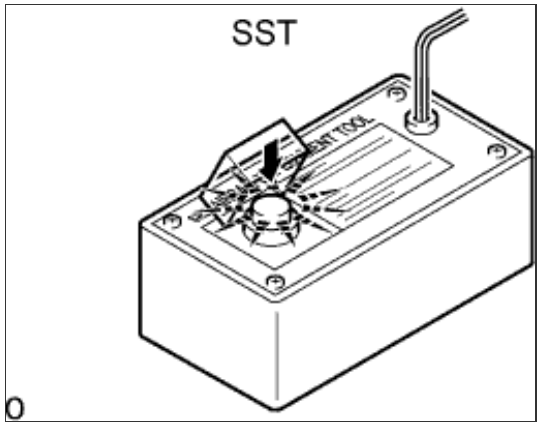
CAUTION:



When activating the seat belt pretensioner, always use the specified SST.

i. Connect the red clip of SST to the battery positive ( ) terminal and the black clip to the battery negative (-) terminal.

HINT:



Do not connect the yellow connector. The yellow connector is used to connect to the seat belt pretensioner.

ii. Press SST activation switch and check that the LED of SST activation switch illuminates.

CAUTION:

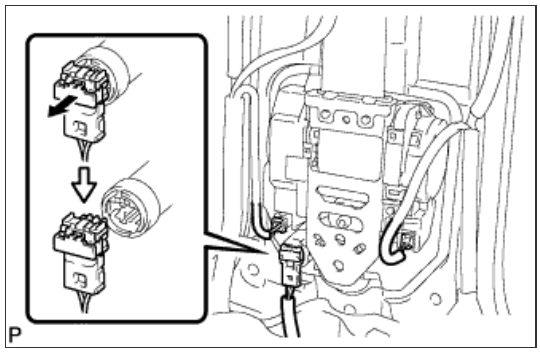
If the LED illuminates when the activation switch is not being pressed, SST may be malfunctioning. Replace SST with a new one.

b. Disconnect SST from the battery.

c. Disconnect the pretensioner connector.

i. Disconnect the cable from the negative (-) battery terminal.

ii. Remove the front door scuff plate (Click here).



iii. Remove the rear step cover (Click here).

iv. Remove the rear door scuff plate (Click here).

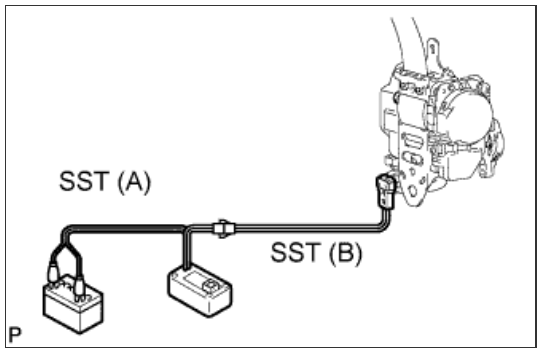
v. Remove the center pillar garnish cover (Click here).

vi. Remove the center lower pillar garnish (Click here).

vii. Disconnect the pretensioner connector as shown in the illustration.

d. Prepare SST for activation of the seat belt pretensioner.

i. Install the floor anchor of the seat belt.



ii. Connect SST (A) to SST (B). Then connect the connector of SST (B) to the seat belt pretensioner.

SST

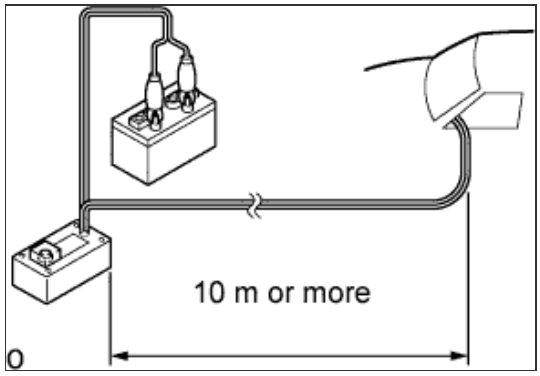
09082-00700
09082-00770

NOTICE:

To avoid damaging SST connector and wire harness, do not lock the secondary lock of the twin lock.

iii. ove SST at least 10 m (.8 ft.) away from the front of the vehicle.

iv. Close all the doors and windows of the vehicle.



HINT:

Leave a gap in one of the windows for inserting SST wire harness.

NOTICE:

Take care not to damage SST wire harness.

v. Connect the red clip of SST to the battery positive ( ) terminal and the black clip to the negative (-) terminal.

e. Activate the seat belt pretensioner.

i. Confirm that no one is inside the vehicle or within 10 m (.8 ft.) of the vehicle.

ii. Press SST activation switch to activate the seat belt pretensioner.

HINT:

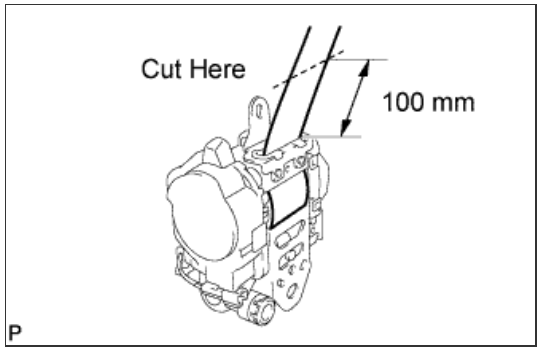
The seat belt pretensioner operates at the same time SST activation switch LED illuminates.

f. Dispose of the front seat outer belt (with the seat belt pretensioner).

CAUTION:

- **Do not touch the front seat outer belt for at least 30 minutes after the seat belt pretensioner has been activated. It is very hot.**
- **Use gloves and safety glasses when handling a front seat outer belt whose pretensioner has been activated.**
- **Always wash your hands with water after completing the disposal.**
- **Do not apply water to a front seat outer belt that has an activated pretensioner.**

HINT:



When scrapping a vehicle, activate the seat belt pretensioner, and then scrap the vehicle with the activated front seat outer belt installed.

2. DISPOSE OF FRONT SEAT OUTER BELT ASSEMBLY (WHEN NOT INSTALLED IN VEHICLE)

NOTICE:

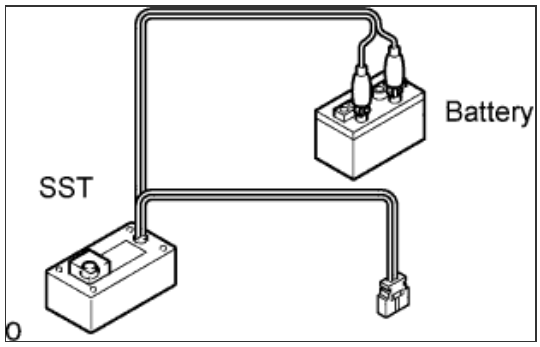
Be sure to follow the procedures listed below when activating the seat belt pretensioner.

a. Remove the front seat outer belt.

i. Wind the seat belt with the retractor.

ii. When the seat belt is sufficiently wound, cut the seat belt appro imately 100 mm (0. in.) from the retractor as shown in the illustration.

HINT:



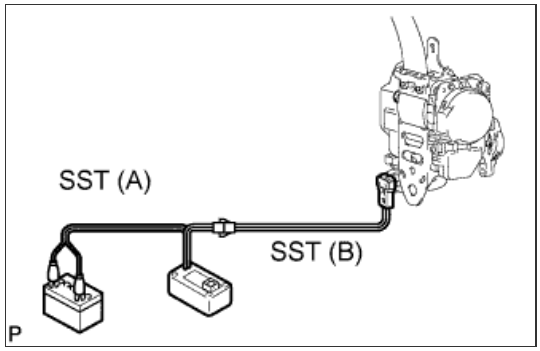
The seat belt is designed so that winding the seat belt before pretensioner activation will decrease the pulling power of the seat belt during pretensioner activation.

b. Check if SST is functioning properly.

SST
09082-00700
09082-00770

CAUTION:

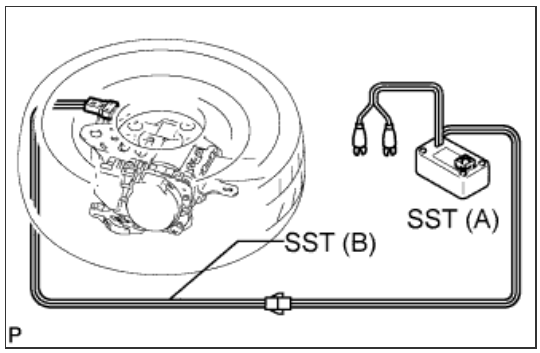
When activating a seat belt pretensioner, always use the specified SST.



c. Prepare SST for activation of the seat belt pretensioner.

i. Connect SST (A) to SST (B). Then connect the connector of SST (B) to the seat belt pretensioner.

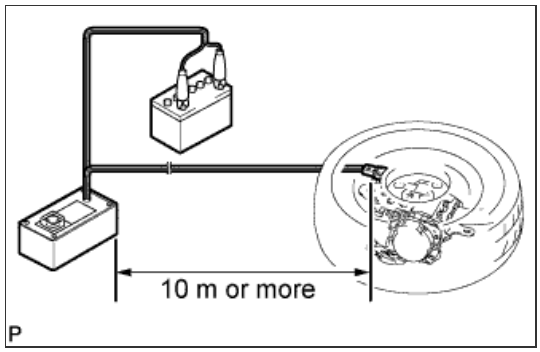
NOTICE:



To avoid damaging SST connector and wire harness, do not lock the secondary lock of the twin lock.

ii. Place the front seat outer belt on the ground and cover it with a tire (with wheel).

NOTICE:



Set up the front seat outer belt as shown in the illustration.

iii. ove SST at least 10 m (.8 ft.) away from the wheel.

NOTICE:

Take care not to damage SST wire harness.

d. Activate the seat belt pretensioner.

i. Connect the red clip of SST to the battery positive ( ) terminal and the black clip to the battery negative (-) terminal.

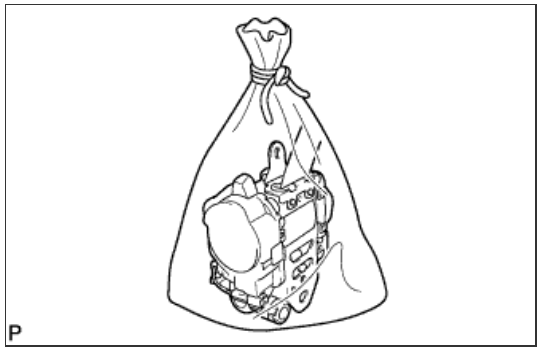
ii. Check that no one is within 10 m (.8 ft.) of the wheel.

iii. Press SST activation switch to activate the seat belt pretensioner.

HINT:

The seat belt pretensioner operates at the same time SST activation switch LED illuminates.

e. Dispose of the front seat outer belt (with the seat belt pretensioner).



CAUTION:

- **Do not touch the front seat outer belt for at least 30 minutes after the seat belt pretensioner has been activated. It is very hot.**
- **Use gloves and safety glasses when handling a front seat outer belt whose pretensioner has been activated.**
- **Always wash your hands with water after completing the disposal.**

- **Do not apply water to a front seat outer belt that has an activated pretensioner.**

i. Remove the tire (with wheel) and SST.

ii. Place the front seat outer belt in a plastic bag, tie the end tightly and dispose of it in the same way as other general parts.

HINT:

- **Use the same procedures for the LHD and RHD.**
- **The procedures listed below are for the LHD.**

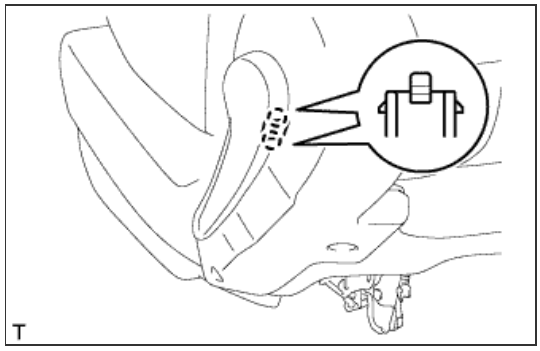
1. REMOVE REAR NO. 1 SEAT ASSEMBLY LH



a. Remove the rear No. 1 seat assembly (Click here).

2. REMOVE SEAT ADJUSTER BOLT COVER

a. Using a screwdriver, detach the 2 claws and remove the cover.

HINT:

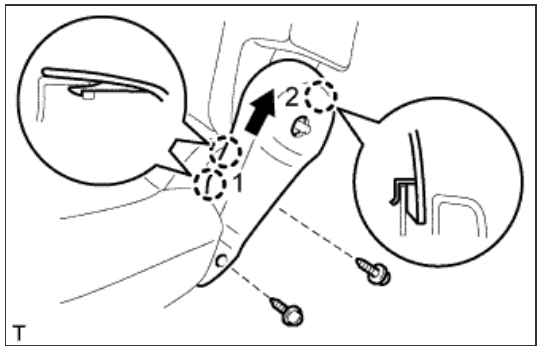
Tape the screwdriver tip before use.

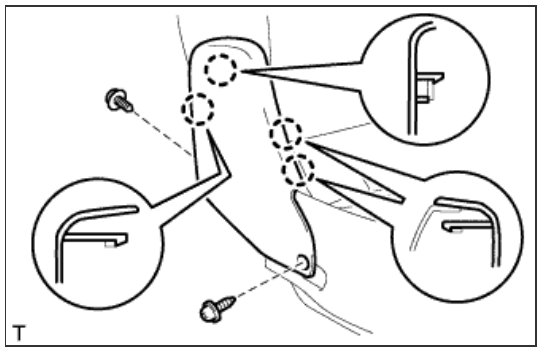
3. REMOVE RECLINING ADJUSTER RELEASE HANDLE LH



a. Remove the screw and release handle.

4. REMOVE REAR NO. 1 SEAT RECLINING COVER LH

a. Remove the 2 screws.

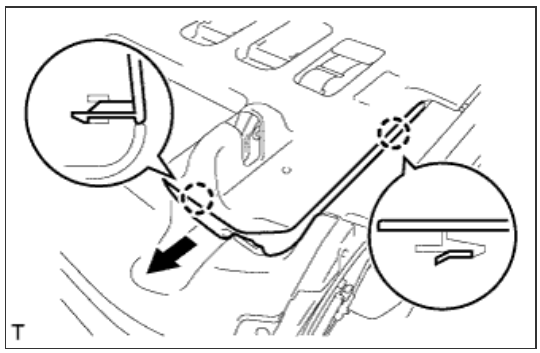


b. Detach the 3 claws in the order shown in the illustration, and then remove the cover.

5. REMOVE REAR NO. 1 SEAT RECLINING COVER RH

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.



6. REMOVE UPPER SEAT TRACK RAIL COVER LH

a. Using a screwdriver, detach the 2 claws and remove the cover.

HINT:

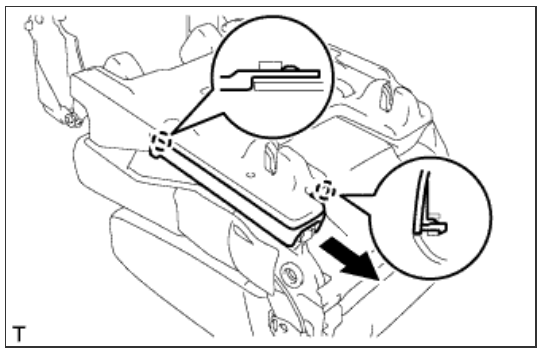
Tape the screwdriver tip before use.



7. REMOVE UPPER SEAT TRACK RAIL COVER RH

a. Using a screwdriver, detach the 2 claws and remove the cover.

HINT:

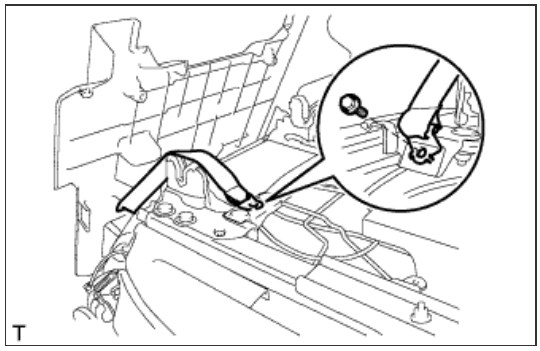
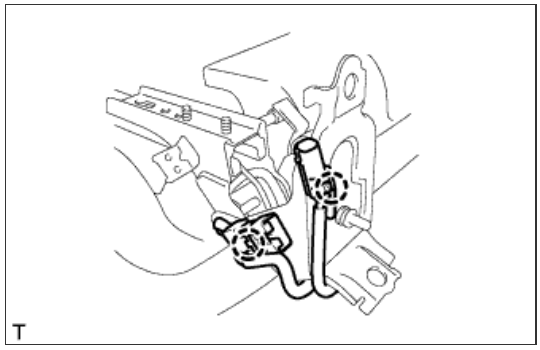
Tape the screwdriver tip before use.



8. REMOVE REAR NO. 2 SEAT LEG SIDE COVER

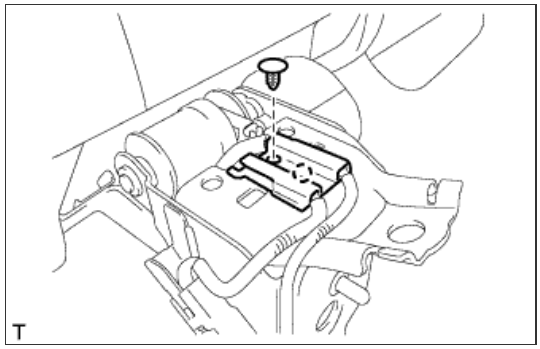
a. Remove the 4 screws and detach the 4 claws.



b. Remove the bolt that is securing the fold seat stopper band and remove the seat leg side cover together with the fold seat stopper band.

9. REMOVE REAR NO. 2 SEAT PROTECTOR

a. w/ Rear Seat Side Airbag:
Detach the claw and remove the wire harness connector.

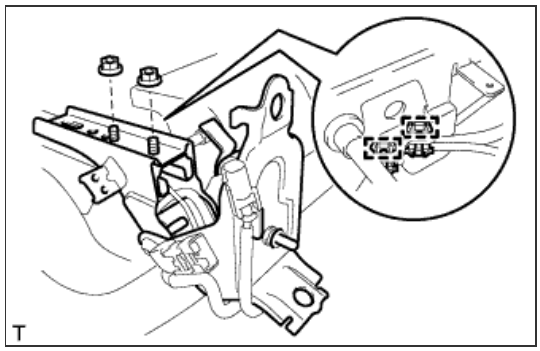


b. w/ Seat Heater System:
Detach the claw and remove the wire harness connector.

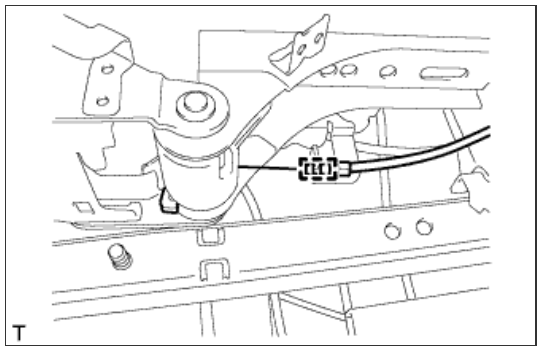
c. Using a clip remover, remove the clip.

d. Detach the claw and remove the seat protector from the seat hinge.

e. Detach the 2 claws, open the protector and remove wire harness.



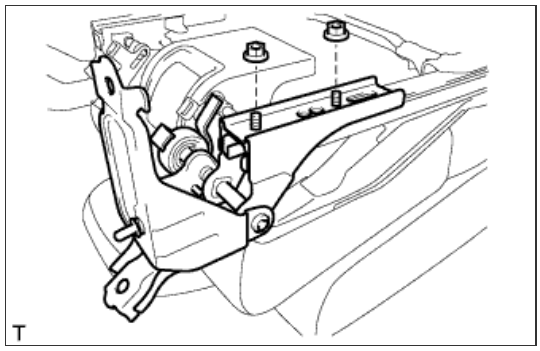
10. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH



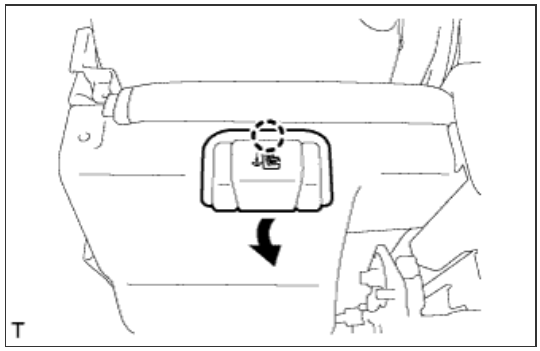
a. w/ Rear Seat Side Airbag:
Detach the wire harness clamp.

b. w/ Seat Heater System:
Detach the wire harness clamp.

c. Remove the 2 nuts and hinge.

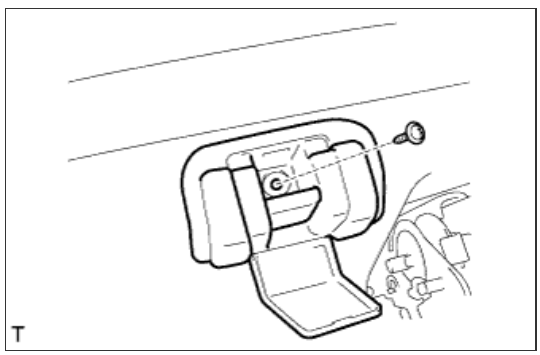


d. Detach the cable clamp and disconnect the cable.



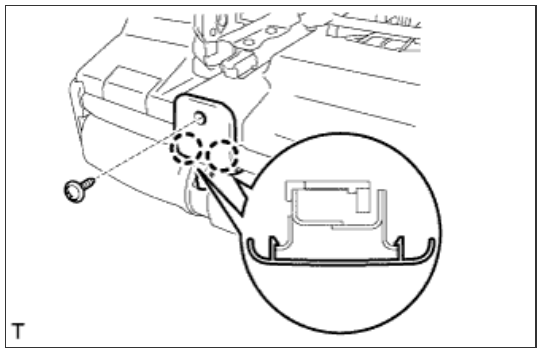
11. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH

a. Remove the 2 nuts and hinge.



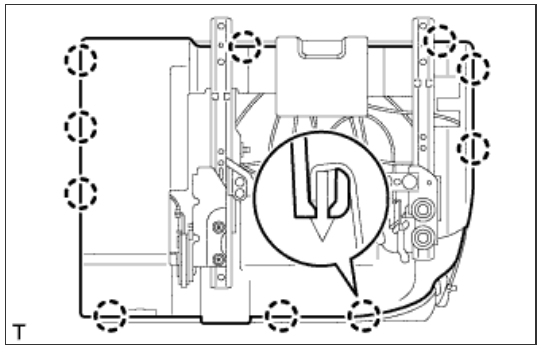
12. REMOVE SEAT BELT ANCHOR COVER CAP

a. Detach the claw and open the cap.



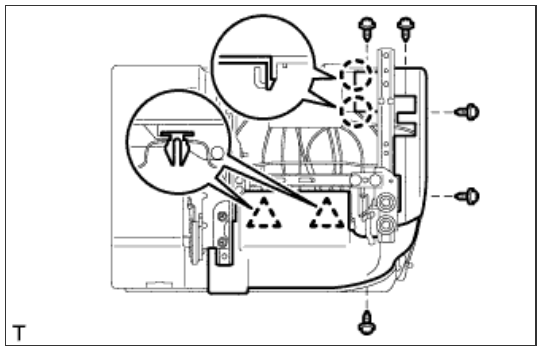
b. Remove the screw and anchor cover cap.

13. REMOVE REAR SEATBACK STAY COVER LH



a. Remove the screw.

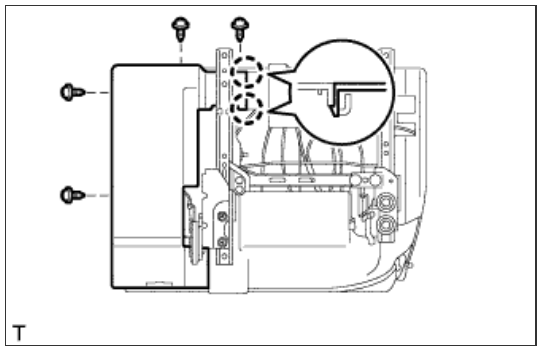
b. Detach the 2 claws and remove the cover.



14. REMOVE REAR UNDER SIDE COVER LH

a. Detach the 10 claws.

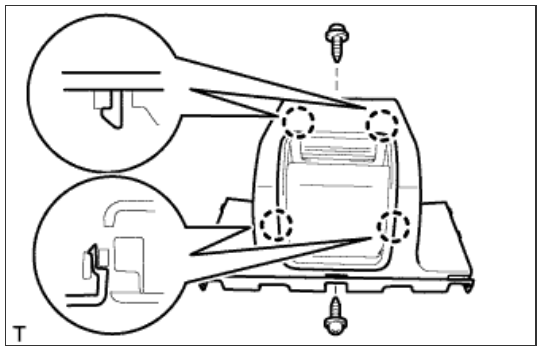
b. Remove the screws.



c. Detach the 2 clips and 2 claws, and remove the cover.

15. REMOVE REAR SEAT CUSHION COVER RH

a. Remove the 4 screws.

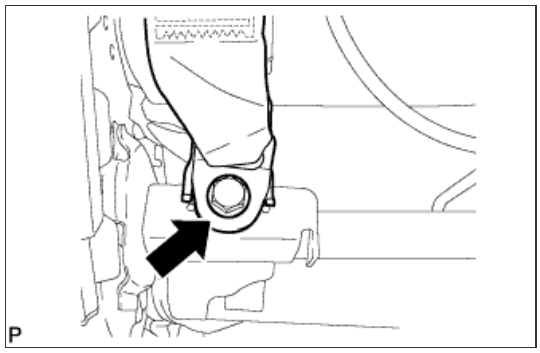


b. Detach the 2 claws and remove the cover.

16. REMOVE REAR SEAT UNDER TRAY LH COVER

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.



17. REMOVE REAR NO. 1 SEAT INNER BELT ASSEMBLY LH

a. Remove the bolt and belt.

HINT:

The No. 1 seat 3 point type belt anchor is fixed with the same bolt as the rear No. 1 seat inner belt LH. Therefore, it becomes disconnected when the bolt is removed.

18. DISCONNECT NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

a. Disconnect the belt anchor.

HINT:

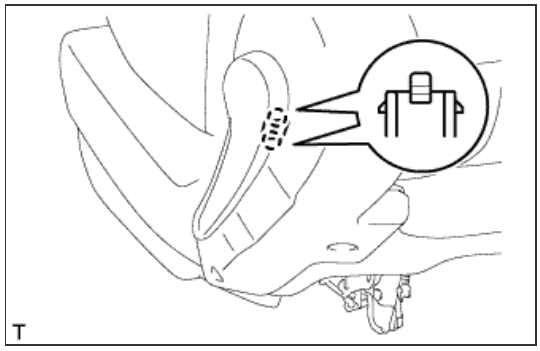
- **Use the same procedures for the LHD and RHD.**
- **The procedures listed below are for the LHD.**

1. REMOVE REAR NO. 1 SEAT ASSEMBLY LH



a. Remove the rear No. 1 seat assembly (Click here).

2. REMOVE SEAT ADJUSTER BOLT COVER

a. Using a screwdriver, detach the 2 claws and remove the cover.

HINT:

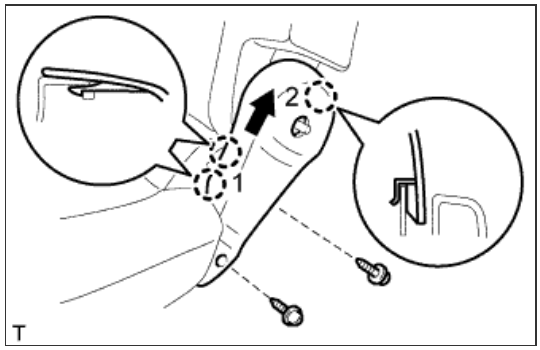
Tape the screwdriver tip before use.

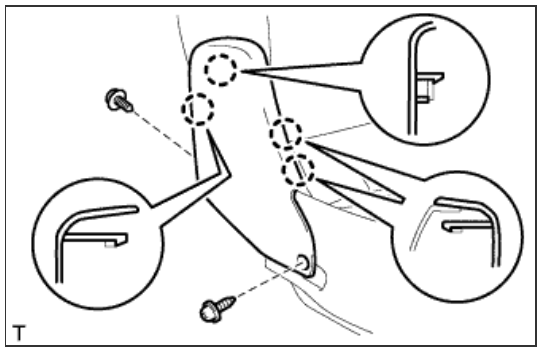
3. REMOVE RECLINING ADJUSTER RELEASE HANDLE LH



a. Remove the screw and release handle.

4. REMOVE REAR NO. 1 SEAT RECLINING COVER LH

a. Remove the 2 screws.

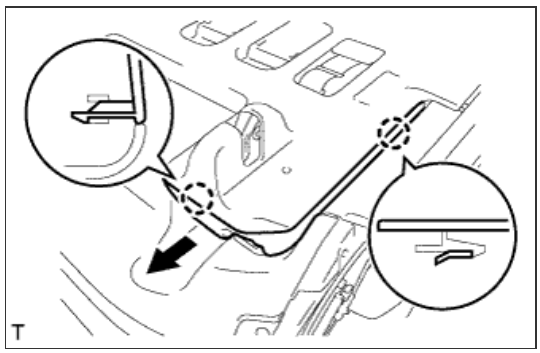


b. Detach the 3 claws in the order shown in the illustration, and then remove the cover.

5. REMOVE REAR NO. 1 SEAT RECLINING COVER RH

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.



6. REMOVE UPPER SEAT TRACK RAIL COVER LH

a. Using a screwdriver, detach the 2 claws and remove the cover.

HINT:

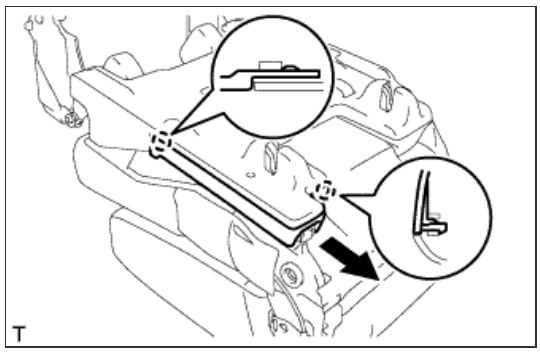
Tape the screwdriver tip before use.



7. REMOVE UPPER SEAT TRACK RAIL COVER RH

a. Using a screwdriver, detach the 2 claws and remove the cover.

HINT:

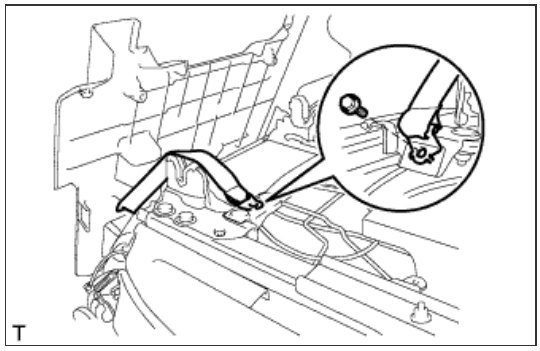
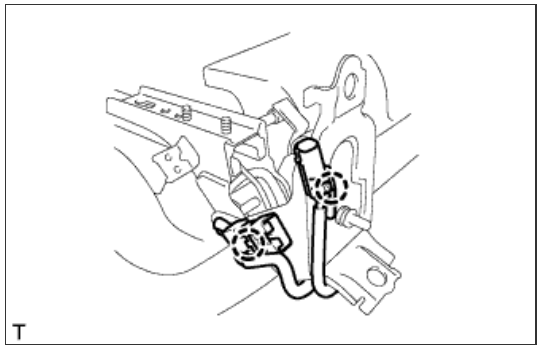
Tape the screwdriver tip before use.



8. REMOVE REAR NO. 2 SEAT LEG SIDE COVER

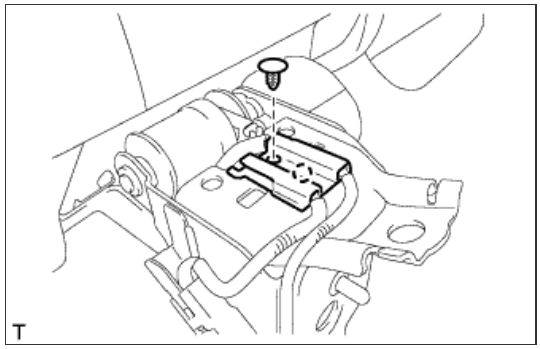
a. Remove the 4 screws and detach the 4 claws.



b. Remove the bolt that is securing the fold seat stopper band and remove the seat leg side cover together with the fold seat stopper band.

9. REMOVE REAR NO. 2 SEAT PROTECTOR

a. w/ Rear Seat Side Airbag:
Detach the claw and remove the wire harness connector.

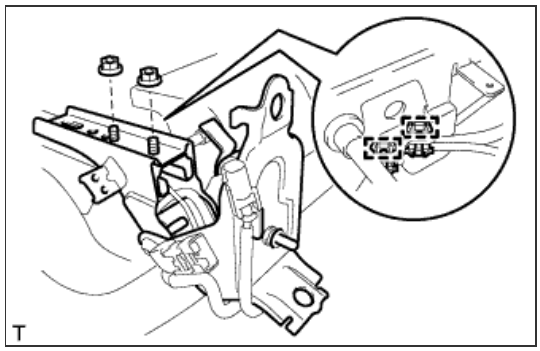


b. w/ Seat Heater System:
Detach the claw and remove the wire harness connector.

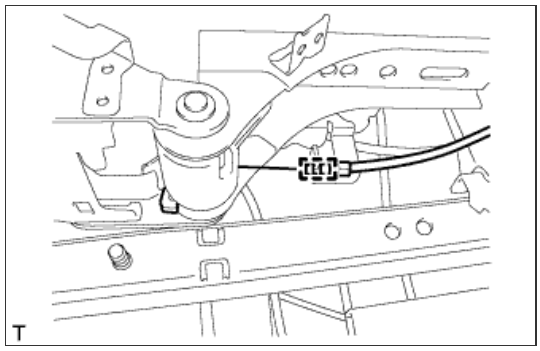
c. Using a clip remover, remove the clip.

d. Detach the claw and remove the seat protector from the seat hinge.

e. Detach the 2 claws, open the protector and remove wire harness.



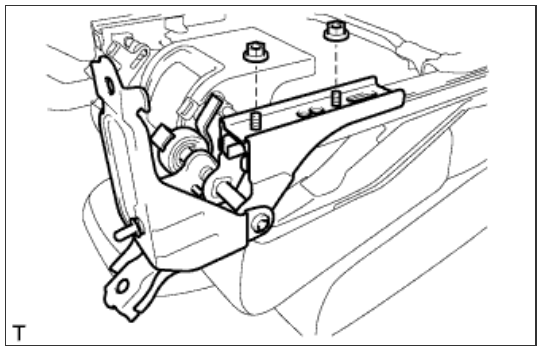
10. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH



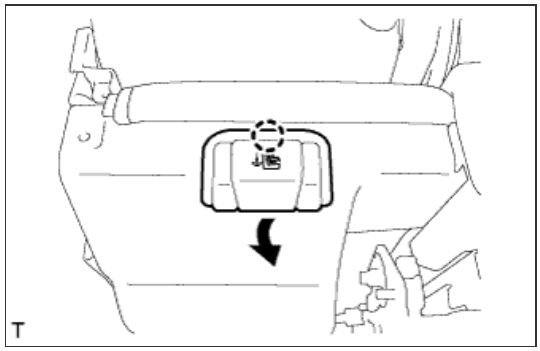
a. w/ Rear Seat Side Airbag:
Detach the wire harness clamp.

b. w/ Seat Heater System:
Detach the wire harness clamp.

c. Remove the 2 nuts and hinge.

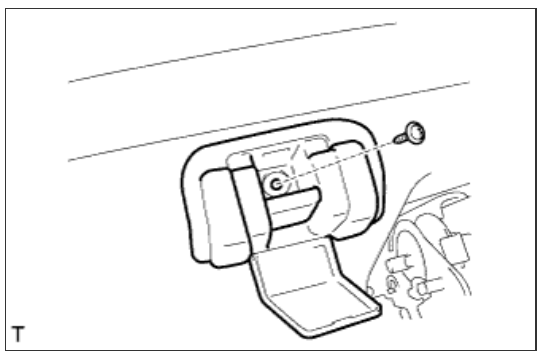


d. Detach the cable clamp and disconnect the cable.



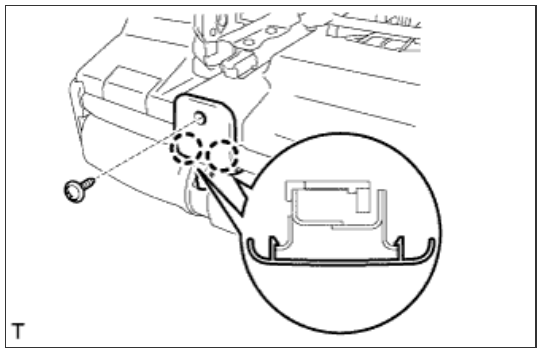
11. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH

a. Remove the 2 nuts and hinge.



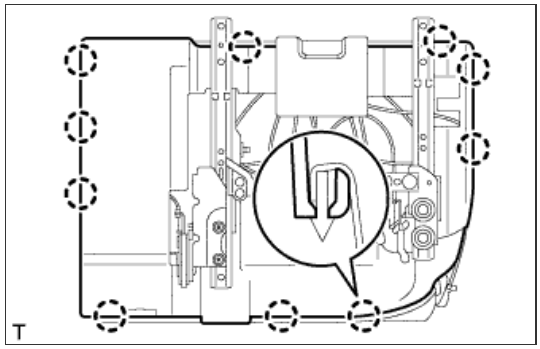
12. REMOVE SEAT BELT ANCHOR COVER CAP

a. Detach the claw and open the cap.



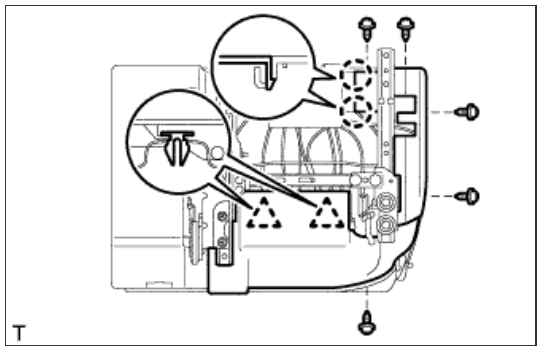
b. Remove the screw and anchor cover cap.

13. REMOVE REAR SEATBACK STAY COVER LH



a. Remove the screw.

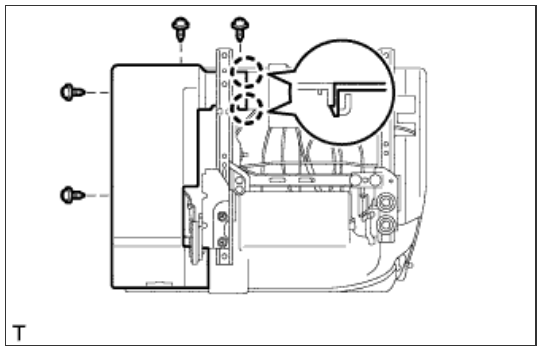
b. Detach the 2 claws and remove the cover.



14. REMOVE REAR UNDER SIDE COVER LH

a. Detach the 10 claws.

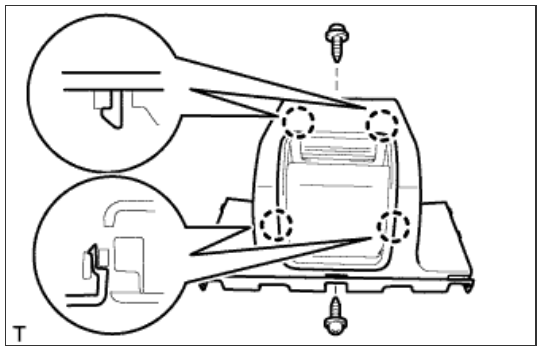
b. Remove the screws.



c. Detach the 2 clips and 2 claws, and remove the cover.

15. REMOVE REAR SEAT CUSHION COVER RH

a. Remove the 4 screws.

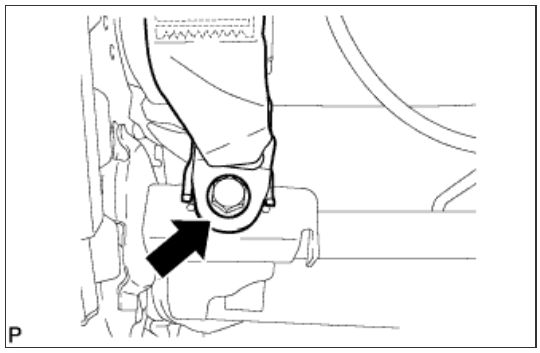


b. Detach the 2 claws and remove the cover.

16. REMOVE REAR SEAT UNDER TRAY LH COVER

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.



17. REMOVE REAR NO. 1 SEAT INNER BELT ASSEMBLY LH

a. Remove the bolt and belt.

HINT:

The No. 1 seat 3 point type belt anchor is fixed with the same bolt as the rear No. 1 seat inner belt LH. Therefore, it becomes disconnected when the bolt is removed.

18. DISCONNECT NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

a. Disconnect the belt anchor.

for Preparation Click here

HINT:

- **Use the same procedures for the LHD and RHD.**
- **The procedures listed below are for the LHD.**
- **A bolt without a torque specification is shown in the standard bolt chart (Click here).**

1. CONNECT NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

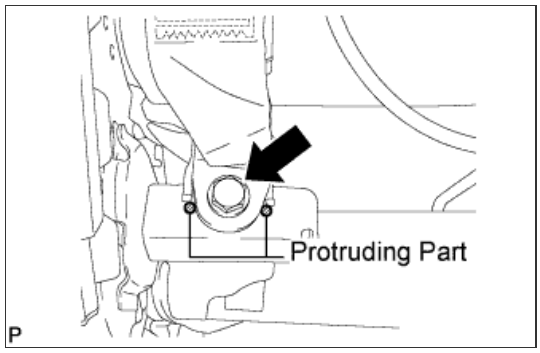
a. Connect the belt anchor.

NOTICE:

Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.

2. INSTALL REAR NO. 1 SEAT INNER BELT ASSEMBLY LH

a. Install the belt with the bolt.



Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.

HINT:

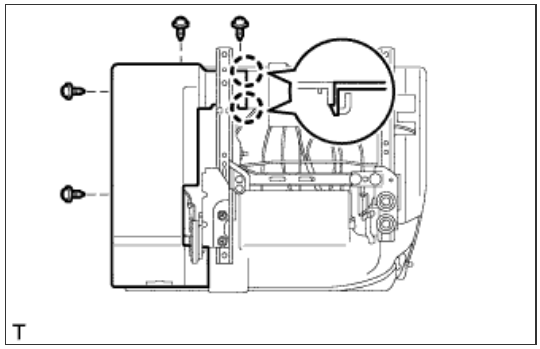
The No. 1 seat 3 point type belt anchor is fixed with the same bolt as the rear No. 1 seat inner belt LH. Therefore, connect it when installing the rear No. 1 seat inner belt LH.

3. INSTALL REAR SEAT UNDER TRAY COVER LH

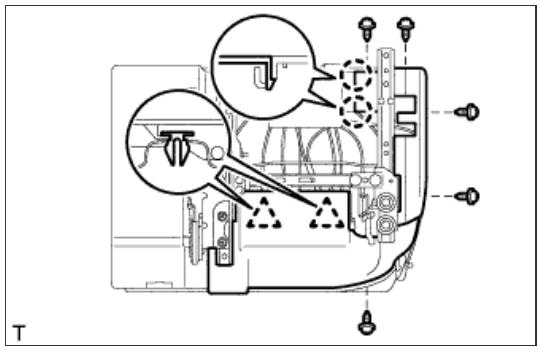
a. Attach the 4 claws to install the cover.



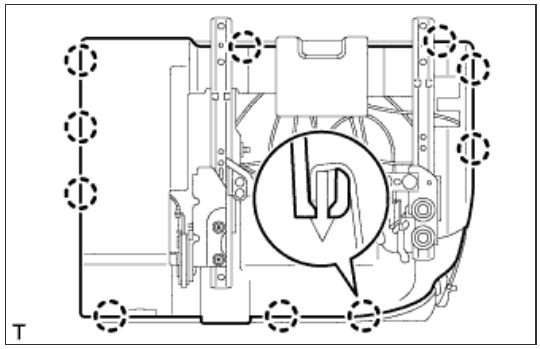
b. Install the 2 screws.

4. INSTALL REAR SEAT CUSHION COVER RH

a. Attach the 2 claws to install the cover.



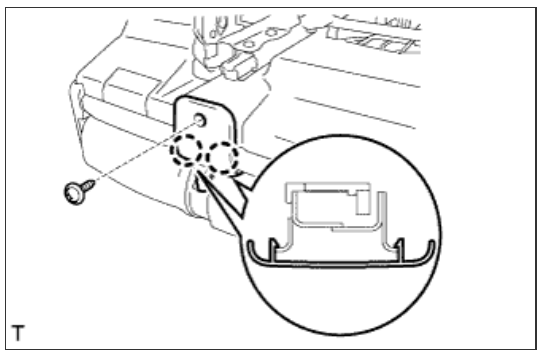
b. Install the 4 screws.



5. INSTALL REAR UNDER SIDE COVER LH

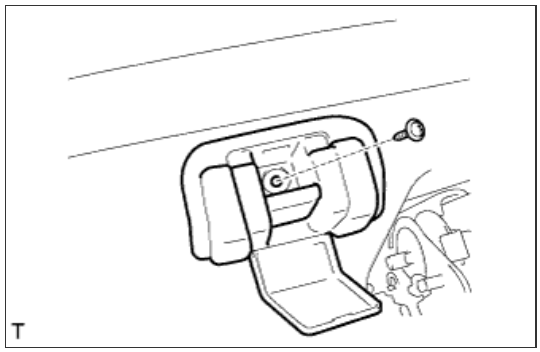
a. Attach the 2 claws and 2 clips to install the cover.

b. Install the 5 screws.



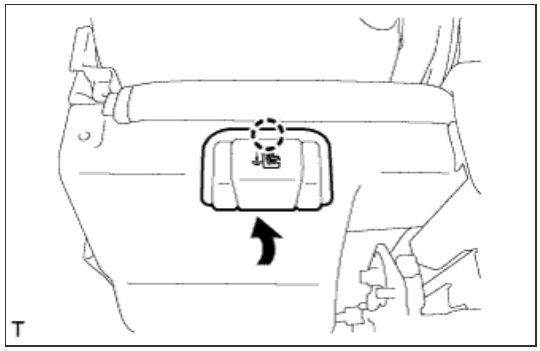
c. Attach the 10 claws.

6. INSTALL REAR SEATBAC STAY COVER LH



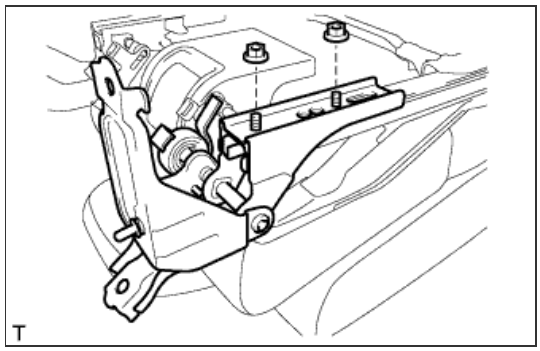
a. Attach the 2 claws to install the cover.

b. Install the screw.



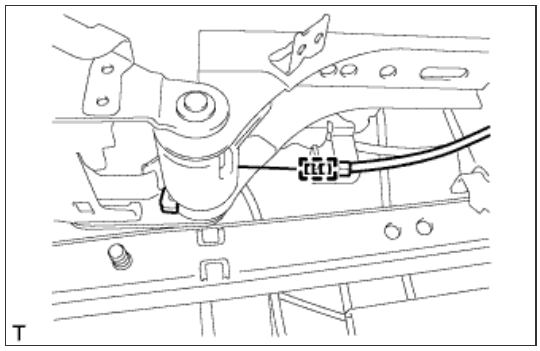
7. INSTALL SEAT BELT ANCHOR COVER CAP

a. Install the anchor cover cap with the screw.



b. Attach the claw to close the cap.

8. INSTALL REAR NO. 1 SEAT HIN E SUB-ASSEMBLY RH

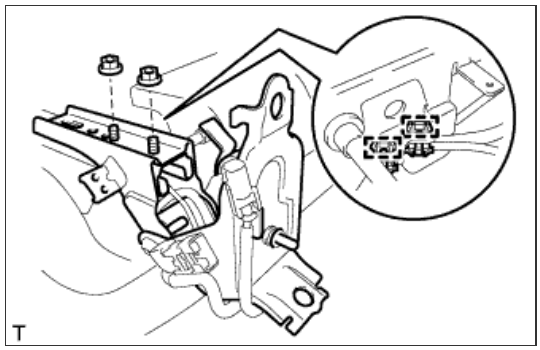


a. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

. INSTALL REAR NO. 1 SEAT HIN E SUB-ASSEMBLY LH

a. Attach the cable clamp to connect the cable.

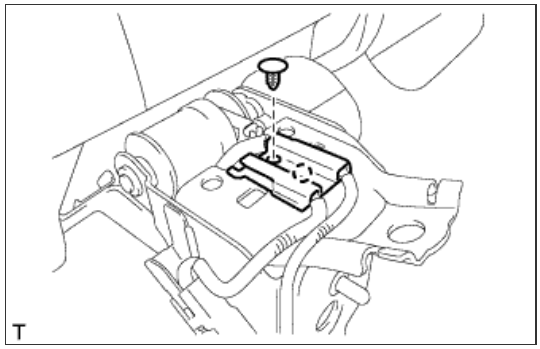


b. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

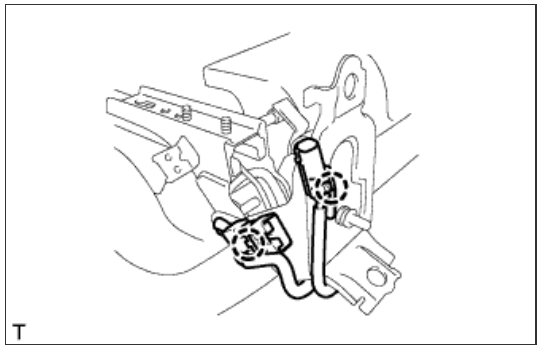
c. w/ Rear Seat Side Airbag:
Attach the wire harness clamp.

d. w/ Seat Heater System:
Attach the wire harness clamp.



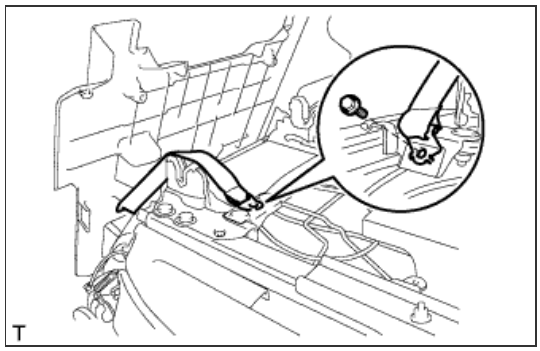
10. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Install the wire harness, and attach 2 claws to close the protector.



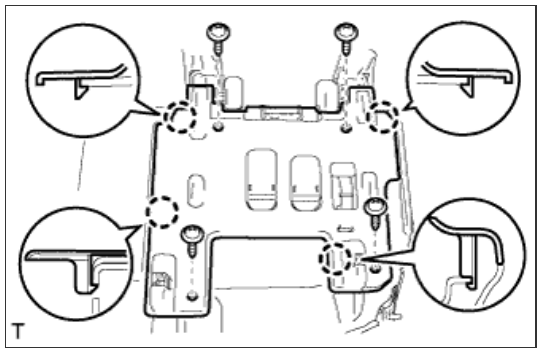
b. Attach the claw to install the protector to the seat hinge.

c. Install the clip.



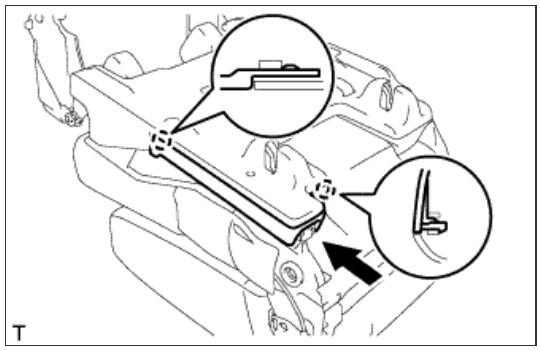
d. w/ Rear Seat Side Airbag:
Attach the claw to install the wire harness connector.

e. w/ Seat Heater System:
Attach the claw to install the wire harness connector.



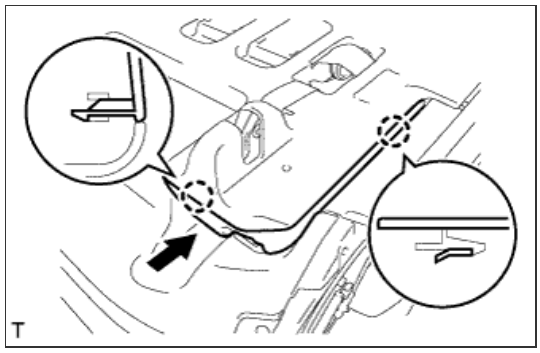
11. INSTALL REAR NO. 2 SEAT LE SIDE COVER

a. Pass the fold seat stopper band through the seat leg side cover and attach it to the seat cushion frame with the bolt.



b. Attach the 4 claws to install the seat leg side cover.

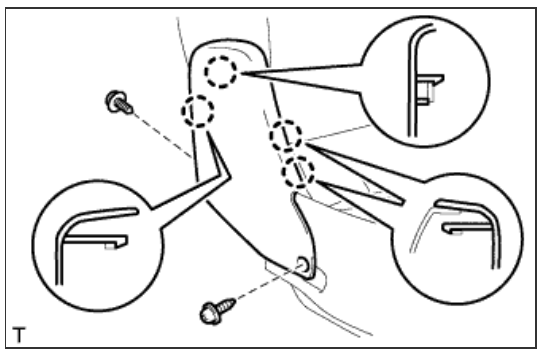
c. Install the 4 screws.



12. INSTALL UPPER SEAT TRAC RAIL COVER RH

a. Attach the 2 claws to install the cover.

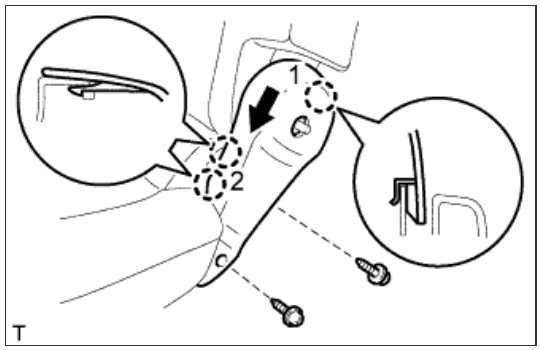
13. INSTALL UPPER SEAT TRAC RAIL COVER LH



a. Attach the 2 claws to install the cover.

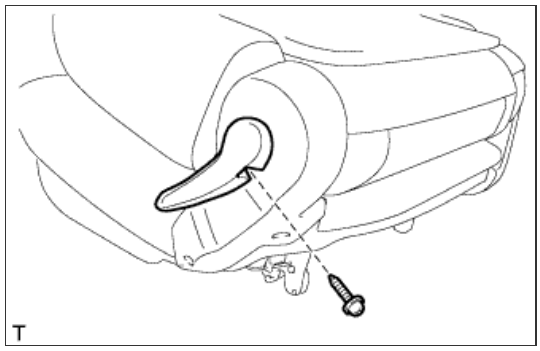
14. INSTALL REAR NO. 1 SEAT RECLININ COVER RH

a. Attach the 4 claws to install the cover.



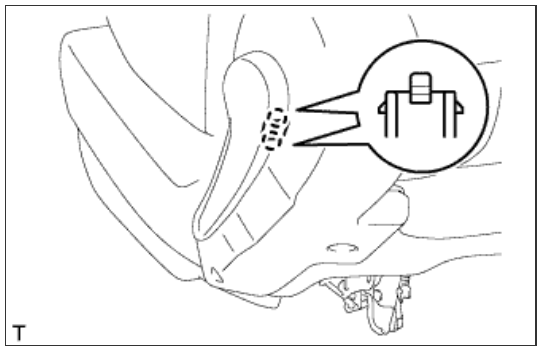
b. Install the 2 screws.

15. INSTALL REAR NO. 1 SEAT RECLININ COVER LH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

b. Install the 2 screws.



16. INSTALL RECLININ AD USTER RELEASE HANDLE LH

a. Install the release handle with the screw.

17. INSTALL SEAT AD USTER BOLT COVER

a. Attach the 2 claws to install the cover.

18. INSTALL REAR NO. 1 SEAT ASSEMBLY LH

a. Install the rear No. 1 seat assembly (Click here).

for Preparation Click here

HINT:

- **Use the same procedures for the LHD and RHD.**
- **The procedures listed below are for the LHD.**
- **A bolt without a torque specification is shown in the standard bolt chart (Click here).**

1. CONNECT NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

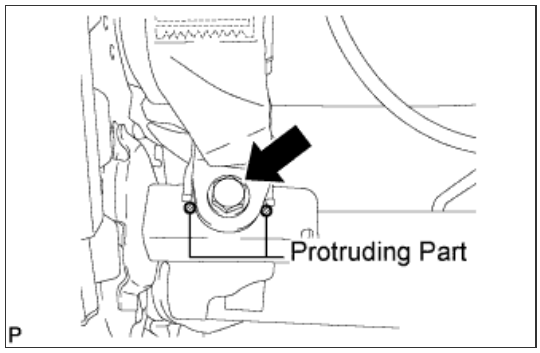
a. Connect the belt anchor.

NOTICE:

Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.

2. INSTALL REAR NO. 1 SEAT INNER BELT ASSEMBLY LH

a. Install the belt with the bolt.



Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.

HINT:

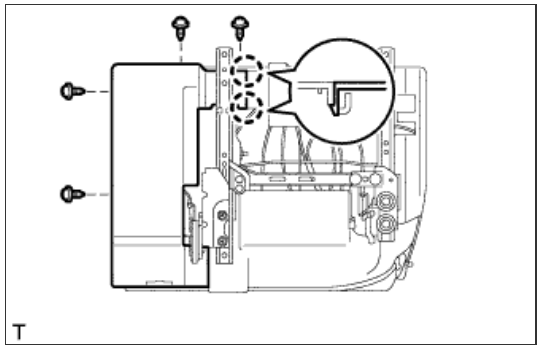
The No. 1 seat 3 point type belt anchor is fixed with the same bolt as the rear No. 1 seat inner belt LH. Therefore, connect it when installing the rear No. 1 seat inner belt LH.

3. INSTALL REAR SEAT UNDER TRAY COVER LH

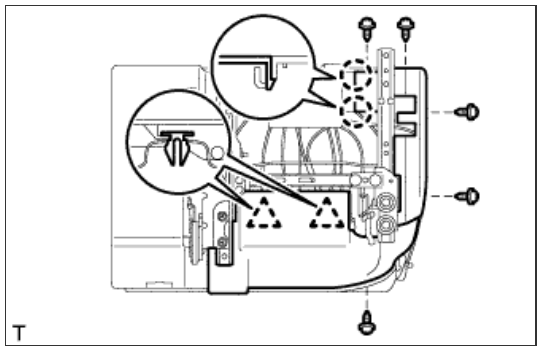
a. Attach the 4 claws to install the cover.



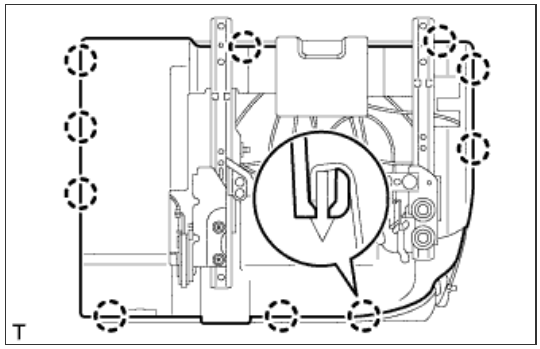
b. Install the 2 screws.

4. INSTALL REAR SEAT CUSHION COVER RH

a. Attach the 2 claws to install the cover.



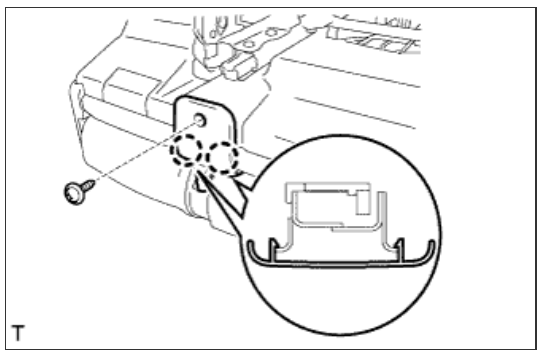
b. Install the 4 screws.



5. INSTALL REAR UNDER SIDE COVER LH

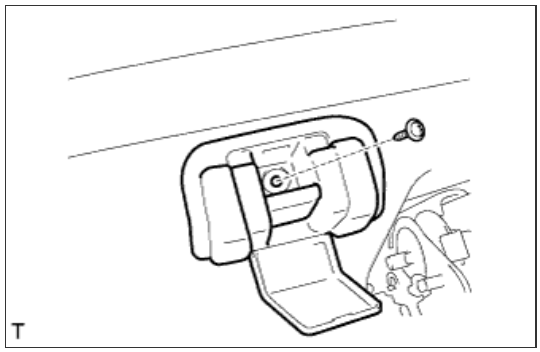
a. Attach the 2 claws and 2 clips to install the cover.

b. Install the 5 screws.



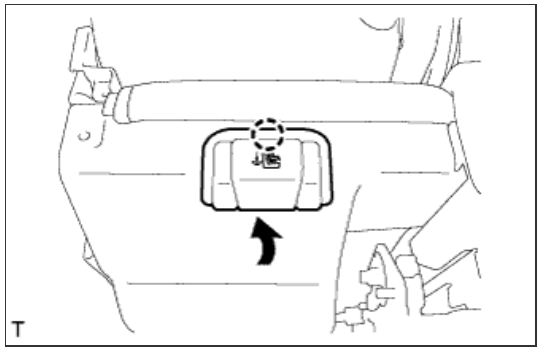
c. Attach the 10 claws.

6. INSTALL REAR SEATBAC STAY COVER LH



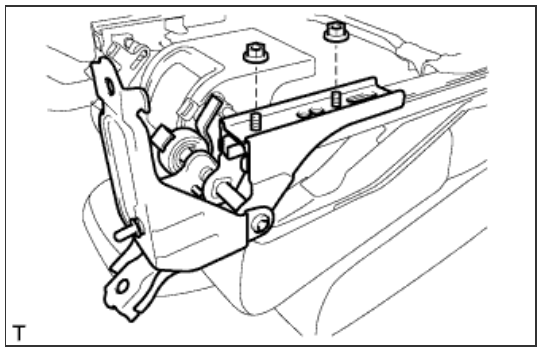
a. Attach the 2 claws to install the cover.

b. Install the screw.



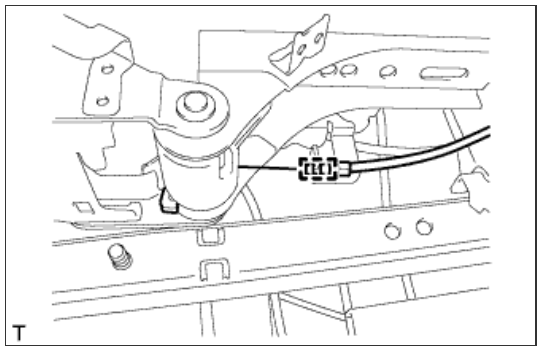
7. INSTALL SEAT BELT ANCHOR COVER CAP

a. Install the anchor cover cap with the screw.



b. Attach the claw to close the cap.

8. INSTALL REAR NO. 1 SEAT HIN E SUB-ASSEMBLY RH

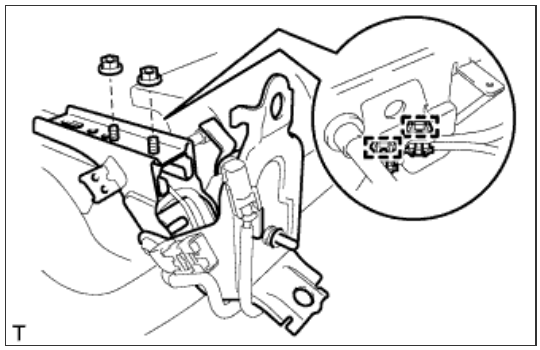


a. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

. INSTALL REAR NO. 1 SEAT HIN E SUB-ASSEMBLY LH

a. Attach the cable clamp to connect the cable.

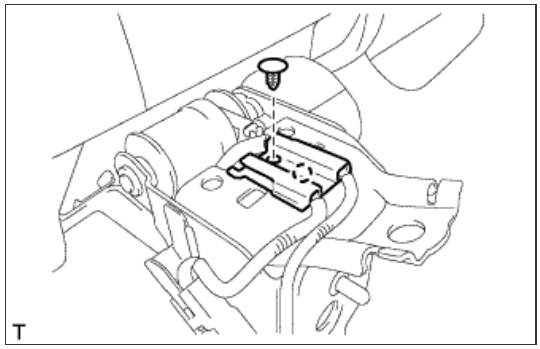


b. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

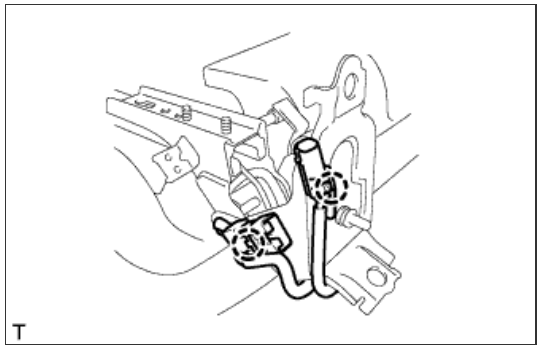
c. w/ Rear Seat Side Airbag:
Attach the wire harness clamp.

d. w/ Seat Heater System:
Attach the wire harness clamp.



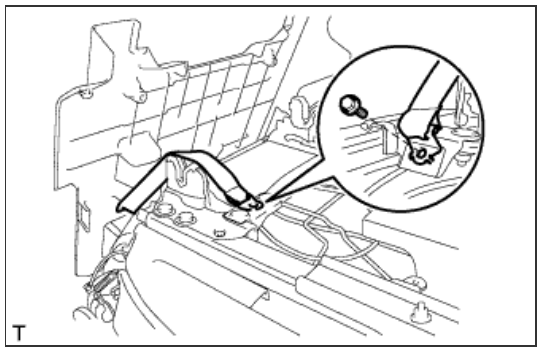
10. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Install the wire harness, and attach 2 claws to close the protector.



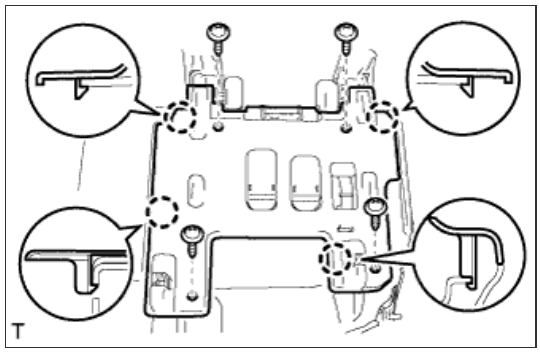
b. Attach the claw to install the protector to the seat hinge.

c. Install the clip.



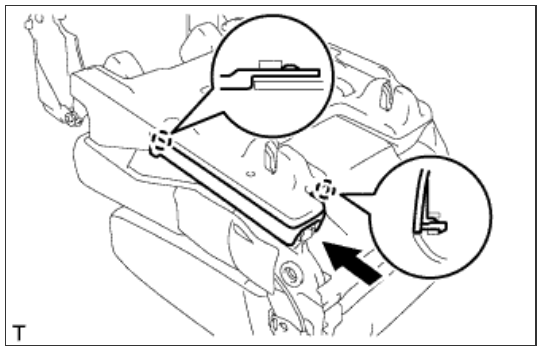
d. w/ Rear Seat Side Airbag:
Attach the claw to install the wire harness connector.

e. w/ Seat Heater System:
Attach the claw to install the wire harness connector.



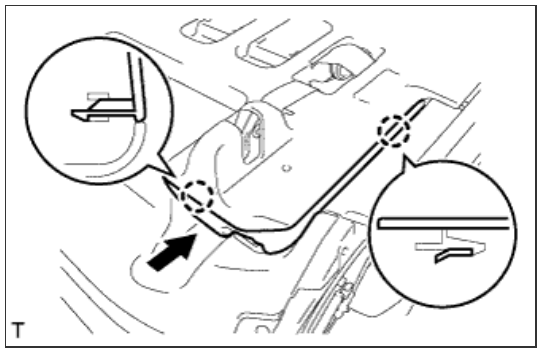
11. INSTALL REAR NO. 2 SEAT LE SIDE COVER

a. Pass the fold seat stopper band through the seat leg side cover and attach it to the seat cushion frame with the bolt.



b. Attach the 4 claws to install the seat leg side cover.

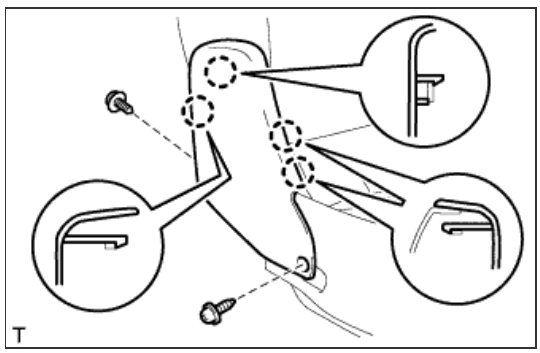
c. Install the 4 screws.



12. INSTALL UPPER SEAT TRAC RAIL COVER RH

a. Attach the 2 claws to install the cover.

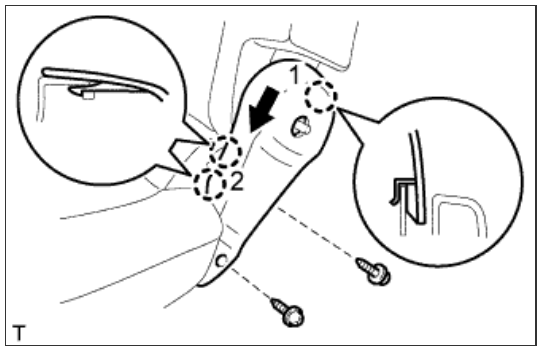
13. INSTALL UPPER SEAT TRAC RAIL COVER LH



a. Attach the 2 claws to install the cover.

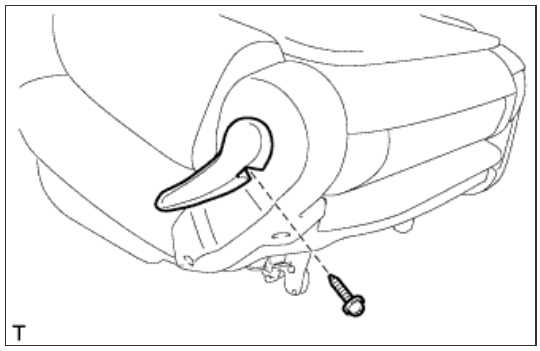
14. INSTALL REAR NO. 1 SEAT RECLININ COVER RH

a. Attach the 4 claws to install the cover.



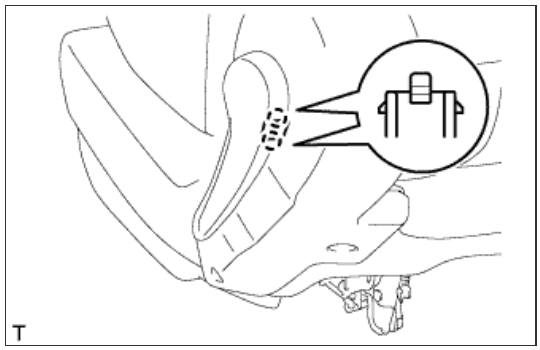
b. Install the 2 screws.

15. INSTALL REAR NO. 1 SEAT RECLININ COVER LH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

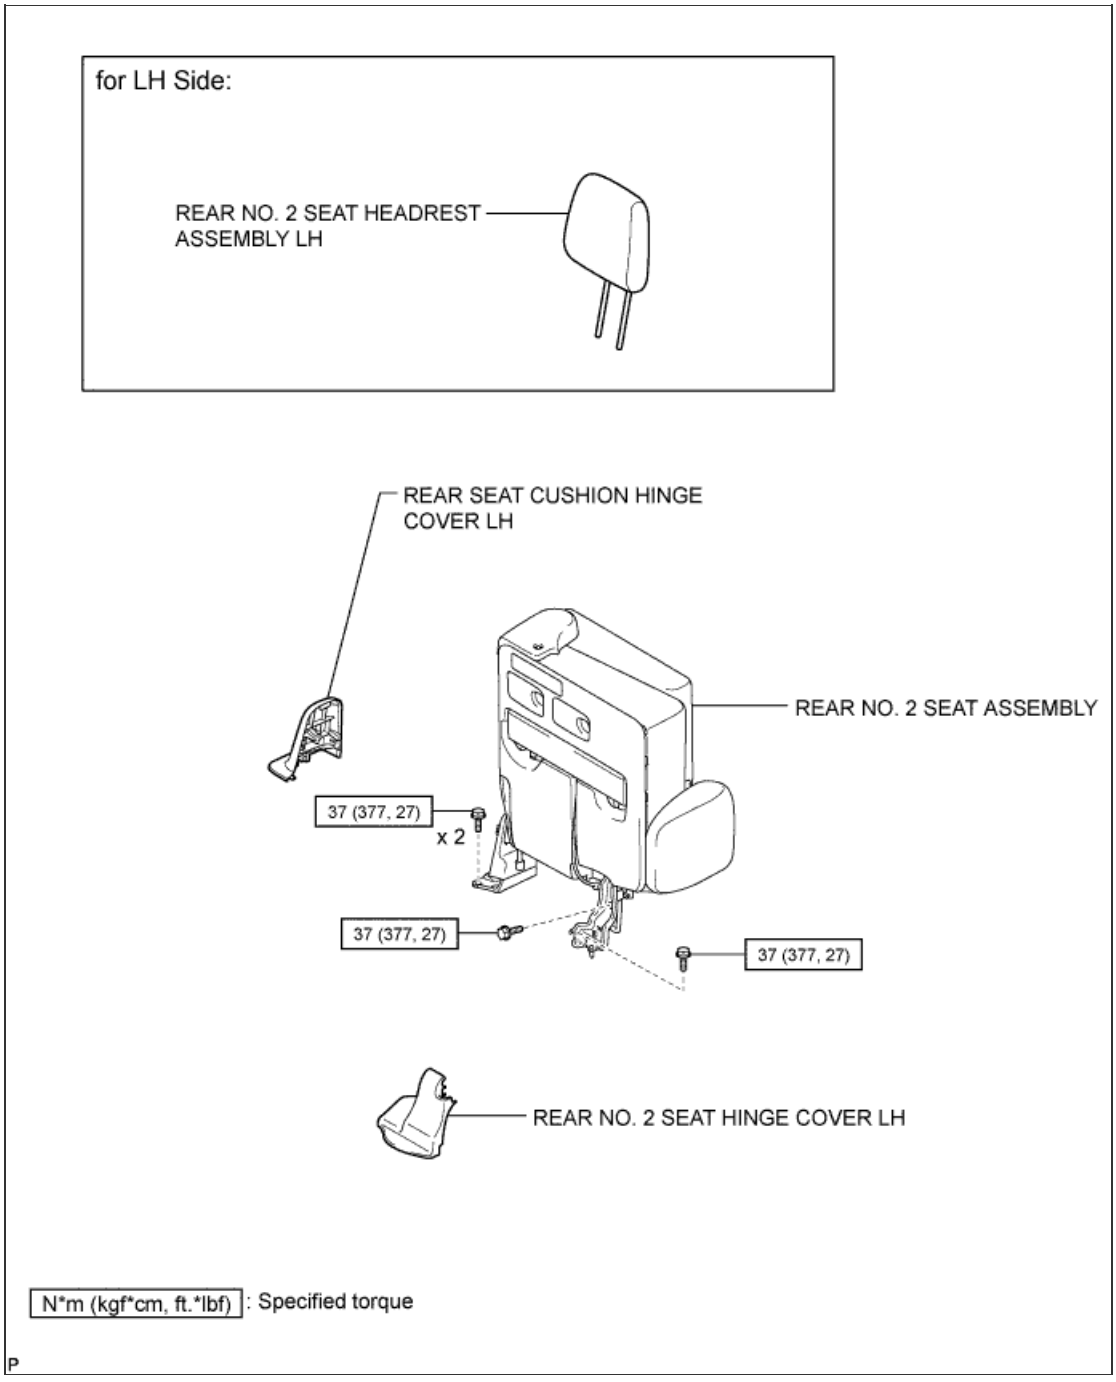
b. Install the 2 screws.



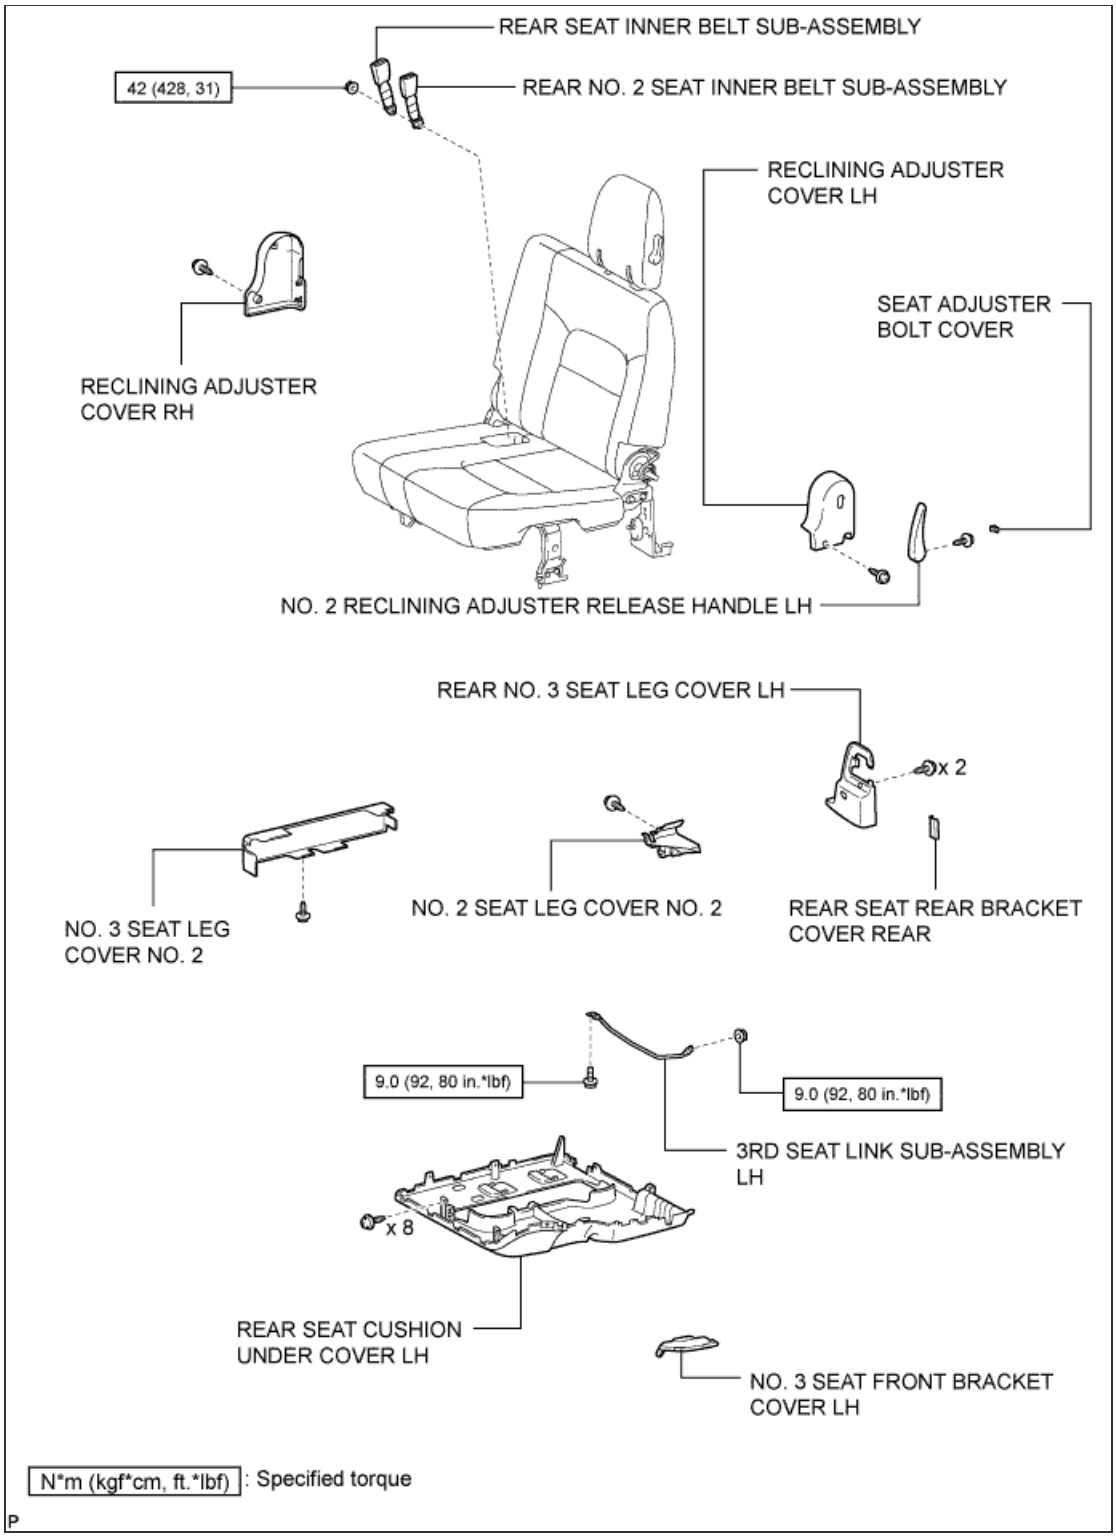
16. INSTALL RECLININ AD USTER RELEASE HANDLE LH

a. Install the release handle with the screw.

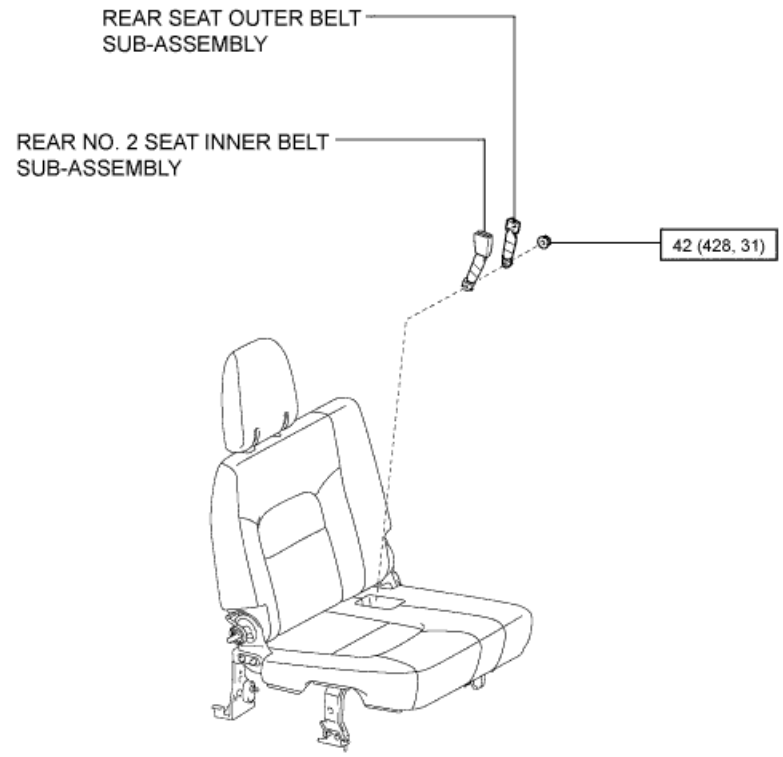
17. INSTALL SEAT AD USTER BOLT COVER



a. Attach the 2 claws to install the cover.



18. INSTALL REAR NO. 1 SEAT ASSEMBLY LH



a. Install the rear No. 1 seat assembly (Click here).

HINT:

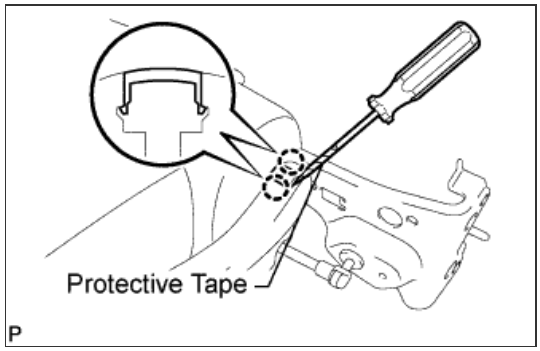
- **Use the same procedures for the RH side and LH side.**
- **The procedures listed below are for the LH side.**

1. REMOVE REAR NO. 2 SEAT ASSEMBLY LH



a. Remove the rear No. 2 seat assembly LH (Click here).

2. REMOVE SEAT ADJUSTER BOLT COVER

a. Using a screwdriver, detach the 2 claws and remove the cover.

HINT:

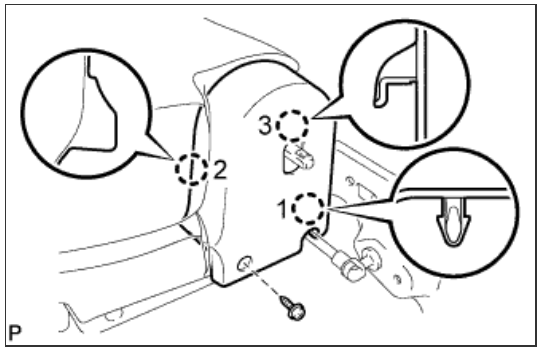
Tape the screwdriver tip before use.

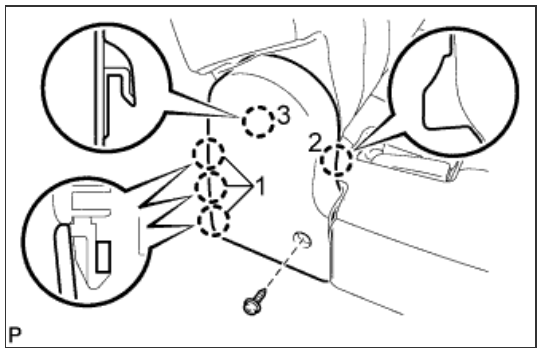
3. REMOVE NO. 2 RECLINING ADJUSTER RELEASE HANDLE LH



a. Remove the screw and release handle.

4. REMOVE RECLINING ADJUSTER COVER LH

a. Remove the screw.

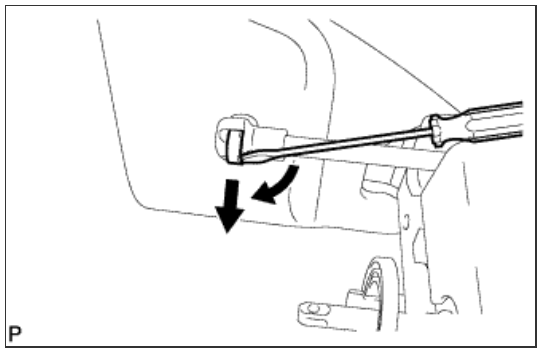


b. Detach the 3 claws in the order shown in the illustration, and then remove the cover.

5. REMOVE RECLINING ADJUSTER COVER RH

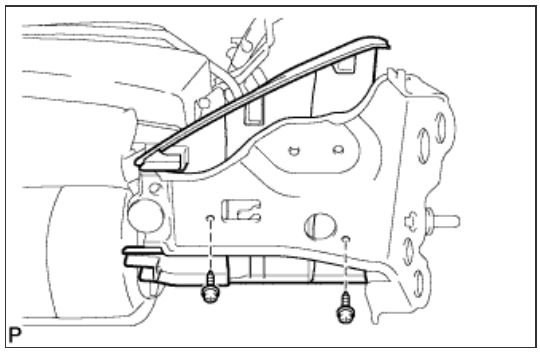
a. Remove the screw.

b. Detach the 5 claws in the order shown in the illustration, and then remove the cover.



6. REMOVE REAR SEAT REAR BRACKET COVER REAR

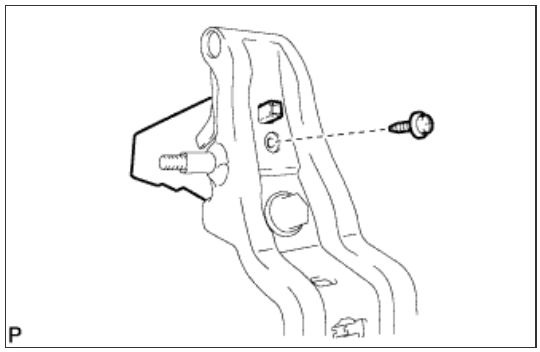
a. Detach the 2 claws and cover.



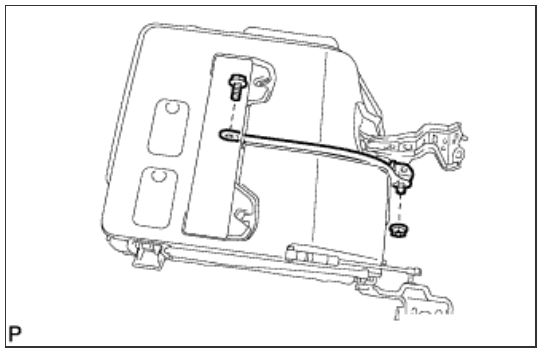
7. REMOVE REAR NO. 3 SEAT LEG COVER LH

a. Using a screwdriver, remove the spring of the seat stay ball-joint.

b. Disconnect the seat stay.

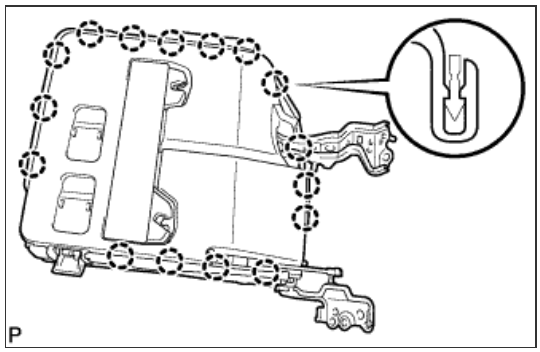


c. Remove the 2 screws and cover.



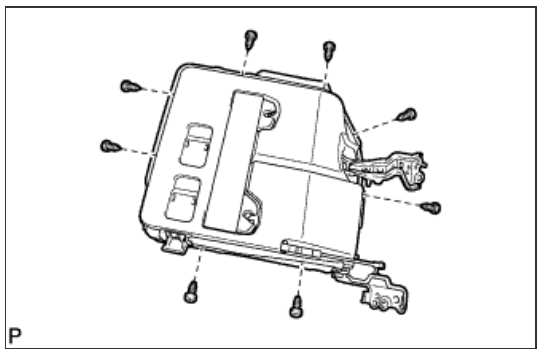
8. REMOVE NO. 2 SEAT LEG COVER NO. 2

a. Remove the screw and seat leg cover.



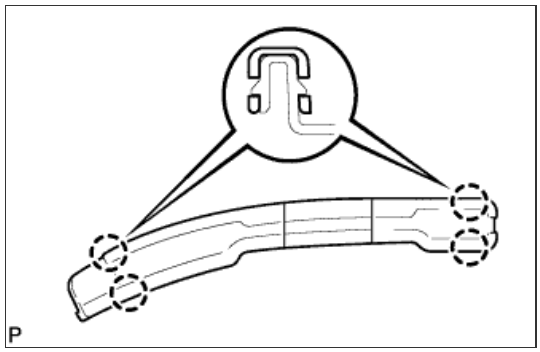
9. REMOVE 3RD SEAT LINK SUB-ASSEMBLY LH

a. Remove the bolt, nut and seat link.



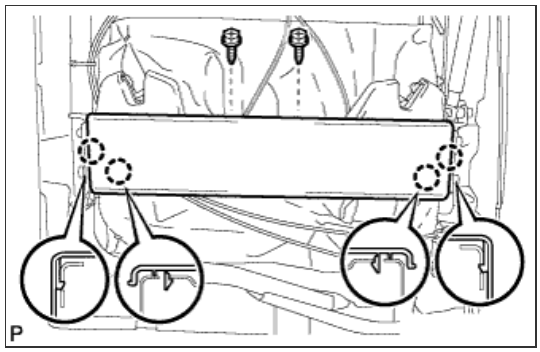
10. REMOVE REAR SEAT CUSHION UNDER COVER LH

a. Detach the 16 claws.



b. Remove the screws and cover.

11. REMOVE NO. 3 SEAT FRONT BRACKET COVER LH

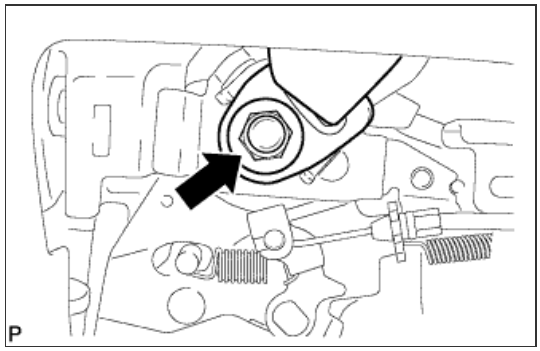


a. Detach the 4 claws and remove the cover.

12. REMOVE NO. 3 SEAT LEG COVER NO. 2

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.



13. REMOVE REAR SEAT INNER BELT SUB-ASSEMBLY (for LH Side)

a. Remove the nut and belt.

HINT:

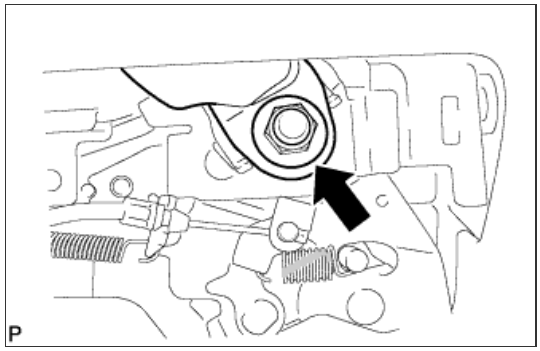
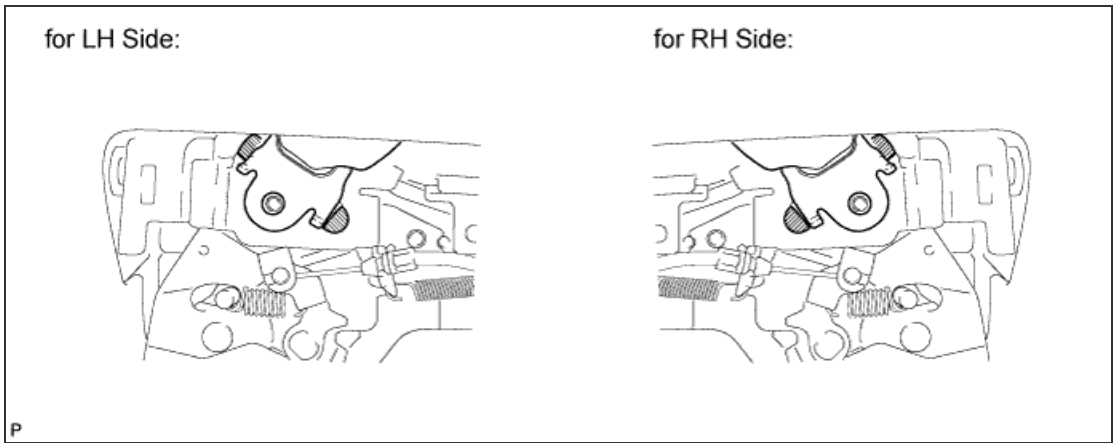
The rear No. 2 seat inner belt is fixed with the same nut as the rear seat inner belt. Therefore, it becomes disconnected when the nut is removed.



14. REMOVE REAR SEAT OUTER BELT SUB-ASSEMBLY (for RH Side)



a. Remove the nut and belt.

HINT:

The rear No. 2 seat inner belt is fixed with the same nut as the rear seat outer belt. Therefore, it becomes disconnected when the nut is removed.

15. REMOVE REAR NO. 2 SEAT INNER BELT SUB-ASSEMBLY

a. Remove the 2 belts.

for Preparation Click here

HINT:

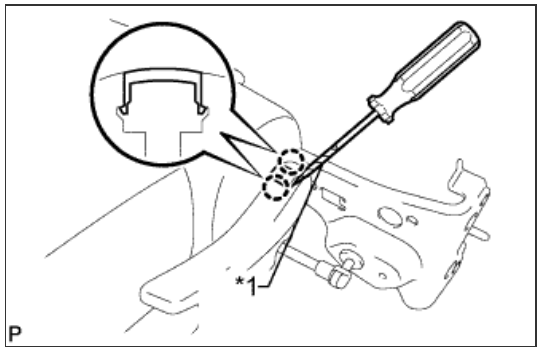
- **Use the same procedures for the RH side and LH side.**
- **The procedures listed below are for the LH side.**

1. REMOVE REAR NO. 2 SEAT ASSEMBLY LH

a. Remove the rear No. 2 seat assembly LH (Click here).

2. REMOVE SEAT ADJUSTER BOLT COVER



a. Using a screwdriver, detach the 2 claws and remove the cover.

HINT:

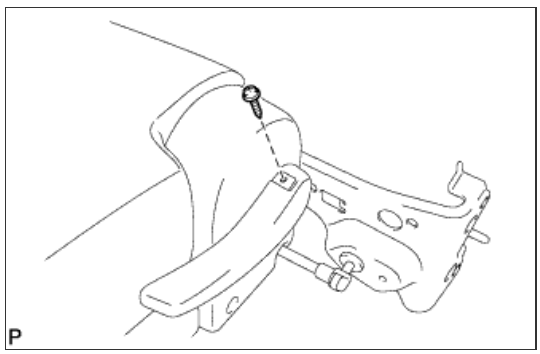
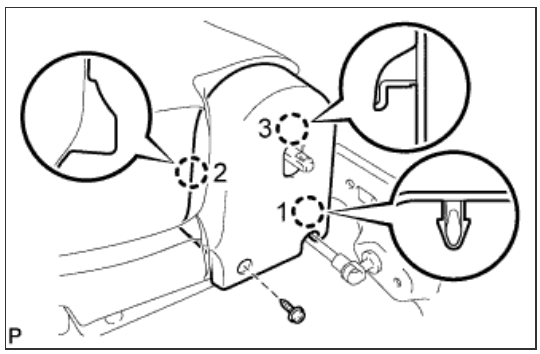
Tape the screwdriver tip before use.



Text in Illustration

*1	Protective Tape

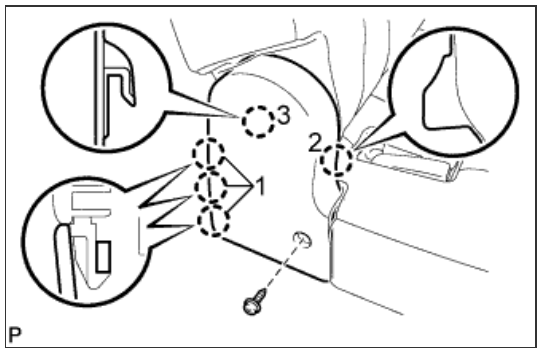
3. REMOVE NO. 2 RECLINING ADJUSTER RELEASE HANDLE LH



a. Remove the screw and release handle.

4. REMOVE RECLINING ADJUSTER COVER LH

a. Remove the screw.

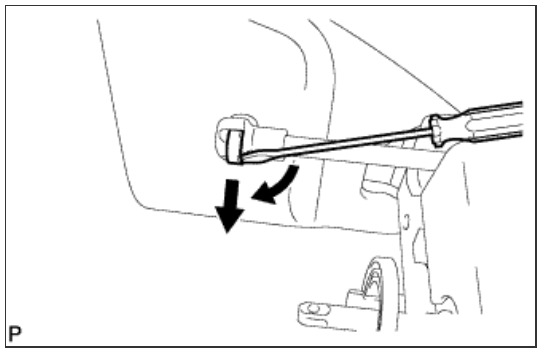


b. Detach the 3 claws in the order shown in the illustration, and then remove the cover.

5. REMOVE RECLINING ADJUSTER COVER RH

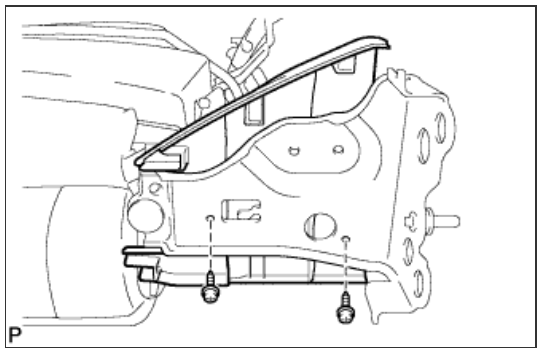
a. Remove the screw.

b. Detach the 5 claws in the order shown in the illustration, and then remove the cover.



6. REMOVE REAR SEAT REAR BRACKET COVER REAR

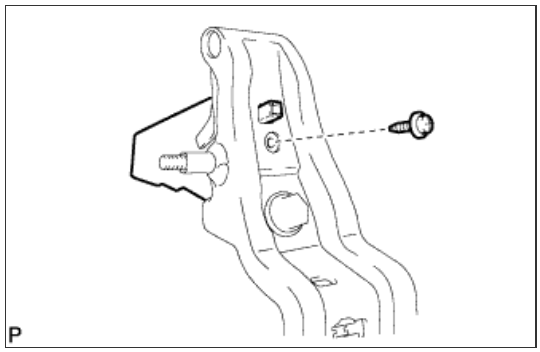
a. Detach the 2 claws and cover.



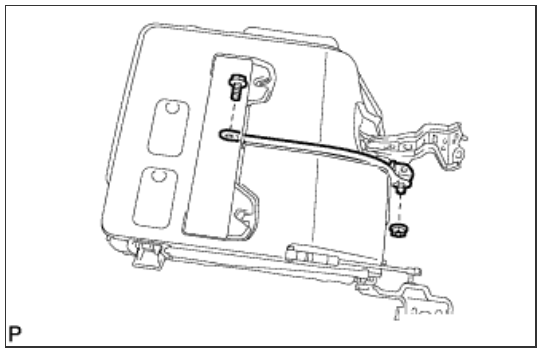
7. REMOVE REAR NO. 3 SEAT LEG COVER LH

a. Using a screwdriver, remove the spring of the seat stay ball-joint.

b. Disconnect the seat stay.

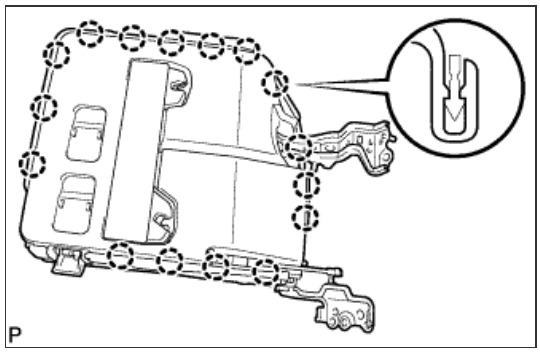


c. Remove the 2 screws and cover.



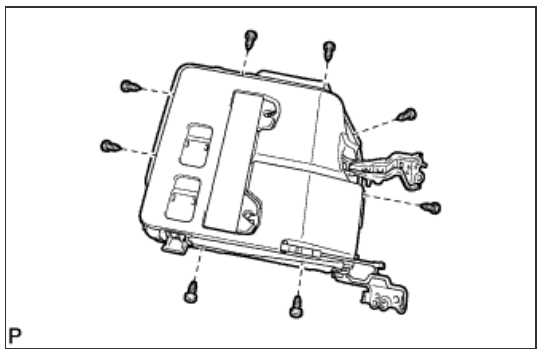
8. REMOVE NO. 2 SEAT LEG COVER NO. 2

a. Remove the screw and seat leg cover.



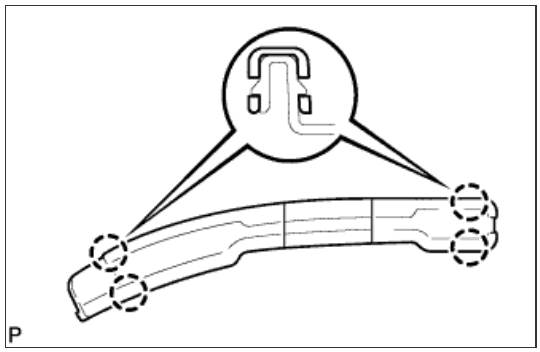
9. REMOVE 3RD SEAT LINK SUB-ASSEMBLY LH

a. Remove the bolt, nut and seat link.



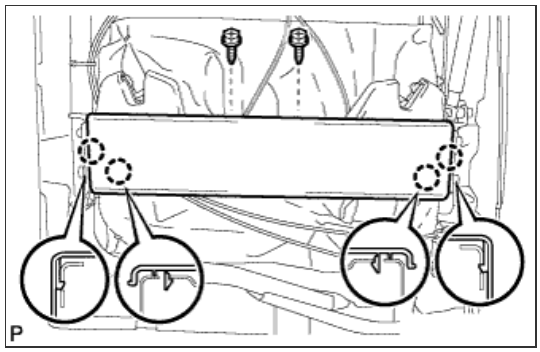
10. REMOVE REAR SEAT CUSHION UNDER COVER LH

a. Detach the 1 claws.



b. Remove the 8 screws and cover.

11. REMOVE NO. 3 SEAT FRONT BRACKET COVER LH

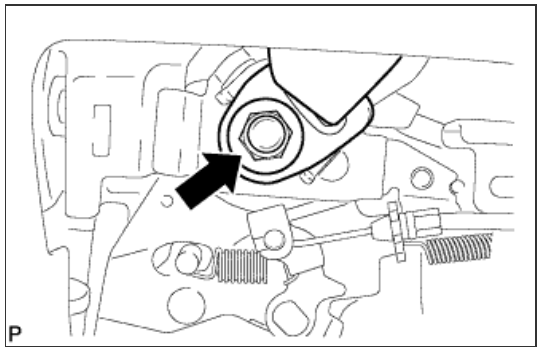


a. Detach the 4 claws and remove the cover.

12. REMOVE NO. 3 SEAT LEG COVER NO. 2

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.



13. REMOVE REAR SEAT INNER BELT SUB-ASSEMBLY (for LH Side)

a. Remove the nut and belt.

HINT:

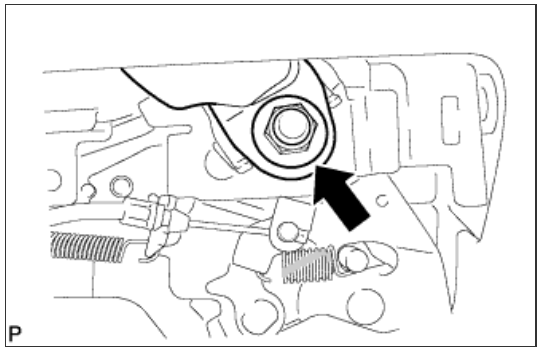
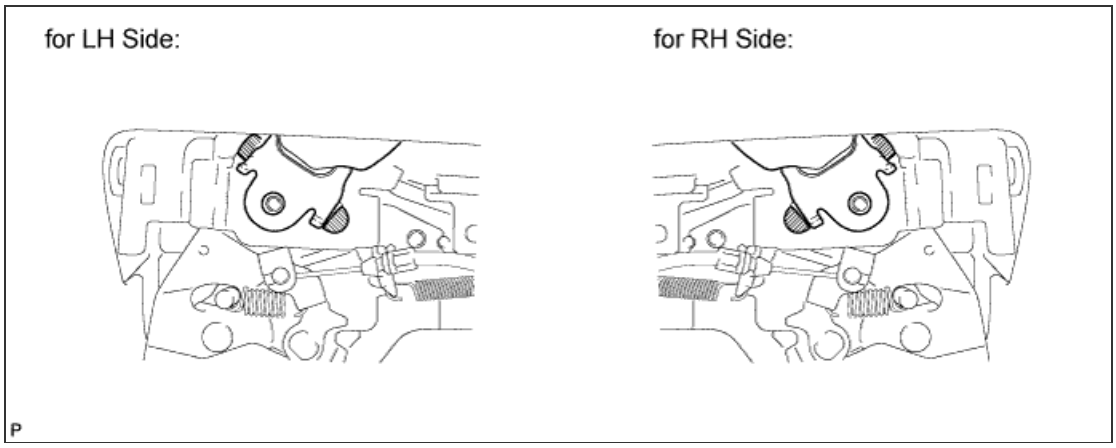
The rear No. 2 seat inner belt is fi ed with the same nut as the rear seat inner belt. Therefore, it becomes disconnected when the nut is removed.



14. REMOVE REAR SEAT OUTER BELT SUB-ASSEMBLY (for RH Side)



a. Remove the nut and belt.

HINT:

The rear No. 2 seat inner belt is fi ed with the same nut as the rear seat outer belt. Therefore, it becomes disconnected when the nut is removed.

15. REMOVE REAR NO. 2 SEAT INNER BELT SUB-ASSEMBLY

a. Remove the 2 belts.

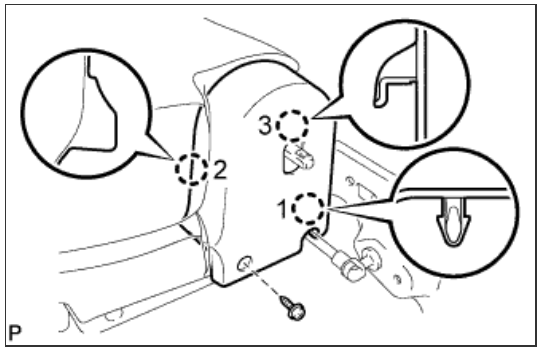
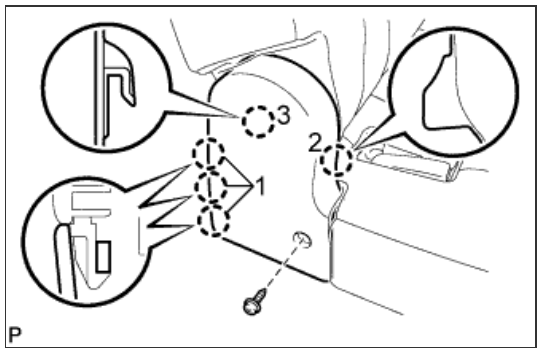
3. REMOVE NO. 2 RECLINING ADJUSTER RELEASE HANDLE LH



a. Remove the screw and release handle.

4. REMOVE RECLINING ADJUSTER COVER LH

a. Remove the screw.

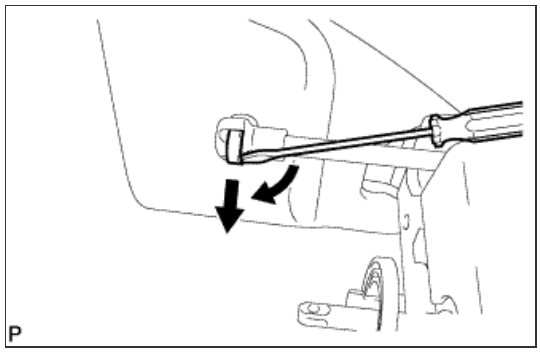


b. Detach the 3 claws in the order shown in the illustration, and then remove the cover.

5. REMOVE RECLINING ADJUSTER COVER RH

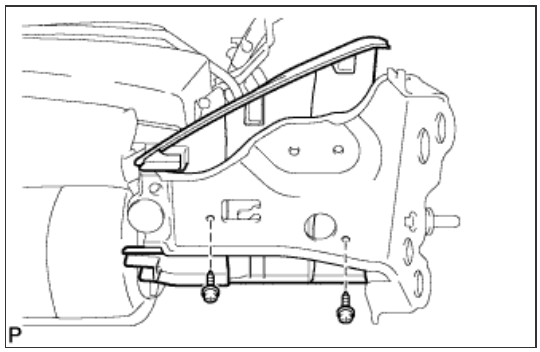
a. Remove the screw.

b. Detach the 5 claws in the order shown in the illustration, and then remove the cover.



6. REMOVE REAR SEAT REAR BRACKET COVER REAR

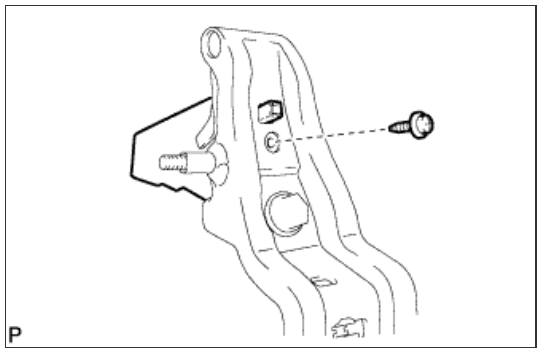
a. Detach the 2 claws and cover.



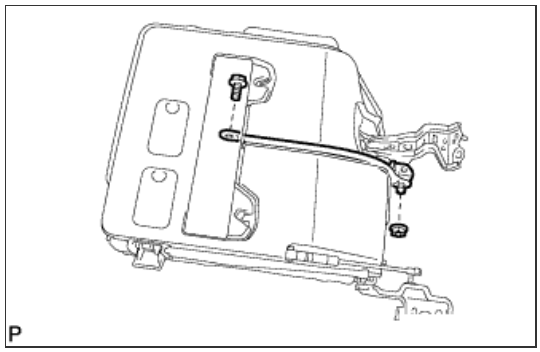
7. REMOVE REAR NO. 3 SEAT LEG COVER LH

a. Using a screwdriver, remove the spring of the seat stay ball- oint.

b. Disconnect the seat stay.

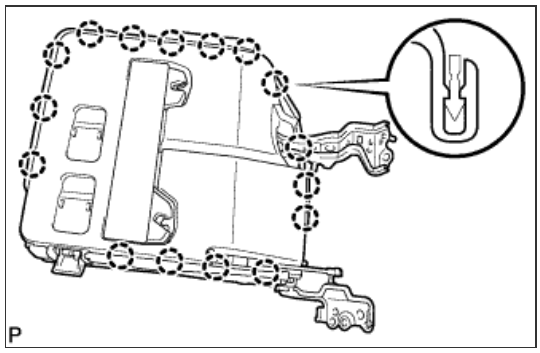


c. Remove the 2 screws and cover.



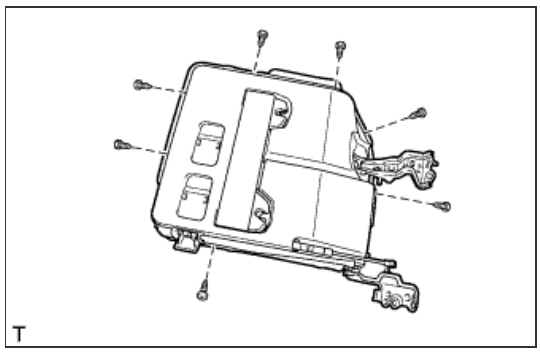
8. REMOVE NO. 2 SEAT LEG COVER NO. 2

a. Remove the screw and seat leg cover.



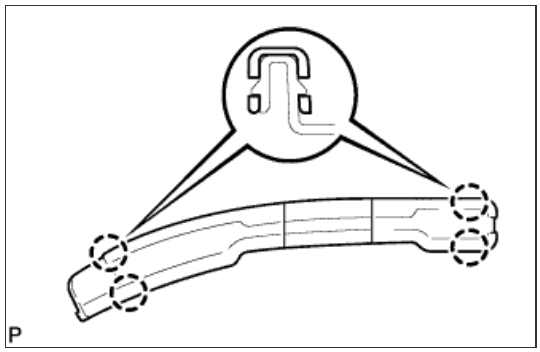
9. REMOVE 3RD SEAT LINK SUB-ASSEMBLY LH

a. Remove the bolt, nut and seat link.



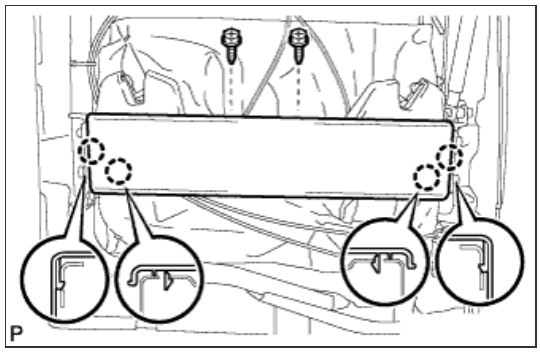
10. REMOVE REAR SEAT CUSHION UNDER COVER LH

a. Detach the 1 claws.



b. Remove the 7 screws and cover.

11. REMOVE NO. 3 SEAT FRONT BRACKET COVER LH

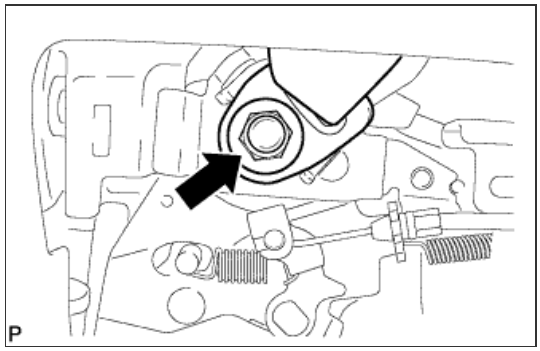


a. Detach the 4 claws and remove the cover.

12. REMOVE NO. 3 SEAT LEG COVER NO. 2

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.

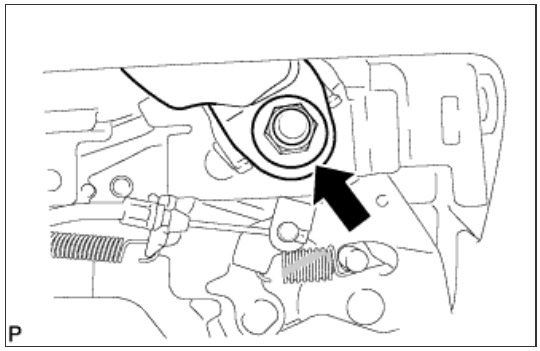


13. REMOVE REAR SEAT INNER BELT SUB-ASSEMBLY (for LH Side)

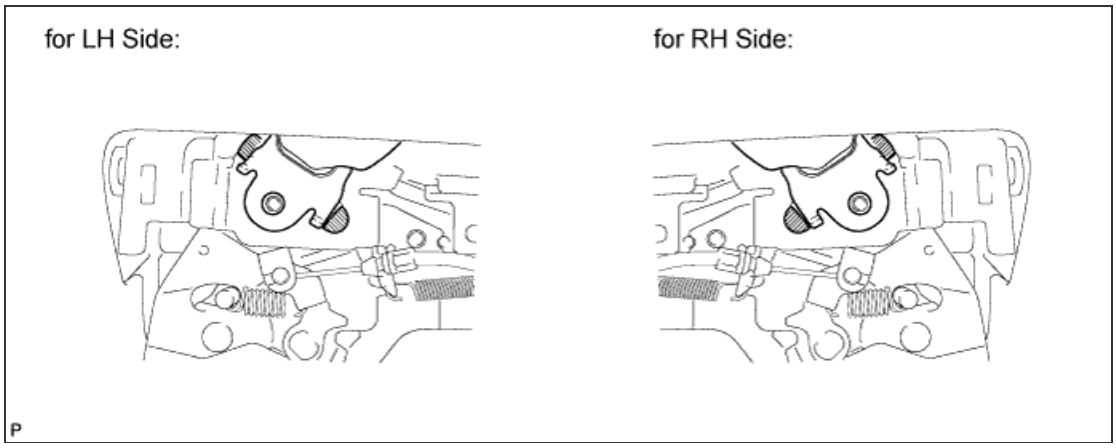
a. Remove the nut and belt.

HINT:

The rear No. 2 seat inner belt is fixed with the same nut as the rear seat inner belt. Therefore, it becomes disconnected when the nut is removed.



14. REMOVE REAR SEAT OUTER BELT SUB-ASSEMBLY (for RH Side)

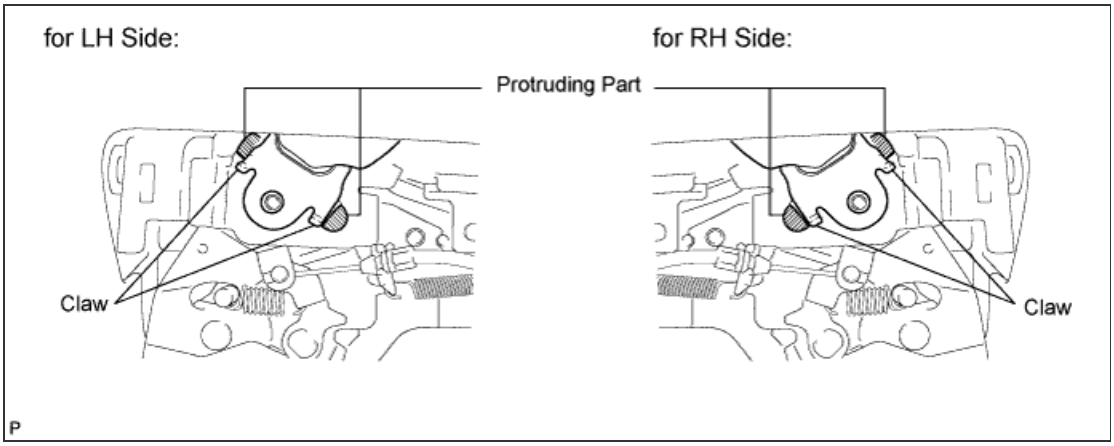


a. Remove the nut and belt.

HINT:

The rear No. 2 seat inner belt is fixed with the same nut as the rear seat outer belt. Therefore, it becomes disconnected when the nut is removed.

15. REMOVE REAR NO. 2 SEAT INNER BELT SUB-ASSEMBLY



a. Remove the 2 belts.

for Preparation Click here

1. INSTALL REAR NO. 2 SEAT INNER BELT SUB-ASSEMBLY

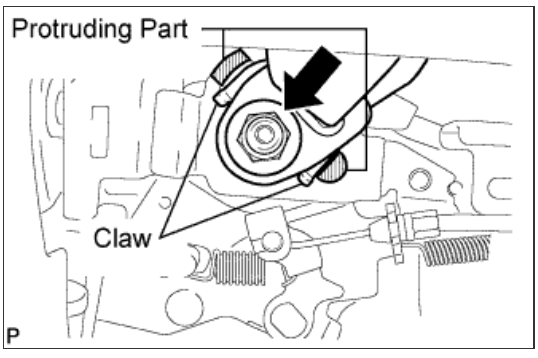
a. Install the 2 belts.

NOTICE:

- **Make sure the claws are facing away from the seat.**
- **Do not overlap the anchor part of the seat belt and protruding parts of the seat.**

2. INSTALL REAR SEAT INNER BELT SUB-ASSEMBLY (for LH Side)

a. Install the belt with the nut.



Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

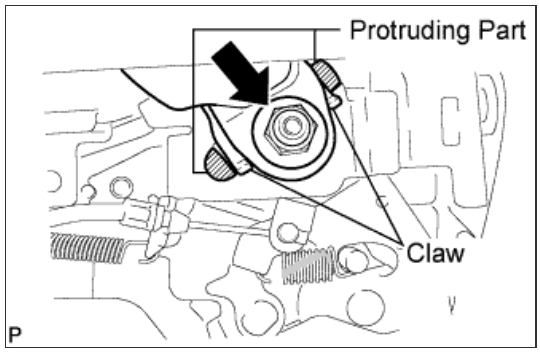
Do not overlap the anchor part of the seat belt and protruding parts of the seat.

HINT:

The rear No. 2 seat inner belt is fixed with the same nut as the rear seat inner belt. Therefore, connect it when installing the rear seat inner belt.

3. INSTALL REAR SEAT OUTER BELT SUB-ASSEMBLY (for RH Side)

a. Install the belt with the nut.

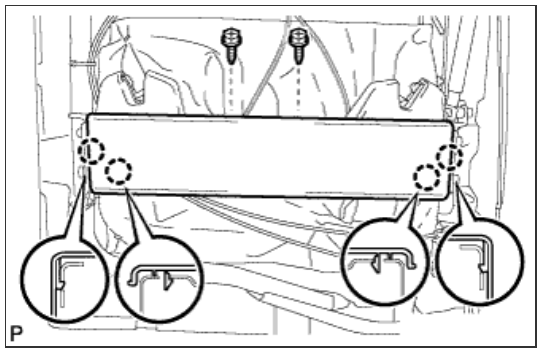


Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

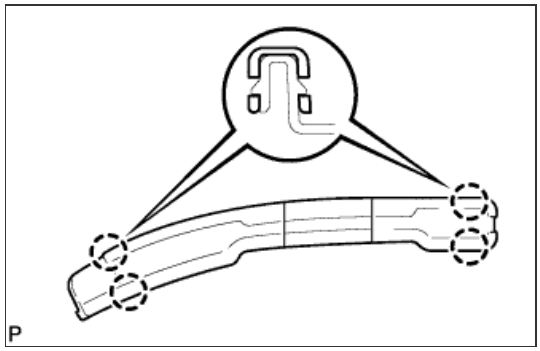
Do not overlap the anchor part of the seat belt and protruding parts of the seat.

HINT:



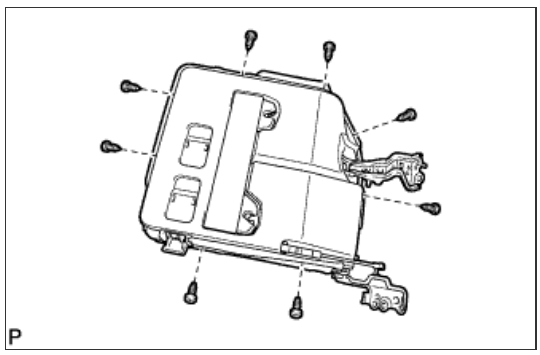
The rear No. 2 seat inner belt is fixed with the same nut as the rear seat outer belt. Therefore, connect it when installing the rear seat outer belt.

4. INSTALL NO. 3 SEAT LEG COVER NO. 2



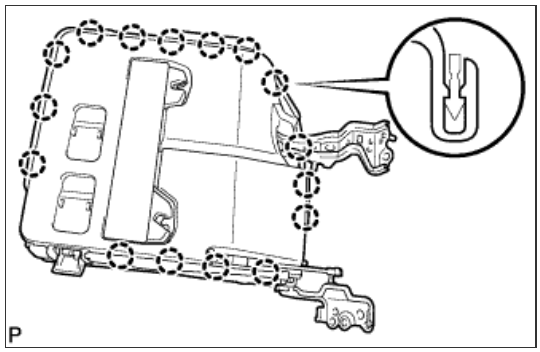
a. Attach the 4 claws to install the cover.

b. Install the 2 screws.



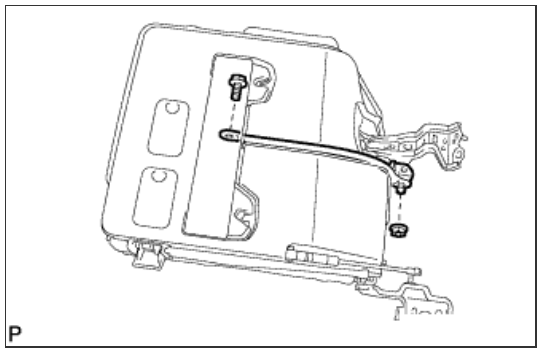
5. INSTALL NO. 3 SEAT FRONT BRACKET COVER LH

a. Attach the 4 claws to install the cover.



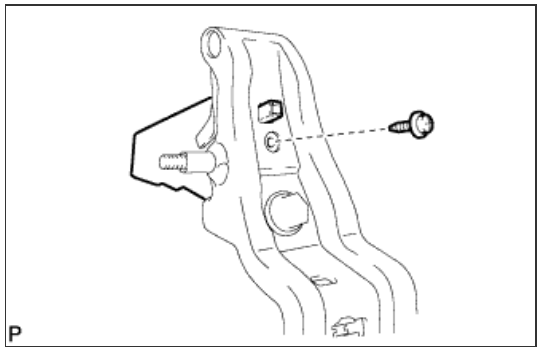
6. INSTALL REAR SEAT CUSHION UNDER COVER LH

a. Install the cover with the 8 screws.



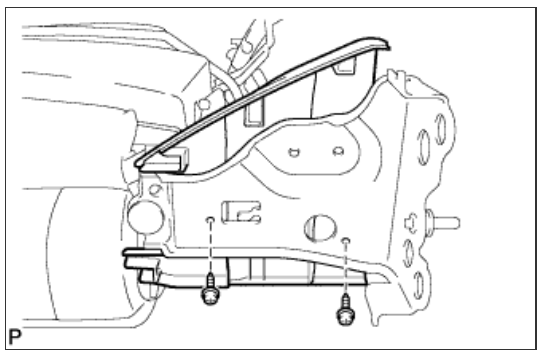
b. Attach the 16 claws.

7. INSTALL 3RD SEAT LIN SUB-ASSEMBLY LH



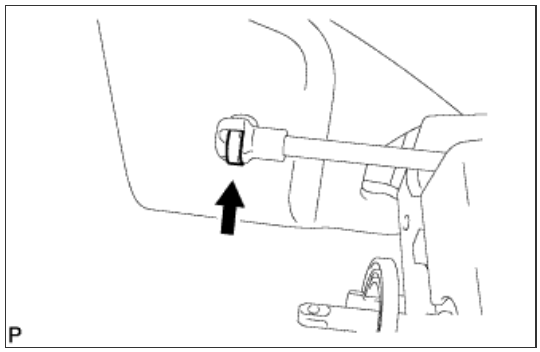
a. Install the seat link with the bolt and nut.

Torque:
8.5 N*m{ 87 kgf*cm , 75 in.*lbf }



8. INSTALL NO. 2 SEAT LEG COVER NO. 2

a. Install the seat leg cover with the screw.

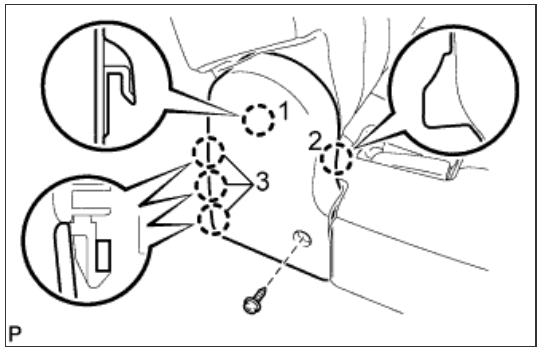


9. INSTALL REAR NO. 3 SEAT LEG COVER LH

a. Install the seat leg cover with the 2 screws.

b. Install the spring of the seat stay ball-joint.

c. Connect the seat stay to the seat frame.

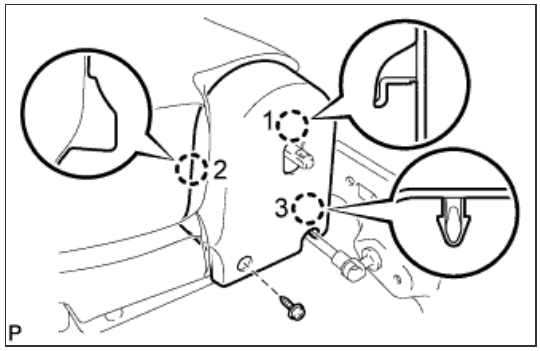


10. INSTALL REAR SEAT REAR BRACKET COVER REAR

a. Attach the 2 claws to install the cover.

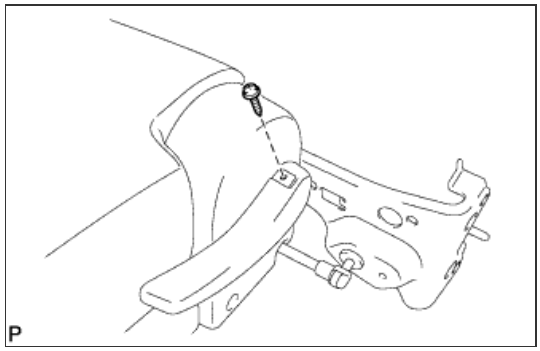
11. INSTALL RECLINING ADJUSTER COVER RH

a. Attach the 5 claws in the order shown in the illustration to install the cover.



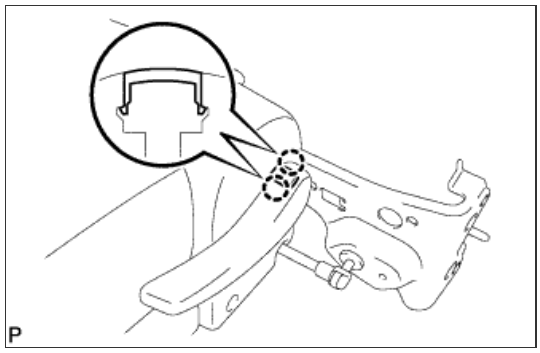
b. Install the screw.

12. INSTALL RECLINING ADJUSTER COVER LH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

b. Install the screw.

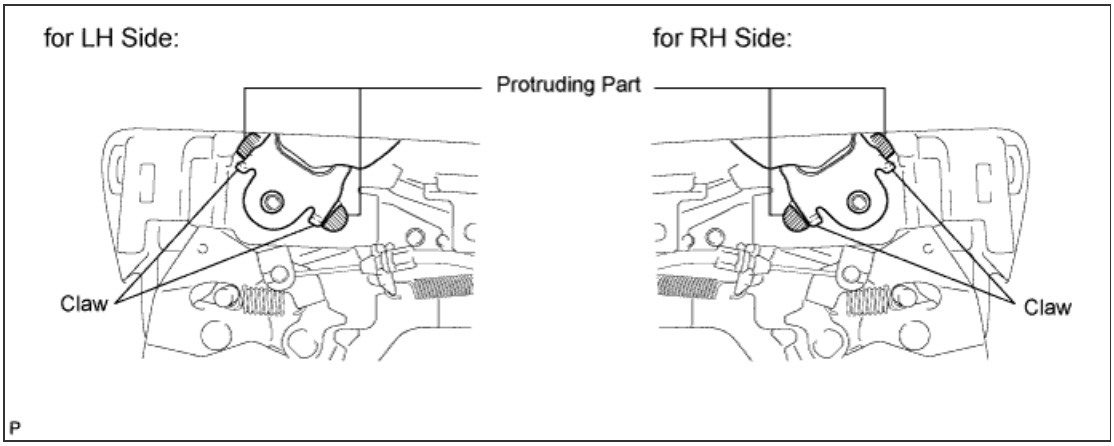


13. INSTALL NO. 2 RECLINING ADJUSTER RELEASE HANDLE LH

a. Install the release handle with the screw.

14. INSTALL SEAT ADJUSTER BOLT COVER

a. Attach the 2 claws to install the cover.



15. INSTALL REAR NO. 2 SEAT ASSEMBLY (for LH Side)

a. Install the rear No. 2 seat assembly (Click here).

for Preparation Click here

1. INSTALL REAR NO. 2 SEAT INNER BELT SUB-ASSEMBLY

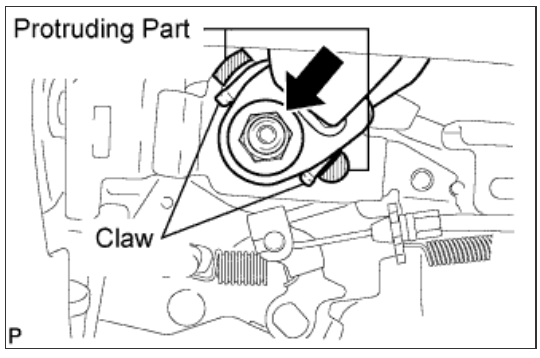
a. Install the 2 belts.

NOTICE:

- **Make sure the claws are facing away from the seat.**
- **Do not overlap the anchor part of the seat belt and protruding parts of the seat.**

2. INSTALL REAR SEAT INNER BELT SUB-ASSEMBLY (for LH Side)

a. Install the belt with the nut.



Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

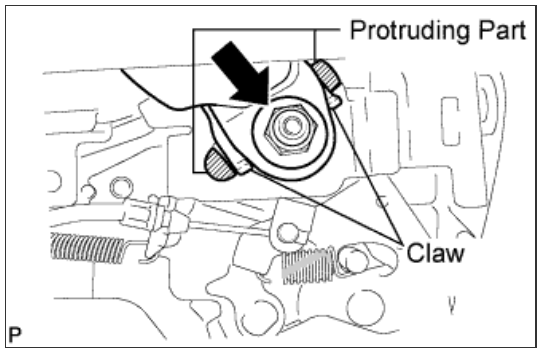
Do not overlap the anchor part of the seat belt and protruding parts of the seat.

HINT:

The rear No. 2 seat inner belt is fixed with the same nut as the rear seat inner belt. Therefore, connect it when installing the rear seat inner belt.

3. INSTALL REAR SEAT OUTER BELT SUB-ASSEMBLY (for RH Side)

a. Install the belt with the nut.

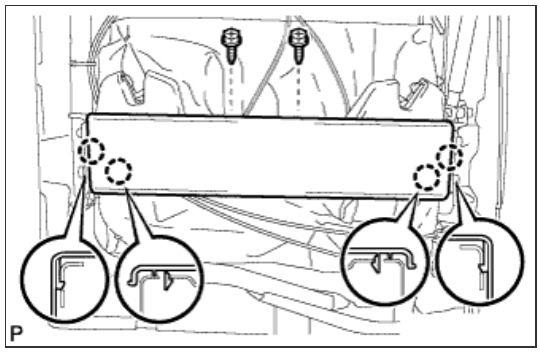


Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

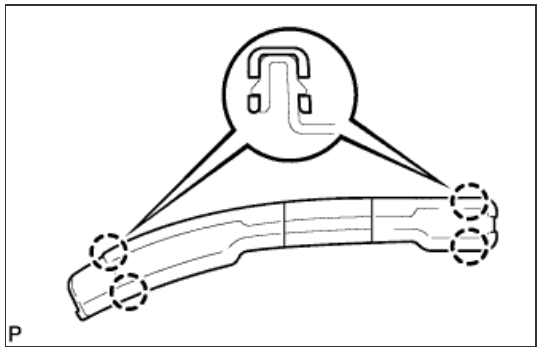
Do not overlap the anchor part of the seat belt and protruding parts of the seat.

HINT:



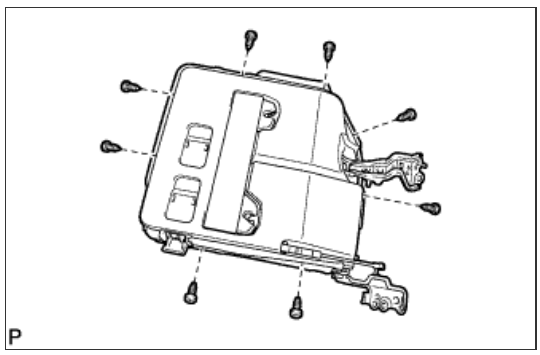
The rear No. 2 seat inner belt is fixed with the same nut as the rear seat outer belt. Therefore, connect it when installing the rear seat outer belt.

4. INSTALL NO. 3 SEAT LEG COVER NO. 2



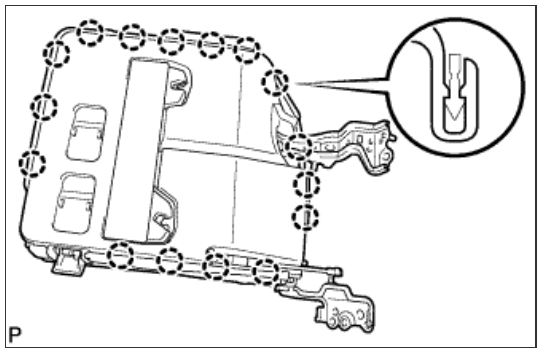
a. Attach the 4 claws to install the cover.

b. Install the 2 screws.



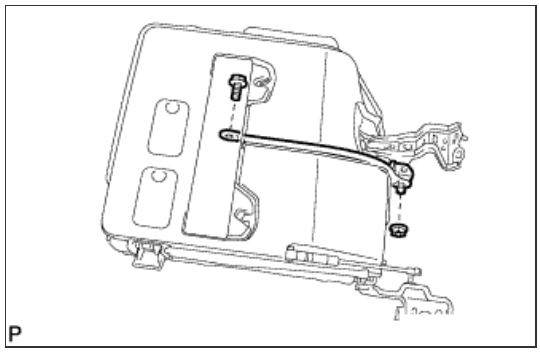
5. INSTALL NO. 3 SEAT FRONT BRACKET COVER LH

a. Attach the 4 claws to install the cover.



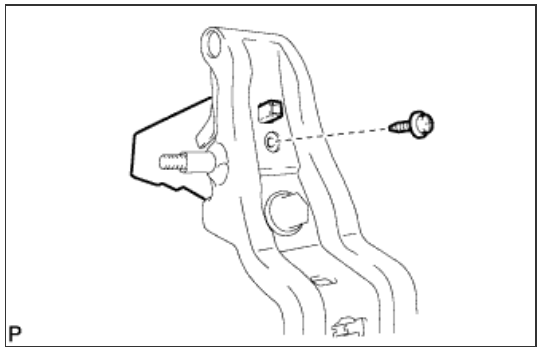
6. INSTALL REAR SEAT CUSHION UNDER COVER LH

a. Install the cover with the 8 screws.



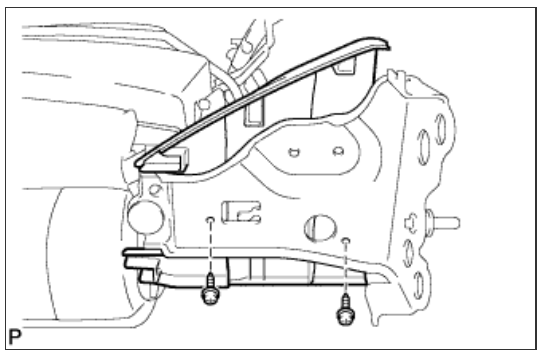
b. Attach the 16 claws.

7. INSTALL 3RD SEAT LIN SUB-ASSEMBLY LH



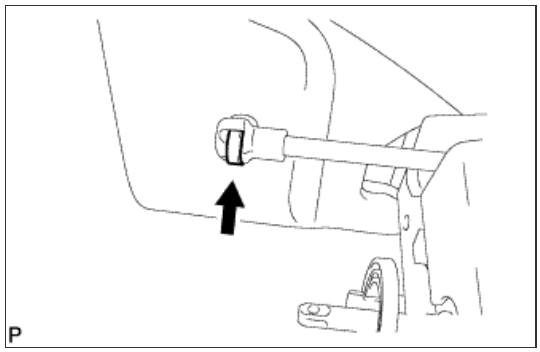
a. Install the seat link with the bolt and nut.

Torque:
8.5 N*m{ 87 kgf*cm , 75 in.*lbf }



8. INSTALL NO. 2 SEAT LEG COVER NO. 2

a. Install the seat leg cover with the screw.

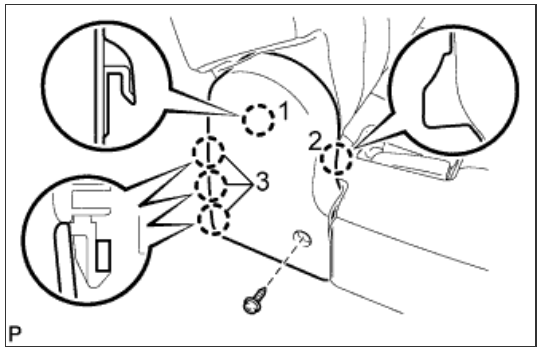


9. INSTALL REAR NO. 3 SEAT LEG COVER LH

a. Install the seat leg cover with the 2 screws.

b. Install the spring of the seat stay ball-joint.

c. Connect the seat stay to the seat frame.

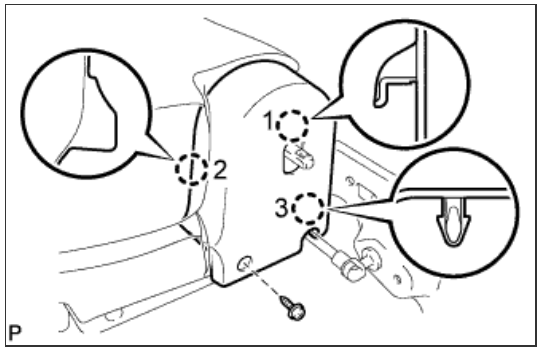


10. INSTALL REAR SEAT REAR BRACKET COVER REAR

a. Attach the 2 claws to install the cover.

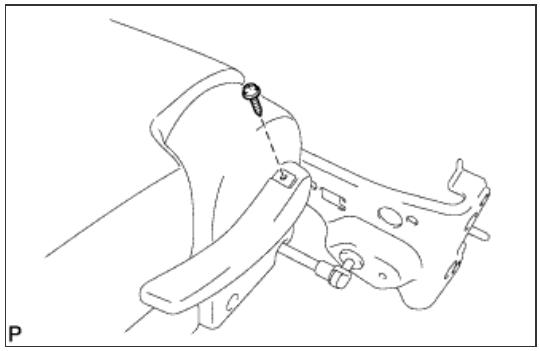
11. INSTALL RECLINING ADJUSTER COVER RH

a. Attach the 5 claws in the order shown in the illustration to install the cover.



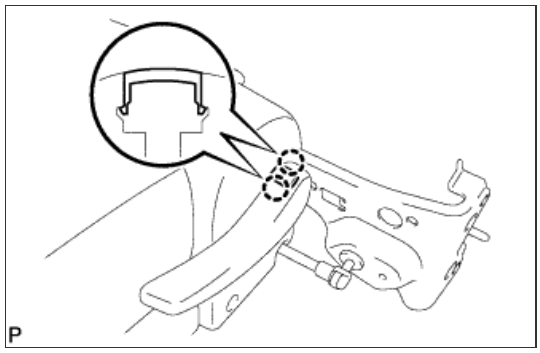
b. Install the screw.

12. INSTALL RECLINING ADJUSTER COVER LH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

b. Install the screw.

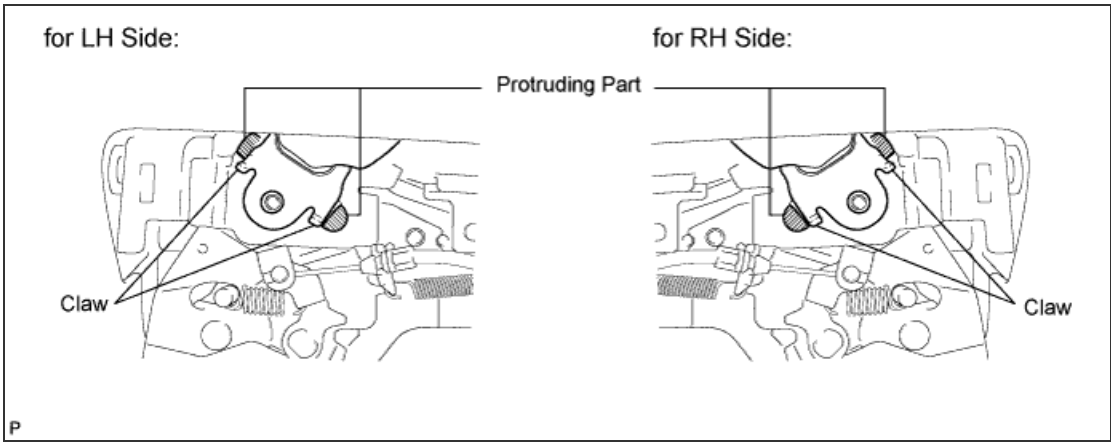


13. INSTALL NO. 2 RECLINING ADJUSTER RELEASE HANDLE LH

a. Install the release handle with the screw.

14. INSTALL SEAT ADJUSTER BOLT COVER

a. Attach the 2 claws to install the cover.



15. INSTALL REAR NO. 2 SEAT ASSEMBLY (for LH Side)

a. Install the rear No. 2 seat assembly (Click here).

for Preparation Click here

1. INSTALL REAR NO. 2 SEAT INNER BELT SUB-ASSEMBLY

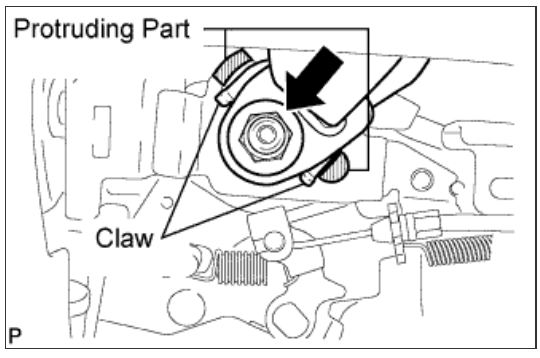
a. Install the 2 belts.

NOTICE:

- **Make sure the claws are facing away from the seat.**
- **Do not overlap the anchor part of the seat belt and protruding parts of the seat.**

2. INSTALL REAR SEAT INNER BELT SUB-ASSEMBLY (for LH Side)

a. Install the belt with the nut.



Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

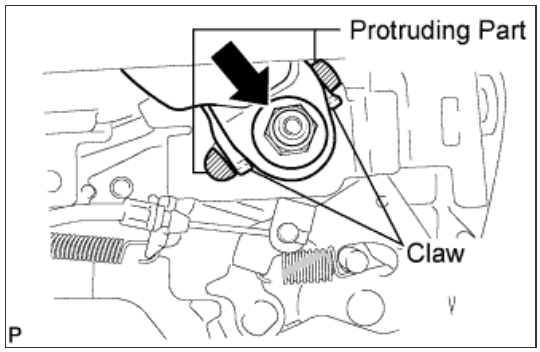
Do not overlap the anchor part of the seat belt and protruding parts of the seat.

HINT:

The rear No. 2 seat inner belt is fixed with the same nut as the rear seat inner belt. Therefore, connect it when installing the rear seat inner belt.

3. INSTALL REAR SEAT OUTER BELT SUB-ASSEMBLY (for RH Side)

a. Install the belt with the nut.

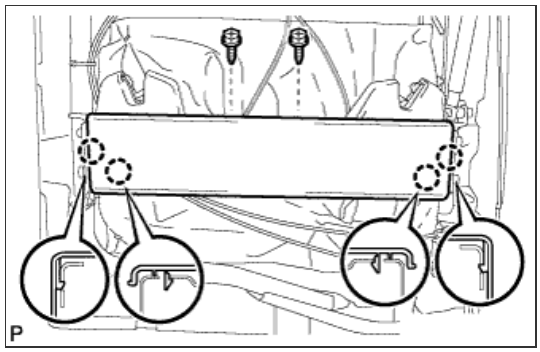


Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

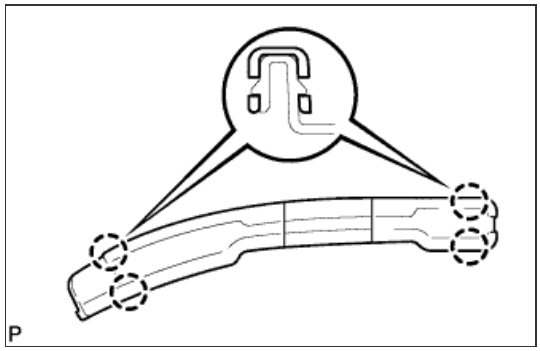
Do not overlap the anchor part of the seat belt and protruding parts of the seat.

HINT:



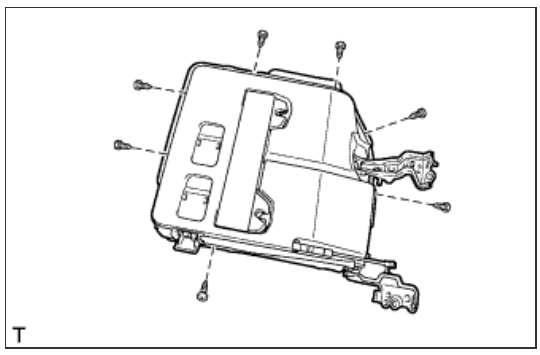
The rear No. 2 seat inner belt is fixed with the same nut as the rear seat outer belt. Therefore, connect it when installing the rear seat outer belt.

4. INSTALL NO. 3 SEAT LEG COVER NO. 2



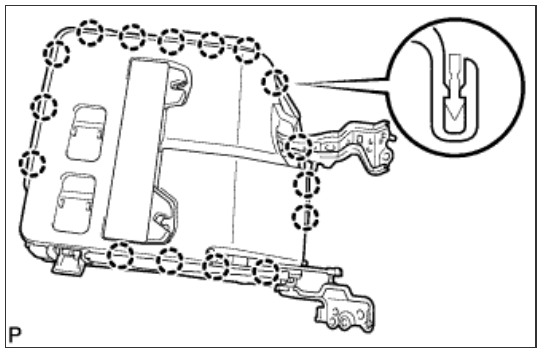
a. Attach the 4 claws to install the cover.

b. Install the 2 screws.



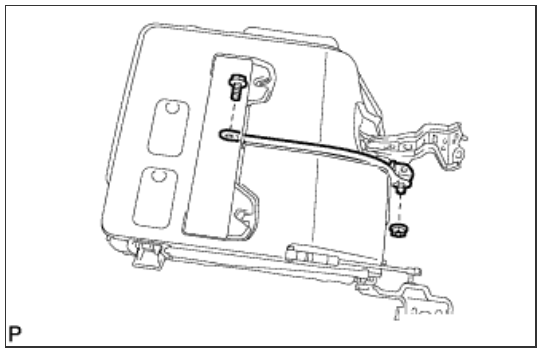
5. INSTALL NO. 3 SEAT FRONT BRACKET COVER LH

a. Attach the 4 claws to install the cover.



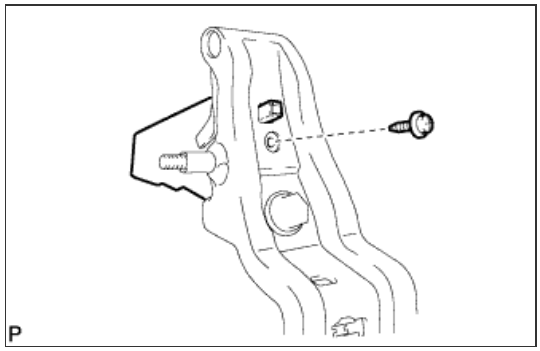
6. INSTALL REAR SEAT CUSHION UNDER COVER LH

a. Install the cover with the 7 screws.



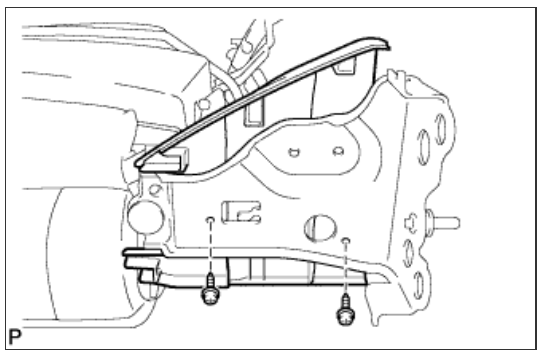
b. Attach the 16 claws.

7. INSTALL 3RD SEAT LIN SUB-ASSEMBLY LH



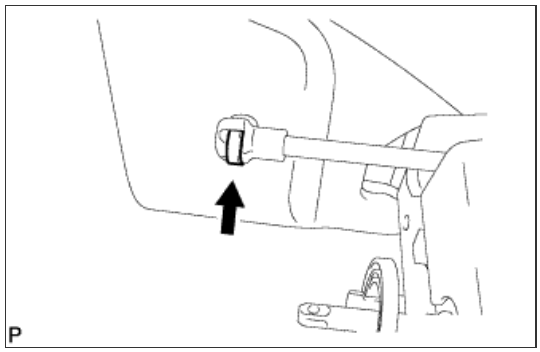
a. Install the seat link with the bolt and nut.

Torque:
8.5 N*m{ 87 kgf*cm , 75 in.*lbf }



8. INSTALL NO. 2 SEAT LEG COVER NO. 2

a. Install the seat leg cover with the screw.

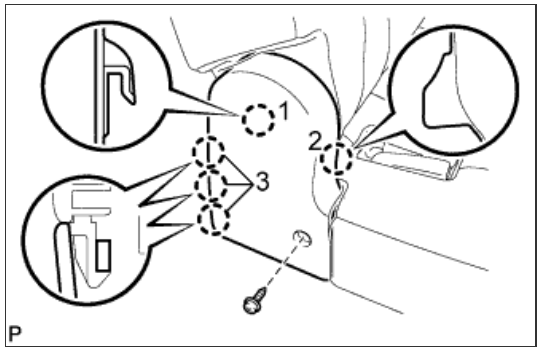


9. INSTALL REAR NO. 3 SEAT LEG COVER LH

a. Install the seat leg cover with the 2 screws.

b. Install the spring of the seat stay ball-joint.

c. Connect the seat stay to the seat frame.

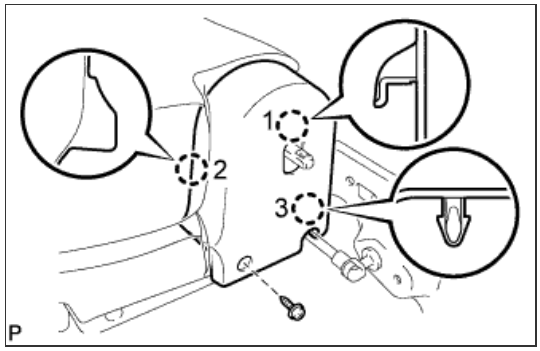


10. INSTALL REAR SEAT REAR BRACKET COVER REAR

a. Attach the 2 claws to install the cover.

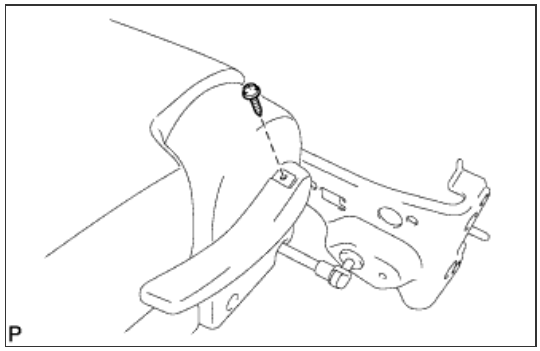
11. INSTALL RECLINING ADJUSTER COVER RH

a. Attach the 5 claws in the order shown in the illustration to install the cover.



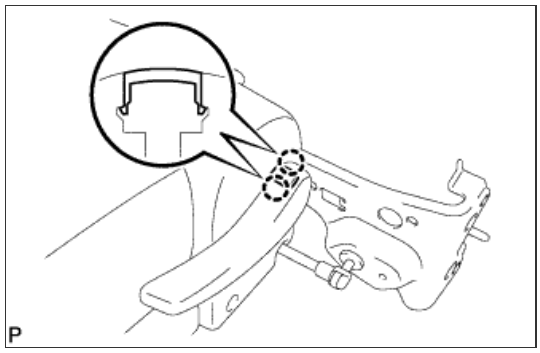
b. Install the screw.

12. INSTALL RECLINING ADJUSTER COVER LH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

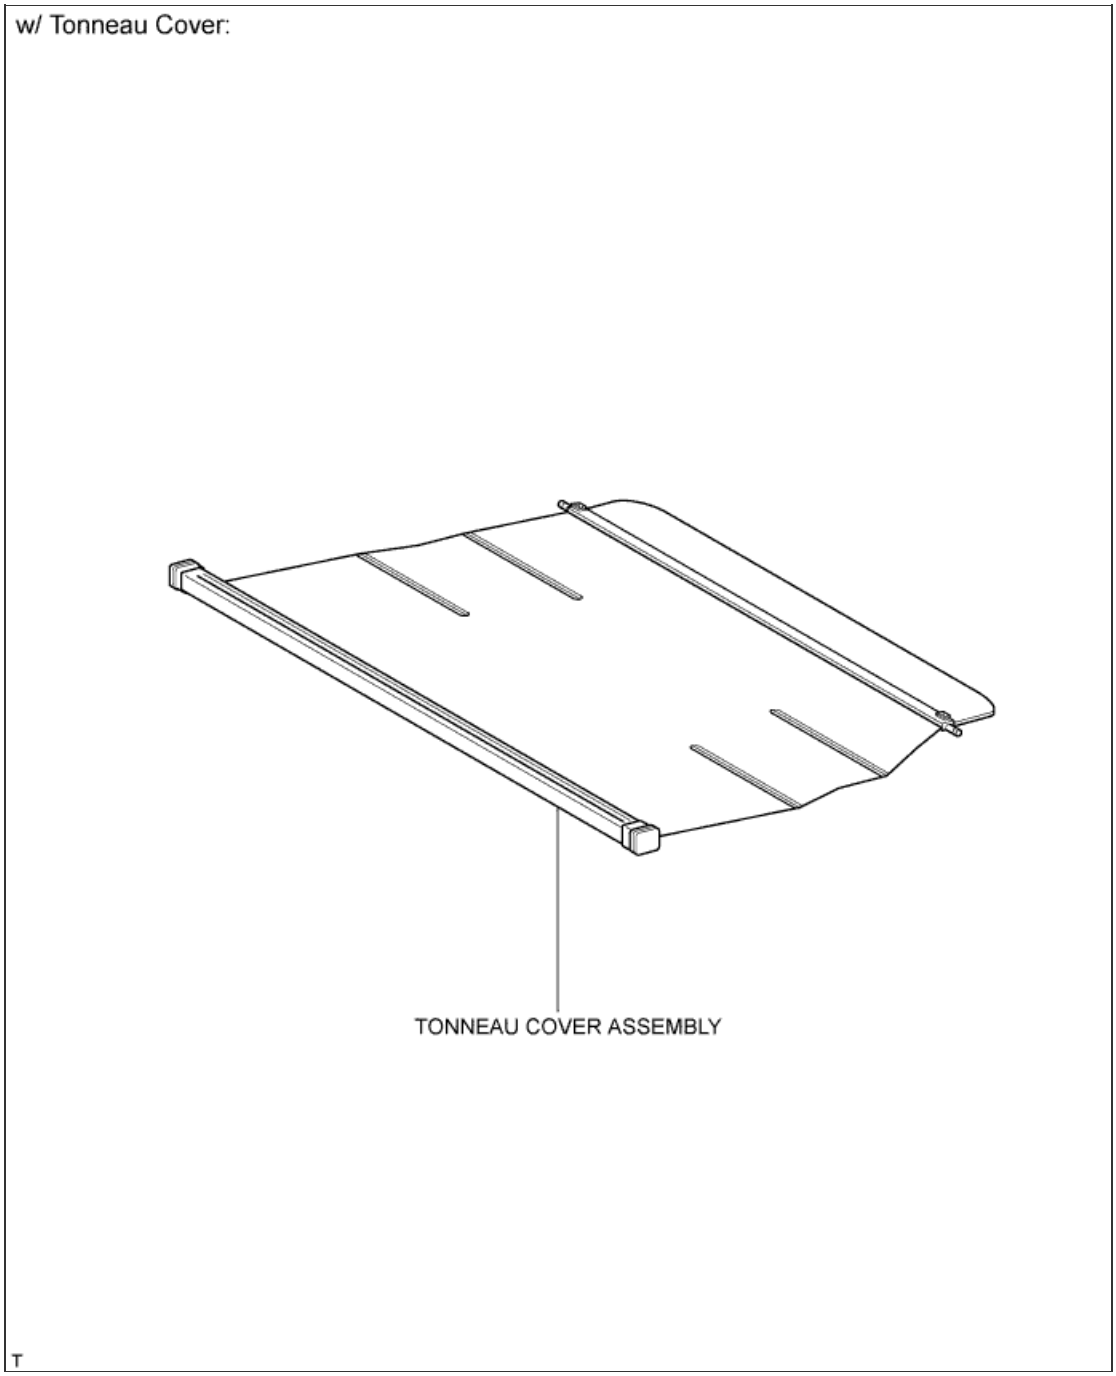
b. Install the screw.



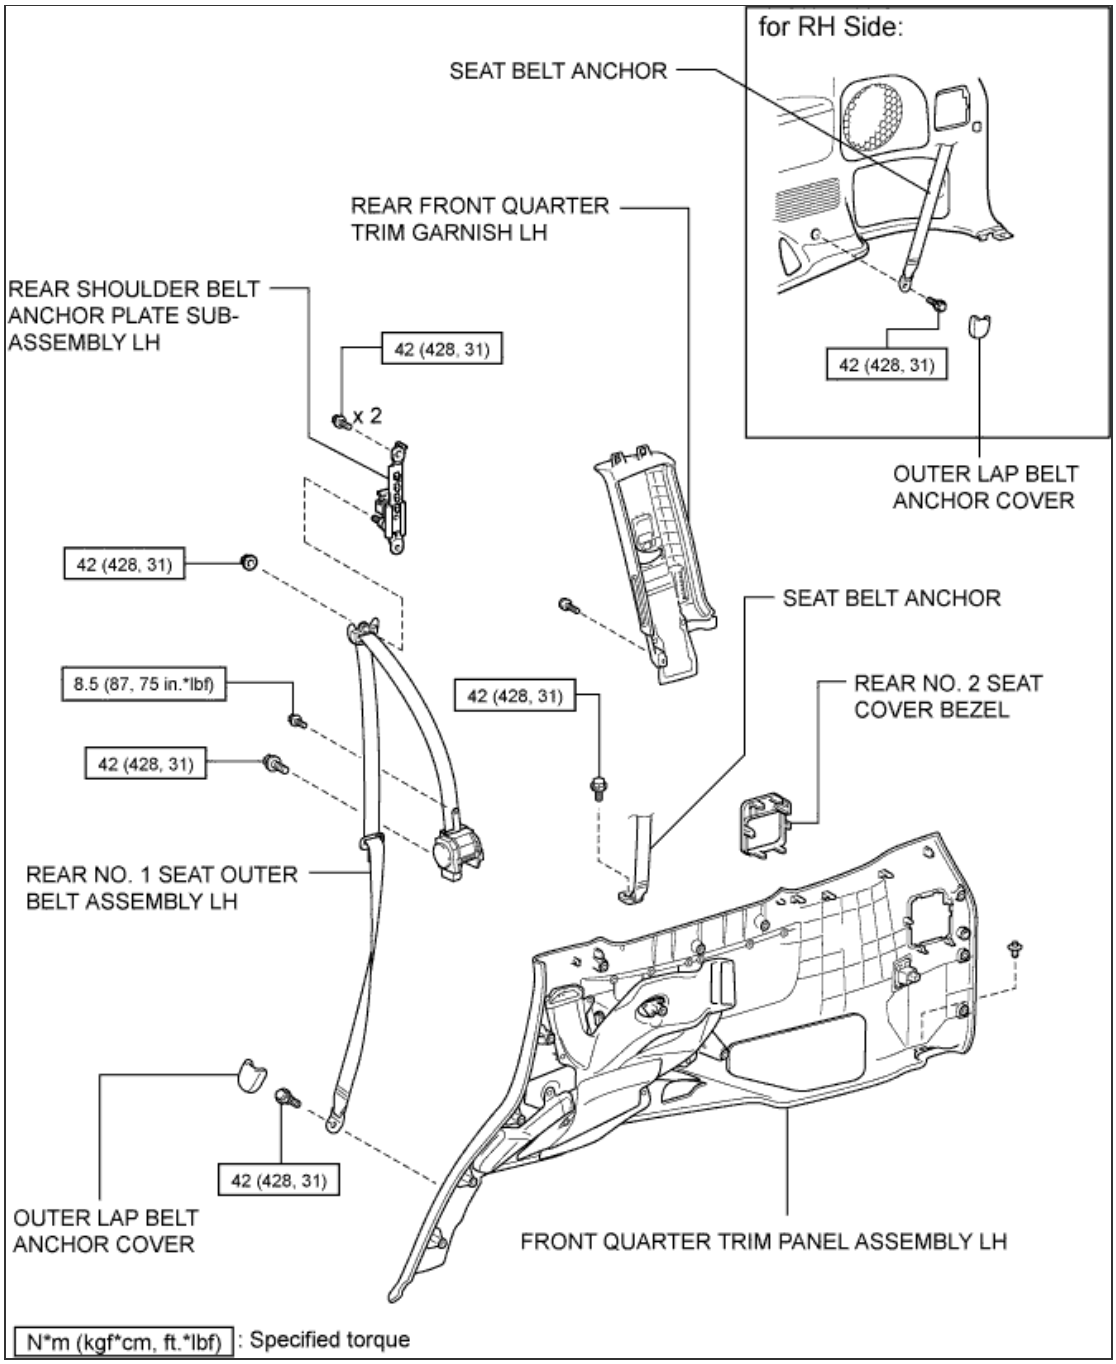
13. INSTALL NO. 2 RECLINING ADJUSTER RELEASE HANDLE LH

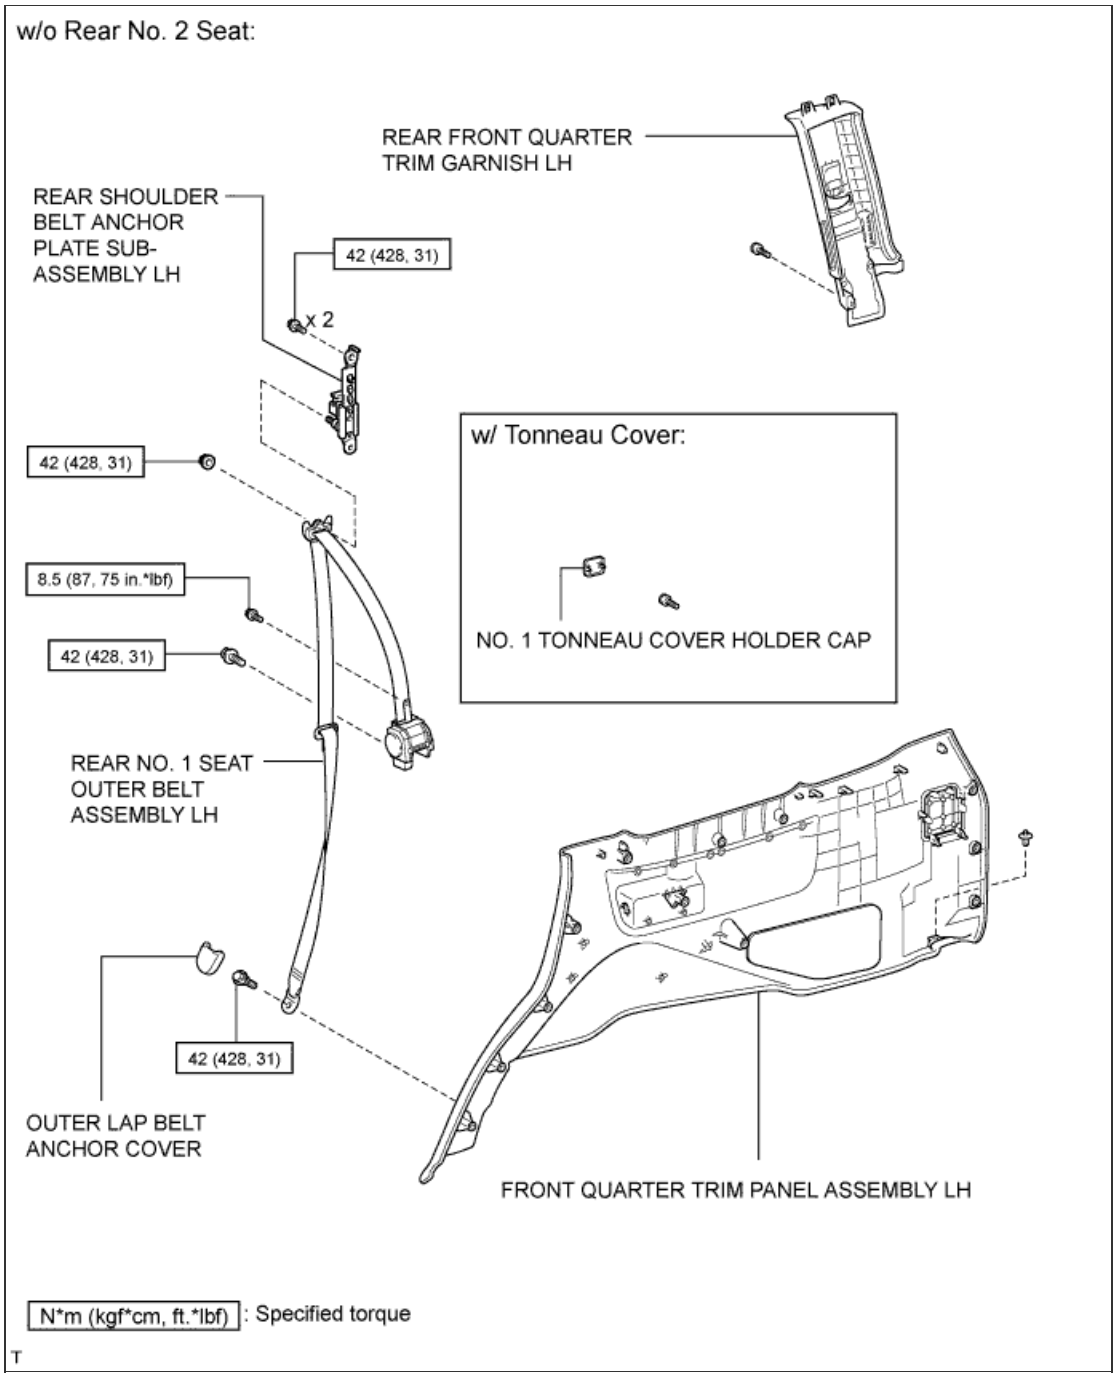
a. Install the release handle with the screw.

14. INSTALL SEAT ADJUSTER BOLT COVER

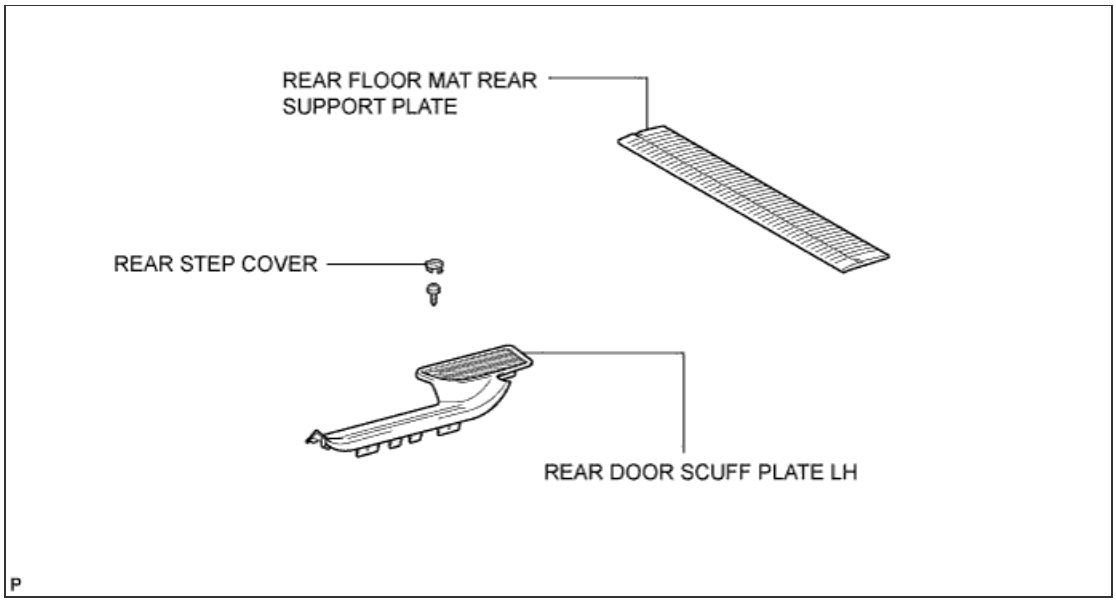


a. Attach the 2 claws to install the cover.





15. INSTALL REAR NO. 2 SEAT ASSEMBLY (for LH Side)



a. Install the rear No. 2 seat assembly (Click here).

REAR NO. 1 SEAT OUTER BELT ASSEMBLY > REMOVAL

for Preparation Click here

HINT:

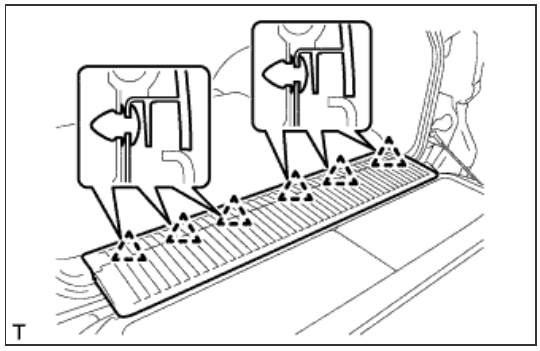
- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**

1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

2. REMOVE TONNEAU COVER ASSEMBLY (w/ Tonneau Cover)



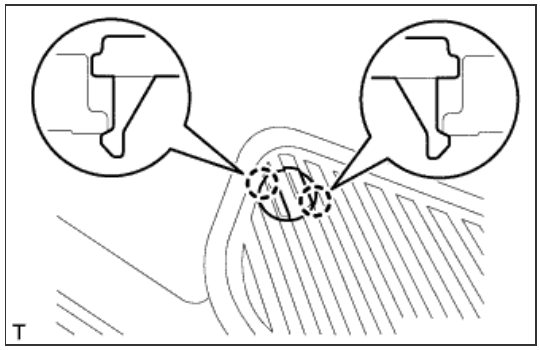
a. Remove the tonneau cover.

3. REMOVE REAR NO. 2 SEAT ASSEMBLY (w/ Rear No. 2 Seat)

a. Remove the rear No. 2 seat assembly (Click here).

4. REMOVE REAR FLOOR MAT REAR SUPPORT PLATE

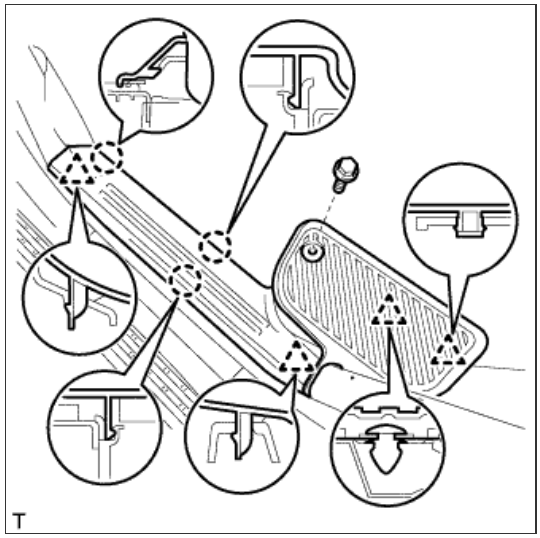
a. Detach the 6 clips and remove the support plate.



5. REMOVE REAR STEP COVER

HINT:

Use the same procedure to remove the step cover on the other side.

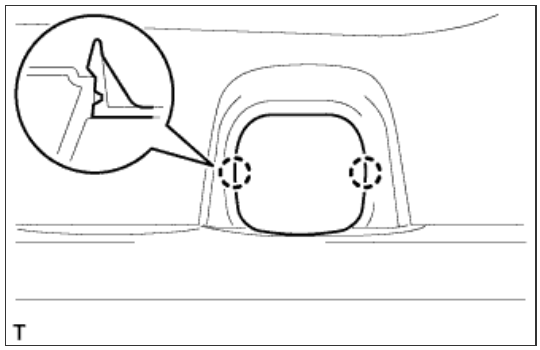


a. Detach the 2 cla s and remove the step cover.

6. REMOVE REAR DOOR SCUFF PLATE LH

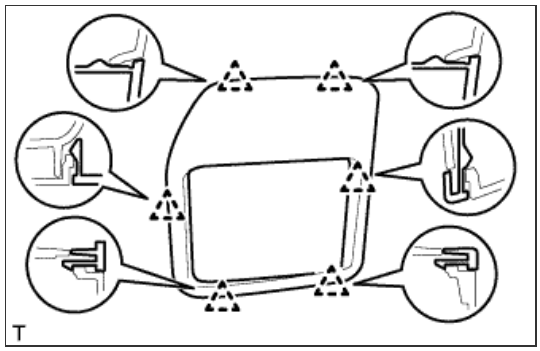
a. Remove the scre .

b. Detach the 3 cla s and 4 clips, and remove the scuff plate.



7. REMOVE NO. 1 TONNEAU COVER HOLDER CAP (w/ Tonneau Cover)

HINT:

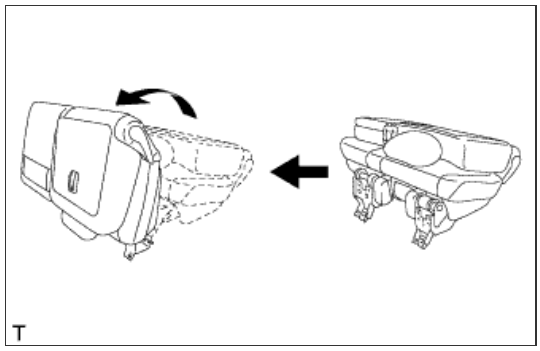


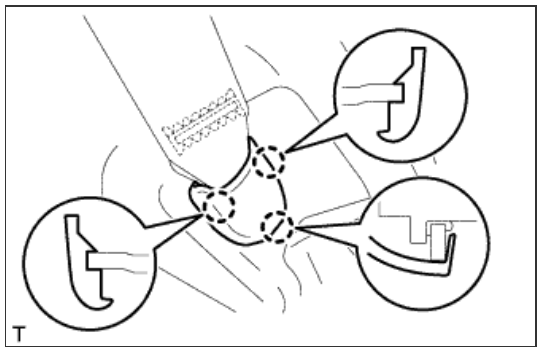
Use the same procedure to remove the tonneau cover holder cap on the other side.

a. Detach the 2 cla s and remove the tonneau cover holder cap.

8. REMOVE REAR NO. 2 SEAT COVER BEZEL (w/ Rear No. 2 Seat)

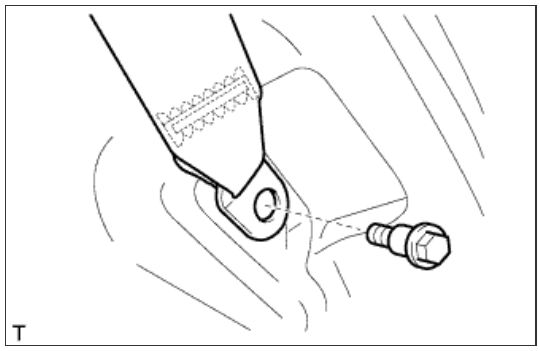
a. Detach the 6 clips and remove the rear No. 2 seat cover bezel.





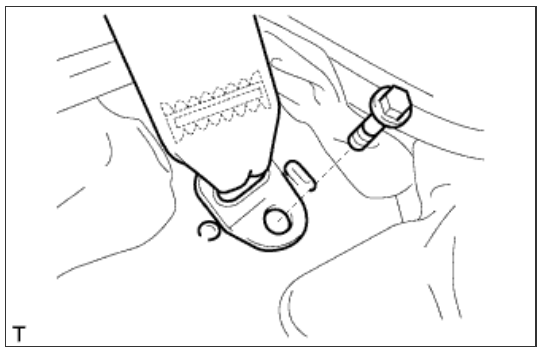
9. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY LH

HINT:

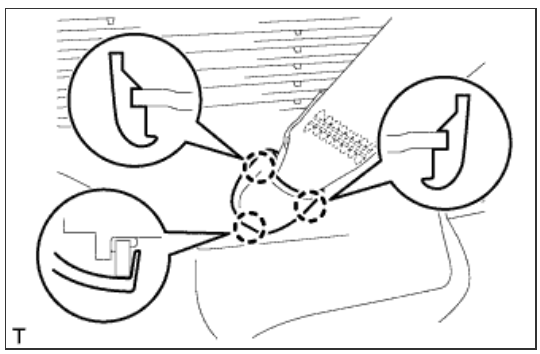


When removing the front quarter trim panel, operate the reclining ad ster release handle and move the No. 1 rear seat to the position shown in the illustration.

a. Detach the 3 claws and remove the cover.

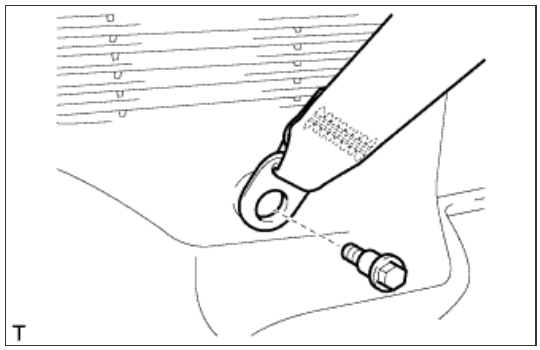


b. Remove the bolt and disconnect the rear seat outer belt floor anchor.



c. w/ Rear No. 2 Seat, for LH side:

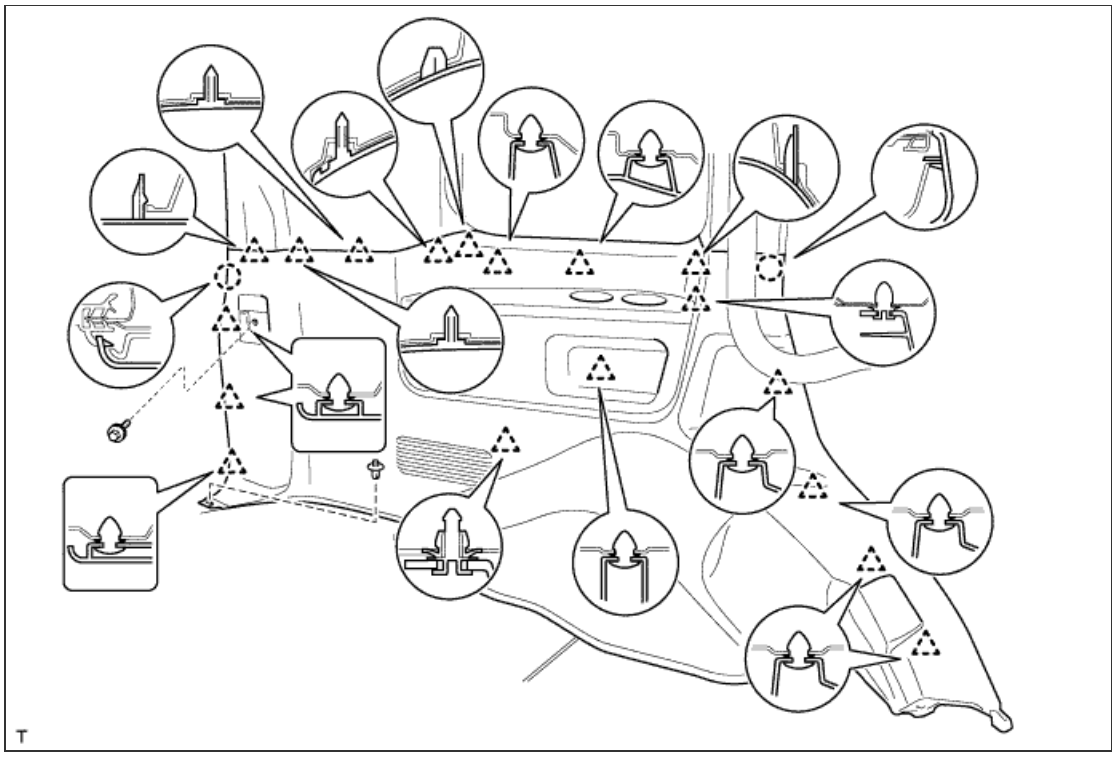
i. Remove the bolt and disconnect the rear No. 2 seat outer belt floor anchor LH.



d. w/ Rear No. 2 Seat, for RH side:

i. Detach the 3 claws and remove the cover.

ii. Remove the bolt and disconnect the rear No. 2 seat outer belt floor anchor RH.

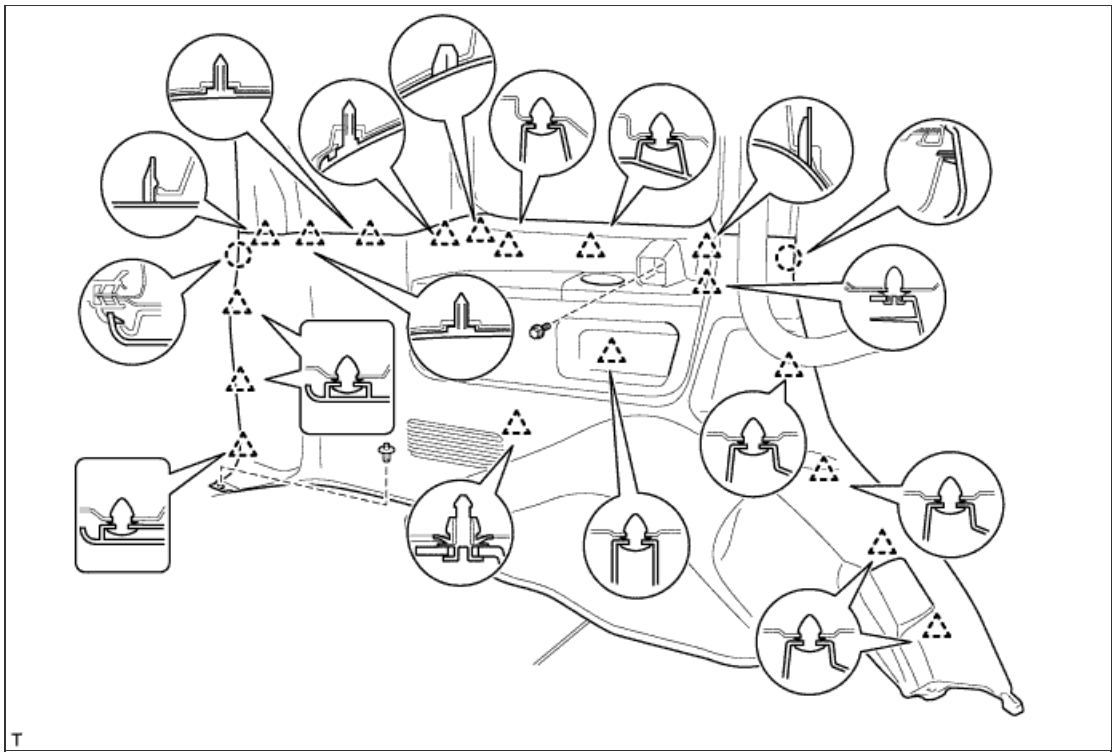


e. w/o Tonneau Cover:

i. Remove the clip and bolt.

ii. Detach the 18 clips and 2 claws.

iii. w/o Rear Air Conditioning System:
Disconnect the rear seat lock control lever cable and then remove the quarter trim panel.

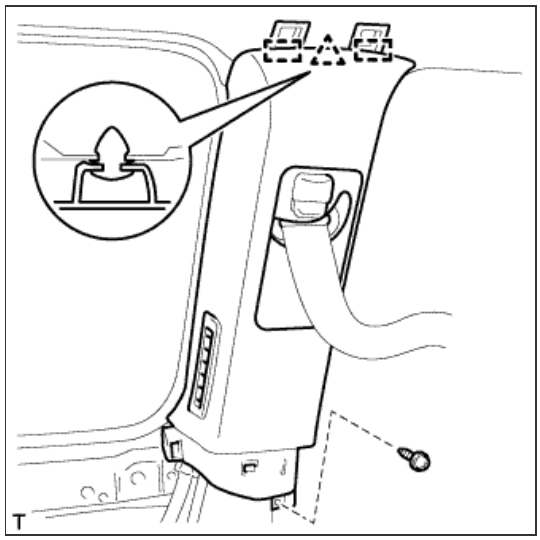


iv. w/ Rear Air Conditioning System:
Disconnect the thermistor connector and rear seat lock control lever cable, and then remove the quarter trim panel.

f. w/ Tonneau Cover:

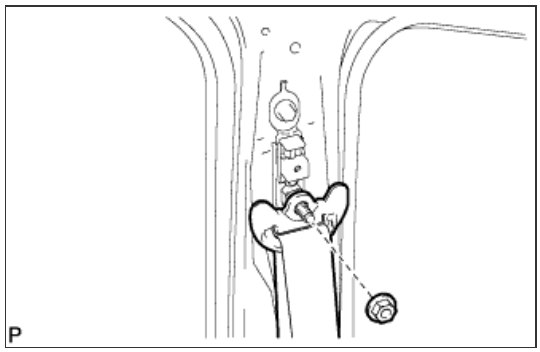
i. Remove the screw and clip.

ii. Detach the 18 clips and 2 claws, and remove the quarter trim panel.



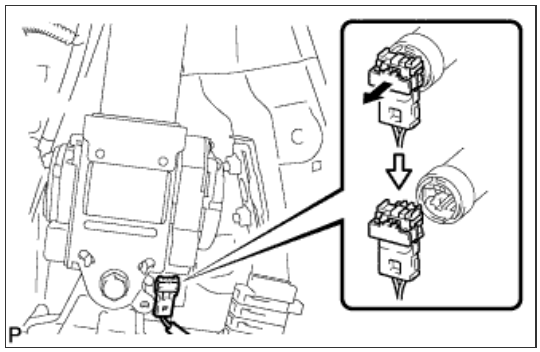
10. REMOVE REAR FRONT QUARTER TRIM GARNISH LH

a. Remove the screw.

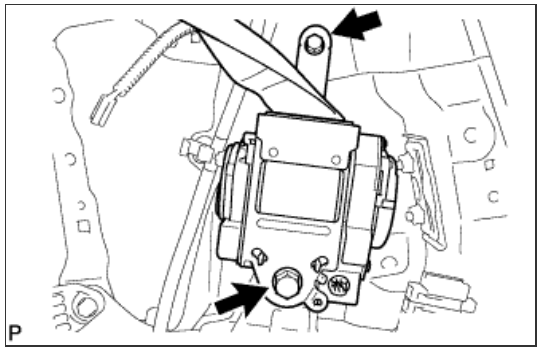


b. Detach the clip and 2 guides.

c. Pass the seat belt anchor through the quarter trim garnish, and remove the quarter trim garnish.

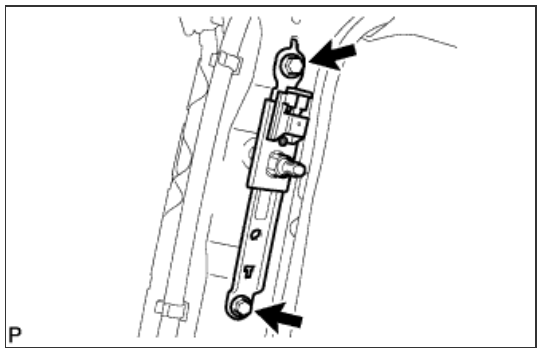


11. REMOVE REAR NO. 1 SEAT OUTER BELT ASSEMBLY LH



a. Remove the nut and seat belt shoulder anchor.

b. w/ Pretensioner:
Disconnect the pretensioner connector as shown in the illustration.



c. Remove the 2 bolts and rear No. 1 seat outer belt.

12. REMOVE REAR SHOULDER BELT ANCHOR PLATE SUB-ASSEMBLY LH

a. Remove the 2 bolts and anchor plate.

for Preparation Click here

HINT:

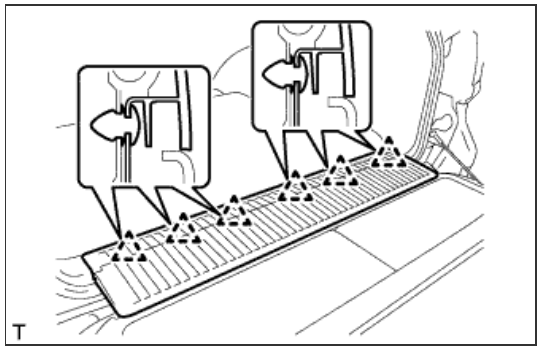
- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**

1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

2. REMOVE TONNEAU COVER ASSEMBLY (w/ Tonneau Cover)



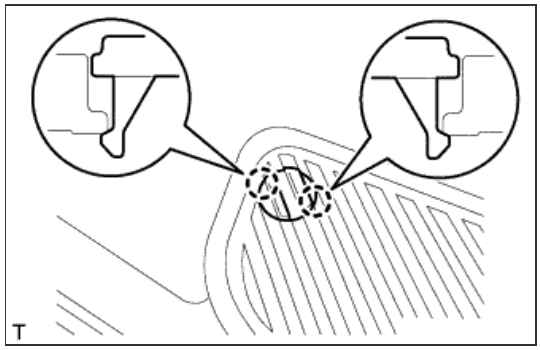
a. Remove the tonneau cover.

3. REMOVE REAR NO. 2 SEAT ASSEMBLY (w/ Rear No. 2 Seat)

a. Remove the rear No. 2 seat assembly (Click here).

4. REMOVE REAR FLOOR MAT REAR SUPPORT PLATE

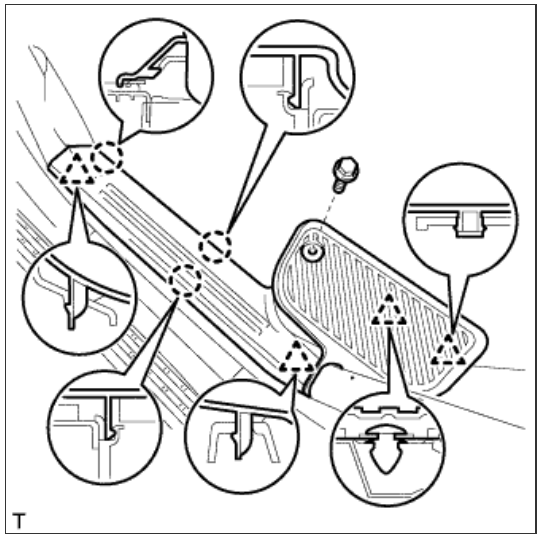
a. Detach the 6 clips and remove the support plate.



5. REMOVE REAR STEP COVER

HINT:

Use the same procedure to remove the step cover on the other side.

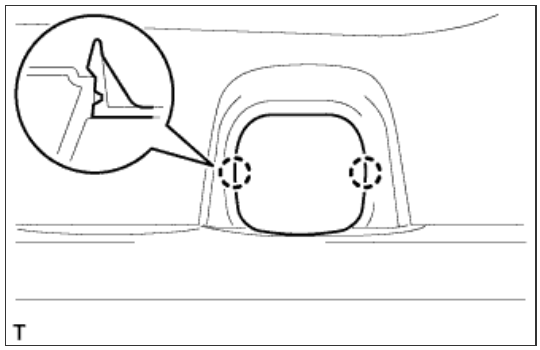


a. Detach the 2 claws and remove the step cover.

6. REMOVE REAR DOOR SCUFF PLATE LH

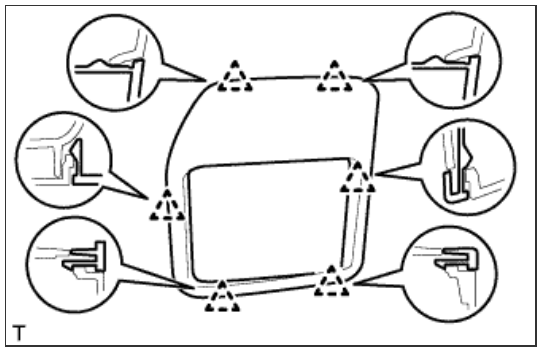
a. Remove the screw.

b. Detach the 3 claws and 4 clips, and remove the scuff plate.



7. REMOVE NO. 1 TONNEAU COVER HOLDER CAP (w/ Tonneau Cover)

HINT:

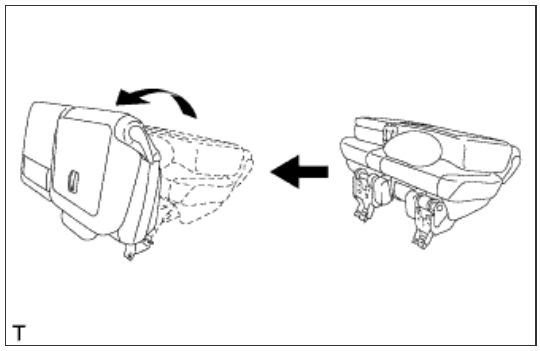


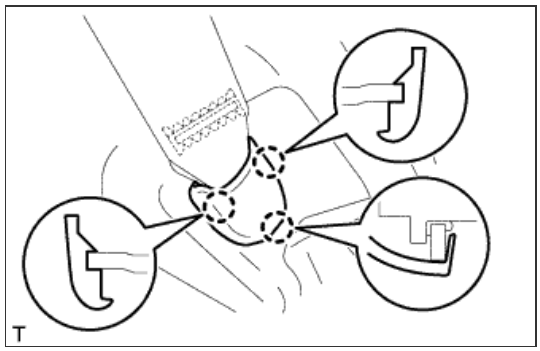
Use the same procedure to remove the tonneau cover holder cap on the other side.

a. Detach the 2 claws and remove the tonneau cover holder cap.

8. REMOVE REAR NO. 2 SEAT COVER BEZEL (w/ Rear No. 2 Seat)

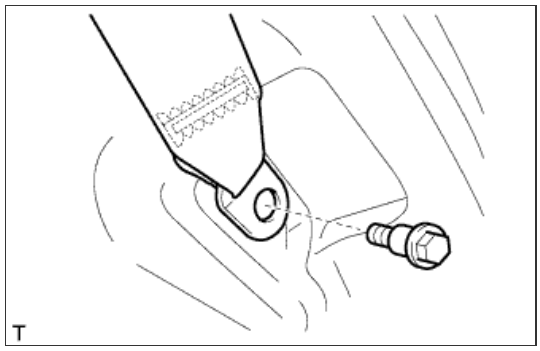
a. Detach the 6 clips and remove the rear No. 2 seat cover bezel.





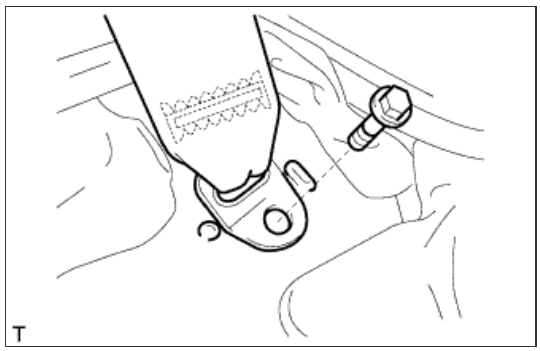
9. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY LH

HINT:

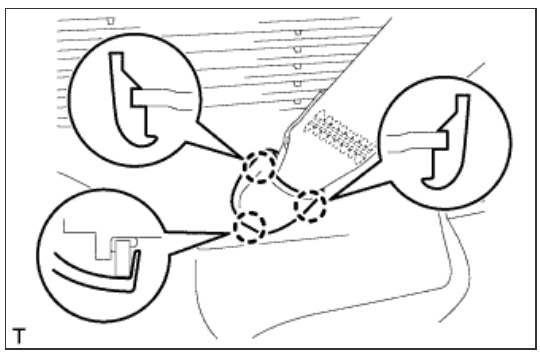


When removing the front quarter trim panel, operate the reclining ad uster release handle and move the No. 1 rear seat to the position shown in the illustration.

a. Detach the 3 claws and remove the cover.

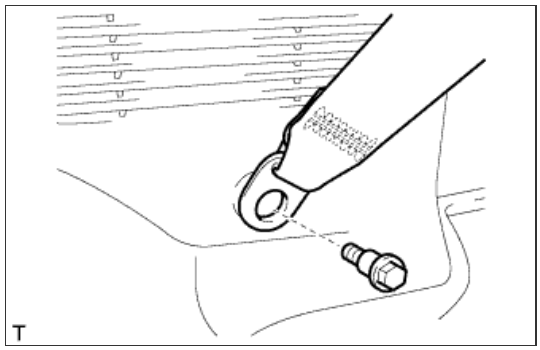


b. Remove the bolt and disconnect the rear seat outer belt floor anchor.



c. w/ Rear No. 2 Seat, for LH side:

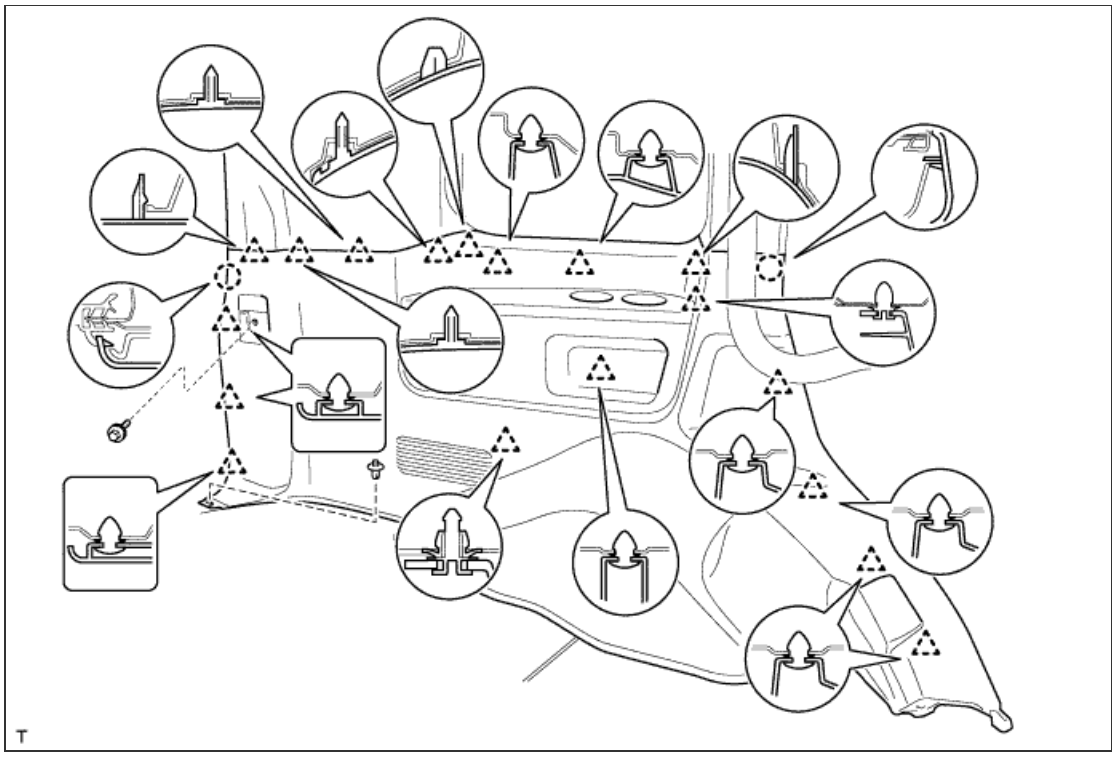
i. Remove the bolt and disconnect the rear No. 2 seat outer belt floor anchor LH.



d. w/ Rear No. 2 Seat, for RH side:

i. Detach the 3 claws and remove the cover.

ii. Remove the bolt and disconnect the rear No. 2 seat outer belt floor anchor RH.

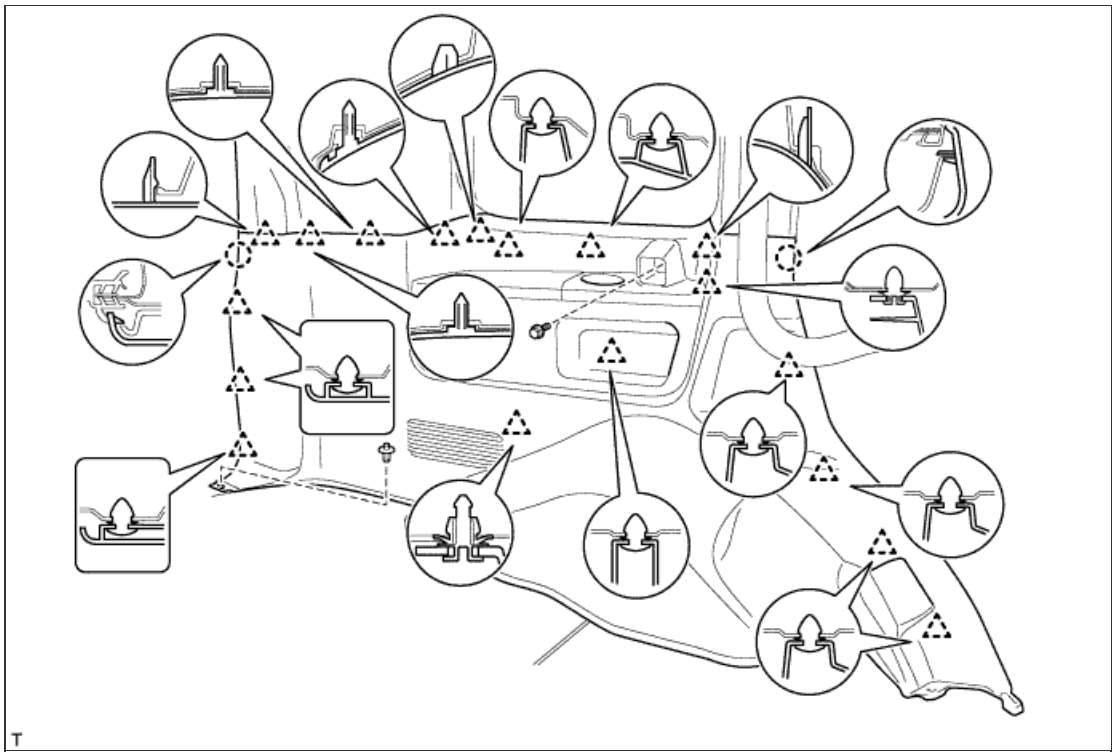


e. w/o Tonneau Cover:

i. Remove the clip and bolt.

ii. Detach the 18 clips and 2 claws.

iii. w/o Rear Air Conditioning System:
Disconnect the rear seat lock control lever cable and then remove the quarter trim panel.

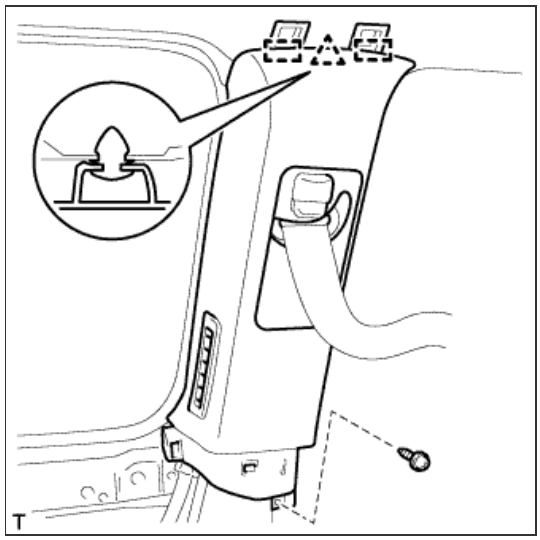


iv. w/ Rear Air Conditioning System:
Disconnect the thermistor connector and rear seat lock control lever cable, and then remove the quarter trim panel.

f. w/ Tonneau Cover:

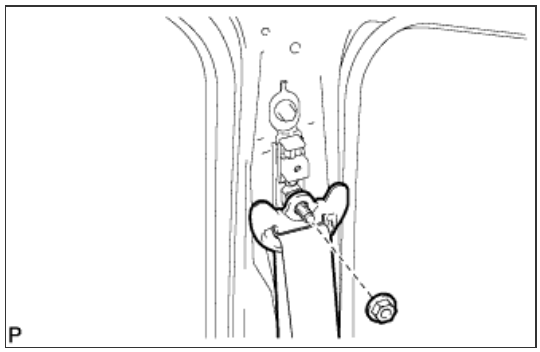
i. Remove the screw and clip.

ii. Detach the 18 clips and 2 claws, and remove the quarter trim panel.



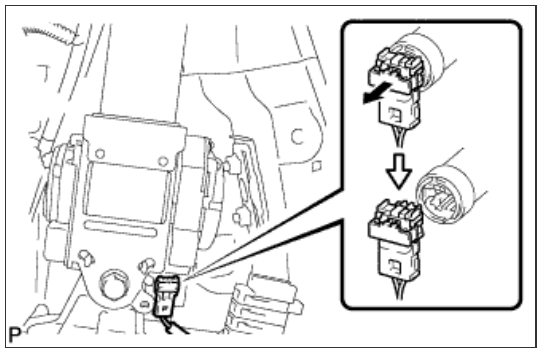
10. REMOVE REAR FRONT QUARTER TRIM GARNISH LH

a. Remove the screw.

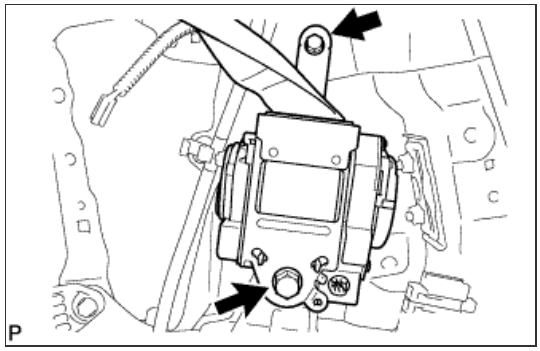


b. Detach the clip and 2 guides.

c. Pass the seat belt anchor through the quarter trim garnish, and remove the quarter trim garnish.

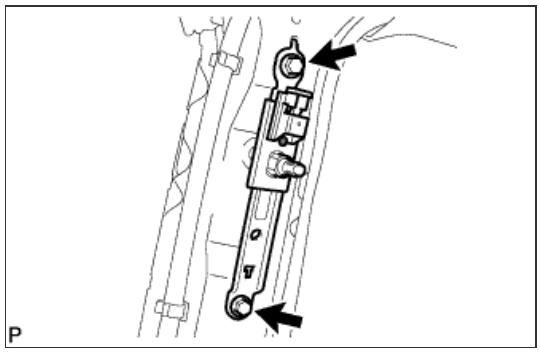


11. REMOVE REAR NO. 1 SEAT OUTER BELT ASSEMBLY LH



a. Remove the nut and seat belt shoulder anchor.

b. w/ Pretensioner:
Disconnect the pretensioner connector as shown in the illustration.



c. Remove the 2 bolts and rear No. 1 seat outer belt.

12. REMOVE REAR SHOULDER BELT ANCHOR PLATE SUB-ASSEMBLY LH

a. Remove the 2 bolts and anchor plate.

for Preparation Click here

HINT:

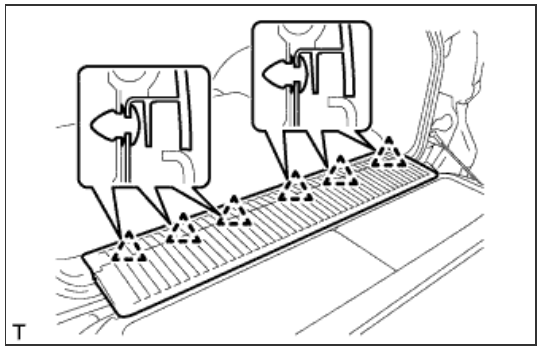
- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**

1. DISCONNECT CABLE FROM NEGATIVE BATTERY TERMINAL

CAUTION:

Wait at least 90 seconds after disconnecting the cable from the negative (-) battery terminal to disable the SRS system.

2. REMOVE TONNEAU COVER ASSEMBLY (w/ Tonneau Cover)



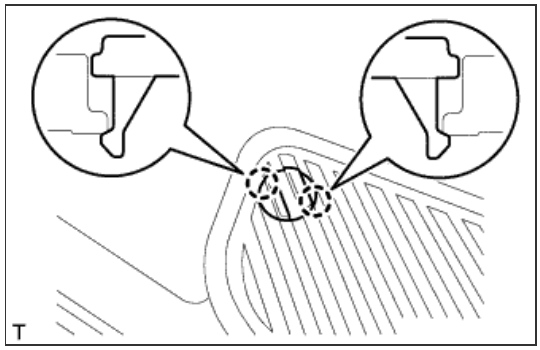
a. Remove the tonneau cover.

3. REMOVE REAR NO. 2 SEAT ASSEMBLY (w/ Rear No. 2 Seat)

a. Remove the rear No. 2 seat assembly (Click here).

4. REMOVE REAR FLOOR MAT REAR SUPPORT PLATE

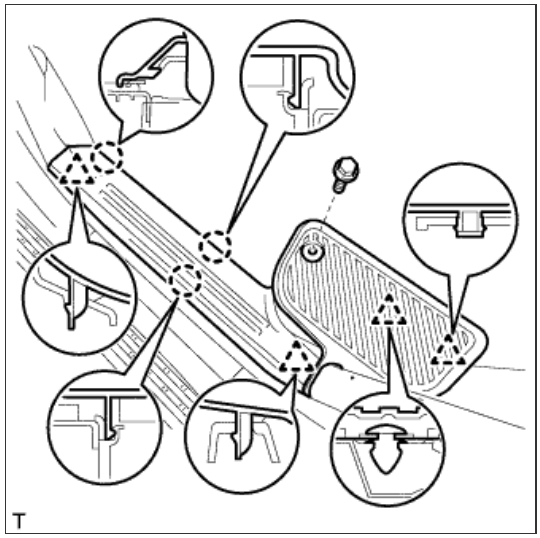
a. Detach the 6 clips and remove the support plate.



5. REMOVE REAR STEP COVER

HINT:

Use the same procedure to remove the step cover on the other side.

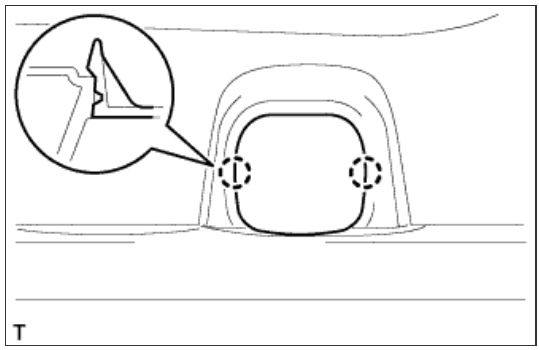


a. Detach the 2 claws and remove the step cover.

6. REMOVE REAR DOOR SCUFF PLATE LH

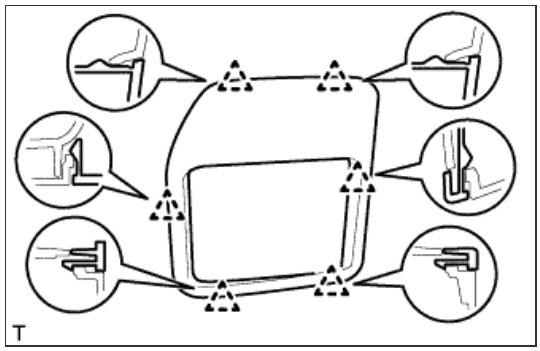
a. Remove the screw.

b. Detach the 3 claws and 4 clips, and remove the scuff plate.



7. REMOVE NO. 1 TONNEAU COVER HOLDER CAP (w/ Tonneau Cover)

HINT:

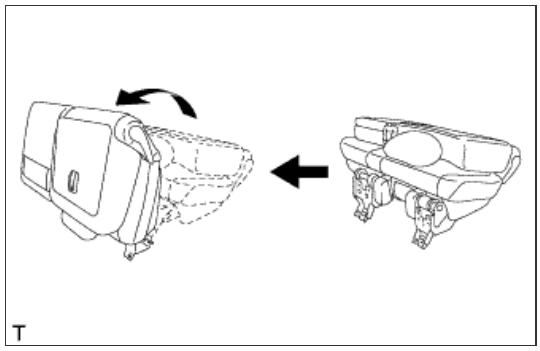


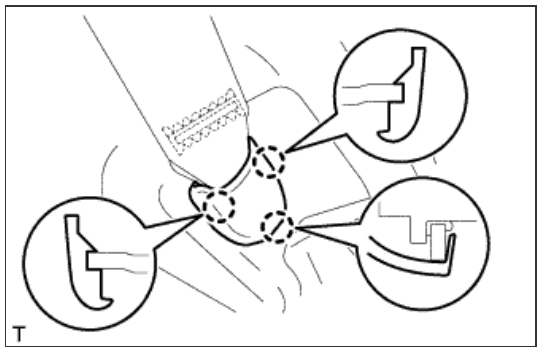
Use the same procedure to remove the tonneau cover holder cap on the other side.

a. Detach the 2 claws and remove the tonneau cover holder cap.

8. REMOVE REAR NO. 2 SEAT COVER BEZEL (w/ Rear No. 2 Seat)

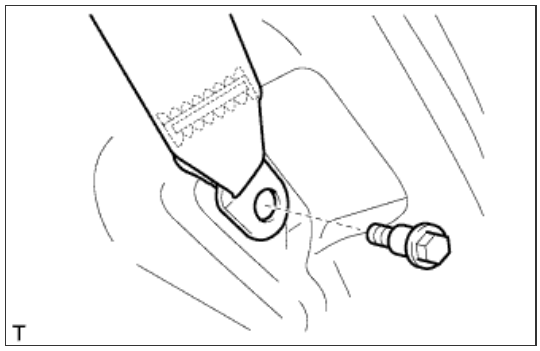
a. Detach the 6 clips and remove the rear No. 2 seat cover bezel.





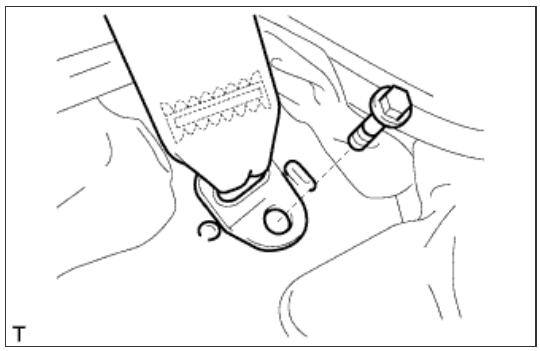
9. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY LH

HINT:

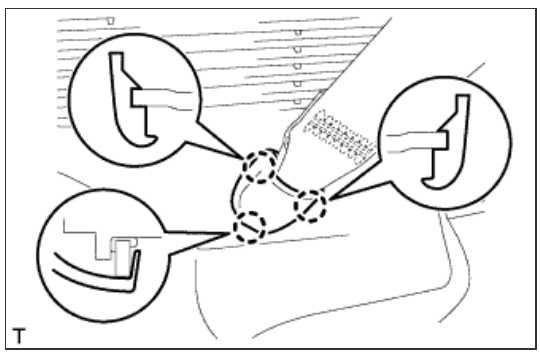


When removing the front quarter trim panel, operate the reclining ad uster release handle and move the No. 1 rear seat to the position shown in the illustration.

a. Detach the 3 claws and remove the cover.

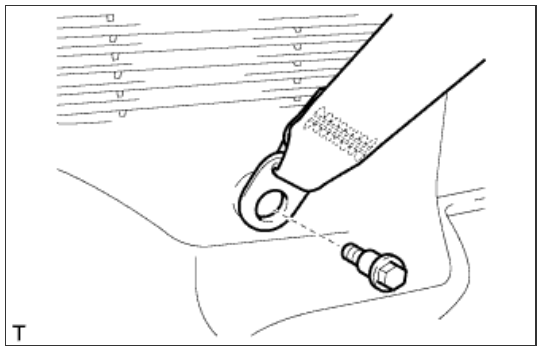


b. Remove the bolt and disconnect the rear seat outer belt floor anchor.



c. w/ Rear No. 2 Seat, for LH side:

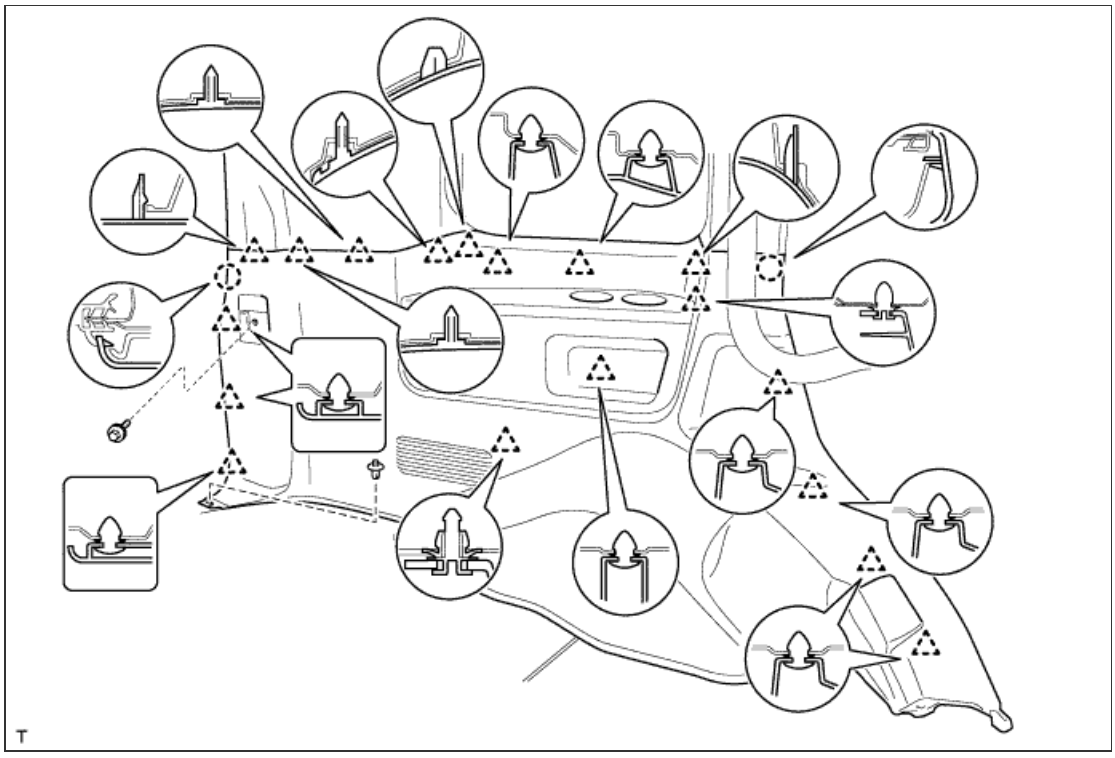
i. Remove the bolt and disconnect the rear No. 2 seat outer belt floor anchor LH.



d. w/ Rear No. 2 Seat, for RH side:

i. Detach the 3 claws and remove the cover.

ii. Remove the bolt and disconnect the rear No. 2 seat outer belt floor anchor RH.

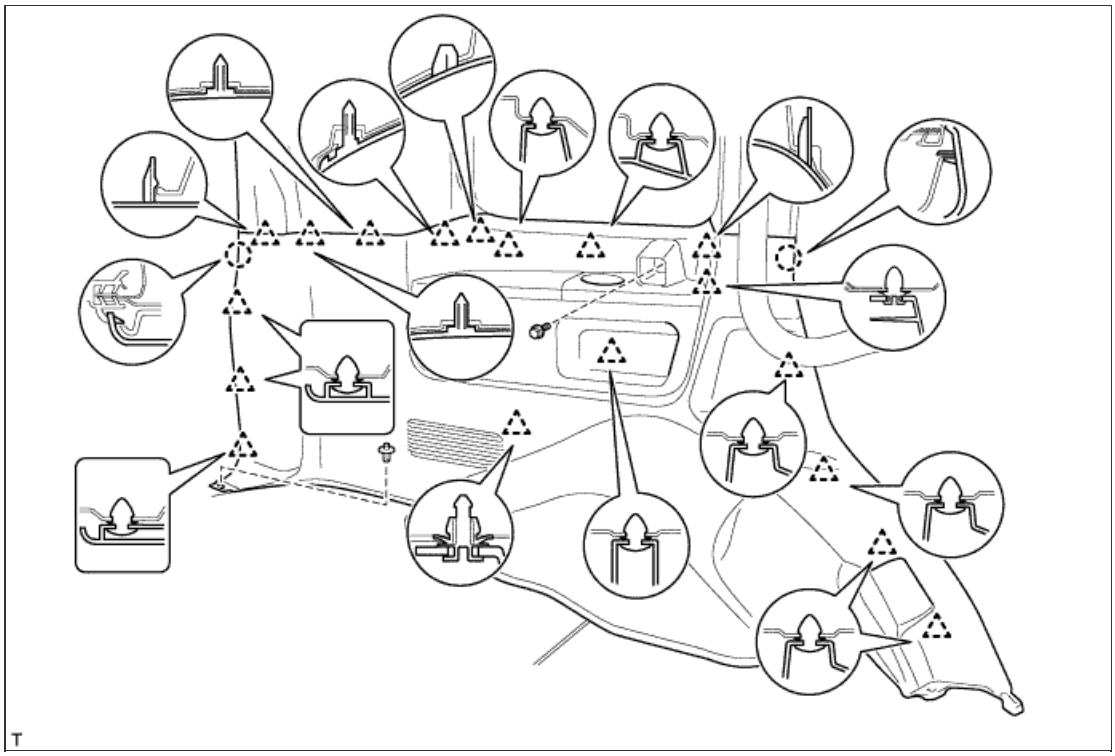


e. w/o Tonneau Cover:

i. Remove the clip and bolt.

ii. Detach the 18 clips and 2 claws.

iii. w/o Rear Air Conditioning System:
Disconnect the rear seat lock control lever cable and then remove the quarter trim panel.

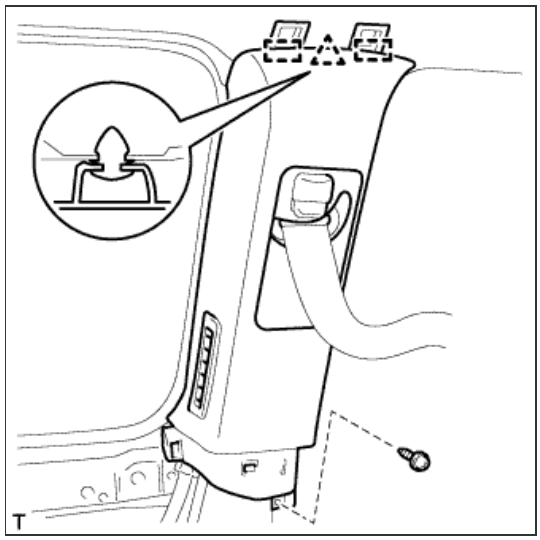


iv. w/ Rear Air Conditioning System:
Disconnect the thermistor connector and rear seat lock control lever cable, and then remove the quarter trim panel.

f. w/ Tonneau Cover:

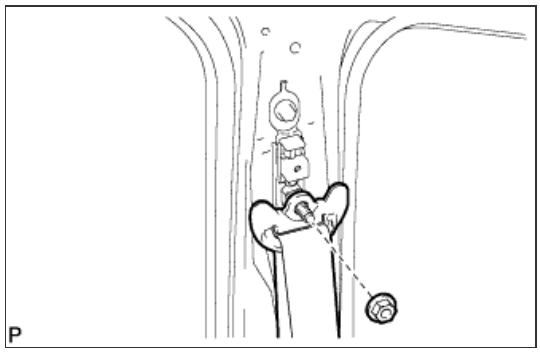
i. Remove the screw and clip.

ii. Detach the 18 clips and 2 claws, and remove the quarter trim panel.



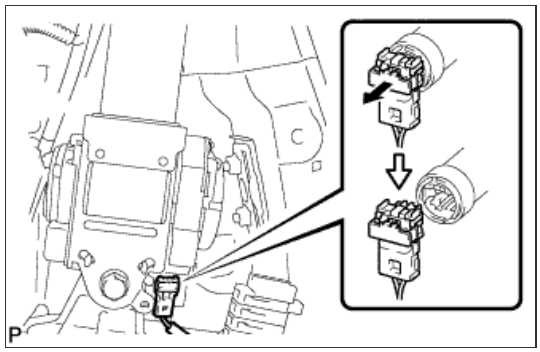
10. REMOVE REAR FRONT QUARTER TRIM GARNISH LH

a. Remove the screw.

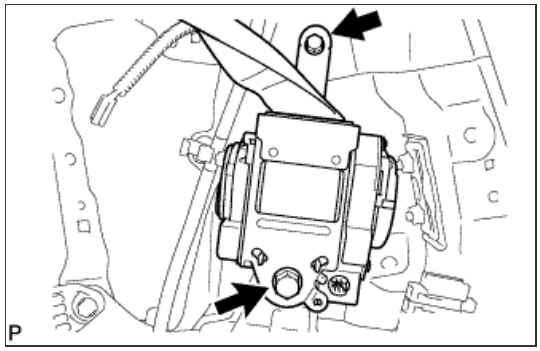


b. Detach the clip and 2 guides.

c. Pass the seat belt anchor through the quarter trim garnish, and remove the quarter trim garnish.

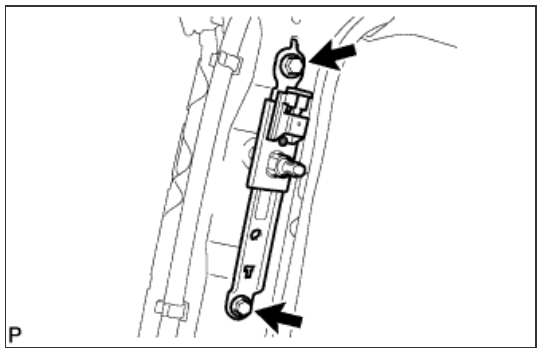


11. REMOVE REAR NO. 1 SEAT OUTER BELT ASSEMBLY LH



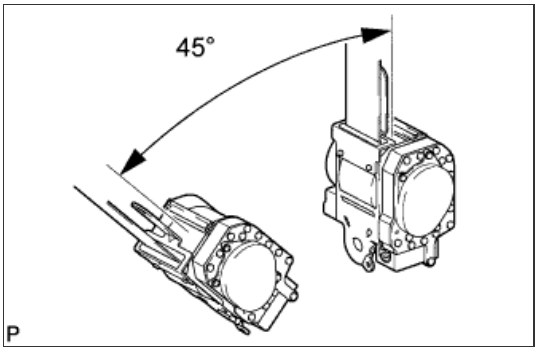
a. Remove the nut and seat belt shoulder anchor.

b. w/ Pretensioner:
Disconnect the pretensioner connector as shown in the illustration.



c. Remove the 2 bolts and rear No. 1 seat outer belt.

12. REMOVE REAR SHOULDER BELT ANCHOR PLATE SUB-ASSEMBLY LH



a. Remove the 2 bolts and anchor plate.

for Preparation Click here

1. INSPECT REAR NO. 1 SEAT OUTER BELT ASSEMBLY

a. Check the ELR.

i. When the inclination of the retractor is 15° or less, check that the belt can be pulled from the retractor. When the inclination of the retractor is over 45°, check that the belt locks.
If the operation is not as specified, replace the seat belt assembly.

b. w/ ALR:
Check the fastening function of the child restraint system.

NOTICE:

The check should be performed with the outer belt installed.

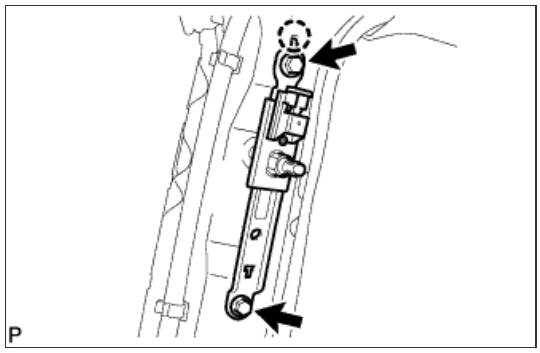
i. When the belt is pulled out fully, the belt should automatically start to retract.

ii. After the belt has fully retracted, the belt should be able to be pulled out and retracted again.
If the operation is not as specified, replace the belt assembly.

for Preparation Click here

HINT:

- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**
- **A bolt without a torque specification is shown in the standard bolt chart (Click here).**



1. INSTALL REAR SHOULDER BELT ANCHOR PLATE SUB-ASSEMBLY LH

a. Align the anchor plate positioning hole with the claw, and install the anchor plate with the 2 bolts.

HINT:

First install the upper bolt, and then install the lower bolt.

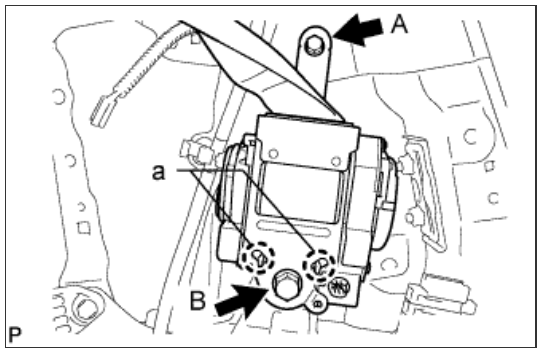
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

2. INSTALL REAR NO. 1 SEAT OUTER BELT ASSEMBLY LH

NOTICE:

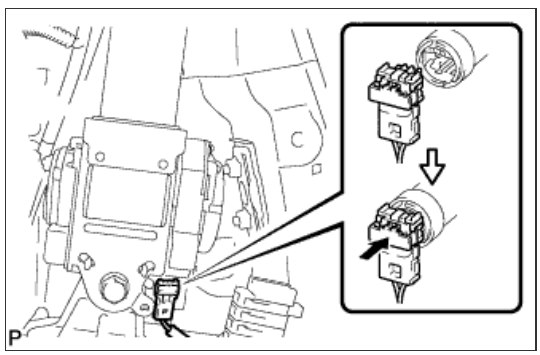
w/ Pretensioner:

When installing the retractor, make sure the claws of the vehicle (labeled "a" in the illustration) only contact the installation areas of the retractor.



a. Align the claws with the seat belt positioning holes and install the retractor of the seat belt as shown in the illustration.

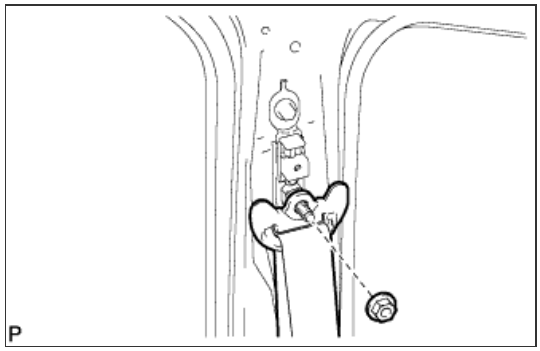
b. Install the seat belt with the 2 bolts.



HINT:

First install bolt A, and then install bolt B.

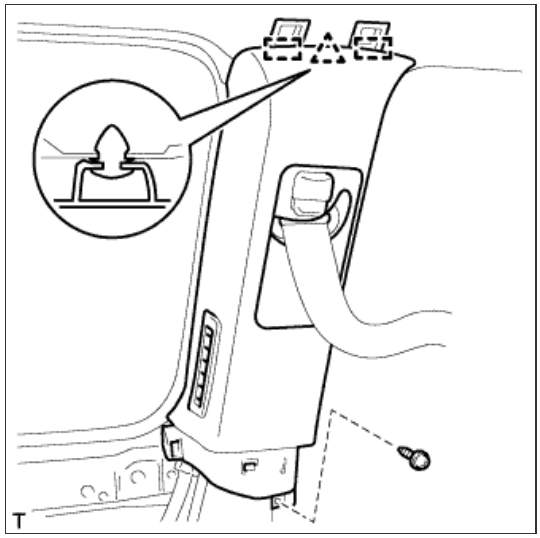
Torque:
for bolt A:
8.5 N*m{ 87 kgf*cm , 75 in.*lbf }
for bolt B:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }



c. w/ Pretensioner:
Connect the pretensioner connector as shown in the illustration.

d. Install the seat belt shoulder anchor with the nut.

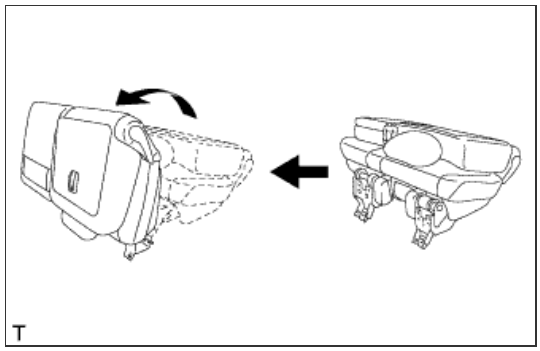
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }



3. INSTALL REAR FRONT QUARTER TRIM PANEL ASSEMBLY LH

a. Pass the seat belt anchor through the quarter trim garnish.

b. Attach the clip and 2 guides to install the quarter trim garnish.



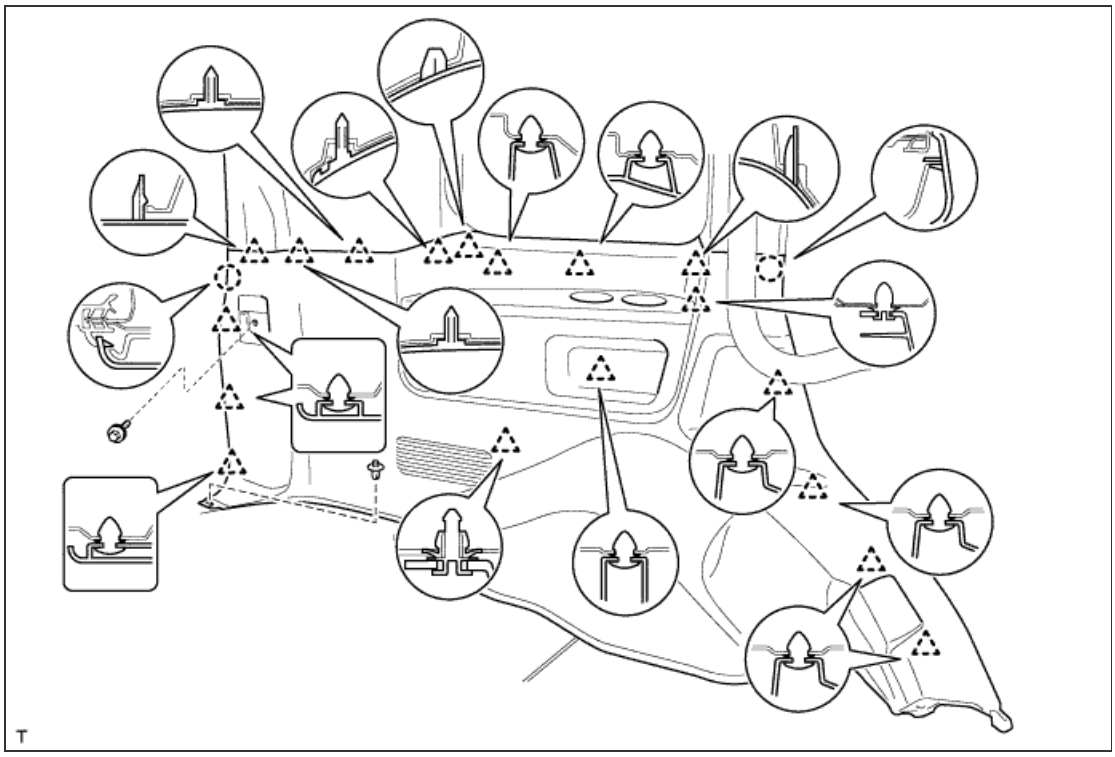
c. Install the screw.

4. INSTALL FRONT QUARTER TRIM PANEL ASSEMBLY LH

HINT:

When installing the front quarter trim panel, operate the reclining adjuster release handle and move the No. 1 rear seat to the position shown in the illustration.

a. w/o Tonneau Cover:

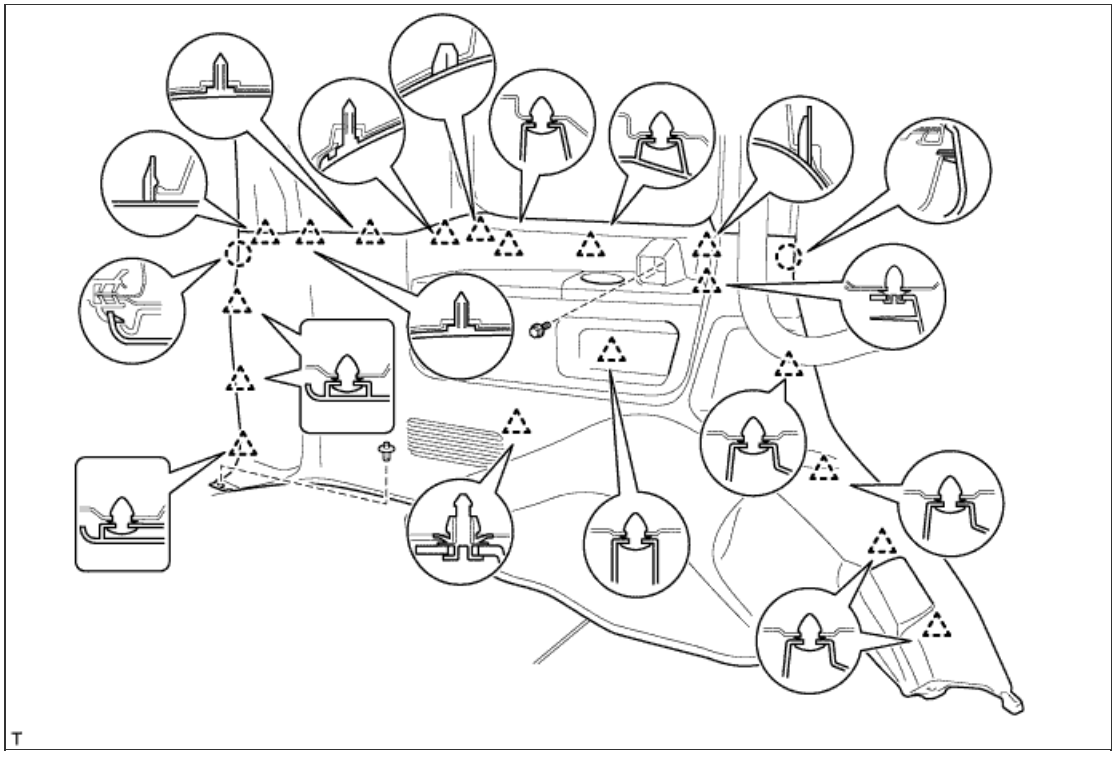


i. w/o Rear Air Conditioning System:
Connect the rear seat lock control lever cable.

ii. w/ Rear Air Conditioning System:
Connect the thermistor connector and rear seat lock control lever cable.

iii. Attach the 18 clips and 2 claws to install the quarter trim panel.

iv. Install the clip and bolt.

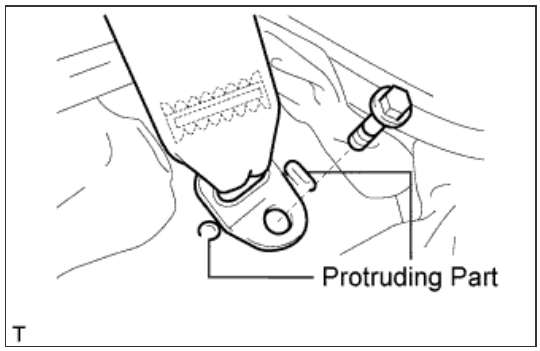


Torque:
12 N*m{ 122 kgf*cm , 9 ft.*lbf }

b. w/ Tonneau Cover:

i. Attach the 18 clips and 2 claws to install the quarter trim panel.

ii. Install the screw and clip.

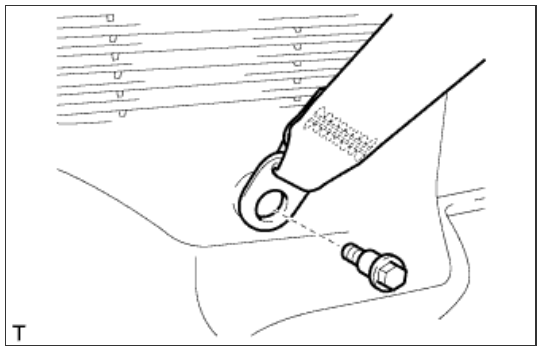


c. w/ Rear No. 2 Seat, for LH side:

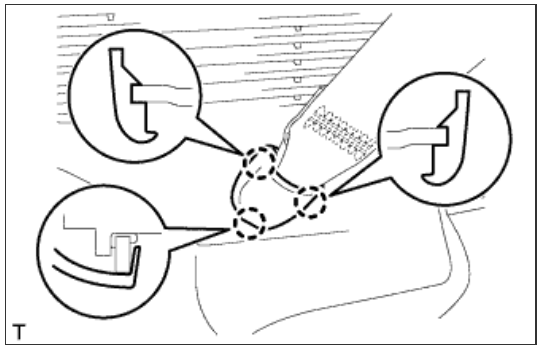
i. Install the rear No. 2 seat belt anchor LH with the bolt.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:



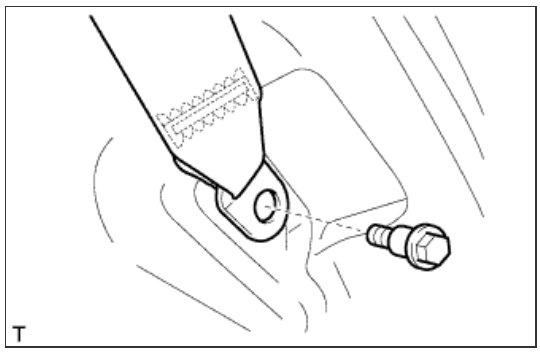
Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.



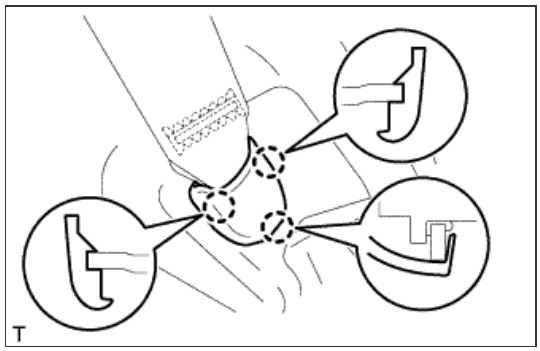
d. w/ Rear No. 2 Seat, for RH side:

i. Install the rear No. 2 seat belt anchor with the bolt.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

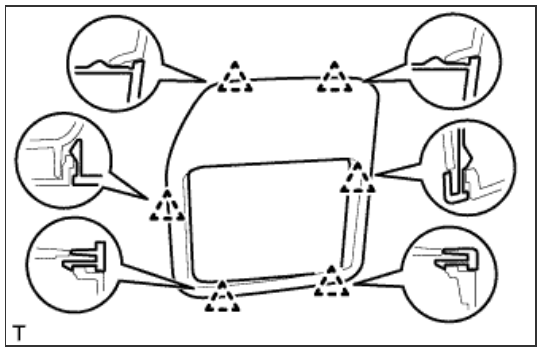


ii. Attach the 3 claws to install the cover.



e. Install the rear No. 1 seat belt anchor with the bolt.

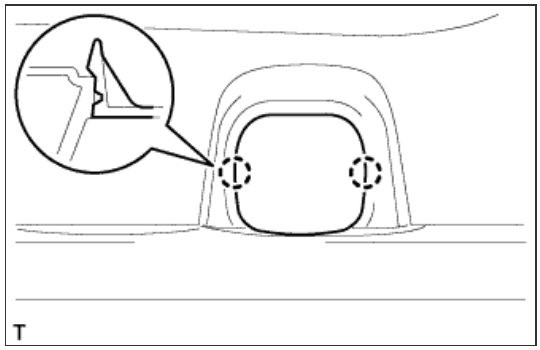
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }



f. Attach the 3 claws to install the cover.

5. INSTALL REAR NO. 2 SEAT COVER BEZEL

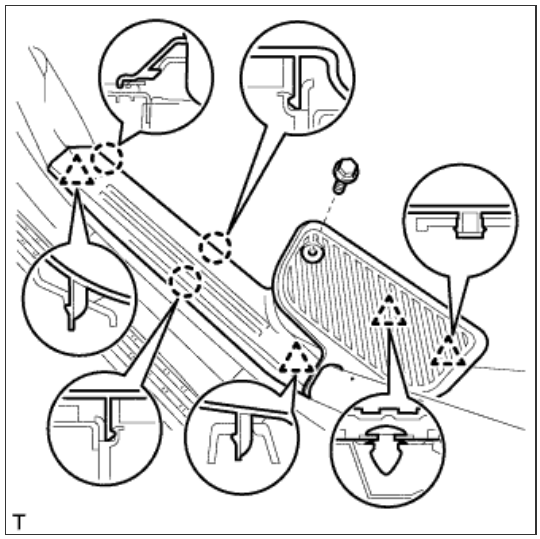
a. Attach the 6 clips to install the rear No. 2 seat cover bezel.



6. INSTALL NO. 1 TONNEAU COVER HOLDER CAP (w/ Tonneau Cover)

HINT:

Use the same procedure to install the tonneau cover holder cap on the other side.

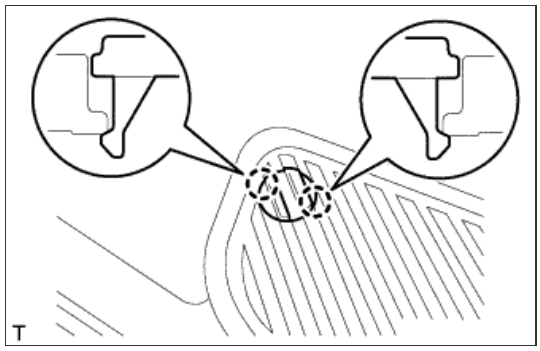


a. Attach the 2 claws to install the tonneau cover holder cap.

7. INSTALL REAR DOOR SCUFF PLATE LH

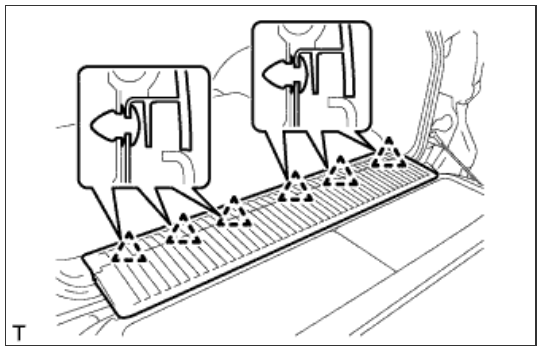
a. Attach the 3 claws and 4 clips to install the scuff plate.

b. Install the screw.



8. INSTALL REAR STEP COVER

HINT:



Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.

9. INSTALL REAR FLOOR MAT REAR SUPPORT PLATE

a. Attach the 6 clips to install the support plate.

10. INSTALL REAR NO. 2 SEAT ASSEMBLY (w/ Rear No. 2 Seat)

a. Install the rear No. 2 seat assembly (Click here).

11. INSTALL TONNEAU COVER ASSEMBLY

a. Install the tonneau cover assembly.

12. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL

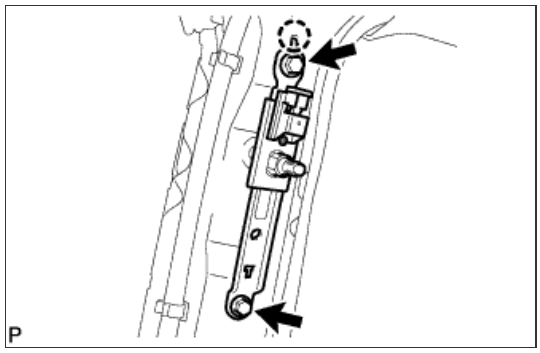
13. CHECK SRS WARNING LIGHT

a. Check the SRS warning light (Click here).

for Preparation Click here

HINT:

- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**
- **A bolt without a torque specification is shown in the standard bolt chart (Click here).**



1. INSTALL REAR SHOULDER BELT ANCHOR PLATE SUB-ASSEMBLY LH

a. Align the anchor plate positioning hole with the claw, and install the anchor plate with the 2 bolts.

HINT:

First install the upper bolt, and then install the lower bolt.

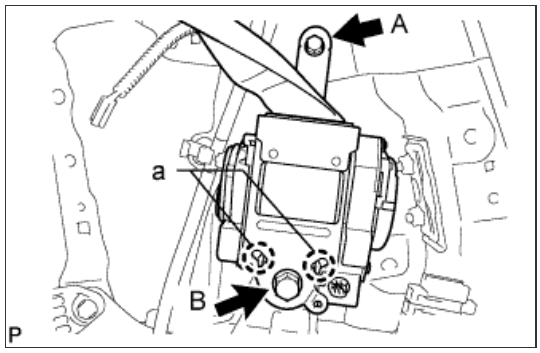
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

2. INSTALL REAR NO. 1 SEAT OUTER BELT ASSEMBLY LH

NOTICE:

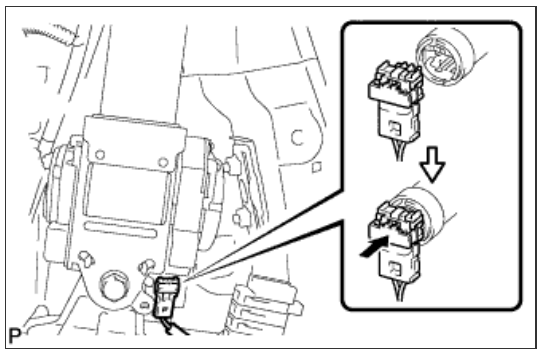
w/ Pretensioner:

When installing the retractor, make sure the claws of the vehicle (labeled "a" in the illustration) only contact the installation areas of the retractor.



a. Align the claws with the seat belt positioning holes and install the retractor of the seat belt as shown in the illustration.

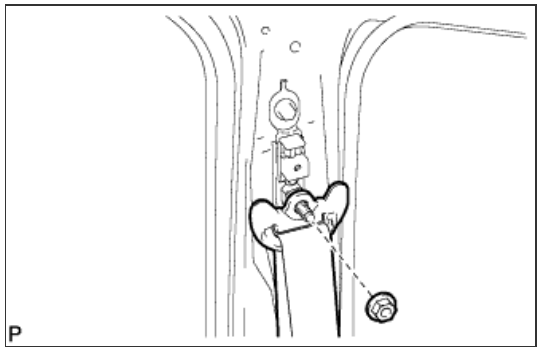
b. Install the seat belt with the 2 bolts.



HINT:

First install bolt A, and then install bolt B.

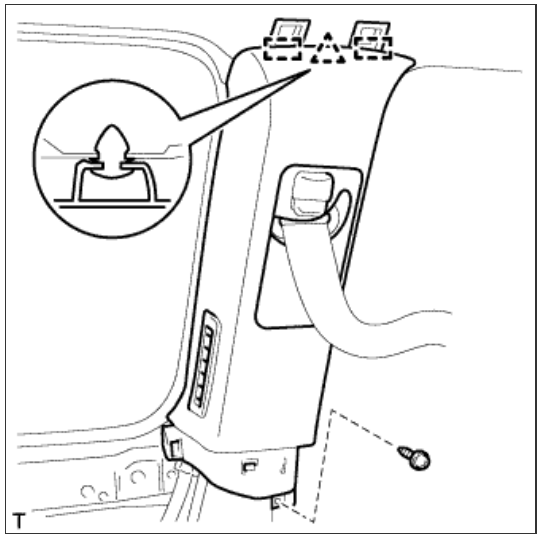
Torque:
for bolt A:
8.5 N*m{ 87 kgf*cm , 75 in.*lbf }
for bolt B:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }



c. w/ Pretensioner:
Connect the pretensioner connector as shown in the illustration.

d. Install the seat belt shoulder anchor with the nut.

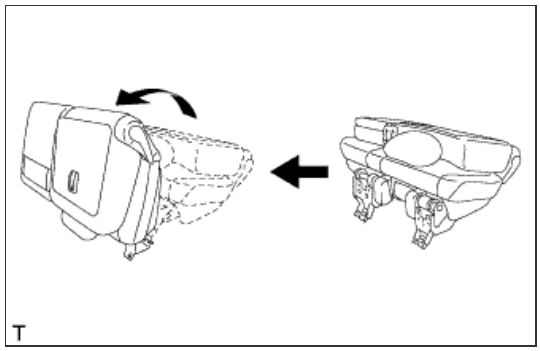
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }



3. INSTALL REAR FRONT QUARTER TRIM PANEL ASSEMBLY LH

a. Pass the seat belt anchor through the quarter trim garnish.

b. Attach the clip and 2 guides to install the quarter trim garnish.



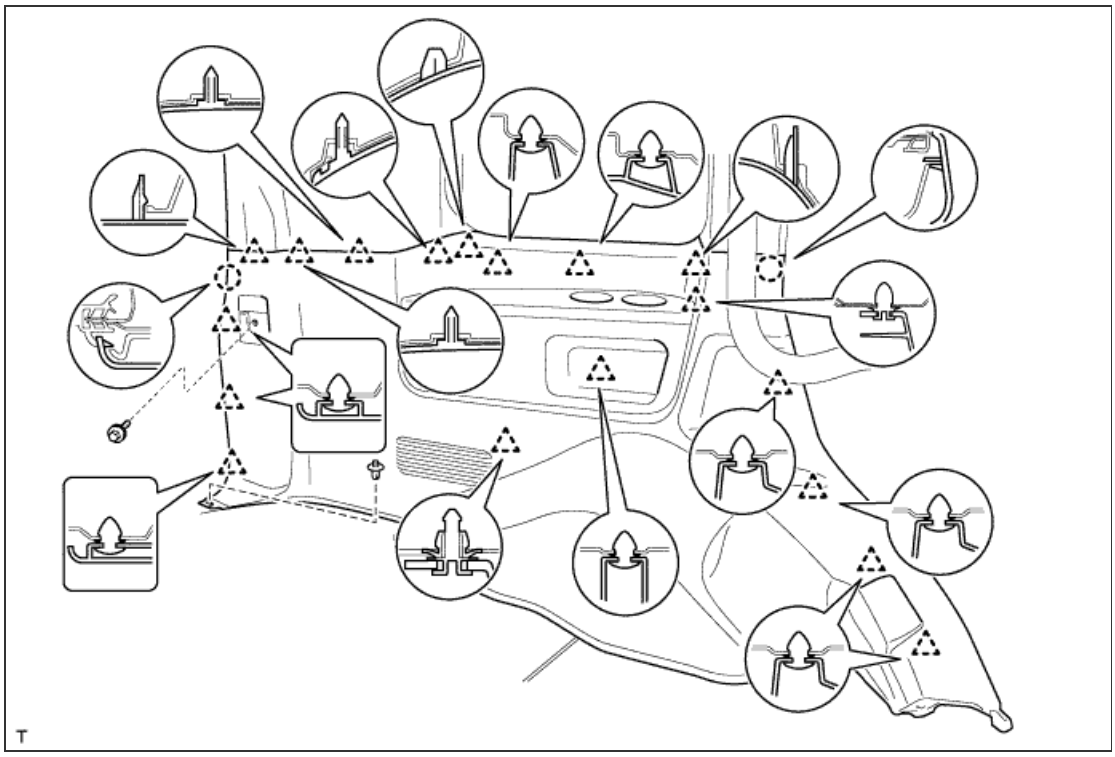
c. Install the screw.

4. INSTALL FRONT QUARTER TRIM PANEL ASSEMBLY LH

HINT:

When installing the front quarter trim panel, operate the reclining adjuster release handle and move the No. 1 rear seat to the position shown in the illustration.

a. w/o Tonneau Cover:

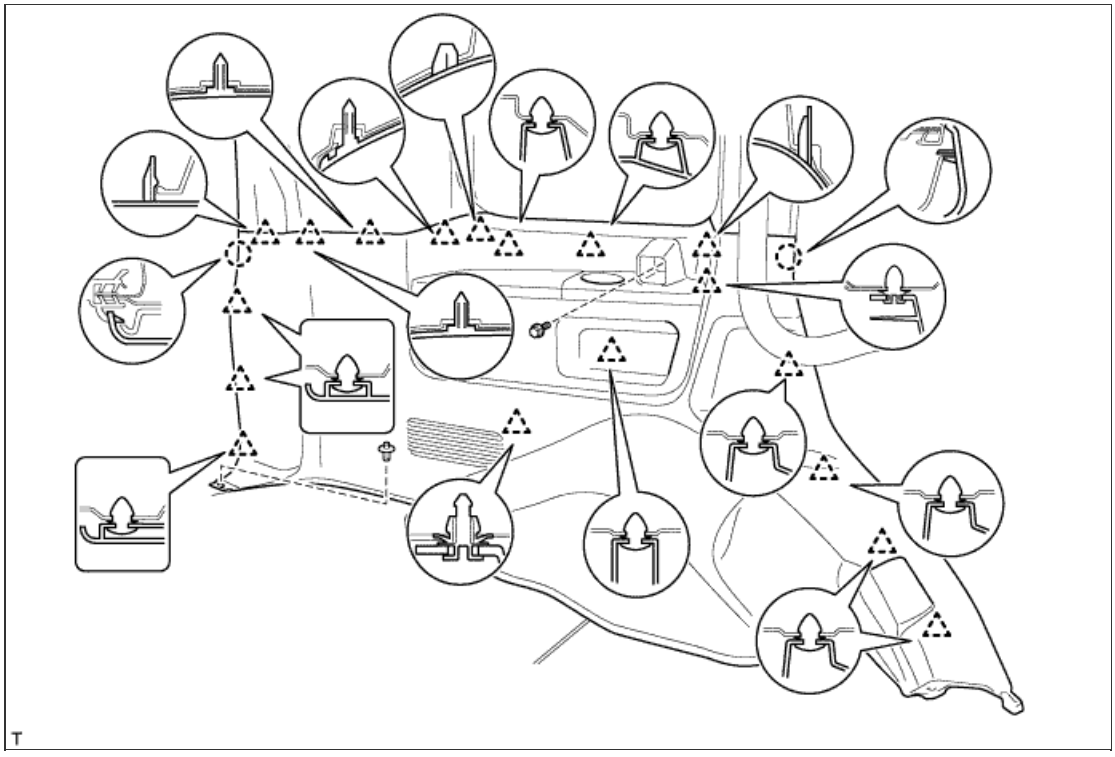


i. w/o Rear Air Conditioning System:
Connect the rear seat lock control lever cable.

ii. w/ Rear Air Conditioning System:
Connect the thermistor connector and rear seat lock control lever cable.

iii. Attach the 18 clips and 2 claws to install the quarter trim panel.

iv. Install the clip and bolt.

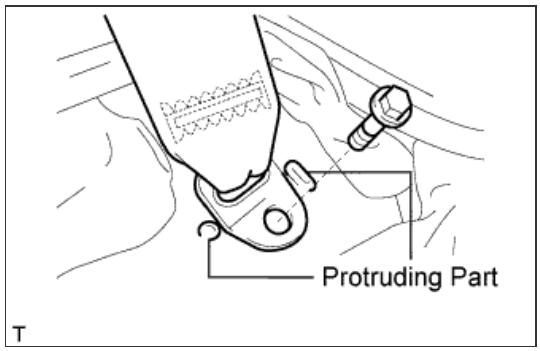


Torque:
12 N*m{ 122 kgf*cm , 9 ft.*lbf }

b. w/ Tonneau Cover:

i. Attach the 18 clips and 2 claws to install the quarter trim panel.

ii. Install the screw and clip.

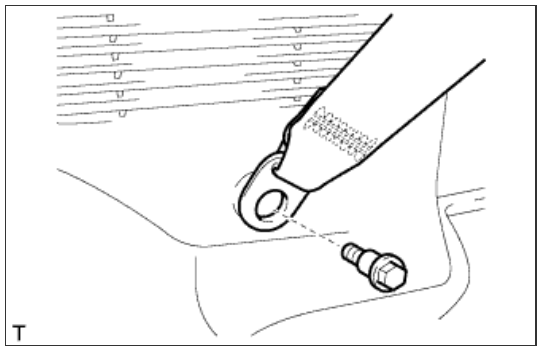


c. w/ Rear No. 2 Seat, for LH side:

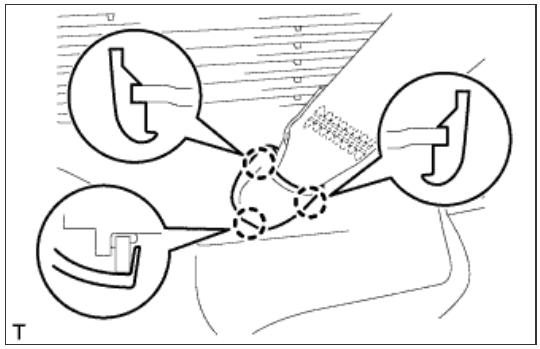
i. Install the rear No. 2 seat belt anchor LH with the bolt.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:



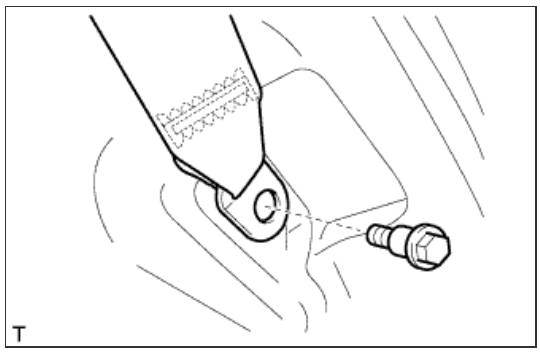
Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.



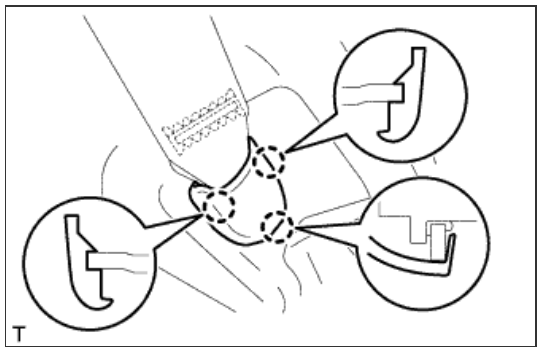
d. w/ Rear No. 2 Seat, for RH side:

i. Install the rear No. 2 seat belt anchor with the bolt.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

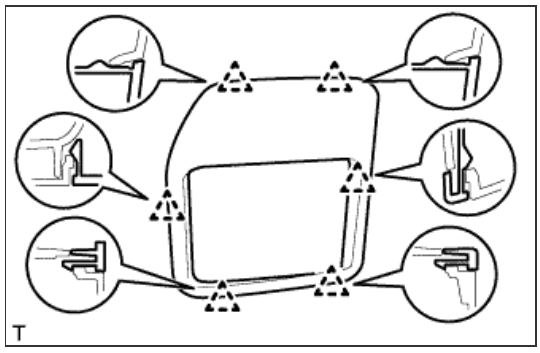


ii. Attach the 3 claws to install the cover.



e. Install the rear No. 1 seat belt anchor with the bolt.

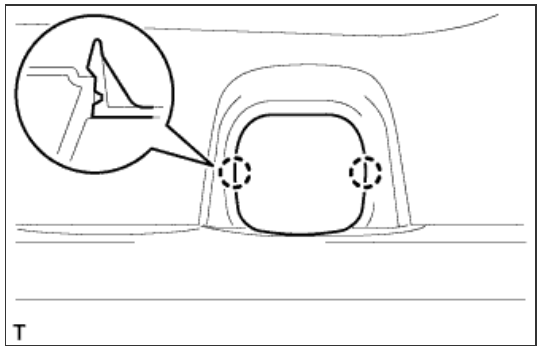
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }



f. Attach the 3 claws to install the cover.

5. INSTALL REAR NO. 2 SEAT COVER BEZEL

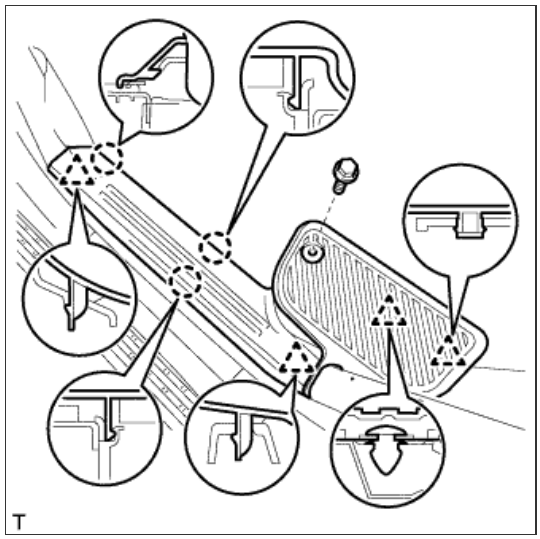
a. Attach the 6 clips to install the rear No. 2 seat cover bezel.



6. INSTALL NO. 1 TONNEAU COVER HOLDER CAP (w/ Tonneau Cover)

HINT:

Use the same procedure to install the tonneau cover holder cap on the other side.

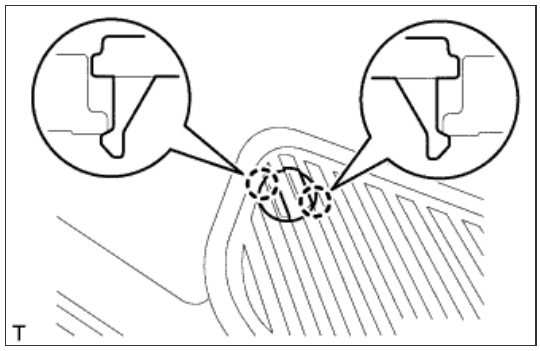


a. Attach the 2 claws to install the tonneau cover holder cap.

7. INSTALL REAR DOOR SCUFF PLATE LH

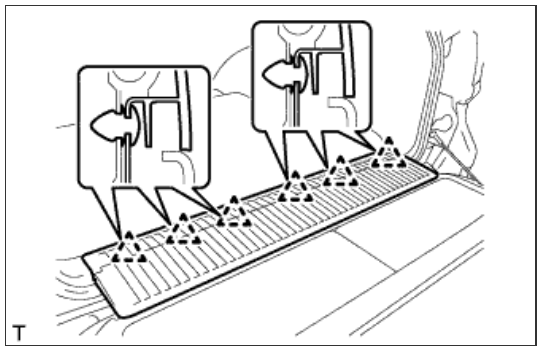
a. Attach the 3 claws and 4 clips to install the scuff plate.

b. Install the screw.



8. INSTALL REAR STEP COVER

HINT:



Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.

9. INSTALL REAR FLOOR MAT REAR SUPPORT PLATE

a. Attach the 6 clips to install the support plate.

10. INSTALL REAR NO. 2 SEAT ASSEMBLY (w/ Rear No. 2 Seat)

a. Install the rear No. 2 seat assembly (Click here).

11. INSTALL TONNEAU COVER ASSEMBLY

a. Install the tonneau cover assembly.

12. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL

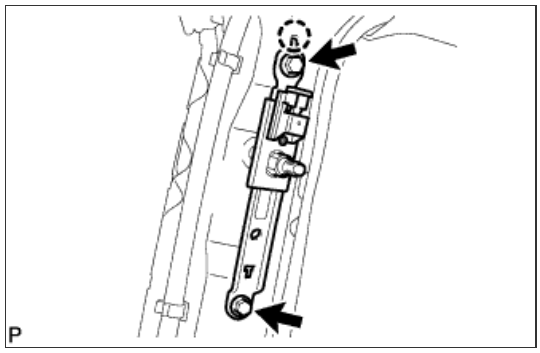
13. CHECK SRS WARNING LIGHT

a. Check the SRS warning light (Click here).

for Preparation Click here

HINT:

- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**
- **A bolt without a torque specification is shown in the standard bolt chart (Click here).**



1. INSTALL REAR SHOULDER BELT ANCHOR PLATE SUB-ASSEMBLY LH

a. Align the anchor plate positioning hole with the claw, and install the anchor plate with the 2 bolts.

HINT:

First install the upper bolt, and then install the lower bolt.

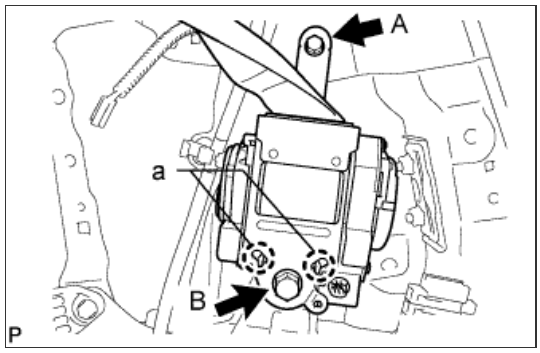
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

2. INSTALL REAR NO. 1 SEAT OUTER BELT ASSEMBLY LH

NOTICE:

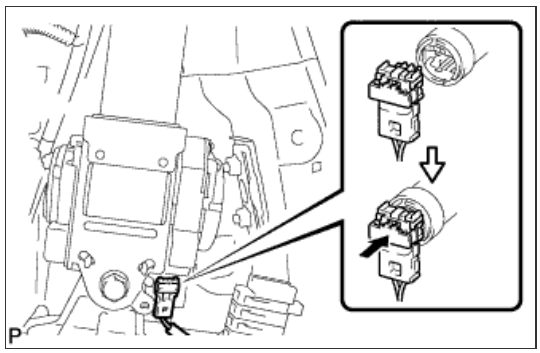
w/ Pretensioner:

When installing the retractor, make sure the claws of the vehicle (labeled "a" in the illustration) only contact the installation areas of the retractor.



a. Align the claws with the seat belt positioning holes and install the retractor of the seat belt as shown in the illustration.

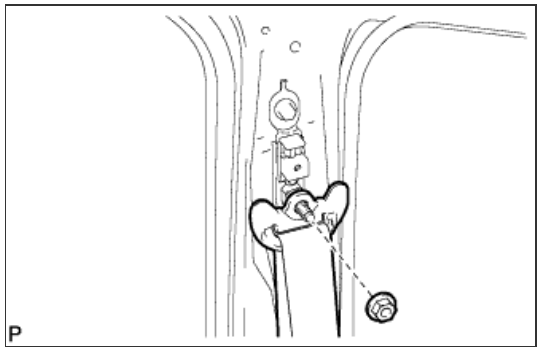
b. Install the seat belt with the 2 bolts.



HINT:

First install bolt A, and then install bolt B.

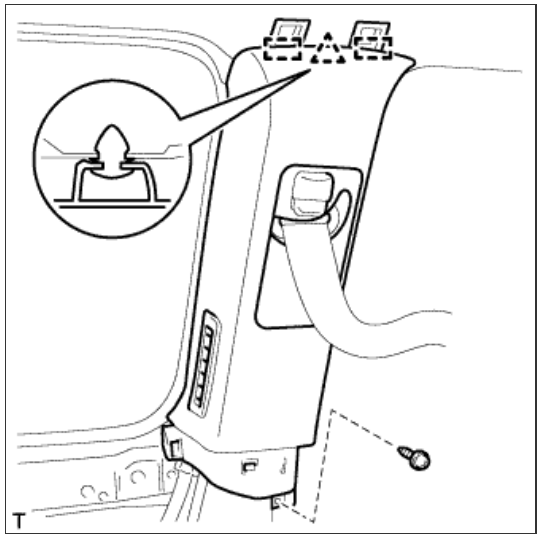
Torque:
for bolt A:
8.5 N*m{ 87 kgf*cm , 75 in.*lbf }
for bolt B:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }



c. w/ Pretensioner:
Connect the pretensioner connector as shown in the illustration.

d. Install the seat belt shoulder anchor with the nut.

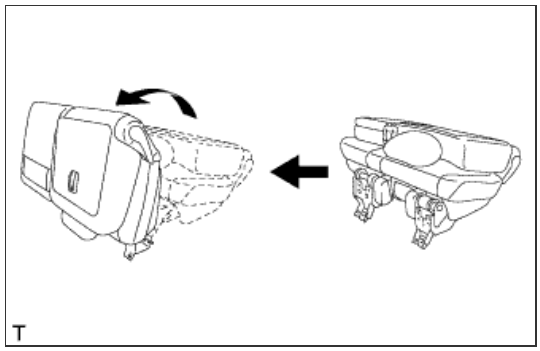
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }



3. INSTALL REAR FRONT QUARTER TRIM PANEL ASSEMBLY LH

a. Pass the seat belt anchor through the quarter trim garnish.

b. Attach the clip and 2 guides to install the quarter trim garnish.



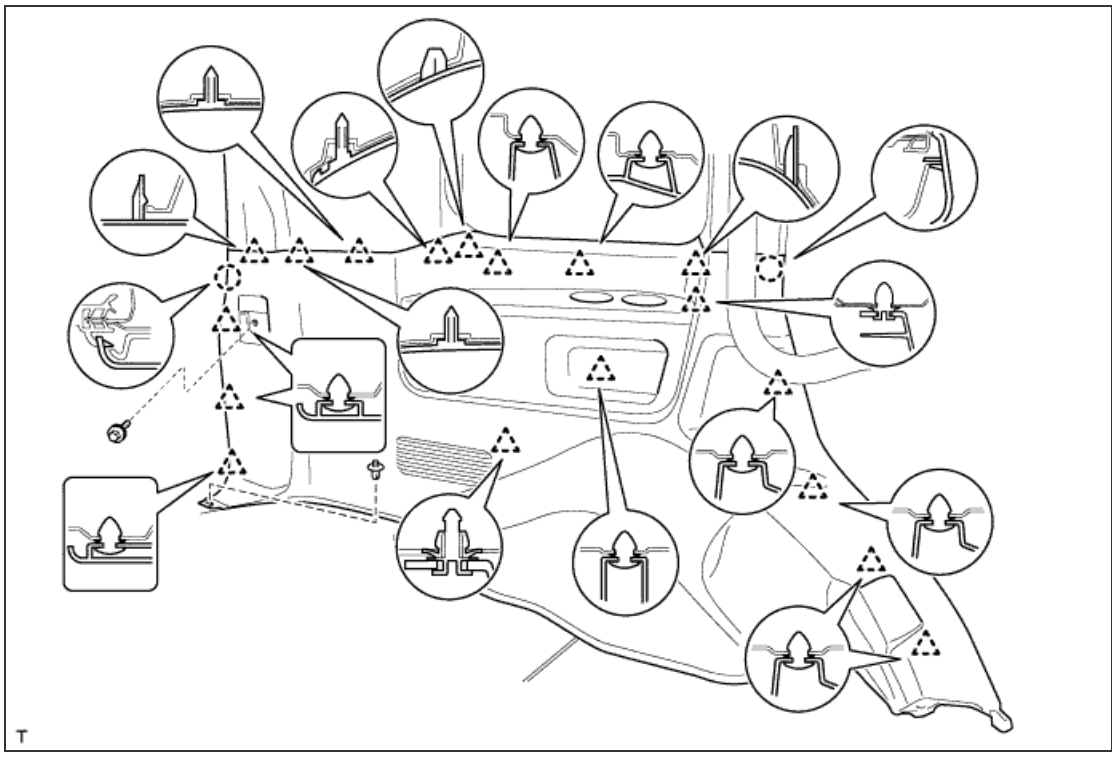
c. Install the screw.

4. INSTALL FRONT QUARTER TRIM PANEL ASSEMBLY LH

HINT:

When installing the front quarter trim panel, operate the reclining adjuster release handle and move the No. 1 rear seat to the position shown in the illustration.

a. w/o Tonneau Cover:

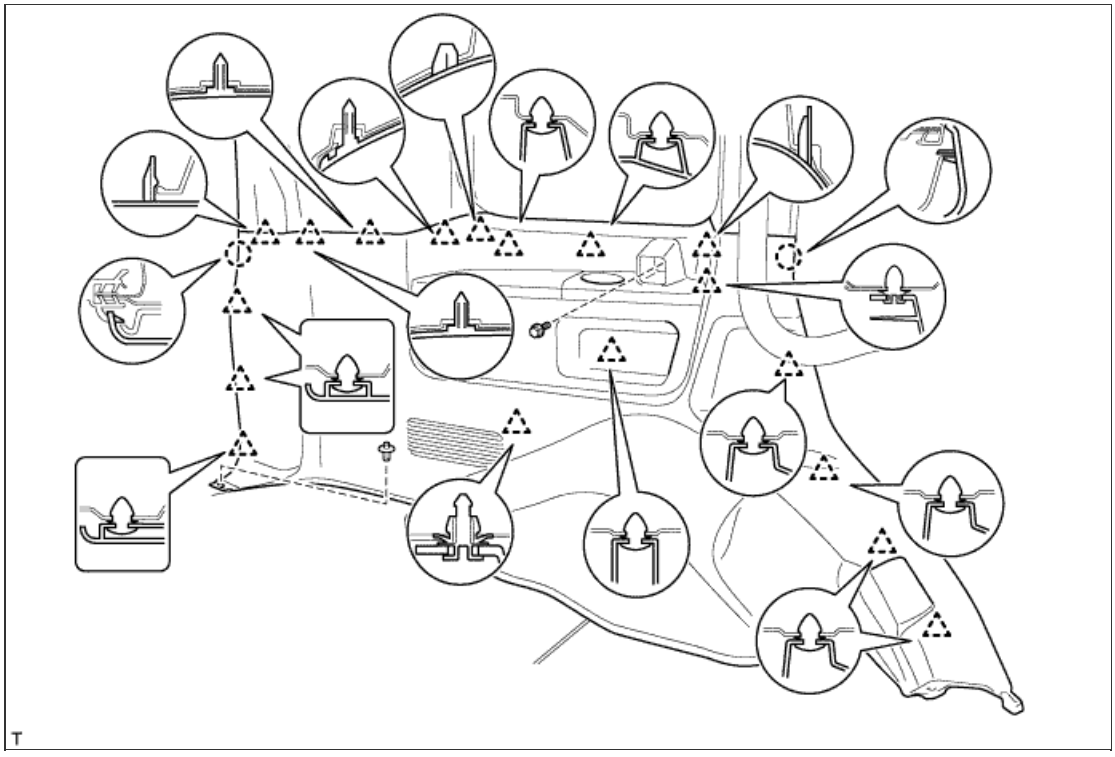


i. w/o Rear Air Conditioning System:
Connect the rear seat lock control lever cable.

ii. w/ Rear Air Conditioning System:
Connect the thermistor connector and rear seat lock control lever cable.

iii. Attach the 18 clips and 2 claws to install the quarter trim panel.

iv. Install the clip and bolt.

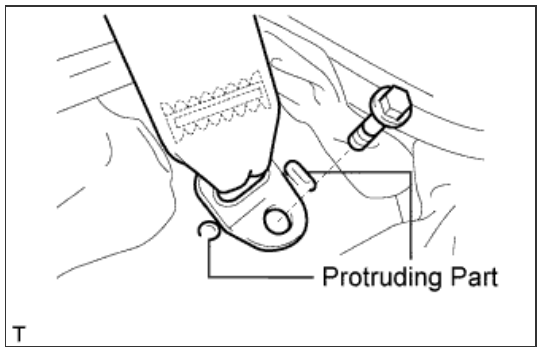


Torque:
12 N*m{ 122 kgf*cm , 9 ft.*lbf }

b. w/ Tonneau Cover:

i. Attach the 18 clips and 2 claws to install the quarter trim panel.

ii. Install the screw and clip.

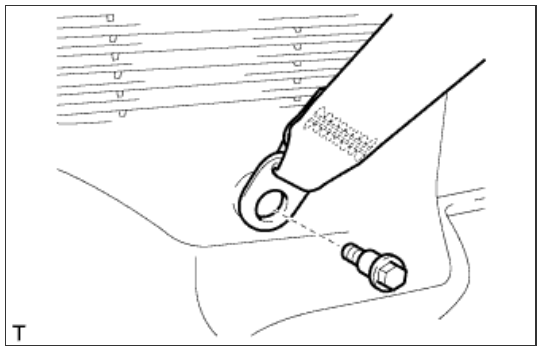


c. w/ Rear No. 2 Seat, for LH side:

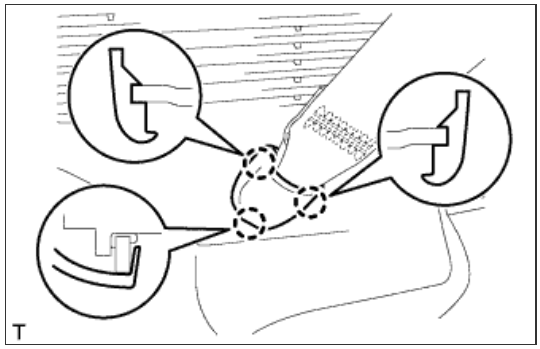
i. Install the rear No. 2 seat belt anchor LH with the bolt.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:



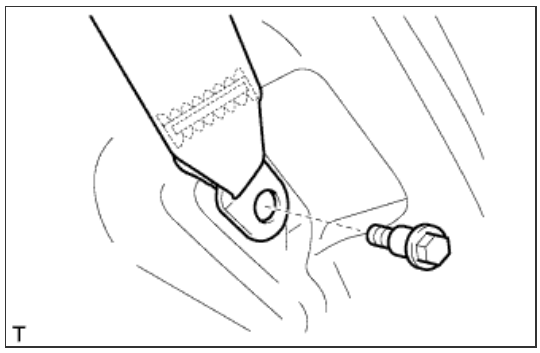
Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.



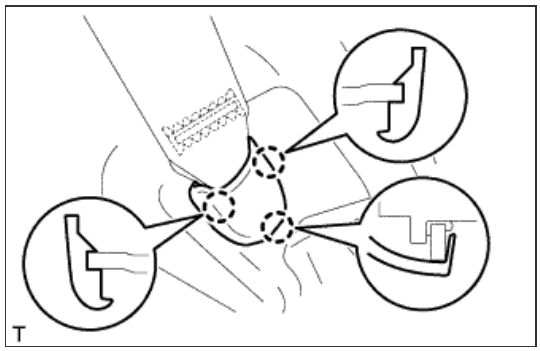
d. w/ Rear No. 2 Seat, for RH side:

i. Install the rear No. 2 seat belt anchor with the bolt.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

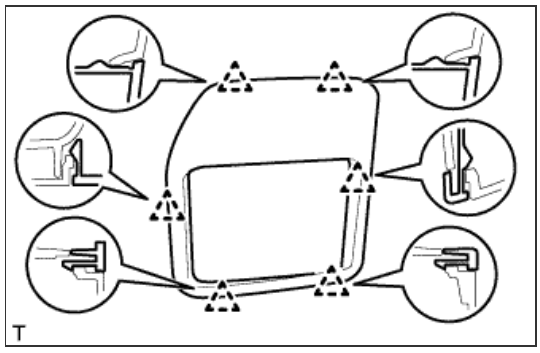


ii. Attach the 3 claws to install the cover.



e. Install the rear No. 1 seat belt anchor with the bolt.

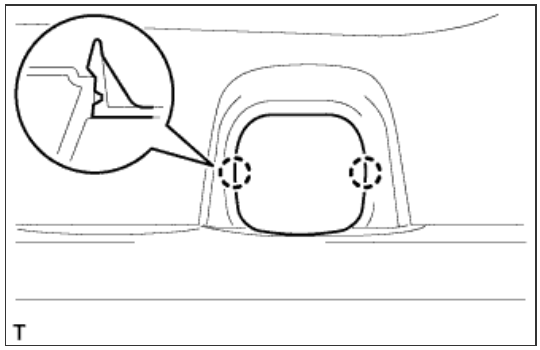
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }



f. Attach the 3 claws to install the cover.

5. INSTALL REAR NO. 2 SEAT COVER BEZEL

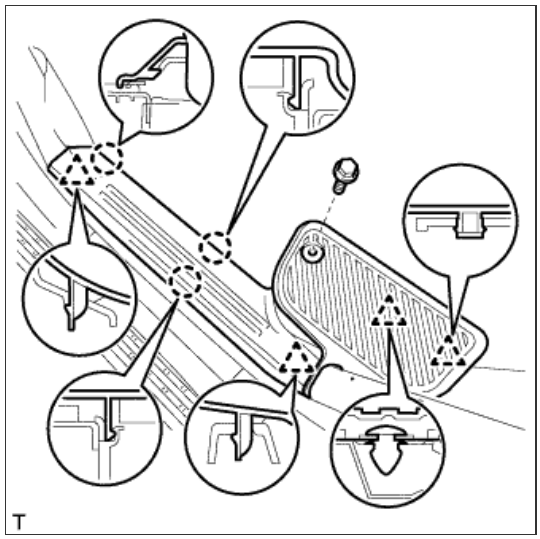
a. Attach the 6 clips to install the rear No. 2 seat cover bezel.



6. INSTALL NO. 1 TONNEAU COVER HOLDER CAP (w/ Tonneau Cover)

HINT:

Use the same procedure to install the tonneau cover holder cap on the other side.

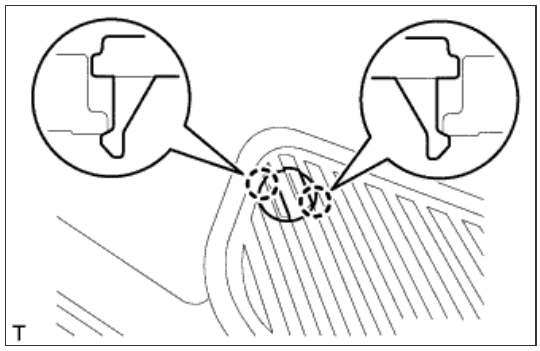


a. Attach the 2 claws to install the tonneau cover holder cap.

7. INSTALL REAR DOOR SCUFF PLATE LH

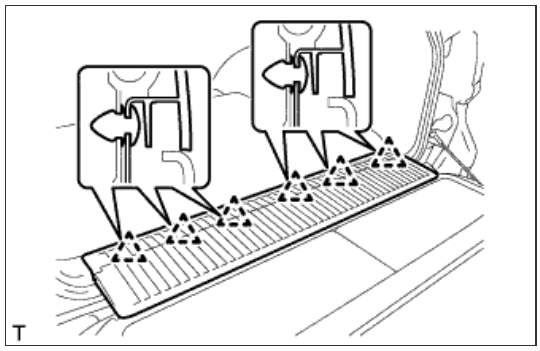
a. Attach the 3 claws and 4 clips to install the scuff plate.

b. Install the screw.



8. INSTALL REAR STEP COVER

HINT:



Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.

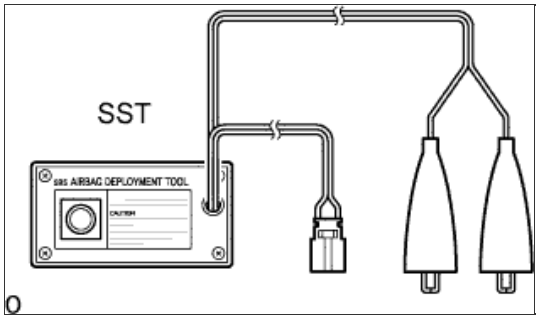
9. INSTALL REAR FLOOR MAT REAR SUPPORT PLATE

a. Attach the 6 clips to install the support plate.

10. INSTALL REAR NO. 2 SEAT ASSEMBLY (w/ Rear No. 2 Seat)

a. Install the rear No. 2 seat assembly (Click here).

11. INSTALL TONNEAU COVER ASSEMBLY



a. Install the tonneau cover assembly.

12. CONNECT CABLE TO NEGATIVE BATTERY TERMINAL

13. CHECK SRS WARNING LIGHT

a. Check the SRS warning light (Click here).

for Preparation Click here

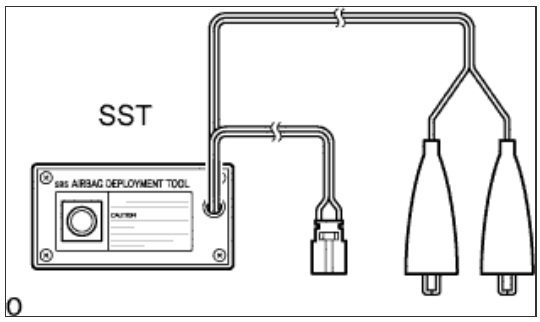
HINT:

When scrapping vehicles equipped with a seat belt pretensioner or disposing of a rear seat outer belt (with seat belt pretensioner), always first activate the seat belt pretensioner in accordance with the procedures described below. If any abnormality occurs during activation of the seat belt pretensioner, contact the SERVICE DEPART E of DISTRIBUTOR.

CAUTION:

- **Never dispose of a rear seat outer belt that has an un-activated pretensioner.**
- **The seat belt pretensioner produces a loud, exploding sound when it activates. Perform the operation where it will not be a nuisance to nearby people.**
- **When activating a rear seat outer belt (with seat belt pretensioner), stand at least 10 m (32.8 ft.) away from the rear seat outer belt.**
- **Use gloves and safety glasses when handling a rear seat outer belt with an activated pretensioner.**
- **Always wash your hands with water after completing the disposal.**
- **Do not apply water to a rear seat outer belt that has an activated pretensioner.**
- **Perform procedures in a place away from electrical interference.**
- **When activating the seat belt pretensioner, always use the specified SST (SRS airbag deployment tool).**

1. DISPOSE OF REAR NO. 1 SEAT OUTER BELT ASSEMBLY (WHEN INSTALLED IN VEHICLE)

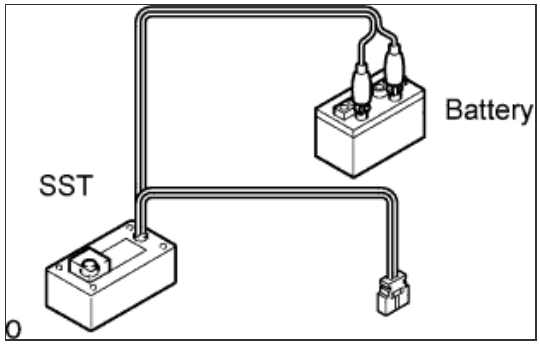


HINT:

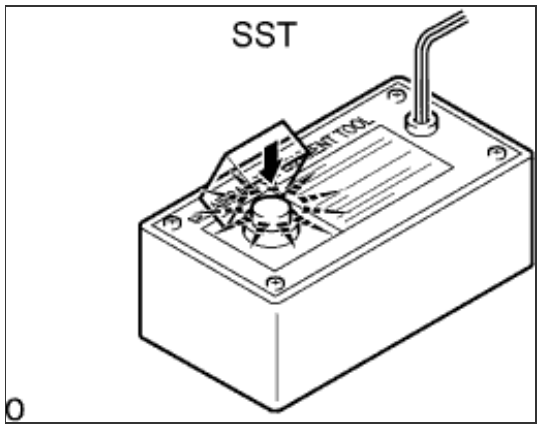
Prepare a battery to activate the seat belt pretensioner.

a. Check if SST is functioning properly.

CAUTION:



When activating the seat belt pretensioner, always use the specified SST.



i. Connect the red clip of SST to the battery positive ( ) terminal and the black clip to the battery negative (-) terminal.

HINT:

Do not connect the yellow connector. The yellow connector is used to connect to the seat belt pretensioner.

ii. Press SST activation switch and check that the LED of SST activation switch illuminates.

CAUTION:

If the LED illuminates when the activation switch is not being pressed, SST may be malfunctioning. Replace SST with a new one.

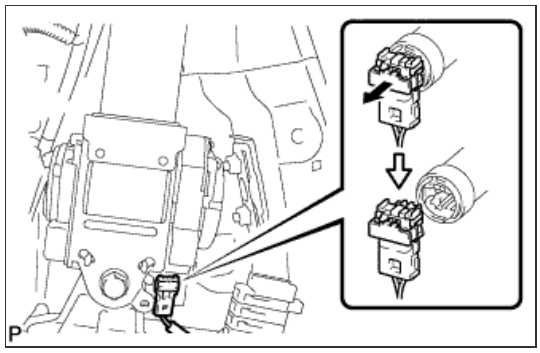
b. Disconnect SST from the battery.

c. Disconnect the pretensioner connector.

i. Disconnect the cable from the negative (-) battery terminal.

ii. Remove the rear No. 2 seat (Click here).

iii. Rear floor mat rear support plate (Click here).

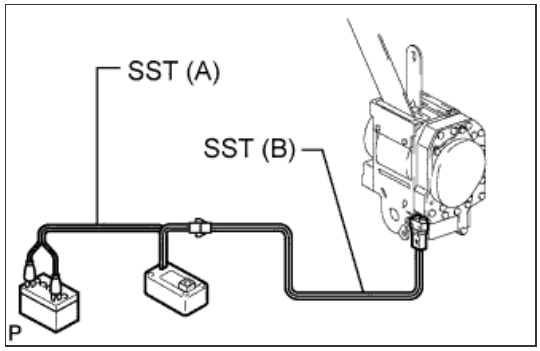


iv. Remove the rear step cover (Click here).

v. Remove the rear door scuff plate (Click here).

vi. Remove the rear seat cover bezel (Click here).

vii. Remove the front quarter trim panel (Click here).



viii. Disconnect the pretensioner connector as shown in the illustration.

d. Prepare SST for activation of the seat belt pretensioner.

i. Install the floor anchor of the seat belt.

ii. Connect SST (A) to SST (B). Then connect the connector of SST (B) to the seat belt pretensioner.

SST

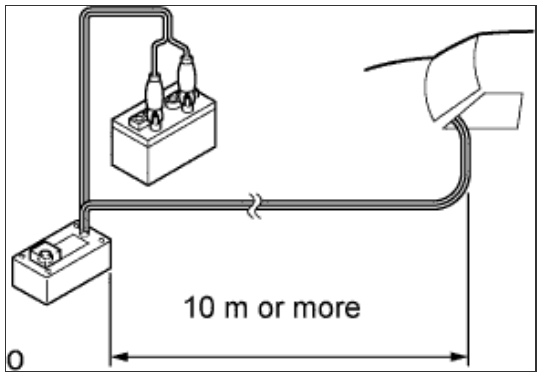
09082-00700
09082-00770

NOTICE:

To avoid damaging SST connector and wire harness, do not lock the secondary lock of the twin lock.

iii. ove SST at least 10 m (32.8 ft.) away from the rear of the vehicle.

iv. Close all the doors and windows of the vehicle.



HINT:

Leave a gap in one of the windows for inserting SST wire harness.

NOTICE:

Take care not to damage SST wire harness.

v. Connect the red clip of SST to the battery positive ( ) terminal and the black clip to the negative (-) terminal.

e. Activate the seat belt pretensioner.

i. Confirm that no one is inside the vehicle or within 10 m (32.8 ft.) of the vehicle.

ii. Press SST activation switch to activate the seat belt pretensioner.

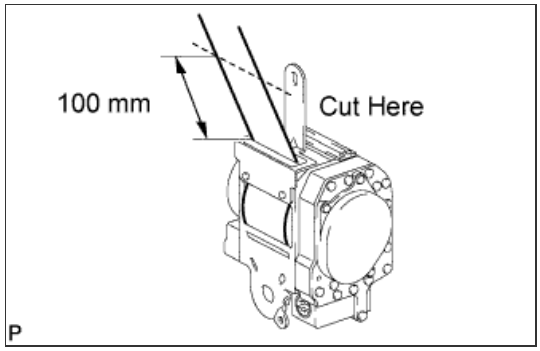
HINT:

The seat belt pretensioner operates at the same time SST activation switch LED illuminates.

f. Dispose of the rear seat outer belt (with the seat belt pretensioner).

CAUTION:

- **Do not touch the rear seat outer belt for at least 30 minutes after the seat belt pretensioner has been activated. It is very hot.**
- **Use gloves and safety glasses when handling a rear seat outer belt whose pretensioner has been activated.**
- **Always wash your hands with water after completing the disposal.**
- **Do not apply water to a rear seat outer belt that has an activated pretensioner.**



HINT:

When scrapping a vehicle, activate the seat belt pretensioner, and then scrap the vehicle with the activated rear seat outer belt installed.

2. DISPOSE OF REAR NO. 1 SEAT OUTER BELT ASSEMBLY (WHEN NOT INSTALLED IN VEHICLE)

NOTICE:

Be sure to follow the procedures listed below when activating the seat belt pretensioner.

a. Remove the rear No. 1 seat outer belt (Click here).

i. Wind the seat belt with the retractor.

ii. When the seat belt is sufficiently wound, cut the seat belt approximately 100 mm (0.393 in.) from the retractor as shown in the illustration.

HINT:

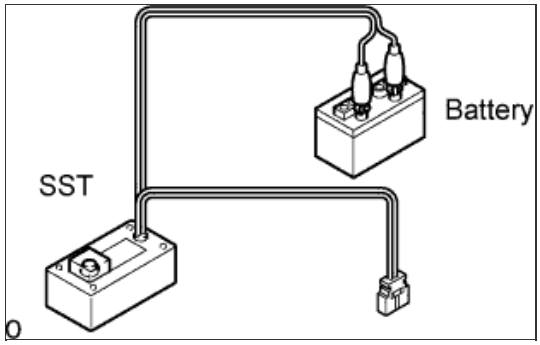
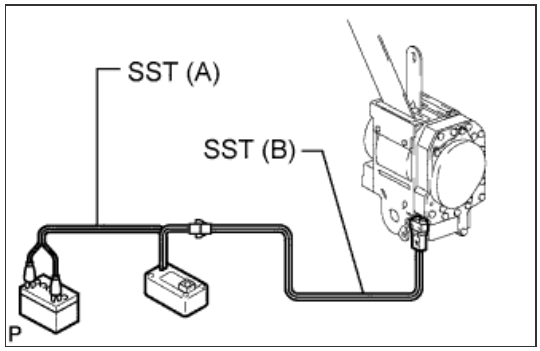
The seat belt is designed so that winding the seat belt before pretensioner activation will decrease the pulling power of the seat belt during pretensioner activation.



b. Check if SST is functioning properly.

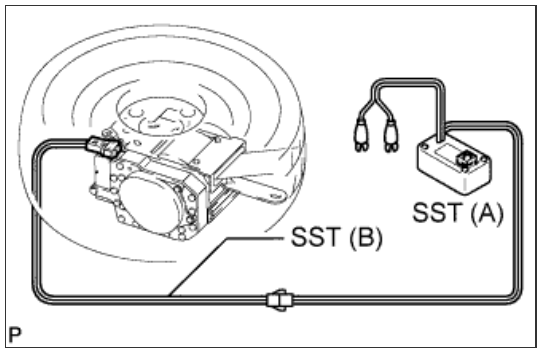
SST



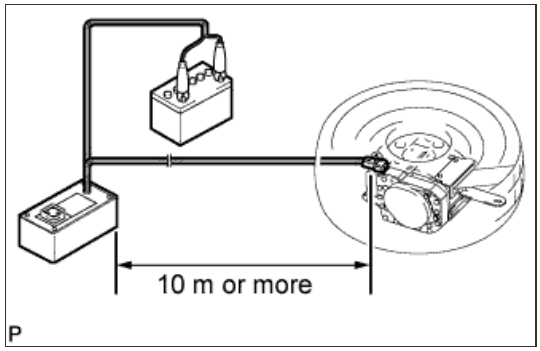
09082-00770 09082-00700

CAUTION:

When activating a seat belt pretensioner, always use the specified SST.



c. Prepare SST for activation of the seat belt pretensioner.



i. Connect SST (A) to SST (B). Then connect the connector of SST (B) to the seat belt pretensioner.

NOTICE:

To avoid damaging SST connector and wire harness, do not lock the secondary lock of the twin lock.

ii. Place the rear seat outer belt on the ground and cover it with a tire (with wheel).

iii. ove SST at least 10 m (32.8 ft.) away from the wheel.

NOTICE:

Take care not to damage SST wire harness.

d. Activate the seat belt pretensioner.

i. Connect the red clip of SST to the battery positive ( ) terminal and the black clip to the battery negative (-) terminal.

ii. Check that no one is within 10 m (32.8 ft.) of the wheel.

iii. Press SST activation switch to activate the seat belt pretensioner.

HINT:

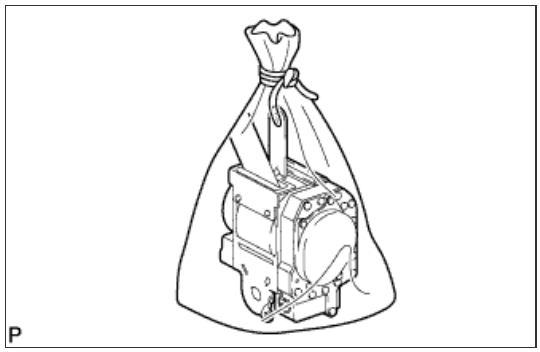
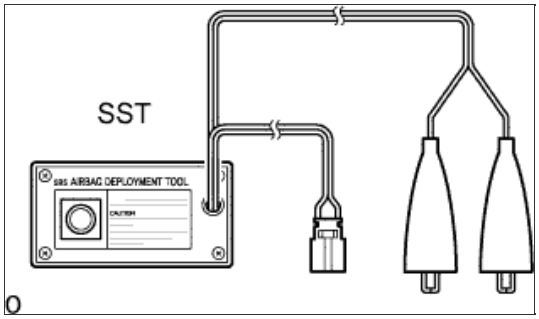
The seat belt pretensioner operates at the same time SST activation switch LED illuminates.



e. Dispose of the rear seat outer belt (with the seat belt pretensioner).

CAUTION:



- **Do not touch the rear seat outer belt for at least 30 minutes after the seat belt pretensioner has been activated. It is very hot.**
- **Use gloves and safety glasses when handling a rear seat outer belt whose pretensioner has been activated.**
- **Always wash your hands with water after completing the disposal.**
- **Do not apply water to a rear seat outer belt that has an activated pretensioner.**

i. Remove the tire (with wheel) and SST.

ii. Place the rear seat outer belt in a plastic bag, tie the end tightly and dispose of it in the same way as other general parts.

P

1. DISPOSE OF REAR NO. 1 SEAT OUTER BELT ASSEMBLY (WHEN INSTALLED IN VEHICLE)

HINT:

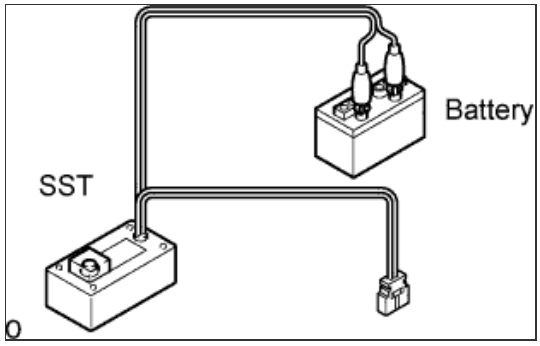
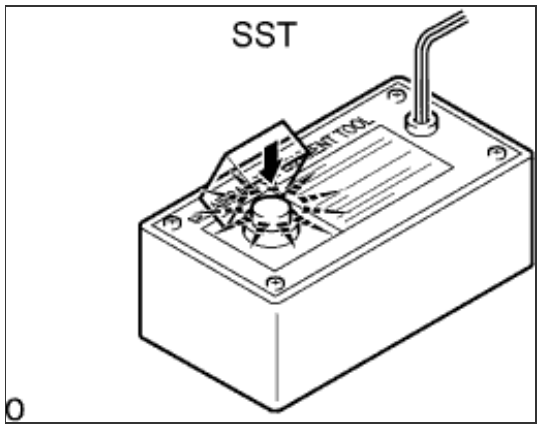
Prepare a battery to activate the seat belt pretensioner.

a. Check if SST is functioning properly.

CAUTION:



When activating the seat belt pretensioner, always use the specified SST.



i. Connect the red clip of SST to the battery positive ( ) terminal and the black clip to the battery negative (-) terminal.

HINT:

Do not connect the yellow connector. The yellow connector is used to connect to the seat belt pretensioner.

ii. Press SST activation switch and check that the LED of SST activation switch illuminates.

CAUTION:

If the LED illuminates when the activation switch is not being pressed, SST may be malfunctioning. Replace SST with a new one.

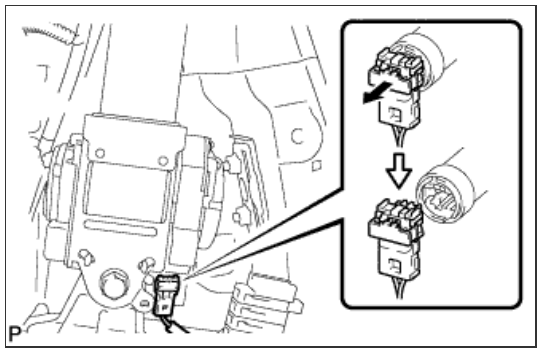
b. Disconnect SST from the battery.

c. Disconnect the pretensioner connector.

i. Disconnect the cable from the negative (-) battery terminal.

ii. Remove the rear No. 2 seat (Click here).

iii. Rear floor mat rear support plate (Click here).

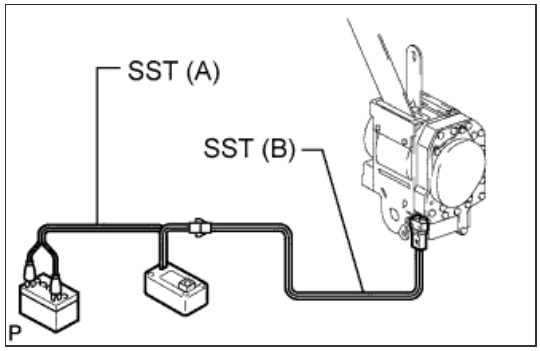


iv. Remove the rear step cover (Click here).

v. Remove the rear door scuff plate (Click here).

vi. Remove the rear seat cover bezel (Click here).

vii. Remove the front quarter trim panel (Click here).



viii. Disconnect the pretensioner connector as shown in the illustration.

d. Prepare SST for activation of the seat belt pretensioner.

i. Install the floor anchor of the seat belt.

ii. Connect SST (A) to SST (B). Then connect the connector of SST (B) to the seat belt pretensioner.

SST

09082-00700
09082-00770

NOTICE:

To avoid damaging SST connector and wire harness, do not lock the secondary lock of the twin lock.

iii. ove SST at least 10 m (32.8 ft.) away from the rear of the vehicle.

iv. Close all the doors and windows of the vehicle.

HINT:

Leave a gap in one of the windows for inserting SST wire harness.

NOTICE:

Take care not to damage SST wire harness.

v. Connect the red clip of SST to the battery positive ( ) terminal and the black clip to the negative (-) terminal.

e. Activate the seat belt pretensioner.

i. Confirm that no one is inside the vehicle or within 10 m (32.8 ft.) of the vehicle.

ii. Press SST activation switch to activate the seat belt pretensioner.

HINT:

The seat belt pretensioner operates at the same time SST activation switch LED illuminates.

f. Dispose of the rear seat outer belt (with the seat belt pretensioner).

CAUTION:

- **Do not touch the rear seat outer belt for at least 30 minutes after the seat belt pretensioner has been activated. It is very hot.**
- **Use gloves and safety glasses when handling a rear seat outer belt whose pretensioner has been activated.**
- **Always wash your hands with water after completing the disposal.**
- **Do not apply water to a rear seat outer belt that has an activated pretensioner.**

HINT:

When scrapping a vehicle, activate the seat belt pretensioner, and then scrap the vehicle with the activated rear seat outer belt installed.

2. DISPOSE OF REAR NO. 1 SEAT OUTER BELT ASSEMBLY (WHEN NOT INSTALLED IN VEHICLE)

NOTICE:

Be sure to follow the procedures listed below when activating the seat belt pretensioner.

a. Remove the rear No. 1 seat outer belt (Click here).

i. Wind the seat belt with the retractor.

ii. When the seat belt is sufficiently wound, cut the seat belt approximately 100 mm (0.393 in.) from the retractor as shown in the illustration.

HINT:

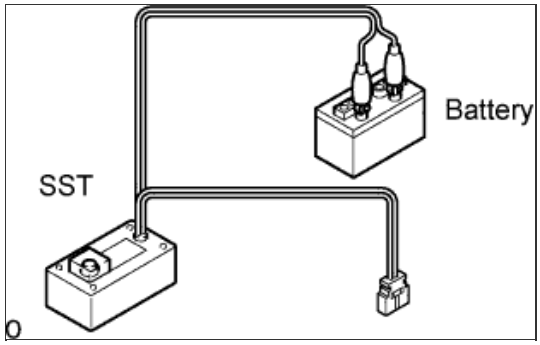
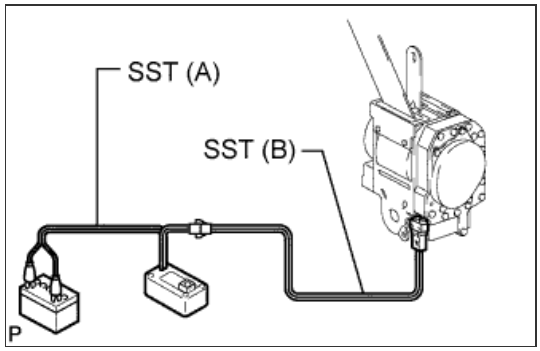
The seat belt is designed so that winding the seat belt before pretensioner activation will decrease the pulling power of the seat belt during pretensioner activation.



b. Check if SST is functioning properly.

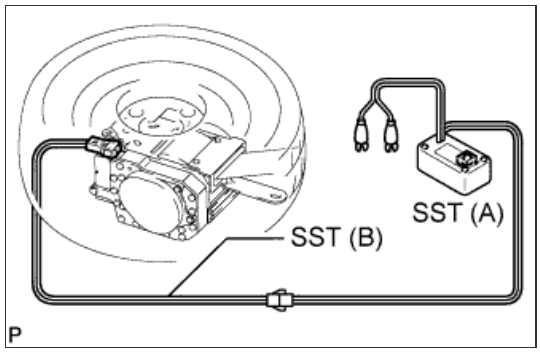
SST



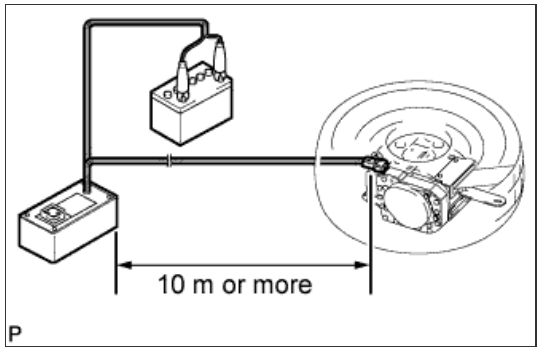
09082-00770 09082-00700

CAUTION:

When activating a seat belt pretensioner, always use the specified SST.



c. Prepare SST for activation of the seat belt pretensioner.



i. Connect SST (A) to SST (B). Then connect the connector of SST (B) to the seat belt pretensioner.

NOTICE:

To avoid damaging SST connector and wire harness, do not lock the secondary lock of the twin lock.

ii. Place the rear seat outer belt on the ground and cover it with a tire (with wheel).

iii. ove SST at least 10 m (32.8 ft.) away from the wheel.

NOTICE:

Take care not to damage SST wire harness.

d. Activate the seat belt pretensioner.

i. Connect the red clip of SST to the battery positive ( ) terminal and the black clip to the battery negative (-) terminal.

ii. Check that no one is within 10 m (32.8 ft.) of the wheel.

iii. Press SST activation switch to activate the seat belt pretensioner.

HINT:

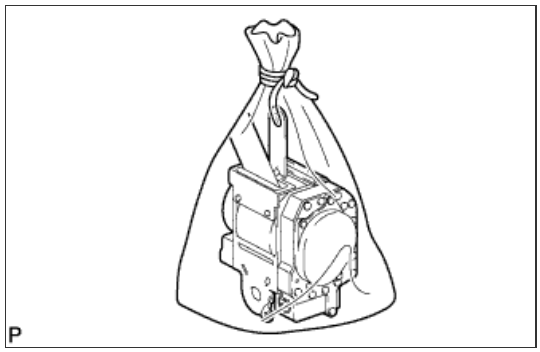
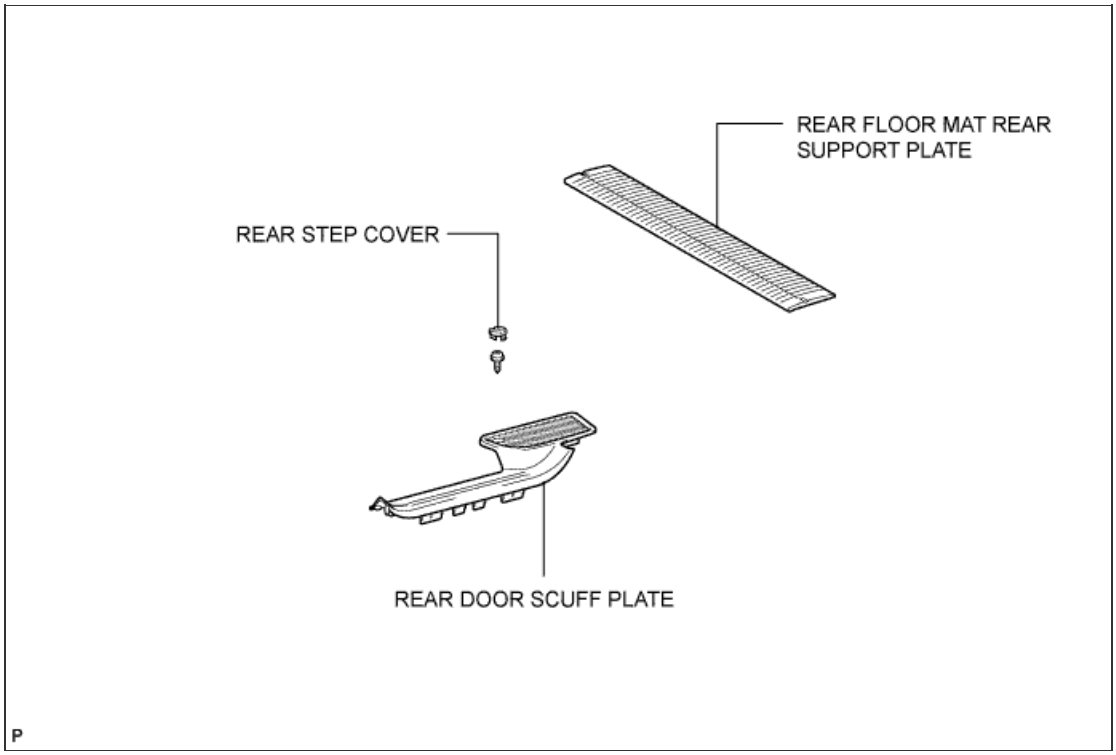
The seat belt pretensioner operates at the same time SST activation switch LED illuminates.

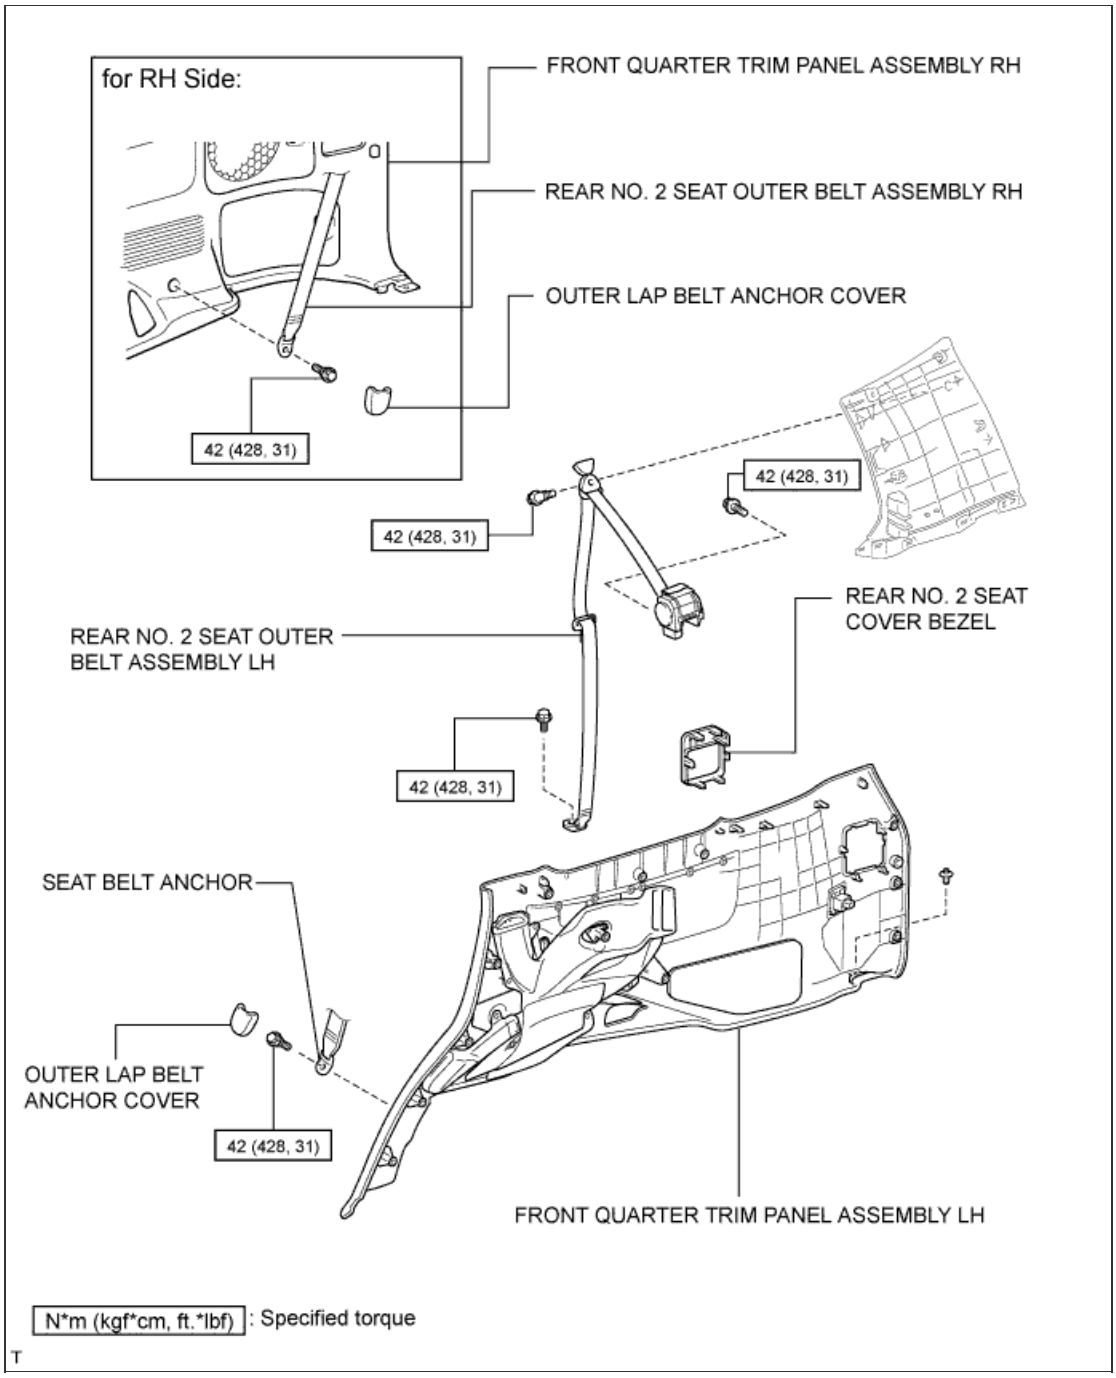


e. Dispose of the rear seat outer belt (with the seat belt pretensioner).

CAUTION:



- **Do not touch the rear seat outer belt for at least 30 minutes after the seat belt pretensioner has been activated. It is very hot.**
- **Use gloves and safety glasses when handling a rear seat outer belt whose pretensioner has been activated.**
- **Always wash your hands with water after completing the disposal.**
- **Do not apply water to a rear seat outer belt that has an activated pretensioner.**



i. Remove the tire (with wheel) and SST.

ii. Place the rear seat outer belt in a plastic bag, tie the end tightly and dispose of it in the same way as other general parts.

HINT:

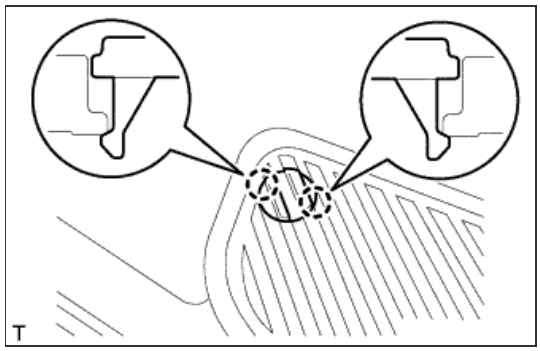
- **Use the same procedures for the RH side and LH side.**
- **The procedures listed below are for the LH side.**

1. REMOVE REAR NO. 2 SEAT ASSEMBLY

a. Remove the rear No. 2 seat assembly (Click here).

2. REMOVE REAR FLOOR MAT REAR SUPPORT PLATE

a. Detach the 6 clips and remove the support plate.



3. REMOVE REAR STEP COVER

HINT:

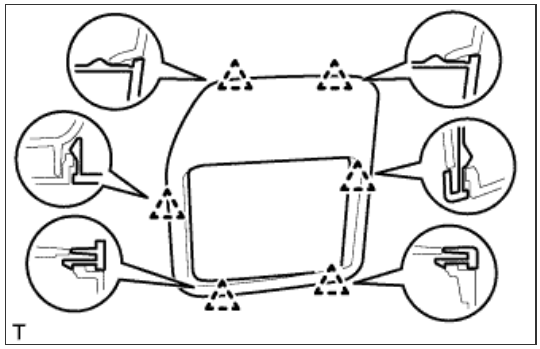
Use the same procedure to remove the step cover on the other side.

a. Detach the 2 claws and remove the step cover.

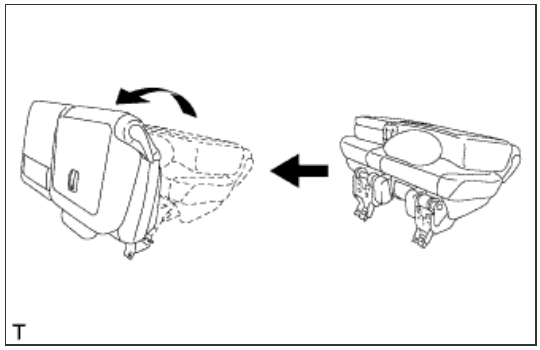


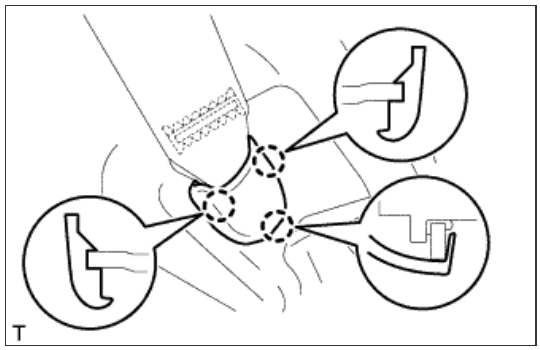
4. REMOVE REAR DOOR SCUFF PLATE LH

a. Detach the 7 claws and 4 clips, and remove the scuff plate.

. REMOVE REAR NO. 2 SEAT COVER BEZEL

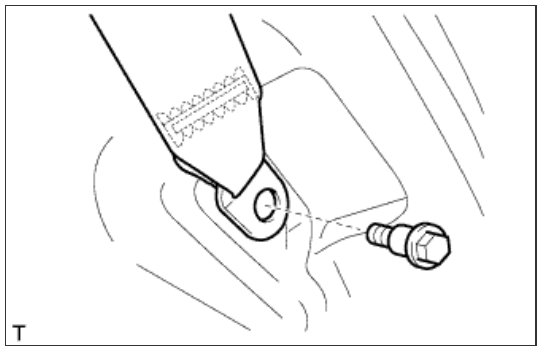
a. Detach the 6 clips and remove the rear No. 2 seat cover bezel.





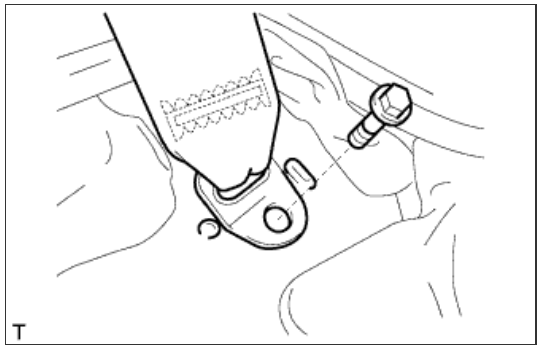
6. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY LH

HINT:

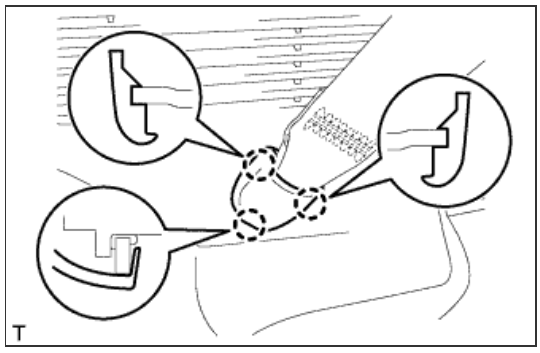


When installing the front quarter trim panel, operate the reclining adjuster release handle and move the No. 1 rear seat to the position shown in the illustration.

a. Detach the 3 claws and remove the cover.

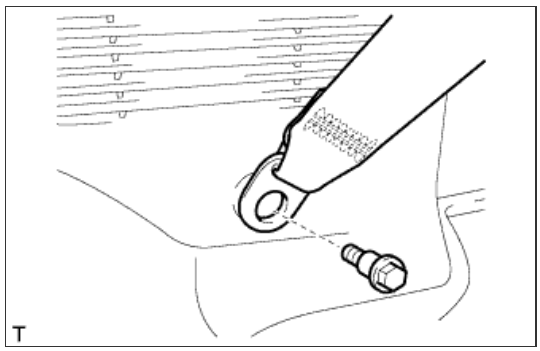


.Remove the bolt and disconnect the rear seat outer belt floor anchor.



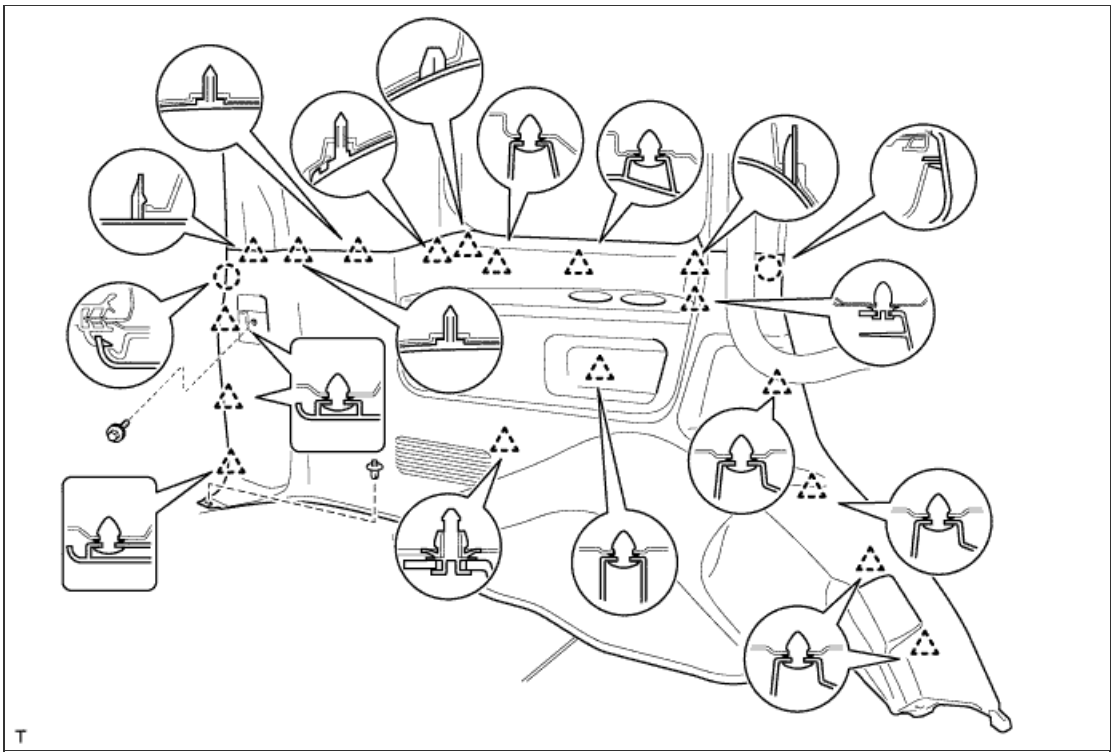
c. for LH Side:

i. Remove the bolt and disconnect the rear No. 2 seat outer belt floor anchor LH.



d. for RH Side:

i. Detach the 3 claws and remove the cover.



ii. Remove the bolt and disconnect the rear seat outer belt floor anchor RH.

e. Remove the clip and bolt.

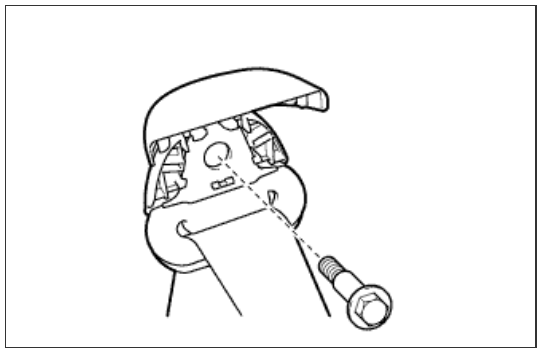
f. Detach the 18 clips and 2 claws.

g. w/o Rear Air Conditioning System:
Disconnect the rear seat lock control lever cable and then remove the quarter trim panel.

h. w/ Rear Air Conditioning System:
Disconnect the thermistor connector and rear seat lock control lever cable, and then remove the quarter trim panel.

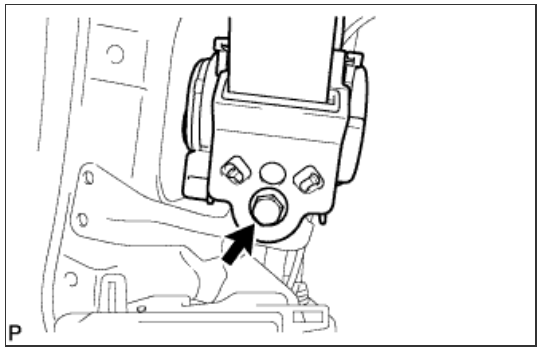
7. REMOVE REAR NO. 2 SEAT OUTER BELT ASSEMBLY LH

a. Remove the bolt and disconnect the seat belt shoulder anchor.



i. Using a screwdriver, detach the 2 claws and open the seat belt anchor cover as shown in the illustration.

HINT:



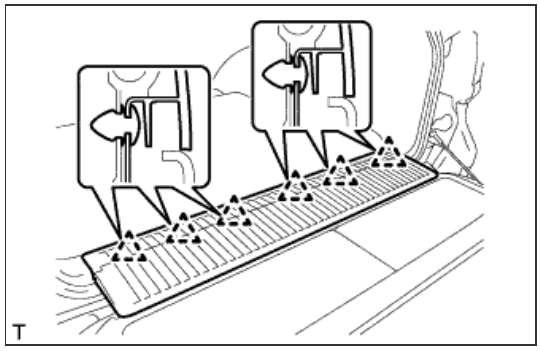
ape the screwdriver tip before use.

ii. Remove the bolt and seat belt shoulder anchor.

.Remove the bolt and rear No. 2 seat outer belt.

for Preparation Click here

HINT:



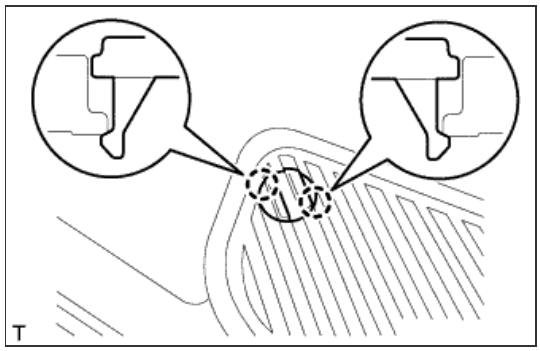
- **Use the same procedures for the RH side and LH side.**
- **The procedures listed below are for the LH side.**

1. REMOVE REAR NO. 2 SEAT ASSEMBLY

a. Remove the rear No. 2 seat assembly (Click here).

2. REMOVE REAR FLOOR MAT REAR SUPPORT PLATE

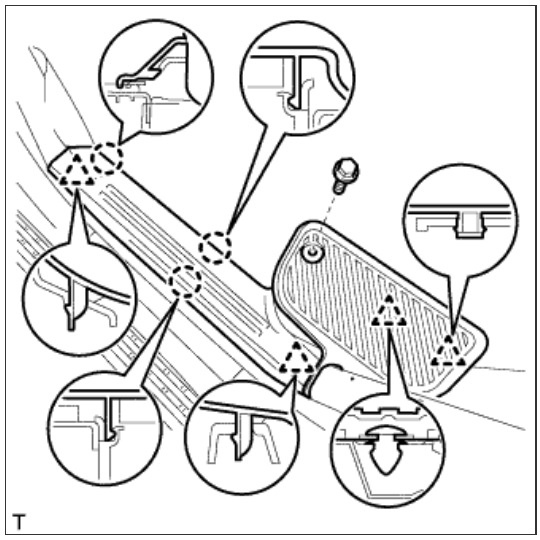
a. Detach the 6 clips and remove the support plate.



3. REMOVE REAR STEP COVER

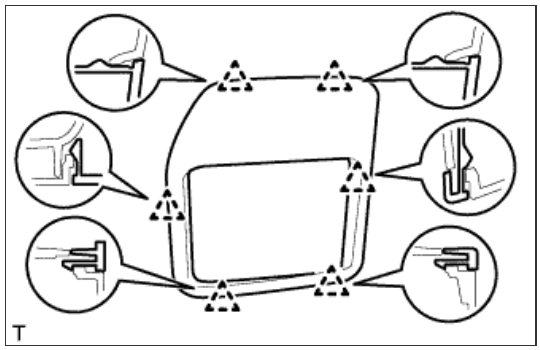
HINT:

Use the same procedure to remove the step cover on the other side.



a. Detach the 2 claws and remove the step cover.

4. REMOVE REAR DOOR SCUFF PLATE LH

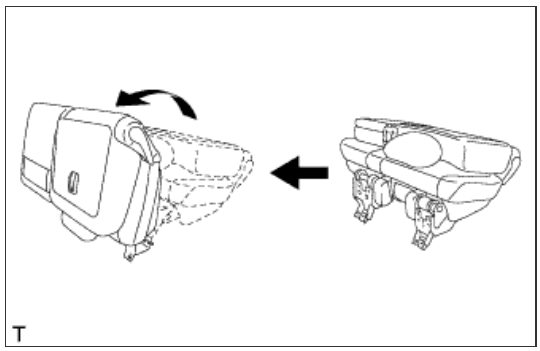


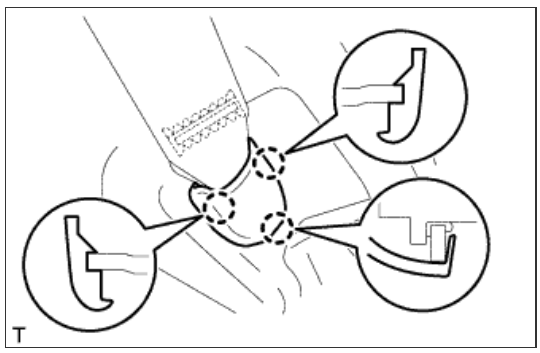
a. Remove the screw.

.Detach the 3 claws and 4 clips, and remove the scuff plate.

. REMOVE REAR NO. 2 SEAT COVER BEZEL

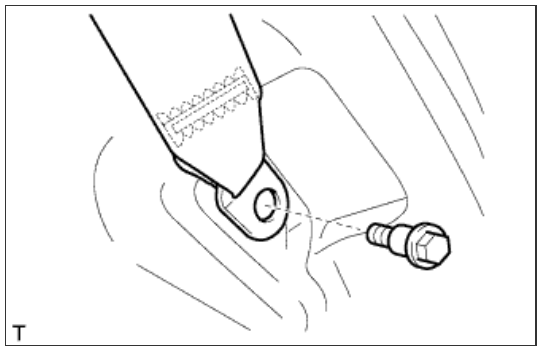
a. Detach the 6 clips and remove the rear No. 2 seat cover bezel.





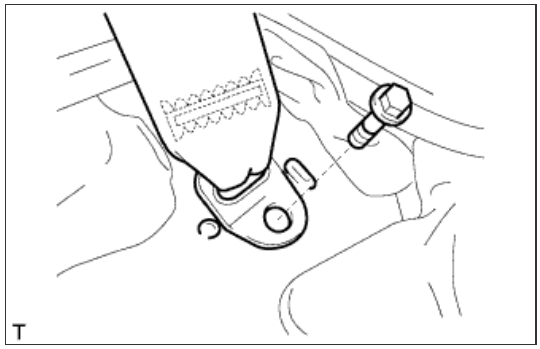
6. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY LH

HINT:

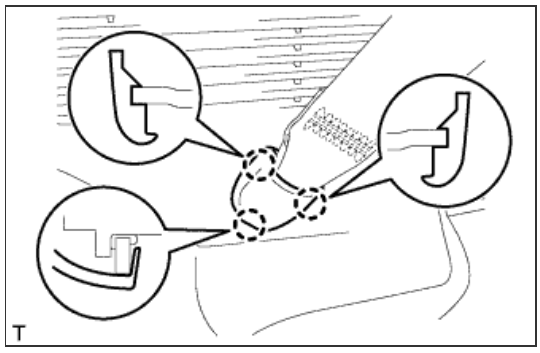


When installing the front quarter trim panel, operate the reclining adjuster release handle and move the No. 1 rear seat to the position shown in the illustration.

a. Detach the 3 claws and remove the cover.

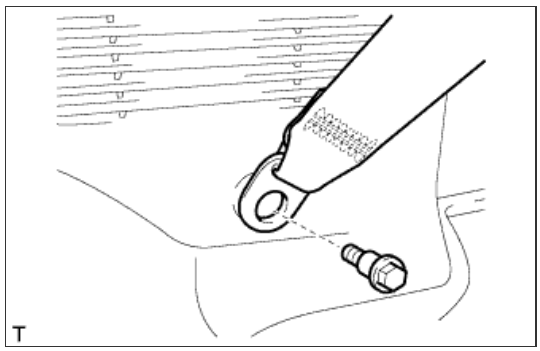


.Remove the bolt and disconnect the rear seat outer belt floor anchor.



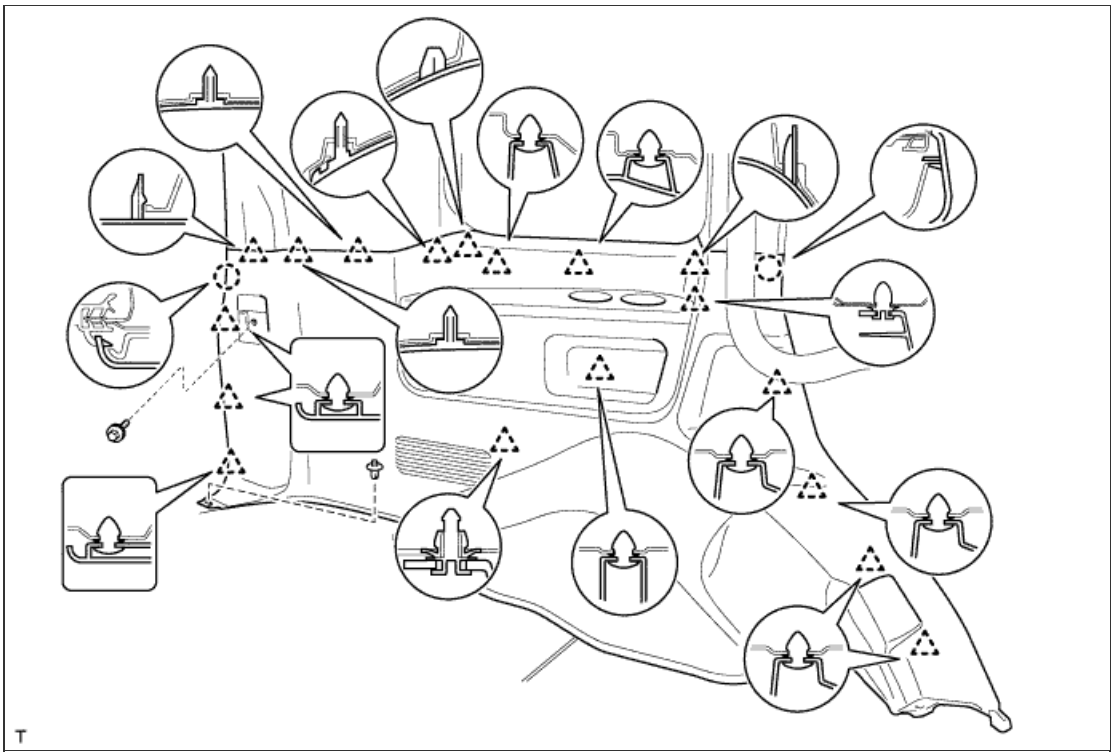
c. for Side:

i. Remove the bolt and disconnect the rear No. 2 seat outer belt floor anchor .



d. for RH Side:

i. Detach the 3 claws and remove the cover.



ii. Remove the bolt and disconnect the rear seat outer belt floor anchor RH.

e. Remove the clip and bolt.

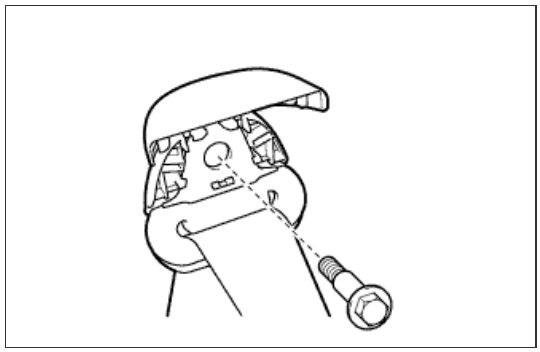
f. Detach the 18 clips and 2 claws.

g. w/o Rear Air Conditioning System:
Disconnect the rear seat lock control lever cable and then remove the quarter trim panel.

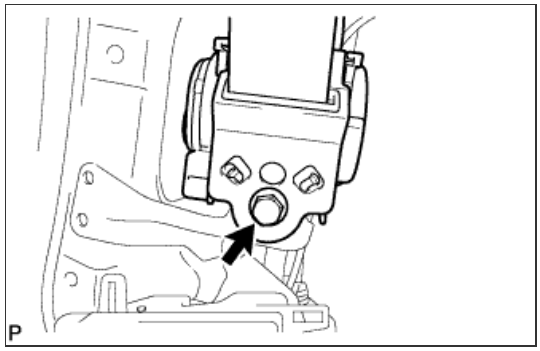
h. w/ Rear Air Conditioning System:
Disconnect the thermistor connector and rear seat lock control lever cable, and then remove the quarter trim panel.

7. REMOVE REAR NO. 2 SEAT OUTER BELT ASSEMBLY LH

a. Remove the bolt and disconnect the seat belt shoulder anchor.



i. Using a screwdriver, detach the 2 claws and open the seat belt anchor cover as shown in the illustration.



HINT:

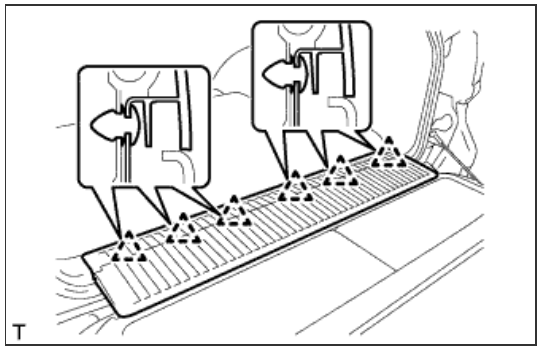
ape the screwdriver tip before use.

ii. Remove the bolt and seat belt shoulder anchor.

.Remove the bolt and rear No. 2 seat outer belt.

for Preparation Click here

HINT:



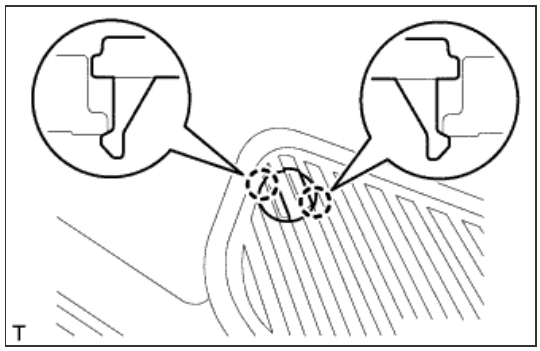
- **Use the same procedures for the RH side and LH side.**
- **The procedures listed below are for the LH side.**

1. REMOVE REAR NO. 2 SEAT ASSEMBLY

a. Remove the rear No. 2 seat assembly (Click here).

2. REMOVE REAR FLOOR MAT REAR SUPPORT PLATE

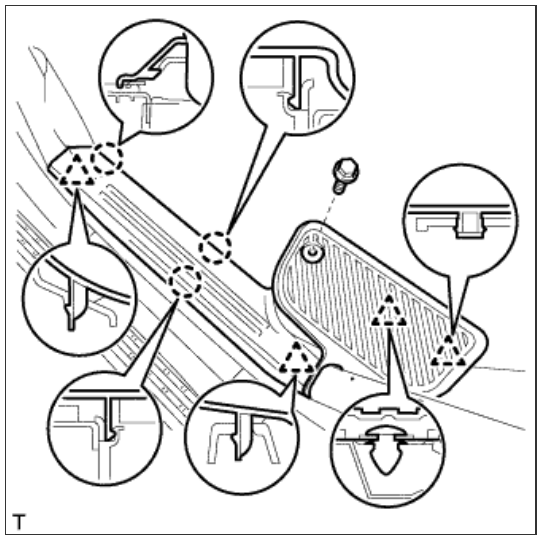
a. Detach the 6 clips and remove the support plate.



3. REMOVE REAR STEP COVER

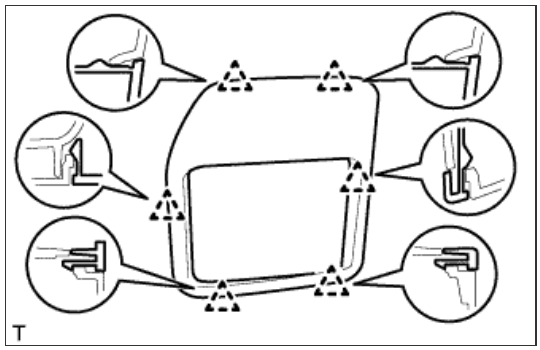
HINT:

Use the same procedure to remove the step cover on the other side.



a. Detach the 2 claws and remove the step cover.

4. REMOVE REAR DOOR SCUFF PLATE LH

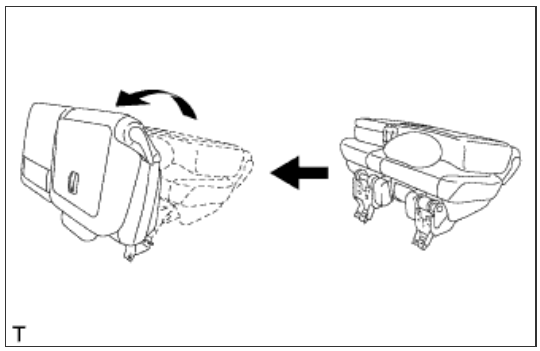


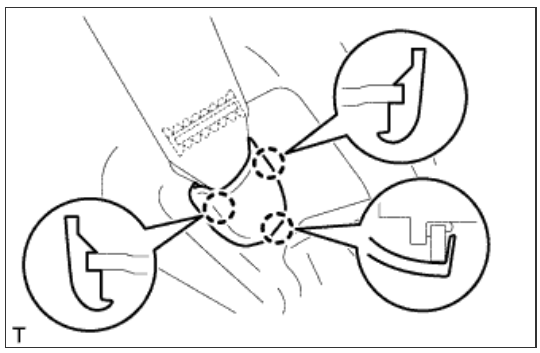
a. Remove the screw.

.Detach the 3 claws and 4 clips, and remove the scuff plate.

. REMOVE REAR NO. 2 SEAT COVER BEZEL

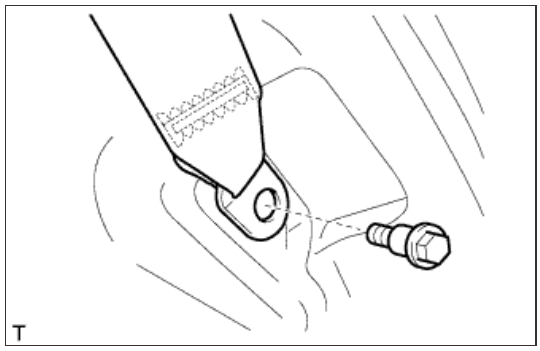
a. Detach the 6 clips and remove the rear No. 2 seat cover bezel.





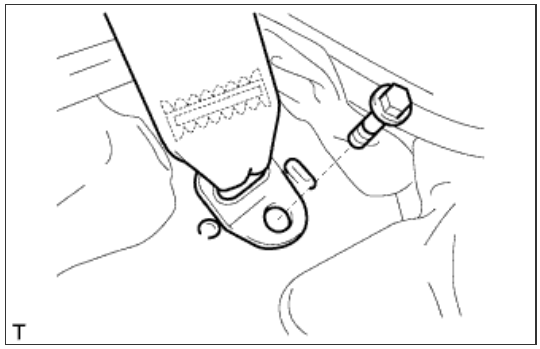
6. REMOVE FRONT QUARTER TRIM PANEL ASSEMBLY LH

HINT:

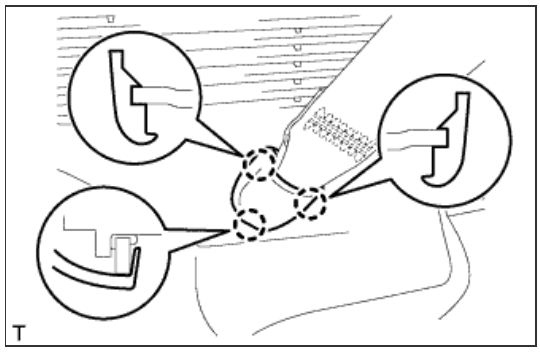


When installing the front quarter trim panel, operate the reclining adjuster release handle and move the No. 1 rear seat to the position shown in the illustration.

a. Detach the 3 claws and remove the cover.

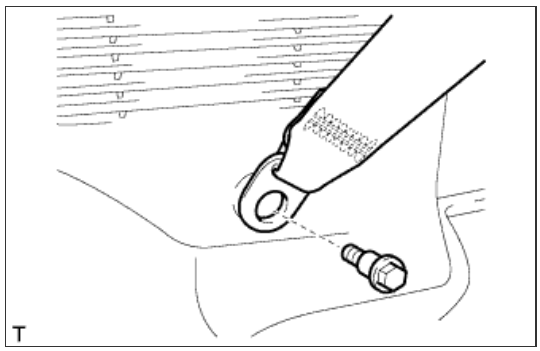


.Remove the bolt and disconnect the rear seat outer belt floor anchor.



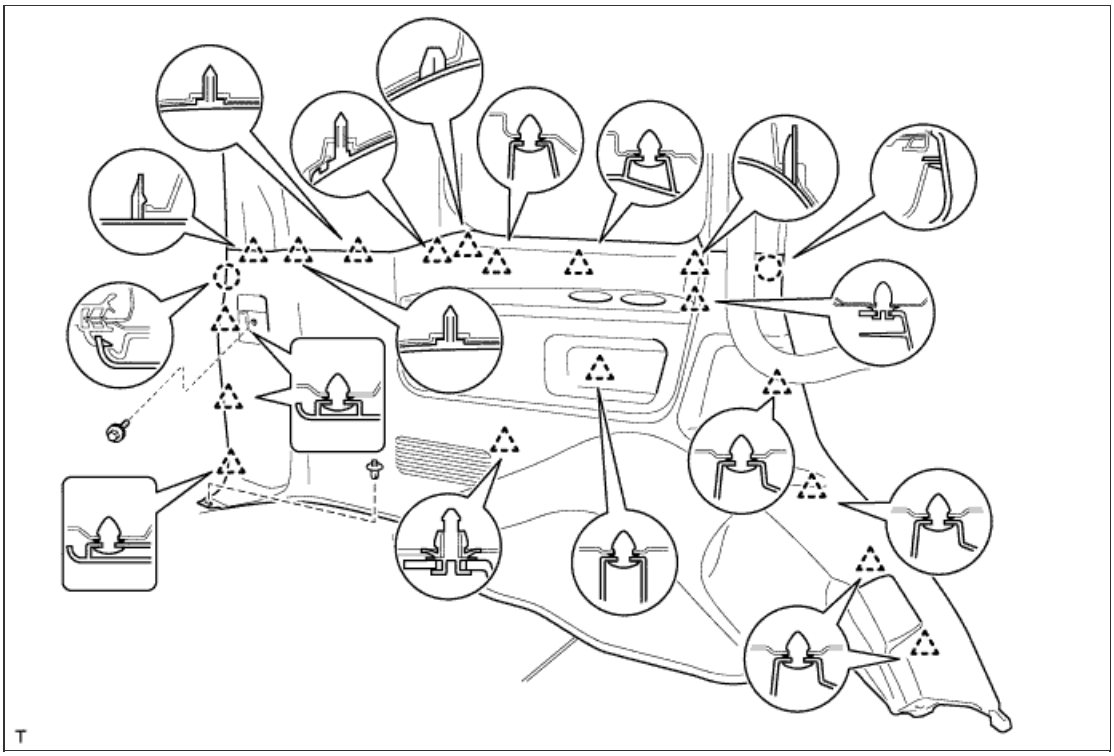
c. for Side:

i. Remove the bolt and disconnect the rear No. 2 seat outer belt floor anchor .



d. for RH Side:

i. Detach the 3 claws and remove the cover.



ii. Remove the bolt and disconnect the rear seat outer belt floor anchor RH.

e. Remove the clip and bolt.

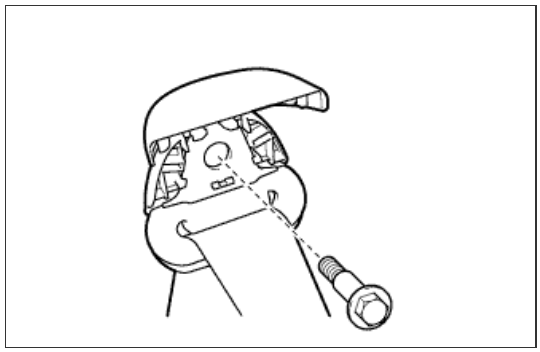
f. Detach the 18 clips and 2 claws.

g. w/o Rear Air Conditioning System:
Disconnect the rear seat lock control lever cable and then remove the quarter trim panel.

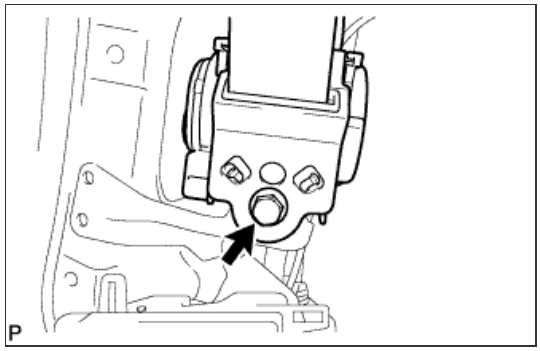
h. w/ Rear Air Conditioning System:
Disconnect the thermistor connector and rear seat lock control lever cable, and then remove the quarter trim panel.

7. REMOVE REAR NO. 2 SEAT OUTER BELT ASSEMBLY LH

a. Remove the bolt and disconnect the seat belt shoulder anchor.



i. Using a screwdriver, detach the 2 claws and open the seat belt anchor cover as shown in the illustration.

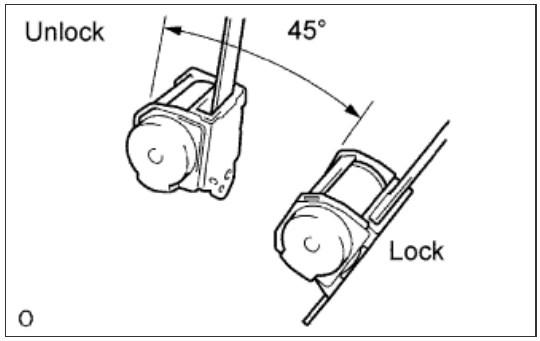


HINT:

ape the screwdriver tip before use.

ii. Remove the bolt and seat belt shoulder anchor.

.Remove the bolt and rear No. 2 seat outer belt.



for Preparation Click here

1. INSPECT REAR NO. 2 SEAT OUTER BELT ASSEMBLY

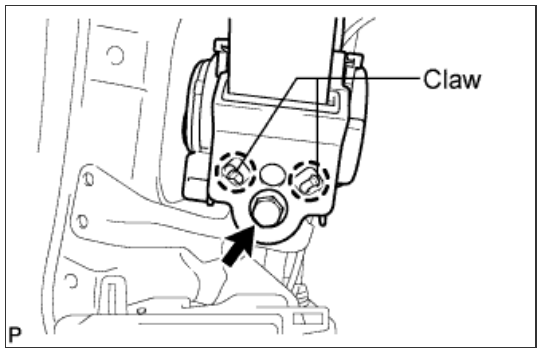
NOTICE:

Do not disassemble the retractor.

a. When the inclination of the retractor is 15° or less, check that the belt can be pulled from the retractor. When the inclination of the retractor is over 45°, check that the belt locks.
If the operation is not as specified, replace the belt.

for Preparation Click here

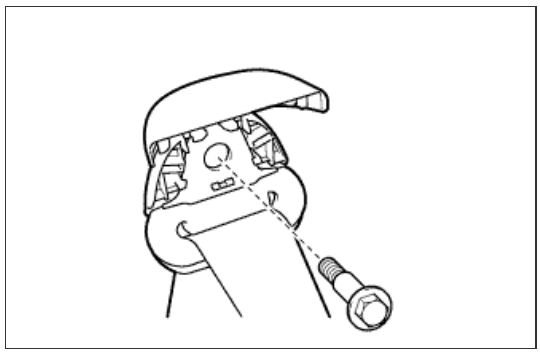
HINT:



- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**
- **A bolt without a torque specification is shown in the standard bolt chart (Click here).**

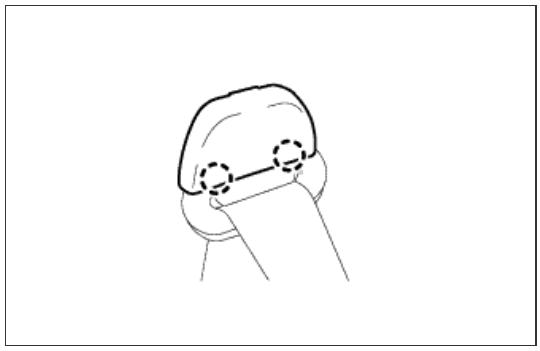
1. INSTALL REAR NO. 2 SEAT OUTER BELT ASSEMBLY LH

a. Align the claws with the seat belt positioning holes and install the retractor of the seat belt as shown in the illustration.



b. Install the seat belt with the bolt.

Torque:
42 N*m{ 427 kgf*cm , 31 ft.*lbf }

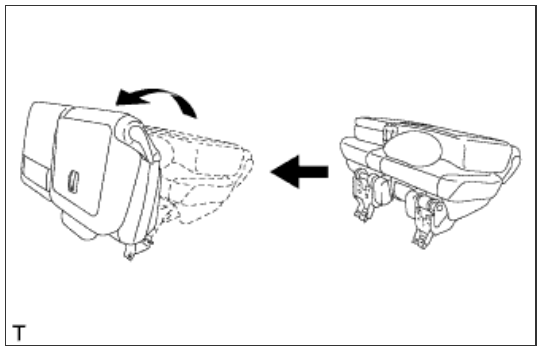


c. Install the seat belt shoulder anchor with the bolt.

Torque:
42 N*m{ 427 kgf*cm , 31 ft.*lbf }

d. Attach the 2 claws to close the seat belt shoulder anchor cover.

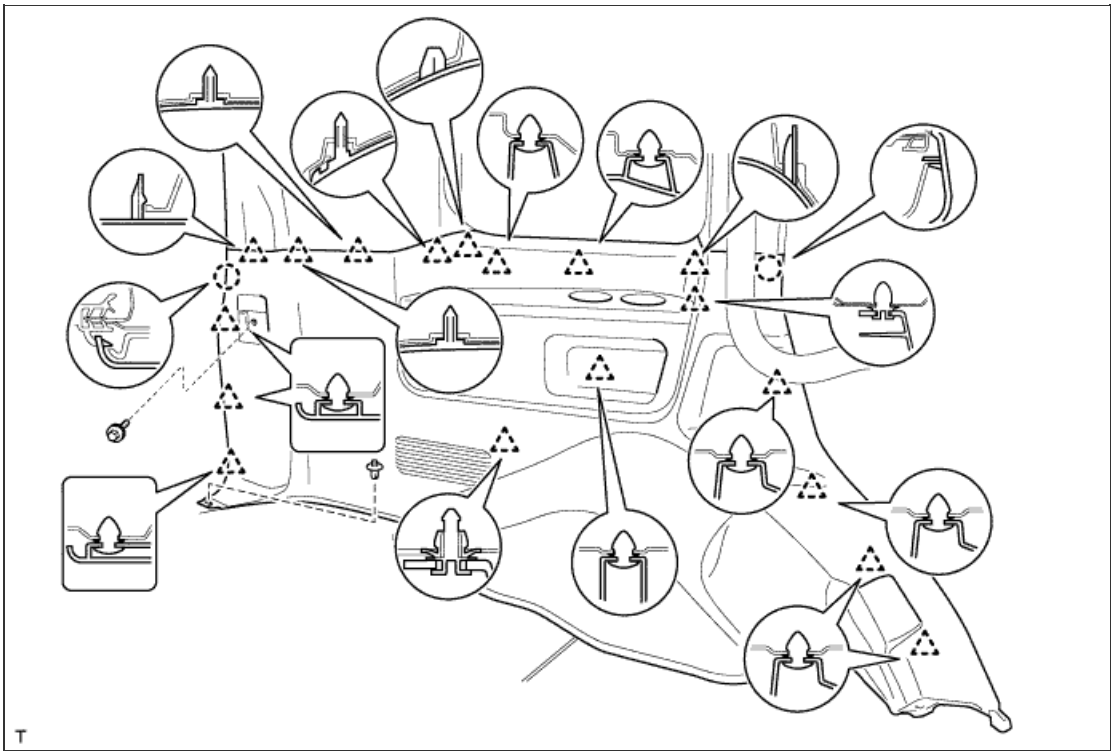
2. INSTALL FRONT QUARTER TRIM PANEL ASSEMBLY LH



HINT:

When installing the front quarter trim panel, operate the reclining adjuster release handle and move the No. 1 rear seat to the position shown in the illustration.

a. w/o Rear Air Conditioning System:
Connect the rear seat lock control lever cable.

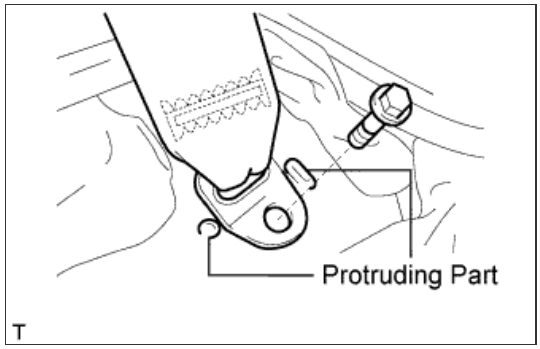


b. w/ Rear Air Conditioning System:
Connect the thermistor connector and rear seat lock control lever cable.

c. Attach the 18 clips and 2 claws to install the quarter trim panel.

d. Install the clip and bolt.

Torque:
12 N*m{ 122 kgf*cm , 9 ft.*lbf }

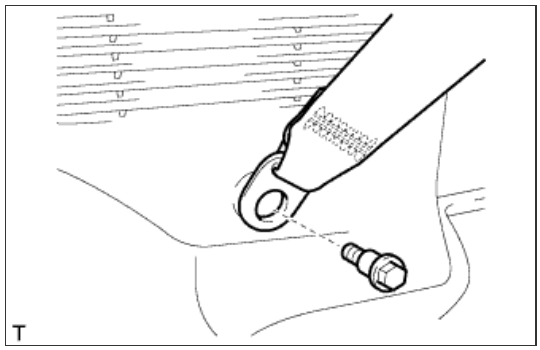


e. for LH Side:

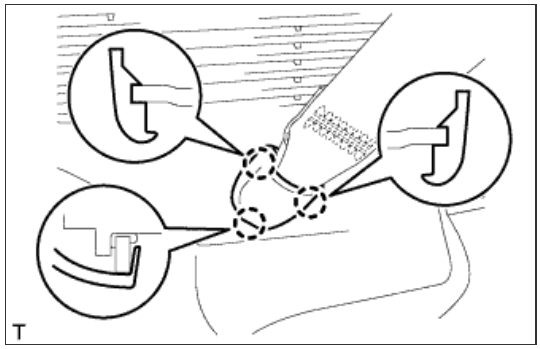
i. Install the rear No. 2 seat belt anchor LH with the bolt.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:



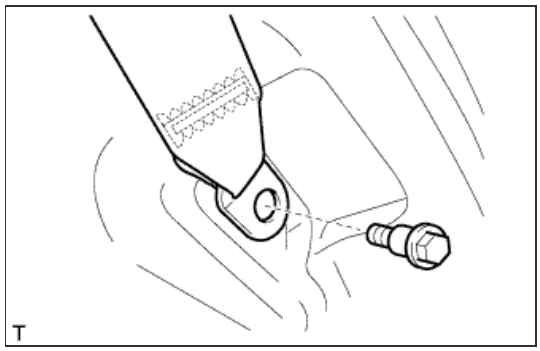
Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.



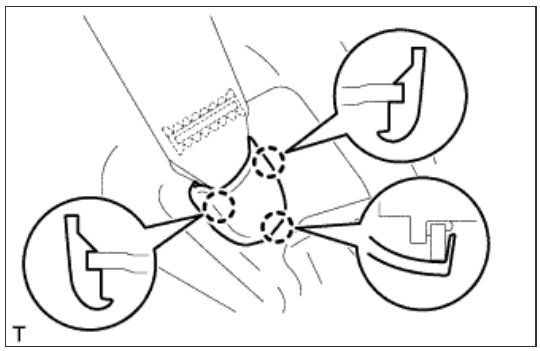
f. for RH Side:

i. Install the rear No. 2 seat belt anchor RH with the bolt.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

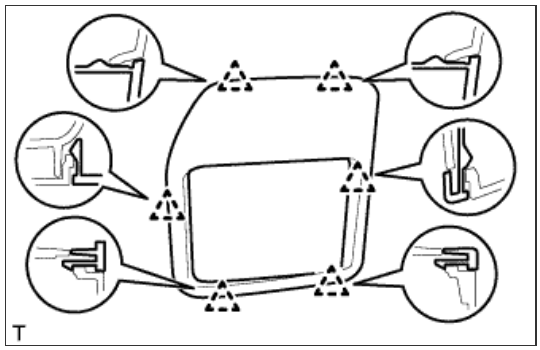


ii. Attach the 3 claws to install the cover.



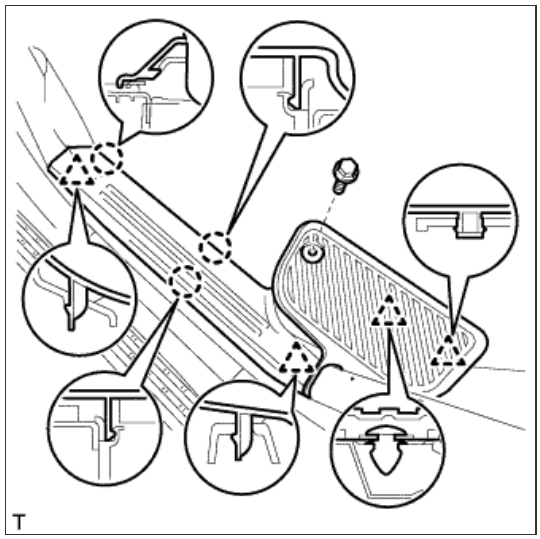
g. Install the rear No. 1 seat belt anchor with the bolt.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }



h. Attach the 3 claws to install the cover.

3. INSTALL REAR NO. 2 SEAT COVER BEZEL

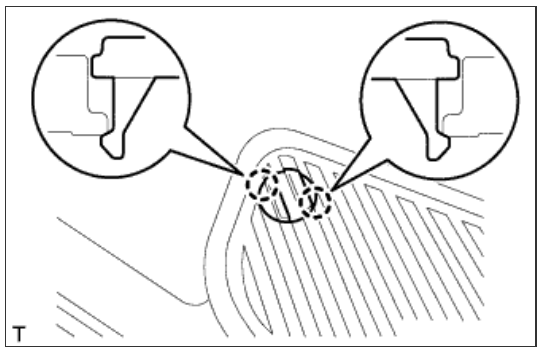


a. Attach the clips to install the rear No. 2 seat cover be b

4. INSTALL REAR DOOR SCUFF PLATE LH

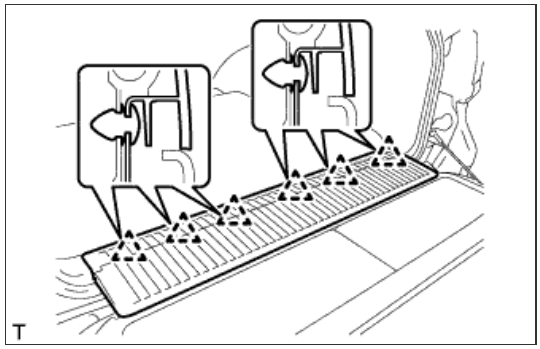
a. Attach the 3 claws and 4 clips to install the scuff plate.

b. Install the screw.



5. INSTALL REAR STEP COVER

HINT:



Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.

6. INSTALL REAR FLOOR MAT REAR SUPPORT PLATE

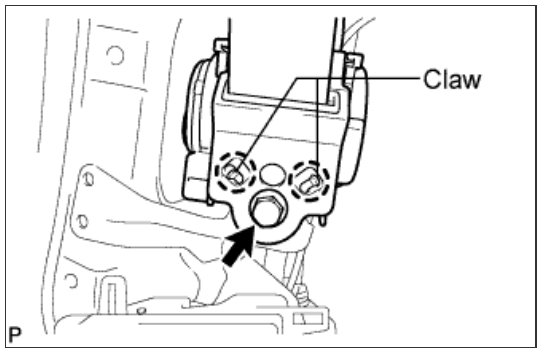
a. Attach the clips to install the support plate.

7. INSTALL REAR NO. 2 SEAT ASSEMBLY

a. Install the rear No. 2 seat assembly (Click here .

for Preparation Click here

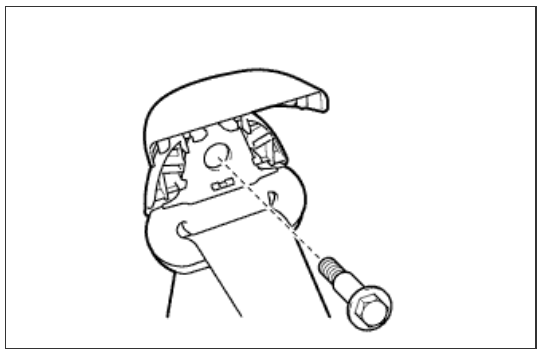
HINT:



- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**
- **A bolt without a torque specification is shown in the standard bolt chart (Click here).**

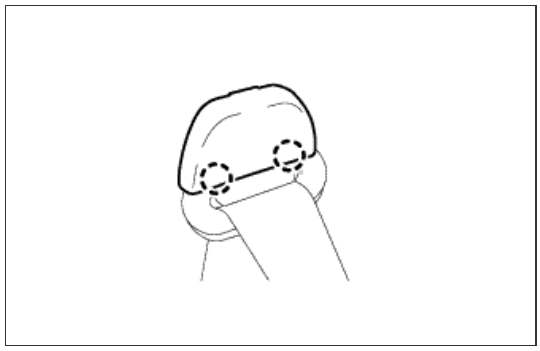
1. INSTALL REAR NO. 2 SEAT OUTER BELT ASSEMBLY LH

a. Align the claws with the seat belt positioning holes and install the retractor of the seat belt as shown in the illustration.



b. Install the seat belt with the bolt.

Torque:
42 N*m{ 427 kgf*cm , 31 ft.*lbf }

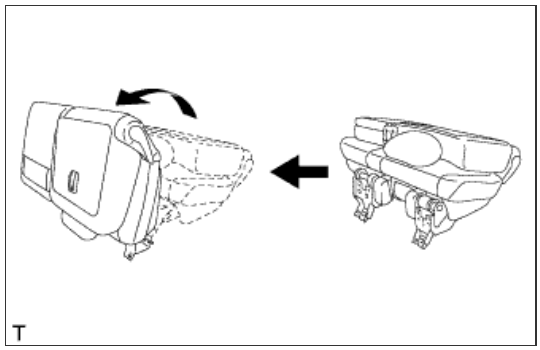


c. Install the seat belt shoulder anchor with the bolt.

Torque:
42 N*m{ 427 kgf*cm , 31 ft.*lbf }

d. Attach the 2 claws to close the seat belt shoulder anchor cover.

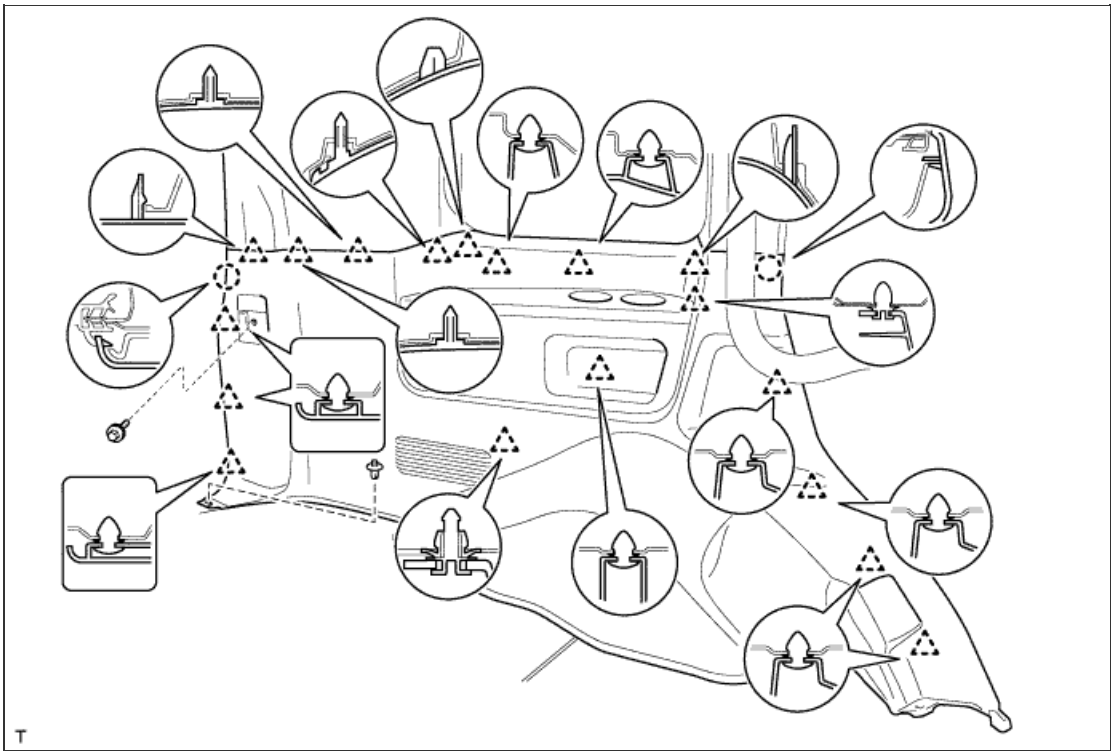
2. INSTALL FRONT QUARTER TRIM PANEL ASSEMBLY LH



HINT:

When installing the front quarter trim panel, operate the reclining adjuster release handle and move the No. 1 rear seat to the position shown in the illustration.

a. w/o Rear Air Conditioning System:
Connect the rear seat lock control lever cable.

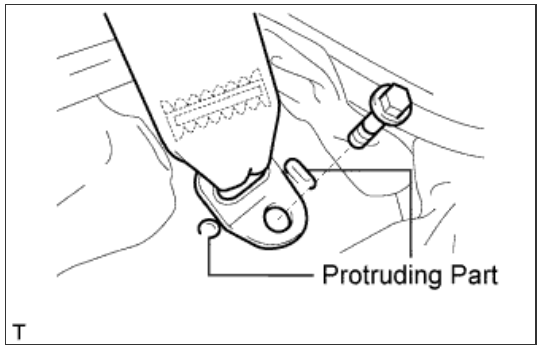


b. w/ Rear Air Conditioning System:
Connect the thermistor connector and rear seat lock control lever cable.

c. Attach the 18 clips and 2 claws to install the quarter trim panel.

d. Install the clip and bolt.

Torque:
12 N*m{ 122 kgf*cm , 9 ft.*lbf }

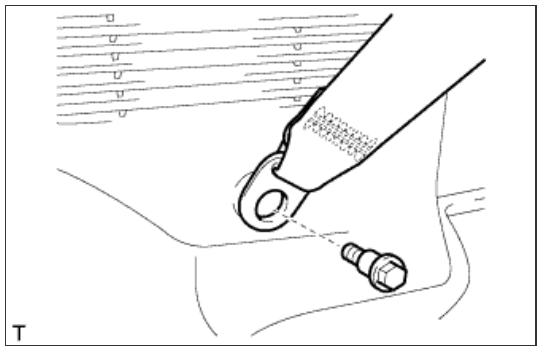


e. for LH Side:

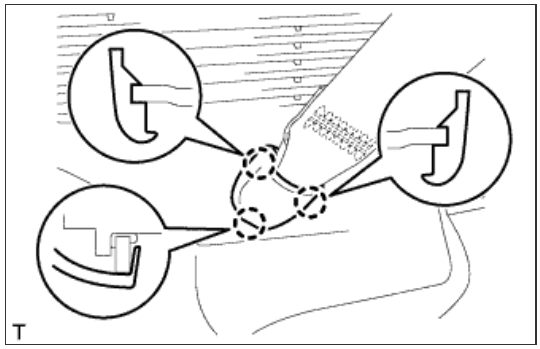
i. Install the rear No. 2 seat belt anchor LH with the bolt.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:



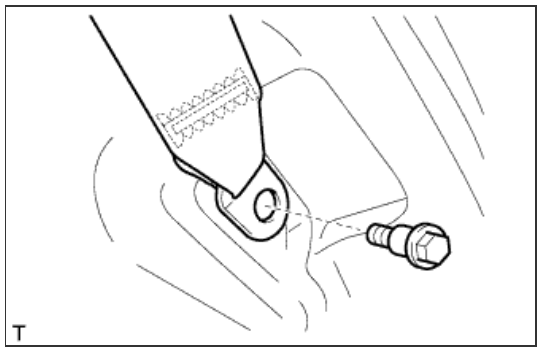
Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.



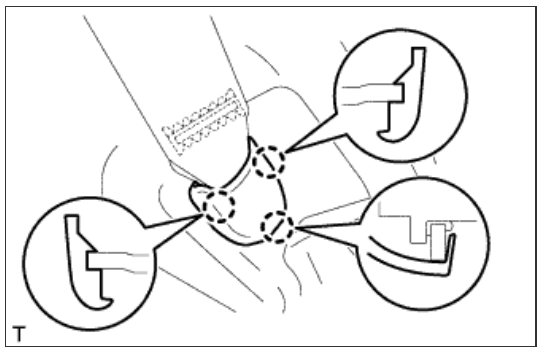
f. for RH Side:

i. Install the rear No. 2 seat belt anchor RH with the bolt.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

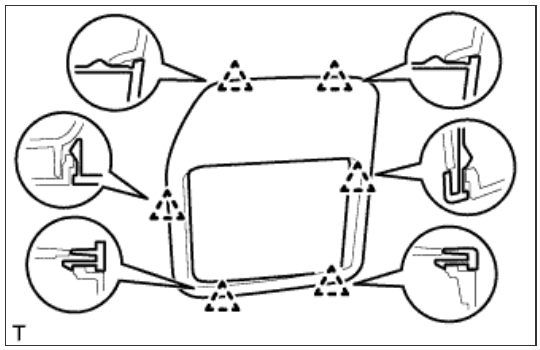


ii. Attach the 3 claws to install the cover.



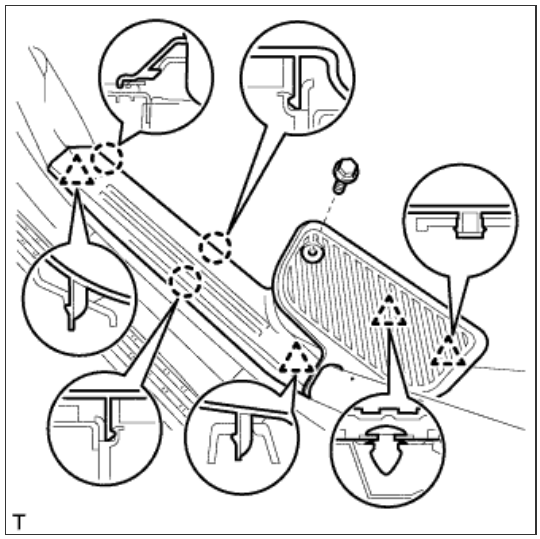
g. Install the rear No. 1 seat belt anchor with the bolt.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }



h. Attach the 3 claws to install the cover.

3. INSTALL REAR NO. 2 SEAT COVER BEZEL

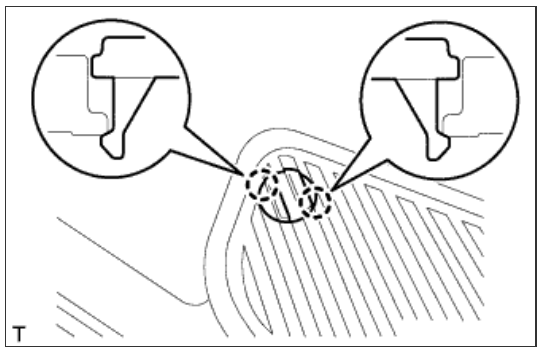


a. Attach the clips to install the rear No. 2 seat cover be b

4. INSTALL REAR DOOR SCUFF PLATE LH

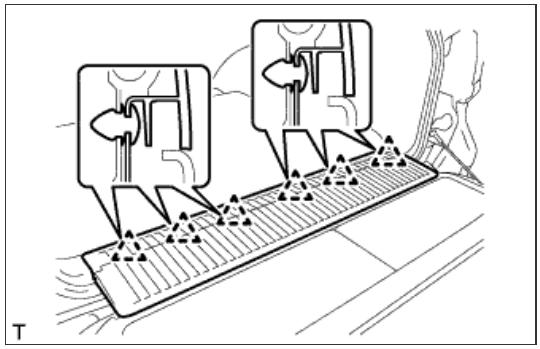
a. Attach the 3 claws and 4 clips to install the scuff plate.

b. Install the screw.



5. INSTALL REAR STEP COVER

HINT:



Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.

6. INSTALL REAR FLOOR MAT REAR SUPPORT PLATE

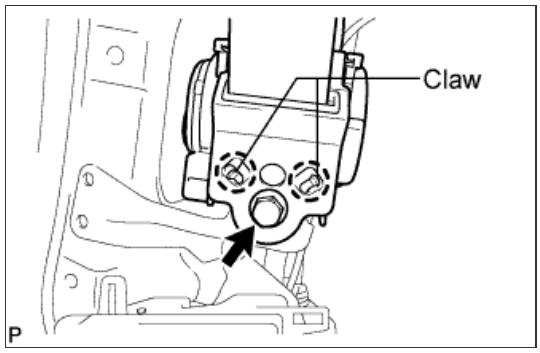
a. Attach the clips to install the support plate.

7. INSTALL REAR NO. 2 SEAT ASSEMBLY

a. Install the rear No. 2 seat assembly (Click here .

for Preparation Click here

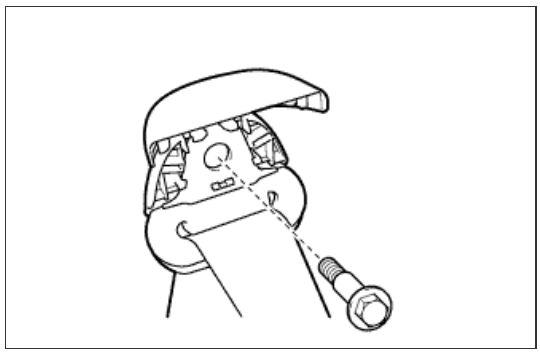
HINT:



- **Use the same procedures for the LH side and RH side.**
- **The procedures listed below are for the LH side.**
- **A bolt without a torque specification is shown in the standard bolt chart (Click here).**

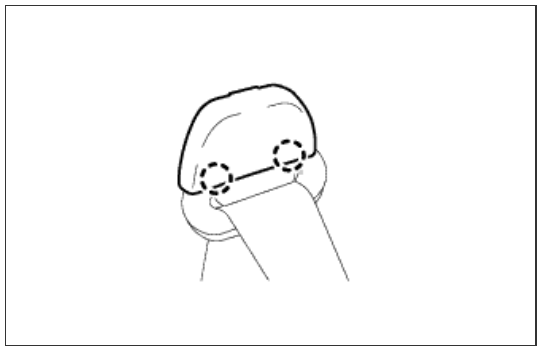
1. INSTALL REAR NO. 2 SEAT OUTER BELT ASSEMBLY LH

a. Align the claws with the seat belt positioning holes and install the retractor of the seat belt as shown in the illustration.



b. Install the seat belt with the bolt.

Torque:
42 N*m{ 427 kgf*cm , 31 ft.*lbf }

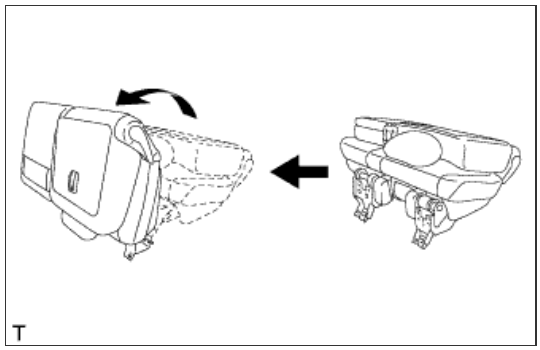


c. Install the seat belt shoulder anchor with the bolt.

Torque:
42 N*m{ 427 kgf*cm , 31 ft.*lbf }

d. Attach the 2 claws to close the seat belt shoulder anchor cover.

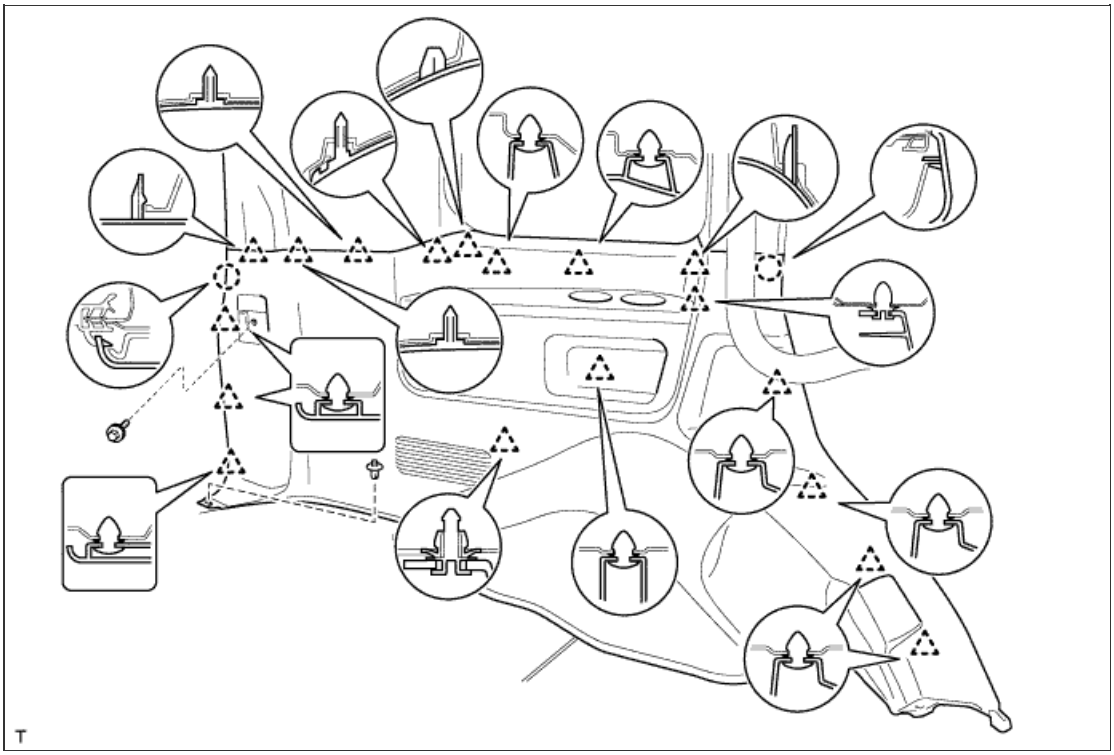
2. INSTALL FRONT QUARTER TRIM PANEL ASSEMBLY LH



HINT:

When installing the front quarter trim panel, operate the reclining adjuster release handle and move the No. 1 rear seat to the position shown in the illustration.

a. w/o Rear Air Conditioning System:
Connect the rear seat lock control lever cable.

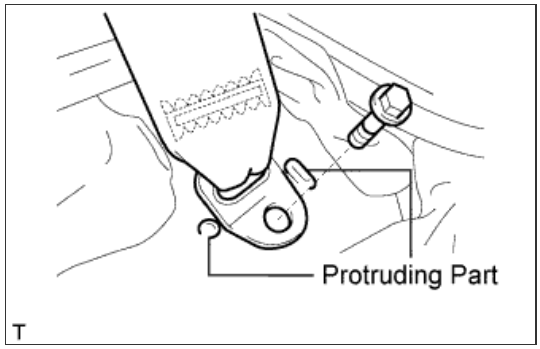


b. w/ Rear Air Conditioning System:
Connect the thermistor connector and rear seat lock control lever cable.

c. Attach the 18 clips and 2 claws to install the quarter trim panel.

d. Install the clip and bolt.

Torque:
12 N*m{ 122 kgf*cm , 9 ft.*lbf }

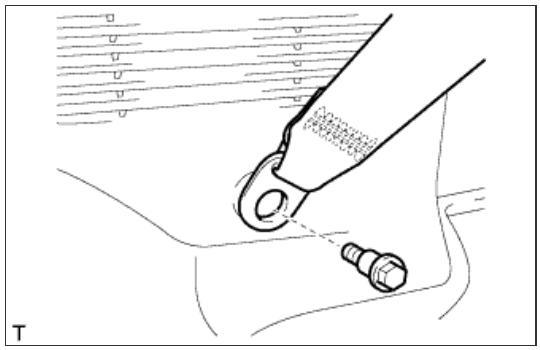


e. for LH Side:

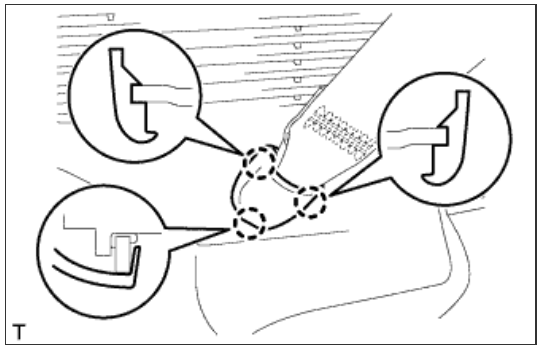
i. Install the rear No. 2 seat belt anchor LH with the bolt.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:



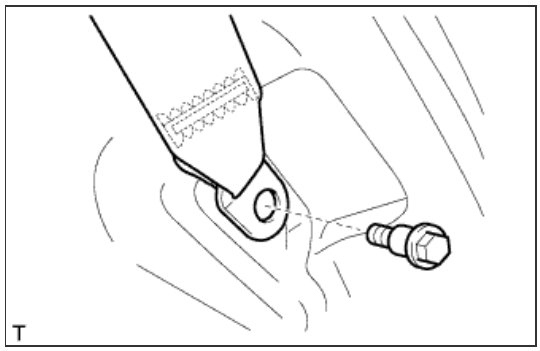
Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.



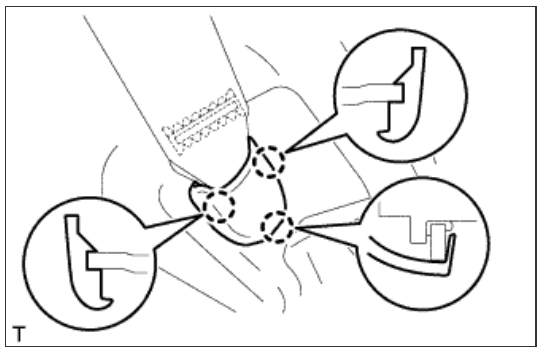
f. for RH Side:

i. Install the rear No. 2 seat belt anchor RH with the bolt.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

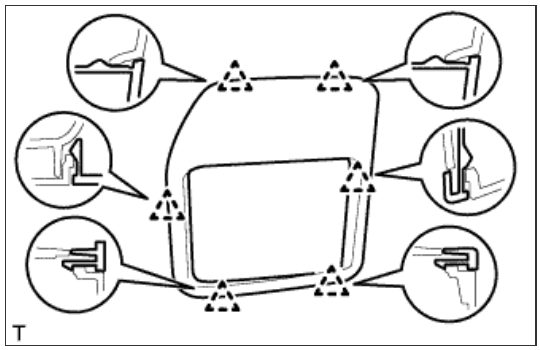


ii. Attach the 3 claws to install the cover.



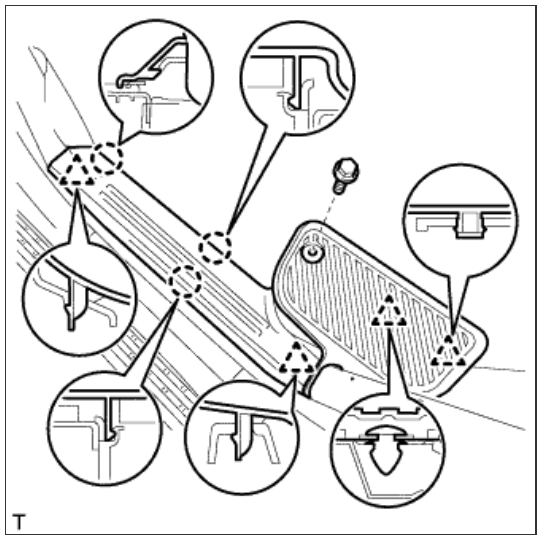
g. Install the rear No. 1 seat belt anchor with the bolt.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }



h. Attach the 3 claws to install the cover.

3. INSTALL REAR NO. 2 SEAT COVER BEZEL

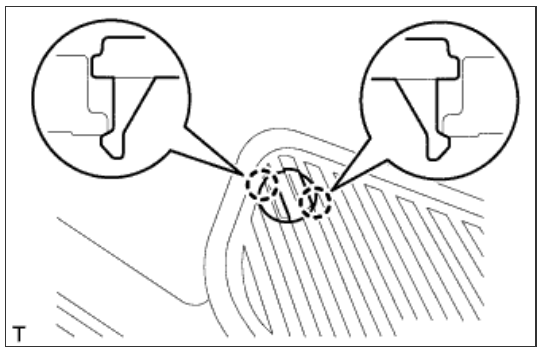


a. Attach the clips to install the rear No. 2 seat cover be b

4. INSTALL REAR DOOR SCUFF PLATE LH

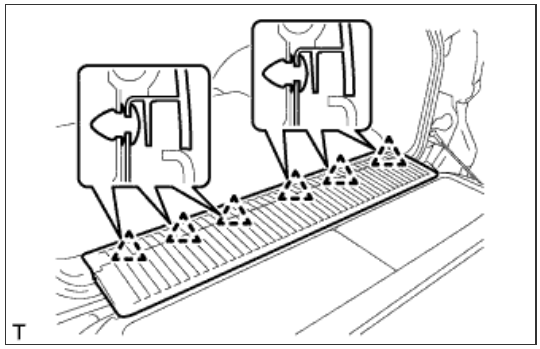
a. Attach the 3 claws and 4 clips to install the scuff plate.

b. Install the screw.



5. INSTALL REAR STEP COVER

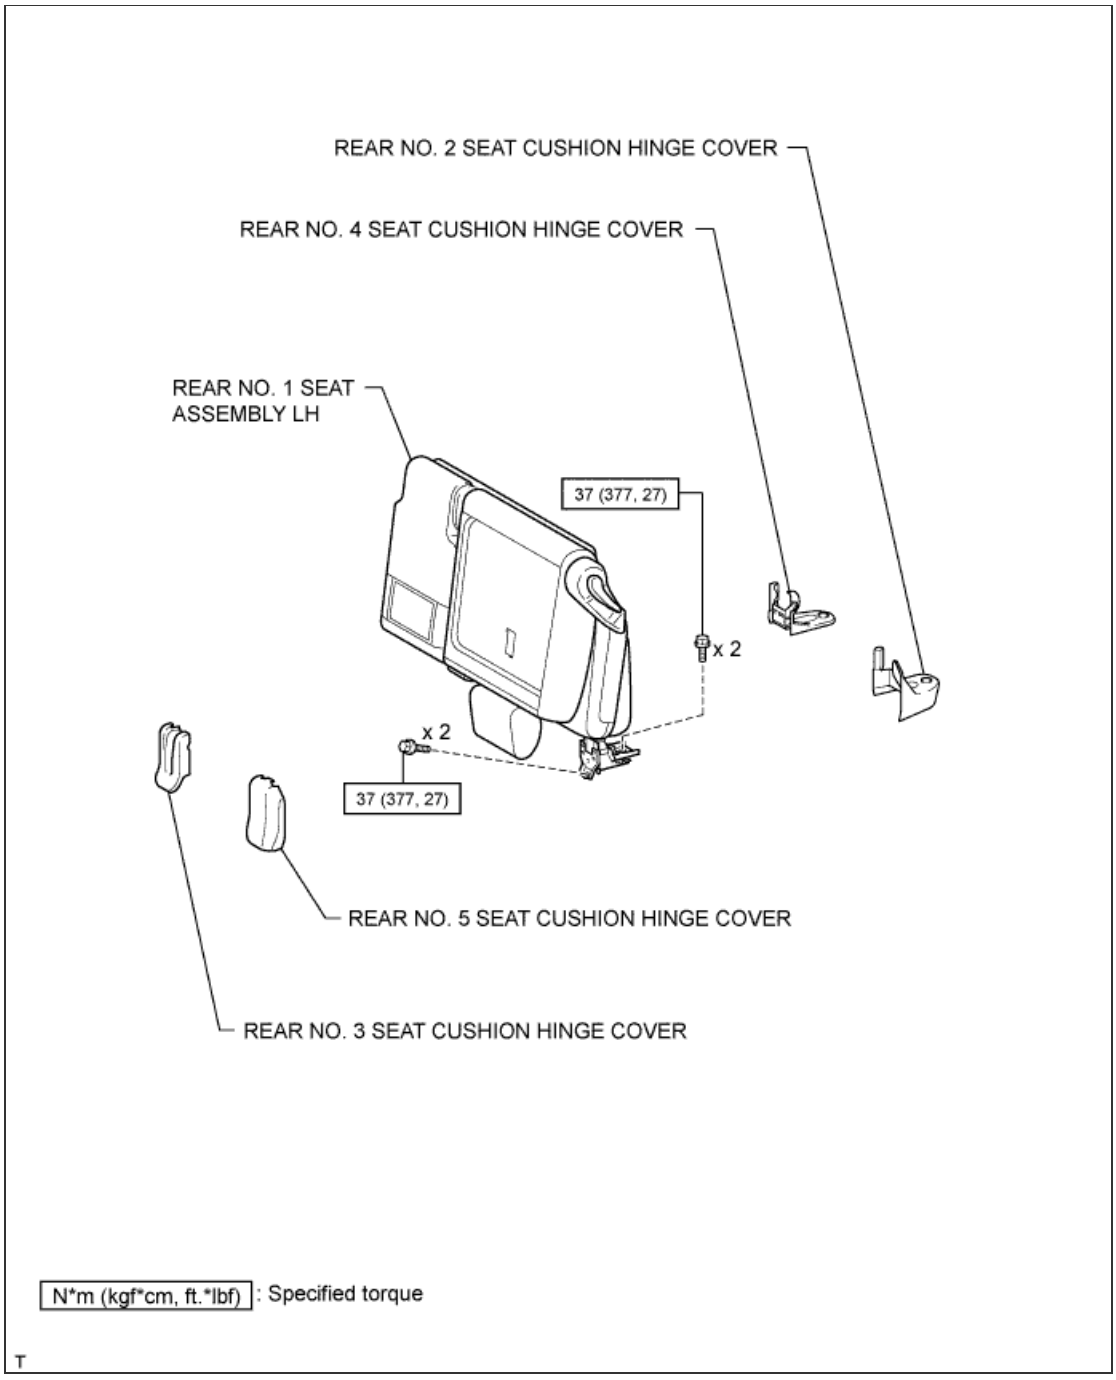
HINT:



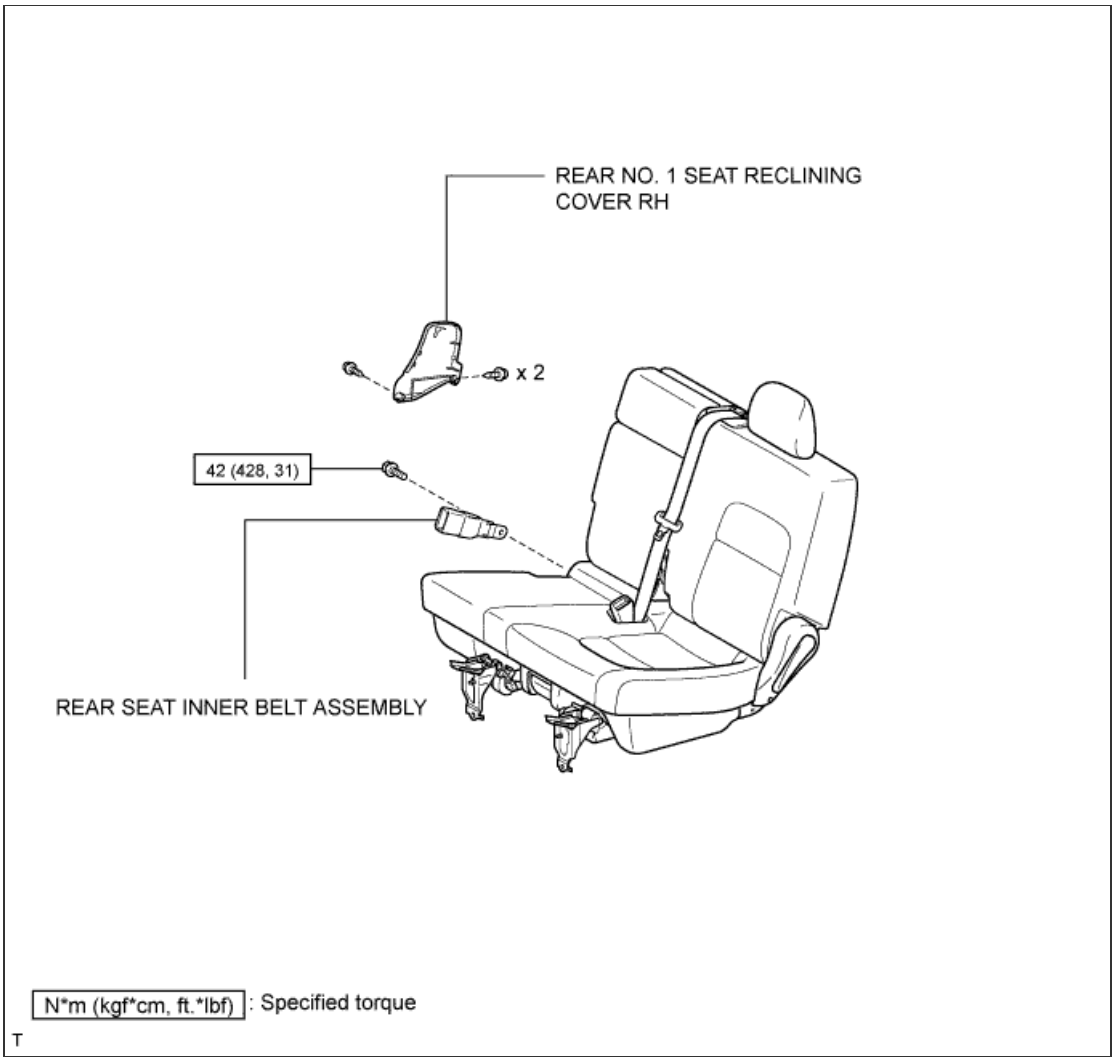
Use the same procedure to install the step cover on the other side.

a. Attach the 2 claws to install the step cover.

6. INSTALL REAR FLOOR MAT REAR SUPPORT PLATE



a. Attach the clips to install the support plate.



7. INSTALL REAR NO. 2 SEAT ASSEMBLY

a. Install the rear No. 2 seat assembly (Click here .

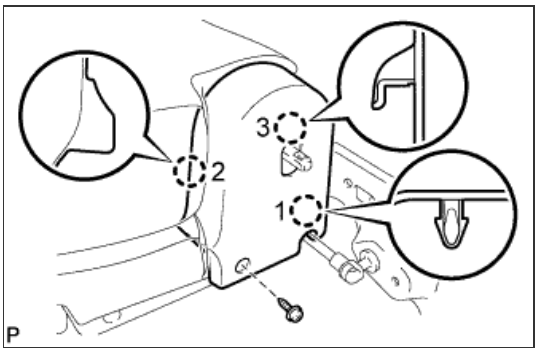
	rotective Tape

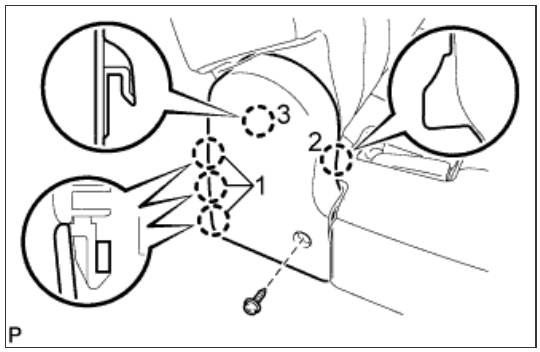
3. REMOVE NO. 2 RECLINING ADJUSTER RELEASE HANDLE LH



a. Remove the screw and release handle.

4. REMOVE RECLINING ADJUSTER COVER LH

a. Remove the screw.

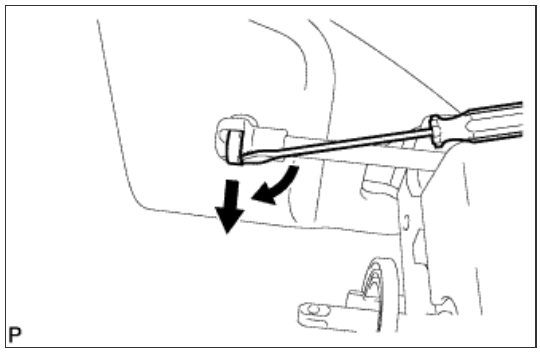


b. Detach the 3 claws in the order shown in the ill stration and then remove the cover.

5. REMOVE RECLINING ADJUSTER COVER RH

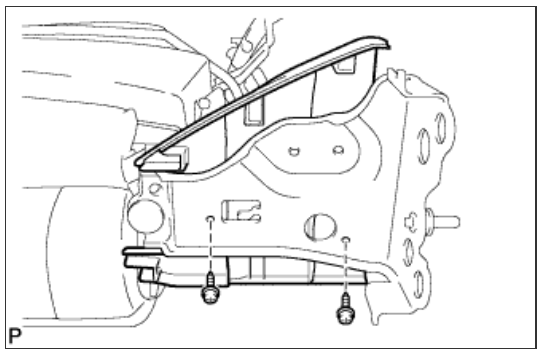
a. Remove the screw.

b. Detach the claws in the order shown in the ill stration and then remove the cover.



6. REMOVE REAR SEAT REAR BRACKET COVER REAR

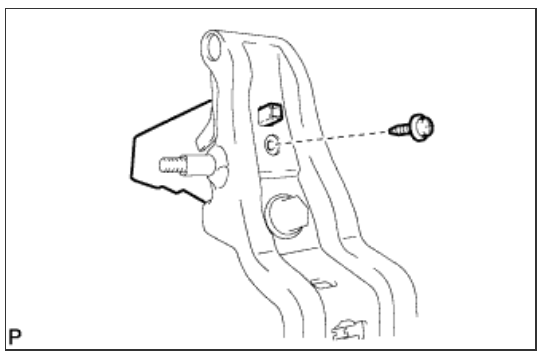
a. Detach the 2 claws and cover.



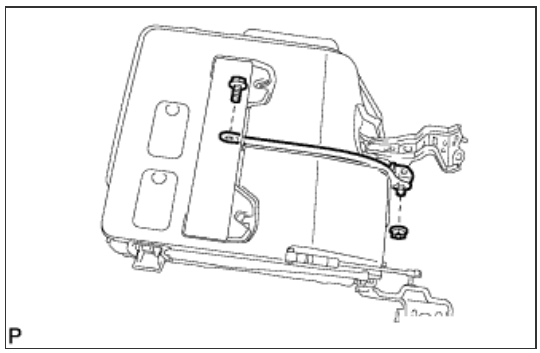
7. REMOVE REAR NO. 3 SEAT LEG COVER LH

a. Using a screwdriver remove the spring o the seat stay ball oint.

b. Disconnect the seat stay.

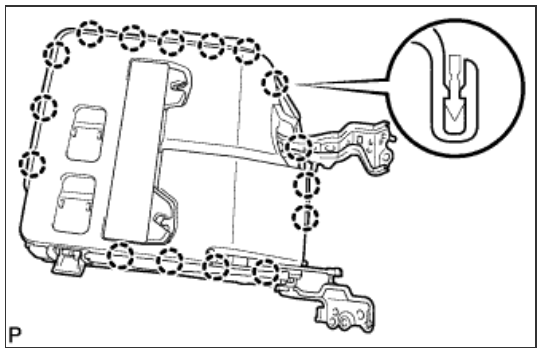


c. Remove the 2 screws and cover.



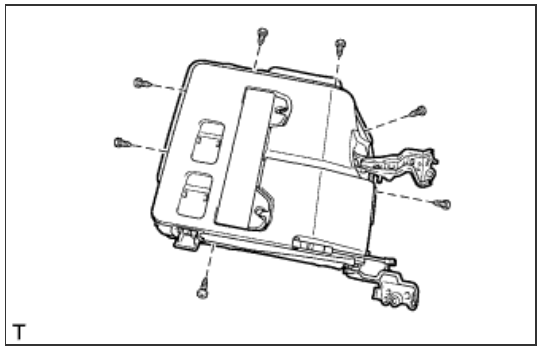
8. REMOVE NO. 2 SEAT LEG COVER NO. 2

a. Remove the screw and seat leg cover.



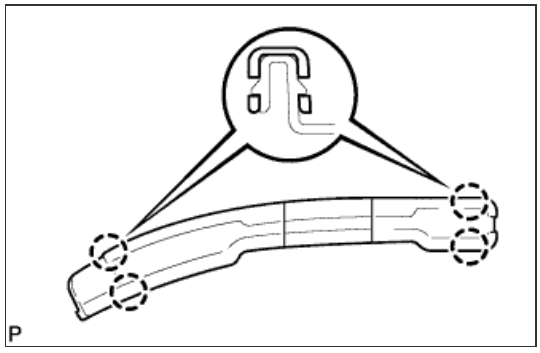
9. REMOVE 3RD SEAT LINK SUB-ASSEMBLY LH

a. Remove the bolt n t and seat link.



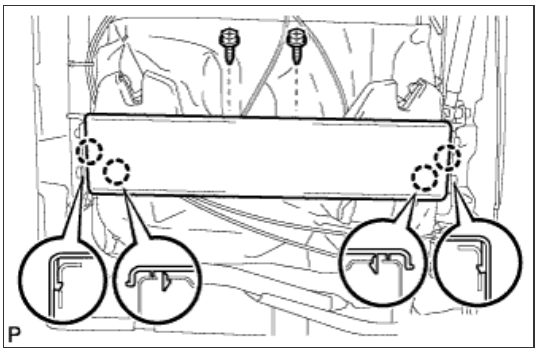
10. REMOVE REAR SEAT CUSHION UNDER COVER LH

a. Detach the claws.



b. Remove the screws and cover.

11. REMOVE NO. 3 SEAT FRONT BRACKET COVER LH

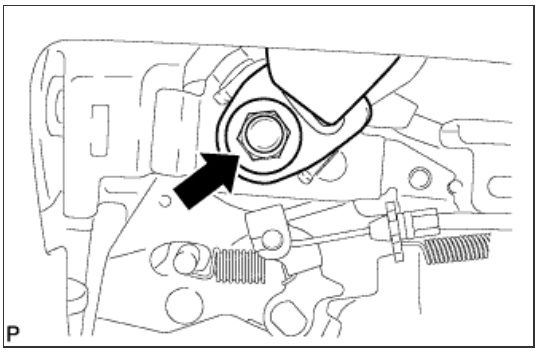


a. Detach the claws and remove the cover.

12. REMOVE NO. 3 SEAT LEG COVER NO. 2

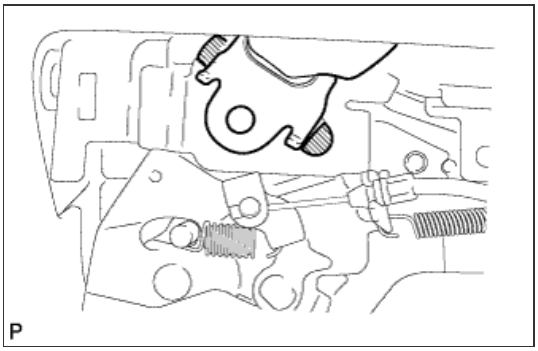
a. Remove the 2 screws.

b. Detach the claws and remove the cover.



13. REMOVE REAR SEAT INNER BELT SUB-ASSEMBLY

a. Remove the n t and belt.

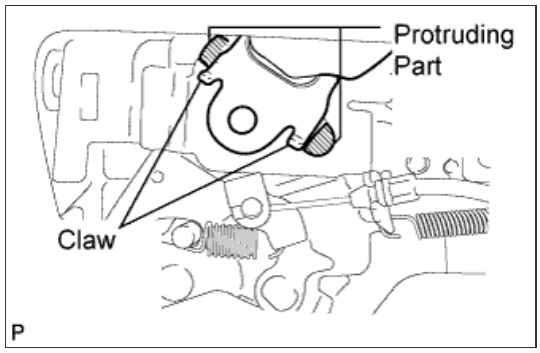


HINT:

The rear No. 2 seat inner belt is i ed with the same n t as the rear seat inner belt. There ore it becomes disconnected when the n t is removed.

14. REMOVE REAR NO. 2 SEAT INNER BELT SUB-ASSEMBLY

a. Remove the belt.



for Preparation Click here

1. INSTALL REAR NO. 2 SEAT INNER BELT SUB-ASSEMBLY

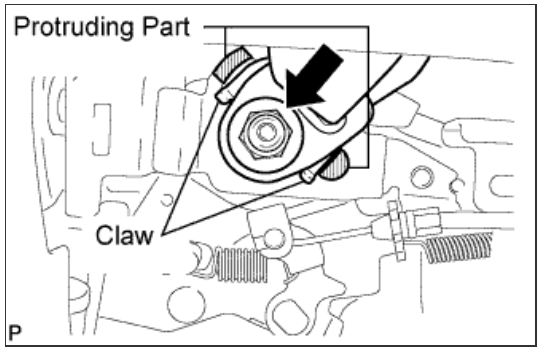
a. Install the belt.

NOTICE:

- **Make sure the claws are facing away from the seat.**
- **Do not overlap the anchor part of the seat belt and protruding parts of the seat.**

2. INSTALL REAR SEAT INNER BELT SUB-ASSEMBLY (for LH Side)

a. Install the belt with the nut.

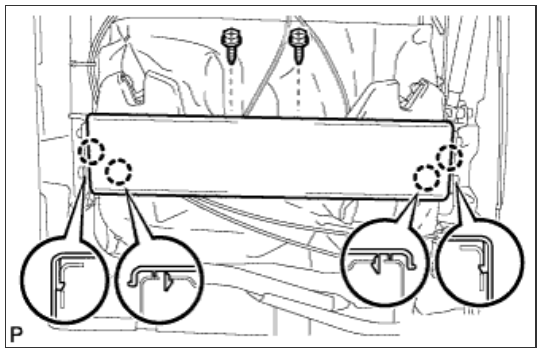


Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

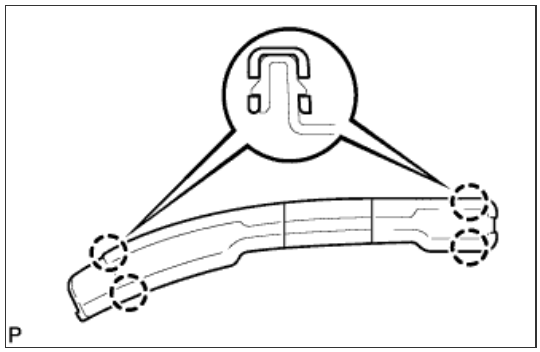
Do not overlap the anchor part of the seat belt and protruding parts of the seat.

HINT:



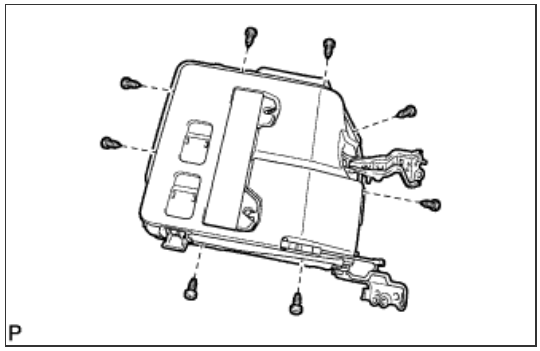
The rear No. 2 seat inner belt is fixed with the same nut as the rear seat inner belt. Therefore, connect it when installing the rear seat inner belt.

3. INSTALL NO. 3 SEAT LEG COVER NO. 2



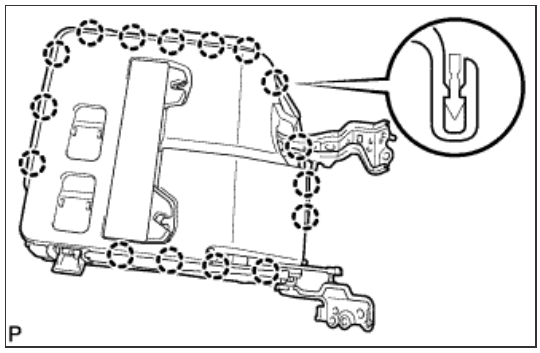
a. Attach the 4 claws to install the cover.

b. Install the 2 screws.



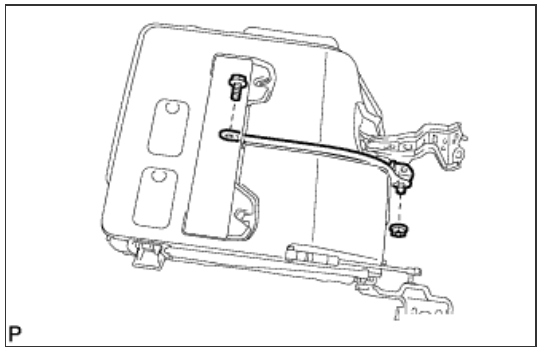
4. INSTALL NO. 3 SEAT FRONT BRACKET COVER LH

a. Attach the 4 claws to install the cover.



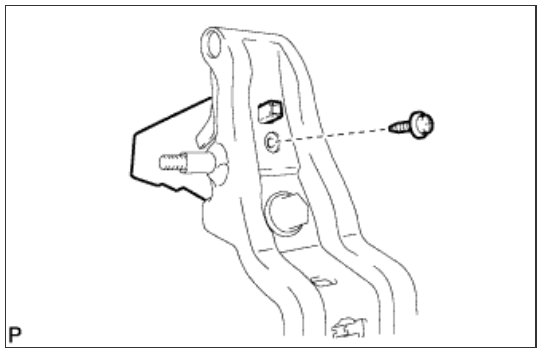
5. INSTALL REAR SEAT CUSHION UNDER COVER LH

a. Install the cover with the 8 screws.



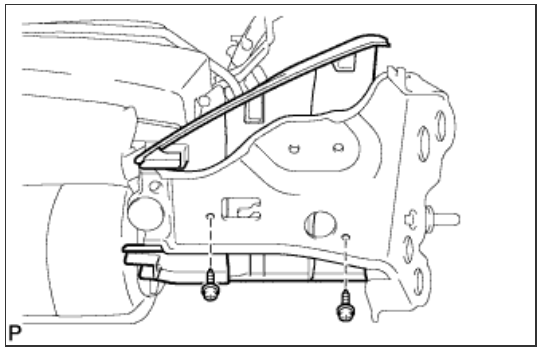
b. Attach the 16 claws.

6. INSTALL 3RD SEAT LIN SUB-ASSEMBLY LH



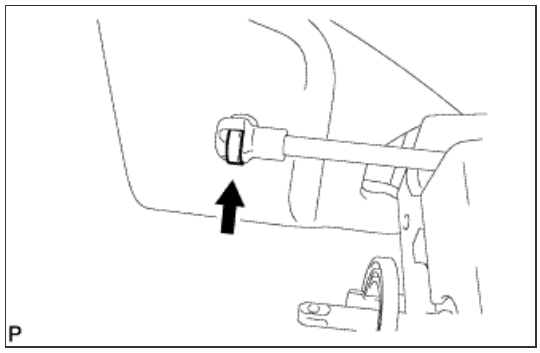
a. Install the seat link with the bolt and nut.

Torque:
8.5 N*m{ 87 kgf*cm , 75 in.*lbf }



7. INSTALL NO. 2 SEAT LEG COVER NO. 2

a. Install the seat leg cover with the screw.

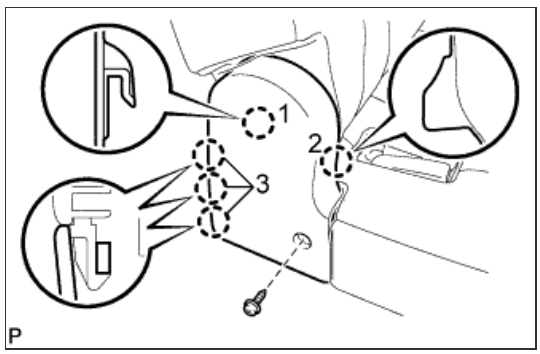


8. INSTALL REAR NO. 3 SEAT LEG COVER LH

a. Install the seat leg cover with the 2 screws.

b. Install the spring of the seat stay ball-joint.

c. Connect the seat stay to the seat frame.

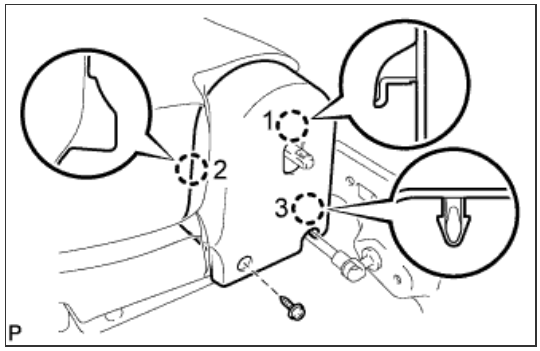


. INSTALL REAR SEAT REAR BRAC ET COVER REAR

a. Attach the 2 claws to install the cover.

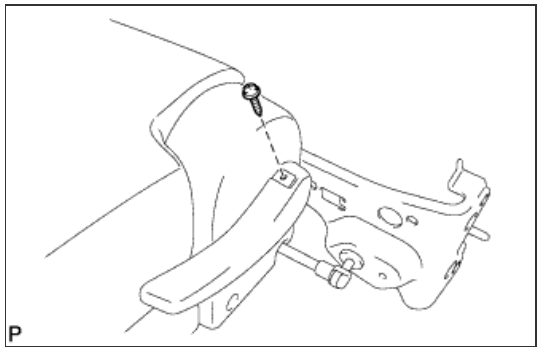
10. INSTALL RECLINING ADJUSTER COVER RH

a. Attach the 5 claws in the order shown in the illustration to install the cover.



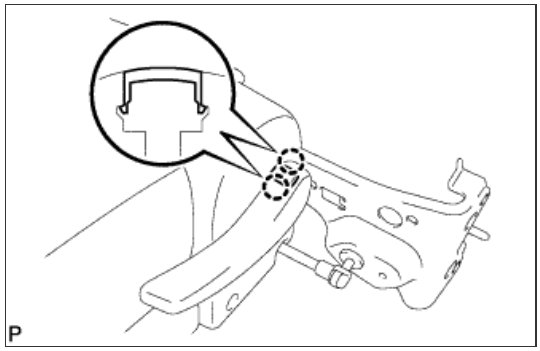
b. Install the screw.

11. INSTALL RECLINING ADJUSTER COVER LH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

b. Install the screw.



12. INSTALL NO. 2 RECLINING ADJUSTER RELEASE HANDLE LH

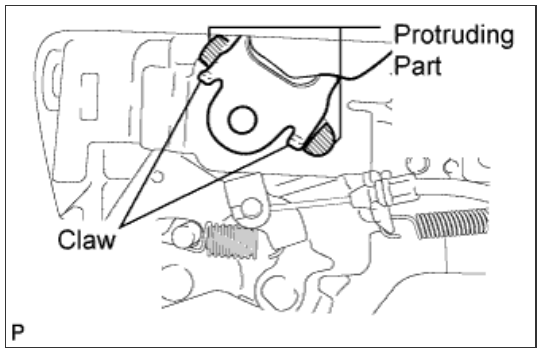
a. Install the release handle with the screw.

13. INSTALL SEAT ADJUSTER BOLT COVER

a. Attach the 2 claws to install the cover.

14. INSTALL REAR NO. 2 SEAT ASSEMBLY LH

a. Install the rear No. 2 seat assembly (Click here).



for Preparation Click here

1. INSTALL REAR NO. 2 SEAT INNER BELT SUB-ASSEMBLY

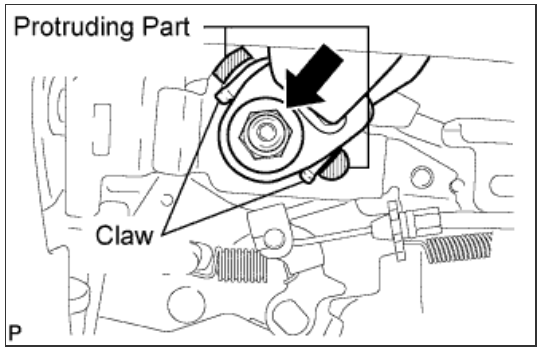
a. Install the belt.

NOTICE:

- **Make sure the claws are facing away from the seat.**
- **Do not overlap the anchor part of the seat belt and protruding parts of the seat.**

2. INSTALL REAR SEAT INNER BELT SUB-ASSEMBLY (for LH Side)

a. Install the belt with the nut.

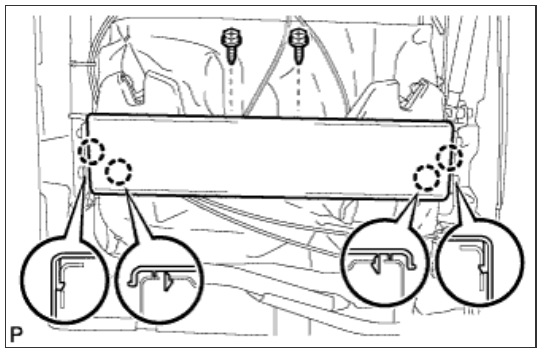


Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

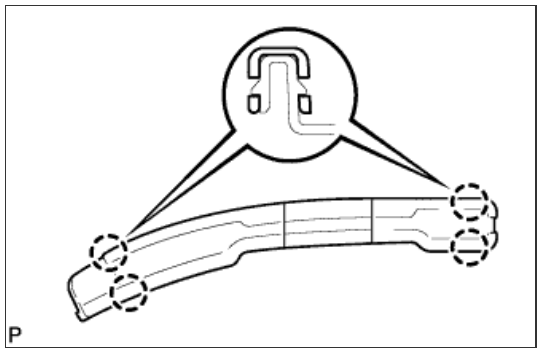
Do not overlap the anchor part of the seat belt and protruding parts of the seat.

HINT:



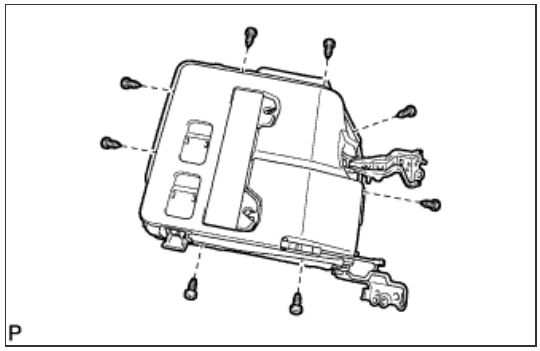
The rear No. 2 seat inner belt is fixed with the same nut as the rear seat inner belt. Therefore, connect it when installing the rear seat inner belt.

3. INSTALL NO. 3 SEAT LEG COVER NO. 2



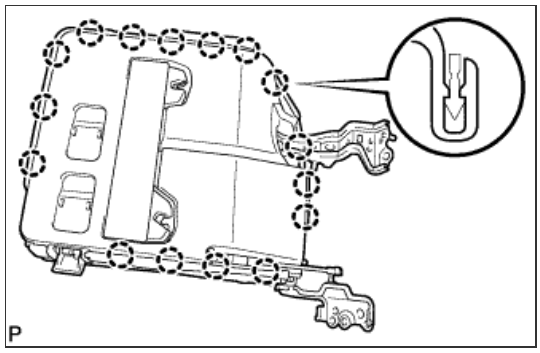
a. Attach the 4 claws to install the cover.

b. Install the 2 screws.



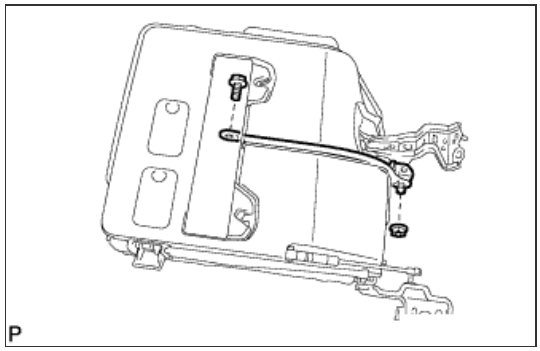
4. INSTALL NO. 3 SEAT FRONT BRACKET COVER LH

a. Attach the 4 claws to install the cover.



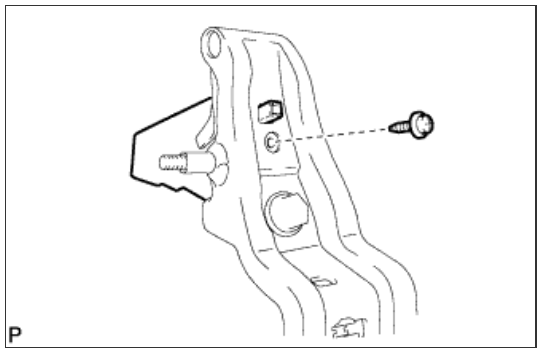
5. INSTALL REAR SEAT CUSHION UNDER COVER LH

a. Install the cover with the 8 screws.



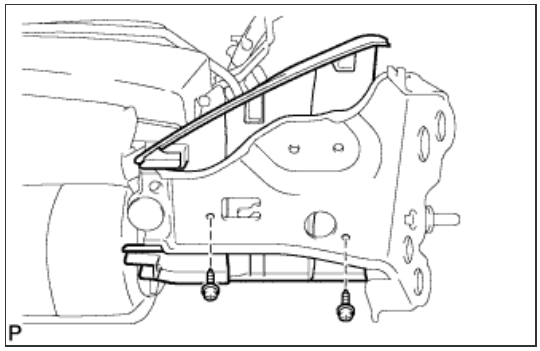
b. Attach the 16 claws.

6. INSTALL 3RD SEAT LIN SUB-ASSEMBLY LH



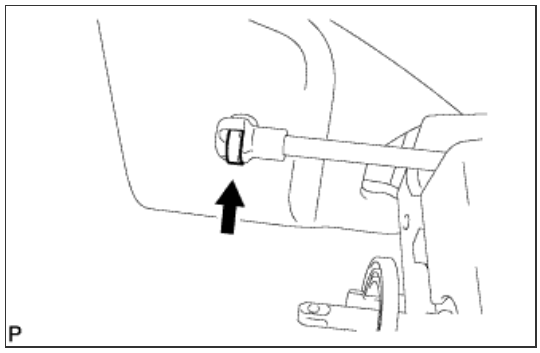
a. Install the seat link with the bolt and nut.

Torque:
8.5 N*m{ 87 kgf*cm , 75 in.*lbf }



7. INSTALL NO. 2 SEAT LEG COVER NO. 2

a. Install the seat leg cover with the screw.

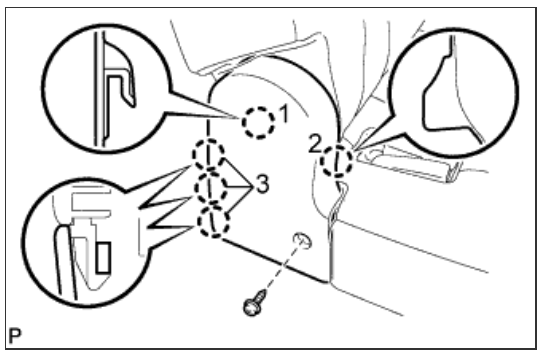


8. INSTALL REAR NO. 3 SEAT LEG COVER LH

a. Install the seat leg cover with the 2 screws.

b. Install the spring of the seat stay ball-joint.

c. Connect the seat stay to the seat frame.

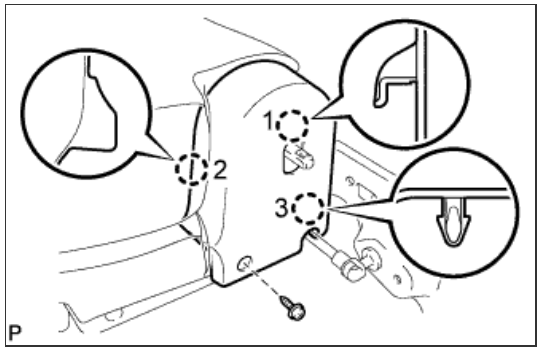


. INSTALL REAR SEAT REAR BRAC ET COVER REAR

a. Attach the 2 claws to install the cover.

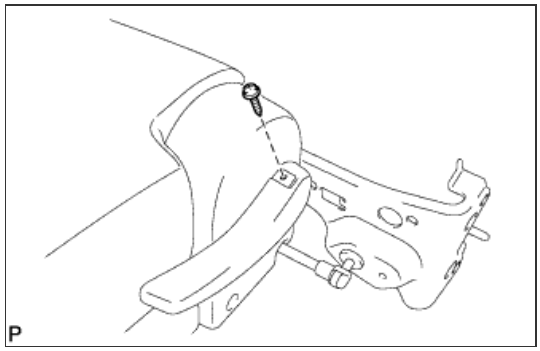
10. INSTALL RECLINING ADJUSTER COVER RH

a. Attach the 5 claws in the order shown in the illustration to install the cover.



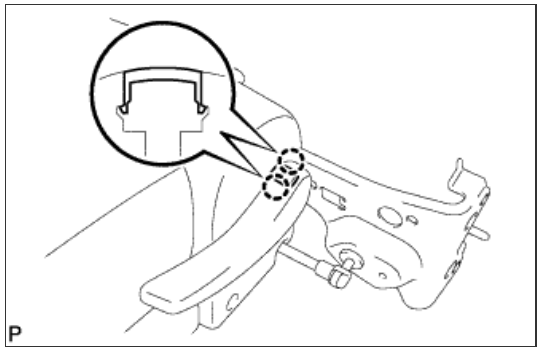
b. Install the screw.

11. INSTALL RECLINING ADJUSTER COVER LH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

b. Install the screw.



12. INSTALL NO. 2 RECLINING ADJUSTER RELEASE HANDLE LH

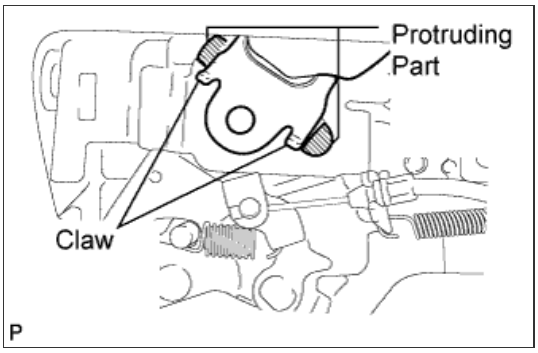
a. Install the release handle with the screw.

13. INSTALL SEAT ADJUSTER BOLT COVER

a. Attach the 2 claws to install the cover.

14. INSTALL REAR NO. 2 SEAT ASSEMBLY LH

a. Install the rear No. 2 seat assembly (Click here).



for Preparation Click here

1. INSTALL REAR NO. 2 SEAT INNER BELT SUB-ASSEMBLY

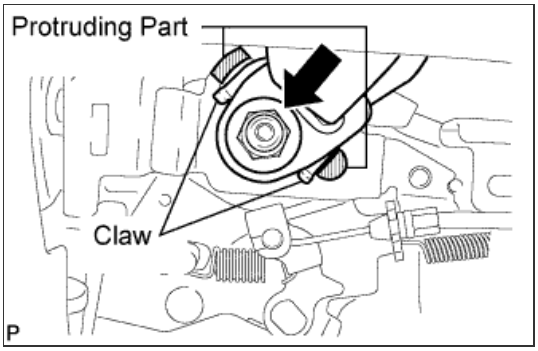
a. Install the belt.

NOTICE:

- **Make sure the claws are facing away from the seat.**
- **Do not overlap the anchor part of the seat belt and protruding parts of the seat.**

2. INSTALL REAR SEAT INNER BELT SUB-ASSEMBLY (for LH Side)

a. Install the belt with the nut.

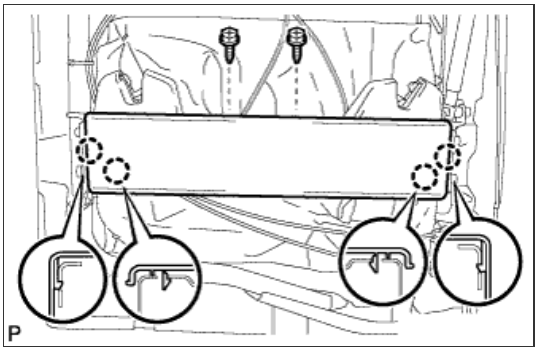


Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

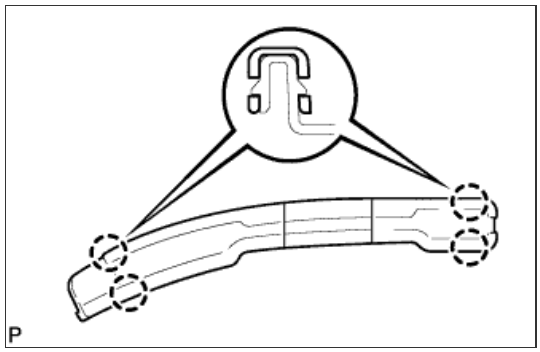
Do not overlap the anchor part of the seat belt and protruding parts of the seat.

HINT:



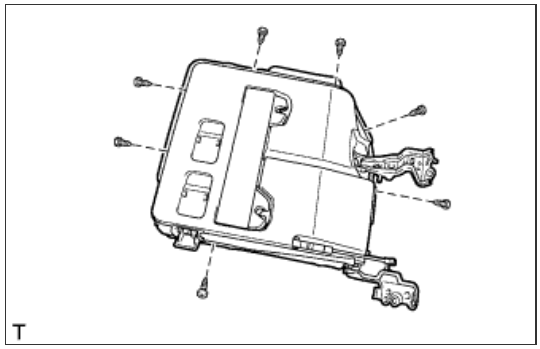
The rear No. 2 seat inner belt is fixed with the same nut as the rear seat inner belt. Therefore, connect it when installing the rear seat inner belt.

3. INSTALL NO. 3 SEAT LEG COVER NO. 2



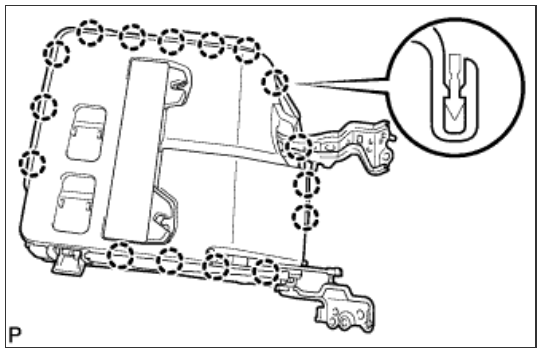
a. Attach the claws to install the cover.

b. Install the 2 screws.



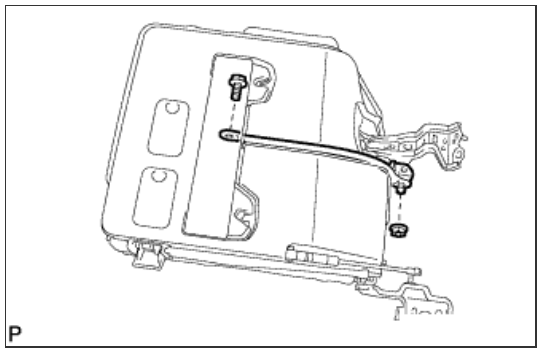
4. INSTALL NO. 3 SEAT FRONT BRACKET COVER LH

a. Attach the claws to install the cover.



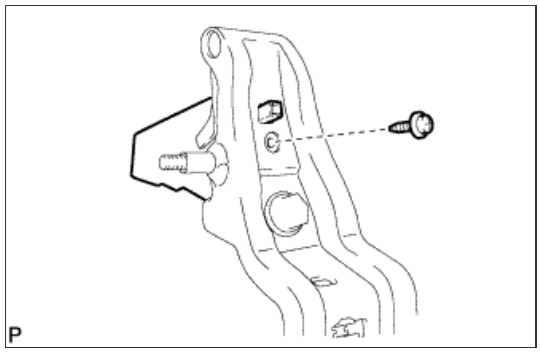
5. INSTALL REAR SEAT CUSHION UNDER COVER LH

a. Install the cover with the screws.



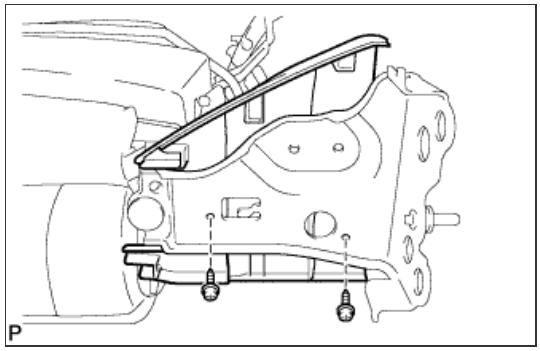
b. Attach the 1 claws.

6. INSTALL 3RD SEAT LIN SUB-ASSEMBLY LH



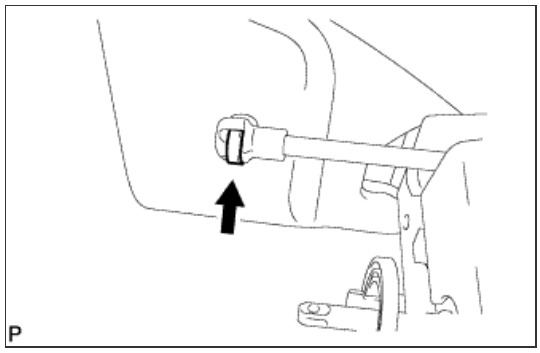
a. Install the seat lin with the bolt and nut.

Torque:
8.5 N*m{ 87 kgf*cm , 75 in.*lbf }



7. INSTALL NO. 2 SEAT LEG COVER NO. 2

a. Install the seat leg cover with the screw.

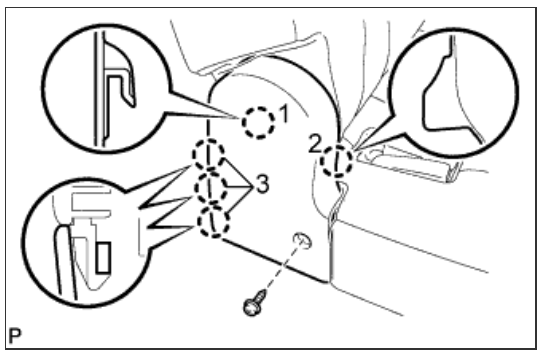


8. INSTALL REAR NO. 3 SEAT LEG COVER LH

a. Install the seat leg cover with the 2 screws.

b. Install the spring of the seat sta ball oint.

c. onnect the seat sta to the seat frame.

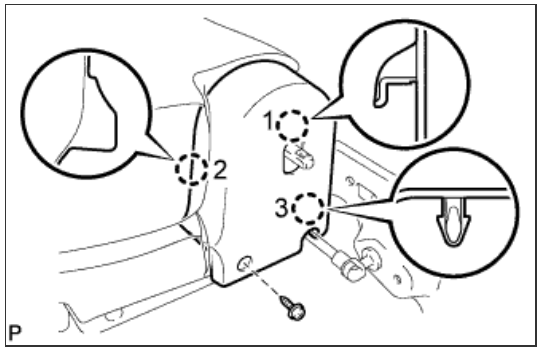


. INSTALL REAR SEAT REAR BRAC ET COVER REAR

a. Attach the 2 claws to install the cover.

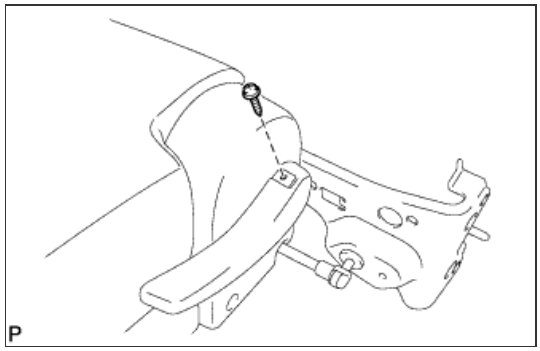
10. INSTALL RECLINING ADJUSTER COVER RH

a. Attach the 5 claws in the order shown in the illustration to install the cover.



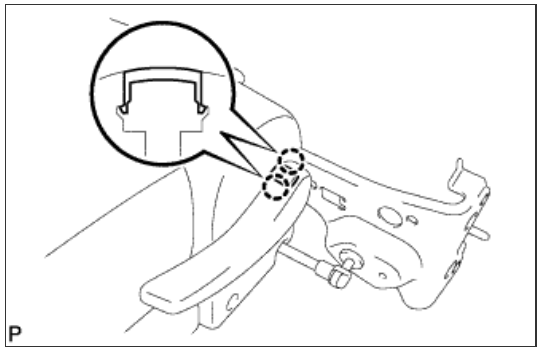
b. Install the screw.

11. INSTALL RECLINING ADJUSTER COVER LH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

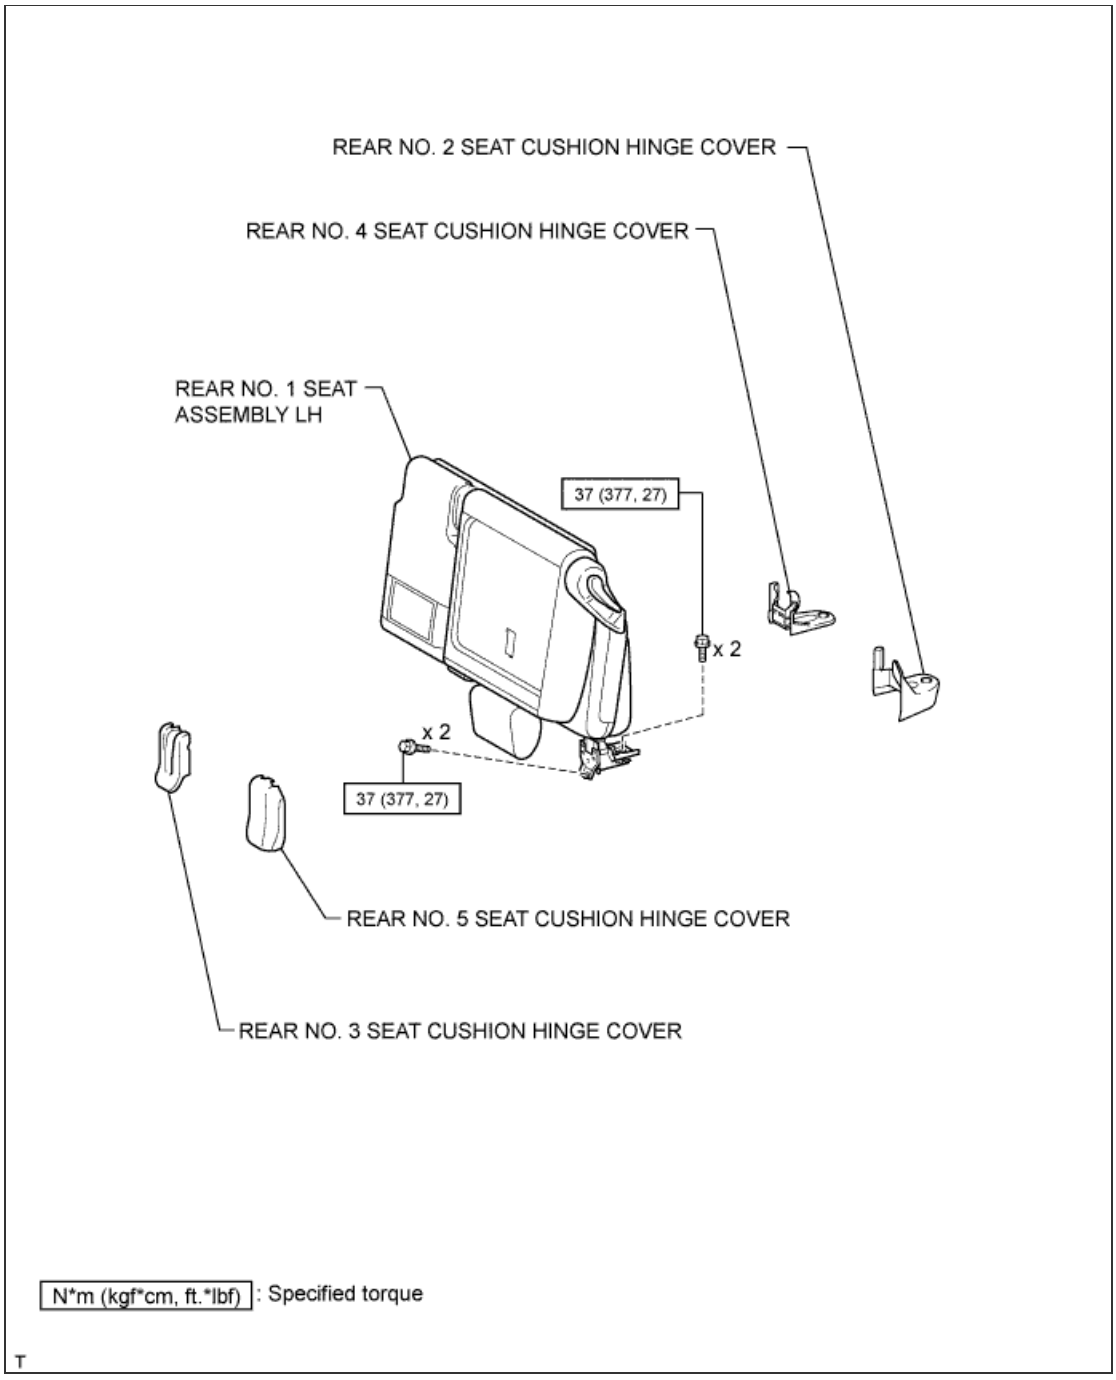
b. Install the screw.



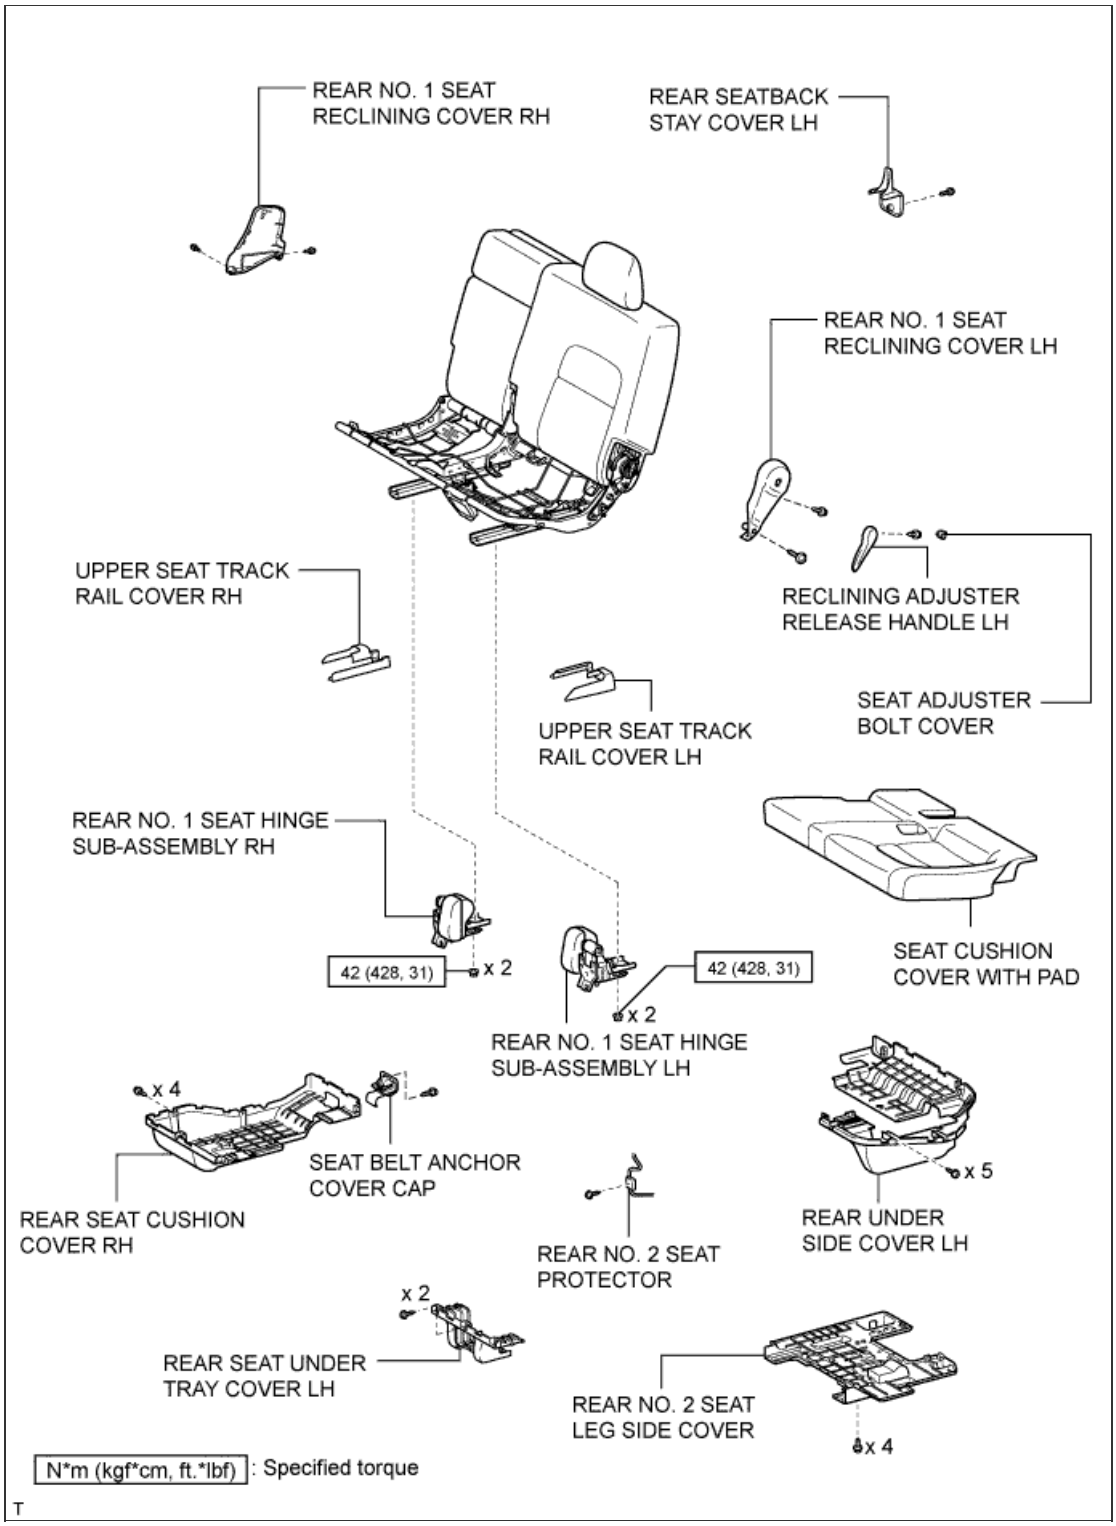
12. INSTALL NO. 2 RECLINING ADJUSTER RELEASE HANDLE LH

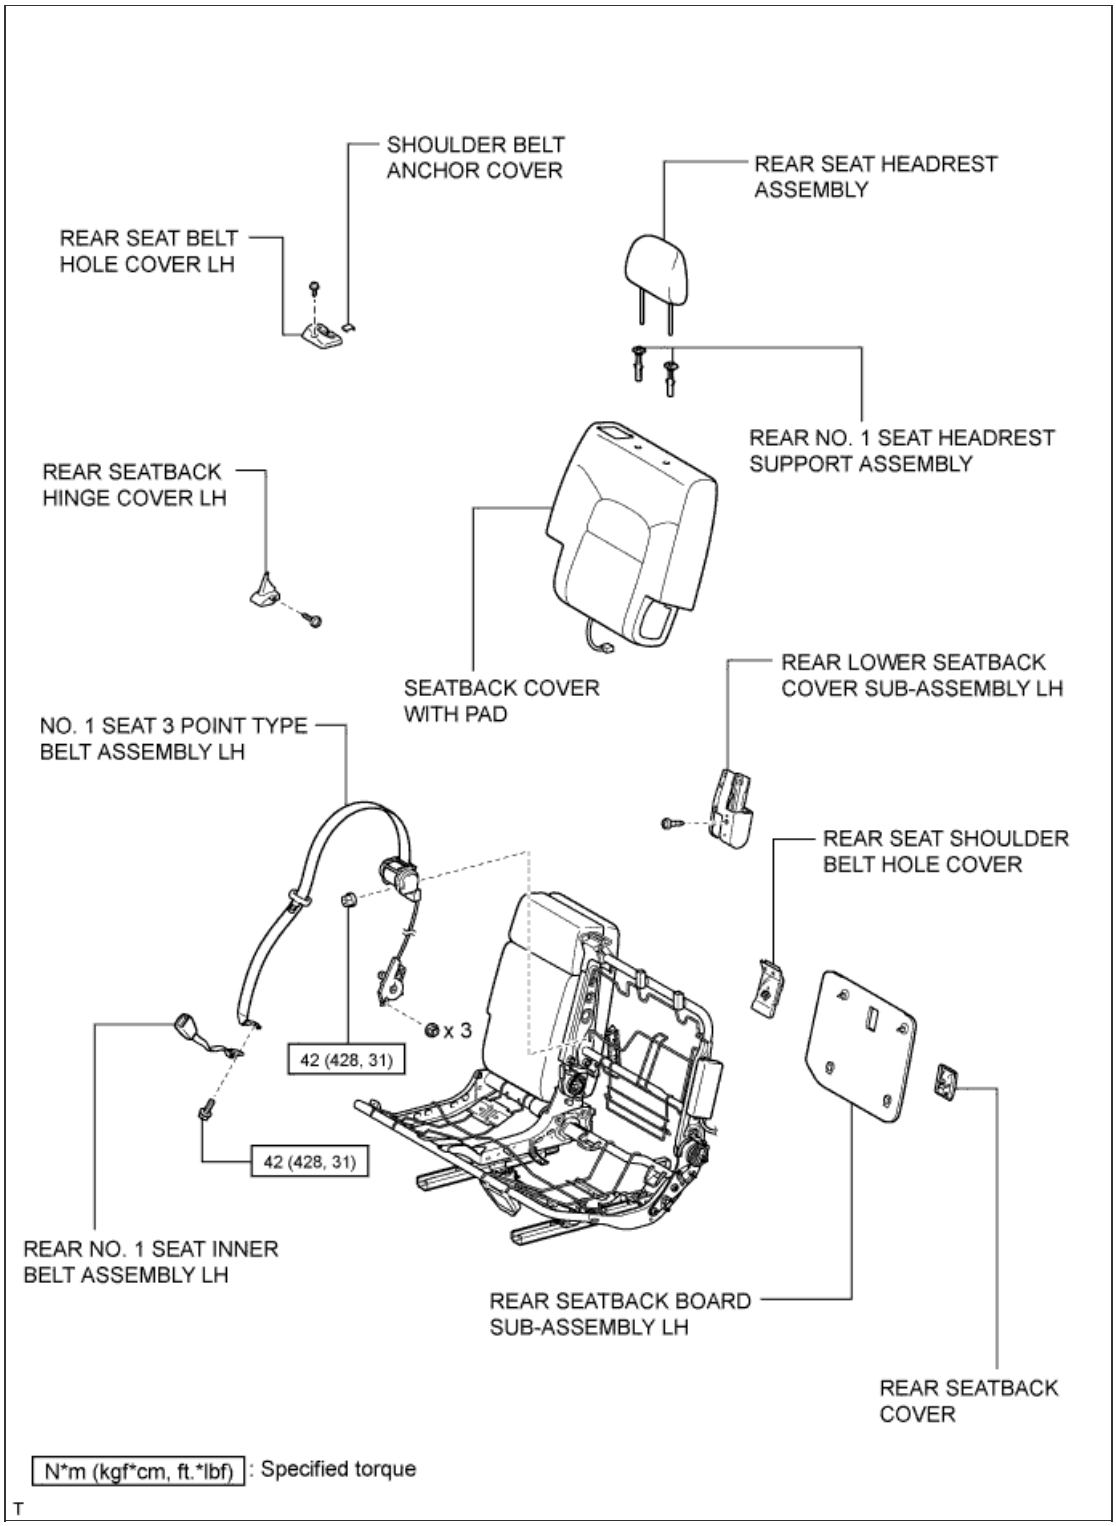
a. Install the release handle with the screw.

13. INSTALL SEAT ADJUSTER BOLT COVER



a. Attach the 2 claws to install the cover.





14. INSTALL REAR NO. 2 SEAT ASSEMBLY LH

a. Install the rear No. 2 seat assembl （ lic here).

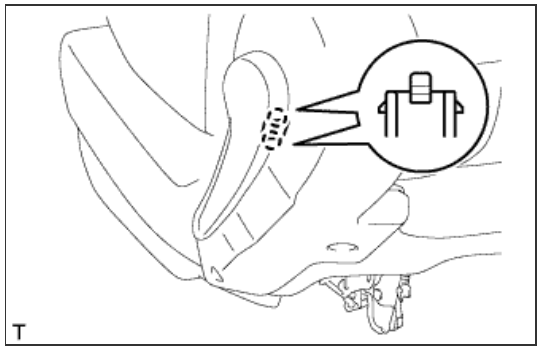
HINT:

- **Use the same procedures for the LHD and RHD.**
- **The procedures listed below are for the LHD.**

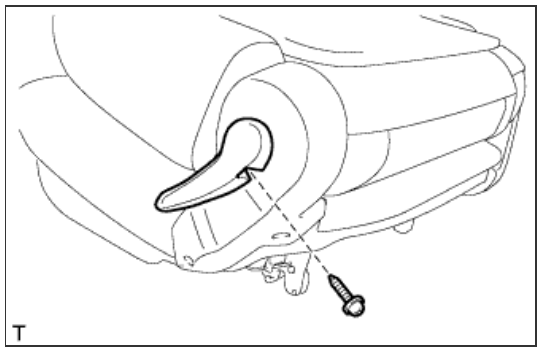
1. REMOVE REAR NO. 1 SEAT ASSEMBLY LH



a. Remove the rear No. 1 seat assembly (Click here).

2. REMOVE SEAT ADJUSTER BOLT COVER

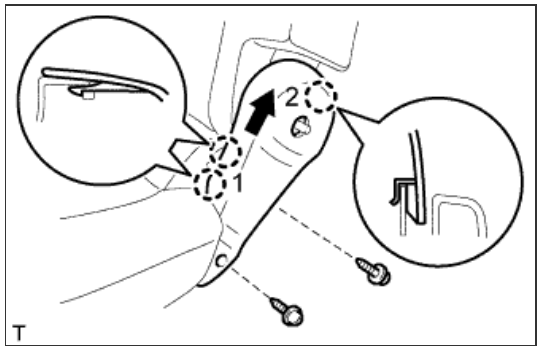
a. Using a screwdriver, detach the 2 claws and remove the cover.



HINT:

Tape the screwdriver tip before use.

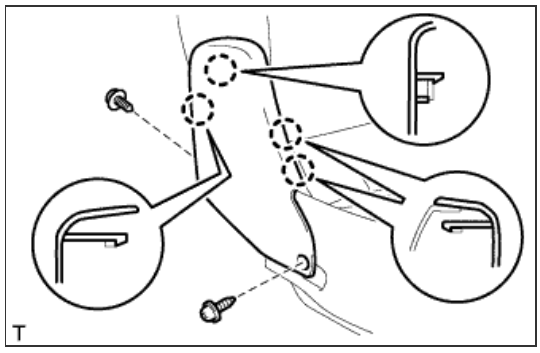
3. REMOVE RECLINING ADJUSTER RELEASE HANDLE LH



a. Remove the screw and release handle.

4. REMOVE REAR NO. 1 SEAT RECLINING COVER LH

a. Remove the 2 screws.

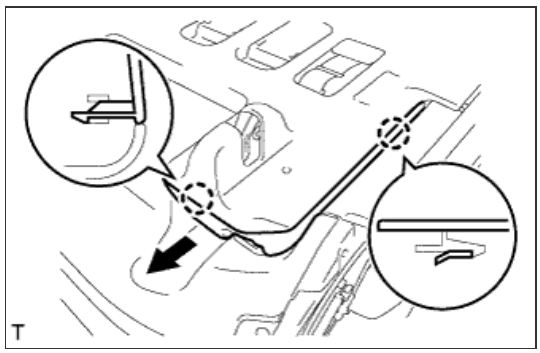


b. Detach the 3 claws in the order shown in the illustration, and then remove the cover.

5. REMOVE REAR NO. 1 SEAT RECLINING COVER RH

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.

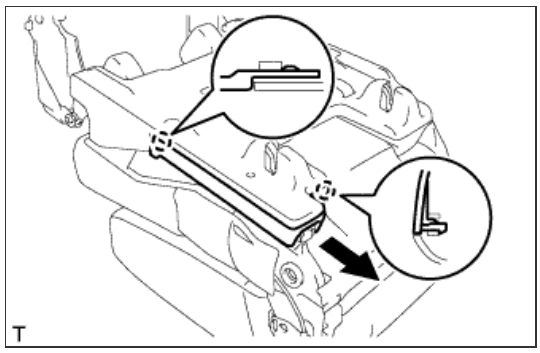


6. REMOVE UPPER SEAT TRACK RAIL COVER LH

a. Using a screwdriver, detach the 2 claws and remove the cover.

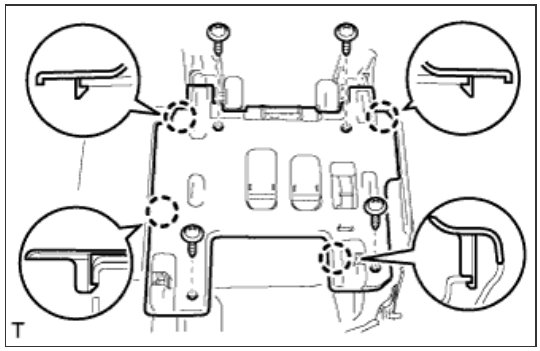
HINT:

Tape the screwdriver tip before use.



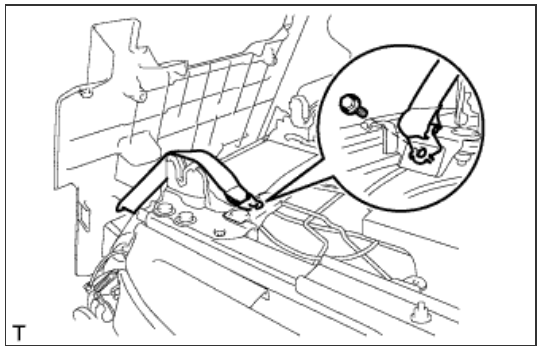
7. REMOVE UPPER SEAT TRACK RAIL COVER RH

a. Using a screwdriver, detach the 2 claws and remove the cover.



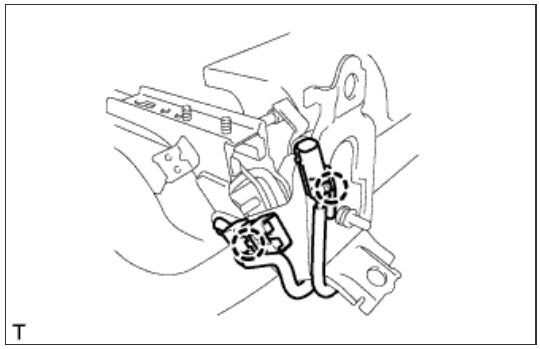
HINT:

Tape the screwdriver tip before use.



8. REMOVE REAR NO. 2 SEAT LEG SIDE COVER

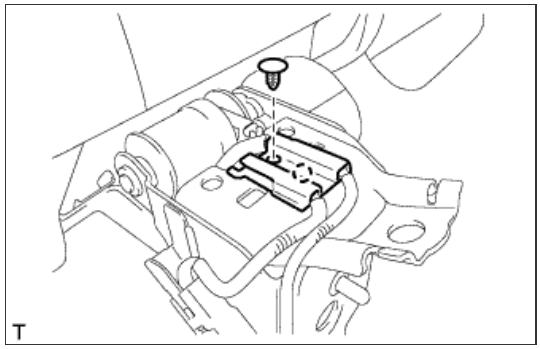
a. Remove the 4 screws and detach the 4 claws.



b. Remove the bolt that is securing the fold seat stopper band and remove the seat leg side cover together with the fold seat stopper band.

9. REMOVE REAR NO. 2 SEAT PROTECTOR

a. w/ Rear Seat Side Airbag:
Detach the claw and remove the wire harness connector.

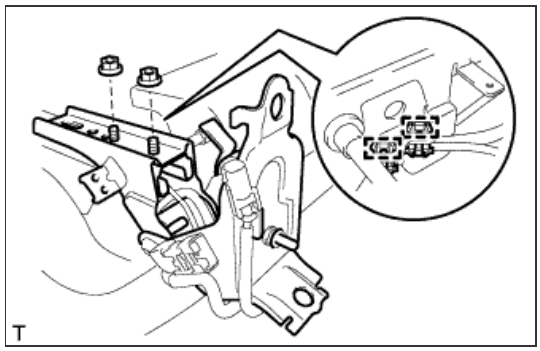


b. w/ Seat Heater System:
Detach the claw and remove the wire harness connector.

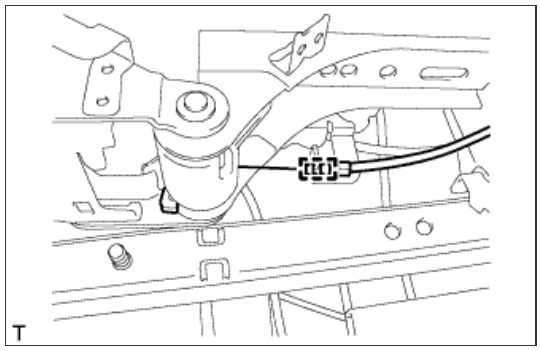
c. Using a clip remover, remove the clip.

d. Detach the claw and remove the seat protector from the seat hinge.

e. Detach the 2 claws, open the protector and remove wire harness.



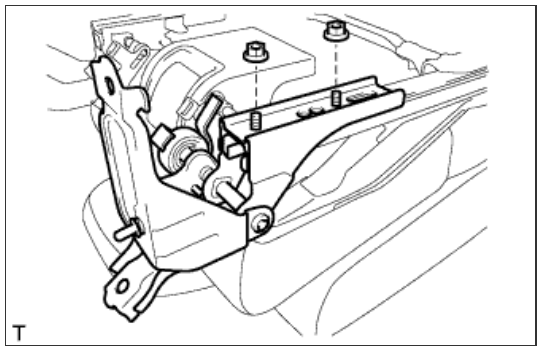
10. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH



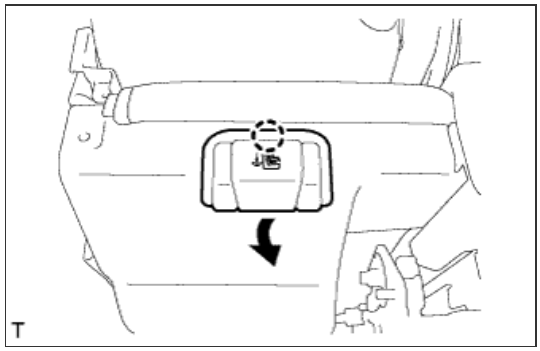
a. w/ Rear Seat Side Airbag:
Detach the wire harness clamp.

b. w/ Seat Heater System:
Detach the wire harness clamp.

c. Remove the 2 nuts and hinge.

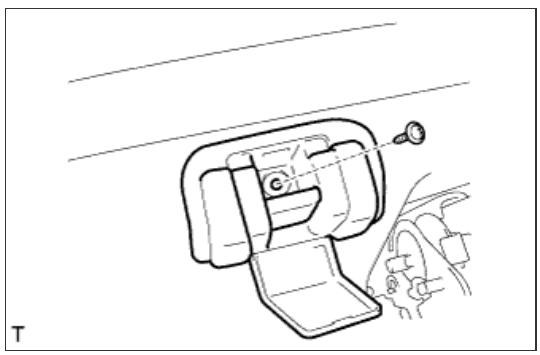


d. Detach the cable clamp and disconnect the cable.



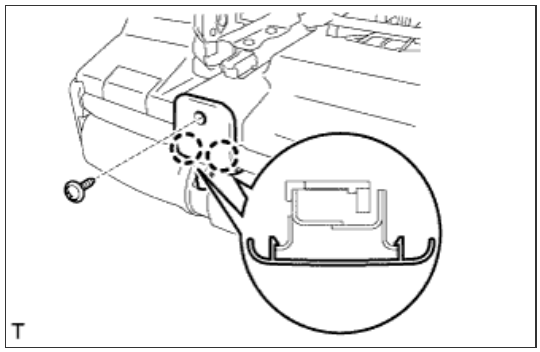
11. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH

a. Remove the 2 nuts and hinge.



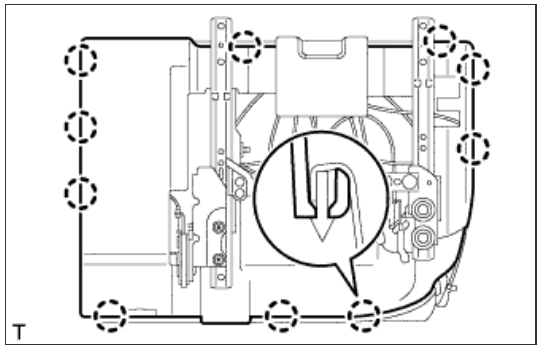
12. REMOVE SEAT BELT ANCHOR COVER CAP

a. Detach the claw and open the cap.



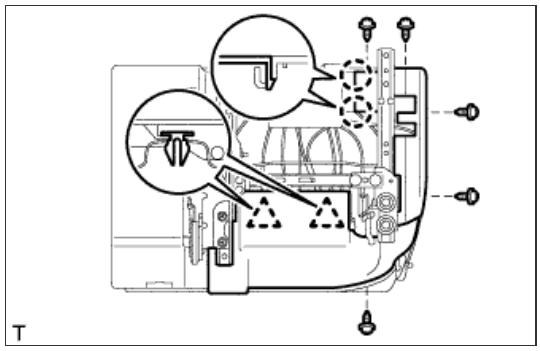
b. Remove the screw and anchor cover cap.

13. REMOVE REAR SEATBACK STAY COVER LH



a. Remove the screw.

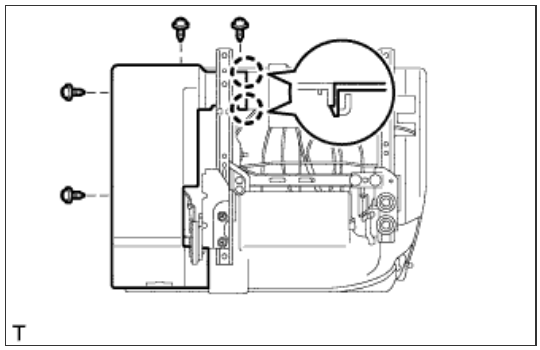
b. Detach the 2 claws and remove the cover.



14. REMOVE REAR UNDER SIDE COVER LH

a. Detach the 10 claws.

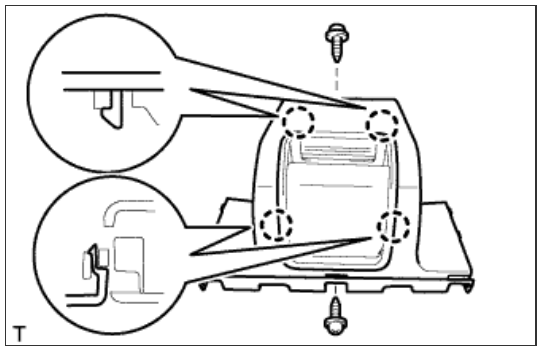
b. Remove the 5 screws.



c. Detach the 2 clips and 2 claws, and remove the cover.

15. REMOVE REAR SEAT CUSHION COVER RH

a. Remove the 4 screws.

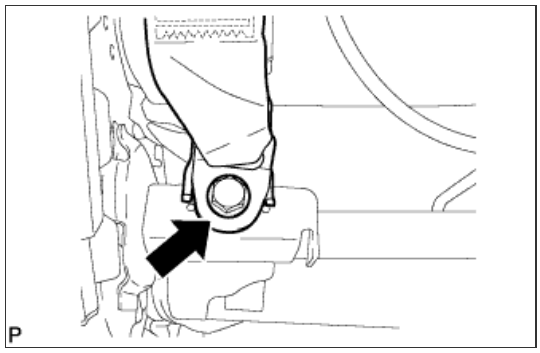


b. Detach the 2 claws and remove the cover.

16. REMOVE REAR SEAT UNDER TRAY COVER LH

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.



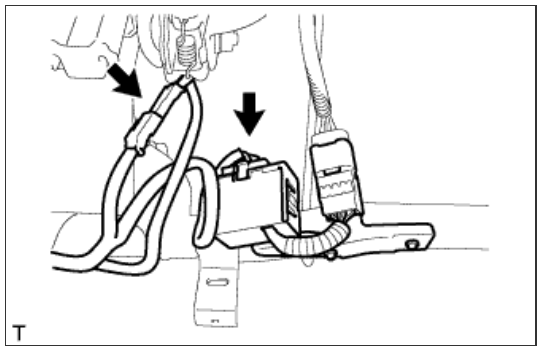
17. REMOVE REAR NO. 1 SEAT INNER BELT ASSEMBLY LH

a. Remove the bolt and belt.

HINT:

The No. 1 seat 3 point type belt anchor is fixed with the same bolt as the rear No. 1 seat inner belt LH. Therefore, it becomes disconnected when the bolt is removed.

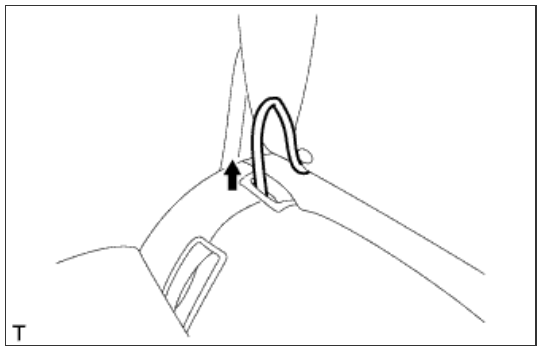
18. REMOVE SEAT CUSHION COVER WITH PAD



a. w/ Rear Seat Side Airbag:

i. Detach the side airbag wire harness clamps.

ii. Remove the side airbag wire harness through the hole in the seat cushion.

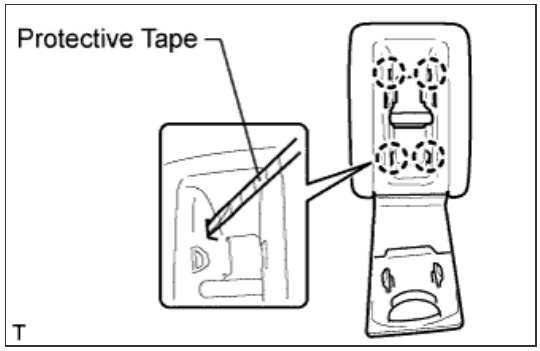


b. w/ Seat Heater System:

i. Disconnect the 2 seat heater connectors.

ii. Remove the seatback heater wire harness through the hole in the seat cushion.

c. Remove the seat cushion cover with pad.

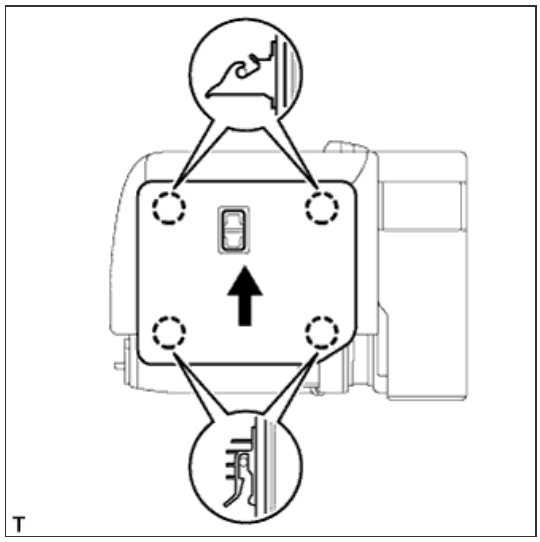


19. REMOVE REAR SEATBACK COVER

a. Using a screwdriver, detach the 4 claws and remove the cover.

HINT:

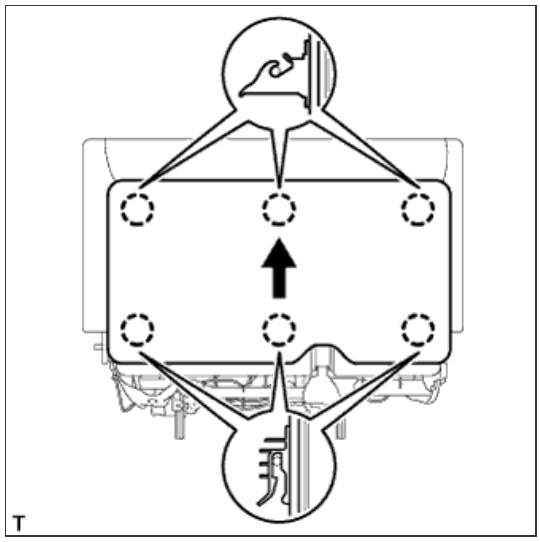
Tape the screwdriver tip before use.



20. REMOVE REAR SEATBACK BOARD SUB-ASSEMBLY LH

a. w/ Center Armrest:

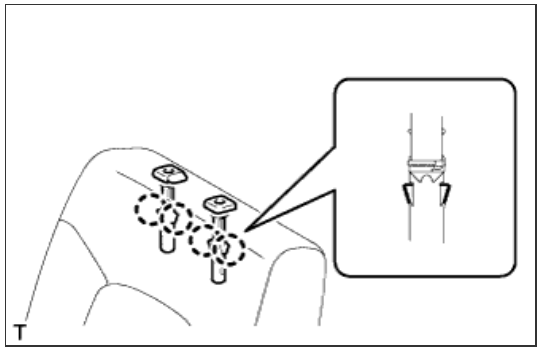
i. Detach the 2 claws on the top of the board.



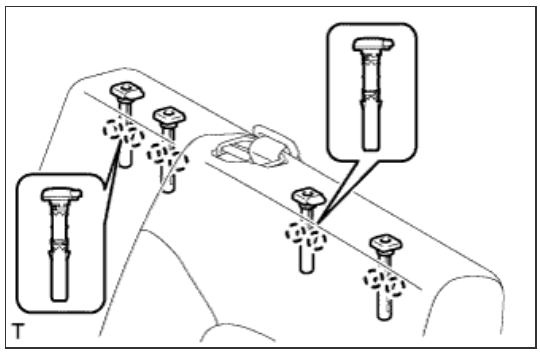
ii. Pull up the board to detach the 2 claws on the bottom of the board and remove it.

b. w/o Center Armrest:

i. Detach the 3 claws on the top of the board.



ii. Pull up the board to detach the 3 claws on the bottom of the board and remove it.

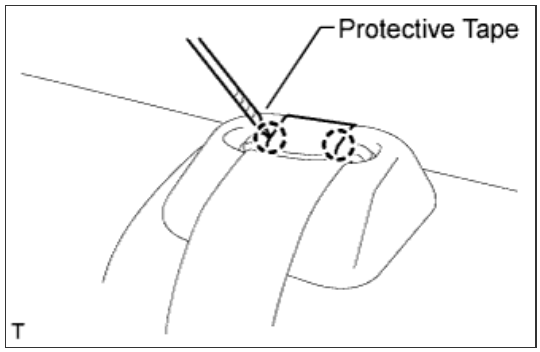


21. REMOVE REAR SEAT HEADREST ASSEMBLY

22. REMOVE REAR NO. 1 SEAT HEADREST SUPPORT ASSEMBLY

a. w/ Center Armrest:
Detach the 4 claws and remove the 2 supports.

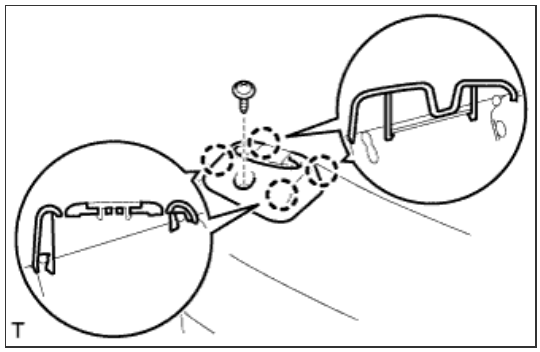
b. w/o Center Armrest:
Detach the 8 claws and remove the 4 supports.



23. REMOVE SHOULDER BELT ANCHOR COVER

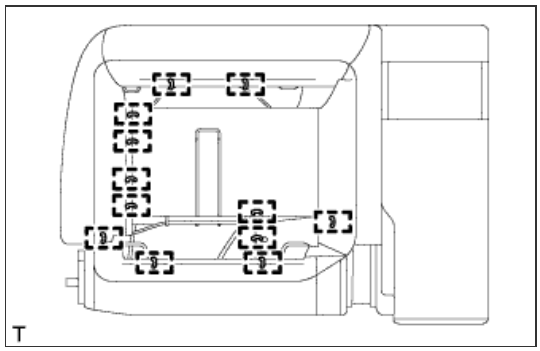
a. Using a screwdriver, detach the 2 claws and remove the cover.

HINT:



Tape the screwdriver tip before use.

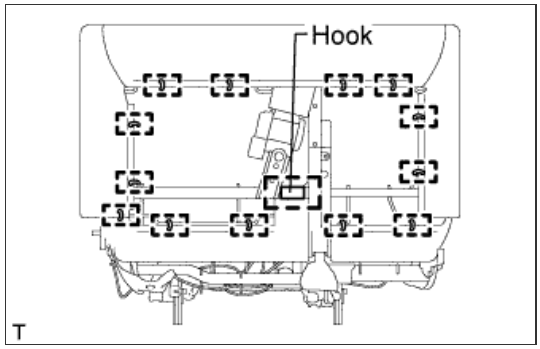
24. REMOVE REAR SEAT BELT HOLE COVER LH



a. Remove the screw.

b. Detach the 4 claws and remove the cover.

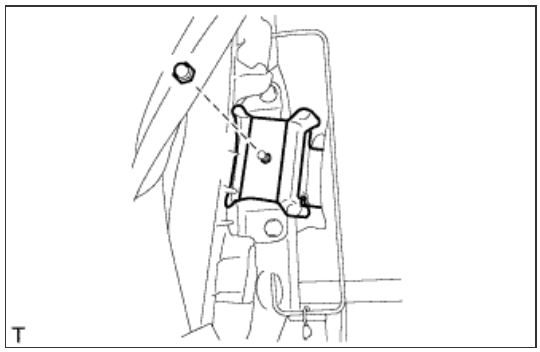
25. REMOVE SEATBACK COVER WITH PAD



a. w/ Center Armrest:
Remove the hog rings.

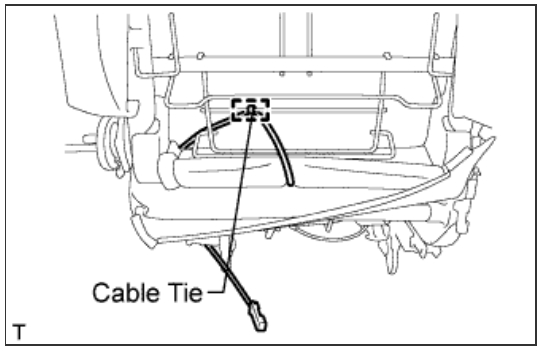
b. w/o Center Armrest:

i. Remove the hog rings.



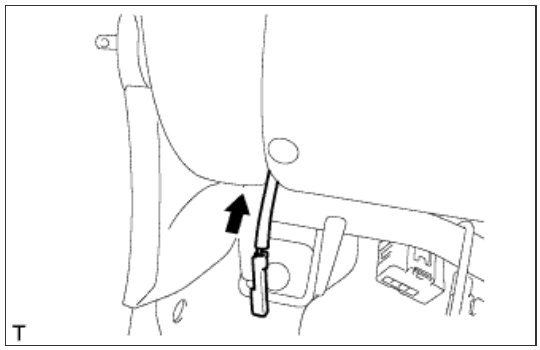
ii. Detach the hook.

c. w/ Rear Seat Side Airbag:

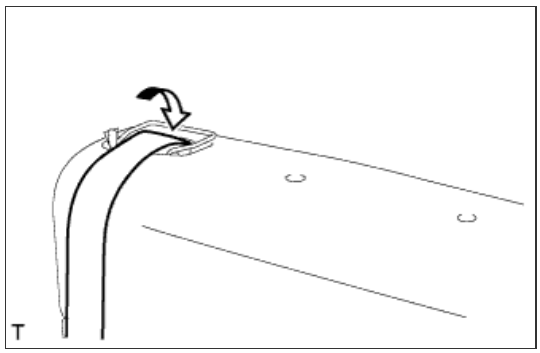


i. Remove the cap nut and seatback cover bracket from the seat frame.

ii. Remove the side airbag wire harness through the hole in the seatback.

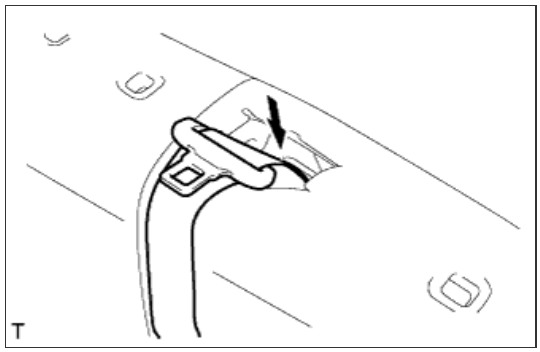


d. w/ Seat Heater System:



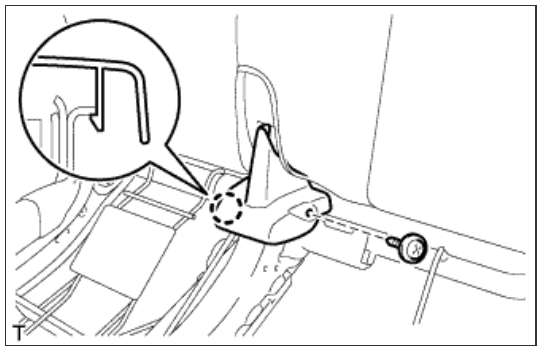
i. Cut the cable tie and disconnect the seatback heater wire harness.

ii. Remove the seatback heater wire harness through the hole in the seatback.



e. w/ Center Armrest:
Pull the seat belt into the inside of the seat.

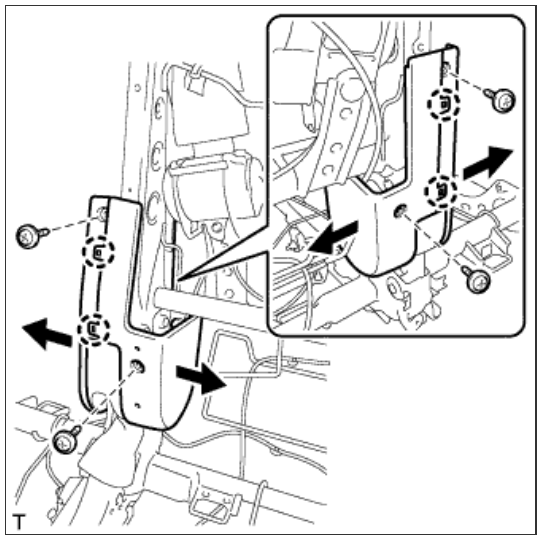
f. w/o Center Armrest:
Pull the seat belt into the inside of the seat.



g. Remove the seatback cover with pad.

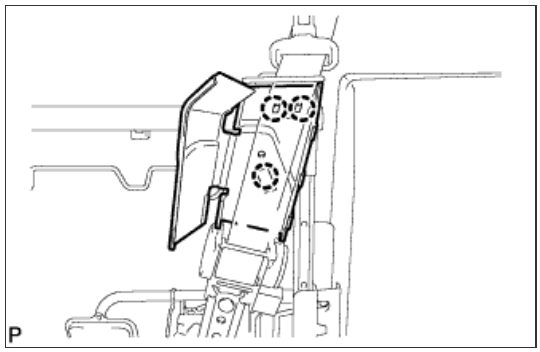
26. REMOVE REAR SEAT BACK HINGE COVER LH

a. Remove the screw.



b. Detach the claw and remove the cover.

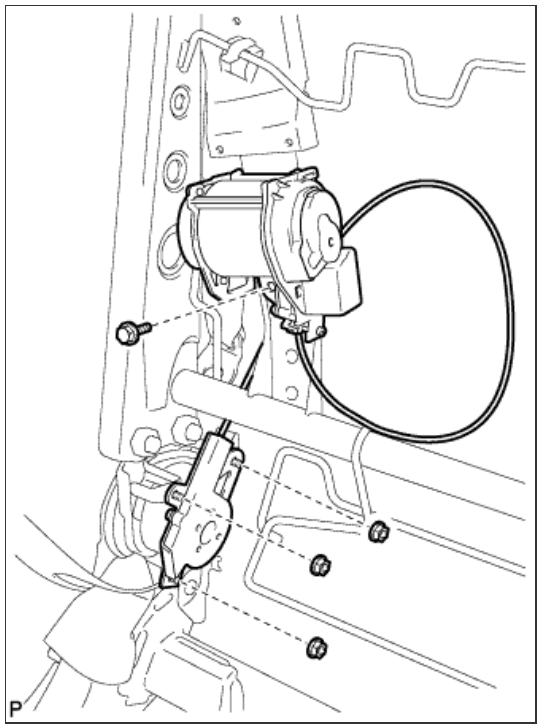
27. REMOVE REAR LOWER SEATBACK COVER SUB-ASSEMBLY LH



a. Remove the 4 screws.

b. Detach the 4 claws and remove the cover.

28. REMOVE REAR SEAT SHOULDER BELT HOLE COVER



a. Using a screwdriver, detach the 3 claws and remove the shoulder belt hole cover.

29. REMOVE NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

a. Remove the 3 nuts and belt sensor.

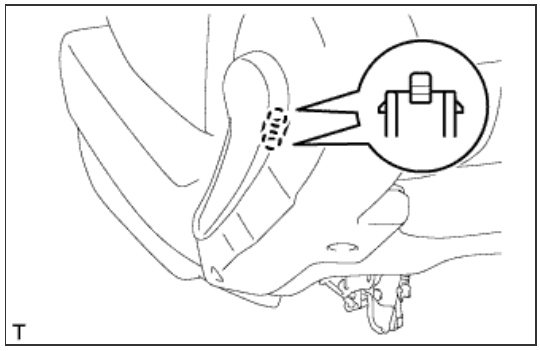
b. Remove the nut and then remove the outer belt.

for Preparation Click here

HINT:

- **Use the same procedures for the LHD and RHD.**
- **The procedures listed below are for the LHD.**

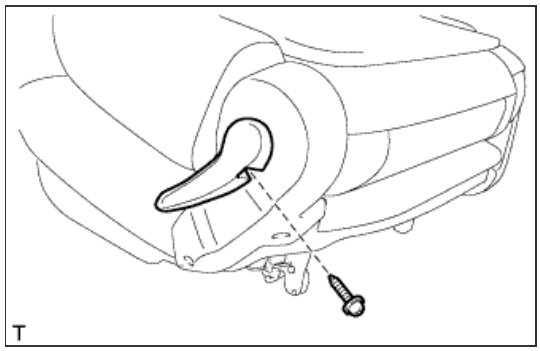
1. REMOVE REAR NO. 1 SEAT ASSEMBLY LH



a. Remove the rear No. 1 seat assembly (Click here).

2. REMOVE SEAT ADJUSTER BOLT COVER

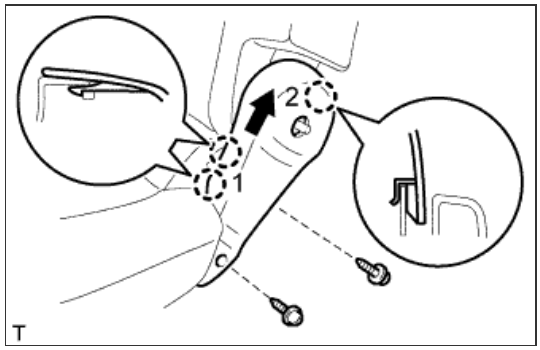
a. Using a screwdriver, detach the 2 claws and remove the cover.



HINT:

Tape the screwdriver tip before use.

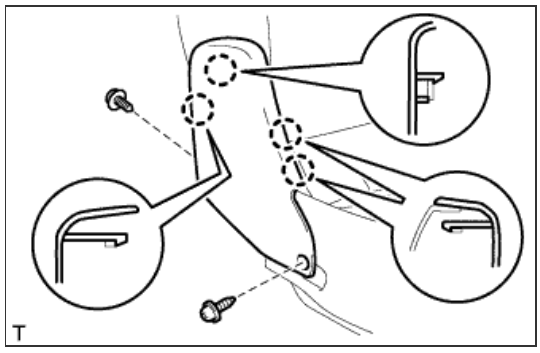
3. REMOVE RECLINING ADJUSTER RELEASE HANDLE LH



a. Remove the screw and release handle.

4. REMOVE REAR NO. 1 SEAT RECLINING COVER LH

a. Remove the 2 screws.

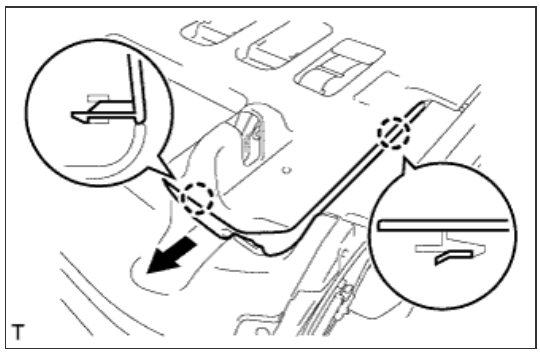


b. Detach the 3 claws in the order shown in the illustration, and then remove the cover.

5. REMOVE REAR NO. 1 SEAT RECLINING COVER RH

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.

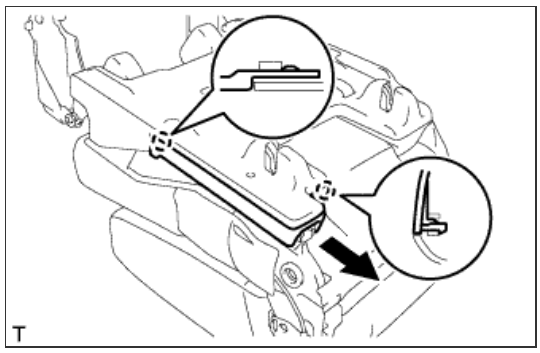


6. REMOVE UPPER SEAT TRACK RAIL COVER LH

a. Using a screwdriver, detach the 2 claws and remove the cover.

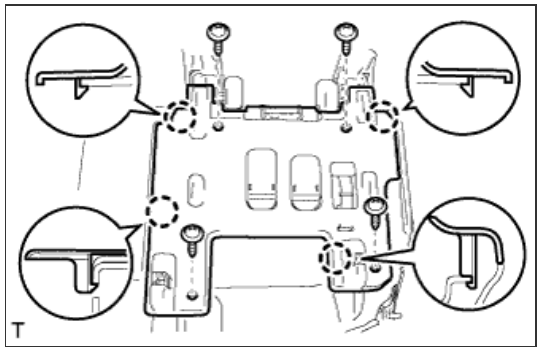
HINT:

Tape the screwdriver tip before use.



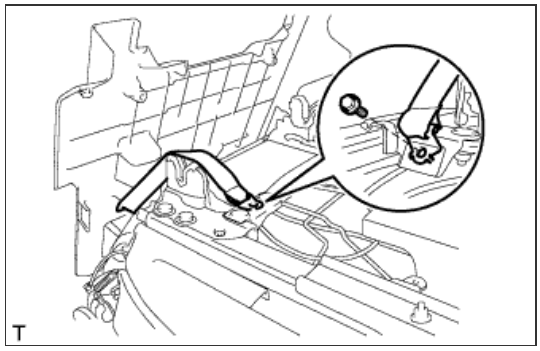
7. REMOVE UPPER SEAT TRACK RAIL COVER RH

a. Using a screwdriver, detach the 2 claws and remove the cover.



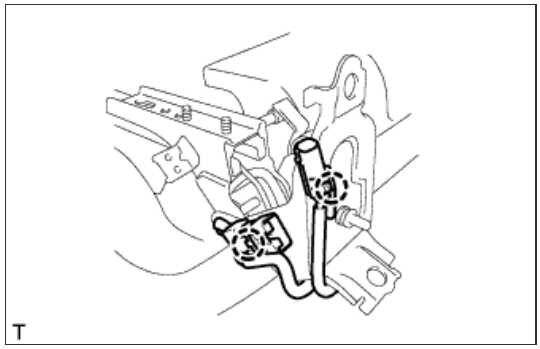
HINT:

Tape the screwdriver tip before use.



8. REMOVE REAR NO. 2 SEAT LEG SIDE COVER

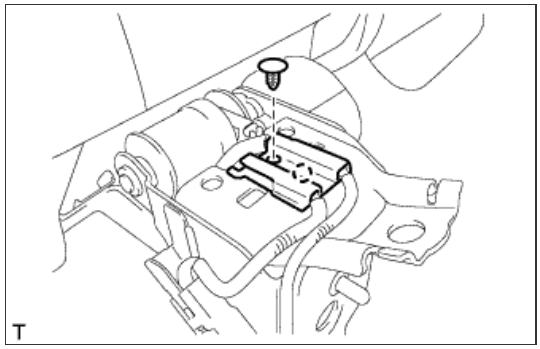
a. Remove the 4 screws and detach the 4 claws.



b. Remove the bolt that is securing the fold seat stopper band and remove the seat leg side cover together with the fold seat stopper band.

9. REMOVE REAR NO. 2 SEAT PROTECTOR

a. w/ Rear Seat Side Airbag:
Detach the claw and remove the wire harness connector.

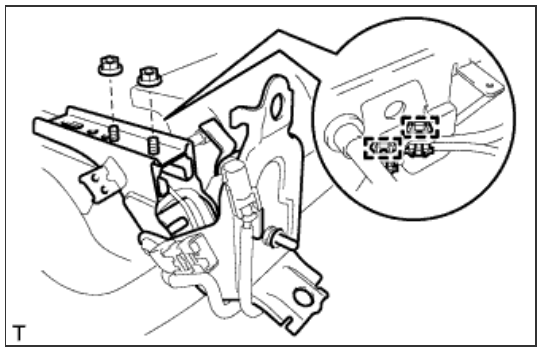


b. w/ Seat Heater System:
Detach the claw and remove the wire harness connector.

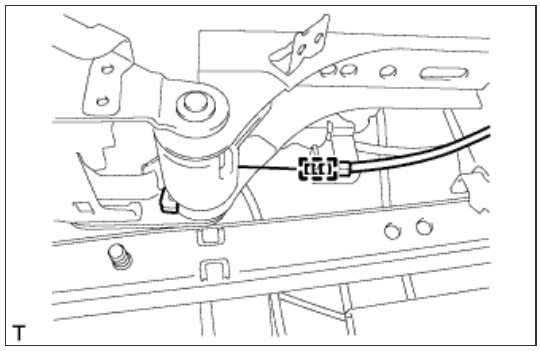
c. Using a clip remover, remove the clip.

d. Detach the claw and remove the seat protector from the seat hinge.

e. Detach the 2 claws, open the protector and remove wire harness.



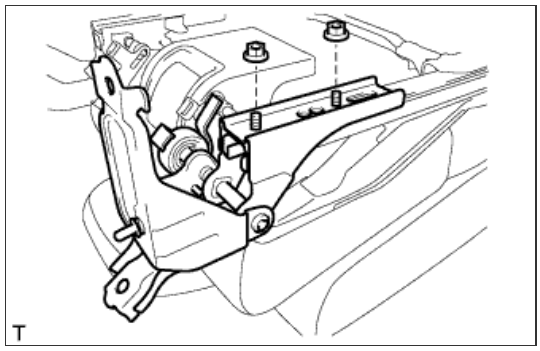
10. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH



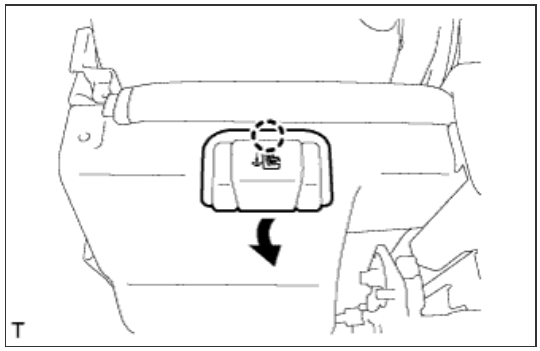
a. w/ Rear Seat Side Airbag:
Detach the wire harness clamp.

b. w/ Seat Heater System:
Detach the wire harness clamp.

c. Remove the 2 nuts and hinge.

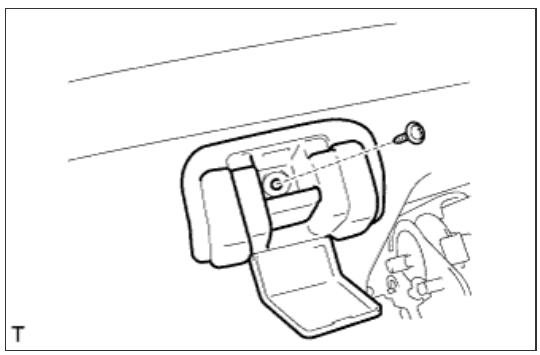


d. Detach the cable clamp and disconnect the cable.



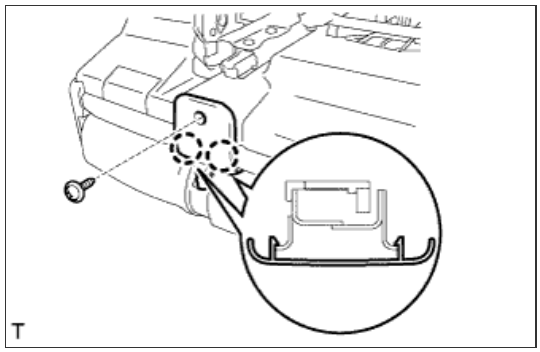
11. REMOVE REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH

a. Remove the 2 nuts and hinge.



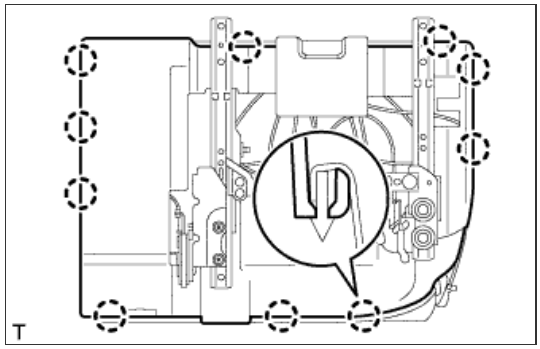
12. REMOVE SEAT BELT ANCHOR COVER CAP

a. Detach the claw and open the cap.



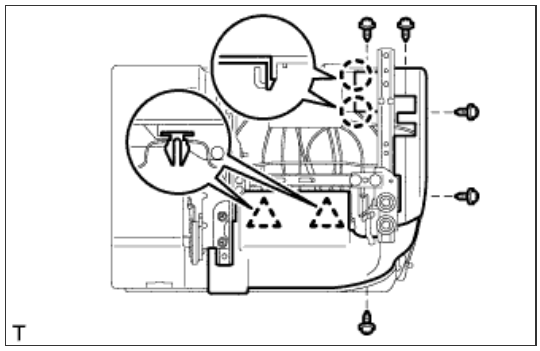
b. Remove the screw and anchor cover cap.

13. REMOVE REAR SEATBACK STAY COVER LH



a. Remove the screw.

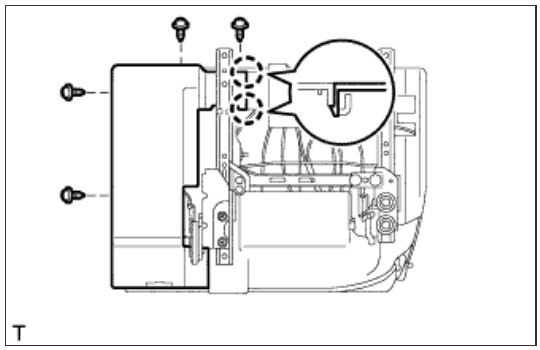
b. Detach the 2 claws and remove the cover.



14. REMOVE REAR UNDER SIDE COVER LH

a. Detach the 10 claws.

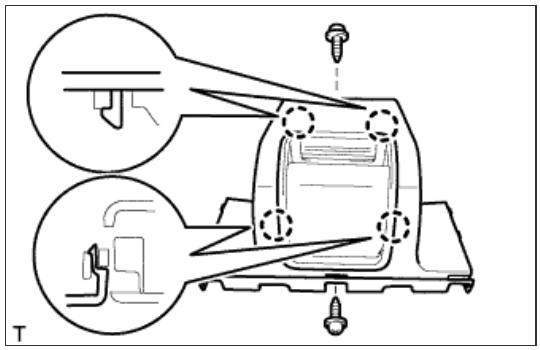
b. Remove the 5 screws.



c. Detach the 2 clips and 2 claws, and remove the cover.

15. REMOVE REAR SEAT CUSHION COVER RH

a. Remove the 4 screws.

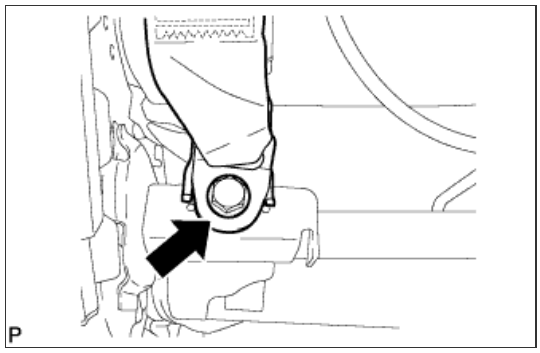


b. Detach the 2 claws and remove the cover.

16. REMOVE REAR SEAT UNDER TRAY COVER LH

a. Remove the 2 screws.

b. Detach the 4 claws and remove the cover.



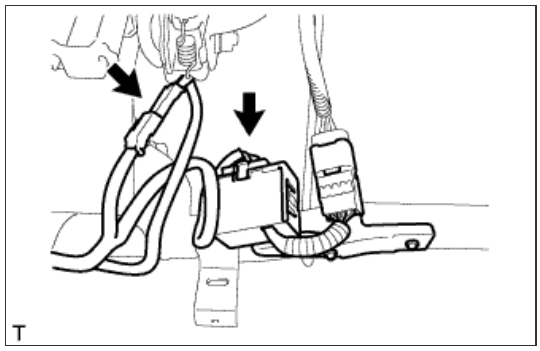
17. REMOVE REAR NO. 1 SEAT INNER BELT ASSEMBLY LH

a. Remove the bolt and belt.

HINT:

The No. 1 seat 3 point type belt anchor is fixed with the same bolt as the rear No. 1 seat inner belt LH. Therefore, it becomes disconnected when the bolt is removed.

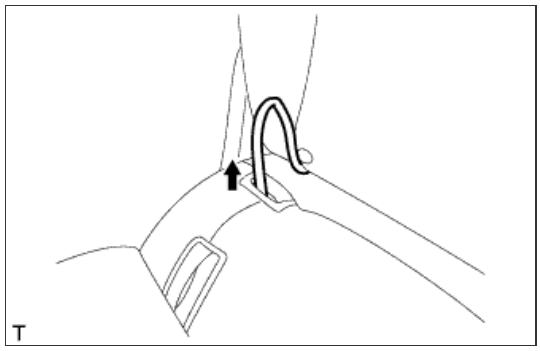
18. REMOVE SEAT CUSHION COVER WITH PAD



a. w/ Rear Seat Side Airbag:

i. Detach the side airbag wire harness clamps.

ii. Remove the side airbag wire harness through the hole in the seat cushion.

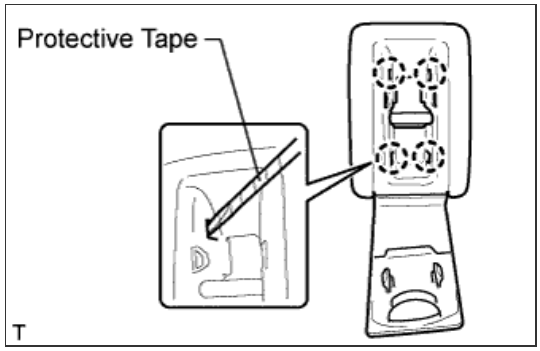


b. w/ Seat Heater System:

i. Disconnect the 2 seat heater connectors.

ii. Remove the seatback heater wire harness through the hole in the seat cushion.

c. Remove the seat cushion cover with pad.

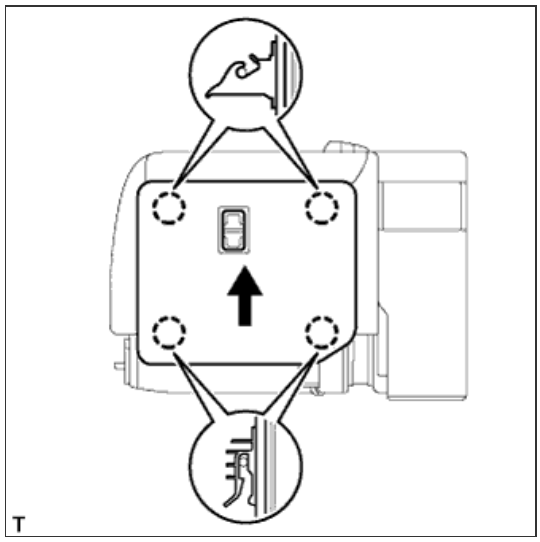


19. REMOVE REAR SEATBACK COVER

a. Using a screwdriver, detach the 4 claws and remove the cover.

HINT:

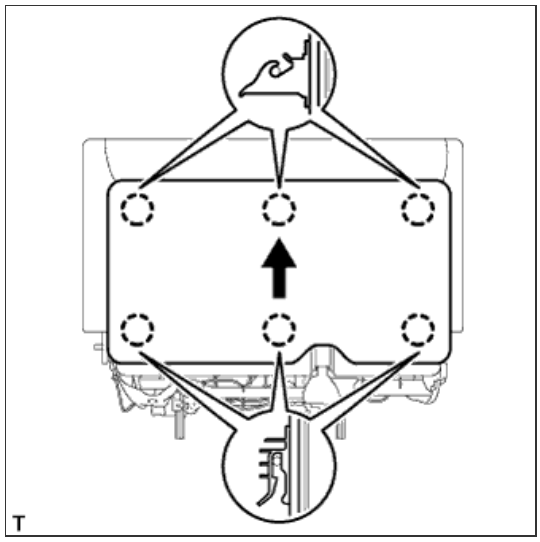
Tape the screwdriver tip before use.



20. REMOVE REAR SEATBACK BOARD SUB-ASSEMBLY LH

a. w/ Center Armrest:

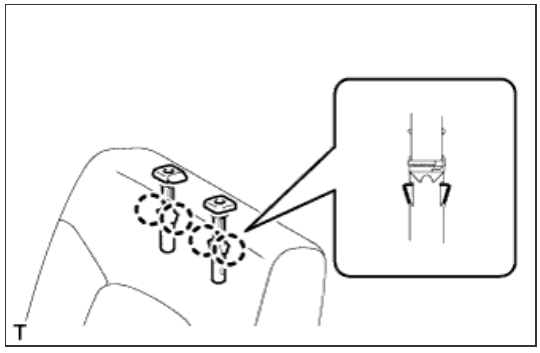
i. Detach the 2 claws on the top of the board.



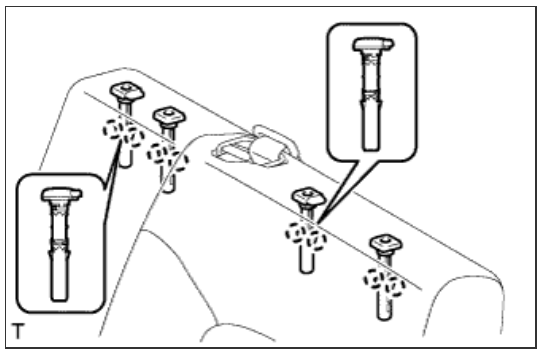
ii. Pull up the board to detach the 2 claws on the bottom of the board and remove it.

b. w/o Center Armrest:

i. Detach the 3 claws on the top of the board.



ii. Pull up the board to detach the 3 claws on the bottom of the board and remove it.

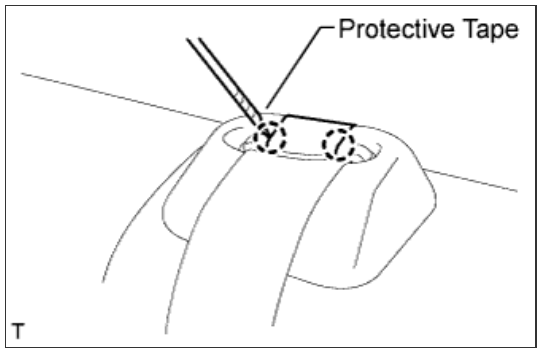


21. REMOVE REAR SEAT HEADREST ASSEMBLY

22. REMOVE REAR NO. 1 SEAT HEADREST SUPPORT ASSEMBLY

a. w/ Center Armrest:
Detach the 4 claws and remove the 2 supports.

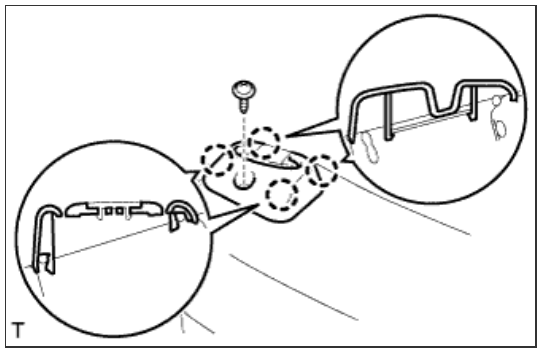
b. w/o Center Armrest:
Detach the 8 claws and remove the 4 supports.



23. REMOVE SHOULDER BELT ANCHOR COVER

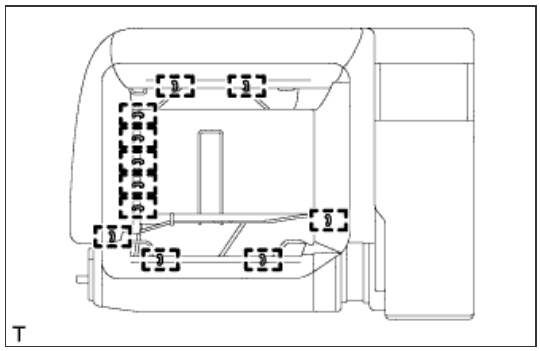
a. Using a screwdriver, detach the 2 claws and remove the cover.

HINT:



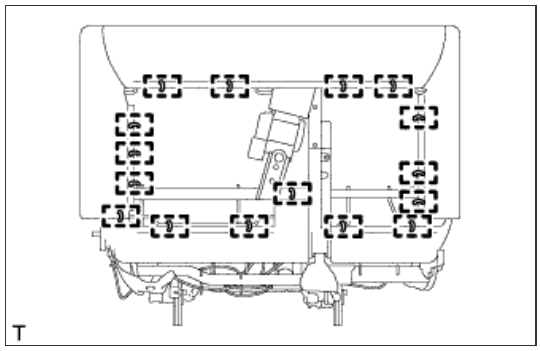
Tape the screwdriver tip before use.

24. REMOVE REAR SEAT BELT HOLE COVER LH



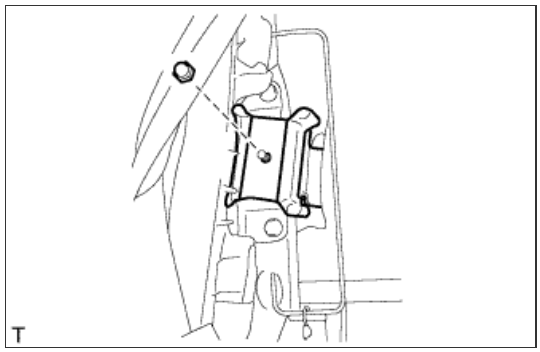
a. Remove the screw.

b. Detach the 4 claws and remove the cover.



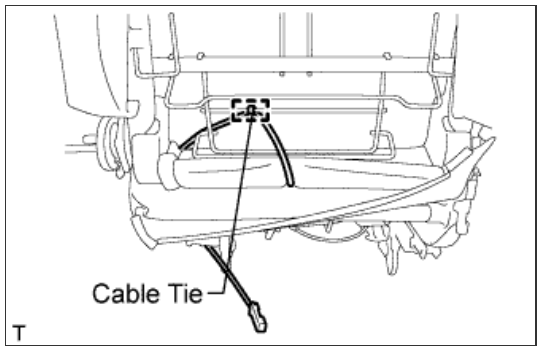
25. REMOVE SEATBACK COVER WITH PAD

a. w/ Center Armrest:
Remove the hog rings.



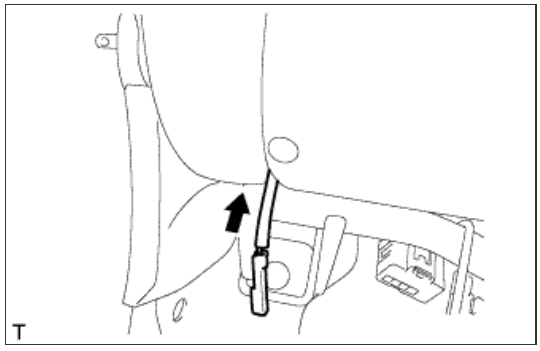
b. w/o Center Armrest:
Remove the hog rings.

c. w/ Rear Seat Side Airbag:

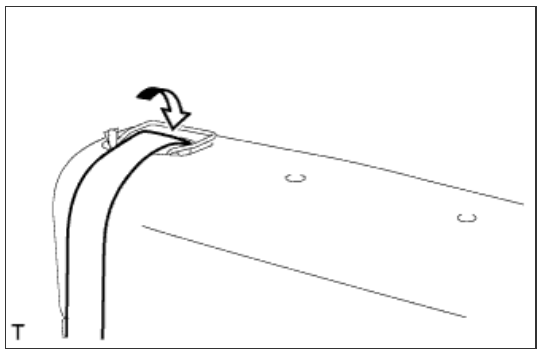


i. Remove the cap nut and seatback cover bracket from the seat frame.

ii. Remove the side airbag wire harness through the hole in the seatback.

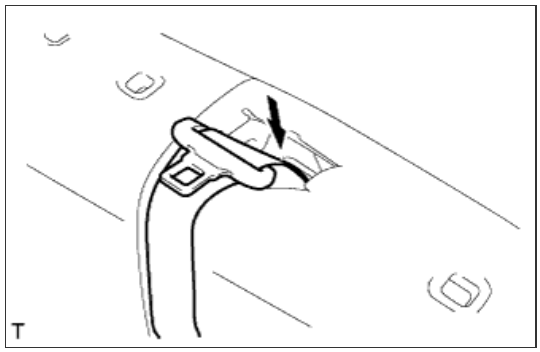


d. w/ Seat Heater System:



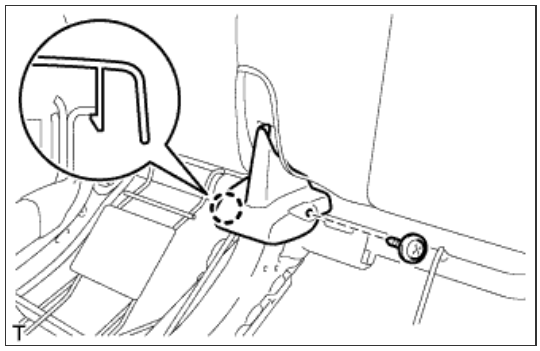
i. Cut the cable tie and disconnect the seatback heater wire harness.

ii. Remove the seatback heater wire harness through the hole in the seatback.



e. w/ Center Armrest:
Pull the seat belt into the inside of the seat.

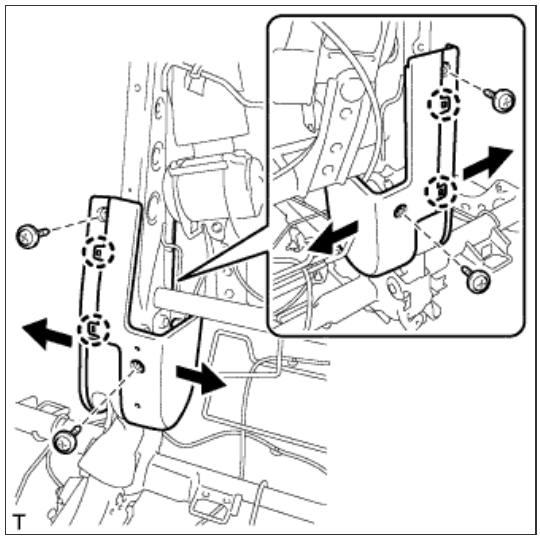
f. w/o Center Armrest:
Pull the seat belt into the inside of the seat.



g. Remove the seatback cover with pad.

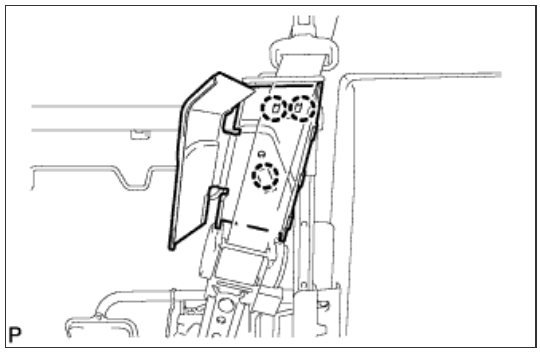
26. REMOVE REAR SEAT BACK HINGE COVER LH

a. Remove the screw.



b. Detach the claw and remove the cover.

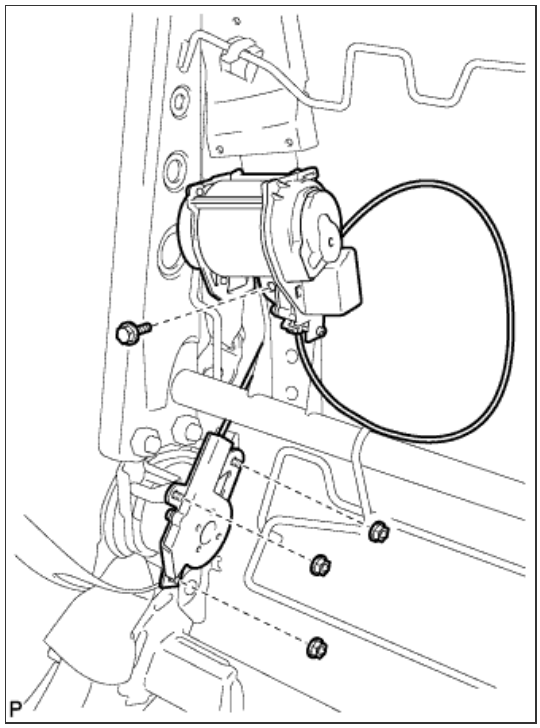
27. REMOVE REAR LOWER SEATBACK COVER SUB-ASSEMBLY LH



a. Remove the 4 screws.

b. Detach the 4 claws and remove the cover.

28. REMOVE REAR SEAT SHOULDER BELT HOLE COVER

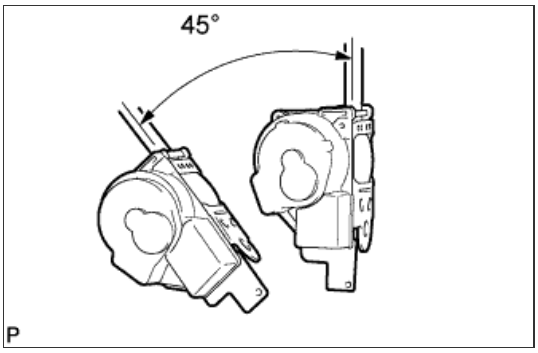


a. Using a screwdriver, detach the 3 claws and remove the shoulder belt hole cover.

29. REMOVE NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

a. Remove the 3 nuts and belt sensor.

b. Remove the nut and then remove the outer belt.



for Preparation Click here

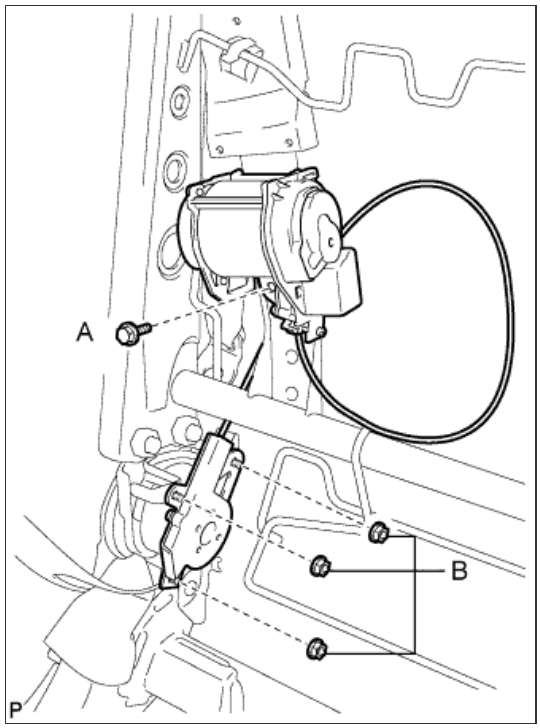
1. INSPECT NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

a. Check the ELR.

i. When the inclination of the retractor is 15° or less, check that the belt can be pulled from the retractor. When the inclination of the retractor is over 45°, check that the belt locks.
If the operation is not as specified, replace the seat belt assembly.

for Preparation Click here

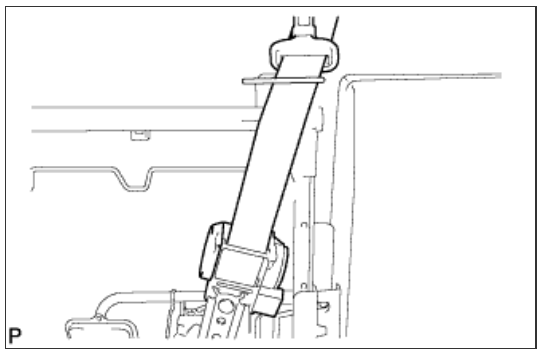
HINT:



- **Use the same procedures for the LHD and RHD.**
- **The procedures listed below are for the LHD.**
- **A bolt without a torque specification is shown in the standard bolt chart (Click here).**

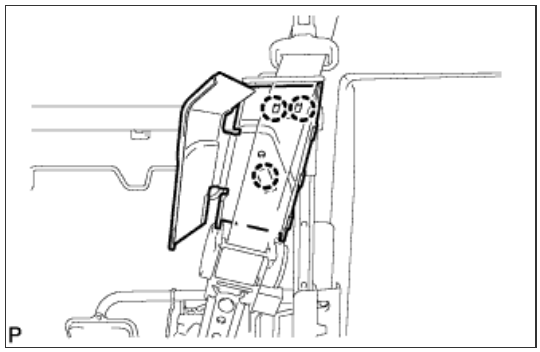
1. INSTALL NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

a. Install the belt with the nut labeled A.



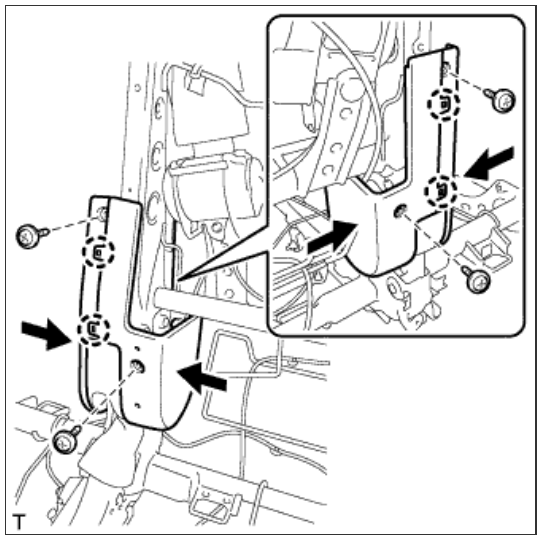
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

b. Install the belt sensor with the 3 nuts labeled B.



2. INSTALL REAR SEAT SHOULDER BELT HOLE COVER

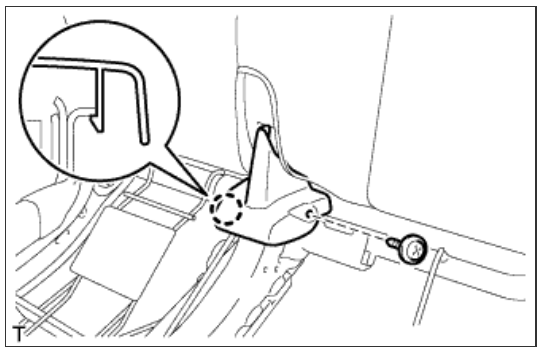
a. Install the seat belt as shown in the illustration.



b. Attach the 3 claws to install the shoulder belt hole cover.

3. INSTALL REAR LOWER SEATBACK COVER SUB-ASSEMBLY LH

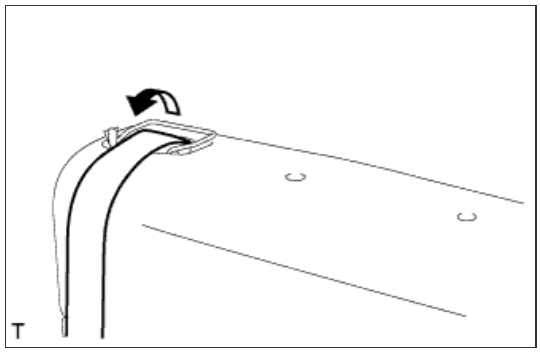
a. Attach the 4 claws to install the cover.



b. Install the 4 screws.

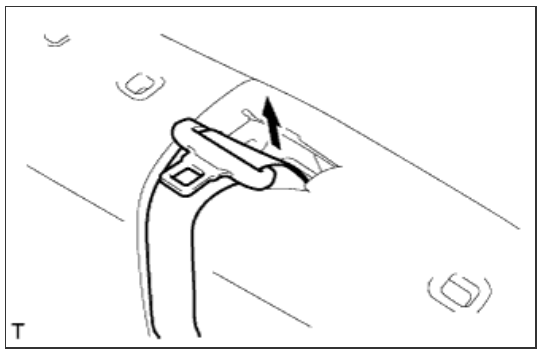
4. INSTALL REAR SEATBACK HINGE COVER LH

a. Attach the claw to install the cover.



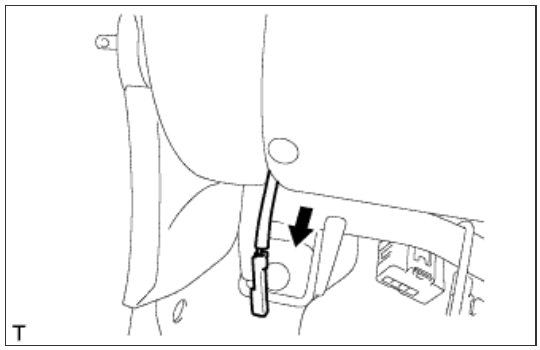
b. Install the screw.

5. INSTALL SEATBACK COVER WITH PAD



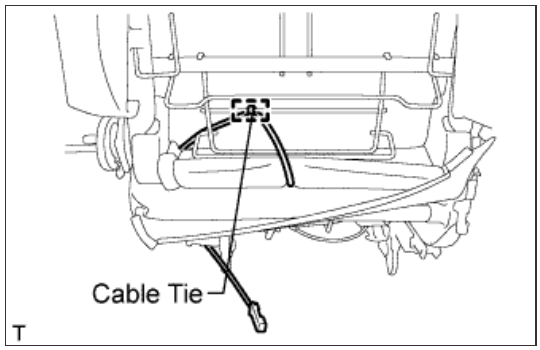
a. Install the seatback cover with pad.

b. w/ Center Armrest:
Pull out the seat belt.



c. w/o Center Armrest:
Pull out the seat belt.

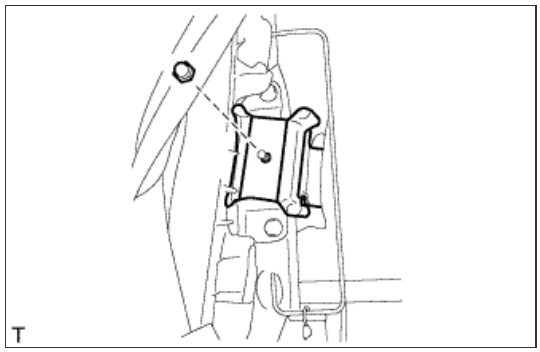
d. w/ Rear Seat Side Airbag:
Pass the side airbag wire harness through the hole in the seatback.



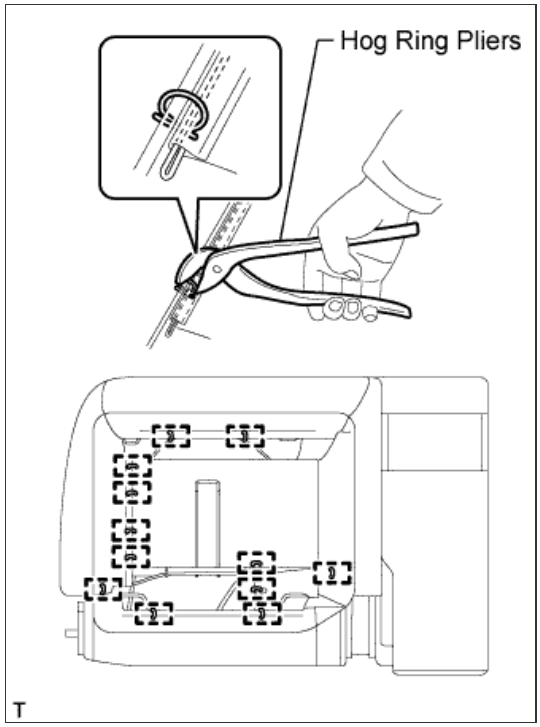
e. w/ Seat Heater System:
Pass the seatback heater wire harness through the hole in the seatback.

i.

ii. Connect the seatback heater wire harness and install a new cable tie.



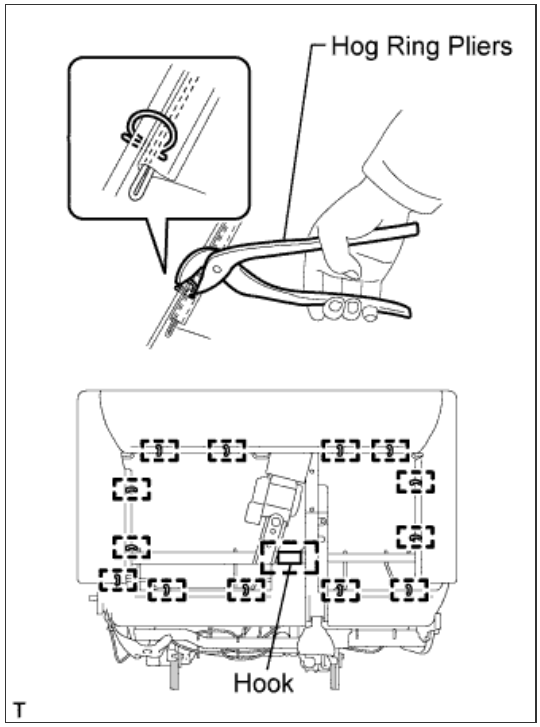
f. w/ Rear Seat Side Airbag:
Install the seatback cover bracket to the seat frame with the cap nut.



Torque:
5.5 N*m{ 56 kgf*cm , 49 in.*lbf }

NOTICE:

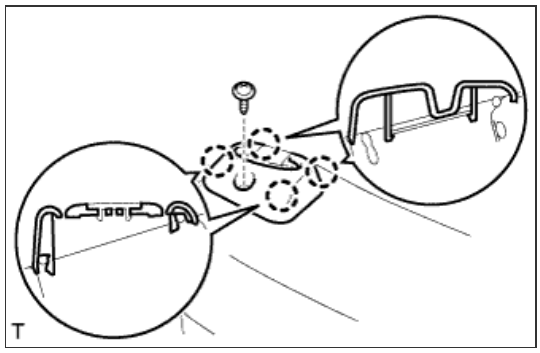
After the seatback trim cover is assembled, make sure the side airbag strap is not twisted.



g. w/ Center Armrest:
Using hog ring pliers, install new hog rings to the seatback frame.

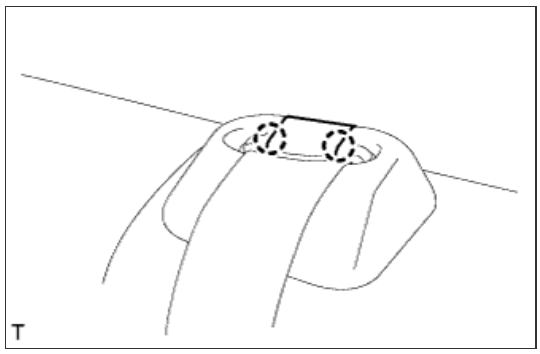
h. w/o Center Armrest:

i. Using hog ring pliers, install new hog rings to the seatback frame.



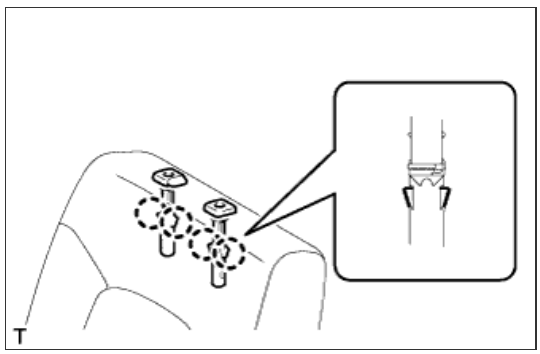
ii. Attach the hook.

6. INSTALL REAR SEAT BELT HOLE COVER LH



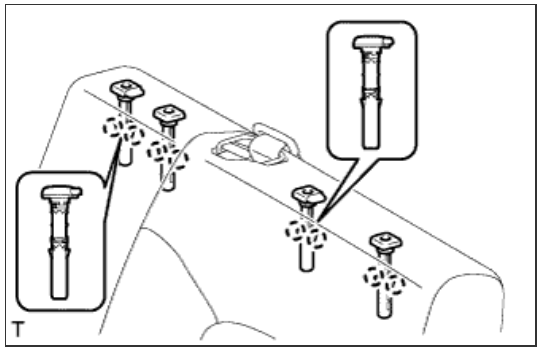
a. Attach the 4 claws to install the cover.

b. Install the screw.



7. INSTALL SHOULDER BELT ANCHOR COVER

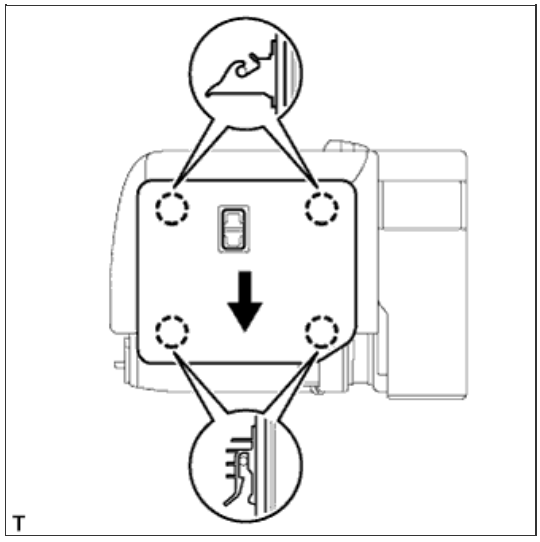
a. Attach the 2 claws to install the cover.



8. INSTALL REAR NO. 1 SEAT HEADREST SUPPORT ASSEMBLY

a. w/ Center Armrest:
Attach the 4 claws to install the 2 supports.

b. w/o Center Armrest:
Attach the 8 claws to install the 4 supports.

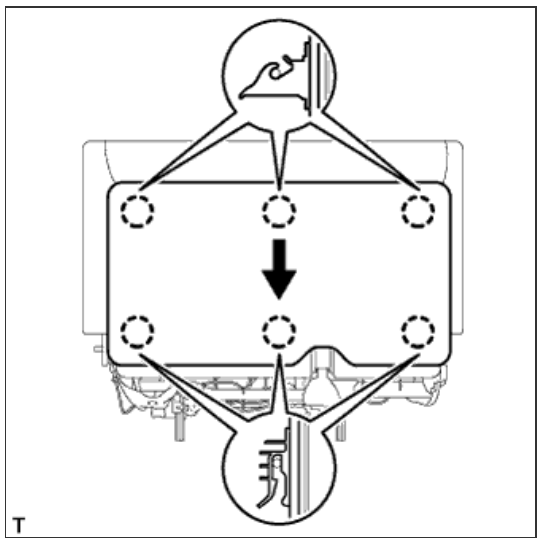


9. INSTALL REAR SEAT HEADREST ASSEMBLY

1 . INSTALL REAR SEATBACK BOARD SUB-ASSEMBLY LH

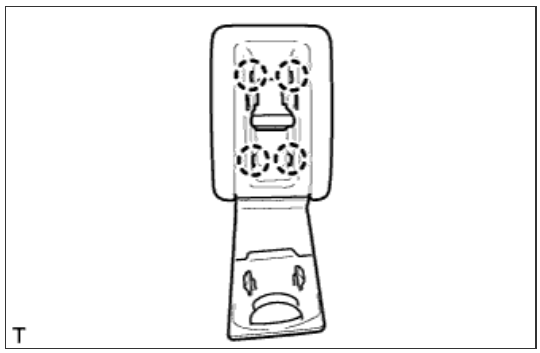
a. w/ Center Armrest:

i. Push the board down to attach the 2 claws on the bottom.



ii. Attach the 2 claws on the top of the board to install it.

b. w/o Center Armrest:

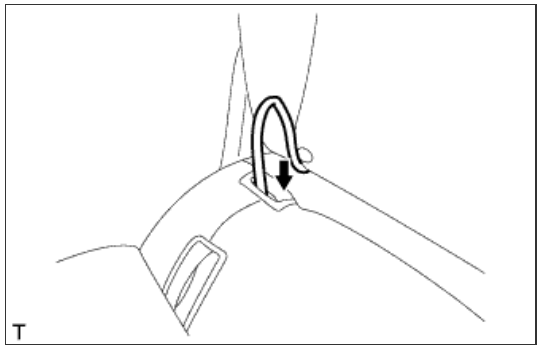


i. Push the board down to attach the 3 claws on the bottom.

ii. Attach the 3 claws on the top of the board to install it.

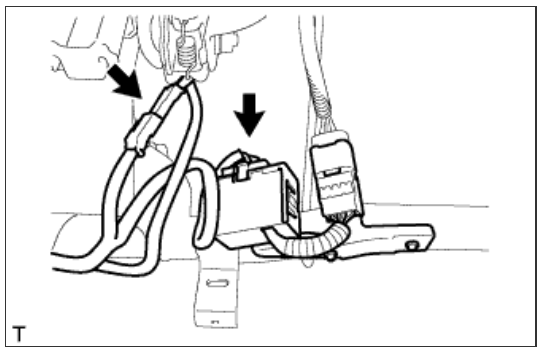
11. INSTALL REAR SEATBACK COVER

a. Attach the 4 claws to install the cover.



12. INSTALL SEAT CUSHION COVER WITH PAD

a. Install the seat cushion cover with pad.



b. w/ Rear Seat Side Airbag:
Pass the side airbag wire harness through the hole in the seat cushion.

c. w/ Seat Heater System:

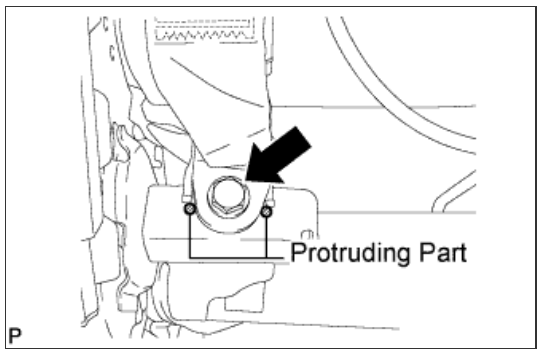
i. Pass the seatback heater wire harness through the hole in the seat cushion.

ii. Connect the 2 seat heater connectors.

d. w/ Rear Seat Side Airbag:
Attach the side airbag wire harness clamps.

13. INSTALL REAR NO. 1 SEAT INNER BELT ASSEMBLY LH

a. Install the belt with the bolt.

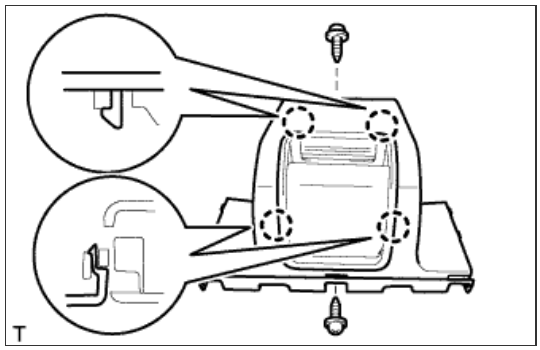


Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.

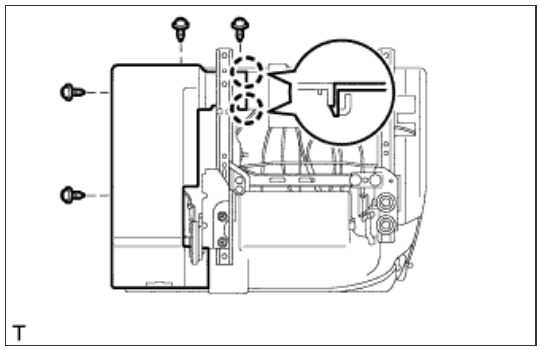
HINT:



The No. 1 seat 3 point type belt anchor is fixed with the same bolt as the rear No. 1 seat inner belt LH. Therefore, connect it when installing the rear No. 1 seat inner belt LH.

14. INSTALL REAR SEAT UNDER TRAY COVER LH

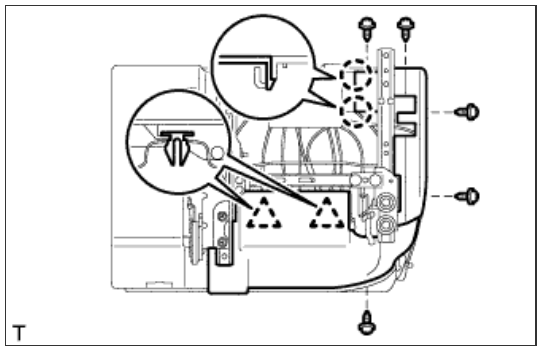
a. Attach the 4 claws to install the cover.



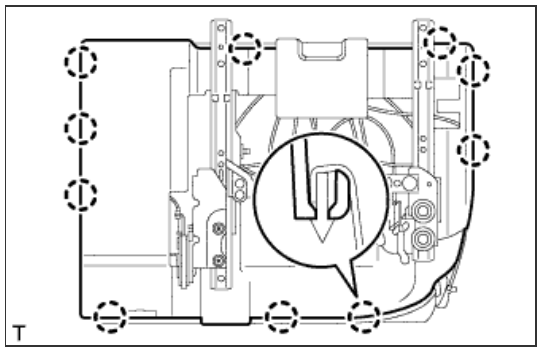
b. Install the 2 screws.

15. INSTALL REAR SEAT CUSHION COVER RH

a. Attach the 2 claws to install the cover.



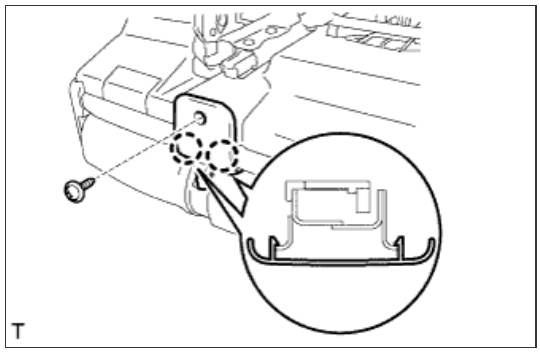
b. Install the 4 screws.



1 . INSTALL REAR UNDER SIDE COVER LH

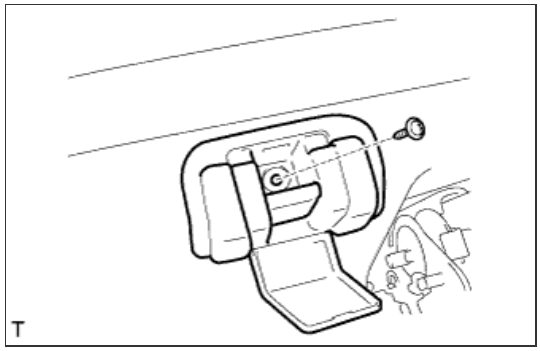
a. Attach the 2 claws and 2 clips to install the cover.

b. Install the 5 screws.



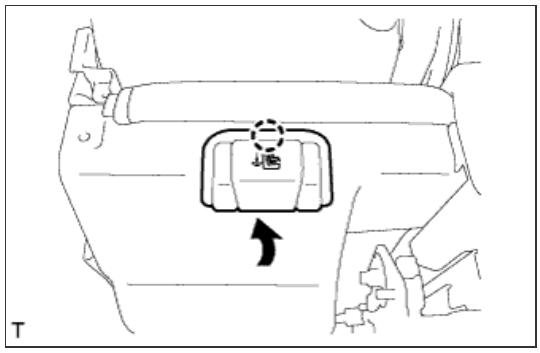
c. Attach the 10 claws.

1 . INSTALL REAR SEATBACK STAY COVER LH



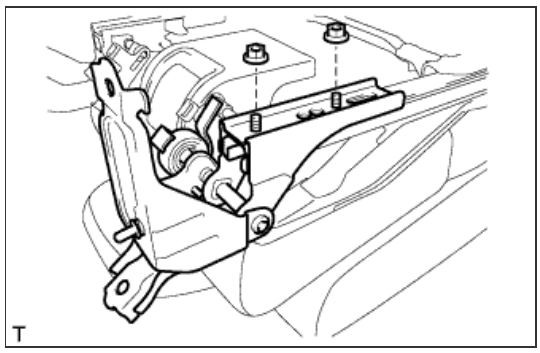
a. Attach the 2 claws to install the cover.

b. Install the screw.



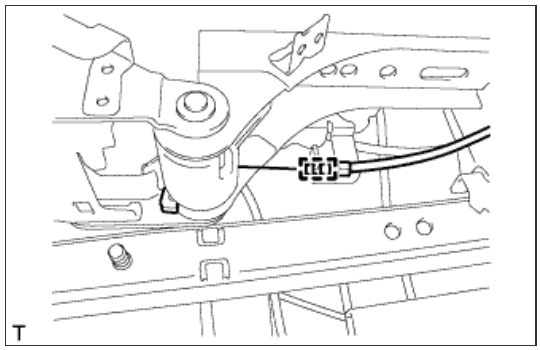
18. INSTALL SEAT BELT ANCHOR COVER CAP

a. Install the anchor cover cap with the screw.



b. Attach the claw to close the cap.

1 . INSTALL REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH

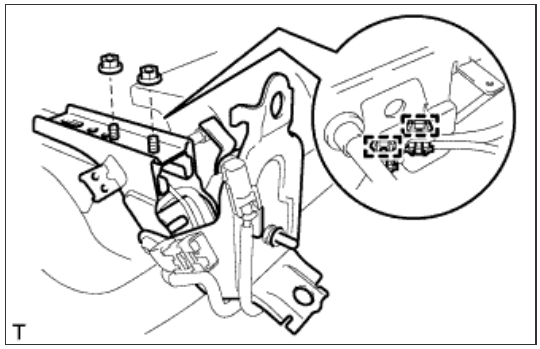


a. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

2 . INSTALL REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH

a. Attach the cable clamp to connect the cable.

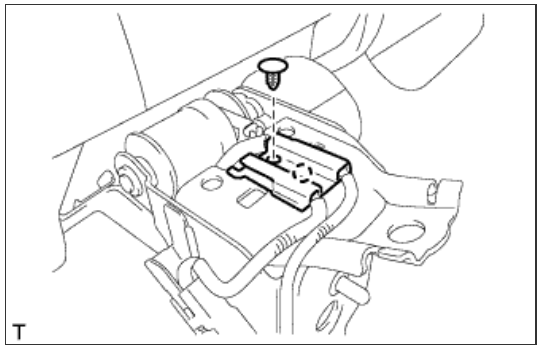


b. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

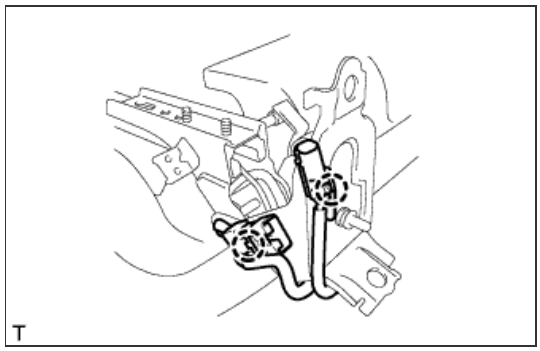
c. w/ Rear Seat Side Airbag:
Attach the wire harness clamp.

d. w/ Seat Heater System:
Attach the wire harness clamp.



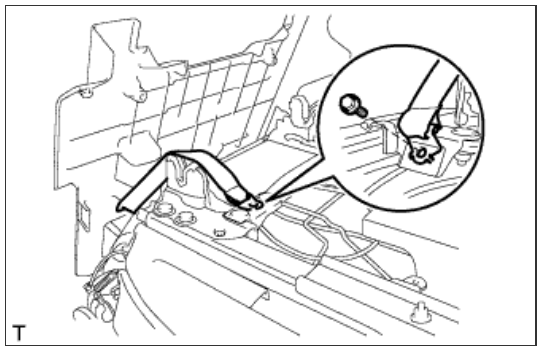
21. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Install the wire harness, and attach 2 claws to close the protector.



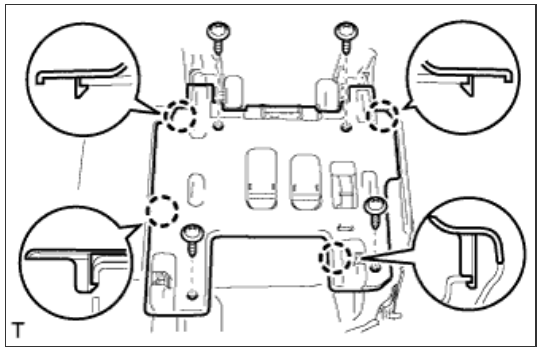
b. Attach the claw to install the protector to the seat hinge.

c. Install the clip.



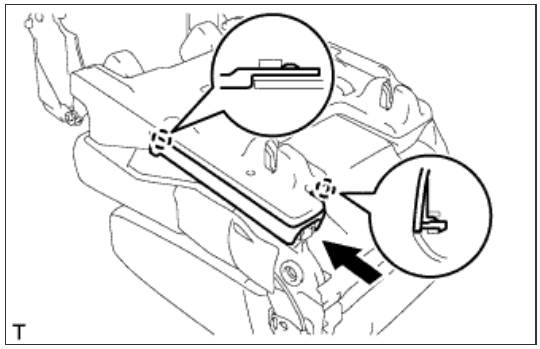
d. w/ Rear Seat Side Airbag:
Attach the claw to install the wire harness connector.

e. w/ Seat Heater System:
Attach the claw to install the wire harness connector.



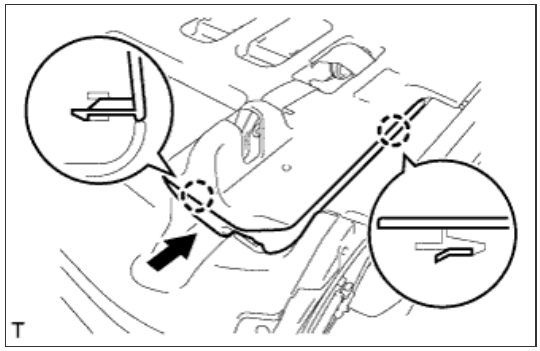
22. INSTALL REAR NO. 2 SEAT LEG SIDE COVER

a. Pass the fold seat stopper band through the seat leg side cover and attach it to the seat cushion frame with the bolt.



b. Attach the 4 claws to install the seat leg side cover.

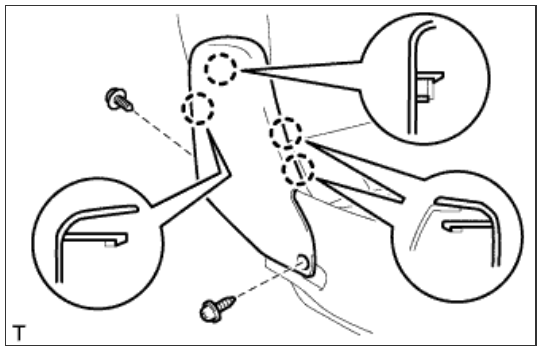
c. Install the 4 screws.



23. INSTALL UPPER SEAT TRACK RAIL COVER RH

a. Attach the 2 claws to install the cover.

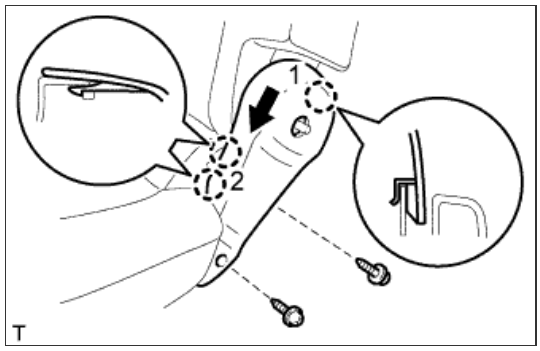
24. INSTALL UPPER SEAT TRACK RAIL COVER LH



a. Attach the 2 claws to install the cover.

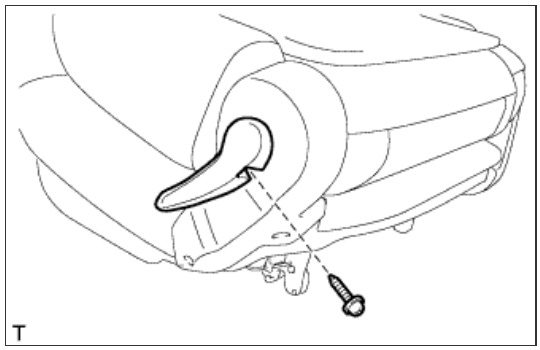
25. INSTALL REAR NO. 1 SEAT RECLINING COVER RH

a. Attach the 4 claws to install the cover.



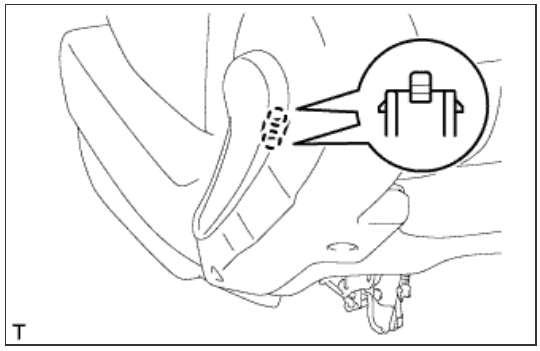
b. Install the 2 screws.

26. INSTALL REAR NO. 1 SEAT RECLINING COVER LH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

b. Install the 2 screws.



27. INSTALL RECLINING AD USTER RELEASE HANDLE LH

a. Install the release handle with the screw.

28. INSTALL SEAT AD USTER BOLT COVER

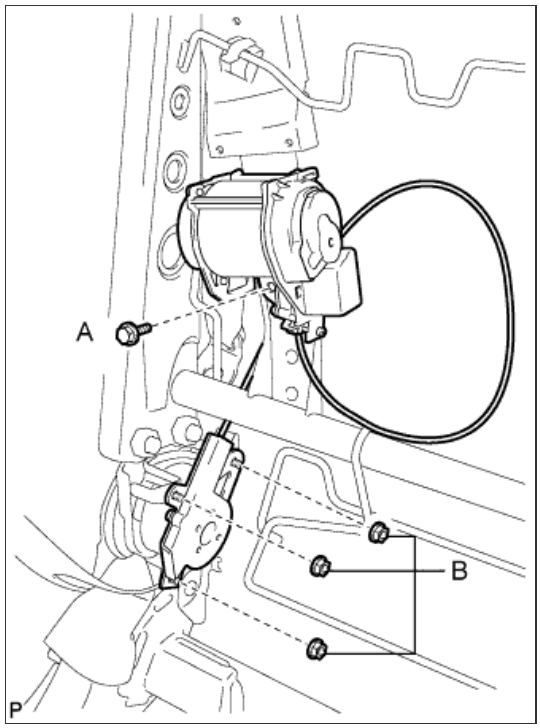
a. Attach the 2 claws to install the cover.

29. INSTALL REAR NO. 1 SEAT ASSEMBLY LH

a. Install the rear No. 1 seat assembly (Click here).

for Preparation Click here

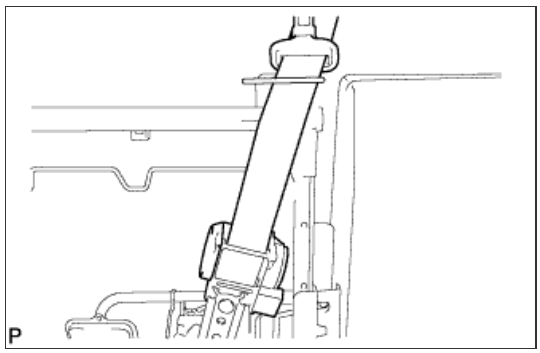
HINT:



- **Use the same procedures for the LHD and RHD.**
- **The procedures listed below are for the LHD.**
- **A bolt without a torque specification is shown in the standard bolt chart (Click here).**

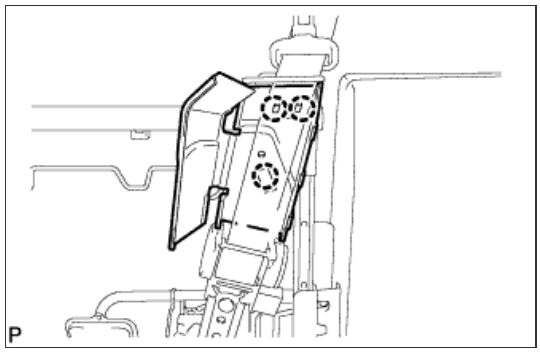
1. INSTALL NO. 1 SEAT 3 POINT TYPE BELT ASSEMBLY LH

a. Install the belt with the nut labeled A.



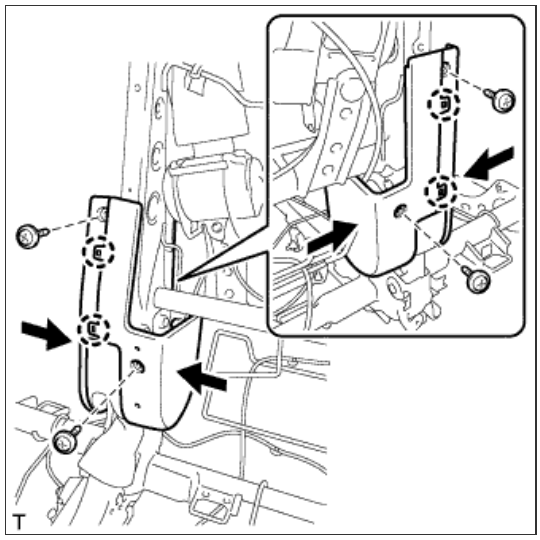
Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

b. Install the belt sensor with the 3 nuts labeled B.



2. INSTALL REAR SEAT SHOULDER BELT HOLE COVER

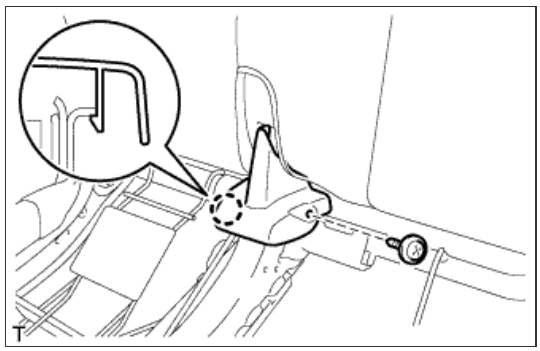
a. Install the seat belt as shown in the illustration.



b. Attach the 3 claws to install the shoulder belt hole cover.

3. INSTALL REAR LOWER SEATBACK COVER SUB-ASSEMBLY LH

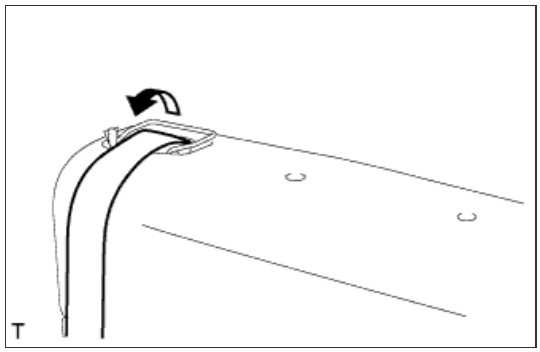
a. Attach the 4 claws to install the cover.



b. Install the 4 screws.

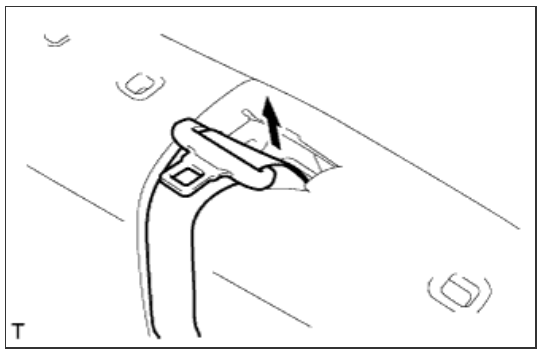
4. INSTALL REAR SEATBACK HINGE COVER LH

a. Attach the claw to install the cover.



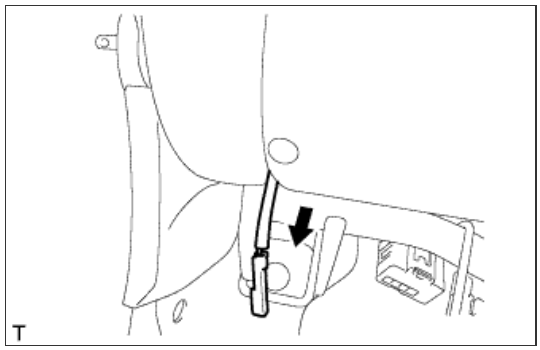
b. Install the screw.

5. INSTALL SEATBACK COVER WITH PAD



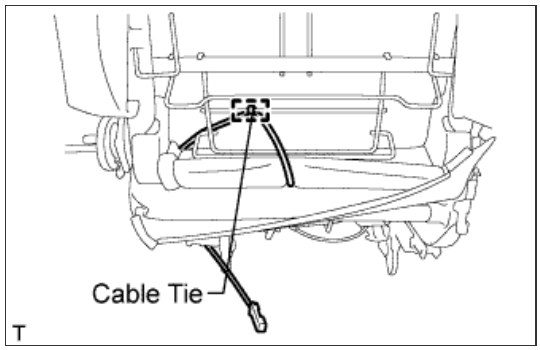
a. Install the seatback cover with pad.

b. w/ Center Armrest:
Pull out the seat belt.



c. w/o Center Armrest:
Pull out the seat belt.

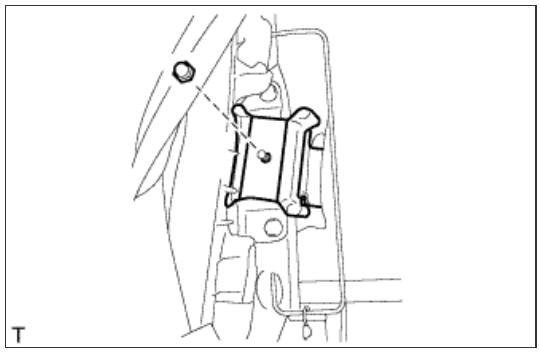
d. w/ Rear Seat Side Airbag:
Pass the side airbag wire harness through the hole in the seatback.



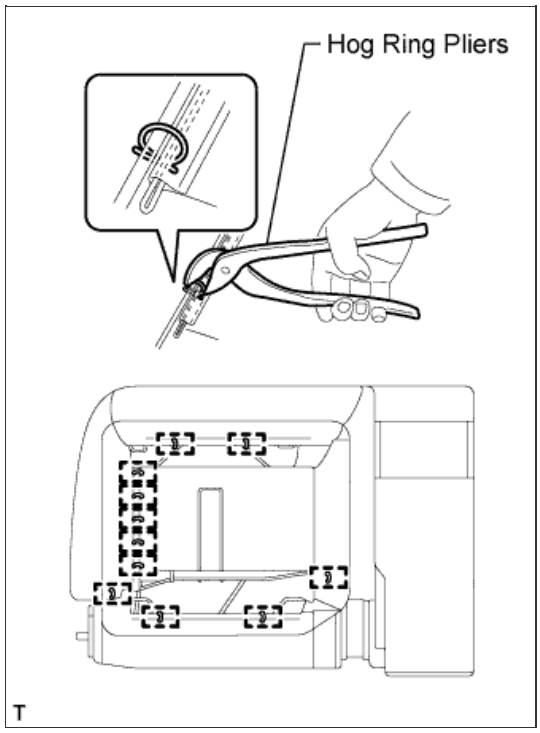
e. w/ Seat Heater System:
Pass the seatback heater wire harness through the hole in the seatback.

i.

ii. Connect the seatback heater wire harness and install a new cable tie.

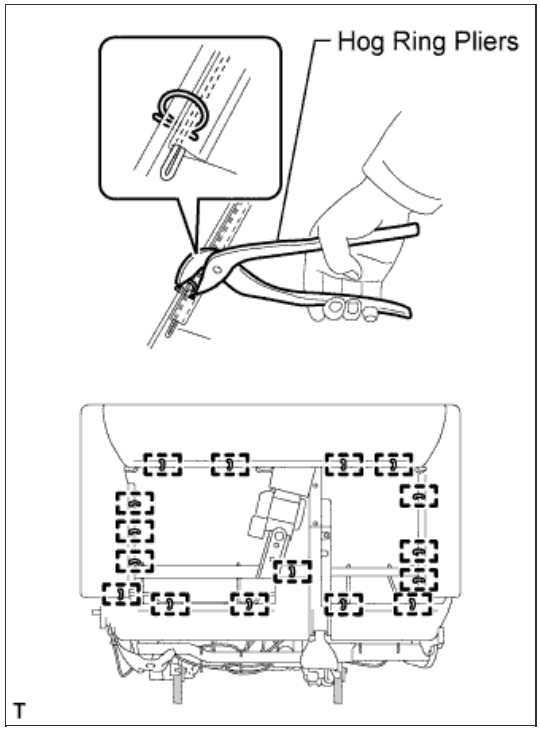


f. w/ Rear Seat Side Airbag:
Install the seatback cover bracket to the seat frame with the cap nut.



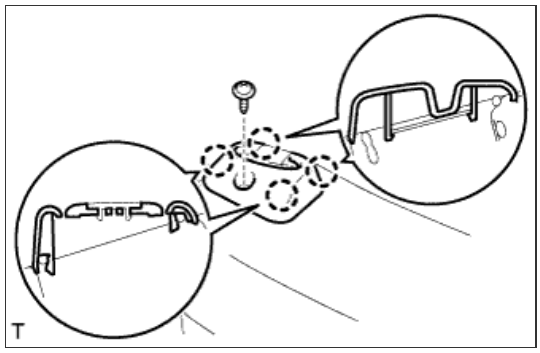
Torque:
5.5 N*m{ 56 kgf*cm , 49 in.*lbf }

NOTICE:



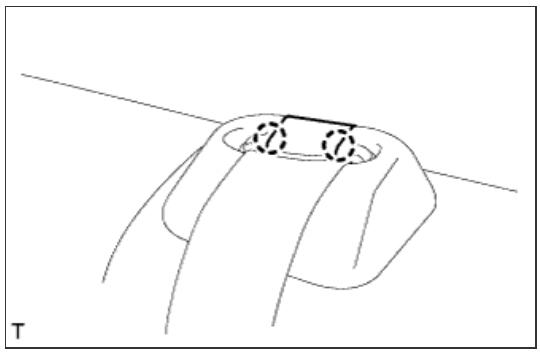
After the seatback trim cover is assembled, make sure the side airbag strap is not twisted.

g. w/ Center Armrest:
Using hog ring pliers, install new hog rings to the seatback frame.



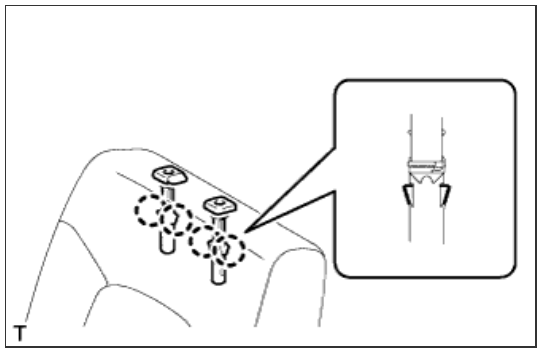
h. w/o Center Armrest:
Using hog ring pliers, install new hog rings to the seatback frame.

6. INSTALL REAR SEAT BELT HOLE COVER LH



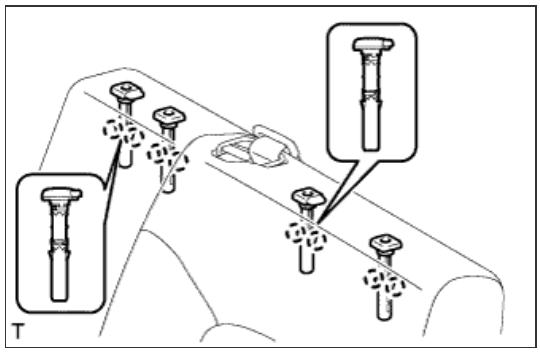
a. Attach the 4 claws to install the cover.

b. Install the screw.



7. INSTALL SHOULDER BELT ANCHOR COVER

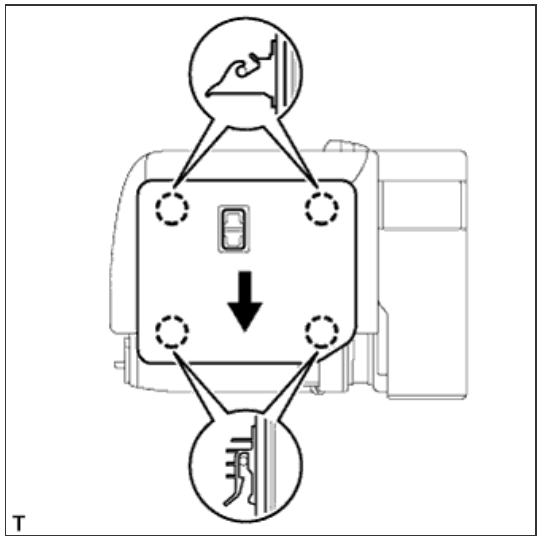
a. Attach the 2 claws to install the cover.



8. INSTALL REAR NO. 1 SEAT HEADREST SUPPORT ASSEMBLY

a. w/ Center Armrest:
Attach the 4 claws to install the 2 supports.

b. w/o Center Armrest:
Attach the 8 claws to install the 4 supports.

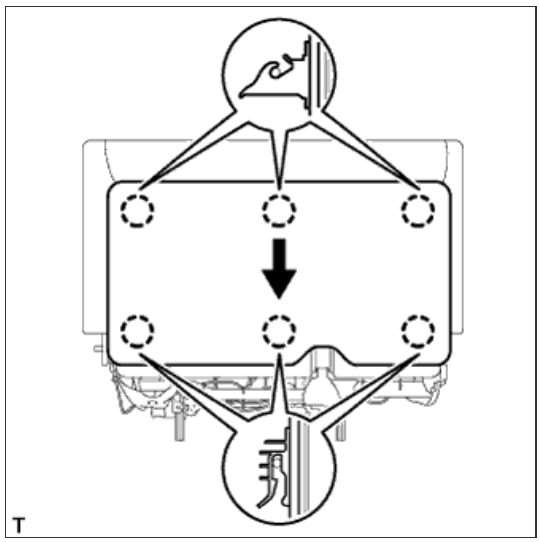


9. INSTALL REAR SEAT HEADREST ASSEMBLY

1 . INSTALL REAR SEATBACK BOARD SUB-ASSEMBLY LH

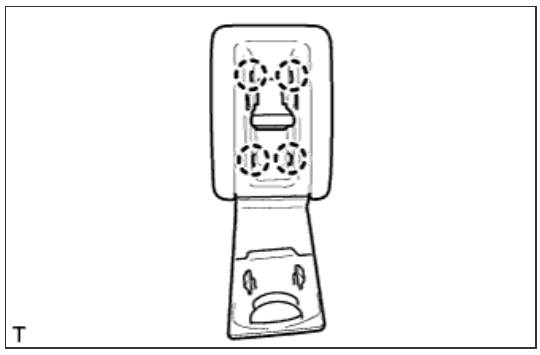
a. w/ Center Armrest:

i. Push the board down to attach the 2 claws on the bottom.



ii. Attach the 2 claws on the top of the board to install it.

b. w/o Center Armrest:

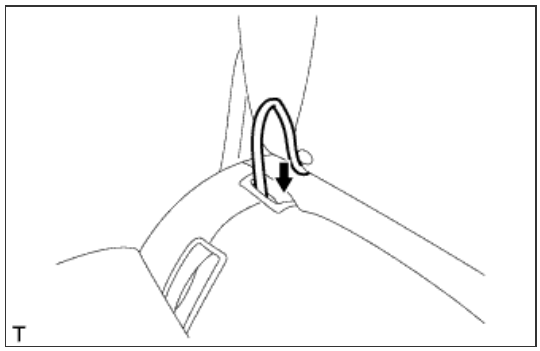


i. Push the board down to attach the 3 claws on the bottom.

ii. Attach the 3 claws on the top of the board to install it.

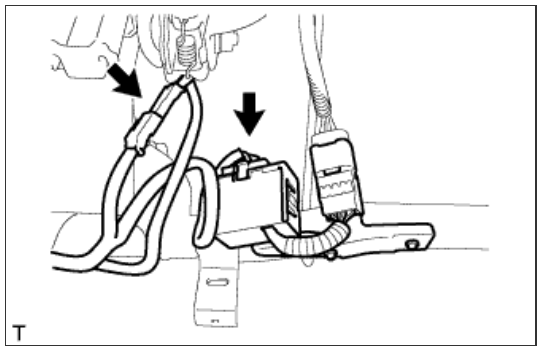
11. INSTALL REAR SEATBACK COVER

a. Attach the 4 claws to install the cover.



12. INSTALL SEAT CUSHION COVER WITH PAD

a. Install the seat cushion cover with pad.



b. w/ Rear Seat Side Airbag:
Pass the side airbag wire harness through the hole in the seat cushion.

c. w/ Seat Heater System:

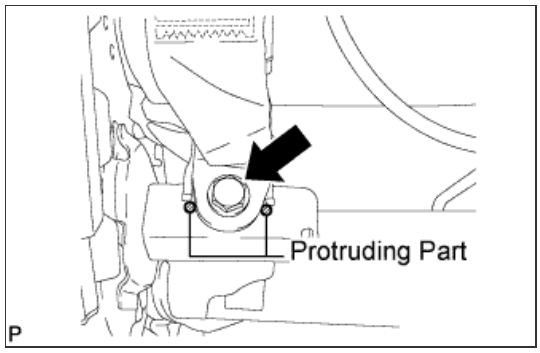
i. Pass the seatback heater wire harness through the hole in the seat cushion.

ii. Connect the 2 seat heater connectors.

d. w/ Rear Seat Side Airbag:
Attach the side airbag wire harness clamps.

13. INSTALL REAR NO. 1 SEAT INNER BELT ASSEMBLY LH

a. Install the belt with the bolt.

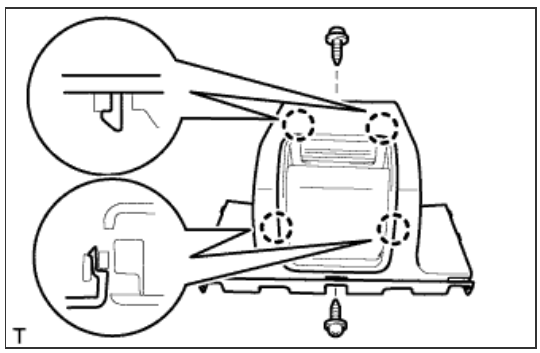


Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

NOTICE:

Do not overlap the anchor part of the seat belt and protruding parts of the vehicle body.

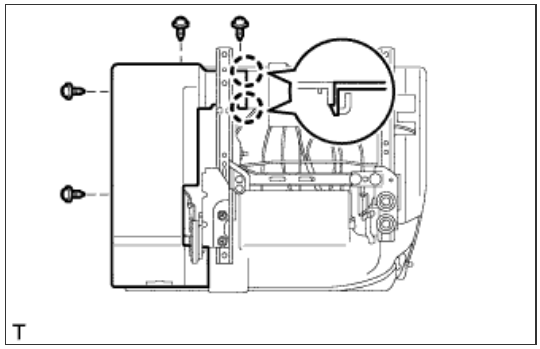
HINT:



The No. 1 seat 3 point type belt anchor is fixed with the same bolt as the rear No. 1 seat inner belt LH. Therefore, connect it when installing the rear No. 1 seat inner belt LH.

14. INSTALL REAR SEAT UNDER TRAY COVER LH

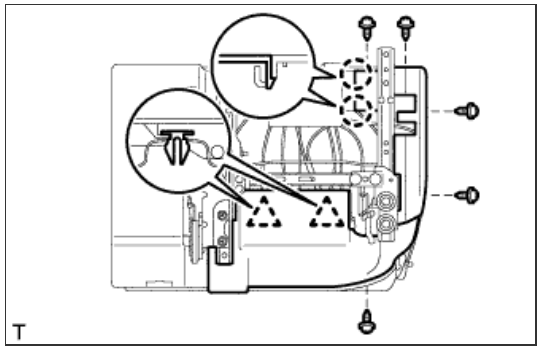
a. Attach the 4 claws to install the cover.



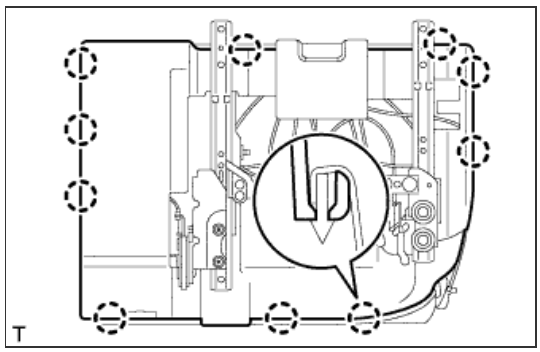
b. Install the 2 screws.

15. INSTALL REAR SEAT CUSHION COVER RH

a. Attach the 2 claws to install the cover.



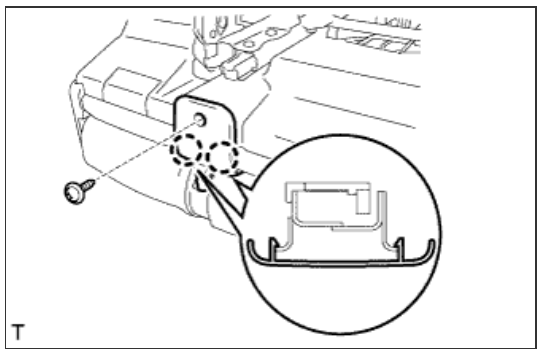
b. Install the 4 screws.



1 . INSTALL REAR UNDER SIDE COVER LH

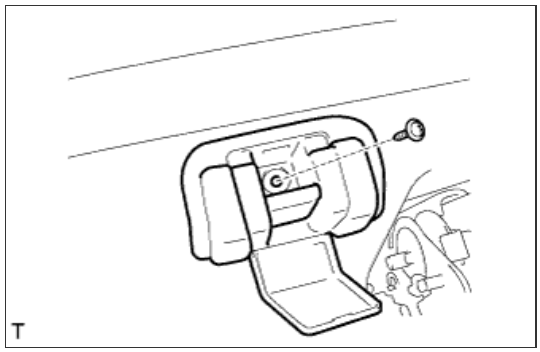
a. Attach the 2 claws and 2 clips to install the cover.

b. Install the 5 screws.



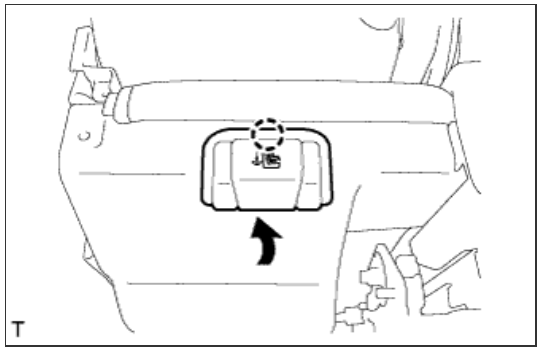
c. Attach the 10 claws.

1 . INSTALL REAR SEATBACK STAY COVER LH



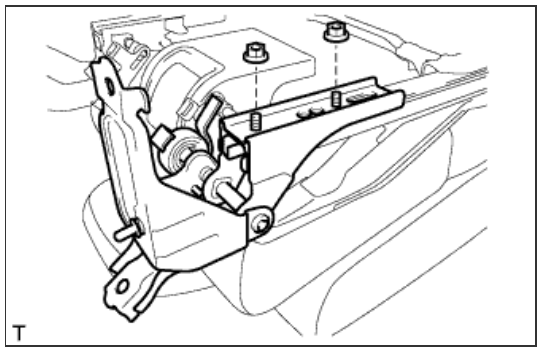
a. Attach the 2 claws to install the cover.

b. Install the screw.



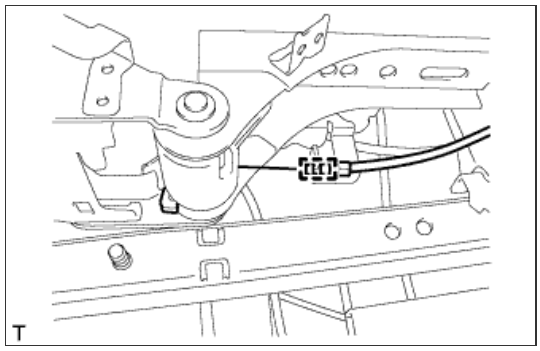
18. INSTALL SEAT BELT ANCHOR COVER CAP

a. Install the anchor cover cap with the screw.



b. Attach the claw to close the cap.

1 . INSTALL REAR NO. 1 SEAT HINGE SUB-ASSEMBLY RH

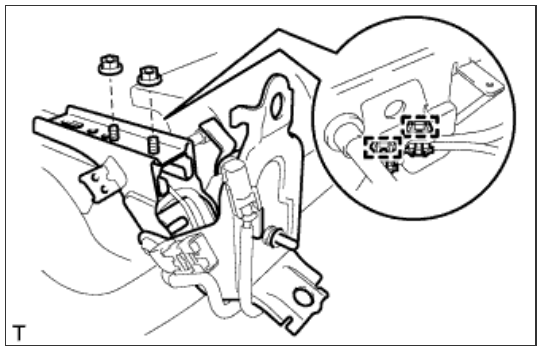


a. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

2 . INSTALL REAR NO. 1 SEAT HINGE SUB-ASSEMBLY LH

a. Attach the cable clamp to connect the cable.

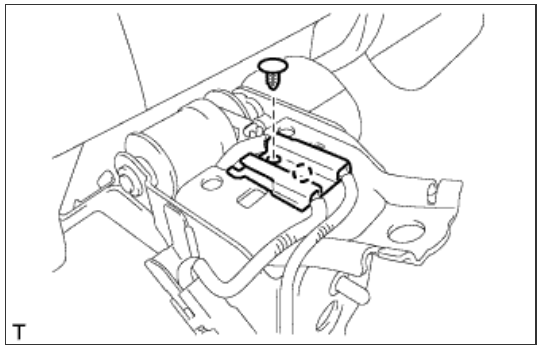


b. Install the hinge with the 2 nuts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

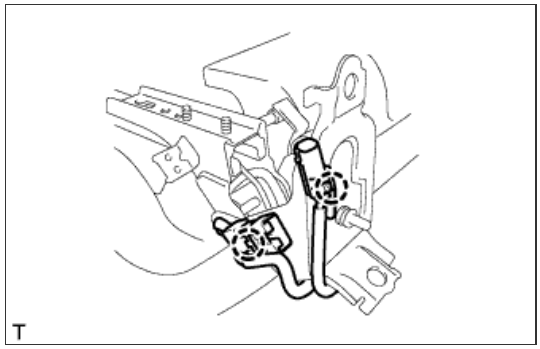
c. w/ Rear Seat Side Airbag:
Attach the wire harness clamp.

d. w/ Seat Heater System:
Attach the wire harness clamp.



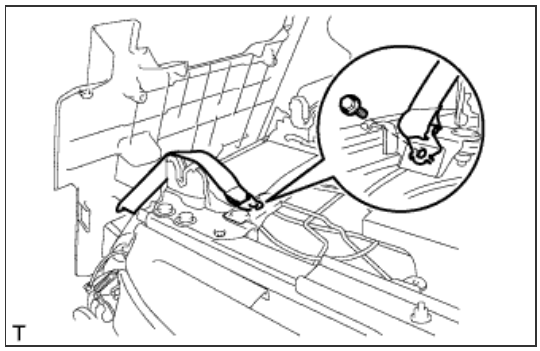
21. INSTALL REAR NO. 2 SEAT PROTECTOR

a. Install the wire harness, and attach 2 claws to close the protector.



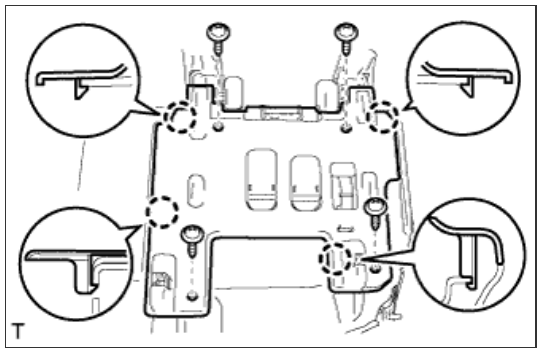
b. Attach the claw to install the protector to the seat hinge.

c. Install the clip.



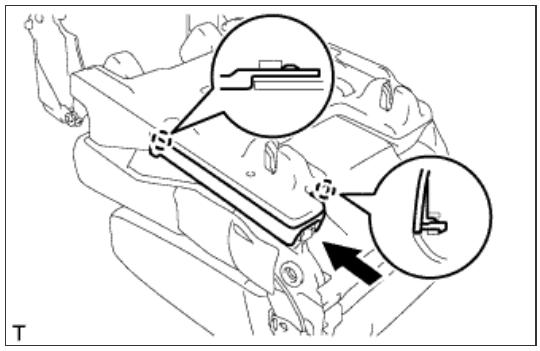
d. w/ Rear Seat Side Airbag:
Attach the claw to install the wire harness connector.

e. w/ Seat Heater System:
Attach the claw to install the wire harness connector.



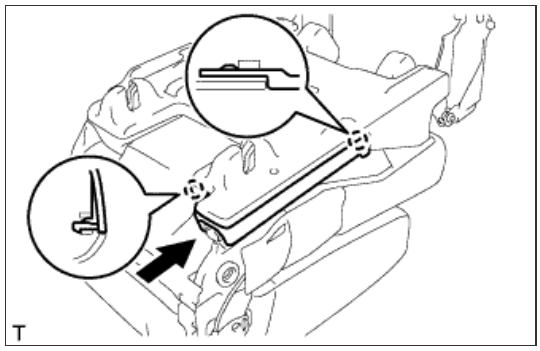
22. INSTALL REAR NO. 2 SEAT LEG SIDE COVER

a. Pass the fold seat stopper band through the seat leg side cover and attach it to the seat cushion frame with the bolt.



b. Attach the 4 claws to install the seat leg side cover.

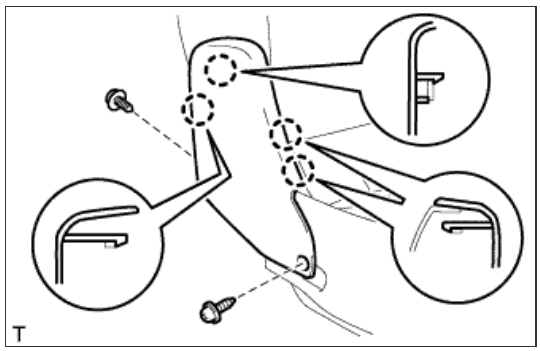
c. Install the 4 screws.



23. INSTALL UPPER SEAT TRACK RAIL COVER RH

a. Attach the 2 claws to install the cover.

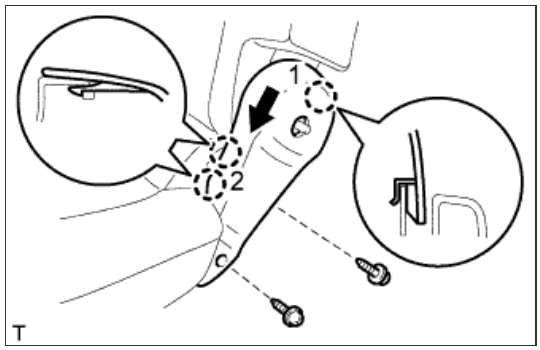
24. INSTALL UPPER SEAT TRACK RAIL COVER LH



a. Attach the 2 claws to install the cover.

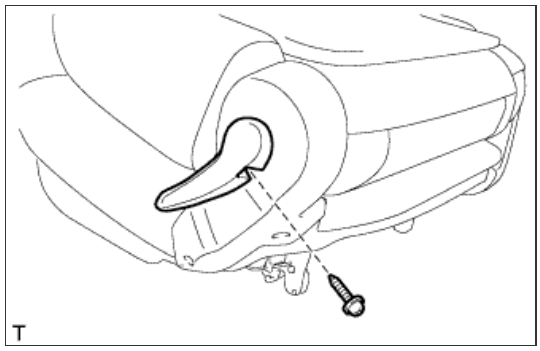
25. INSTALL REAR NO. 1 SEAT RECLINING COVER RH

a. Attach the 4 claws to install the cover.



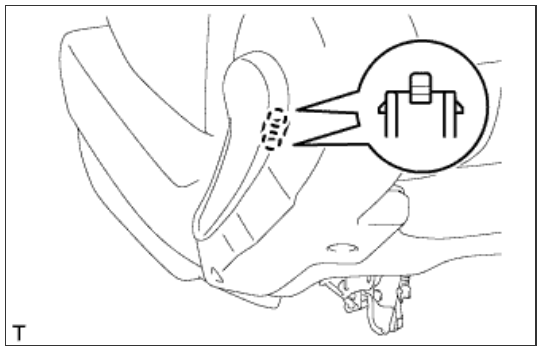
b. Install the 2 screws.

26. INSTALL REAR NO. 1 SEAT RECLINING COVER LH



a. Attach the 3 claws in the order shown in the illustration to install the cover.

b. Install the 2 screws.

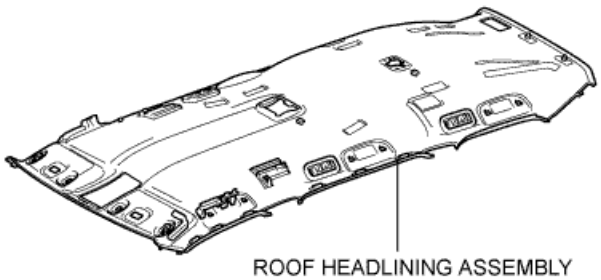


27. INSTALL RECLINING AD USTER RELEASE HANDLE LH

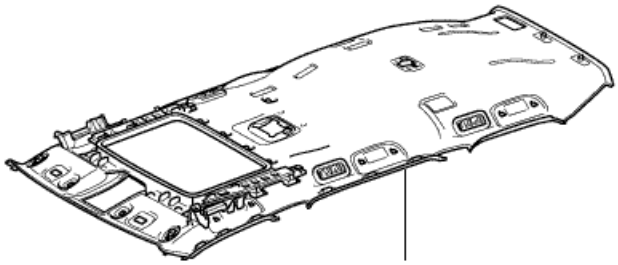
a. Install the release handle with the screw.

28. INSTALL SEAT AD USTER BOLT COVER

a. Attach the 2 claws to install the cover.



29. INSTALL REAR NO. 1 SEAT ASSEMBLY LH



a. Install the rear No. 1 seat assembly (Click here).

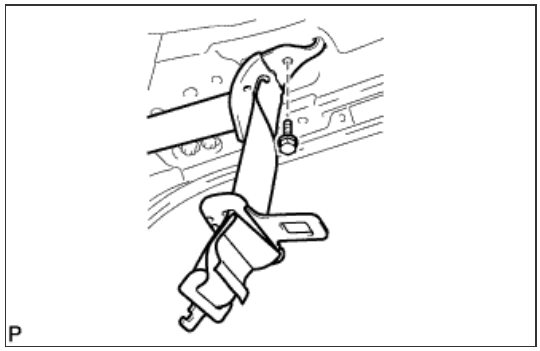
1. REMOVE SEAT BELT ANCHOR COVER

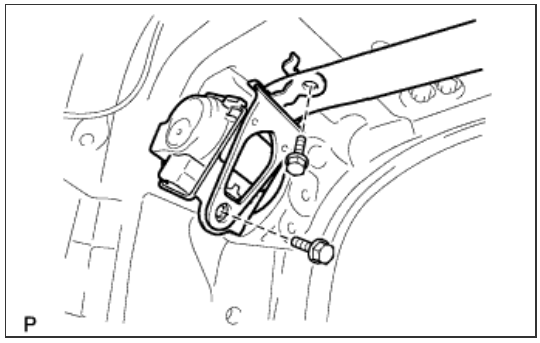
a. Detach the 4 clips and 4 guides, and remove the seat belt anchor cover.

2. REMOVE ROOF HEADLINING ASSEMBLY (w o Sliding Roof)



a. Remove the roof headlining (Click here).

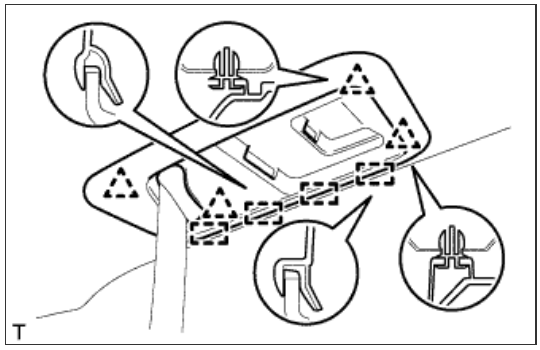
3. REMOVE ROOF HEADLINING ASSEMBLY (w Sliding Roof)



a. Remove the roof headlining (Click here).

4. REMOVE REAR NO. 2 SEAT BELT ASSEMBLY 3 POINT TYPE

a. Remove the bolt and through anchor.



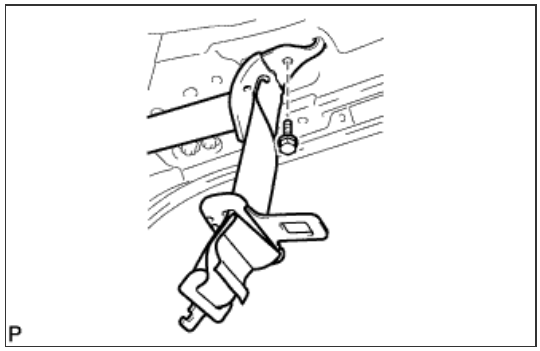
b. Remove the bolts and belt.

for Preparation Click here

1. REMOVE SEAT BELT ANCHOR COVER

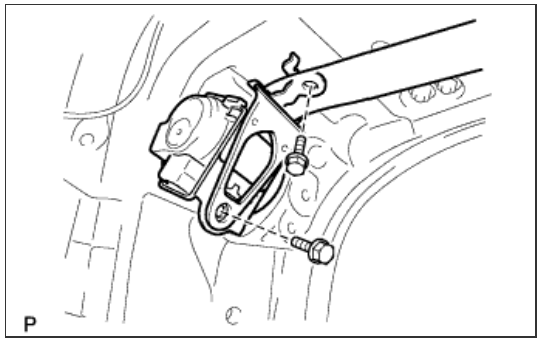
a. Detach the 4 clips and 4 guides, and remove the seat belt anchor cover.

2. REMOVE ROOF HEADLINING ASSEMBLY (w o Sliding Roof)



a. Remove the roof headlining (Click here).

3. REMOVE ROOF HEADLINING ASSEMBLY (w Sliding Roof)

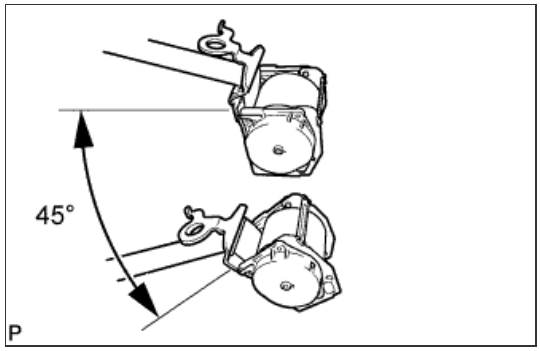


a. Remove the roof headlining (Click here).

4. REMOVE REAR NO. 2 SEAT BELT ASSEMBLY 3 POINT TYPE

a. Remove the bolt and through anchor.

b. Remove the bolts and belt.



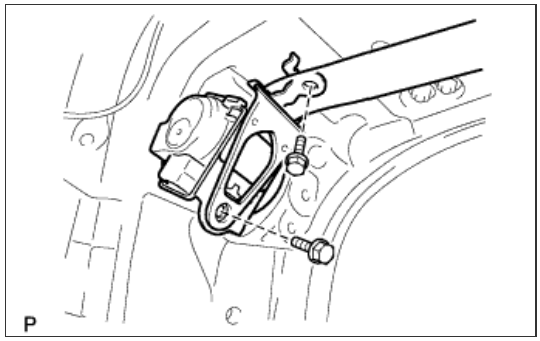
for Preparation Click here

1. INSPECT REAR NO. 2 SEAT BELT ASSEMBLY POINT TYPE

NOTICE:

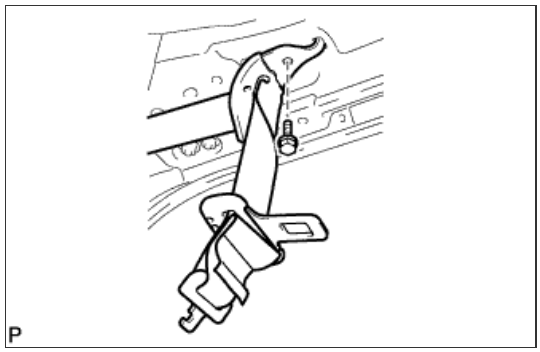
Do not disassemble the retractor.

a. When the inclination of the retractor is 15° or less, check that the belt can be pulled from the retractor. When the inclination of the retractor is over 45°, check that the belt locks.
If the operation is not as specified, replace the belt.



for Preparation Click here

1. INSTALL REAR NO. 2 SEAT BELT ASSEMBLY 3 POINT TYPE



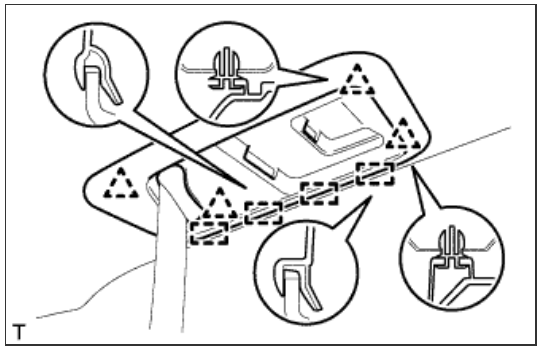
a. Install the belt with the 2 bolts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

b. Install the through-anchor with the bolt.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

2. INSTALL ROOF HEADLINING ASSEMBLY (w/o Sliding Roof)



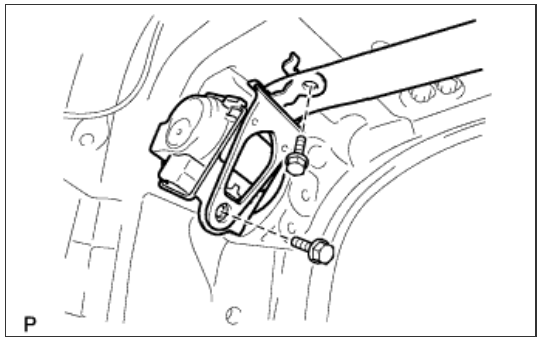
a. Install the roof headlining (Click here).

3. INSTALL ROOF HEADLINING ASSEMBLY (w/ Sliding Roof)

a. Install the roof headlining (Click here).

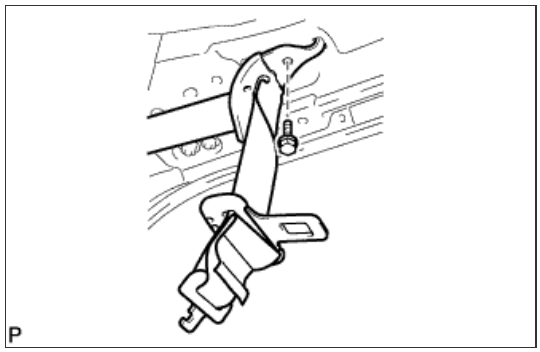
4. INSTALL SEAT BELT ANCHOR COVER

a. Attach the 4 guides and 4 clips to install the seat belt anchor co er.



for Preparation Click here

1. INSTALL REAR NO. 2 SEAT BELT ASSEMBLY 3 POINT TYPE



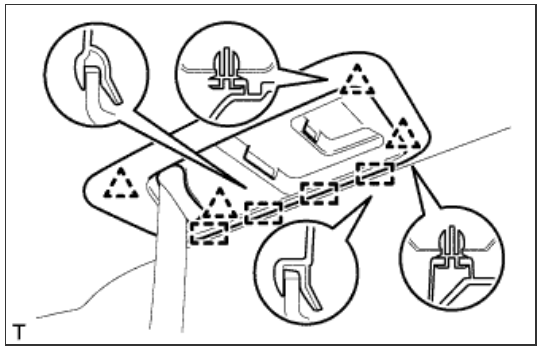
a. Install the belt with the 2 bolts.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

b. Install the through-anchor with the bolt.

Torque:
42 N*m{ 428 kgf*cm , 31 ft.*lbf }

2. INSTALL ROOF HEADLINING ASSEMBLY (w/o Sliding Roof)



a. Install the roof headlining (Click here).

3. INSTALL ROOF HEADLINING ASSEMBLY (w/ Sliding Roof)

a. Install the roof headlining (Click here).

4. INSTALL SEAT BELT ANCHOR COVER

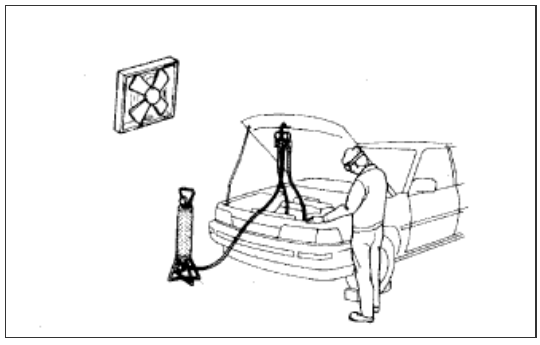
a. Attach the 4 guides and 4 clips to install the seat belt anchor co er.

for Preparation Click here

1.PRECAUTIONS WHEN USING INTELLIGENT TESTER

a. When using the intelligent tester to troubleshoot the CAN communication line or LIN communication line:
Connect the intelligent tester to the vehicle, and turn a courtesy light switch on and off at 1.5 second intervals until communication between the intelligent tester and vehicle begins.

b. After all DTCs are cleared, check if the trouble occurs again 6 seconds after the engine switch is turned on (IG).



2.IF ANY OF FOLLOWING CONDITIONS ARE MET, KEEP ENGINE IDLING WITH A/C ON (ENGINE SPEED AT LESS THAN 2000 RPM) FOR AT LEAST 2 MINUTE:

- Refrigerant gas has been refilled or A/C parts have been replaced.
- The engine has not been started for a long time.

NOTICE:

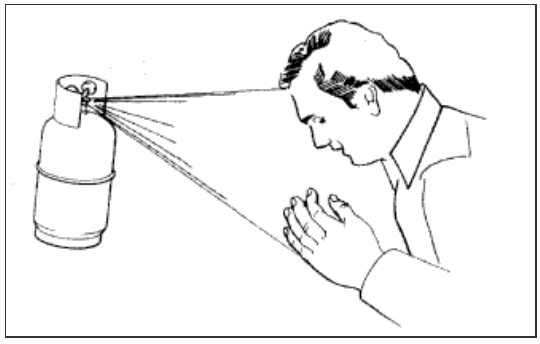
If the engine speed exceeds 2,000 rpm, the A/C compressor may be damaged.

3.DO NOT HANDLE REFRIGERANT IN AN ENCLOSED AREA OR NEAR AN OPEN FLAME

4.ALWAYS WEAR EYE PROTECTION

5.BE CAREFUL NOT TO GET LIQUID REFRIGERANT IN YOUR EYES OR ON YOUR SKIN

If liquid refrigerant gets in your eyes or on your skin:



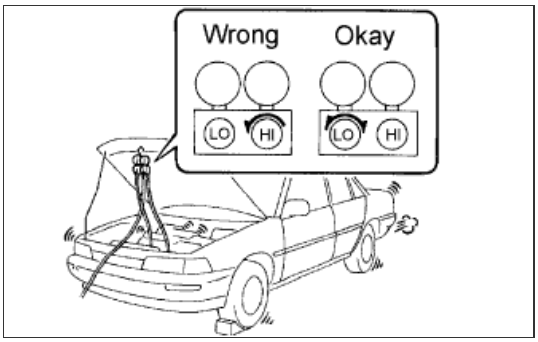
a. Wash the area with lots of cold water.

CAUTION:

Do not rub your eyes or skin.

b. Apply clean petroleum jelly to the skin.

c. Go immediately to a hospital or see a physician for professional treatment.



6.NEVER HEAT CONTAINER OR EXPOSE IT TO OPEN FLAME

7.BE CAREFUL NOT TO DROP CONTAINER OR APPLY PHYSICAL SHOCKS TO IT

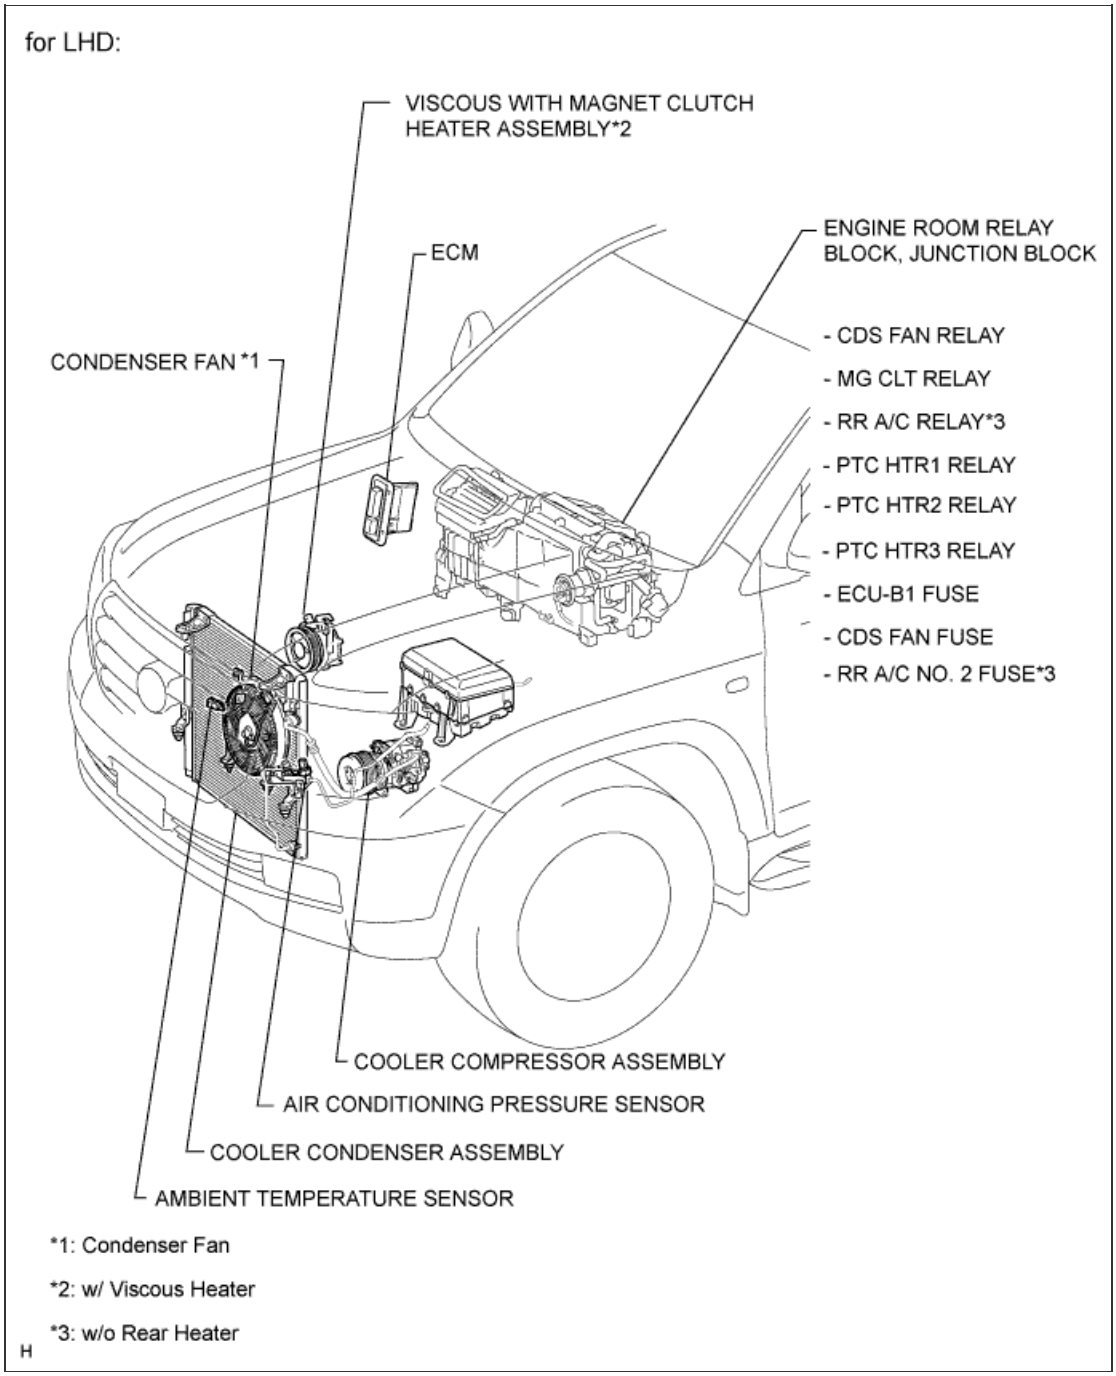
8.DO NOT OPERATE COMPRESSOR WITH INSUFFICIENT REFRIGERANT IN REFRIGERANT SYSTEM

If there is not enough refrigerant in the refrigerant system, oil lubrication will be insufficient and compressor burnout may occur. Necessary care should be taken to avoid this.

9.DO NOT OPEN HIGH PRESSURE MANIFOLD VALVE WHILE COMPRESSOR IS OPERATING

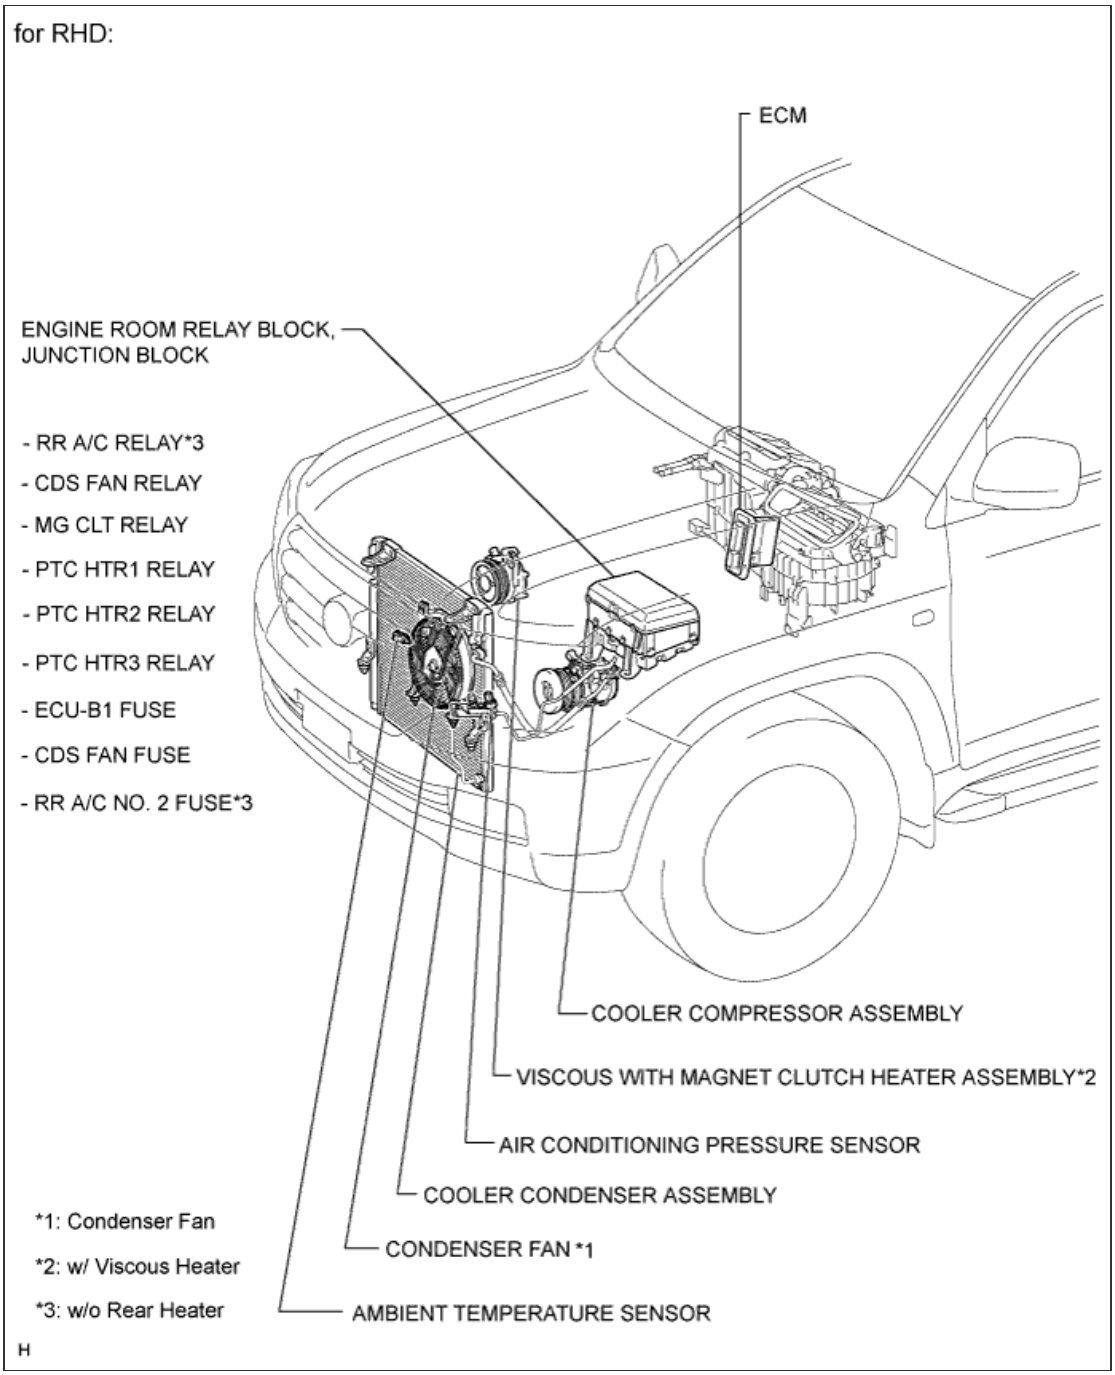
Open and close only the low pressure valve. Opening and closing the high pressure valve could cause the charging cylinder to rupture.

10.BE CAREFUL NOT TO OVERCHARGE SYSTEM WITH REFRIGERANT



If the refrigerant is overcharged, it causes problems such as insufficient cooling, poor fuel economy and engine overheating.

11.DO NOT OPERATE ENGINE AND COMPRESSOR WITHOUT REFRIGERANT



NOTICE:

This may damage the inside of the compressor.

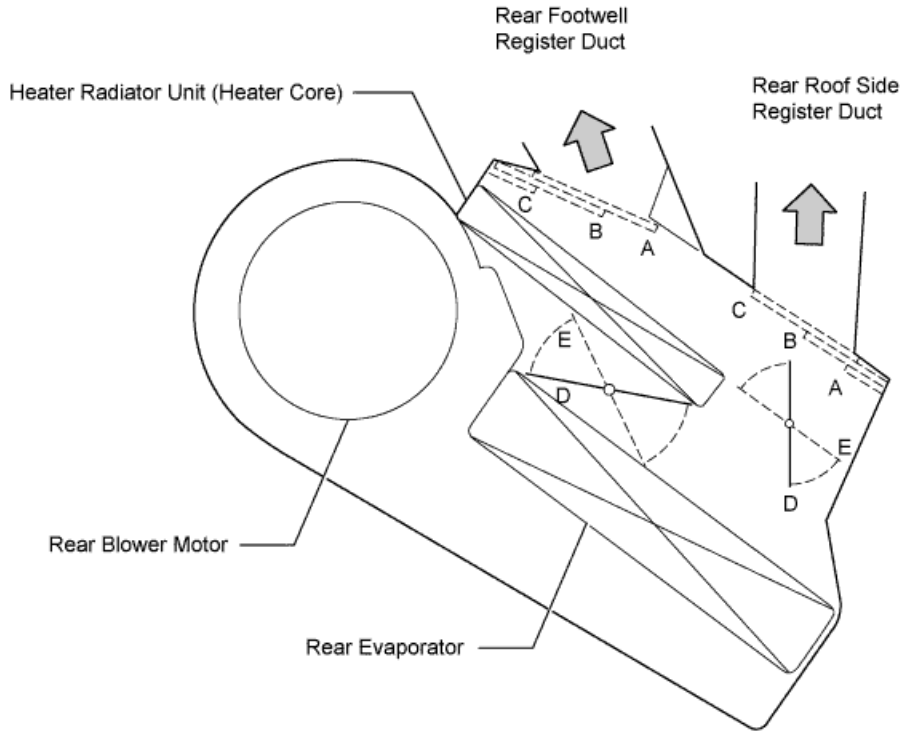
GENERAL

a. The air conditioning system has the following features:

- The 4-ZONE air conditioner system controls the temperature of the front and rear seats independently. In addition, it uses the amount of sunlight and temperature of each seat to adjust the temperature and airflow volume. When the 4-ZONE switch is on, the temperature, the airflow mode and airflow volume of each of the 4 seats (driver, front passenger, rear left, rear right) are automatically adjusted.
- The 2-ZONE air conditioner system controls the temperature of the left and right seats independently, and sets the temperature for the driver seat and front passenger seat. In addition, it uses the amount of sunlight and temperature of the left and right seats to adjust the temperature and airflow volume.
  When the 2-ZONE switch is on, the temperature, airflow mode and airflow volume of the driver seat and front passenger seat are automatically adjusted.
- In accordance with the temperature set using the temperature control switch, the air conditioning amplifier assembly determines the outlet temperature based on the input signals from various sensors. In addition, corrections are made in accordance with the signals from the water temperature sensor to control the outlet air temperature.
- Controls the blower motor in accordance with the airflow volume determined by the air conditioning amplifier assembly based on the input signals from various sensors.
- Automatically changes the outlets in accordance with the outlet mode ratio that is determined by the air conditioning amplifier assembly based on the input signals from various sensors.
- Based on the signals from the ambient temperature sensor, this system calculates the outside temperature and indicates it in the multi-information display in the combination meter.
- For vehicles with the rear air conditioner, there are rear side and roof side air ducts, and independent temperature and airflow mode adjustments are automatically performed.
- The Positive Temperature Coefficient (PTC) heater system contains a PTC heater that heats the air that has passed through the heater core to ensure proper heater performance.
- A compact, lightweight, and highly efficient straight flow (full-path flow) aluminum heater core is used.
- The micro dust and pollen filter control is used to remove pollen in the air around the upper areas of the driver and front passenger seats.
- The air conditioning amplifier assembly is equipped with a self diagnosis function. If there is a malfunction in the system, it stores the DTCs (Diagnostic Trouble Codes) in its memory.

MODE POSITION AND DAMPER OPERATION

for Front Air Conditioning:

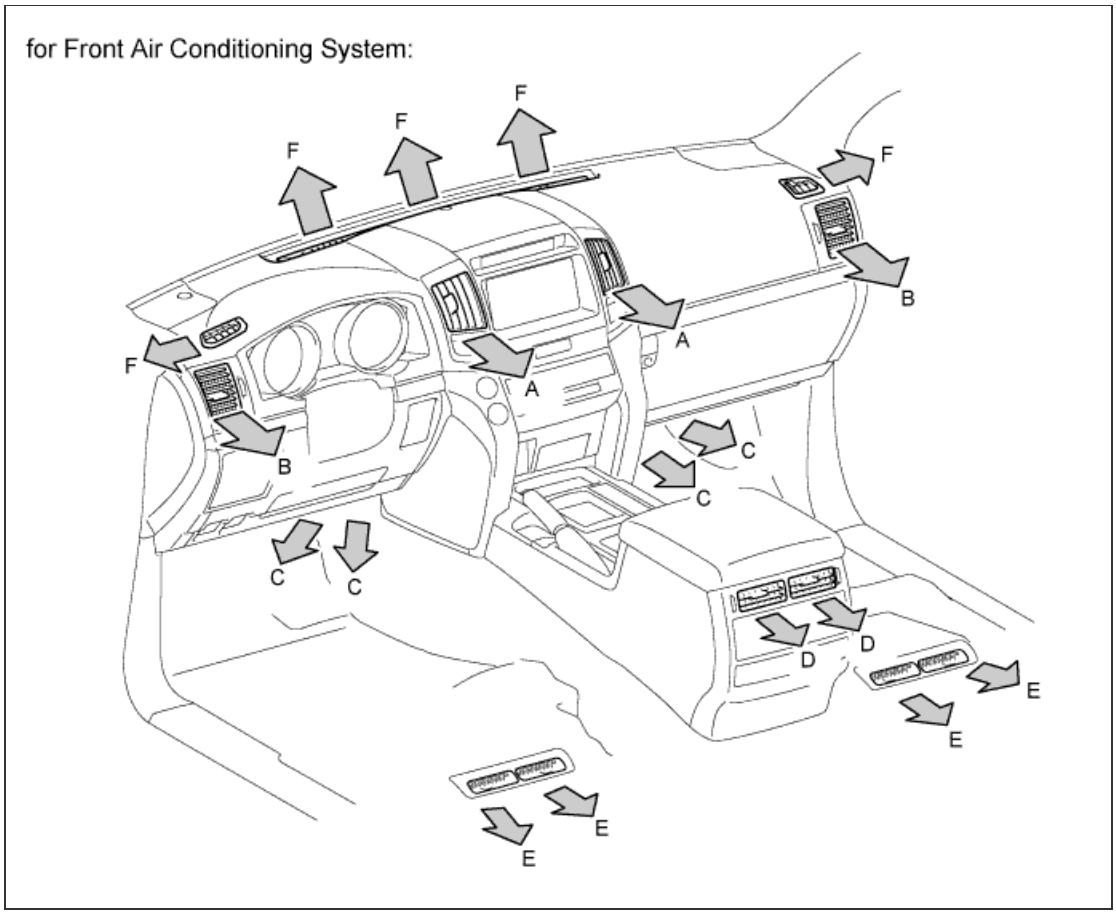


Function of Main Damper

Control Damper	Operation Position	Damper Position	Operation
Air Inlet Control Damper	Fresh	A	Brings in fresh air.
	Recirculation	B	Recirculates internal air.
Air Mix Control Damper	Max Cool to Max Hot	K, L, M	Varies the mixture ratio of cold air and hot air in order to regulate the temperature continuously from hot to cool.
Cool Air Bypass Control Damper	Max Cool to Max Hot	H, I, J	Cool air blows out from the front center register and side registers in order to adjust the temperature around the heads of the occupants during cooling or warming.
Mode Control Damper	Def	C	Defrosts the windshield through the center defroster.
	Foot/Def	D	Defrosts the windshield through the center defroster and side defroster while air is also blown out from the front and rear footwell register ducts. In addition, air blows out slightly from the front and rear center registers and side register.
	Foot	E	Air blows out of the front and rear footwell register duct, front and rear center register and side register. In addition, air blows out slightly from the center defroster and side defroster.
	Bi - Level	F	Air blows out of the center registers, side register, and rear center register to defrost the windshield. Air also blows out from the front and rear footwell register ducts.
		G	Air blows out of the center registers and side registers to defrost the windshield.

	Face		

for Rear Air Conditioning System:

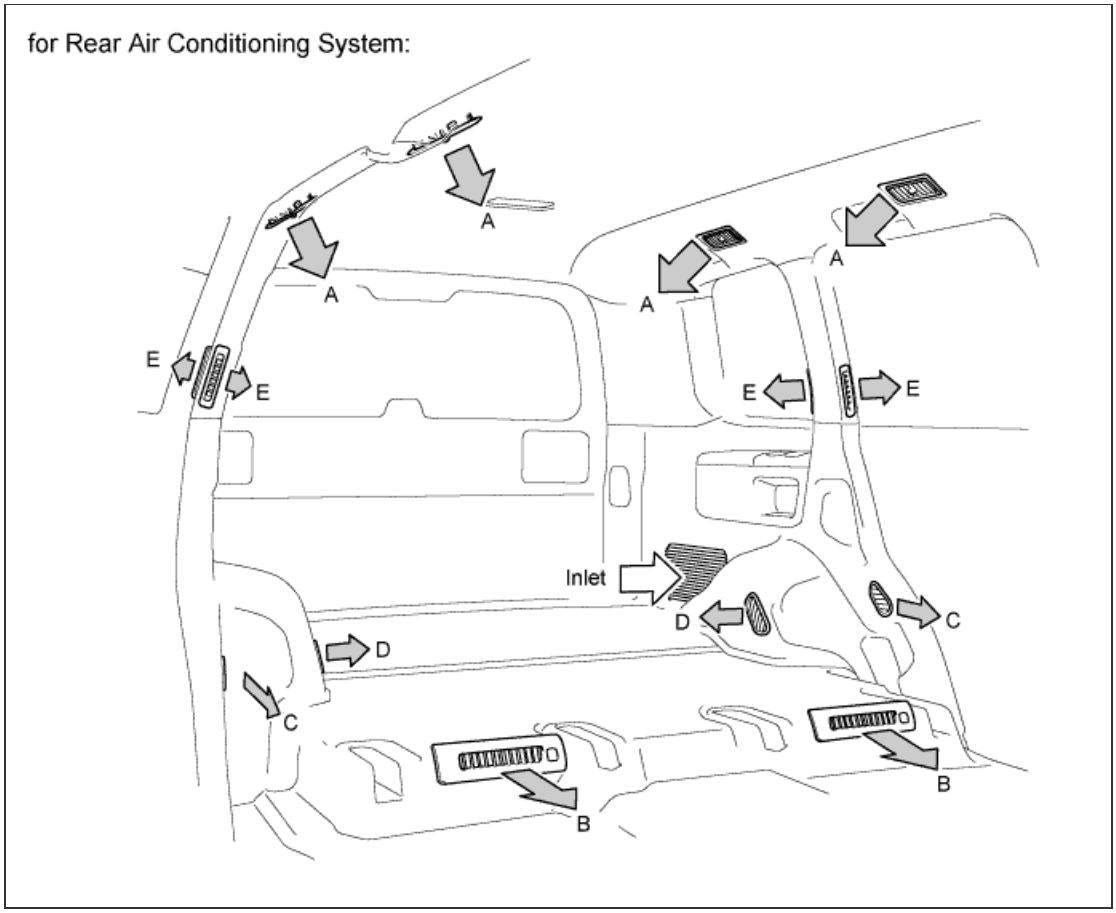


Function of Main Damper

Control Damper	Operation Position	Damper Position	Operation
Mode Control Damper	Face	A	Air blows out of the rear roof side register.
	Bi - Level	B	Air blows out of the rear roof side register and rear footwell register.
	Foot	C	Air blows out of the rear footwell register.
Air Mix Control Damper	Max Cool to Max Hot	D, E	Varies the mixture ratio of cold air and hot air in order to regulate the temperature continuously from hot to cool.

AIR OUTLETS AND AIRFLOW VOLUME

for Front Air Conditioning System:



Air Outlet Mode		Selectable Mode		Register		Register Duct			Defroster
		Automatic	Manual	Center	Side	Front Foot	Rear Face	Rear Foot	
				A	B	C	D	E	F
	FACE-U*1	○	○	◯	◯	-	◯	-	-
	FACE-L*2, *6	○	-	◯	◯	○	◯	-	-
	B/L-U*1	○	○	◯	◯	○	○	○	-
	B/L*2	○	-	◯	◯	◯	○	○	-
	FOOT F*3	○	-	○	○	◯	○	○	○
	FOOT R*4	○	○	○	○	◯	○	◯	○
	FOOT D*5	○	-	○	○	◯	○	◯	○
	F/D	○	○	○	○	◯	○	○	◯
	DEF	○	○	-	-	-	-	-	◯

HINT:

- **The si e of the circle in icates the proportion of airflow volume.**
- **: Greater airflow volume at the upper area.**
- **: Greater airflow volume at the lower area.**

- **: Greater airflow volume at the front.**
- **: Greater airflow volume at the rear foot.**
- **: Greater airflow volume at the efroster.**
- **: In contrast to FACE-U, a small amount of air comes out of the front footwell register uct.**

Air Outlet Mode		Register Duct				
		Roof	Rear Foot 1	Rear Side 2	Rear Foot 2	C Pillar
		A	B	C	D	E
	FACE	○	-	-	-	-
	BI-LEVEL	○	○	○	○	○
	FOOT	-	○	○	○	○

HINT:

The size of the circle indicates the proportion of airflow volume.

CUSTOMIZING FUNCTION WITH INTELLIGENT TESTER (REFERENCE)

NOTICE:

- **When the customer requests a change in a function, first make sure that the function can be customized.**
- **Be sure to make a note of the current settings before customizing.**
- **When troubleshooting a function, first make sure that the function is set to the default setting.**

a. Connect the intelligent tester to the DLC3.

b. Turn the engine switch on (IG).

c. Turn the intelligent tester on.

d. Enter the following menus: Customize Setting.

e. Select the setting by referring to the table below.

Air Conditioner

Display	Default	Contents	Setting
Set Temperature Shift	Normal	Function to set the temperature shift.	+2 C/+1 C/Normal/-1 C/-2 C
Compressor/Air Inlet DEF operation	Link	Function to automatically turn the A/C on when the FRONT DEF button is pressed.	Normal/Link
Compressor Mode	Automatic	Function to turn the A/C on automatically by pressing the AUTO button when the blower is on and the A/C is off.	Manual/Automatic
Air Inlet Mode	Automatic	Function to automatically change to recirculation mode when the A/C is turned on.	Manual/Automatic
Foot/DEF Auto Mode	ON	Function to turn the airflow from FOOT/DEF on automatically when auto mode is on.	ON/OFF
Foot/DEF Automatic Blow Up Function	ON	Function to change the blower level automatically when the defroster is on.	ON/OFF
Ambient Temperature Shift	Normal	Function to control the shifted ambient temperature in relation to the displayed ambient temperature.	+3 C/+2 C/+1 C/Normal/-1 C/-2 C/-3 C
Button Press Buzzer	ON	Function to sound a buzzer when a button is pressed.	ON/OFF
Add Foot Air in FACE Mode	ON	When the FACE mode is selected an additional amount of air blow to the foot area. Selecting OFF will cancel this additional air flow.	ON/OFF

for Preparation Click here

HINT:

- **Use the table below to help determine the cause of problem symptoms. If multiple suspected areas are listed, the potential causes of the symptoms are listed in order of probability in the "Suspected Area" column of the table. Check each symptom by checking the suspected areas in the order they are listed. Replace parts as necessary.**
- **Inspect the fuses and relays related to this system before inspecting the suspected areas below.**

CHECK AIR CONDITIONING AMPLIFIER (w Rear Heater)

a. Disconnect the E36, E35 and z53 air conditioning amplifier assembly connectors.

. Measure the voltage and resistance according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
E36-6 (+B1) - E36-1 (GND)	R - W-B	Battery power source	Always	11 to 14 V
E36-7 (+B2) - E36-1 (GND)	R - W-B	Battery power source	Always	11 to 14 V
z53-3 (B BUS) - z53-1 (BUS G)	-	Power supply for BUS IC (for front)	Always	11 to 14 V
z53-10 (B BUS) - z53-8 (BUS G)	-	Power supply for BUS IC (for front)	Always	11 to 14 V
E36-5 (IG+) - E36-1 (GND)	G - W-B	Ignition power supply	Engine switch on (IG)	11 to 14 V
			Engine switch off	Below 1 V
E36-14 (RBBU) - E36-12 (RBUG)	L - BR	Power supply for BUS IC (for rear)	Always	11 to 14 V
E35-25 (TR3) - Body ground	V - Body ground	Ground	Engine switch on (IG) Driver side duct sensor temperature: 25°C (77°F)	5000 +/-150 Ω
E35-26 (TR4) - Body ground	W - Body ground	Ground	Engine switch on (IG) Passenger side duct sensor temperature: 25°C (77°F)	5000 +/-150 Ω
E35-16 (SG-2) - Body ground	G - Body ground	Ground for pressure sensor	Always	Below 1 Ω
E35-29 (SG-5) - Body ground	G - Body ground	Ground for compressor signal	Always	Below 1 Ω
E36-2 (E1) - Body ground	W-B - Body ground	Ground	Always	Below 1 Ω
E36-1 (GND) - Body ground	W-B - Body ground	Ground	Always	Below 1 Ω
E35-6 (E2) - Body ground	W-B - Body ground	Ground	Always	Below 1 Ω
E35-32 (SG-1) - Body ground	B - Body ground	Ground for room temperature sensor (for front)	Always	Below 1 Ω
z53-6 (SGA) - Body ground	-	Ground for evaporator temperature sensor	Always	Below 1 Ω
z53-1 (BUS G) - Body ground	-	Ground for BUS IC (for front)	Always	Below 1 Ω
z53-8 (BUS G) - Body ground	-	Ground for BUS IC (for front)	Always	Below 1 Ω
E35-34 (SGND) - Body ground	BR - Body ground	Ground for duct sensor (for driver side)	Always	Below 1 Ω
E35-12 (SG-9) - Body		Ground for duct sensor		

ground	L - Body ground	(for passenger side)	Always	Below 1 Ω
E35-2 (SG-6) - Body ground	G - Body ground	Ground for room temperature sensor signal (for Rear LH and Rear RH)	Always	Below 1 Ω
E36-12 (RBUG) - Body ground	BR - Body ground	Ground for BUS IC (for rear)	Always	Below 1 Ω
E35-1 (SG) - Body ground	P - Body ground	Ground for evaporator temperature sensor signal (for Rear)	Always	Below 1 Ω

If the result is not as specified, there may be a malfunction on the wire harness side.

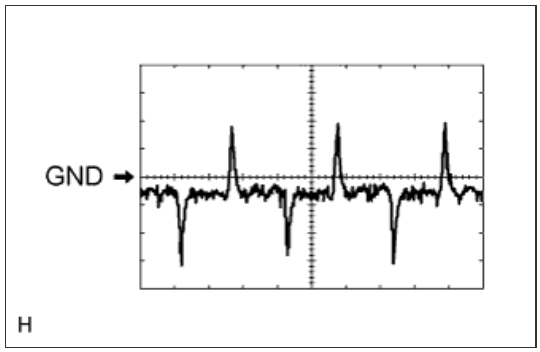
c. Reconnect the E36, E35 and z53 air conditioning amplifier assembly connectors.

d. Measure the voltage and waveform according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
E36-25 (CFN+) - Body ground	R - Body ground	Condenser FAN operation signal	Engine switch on (IG)	11 to 14 V
E36-33 (COOL) - Body ground	W - Body ground	Cool box operation signal	Engine switch on (IG) Cool box switch: ON	11 to 14 V
E36-29 (AC1) - Body ground	L - Body ground	Compressor operation signal	Engine switch on (IG) A/C switch: OFF	11 to 14 V
			Engine switch on (IG) A/C switch: ON	Below 1 V
E36-22 (ACT) - Body ground	G - Body ground	Compressor operation signal	Engine switch on (IG) A/C switch: OFF	Below 1 V
			Engine switch on (IG) A/C switch: ON	11 to 14 V
E35-28 (LOCK) - E35-29 (SG-5)	L - G	Air compressor lock sensor signal	Engine idling A/C switch: ON Blower switch LO	Pulse generation (see waveform 1)
E35-10 (TAM) - E35-16 (SG-2)	V - G	Ambient temperature sensor signal	Engine switch on (IG) Ambient temperature: 25°C (77°F)	1.6 to 1.8 V
			Engine switch on (IG) Ambient temperature: 50°C (122°F)	0.5 to 0.7 V
E35-27 (S5-1) - E35-16 (SG-2)	LG - G	Power supply for pressure sensor	Engine switch on (IG)	4.5 to 5.5 V
E35-20 (PRE) - E35-16 (SG-2)	R - G	Air conditioning pressure sensor signal	Refrigerant pressure: Normal	1.0 to 4.8 V
			Refrigerant pressure: Abnormal (less than 0.392 MPa [4.0 kgf/cm^2, 57 psi])	Below 1 V
			Refrigerant pressure: Abnormal (less than 3.187 MPa [32.5 kgf/cm^2, 463 psi])	4.8 V or higher
E36-18 (MGC) - E36-1 (GND)	R - W-B	A/C compressor magnetic clutch operation signal	Engine idling Blower switch LO A/C switch: ON	Below 1 V
E36-3 (BLW) - E36-1 (GND)	R - W-B	Blower motor control signal	Engine switch on (IG) Blower switch LO	Pulse generation (see waveform 2)
E35-9 (TR) - E35-32 (SG-1)	W - B	Room temperature sensor signal (for front)	Engine switch on (IG) Front side interior temperature: 25°C (77°F)	1.6 to 1.8 V
		Room temperature sensor signal (for front)	Engine switch on (IG) Front side interior temperature: 50°C (122°F)	0.5 to 0.7 V
E35-7 (TSD) - Body ground	LG - Body ground	Driver side solar sensor signal	Engine switch on (IG) Solar sensor subjected to electric light	0.8 to 4.3 V
E35-8 (TSP) - Body	GR - Body ground	Passenger side solar	Engine switch on (IG) Solar sensor subjected	0.8 to 4.3 V

ground		sensor signal	to electric light	
z53-7 (TEA) - z53-6 (SGA)	-	Evaporator temperature sensor signal	Engine switch on (IG) Evaporator temperature: 15°C (59°F)	1.4 to 1.8 V
z53-2 (BUS) - z53-1 (BUS G)	-	BUS IC control signal (for front)	Engine switch on (IG)	Pulse generation
z53-9 (BUS) - z53-8 (BUS G)	-	BUS IC control signal (for front)	Engine switch on (IG)	Pulse generation
E35-18 (TR) - E35-2 (SG-6)	R - G	Room temperature sensor signal (for Rear LH)	Engine switch on (IG) Vehicle interior temperature: 25°C (77°F)	1.6 to 1.8 V
			Engine switch on (IG) Vehicle interior temperature: 50°C (122°F)	0.5 to 0.7 V
E35-19 (TR7) - E35-2 (SG-6)	R - G	Room temperature sensor signal (for Rear RH)	Engine switch on (IG) Vehicle interior temperature: 25°C (77°F)	1.6 to 1.8 V
			Engine switch on (IG) Vehicle interior temperature: 50°C (122°F)	0.5 to 0.7 V
E36-13 (RBUS) - E36-12 (RBUG)	R - BR	BUS IC control signal (for rear)	Engine switch on (IG)	Pulse generation
E35-17 (TEC) - E35-1 (SG)	W - P	Evaporator temperature sensor signal (for Rear)	Engine switch on (IG) Evaporator temperature: 15°C (59°F)	1.4 to 1.8 V
E36-31 (ALT) - Body ground	R - Body ground	Generator signal	Engine idling	Pulse generation
E36-32 (SW1) - Body ground	BR - Body ground	Idle up operation signal	Engine switch on (IG) Idle up switch OFF	Below 1 V
			Engine switch on (IG) Idle up switch ON	11 to 14 V
E36-20 (LIN1) - E36-1 (GND)	Y - W-B	LIN communication signal (for Front A/C switch)	Engine switch on (IG)	Pulse generation
E36-21 (RLIN) - E36-1 (GND)	L - W-B	LIN communication signal (for Rear A/C switch)	Engine switch on (IG)	Pulse generation
E36-27 (PTC1) - Body ground	R - Body ground	PTC1 heater relay operation signal	Engine idling Set temperature: MAX HOT Engine coolant temperature: Below 65°C (149°F) Ambient temperature: Below 10°C (50°F) Blower switch off → LO	Below 1 V → 11 to 14 V
E36-26 (PTC2) - Body ground	R - Body ground	PTC2 heater relay operation signal		
E36-35 (PTC3) - Body ground	R - Body ground	PTC3 heater relay operation signal		
E36-17 (BLWH) - E36-1 (GND)	L - W-B	Blower motor control signal (for rear)	Engine switch on (IG) Blower switch LO	Pulse generation (see waveform 3)
E36-19 (RMGV) - E36-1 (GND)	B - W-B	Rear cooling unit expansion valve signal	Engine switch on (IG)	11 to 14 V

If the result is not as specified, the air conditioning amplifier assembly may have a malfunction.

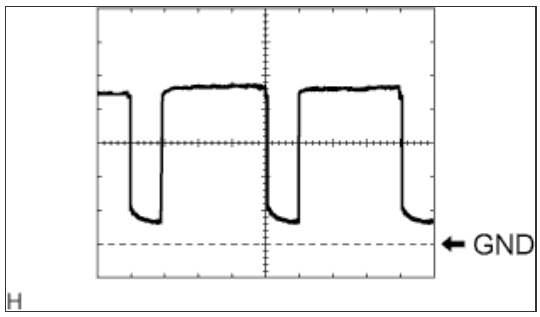


e. Using an oscilloscope, check waveform 1.

A/C Compressor Lock Sensor Signal

Item	Content
Terminal No. (Symbol)	E35-28 (LOCK) - E35-29 (SG-5)
Tool Setting	200 mV/DIV., 10 ms/DIV.
Condition	Engine running Blower switch LO A/C switch on

HINT:

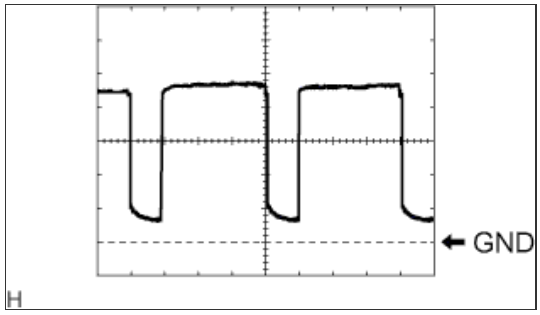


When the rear blower level is increased, the duty ratio changes accordingly.

f. sing an oscilloscope, chec waveform 2.

Blower Motor Control Signal

Item	Content
Terminal No. (Symbol)	E36-3 (BLW) - E36-1 (GND)
Tool Setting	1 V/DIV., 500 µs/DIV.
Condition	Engine switch on (IG) Blower switch LO

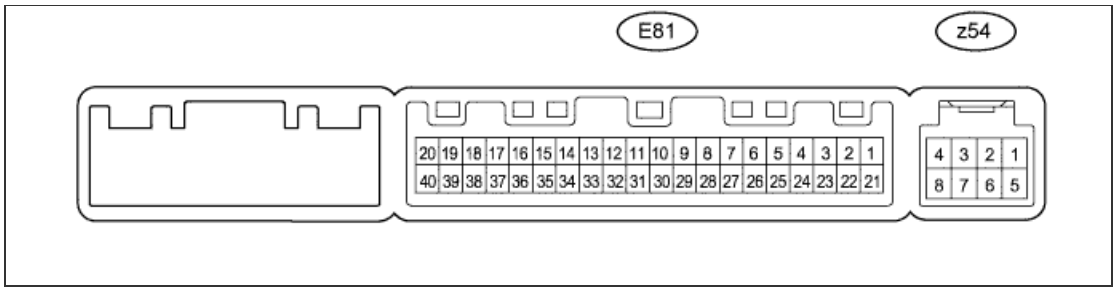


HINT:

When the blower level is increased, the duty ratio changes accordingly.

g. Using an oscilloscope, check waveform 3.

Rear Blower Motor Control Signal



Item	Content
Terminal No. (Symbol)	E36-17 (BLWH) - E36-1 (GND)
Tool Setting	1 V/DIV., 500 µs/DIV.
Condition	Engine switch on (IG) Blower switch LO

HINT:

When the rear blower level is increased, the duty ratio changes accordingly.

CHECK AIR CONDITIONING AMPLIFIER ASSEMBLY (w/o Rear Heater)

a. Disconnect the E81 and z54 air conditioning amplifier assembly connectors.

. Measure the resistance and voltage according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
E81-21 (+B1) - E81-14 (GND)	R - W-B	Battery power source	Always	11 to 14 V
z54-4 (B BUS) - z54-2 (BUS G)	-	Power supply for BUS IC (for front)	Always	11 to 14 V
E81-1 (IG+) - E81-14 (GND)	G - W-B	Ignition power supply	Engine switch on (IG)	11 to 14 V
			Engine switch off	Below 1 V
E81-35 (SG-5) - Body ground	G - Body ground	Ground for compressor signal	Always	Below 1 Ω
E81-13 (SG-2) - Body	G - Body ground	Ground for pressure	Always	Below 1 Ω

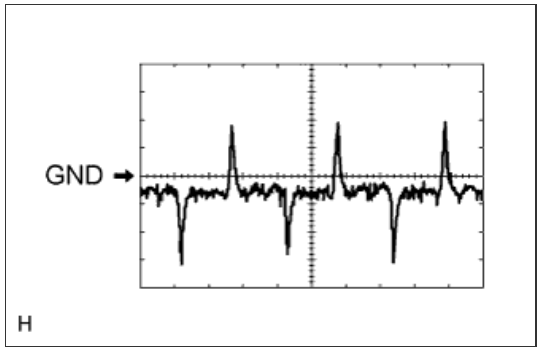
ground		sensor		
E81-14 (GND) - Body ground	W-B - Body ground	Ground	Always	Below 1 Ω
E81-34 (SG-1) - Body ground	B - Body ground	Ground for room temperature sensor (for front)	Always	Below 1 Ω
z54-5 (SGA) - Body ground	-	Ground for evaporator temperature sensor	Always	Below 1 Ω
z54-2 (B S G) - Body ground	-	Ground for B S IC (for front)	Always	Below 1 Ω

If the result is not as specified, there may be a malfunction on the wire harness side.

c. Reconnect the E81 and z54 air conditioning amplifier assembly connectors.

d. Measure the voltage and waveform according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
E81-8 (L C) - E81-35 (SG-5)	L - G	Air compressor loc sensor signal	Engine idling A/C switch N Blower switch L	ulse generation (see waveform 1)
E81-39 (CFN+) - Body ground	R - Body ground	Condenser FAN operation signal	Engine switch on (IG) A/C switch	elow 1 V
			Engine switch on (IG) A/C switch N	11 to 14 V
E81-15 (C) - Body ground	W - Body ground	Cool bo operation signal	Engine switch on (IG) Cool bo switch	elow 1 V
			Engine switch on (IG) Cool bo switch N	11 to 14 V
E81-17 (AC1) - Body ground	L - Body ground	Compressor operation signal	Engine switch on (IG) A/C switch	elow 1 V
			Engine switch on (IG) A/C switch N	11 to 14 V
E81-27 (ACT) - Body ground	G - Body ground	Compressor operation signal	Engine switch on (IG) A/C switch	elow 1 V
			Engine switch on (IG) A/C switch N	11 to 14 V
E81-5 (TAM) - E81-13 (SG-2)	V - G	Ambient temperature sensor signal	Engine switch on (IG) Ambient temperature 5 C (77)	1.6 to 1.8 V
			Engine switch on (IG) Ambient temperature: 50°C (122°F)	0.5 to 0.7 V
E81-30 (S5-1) - E81-13 (SG-2)	LG - G	Power supply for pressure sensor	Engine switch on (IG)	4.5 to 5.5 V
E81-9 (PRE) - E81-13 (SG-2)	R - G	Air conditioning pressure sensor signal	Refrigerant pressure: Normal	1.0 to 4.8 V
			Refrigerant pressure: Abnormal (less than 0.392 Mpa [4.0 kgf/cm^2, 57 psi]	Below 1 V
			Refrigerant pressure: Abnormal (less than 3.187 Mpa [32.5 kgf/cm^2, 463 psi]	4.8 V or higher
E81-20 (MGC) - E81-14 (GND)	R - W-B	A/C compressor magnetic clutch operation signal	Engine idling Blower switch LO A/C switch: ON	Below 1 V
E81-18 (RCRL) - E81-14 (GND)	B - Body ground	Rear cooler control relay operation signal	Engine switch on (IG) Rear blower switch OFF	Below 1 V
			Engine switch on (IG) Rear blower switch ON	11 to 14 V
E81-23 (BLW) - E81-14 (GND)	R - W-B	Blower motor control signal	Engine switch on (IG) Blower switch ON	Pulse generation (see waveform 2)
E81-29 (TR) - E81-34	W - B	Room temperature	Engine switch on (IG) Front side interior temperature: 25°C (77°F)	1.6 to 1.8 V



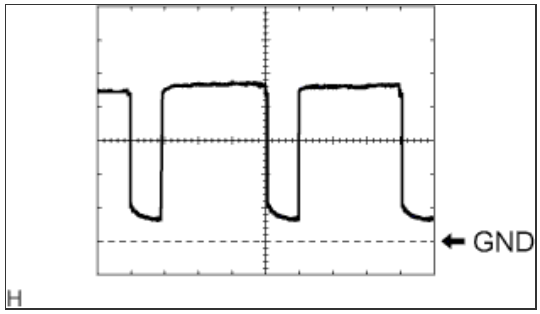
(SG-1)		sensor signal (for front)	Engine switch on (IG) Front side interior temperature 50 C (122)	0.5 to 0.7 V
E81-32 (TSP) - Body ground	GR - Body ground	Passenger side solar sensor signal	Engine switch on (IG) Solar sensor sub ected to electric light	0.8 to 4.3 V
E81-33 (TSD) - Body ground	LG - Body ground	Driver side solar sensor signal	Engine switch on (IG) Solar sensor sub ected to electric light	0.8 to 4.3 V
E81-36 (SW1) - Body ground	BR - Body ground	Idle up operation signal	Engine switch on (IG) Idle up switch OFF	Below 1 V
			Engine switch on (IG) Idle up switch ON	11 to 14 V
z54-6 (TEA) - z54-5 (SGA)	-	Evaporator temperature sensor signal	Engine switch on (IG) Evaporate temperature: 15°C (59°F)	1.4 to 1.8 V
z54-3 (BUS) - z54-2 (BUS G)	-	BUS IC control signal (for front)	Engine switch on (IG)	Pulse generation
E81-37 (LIN1) - E81-14 (GND)	Y - W-B	LIN communication signal	Engine switch on (IG)	Pulse generation
E81-25 (ALT) - Body ground	R - Body ground	Generator signal	Engine idling	Pulse generation
E81-3 (PTC1) - Body ground	R - Body ground	PTC1 heater relay operation signal	Engine idling Set temperature: MAX HOT Engine coolant temperature: Below 65°C (149°F) Ambient temperature: Below 10°C (50°F)	Below 1 V → 11 to 14 V
E81-22 (PTC2) - Body ground	R - Body ground	PTC2 heater relay operation signal		
E81-4 (PTC3) - Body ground	R - Body ground	PTC3 heater relay operation signal		
E81-24 (MGCA) - E81-14 (GND)	Y - W-B	Viscous with magnetic clutch operation signal	Engine idling Idle up switch ON	Below 1 V

If the result is not as specified, the air conditioning amplifier or fuse may have a malfunction.

e. Using an oscilloscope, check waveform 1.

A/C Compressor Lock Sensor Signal

Item	Content
Terminal No. (Symbol)	E81-8 (LOCK) - E81-35 (SG-5)
Tool Setting	200 mV/DIV., 10 ms/DIV.
Condition	Engine running Blower switch LO A/C switch on

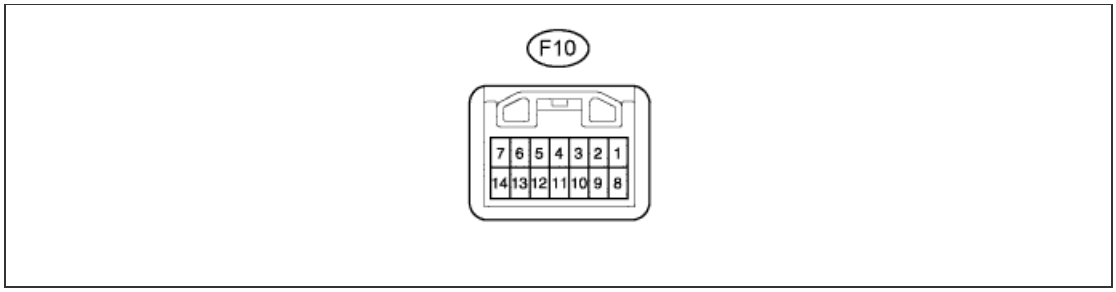


HINT:

When the rear blower level is increased, the duty ratio changes accordingly.

f. Using an oscilloscope, check waveform 2.

Blower Motor Control Signal



Item	Content
Terminal No. (Symbol)	E81-23 (BLW) - E81-14 (GND)
Tool Setting	1 V/DIV., 500 µs/DIV.
Condition	Engine switch on (IG) Blower switch LO

HINT:

When the blower level is increased, the duty ratio changes accordingly.

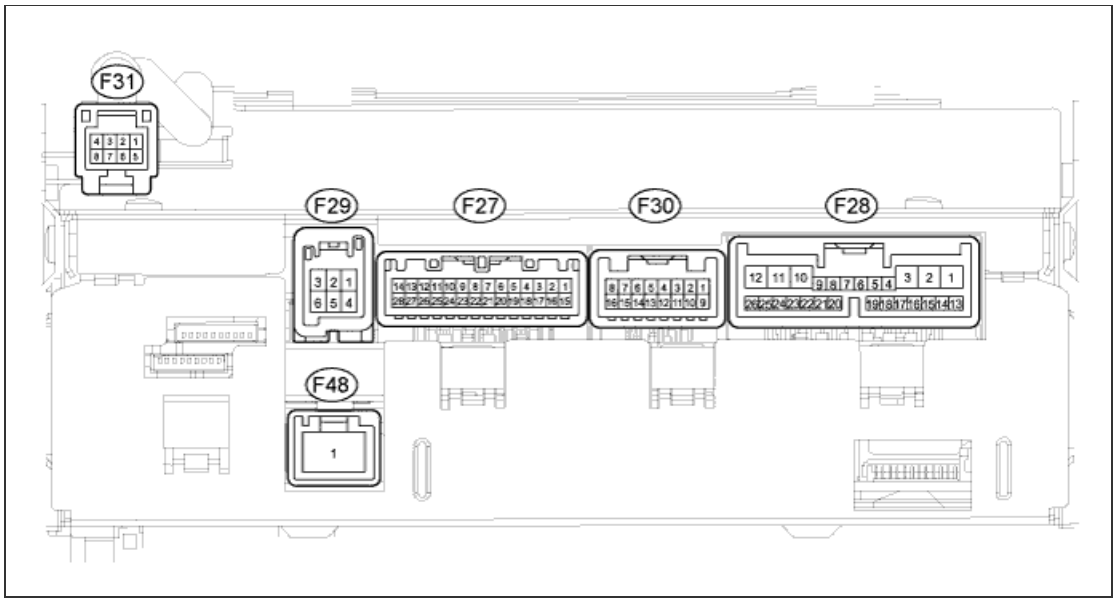
CHECK AIR CONDITIONING CONTROL ASSEMBLY (w/o M lti-display)

a. Disconnect the F10 air conditioning control assembly connector.

. Measure the resistance and voltage according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
F10-7 (IG+) - F10-1 (GND)	G - W-B	Ignition power supply	Engine switch on (IG)	11 to 14 V
			Engine switch off	Below 1 V
F10-1 (GND) - Body ground	W-B - Body ground	Ground	Always	Below 1 Ω

If the result is not as specified, there may be a malfunction on the wire harness side.



c. Reconnect the F10 air conditioning control assembly connector.

d. Measure the resistance and voltage according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
F10-12 (DTP+) - F10-1 (GND)	R - W-B	Temperature up switch signal	Switch not pressed	Below 1 V
			Switch pressed	Alternating between 3.5 V or higher and below 1 V
F10-10 (PTP+) - F10-1 (GND)	L - W-B	Temperature up switch signal	Switch not pressed	Below 1 V
			Switch pressed	Alternating between 3.5 V or higher and below 1 V
F10-9 (S5) - F10-1 (GND)	B - W-B	Signal ground	Always	Below 1 Ω
F10-11 (DTP-) - F10-1 (GND)	G - W-B	Temperature down switch signal	Switch not pressed	Below 1 V
			Switch pressed	Alternating between 3.5 V or higher and below 1 V
F10-3 (PTP-) - F10-1 (GND)	W - W-B	Temperature down switch signal	Switch not pressed	Below 1 V
			Switch pressed	Alternating between 3.5 V or higher and below 1 V
F10-2 (SG) - F10-1 (GND)	GR - W-B	Signal ground	Always	Below 1 Ω

If the result is not as specified, the air conditioning control assembly may have a malfunction.

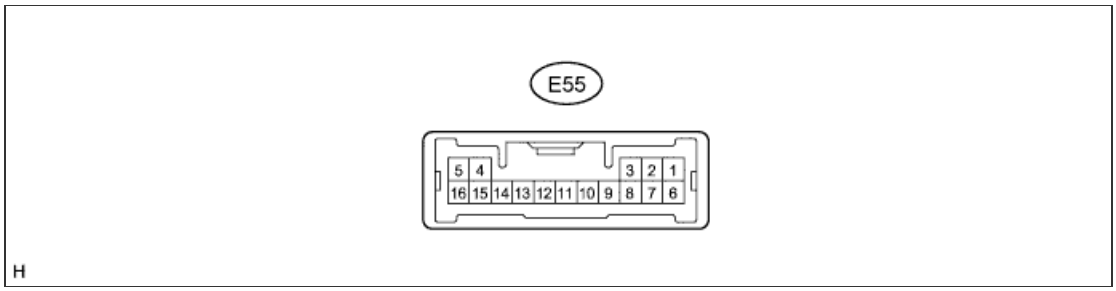
CHECK MULTI-DISPLAY (w/ M lti-display)

a. Disconnect the F28 multi-display connector.

. Measure the resistance and voltage according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
F28-3 (IG) - F28-10 (GND1)	G - W-B	Ignition power supply	Engine switch on (IG)	11 to 14 V
			Engine switch off	Below 1 V
F28-1 (+B1) - F28-10 (GND1)	R - W-B	Battery power source	Always	11 to 14 V
F28-10 (GND1) - Body ground	W-B - Body ground	Ground	Always	Below 1 Ω

If the result is not as specified, there may be a malfunction on the wire harness side.



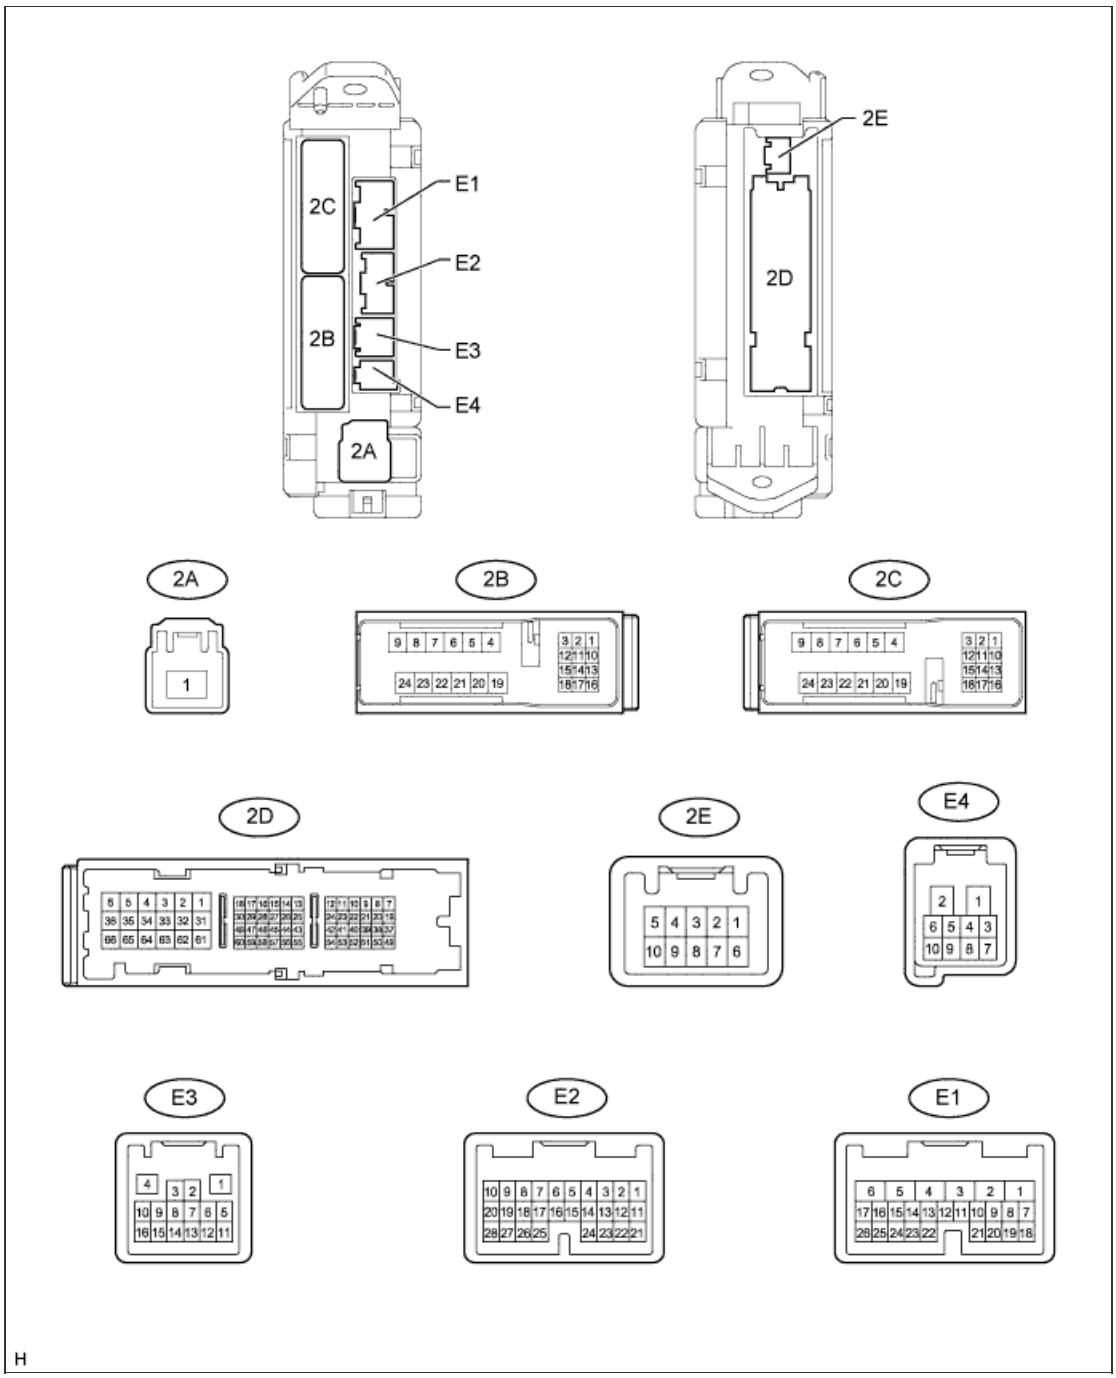
c. Reconnect the F28 multi-display connector.

d. Measure the resistance and voltage according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
F31-2 (TEC+) - F28-10 (GND1)	R - W-B	Temperature up switch signal	Switch not pressed	Below 1 V
			Switch pressed	Alternating between 3.5 V or higher and below 1 V
F31-3 (TES+) - F28-10 (GND1)	L - W-B	Temperature up switch signal	Switch not pressed	Below 1 V
			Switch pressed	Alternating between 3.5 V or higher and below 1 V
F31-5 (AGND) - F28-10 (GND1)	B - N-B	Signal ground	Always	Below 1 Ω
F31-6 (TEC-) - F28-10 (GND1)	G - W-B	Temperature down switch signal	Switch not pressed	Below 1 V
			Switch pressed	Alternating between 3.5 V or higher and below 1 V
F31-7 (TES-) - F28-10 (GND1)	W - W-B	Temperature down switch signal	Switch not pressed	Below 1 V
			Switch pressed	Alternating between 3.5 V or higher and below 1 V
F31-8 (BGND) - F28-10 (GND1)	GR - W-B	Signal ground	Always	Below 1 Ω

If the result is not as specified, the multi-display may have a malfunction.

CHECK NO. 2 AIR CONDITIONING CONTROL ASSEMBLY



a. Disconnect the E55 switch connector.

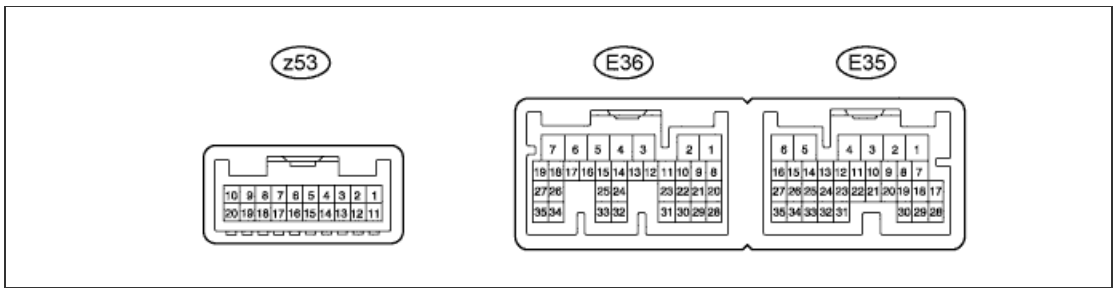
. Measure the resistance and voltage according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
E55-6 (IG) - E55-1 (E)	G - W-B	Ignition power supply	Always	11 to 14 V
E55-1 (E) - Body ground	W-B - Body ground	Ground	Always	Below 1 Ω

If the result is not as specified, there may be a malfunction on the wire harness side.

CHECK MAIN BODY ECU (COWL SIDE UNCTION BLOCK LH)

a. Disconnect the 2B, 2D, and E3 EC connectors.



. Measure the voltage and resistance according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
2B-20 (BATB) - Body ground	L - Body ground	Battery power supply	Always	11 to 14 V
2A-1 (ACC) - Body ground	GR - Body ground	ACC power supply	Engine switch on (ACC)	11 to 14 V
2A-1 (ACC) - Body ground	GR - Body ground	ACC power supply	Engine switch off	Below 1 V
2D-62 (GND2) - Body ground	W-B - Body ground	Ground	Always	Below 1 Ω

If the result is not as specified, there may be a malfunction in the wire harness.

for Preparation Click here

CHECK AIR CONDITIONING AMPLIFIER (w/ Rear Heater)

a. Disconnect the E36, E35 and z53 air conditioning amplifier assembly connectors.

. Measure the voltage and resistance according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
E36-6 (+B1) - E36-1 (GND)	R - W-B	Battery power source	Always	11 to 14 V
E36-7 (+B2) - E36-1 (GND)	R - W-B	Battery power source	Always	11 to 14 V
z53-3 (B BUS) - z53-1 (BUS G)	-	Power supply for BUS IC (for front)	Always	11 to 14 V
z53-10 (B BUS) - z53-8 (BUS G)	-	Power supply for BUS IC (for front)	Always	11 to 14 V
E36-5 (IG+) - E36-1 (GND)	G - W-B	Ignition power supply	Engine switch on (IG)	11 to 14 V
			Engine switch off	Below 1 V
E36-14 (RBBU) - E36-12 (RBUG)	L - BR	Power supply for BUS IC (for rear)	Always	11 to 14 V
E35-25 (TR3) - Body ground	V - Body ground	Ground	Engine switch on (IG) Driver side duct sensor temperature: 25°C (77°F)	5000 +/-150 Ω
E35-26 (TR4) - Body ground	W - Body ground	Ground	Engine switch on (IG) Passenger side duct sensor temperature: 25°C (77°F)	5000 +/-150 Ω
E35-16 (SG-2) - Body ground	G - Body ground	Ground for pressure sensor	Always	Below 1 Ω
E35-29 (SG-5) - Body ground	G - Body ground	Ground for compressor signal	Always	Below 1 Ω
E36-2 (E1) - Body ground	W-B - Body ground	Ground	Always	Below 1 Ω
E36-1 (GND) - Body ground	W-B - Body ground	Ground	Always	Below 1 Ω
E35-6 (E2) - Body ground	W-B - Body ground	Ground	Always	Below 1 Ω
E35-32 (SG-1) - Body ground	B - Body ground	Ground for room temperature sensor (for front)	Always	Below 1 Ω
z53-6 (SGA) - Body ground	-	Ground for evaporator temperature sensor	Always	Below 1 Ω
z53-1 (BUS G) - Body ground	-	Ground for BUS IC (for front)	Always	Below 1 Ω
z53-8 (BUS G) - Body ground	-	Ground for BUS IC (for front)	Always	Below 1 Ω
E35-34 (SGND) - Body ground	BR - Body ground	Ground for duct sensor (for driver side)	Always	Below 1 Ω
E35-12 (SG-9) - Body		Ground for duct sensor		

ground	L - Body ground	(for passenger side)	Always	Below 1 Ω
E35-2 (SG-6) - Body ground	G - Body ground	Ground for room temperature sensor signal (for Rear LH and Rear RH)	Always	Below 1 Ω
E36-12 (RBUG) - Body ground	BR - Body ground	Ground for BUS IC (for rear)	Always	Below 1 Ω
E35-1 (SG) - Body ground	P - Body ground	Ground for evaporator temperature sensor signal (for Rear)	Always	Below 1 Ω

If the result is not as specified, there may be a malfunction on the wire harness side.

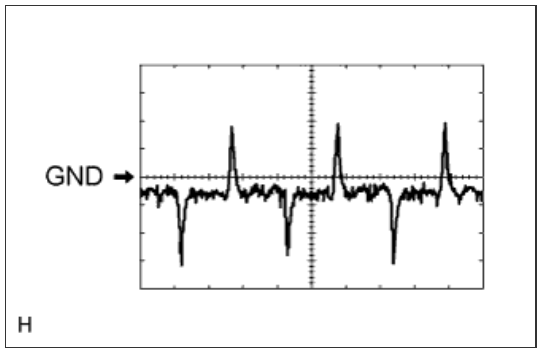
c. Reconnect the E36, E35 and z53 air conditioning amplifier assembly connectors.

d. Measure the voltage and waveform according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
E36-25 (CFN+) - Body ground	R - Body ground	Condenser FAN operation signal	Engine switch on (IG)	11 to 14 V
E36-33 (COOL) - Body ground	W - Body ground	Cool box operation signal	Engine switch on (IG) Cool box switch: ON	11 to 14 V
E36-29 (AC1) - Body ground	L - Body ground	Compressor operation signal	Engine switch on (IG) A/C switch: OFF	11 to 14 V
			Engine switch on (IG) A/C switch: ON	Below 1 V
E36-22 (ACT) - Body ground	G - Body ground	Compressor operation signal	Engine switch on (IG) A/C switch: OFF	Below 1 V
			Engine switch on (IG) A/C switch: ON	11 to 14 V
E35-28 (LOCK) - E35-29 (SG-5)	L - G	Air compressor lock sensor signal	Engine idling A/C switch: ON Blower switch LO	Pulse generation (see waveform 1)
E35-10 (TAM) - E35-16 (SG-2)	V - G	Ambient temperature sensor signal	Engine switch on (IG) Ambient temperature: 25°C (77°F)	1.6 to 1.8 V
			Engine switch on (IG) Ambient temperature: 50°C (122°F)	0.5 to 0.7 V
E35-27 (S5-1) - E35-16 (SG-2)	LG - G	Power supply for pressure sensor	Engine switch on (IG)	4.5 to 5.5 V
E35-20 (PRE) - E35-16 (SG-2)	R - G	Air conditioning pressure sensor signal	Refrigerant pressure: Normal	1.0 to 4.8 V
			Refrigerant pressure: Abnormal (less than 0.392 MPa [4.0 kgf/cm^2, 57 psi])	Below 1 V
			Refrigerant pressure: Abnormal (less than 3.187 MPa [32.5 kgf/cm^2, 463 psi])	4.8 V or higher
E36-18 (MGC) - E36-1 (GND)	R - W-B	A/C compressor magnetic clutch operation signal	Engine idling Blower switch LO A/C switch: ON	Below 1 V
E36-3 (BLW) - E36-1 (GND)	R - W-B	Blower motor control signal	Engine switch on (IG) Blower switch LO	Pulse generation (see waveform 2)
E35-9 (TR) - E35-32 (SG-1)	W - B	Room temperature sensor signal (for front)	Engine switch on (IG) Front side interior temperature: 25°C (77°F)	1.6 to 1.8 V
		Room temperature sensor signal (for front)	Engine switch on (IG) Front side interior temperature: 50°C (122°F)	0.5 to 0.7 V
E35-7 (TSD) - Body ground	LG - Body ground	Driver side solar sensor signal	Engine switch on (IG) Solar sensor subjected to electric light	0.8 to 4.3 V
E35-8 (TSP) - Body	GR - Body ground	Passenger side solar	Engine switch on (IG) Solar sensor subjected	0.8 to 4.3 V

ground		sensor signal	to electric light	
z53-7 (TEA) - z53-6 (SGA)	-	Evaporator temperature sensor signal	Engine switch on (IG) Evaporator temperature: 15°C (59°F)	1.4 to 1.8 V
z53-2 (BUS) - z53-1 (BUS G)	-	BUS IC control signal (for front)	Engine switch on (IG)	Pulse generation
z53-9 (BUS) - z53-8 (BUS G)	-	BUS IC control signal (for front)	Engine switch on (IG)	Pulse generation
E35-18 (TR) - E35-2 (SG-6)	R - G	Room temperature sensor signal (for Rear LH)	Engine switch on (IG) Vehicle interior temperature: 25°C (77°F)	1.6 to 1.8 V
			Engine switch on (IG) Vehicle interior temperature: 50°C (122°F)	0.5 to 0.7 V
E35-19 (TR7) - E35-2 (SG-6)	R - G	Room temperature sensor signal (for Rear RH)	Engine switch on (IG) Vehicle interior temperature: 25°C (77°F)	1.6 to 1.8 V
			Engine switch on (IG) Vehicle interior temperature: 50°C (122°F)	0.5 to 0.7 V
E36-13 (RBUS) - E36-12 (RBUG)	R - BR	BUS IC control signal (for rear)	Engine switch on (IG)	Pulse generation
E35-17 (TEC) - E35-1 (SG)	W - P	Evaporator temperature sensor signal (for Rear)	Engine switch on (IG) Evaporator temperature: 15°C (59°F)	1.4 to 1.8 V
E36-31 (ALT) - Body ground	R - Body ground	Generator signal	Engine idling	Pulse generation
E36-32 (SW1) - Body ground	BR - Body ground	Idle up operation signal	Engine switch on (IG) Idle up switch OFF	Below 1 V
			Engine switch on (IG) Idle up switch ON	11 to 14 V
E36-20 (LIN1) - E36-1 (GND)	Y - W-B	LIN communication signal (for Front A/C switch)	Engine switch on (IG)	Pulse generation
E36-21 (RLIN) - E36-1 (GND)	L - W-B	LIN communication signal (for Rear A/C switch)	Engine switch on (IG)	Pulse generation
E36-27 (PTC1) - Body ground	R - Body ground	PTC1 heater relay operation signal	Engine idling Set temperature: MAX HOT Engine coolant temperature: Below 65°C (149°F) Ambient temperature: Below 10°C (50°F) Blower switch off → LO	Below 1 V → 11 to 14 V
E36-26 (PTC2) - Body ground	R - Body ground	PTC2 heater relay operation signal		
E36-35 (PTC3) - Body ground	R - Body ground	PTC3 heater relay operation signal		
E36-17 (BLWH) - E36-1 (GND)	L - W-B	Blower motor control signal (for rear)	Engine switch on (IG) Blower switch LO	Pulse generation (see waveform 3)
E36-19 (RMGV) - E36-1 (GND)	B - W-B	Rear cooling unit expansion valve signal	Engine switch on (IG)	11 to 14 V

If the result is not as specified, the air conditioning amplifier assembly may have a malfunction.

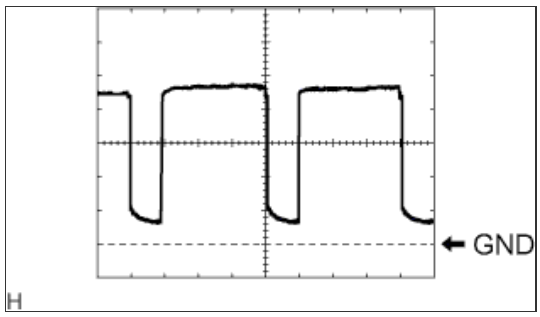


e. Using an oscilloscope, check waveform 1.

A/C Compressor Lock Sensor Signal

Item	Content
Terminal No. (Symbol)	E35-28 (LOCK) - E35-29 (SG-5)
Tool Setting	200 mV/DIV., 10 ms/DIV.
Condition	Engine running Blower switch LO A/C switch on

HINT:

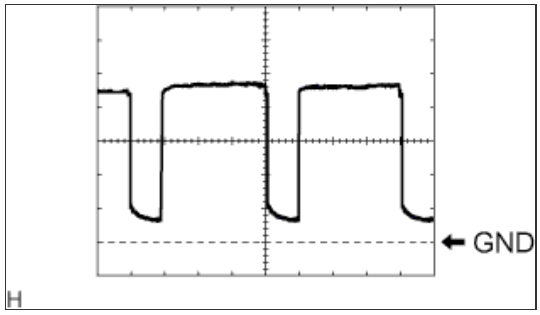


When the rear blower level is increased, the duty ratio changes accordingly.

f. sing an oscilloscope, chec waveform 2.

Blower Motor Control Signal

Item	Content
Terminal No. (Symbol)	E36-3 (BLW) - E36-1 (GND)
Tool Setting	1 V/DIV., 500 µs/DIV.
Condition	Engine switch on (IG) Blower switch LO

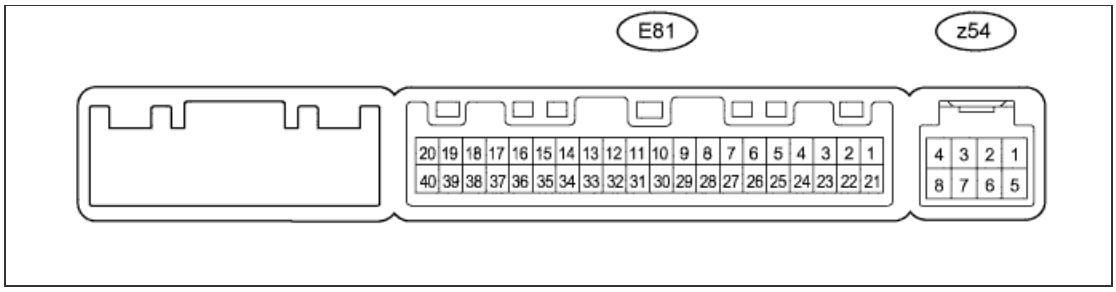


HINT:

When the blower level is increased, the duty ratio changes accordingly.

g. Using an oscilloscope, check waveform 3.

Rear Blower Motor Control Signal



Item	Content
Terminal No. (Symbol)	E36-17 (BLWH) - E36-1 (GND)
Tool Setting	1 V/DIV., 500 µs/DIV.
Condition	Engine switch on (IG) Blower switch LO

HINT:

When the rear blower level is increased, the duty ratio changes accordingly.

CHECK AIR CONDITIONING AMPLIFIER ASSEMBLY (w/o Rear Heater)

a. Disconnect the E81 and z54 air conditioning amplifier assembly connectors.

. Measure the resistance and voltage according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
E81-21 (+B1) - E81-14 (GND)	R - W-B	Battery power source	Always	11 to 14 V
z54-4 (B BUS) - z54-2 (BUS G)	-	Power supply for BUS IC (for front)	Always	11 to 14 V
E81-1 (IG+) - E81-14 (GND)	G - W-B	Ignition power supply	Engine switch on (IG)	11 to 14 V
			Engine switch off	Below 1 V
E81-35 (SG-5) - Body ground	G - Body ground	Ground for compressor signal	Always	Below 1 Ω
E81-13 (SG-2) - Body	G - Body ground	Ground for pressure	Always	Below 1 Ω

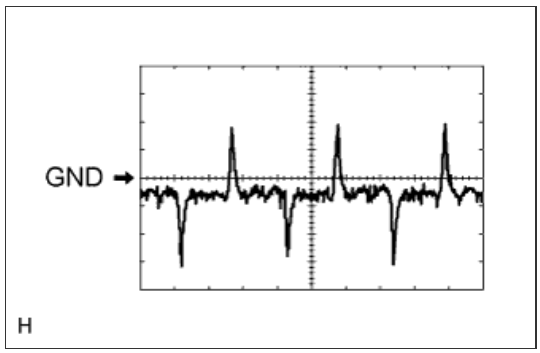
ground		sensor		
E81-14 (GND) - Body ground	W-B - Body ground	Ground	Always	Below 1 Ω
E81-34 (SG-1) - Body ground	B - Body ground	Ground for room temperature sensor (for front)	Always	Below 1 Ω
z54-5 (SGA) - Body ground	-	Ground for evaporator temperature sensor	Always	Below 1 Ω
z54-2 (B S G) - Body ground	-	Ground for B S IC (for front)	Always	Below 1 Ω

If the result is not as specified, there may be a malfunction on the wire harness side.

c. Reconnect the E81 and z54 air conditioning amplifier assembly connectors.

d. Measure the voltage and waveform according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
E81-8 (L C) - E81-35 (SG-5)	L - G	Air compressor loc sensor signal	Engine idling A/C switch N Blower switch L	ulse generation (see waveform 1)
E81-39 (CFN+) - Body ground	R - Body ground	Condenser FAN operation signal	Engine switch on (IG) A/C switch	elow 1 V
			Engine switch on (IG) A/C switch N	11 to 14 V
E81-15 (C) - Body ground	W - Body ground	Cool bo operation signal	Engine switch on (IG) Cool bo switch	elow 1 V
			Engine switch on (IG) Cool bo switch N	11 to 14 V
E81-17 (AC1) - Body ground	L - Body ground	Compressor operation signal	Engine switch on (IG) A/C switch	elow 1 V
			Engine switch on (IG) A/C switch N	11 to 14 V
E81-27 (ACT) - Body ground	G - Body ground	Compressor operation signal	Engine switch on (IG) A/C switch	elow 1 V
			Engine switch on (IG) A/C switch N	11 to 14 V
E81-5 (TAM) - E81-13 (SG-2)	V - G	Ambient temperature sensor signal	Engine switch on (IG) Ambient temperature 5 C (77)	1.6 to 1.8 V
			Engine switch on (IG) Ambient temperature: 50°C (122°F)	0.5 to 0.7 V
E81-30 (S5-1) - E81-13 (SG-2)	LG - G	Power supply for pressure sensor	Engine switch on (IG)	4.5 to 5.5 V
E81-9 (PRE) - E81-13 (SG-2)	R - G	Air conditioning pressure sensor signal	Refrigerant pressure: Normal	1.0 to 4.8 V
			Refrigerant pressure: Abnormal (less than 0.392 MPa [4.0 kgf/cm^2, 57 psi])	Below 1 V
			Refrigerant pressure: Abnormal (less than 3.187 MPa [32.5 kgf/cm^2, 463 psi])	4.8 V or higher
E81-20 (MGC) - E81-14 (GND)	R - W-B	A/C compressor magnetic clutch operation signal	Engine idling Blower switch LO A/C switch: ON	Below 1 V
E81-18 (RCRL) - E81-14 (GND)	B - Body ground	Rear cooler control relay operation signal	Engine switch on (IG) Rear blower switch OFF	Below 1 V
			Engine switch on (IG) Rear blower switch ON	11 to 14 V
E81-23 (BLW) - E81-14 (GND)	R - W-B	Blower motor control signal	Engine switch on (IG) Blower switch ON	Pulse generation (see waveform 2)
E81-29 (TR) - E81-34	W - B	Room temperature	Engine switch on (IG) Front side interior temperature: 25°C (77°F)	1.6 to 1.8 V



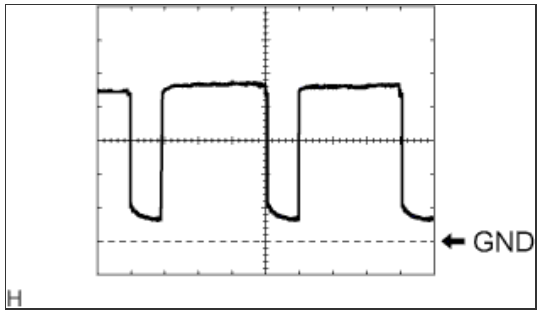
(SG-1)		sensor signal (for front)	Engine switch on (IG) Front side interior temperature 50 C (122)	0.5 to 0.7 V
E81-32 (TSP) - Body ground	GR - Body ground	Passenger side solar sensor signal	Engine switch on (IG) Solar sensor sub ected to electric light	0.8 to 4.3 V
E81-33 (TSD) - Body ground	LG - Body ground	Driver side solar sensor signal	Engine switch on (IG) Solar sensor sub ected to electric light	0.8 to 4.3 V
E81-36 (SW1) - Body ground	BR - Body ground	Idle up operation signal	Engine switch on (IG) Idle up switch OFF	Below 1 V
			Engine switch on (IG) Idle up switch ON	11 to 14 V
z54-6 (TEA) - z54-5 (SGA)	-	Evaporator temperature sensor signal	Engine switch on (IG) Evaporate temperature: 15°C (59°F)	1.4 to 1.8 V
z54-3 (BUS) - z54-2 (BUS G)	-	BUS IC control signal (for front)	Engine switch on (IG)	Pulse generation
E81-37 (LIN1) - E81-14 (GND)	Y - W-B	LIN communication signal	Engine switch on (IG)	Pulse generation
E81-25 (ALT) - Body ground	R - Body ground	Generator signal	Engine idling	Pulse generation
E81-3 (PTC1) - Body ground	R - Body ground	PTC1 heater relay operation signal	Engine idling Set temperature: MAX HOT Engine coolant temperature: Below 65°C (149°F) Ambient temperature: Below 10°C (50°F)	Below 1 V → 11 to 14 V
E81-22 (PTC2) - Body ground	R - Body ground	PTC2 heater relay operation signal		
E81-4 (PTC3) - Body ground	R - Body ground	PTC3 heater relay operation signal		
E81-24 (MGCA) - E81-14 (GND)	Y - W-B	Viscous with magnetic clutch operation signal	Engine idling Idle up switch ON	Below 1 V

If the result is not as specified, the air conditioning amplifier or fuse may have a malfunction.

e. Using an oscilloscope, check waveform 1.

A/C Compressor Lock Sensor Signal

Item	Content
Terminal No. (Symbol)	E81-8 (LOCK) - E81-35 (SG-5)
Tool Setting	200 mV/DIV., 10 ms/DIV.
Condition	Engine running Blower switch LO A/C switch on

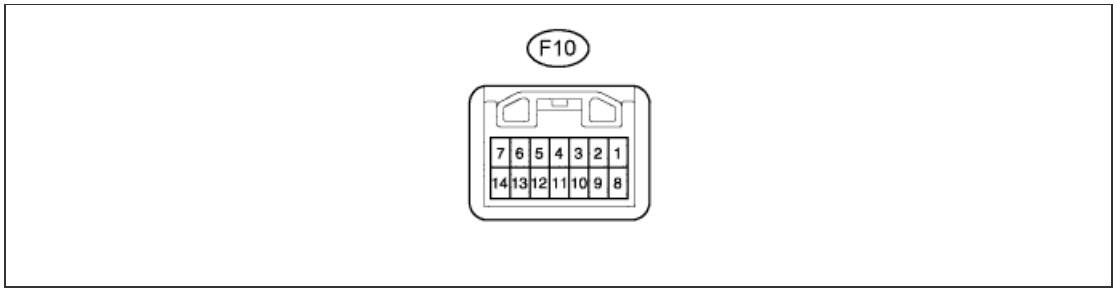


HINT:

When the rear blower level is increased, the duty ratio changes accordingly.

f. Using an oscilloscope, check waveform 2.

Blower Motor Control Signal



Item	Content
Terminal No. (Symbol)	E81-23 (BLW) - E81-14 (GND)
Tool Setting	1 V/DIV., 500 µs/DIV.
Condition	Engine switch on (IG) Blower switch LO

HINT:

When the blower level is increased, the duty ratio changes accordingly.

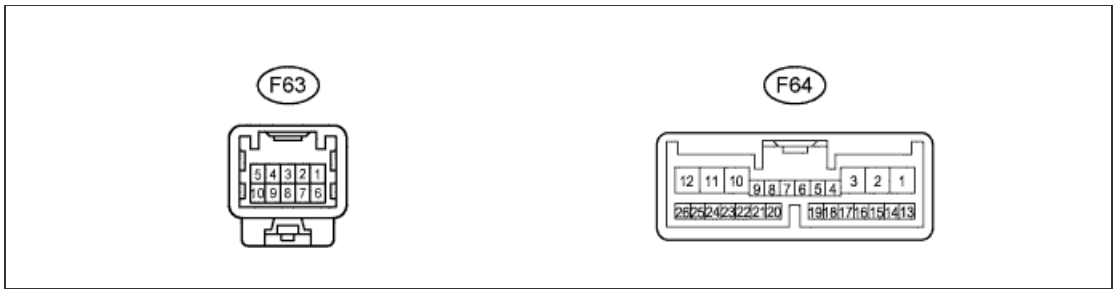
CHECK AIR CONDITIONING CONTROL ASSEMBLY (w/o Navigation System)

a. Disconnect the F10 air conditioning control assembly connector.

. Measure the resistance and voltage according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
F10-7 (IG+) - F10-1 (GND)	G - W-B	Ignition power supply	Engine switch on (IG)	11 to 14 V
			Engine switch off	Below 1 V
F10-1 (GND) - Body ground	W-B - Body ground	Ground	Always	Below 1 Ω

If the result is not as specified, there may be a malfunction on the wire harness side.



c. Reconnect the F10 air conditioning control assembly connector.

d. Measure the resistance and voltage according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
F10-12 (DTP+) - F10-1 (GND)	R - W-B	Temperature up switch signal	Switch not pressed	Below 1 V
			Switch pressed	Alternating between 3.5 V or higher and below 1 V
F10-10 (PTP+) - F10-1 (GND)	L - W-B	Temperature up switch signal	Switch not pressed	Below 1 V
			Switch pressed	Alternating between 3.5 V or higher and below 1 V
F10-9 (S5) - F10-1 (GND)	B - W-B	Signal ground	Always	Below 1 Ω
F10-11 (DTP-) - F10-1 (GND)	G - W-B	Temperature down switch signal	Switch not pressed	Below 1 V
			Switch pressed	Alternating between 3.5 V or higher and below 1 V
F10-3 (PTP-) - F10-1 (GND)	W - W-B	Temperature down switch signal	Switch not pressed	Below 1 V
			Switch pressed	Alternating between 3.5 V or higher and below 1 V
F10-2 (SG) - F10-1 (GND)	GR - W-B	Signal ground	Always	Below 1 Ω

If the result is not as specified, the air conditioning control assembly may have a malfunction.

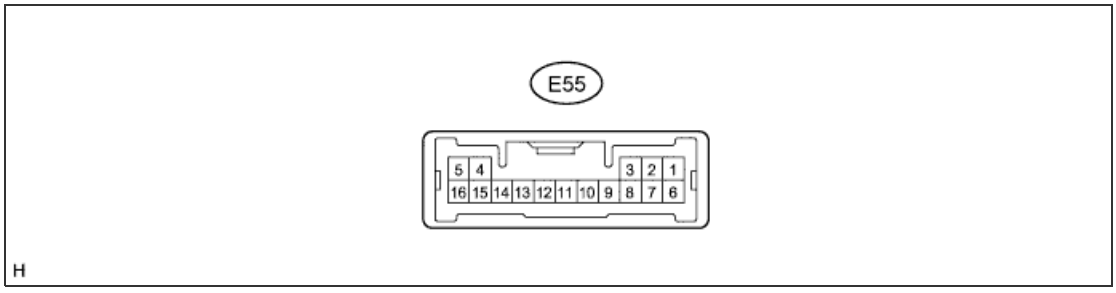
CHECK DISPLAY AND NAVIGATION MODULE DISPLAY (w/ Navigation System)

a. Disconnect the F64 display and navigation module display connector.

. Measure the resistance and voltage according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
F64-3 (IG) - F64-10 (GND1)	G - W-B	Ignition power supply	Engine switch on (IG)	11 to 14 V
			Engine switch off	Below 1 V
F64-1 (+B1) - F64-10 (GND1)	R - W-B	Battery power source	Always	11 to 14 V
F64-10 (GND1) - Body ground	W-B - Body ground	Ground	Always	Below 1 Ω

If the result is not as specified, there may be a malfunction on the wire harness side.



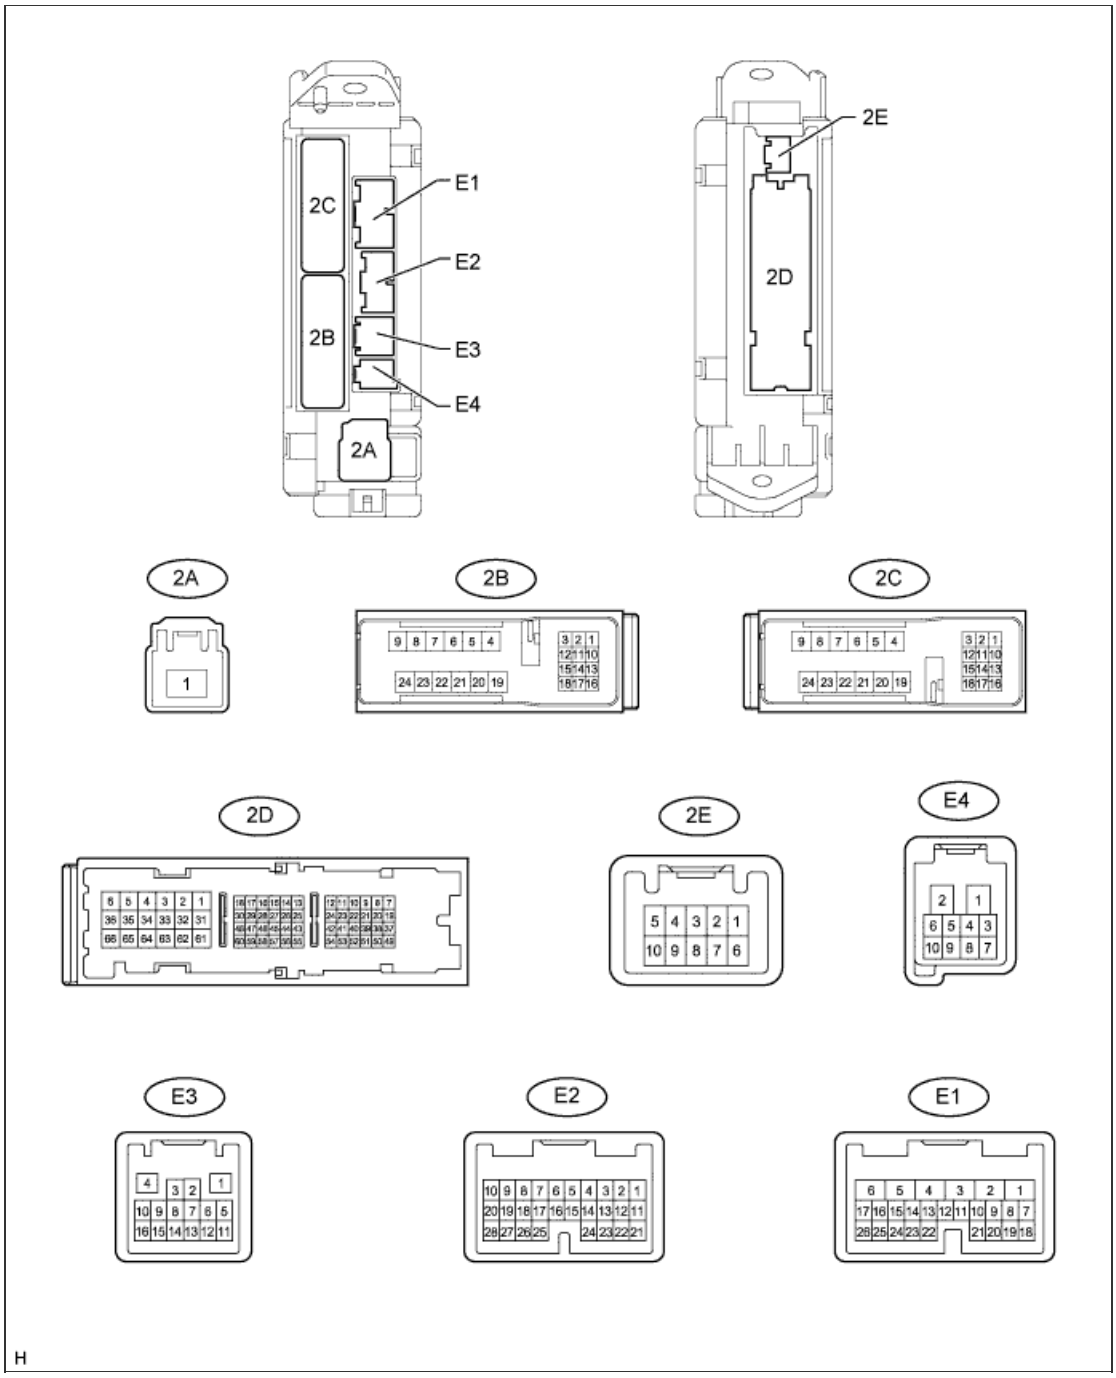
c. Reconnect the F64 display and navigation module display connector.

d. Measure the resistance and voltage according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
F63-2 (TEC+) - F64-10 (GND1)	R - W-B	Temperature up switch signal	Switch not pressed	Below 1 V
			Switch pressed	Alternating between 3.5 V or higher and below 1 V
F63-3 (TES+) - F64-10 (GND1)	L - W-B	Temperature up switch signal	Switch not pressed	Below 1 V
			Switch pressed	Alternating between 3.5 V or higher and below 1 V
F63-6 (AGND) - F64-10 (GND1)	B - N-B	Signal ground	Always	Below 1 Ω
F63-7 (TEC-) - F64-10 (GND1)	G - W-B	Temperature down switch signal	Switch not pressed	Below 1 V
			Switch pressed	Alternating between 3.5 V or higher and below 1 V
F63-8 (TES-) - F64-10 (GND1)	W - W-B	Temperature down switch signal	Switch not pressed	Below 1 V
			Switch pressed	Alternating between 3.5 V or higher and below 1 V
F63-9 (BGND) - F64-10 (GND1)	GR - W-B	Signal ground	Always	Below 1 Ω

If the result is not as specified, the display and navigation module display may have a malfunction.

CHECK NO. 2 AIR CONDITIONING CONTROL ASSEMBLY



a. Disconnect the E55 switch connector.

. Measure the resistance and voltage according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
E55-6 (IG) - E55-1 (E)	G - W-B	Ignition power supply	Always	11 to 14 V
E55-1 (E) - Body ground	W-B - Body ground	Ground	Always	Below 1 Ω

If the result is not as specified, there may be a malfunction on the wire harness side.

CHECK MAIN BODY ECU (COWL SIDE UNCTION BLOCK LH)

a. Disconnect the 2A, 2B, and 2D EC connectors.

. Measure the voltage and resistance according to the value(s) in the table below.

Terminal No. (Symbol)	Wiring Color	Terminal Description	Condition	Specified Condition
2B-20 (BATB) - Body ground	L - Body ground	Battery power supply	Always	11 to 14 V
2A-1 (ACC) - Body ground	GR - Body ground	ACC power supply	Engine switch on (ACC)	11 to 14 V
2A-1 (ACC) - Body ground	GR - Body ground	ACC power supply	Engine switch off	Below 1 V
2D-62 (GND2) - Body ground	W-B - Body ground	Ground	Always	Below 1 Ω

If the result is not as specified, there may be a malfunction in the wire harness.

for Preparation Click here

CHECK DTC

a. Connect the intelligent tester to the DLC3.

b. Turn the engine switch on (IG).

c. Turn the intelligent tester on.

d. Enter the following menus: Body / (desired system) / Trouble Codes.

e. Read the DTCs.

CLEAR DTC

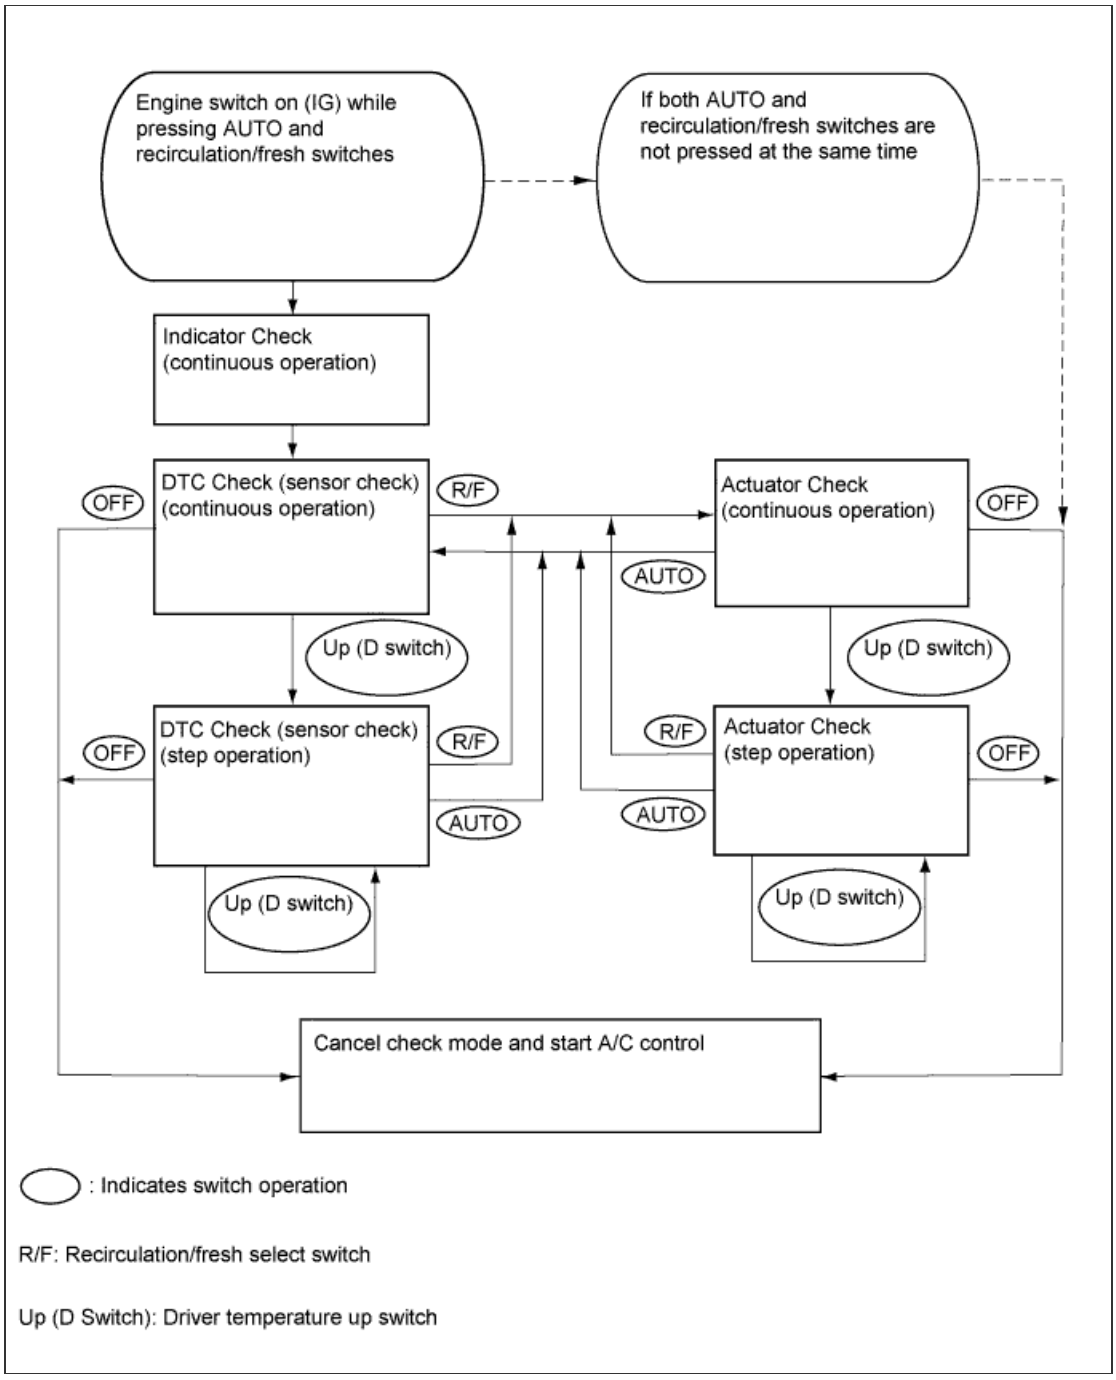
a. Connect the intelligent tester to the DLC3.

b. Turn the engine switch on (IG).

c. Turn the intelligent tester on.

d. Enter the following menus: Body / (desired system) / Trouble Codes.

e. Clear the DTCs.



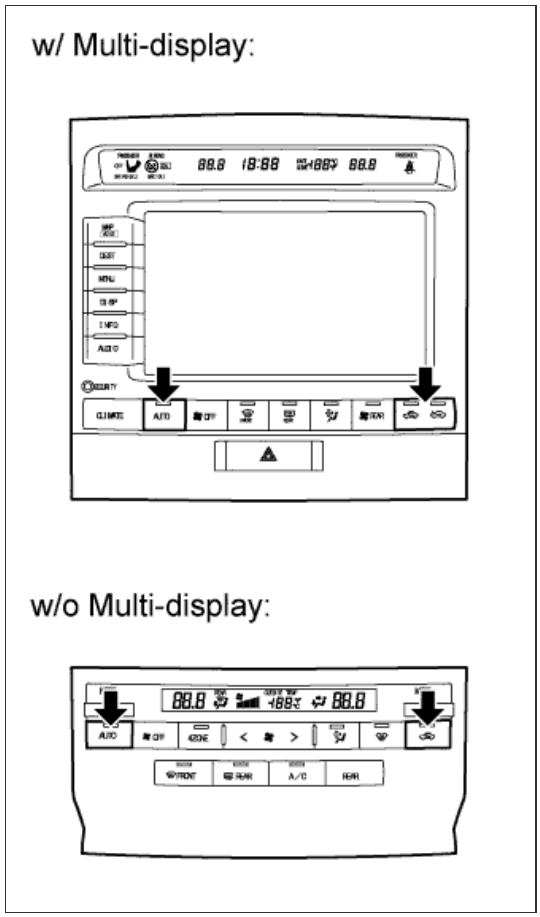
for Preparation Click here

LIST OF OPERATION METHODS

By operating each of the air conditioning control switches as shown in the diagram below, it is possible to enter the diagnostic check mode.

HINT:

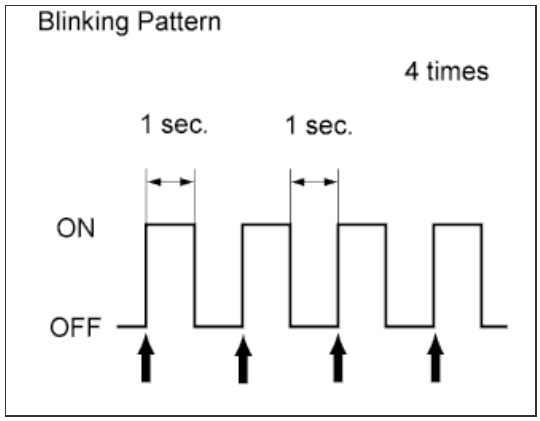
- **Use the same procedures for the LHD vehicle and RHD vehicle.**
- **The procedures listed below are for the LHD vehicle.**



INDICATOR CHECK

a. Press and hold the A/C control AUTO switch and recirculation/fresh switch simultaneously, and turn the engine switch on (IG). Continue holding the 2 switches until the panel diagnosis mode begins.

HINT:

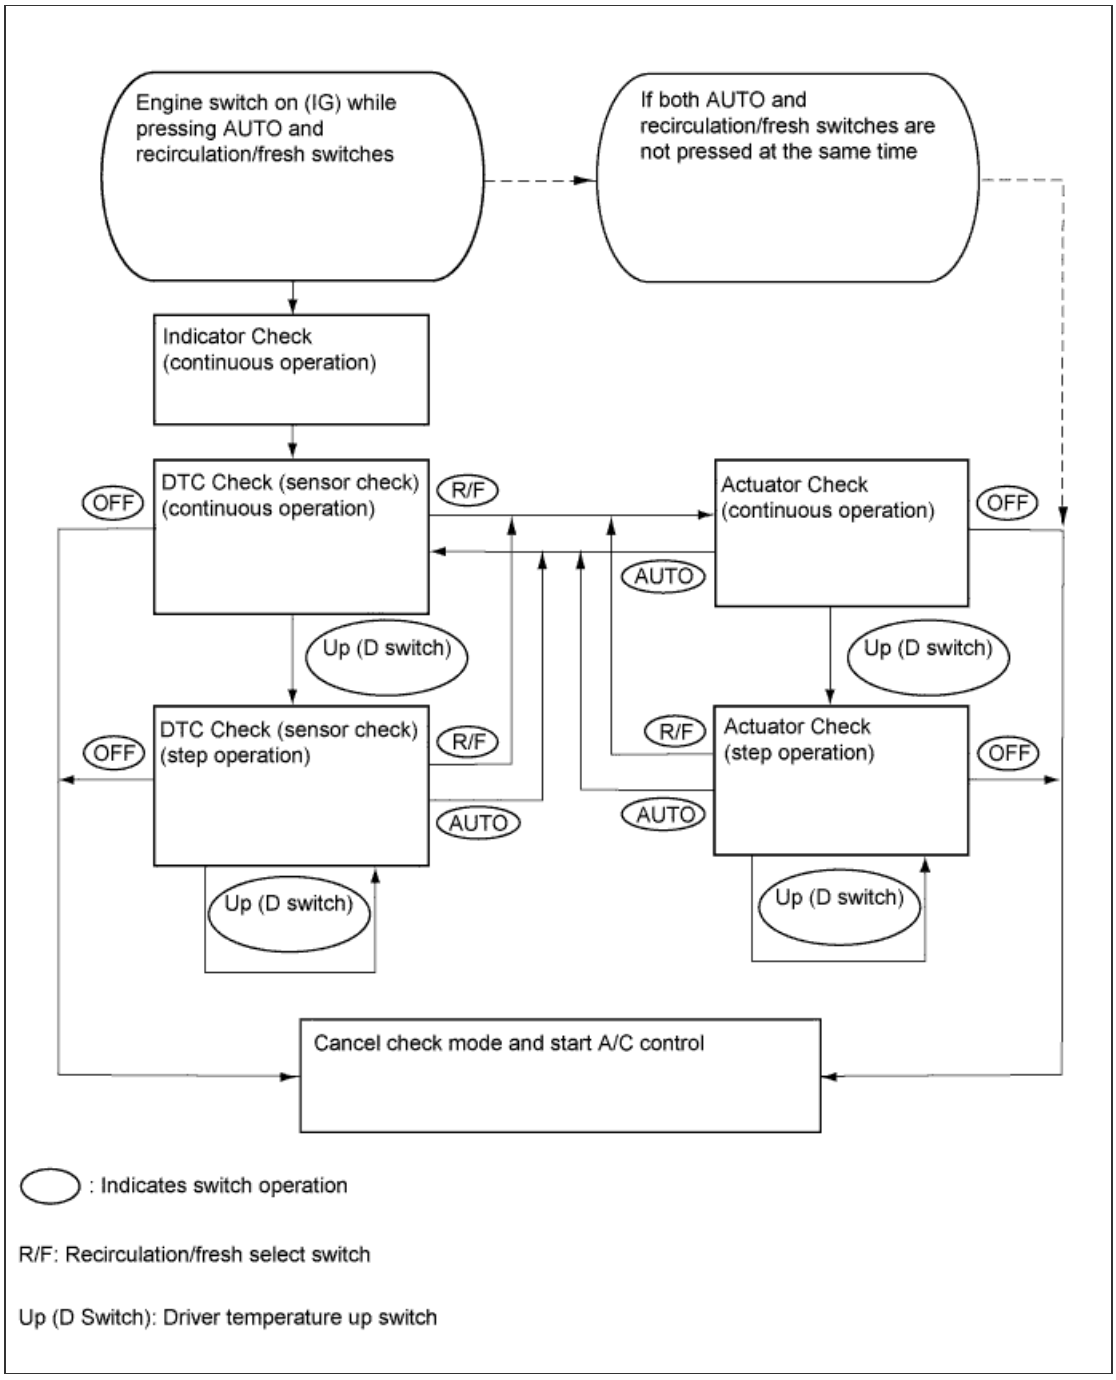


When the above operation is performed, each mode switch indicator light illuminates. For vehicles equipped with multi-display, each mode switch indicator light illuminates and an operation confirmation buzzer sounds.

b. Check that all indicators turn on and off 4 times in succession at 1 second intervals.

HINT:

- **After the indicator check is completed, the system enters the DTC mode automatically.**
- **Press the Off switch to cancel the indicator check.**



for Preparation Click here

LIST OF OPERATION METHODS

By operating each of the air conditioning control switches as shown in the diagram below, it is possible to enter the diagnostic check mode.

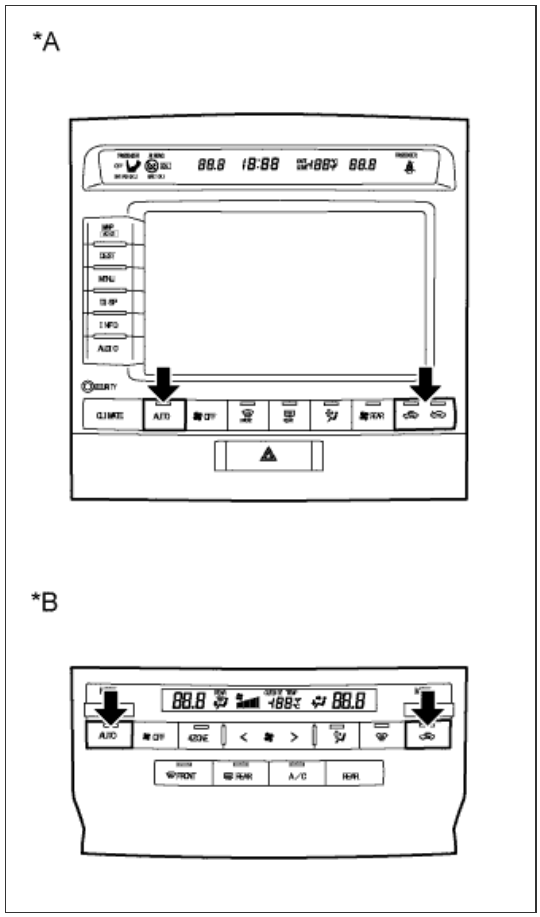
HINT:

- **Use the same procedures for the LHD vehicle and RHD vehicle.**
- **The procedures listed below are for the LHD vehicle.**

INDICATOR CHECK

a. Turn the engine switch off.

b. Turn the engine switch on (ACC) and wait at least 5 seconds.

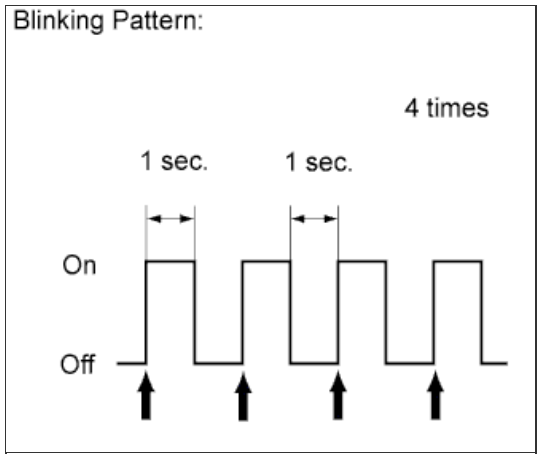


HINT:

Vehicle with Navigation System only.

c. Turn the engine switch on (IG) while pressing the A/ C control panel "AUTO" switch and "Recirculation/ Fresh" switch simultaneously.
Hold both switches until the indicator check screen appears.

Text in Illustration



A	w/ Navigation System
B	w/o Navigation System

d. Check that all indicators turn on and off 4 times in succession at 1 second intervals.

HINT:

- **After the indicator check is completed, the s stem enters the DTC mode automaticall**
- **Press the Off switch to cancel the indicator check.**

HINT:

Using the intelligent tester to read the Data List allows the values or states of switches, sensors, actuators and other items to be read without removing any parts. This non-intrusive inspection can be very useful because intermittent conditions or signals may be discovered before parts or wiring is disturbed. Reading the Data List information early in troubleshooting is one way to save diagnostic time.

NOTICE:

In the table below, the values listed under "Normal Condition" are reference values. Do not depend solely on these reference values when deciding whether a part is faulty or not.

DATA LIST

a. Connect the intelligent tester to the DLC3.

b. Turn the engine switch on (IG).

c. Turn the intelligent tester on.

d. Enter the following menus: Body / Air Conditioner / Data List.

e. Enter the following menus: Powertrain / Engine and ECT / Data List.

f. According to the display on the intelligent tester, read the Data List.

Air Conditioner

Tester Display	Measurement Item/Range	Normal Condition	Diagnostic Note
Room Temperature Sensor	Front room temperature sensor / Min.: -6.5°C (20.3°F) Max.: 57.25°C (135.05°F)	Actual room temperature for front seat displayed	Open in the circuit: -6.5°C (20.3°F). Short in the circuit: 57.25°C (135.05°F).
Ambient Temp Sensor	Ambient temperature sensor / Min.: -23.3°C (-9.94°F) Max.: 65.95°C (150.71°F)	Actual ambient temperature displayed	Open in the circuit: -23.3°C (-9.94°F). Short in the circuit: 65.95°C (150.71°F).
Adjusted Ambient Temp	Adjusted ambient temperature / Min.: -30.8°C (-23.44°F) Max.: 50.8°C (123.44°F)	Adjusted ambient temperature displayed	-
Evaporator Fin Thermistor	No. 1 cooler thermistor / Min.: -29.7°C (-21.46°F) Max.: 59.55°C (139.19°F)	Actual evaporator temperature displayed	Open in the circuit: -29.7°C (-21.46°F). Short in the circuit: 59.55°C (139.19°F).
Evaporator Target Temp	Target evaporator temperature / Min.: 1.5°C (34.7°F) Max.: 4.0°C (39.2°F)	Target evaporator temperature displayed	-
Solar Sensor (D Side)	Driver side solar sensor / Min.: 0, Max.: 255	Driver side solar sensor voltage increases as brightness increases	Open in the circuit: 0 Short in the circuit: 255
Solar Sensor (P Side)	Passenger side solar sensor / Min.: 0, Max.: 255	Passenger side solar sensor voltage increases as brightness increases	Open in the circuit: 0 Short in the circuit: 255
Engine Coolant Temp	Engine coolant temperature / Min.: 1.3°C (34.34°F) Max.: 90.55°C (194.99°F)	Actual engine coolant temperature displayed while engine warmed up	-
Set Temperature (D Side)	Driver side set temperature / MAX COLD: 15.5°C (59.9°F) MAX HOT: 32.5°C (90.5°F)	Driver side actual set temperature displayed	-
Set Temperature (P Side)	Passenger side set temperature / MAX COLD: 15.5°C (59.9°F) MAX HOT: 32.5°C (90.5°F)	Passenger side actual set temperature displayed	-
A/M Servo Targ Pulse (Rear D)	Rear air mix damper servo motor target pulse / Min.: 9, Max.: 54 (for LHD) Min.: 8, Max.: 53 (for RHD)	for LHD • MAX COOL: 9 (pulse) • MAX HOT: 54 (pulse) for RHD • MAX COOL: 53 (pulse)	-

		• MAX HOT: 8 (pulse)	
A/M Servo Targ Pulse (Rear P)	Rear air mix damper servo motor (for front passenger side) target pulse / Min.: 8, Max.: 53 (for LHD) Min.: 9, Max.: 54 (for RHD)	for LHD • MAX COOL: 53 (pulse) • MAX HOT: 8 (pulse) for RHD • MAX COOL: 9 (pulse) • MAX HOT: 54 (pulse)	-
Hand Free Telephone	Handsfree telephone / OFF or ON	ON: Handsfree telephone used OFF: Handsfree telephone not used	-
Blower Motor Speed Level	Blower motor speed level / Min.: 0 level, Max.: 31 level	Increases in range between 0 and 31 as blower motor speed increases	-
Regulator Pressure Sensor	Refrigerant pressure sensor / Min.: -0.4566 MPaG Max.: 3.2943 MPaG	Actual refrigerant pressure displayed	-
Room Temp Sensor (Rear)	Rear room temperature sensor / Min.: -6.5°C (20.3°F) Max.: 57.25°C (135.05°F)	Actual rear room temperature displayed	Open in the circuit: -6.5°C (20.3°F). Short in the circuit: 57.25°C (135.05°F).
Ambient Temp Sens (Rear)	No. 2 cooler thermistor / Min.: -29.7°C (-21.46°F) Max.: 59.55°C (139.19°F)	Actual rear evaporator temperature displayed	Open in the circuit: -29.7°C (-21.46°F). Short in the circuit: 59.55°C (139.19°F).
Blower Motor Level (Rear)	Rear blower motor speed level / Min.: 0, Max.: 31	Increases in range between 0 to 31 as rear blower motor speed increases	-
Air Mix Servo Targ Pulse(D)	Air mix damper servo motor (for driver side) target pulse / Min.: 8, Max.: 90 (for LHD) Min.: 8, Max.: 90 (for RHD)	for LHD • MAX COOL: 90 (pulse) • MAX HOT: 8 (pulse) for RHD • MAX COOL: 8 (pulse) • MAX HOT: 90 (pulse)	-
Air Mix Servo Targ Pulse(P)	Air mix damper servo motor (for front passenger side) target pulse / Min.: 8, Max.: 90 (for LHD) Min.: 8, Max.: 90 (for RHD)	for LHD • MAX COOL: 8 (pulse) • MAX HOT: 90 (pulse) for RHD • MAX COOL: 90 (pulse) • MAX HOT: 8 (pulse)	-
Air Inlet Damper Targ Pulse	REC/FRS damper servo motor target pulse / Min.: 9, Max.: 37	for LHD Recirculation: 37 (pulse) Fresh: 9 (pulse) for RHD Recirculation: 9 (pulse) Fresh: 37 (pulse)	-
Cool Air Bypass Pulse	Cool air bypass damper servo motor target pulse / Min.: 6, Max.: 57	Shut: 6 (pulse) Open: 57 (pulse)	-
Electric Heater Count	Electric heater count / Min.: 0, Max.: 3	-	-
Shift Set Temperature	Shift set temperature / +2 C, +1 C, NORMAL, -1 C, -2 C	Customized value displayed	-
Air Inlet Mode	Air inlet mode / AUTO, MANUAL	Customized value displayed	-
Compressor Mode	Compressor mode / AUTO, MANUAL	Customized value displayed	-
Compressor/DEF Mode	Compressor/DEF mode / LINK, NORMAL	Customized value displayed	-
Evaporator Control	Evaporator control / AUTO, MANUAL	Customized value displayed	-
Button Press Buzzer	Button press buzzer / ON or OFF	Customized value displayed	-
Foot/DEF Auto Mode	FOOT/DEF auto mode / ON or OFF	Customized value displayed	-
Foot/DEF Auto Blow Up	FOOT/DEF auto blower up function / ON or OFF	Customized value displayed	-
Filter Sensor	Filter sensor / LESS, NORMAL, MORE	Customized value displayed	-
Rear A/P HI Set	Rear A/P HI set / ON or OFF	Customized value displayed	-
Ambient Temperature Shift	Ambient temperature shift / +3 C, +2 C, +1 C, NORMAL, -1 C, -2 C, -3 C	Customized value displayed	-

ACTIVE TEST

HINT:

Using the intelligent tester to perform Active Tests allows relays, VSVs, actuators and other items to be operated without removing any parts. This non-intrusive functional inspection can be very useful because intermittent operation may be discovered before parts or wiring is disturbed. Performing Active Tests early in troubleshooting is one way to save diagnostic time. Data List information can be displayed while performing Active Tests.

a. Connect the intelligent tester to the DLC3.

b. Turn the engine switch on (IG).

c. Turn the intelligent tester on.

d. Enter the following menus: Body / Air Conditioner / Active Test.

e. According to the display on the intelligent tester, perform the Active Test.

Tester Display	Test Part	Control Range	Diagnostic Note
Blower Motor	Front blower motor	Min.: 0, Max.: 31	-
Magnetic Clutch Relay	Magnetic clutch relay	OFF or ON	-
Air Mix Servo Targ Pulse(D)	Air mix servo motor pulse (Front A/C D side)	Min.: 8, Max.: 90	-

* The air conditioning amplifier memorizes the DTC of the respective malfunction that has occurred for the period of the time indicated in the brackets.

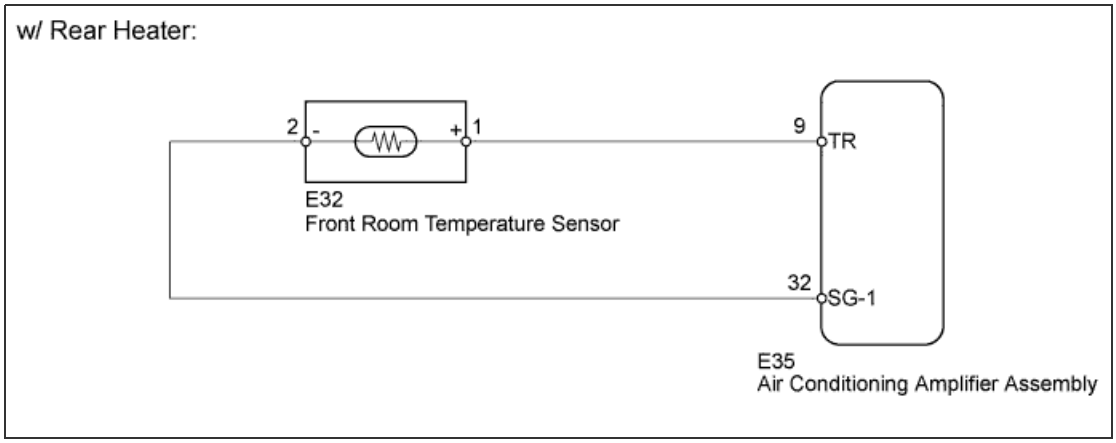
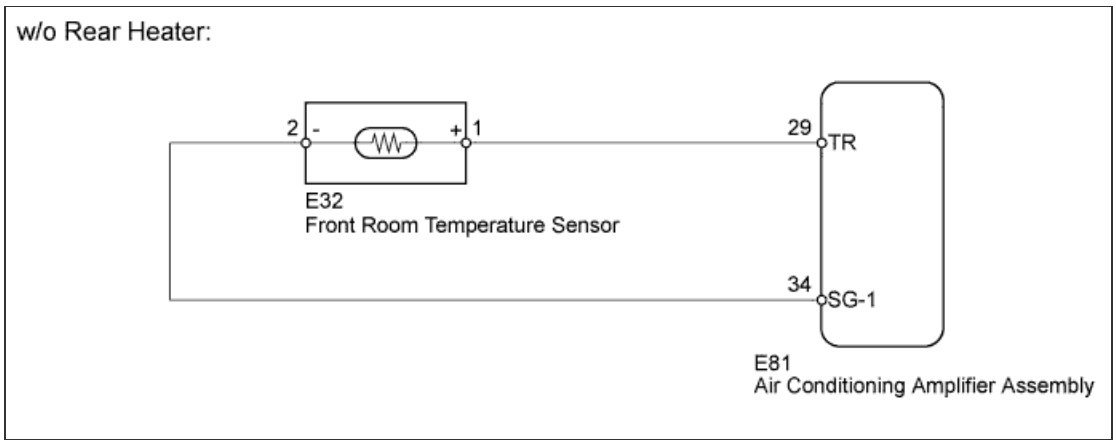
DTC B1411/11 Room Temperature Sensor Circuit



for Preparation Click here



DESCRIPTION

The front room temperature sensor for the front seat is installed in the instrument panel to detect the room temperature and control the heater and air conditioner "auto" mode. The resistance of the room temperature sensor changes in accordance with the front room temperature. As the temperature decreases, the resistance increases. As the temperature increases, the resistance decreases.
The air conditioning amplifier assembly applies voltage (5 V) to the front room temperature sensor and reads voltage changes as the resistance of the front room temperature sensor changes. This sensor also sends the appropriate signals to the air conditioning amplifier assembly.

DTC Code	DTC Detection Condition	Trouble Area
B1411/11	An open or short in the front room temperature sensor circuit.	• Front room temperature sensor • Harness or connector between room temperature sensor and air conditioning amplifier assembly • Air conditioning amplifier assembly

WIRING DIAGRAM

INSPECTION PROCEDURE

1.READ VALUE USING INTELLIGENT TESTER (FRONT ROOM TEMPERATURE SENSOR)

a. Use the Data List to check if the front room temperature sensor is functioning properly.

Air Conditioner

Tester Display	Measurement Item/Range	Normal Condition	Diagnostic Note
Room Temperature Sensor	Front room temperature sensor / Min.: -6.5°C (20.3°F) Max.: 57.25°C (135.05°F)	Actual room temperature for front seat displayed	Open in the circuit: -6.5°C (20.3°F). Short in the circuit: 57.25°C (135.05°F).

OK:

The display is as specified in the normal condition.

NG → Go to step 2

OK

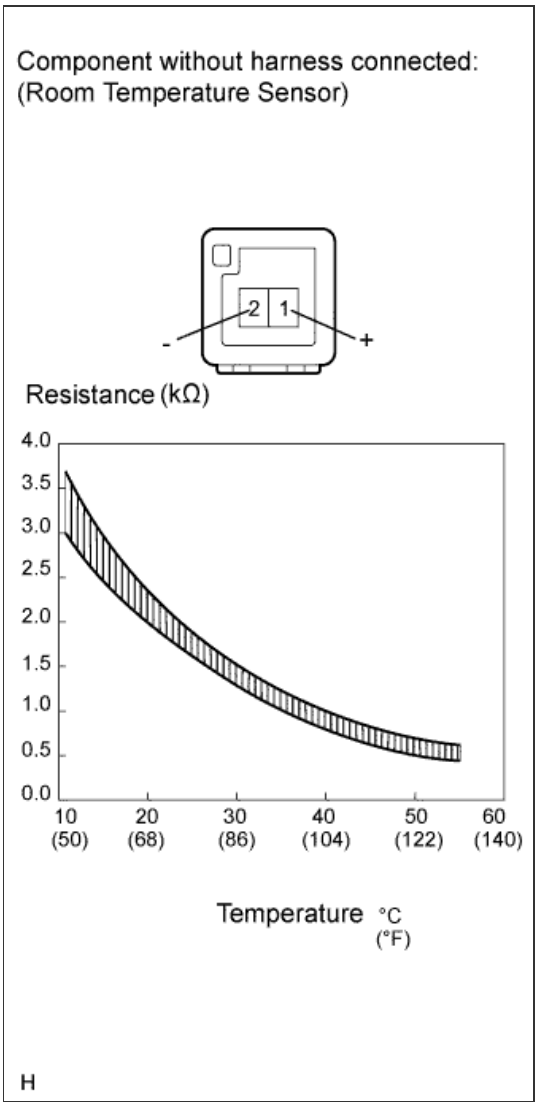
REPLACE AIR CONDITIONING AMPLIFIER ASSEMBLY (Click here)

2.INSPECT ROOM TEMPERATURE SENSOR

a. Remove the front room temperature sensor (Click here).

b. Measure the resistance according to the value(s) in the table below.

Standard Resistance:



Tester Connection	Condition	Specified Condition
1 (+) - 2 (-)	10°C (50°F)	3.00 to 3.73 kΩ
	15°C (59°F)	2.45 to 2.88 kΩ
	20°C (68°F)	1.95 to 2.30 kΩ
	25°C (77°F)	1.60 to 1.80 kΩ
	30°C (86°F)	1.28 to 1.47 kΩ
	35°C (95°F)	1.00 to 1.22 kΩ
	40°C (104°F)	0.80 to 1.00 kΩ
	45°C (113°F)	0.65 to 0.85 kΩ
	50°C (122°F)	0.50 to 0.70 kΩ
	55°C (131°F)	0.44 to 0.60 kΩ
	60°C (140°F)	0.36 to 0.50 kΩ

NOTICE:

- **Even slightly touching the sensor may change the resistance value. Be sure to hold the connector of the sensor.**
- **When measuring, the sensor temperature must be the same as the ambient temperature.**

HINT:

As the temperature increases, the resistance decreases (see the graph).

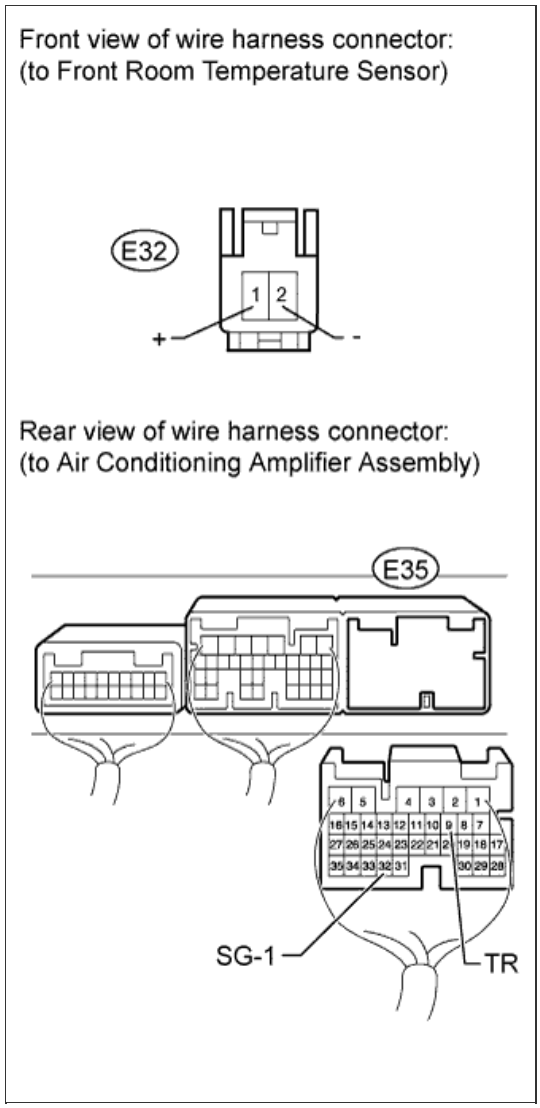
NG → REPLACE FRONT ROOM TEMPERATURE SENSOR (Click here)

OK

3.CHECK HARNESS AND CONNECTOR (FRONT ROOM TEMPERATURE SENSOR - AIR CONDITIONING AMPLIFIER)

a. w/ Rear Heater

i. Disconnect the E32 sensor connector.



ii. Disconnect the E35 amplifier connector.

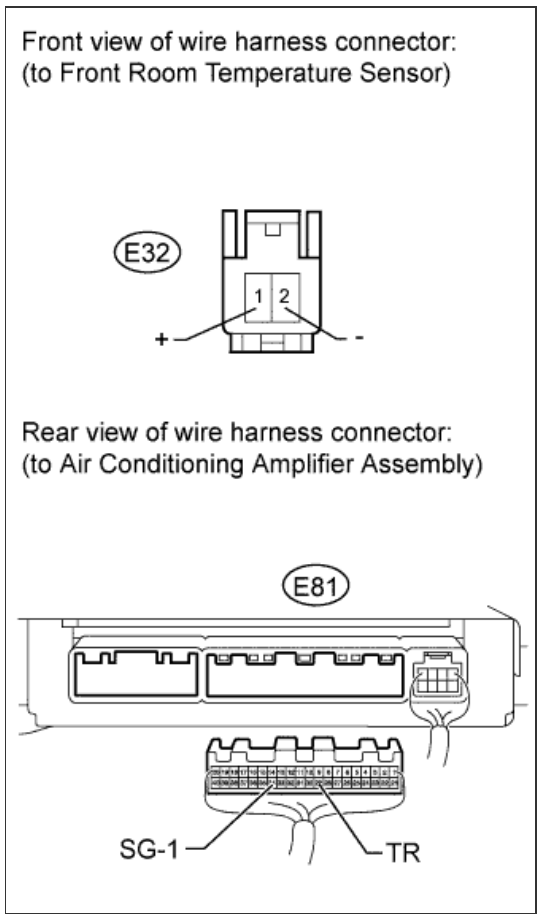
iii. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

Tester Connection	Condition	Specified Condition
E32-1 (+) - E35-9 (TR)	Always	Below 1 Ω
E32-2 (-) - E35-		

32 (SG-1)		
E35-9 (TR) - Body ground	Always	10 kΩ or higher
E35-32 (SG-1) - Body ground		

b. w/o Rear Heater



i. Disconnect the E32 sensor connector.

ii. Disconnect the E81 amplifier connector.

iii. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

Tester Connection	Condition	Specified Condition
E32-1 (+) - E81-29 (TR)	Always	Below 1 Ω
E32-2 (-) - E81-34 (SG-1)		
E81-29 (TR) - Body ground	Always	10 kΩ or higher
E81-34 (SG-1) - Body ground		

NG → REPAIR OR REPLACE HARNESS OR CONNECTOR

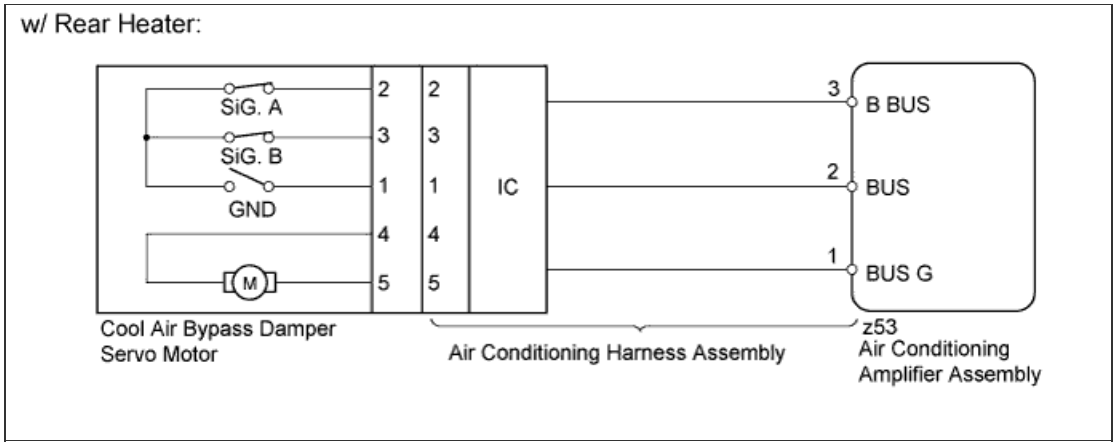
OK

REPLACE AIR CONDITIONING AMPLIFIER ASSEMBLY (Click here)

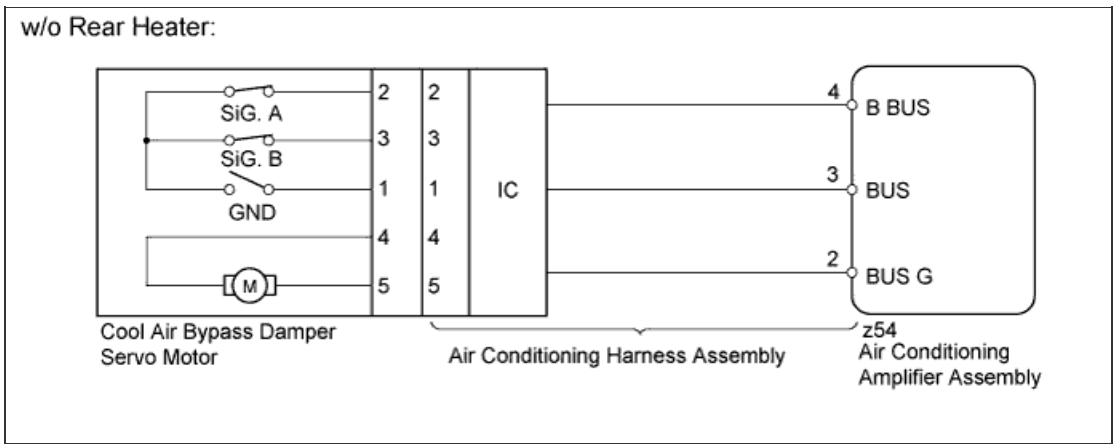
DTC B1445/45 Passenger Side Cool Air Bypass Damper Control

for Preparation Click here

DESCRIPTION



The cool air bypass damper servo motor sends pulse signals to inform the air conditioning amplifier assembly of the damper position. The air conditioning amplifier assembly activates the motor (normal or reverse) based on the signals to move the cool air bypass damper to any position. As a result, when the air conditioner is operating, the temperature of the air blowing toward the head area is controlled.



HINT:

Confirm that no mechanical problem is present because this trouble code can be output when either a damper link or damper is mechanically locked.

DTC Code	DTC Detection Condition	Trouble Area
B1445/45	The cool air bypass damper position does not change even if the air conditioning amplifier assembly operates the cool air bypass damper servo motor.	• Cool air bypass damper servo motor • Air conditioning harness assembly • Air conditioning amplifier assembly

WIRING DIAGRA

INSPECTION PROCEDURE

1.READ VALUE USING INTELLIGENT TESTER (COOL AIR BYPASS DAMPER SERVO MOTOR)

a. Use the Data List to check if the servo motor is functioning properly.

Air Conditioner

Tester Display	Measurement Item/Range	Normal Condition	Diagnostic Note
Cool Air Bypass Pulse	Cool air bypass damper servo motor target pulse / Min.: 6, Max.: 57	Shut: 6 (pulse) Open: 57 (pulse)	-

OK:

The display is as specified in the normal condition.

NG → Go to step 2

OK

REPLACE AIR CONDITIONING A PLIFIER ASSE BLY (Click here)

2.CHECK COOL AIR BYPASS DA PER SERVO OTOR (OPERATION)

a. for LHD:

i. Replace the cool air bypass damper servo motor (Click here).

b. for RHD:

i. Replace the cool air bypass damper servo motor (Click here).

HINT:

Since the servo motor cannot be inspected while it is removed from the vehicle, replace the servo motor with a normal one.

NEXT

3.CHECK FOR DTC

a. Clear the DTCs (Click here).

b. Check for DTCs (Click here).

OK:
DTC B1445 is not o tp t.

Res lt

Result	Proceed to
OK (for LHD)	A
OK (for RHD)	B
NG (for LHD)	C
NG (for RHD)	D

B → REPLACE COOL AIR BYPASS DA PER SERVO OTOR (Click here)

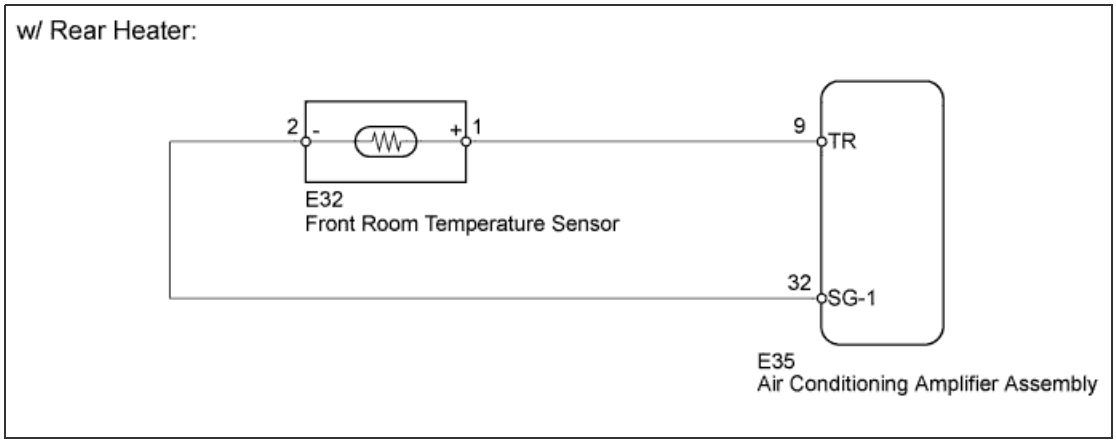
C → REPLACE AIR CONDITIONING HARNESS ASSE BLY (Click here)

D → REPLACE AIR CONDITIONING HARNESS ASSE BLY (Click here)

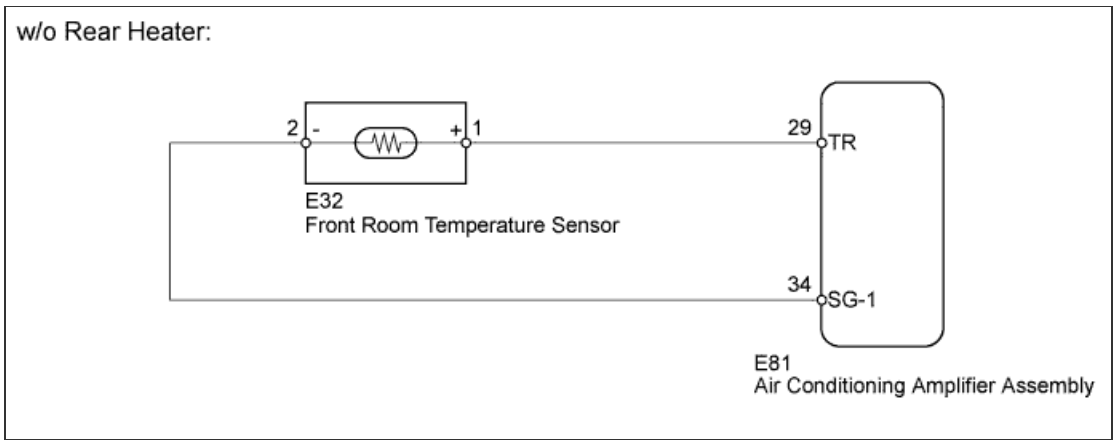
A

REPLACE COOL AIR BYPASS DA PER SERVO OTOR (Click here)

DTC B1411/11 Room Temperature Sensor Circuit



for Preparation Click here



DESCRIPTION

The front room temperature sensor for the front seat is installed in the instrument panel to detect the room temperature and control the heater and air conditioner "auto" mode. The resistance of the room temperature sensor changes in accordance with the front room temperature. As the temperature decreases, the resistance increases. As the temperature increases, the resistance decreases.
The air conditioning amplifier assembly applies voltage (5 V) to the front room temperature sensor and reads voltage changes as the resistance of the front room temperature sensor changes. This sensor also sends the appropriate signals to the air conditioning amplifier assembly.

DTC Code	DTC Detection Condition	Trouble Area
B1411/11	An open or short in the front room temperature sensor circuit.	• Front room temperature sensor • Harness or connector between room temperature sensor and air conditioning amplifier assembly • Air conditioning amplifier assembly

	20°C (68°F)	1.95 to 2.30 kΩ
	25°C (77°F)	1.60 to 1.80 kΩ
	30°C (86°F)	1.28 to 1.47 kΩ
	35°C (95°F)	1.00 to 1.22 kΩ
	40°C (104°F)	0.80 to 1.00 kΩ
	45°C (113°F)	0.65 to 0.85 kΩ
	50°C (122°F)	0.50 to 0.70 kΩ
	55°C (131°F)	0.44 to 0.60 kΩ
	60°C (140°F)	0.36 to 0.50 kΩ

NOTICE:

- **Even slightly touching the sensor may change the resistance value. Be sure to hold the connector of the sensor.**
- **When measuring, the sensor temperature must be the same as the ambient temperature.**

HINT:

As the temperature increases, the resistance decreases (see the graph).

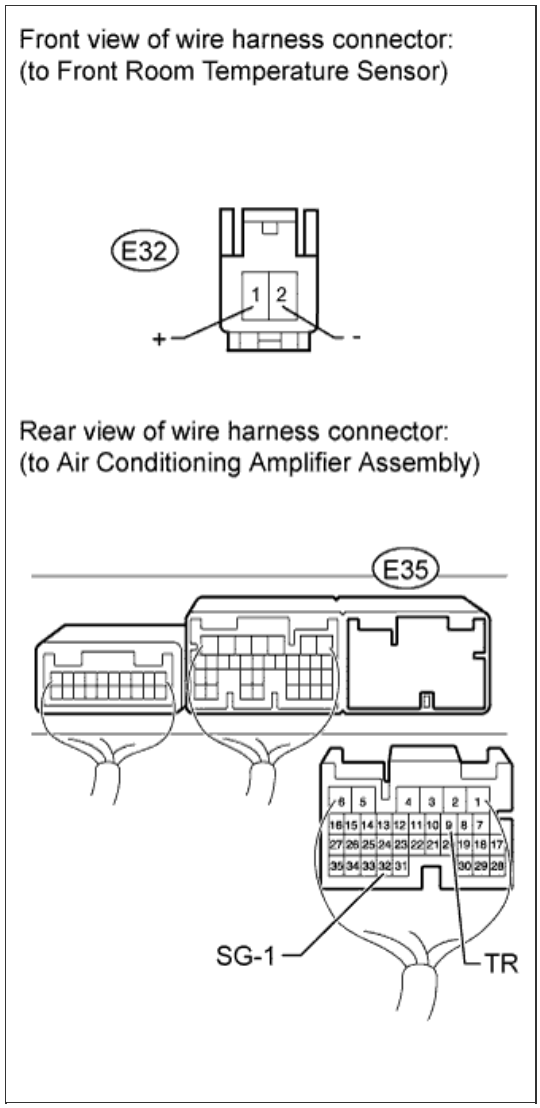
NG → REPLACE FRONT ROOM TEMPERATURE SENSOR (Click here)

OK

3.CHECK HARNESS AND CONNECTOR (FRONT ROOM TEMPERATURE SENSOR - AIR CONDITIONING AMPLIFIER)

a. w/ Rear Heater

i. Disconnect the E32 sensor connector.



ii. Disconnect the E35 amplifier connector.

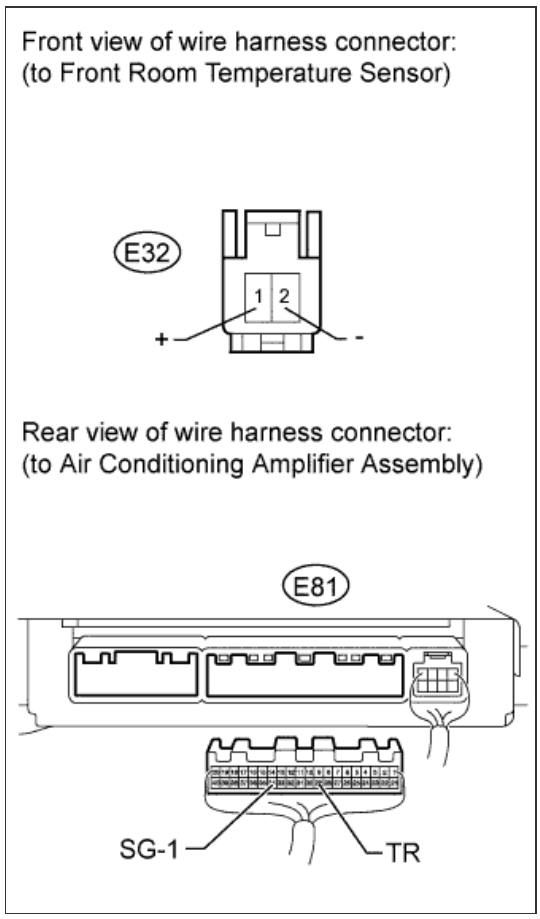
iii. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

Tester Connection	Condition	Specified Condition
E32-1 (+) - E35-9 (TR)	Always	Below 1 Ω
E32-2 (-) - E35-		

32 (SG-1)		
E35-9 (TR) - Body ground	Always	10 kΩ or higher
E35-32 (SG-1) - Body ground		

b. w/o Rear Heater



i. Disconnect the E32 sensor connector.

ii. Disconnect the E81 amplifier connector.

iii. Measure the resistance according to the value(s) in the table below.

Standard Resistance:

Tester Connection	Condition	Specified Condition
E32-1 (+) - E81-29 (TR)	Always	Below 1 Ω
E32-2 (-) - E81-34 (SG-1)		
E81-29 (TR) - Body ground	Always	10 kΩ or higher
E81-34 (SG-1) - Body ground		

NG → REPAIR OR REPLACE HARNESS OR CONNECTOR

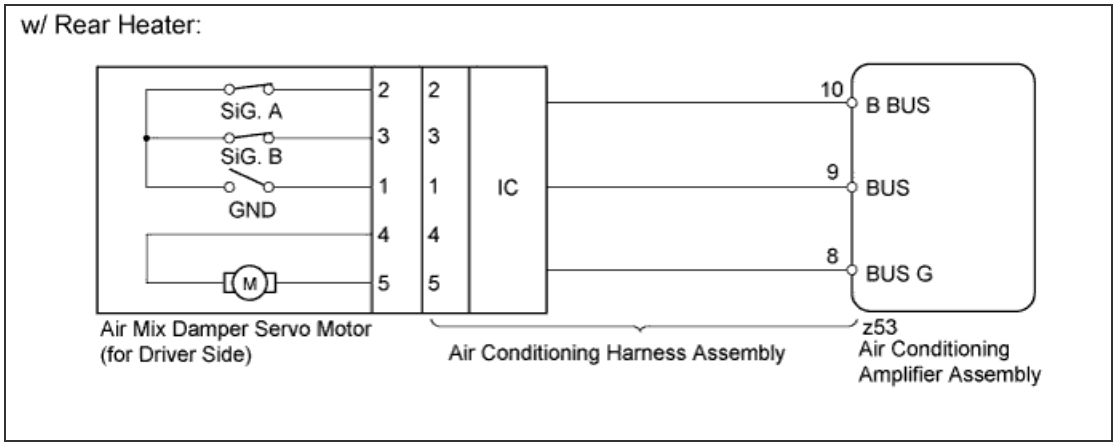
OK

REPLACE AIR CONDITIONING AMPLIFIER ASSEMBLY (Click here)

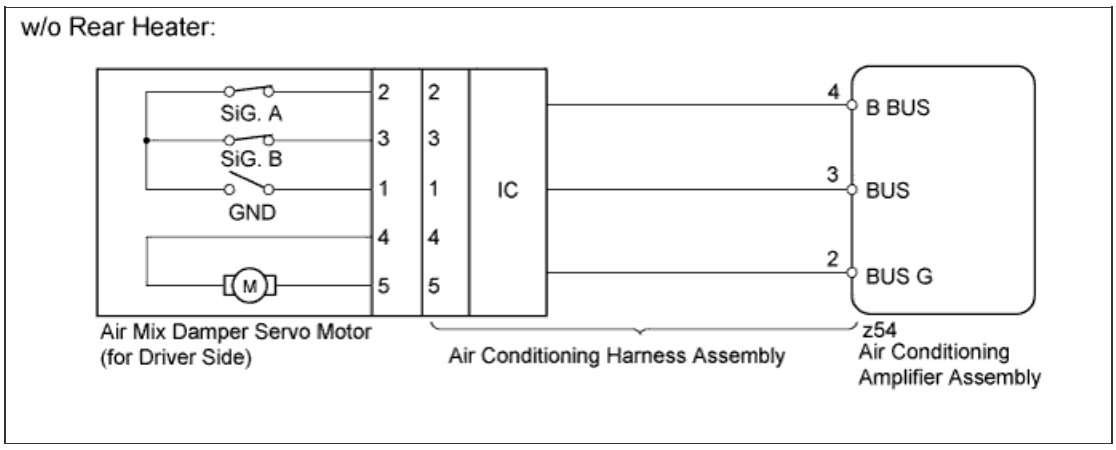
DTC B1446/46 Air Mix Damper Control Servo Motor Circuit (Driver Side)

for Preparation Click here

DESCRIPTION



The front air mix damper servo motor (for driver side) sends pulse signals to inform the air conditioning amplifier assembly of the damper position. The air conditioning amplifier assembly activates the motor (normal or reverse) based on the signals to move the air mix damper (for driver side) to any position. As a result, the amount of air that has passed through the evaporator and is passing through the heater core is adjusted, and the temperature of the air blowing toward the driver side is controlled.



HINT:

Confirm that no mechanical problem is present because this trouble code can be output when either a damper link or damper is mechanically locked.

DTC Code	DTC Detection Condition	Trouble Area
B1446/46	The air mix damper position does not change even if the air conditioning amplifier assembly operates the air mix damper servo motor.	• Air mix damper servo motor (for driver side) • Air conditioning harness assembly • Air conditioning amplifier assembly

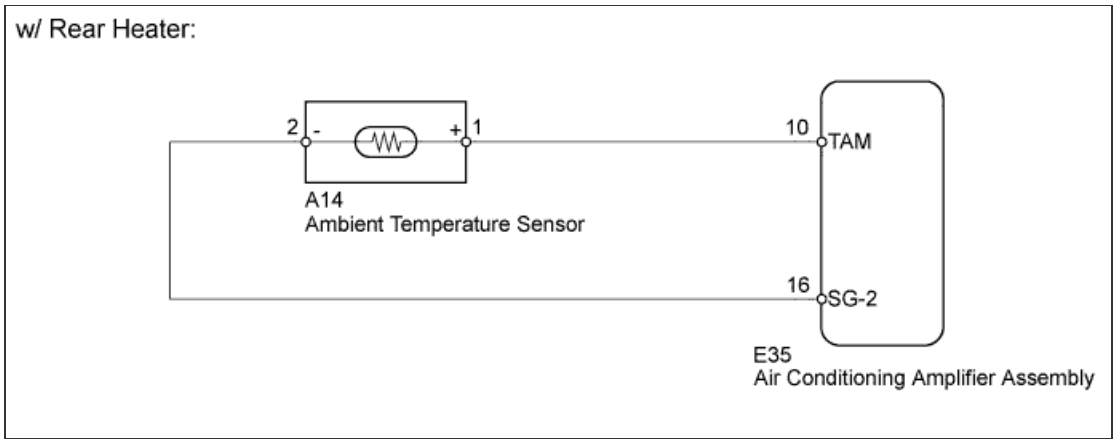
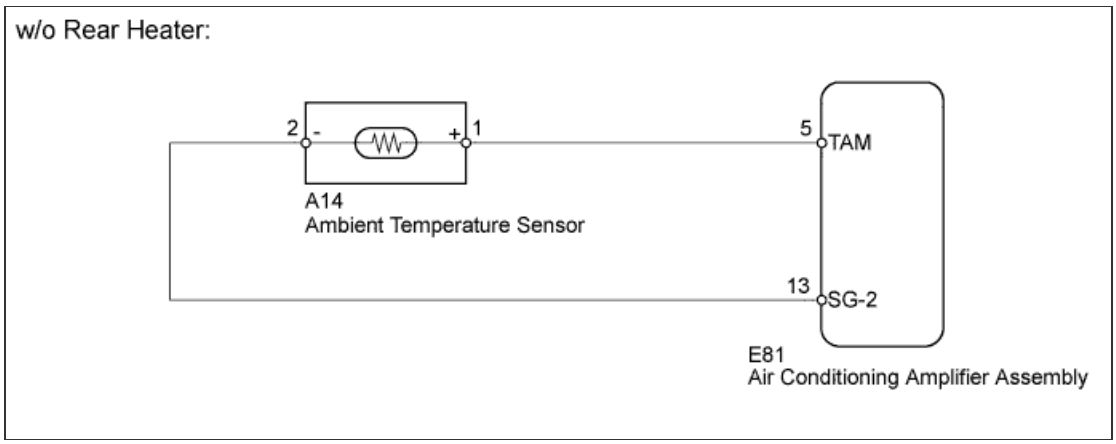
DTC B1412/12 Ambient Temperature Sensor Circuit

for Preparation Click here



DESCRIPTION



The ambient temperature sensor is installed in the front part of the condenser to detect the ambient temperature and control the air conditioner "auto" mode. The sensor connected to the air conditioning amplifier assembly detects fluctuations in the ambient temperature. This data is used for controlling the room temperature. The sensor sends a signal to the air conditioning amplifier assembly. The resistance of the ambient temperature sensor changes in accordance with the ambient temperature. As the temperature decreases, the resistance increases. As the temperature increases, the resistance decreases.

The air conditioning amplifier assembly applies voltage (5 V) to the ambient temperature sensor and reads voltage changes as the resistance of the ambient temperature sensor changes.

DTC Code	DTC Detection Condition	Trouble Area
B1412/12	An open or short in the ambient temperature sensor circuit.	• Ambient temperature sensor • Harness or connector between ambient temperature sensor and air conditioning amplifier assembly • Air conditioning amplifier assembly

WIRING DIAGRAM

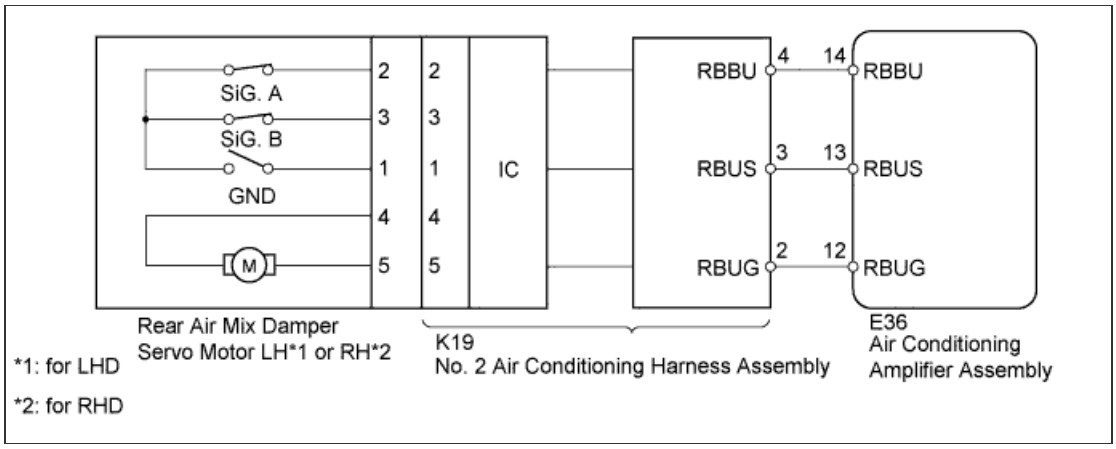
DTC B1447/47 Rear Air Mix Damper Control Servo Motor Circuit on Driver Side

for Preparation Click here

DESCRIPTION



The rear air mix damper servo motor (for driver side) sends pulse signals to indicate the damper position to the air conditioning amplifier assembly. The air conditioning amplifier assembly activates the motor (normal or reverse) based on these signals to move the rear air mix damper to the appropriate position. This adjusts the amount of air passing through the heater core after passing the evaporator and controls the temperature of the blown air.

HINT:

Confirm that no mechanical problem is present because this trouble code can be output when either a damper link or damper is mechanically locked.

DTC Code	DTC Detection Condition	Trouble Area
B1447/47	The rear air mix damper position does not change even if the air conditioning amplifier assembly operates the rear air mix damper servo motor.	• Rear air mix damper servo motor • No. 2 air conditioning harness assembly • Wire harness between No. 2 air conditioning harness assembly and air conditioning amplifier assembly • Air conditioning amplifier assembly

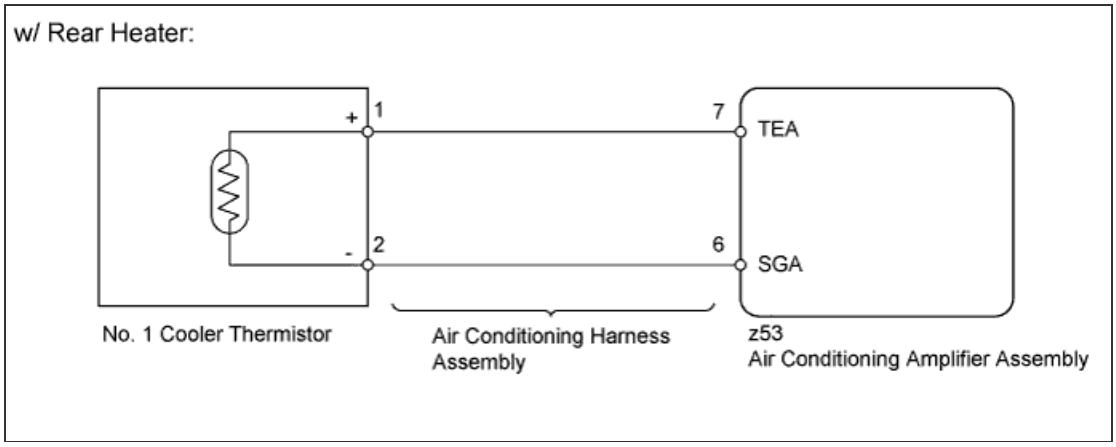
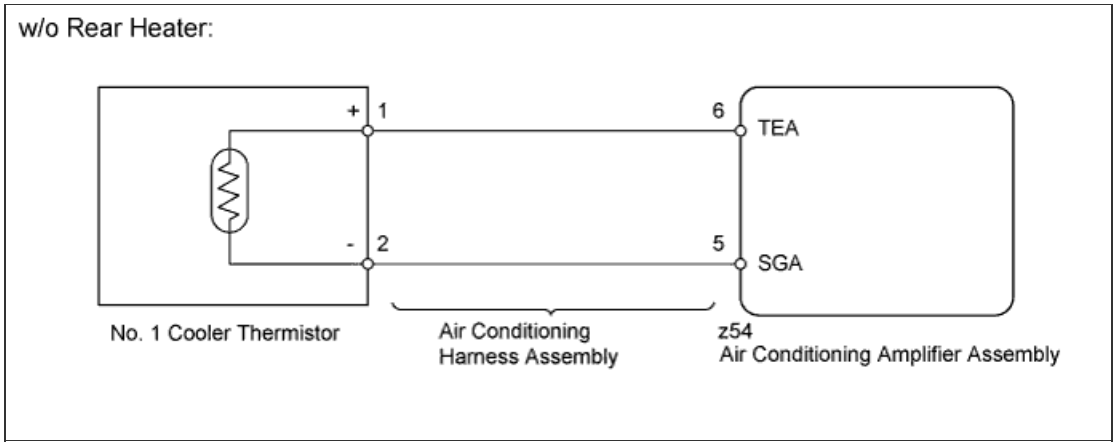
DTC B1413/13 Evaporator Temperature Sensor Circuit



for Preparation Click here



DESCRIPTION

The No. 1 cooler thermistor is installed on the evaporator in the air conditioner unit to detect the cooled air temperature that has passed through the evaporator and control the air conditioning. It sends appropriate signals to the air conditioning amplifier assembly. The resistance of the No. 1 cooler thermistor changes in accordance with the cooled air temperature that has passed through the evaporator. As the temperature decreases, the resistance increases. As the temperature increases, the resistance decreases.
The air conditioning amplifier assembly applies voltage (5 V) to the No. 1 cooler thermistor and reads voltage changes as the resistance of the No. 1 cooler thermistor changes. This sensor is used for frost prevention.

DTC Code	DTC Detection Condition	Trouble Area
B1413/13	An open or short in the No. 1 cooler thermistor circuit.	• No. 1 cooler thermistor • Air conditioning harness assembly (No. 1 cooler thermistor) • Air conditioning amplifier assembly

	30°C (86°F)	1.11 to 1.32 kΩ

NOTICE:

- **Even slightly touching the sensor may change the resistance value. Be sure to hold the connector of the sensor.**
- **When measuring, the sensor temperature must be the same as the ambient temperature.**

HINT:

As the temperature increases, the resistance decreases (see the graph).

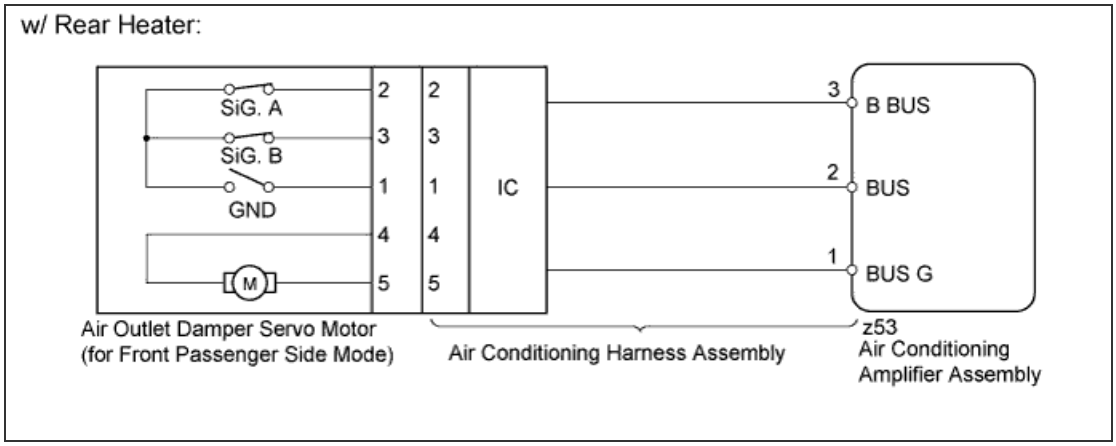
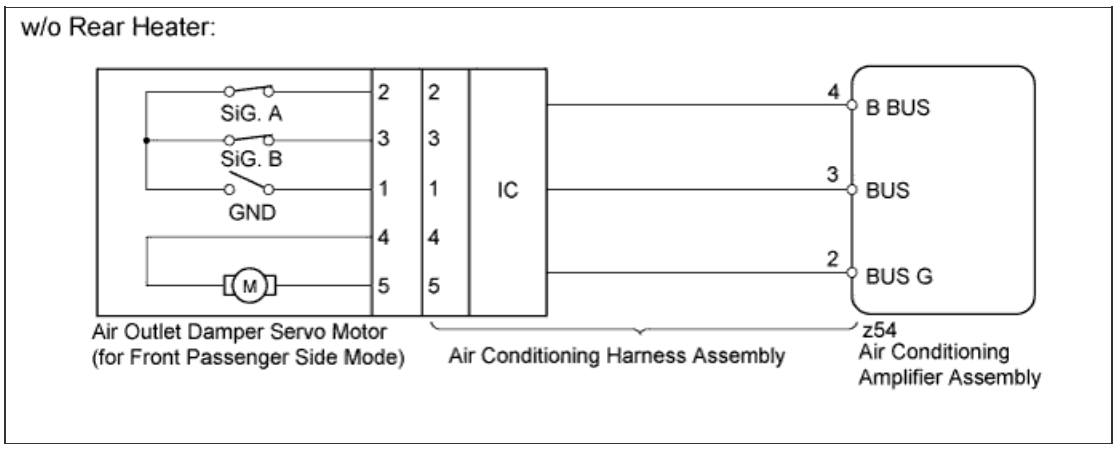
DTC B1448/48 Passenger Side FACE Servo Motor Circuit

for Preparation Click here

DESCRIPTION



The air outlet damper servo motor (for front passenger side mode) sends pulse signals to inform the air conditioning amplifier assembly of the damper position. The air conditioning amplifier assembly activates the motor (normal or reverse) based on the signals to move the air outlet damper (for front passenger side mode) to any position, which controls the air outlet changes.



HINT:

Confirm that no mechanical problem is present because this trouble code can be output when either a damper link or damper is mechanically locked.

DTC Code	DTC Detection Condition	Trouble Area
B1448/48	The air outlet damper position does not change even if the air conditioning amplifier assembly operates the air outlet damper servo motor.	• Air outlet damper servo motor (for front passenger side mode) • Air conditioning harness assembly • Air conditioning amplifier assembly
